Hicks-Beach, Right Hon. Sir Michael Edward, P.C., M.P., D.C.L., b. 1837. Educated at Eton and Christ Church, Oxford (B.A., 1st class Law and Mod. Hist., 1858; M.A. 1861; Hon. D.C.L. 1878). Is a J.P. and D.L. for Gloucestershire. Sat as Conservative M.P. for E. Gloucestershire (1864-85; W. Bristol (1885). Has held the following official appointments: Parliamentary Secretary to Poor Law Board (March to Aug. 1868); Under-Secretary for Home Office (Aug. to Dec. 1868); Chief Secretary for Ireland (1874-78 and 1886); Secretary of State for Colonies (1878-80); Chancellor of the Exchequer and Leader of the House of Commons in the first Salisbury administration. On his lordship's return to power in 1886 Sir M. resumed the Chief Secretaryship for Ireland, but after a few weeks resigned, owing to failing eyesight. After travelling for some time on the Continent he returned to his Parliamentary duties, and re-entered the cabinet as President of the Board of Trade in Feb. '88. In the session of '89 he introduced the bill for regulating railway rates and charges. See SESSION, PARLIAMENTARY.

High Church. See CHURCH OF ENGLAND.

Historical Manuscripts Commission. A Royal Commission was appointed in '69 to examine and report upon the collections of manuscripts in the possession of private families and municipal authorities, who have rendered the commissioners every assistance in the investigation and classification of manuscripts illustrative of history, constitutional law, and general literature. The Commission was re-constituted in '83 as follows: Lord Escher (chairman), Lord Carlingford, Marquis of Lothian, Marquis of Salisbury, Marquis of Bath, Earl of Rosebery, Earl of Carnarvon, Lord Edmund Fitzmaurice, Bishop of Limerick, the late Lord Houghton, Lord Acton, and Mr. W. Hardy, with Mr. John Romilly as secretary and Mr. J. J. Cartwright assistant sec. The latter gentleman is now secretary. The Commission has published twelve reports and appendices of great interest. The Commissioners have recently been engaged

upon the vast collection of Elizabethan state papers and documents in the possession of Lord Salisbury, at Hatfield House. Two vols. of Calendars of these MSS. have been issued.

"Historical Review, English" (published first Jan. 1886), is devoted to the treatment of history and historical research from a critical and philosophical standpoint, and to the publication of historical documents. A list of the newest works, English and foreign, bearing upon historical subjects is given, together with a summary of the contents of the leading historical periodicals of various countries. Amongst its contributors to the first number were Lord Acton, Mr. Gladstone, Professors Seeley and Freeman, and the Provost of Oriel Coll., Oxford. Editor, Rev. Professor Orington, LL.D. Office, 39, Paternoster Row, E.C.

Hobart. Capital of Tasmania (*q.v.*); pop. 29,000; on the Derwent. Formerly called Hobart Town.

Hogg, Quintin, is a son of the late Sir James Wier Hogg, chairman of the old East India Co., and a brother of Lord Magheramorne, chairman of the late Metropolitan Board of Works. Mr. Quintin Hogg, who is a merchant in a large way of business in Rood Lane, has for many years been actively associated with philanthropic and religious movements. Some thirty years ago he started a ragged school in the district of Drury Lane. This was in '73 converted into a working boys' home and institute "for the purpose of endeavouring to withdraw elder boys from evil surroundings." From Endell Street the institution was in '78 removed to larger premises in Long Acre, where the membership soon increased to 600. With a view to further developing the movement which the Long Acre institution represented, Mr. Hogg in '80 purchased for £50,000 the old Polytechnic, Regent Street, and converted it into a great technical and recreative school. The institution has been a great success, as many as 8,846 students having attended its classes in '88-9. The cost of maintaining the institution is about £15,000 a year, about £9,000 of which is provided by class fees. Up to last year the deficit of £6,000 was annually made up by Mr. Hogg, who has altogether spent about £100,000 upon his scheme. The Charity Commissioners, with a view to placing the institution on a permanent financial basis, have promised £35,000 towards its funds on condition that a similar amount is raised by voluntary contributions. Up to Nov. '89 about £20,000 of the requisite sum had been subscribed. A **Young Women's Institute** has also been founded by Mr. and Mrs. H. in premises adjoining the Polytechnic, and promises to be as successful as the latter.

Hole, Very Rev. S. Reynolds, Dean of Rochester. Educated at Newark grammar school and Brasenose College, Oxford. He was ordained curate of his native parish 1844, and became vicar in '50. In '74 he was nominated Rural Dean of Southwell, in '75 Dean of Lincoln, and in '87 was appointed to the **Deanery of Rochester** in succession to the late Dr. Scott. He for some time acted as chaplain to the present Archbishop of Canterbury. Dean H. is distinguished by his efforts in promoting the influence of the Church of England as the Church of the poor, and has been an eloquent advocate of the principles of the Free and Open Church Association. Dean H. is one of the most popular platform speakers, and has a fund of

good humour and good stories, upon which he draws largely. He has been a contributor to *Punch*, and was an intimate friend of the late John Leech. He is one of the highest living authorities on the cultivation of roses, his "Book about Roses" having run through many editions and been translated into several languages, and his speech at the Mansion House, in '89, on this subject was considered most felicitous.

Holland. See NETHERLANDS.

Holloway College, The Royal. Founded in 1883 by the practical benevolence of the late Mr. Thomas Holloway. Is a handsome building situated at Mount Lee, Egham, Surrey, built in the style of the French Renaissance. Its object is to supply the best and most suitable education for women of the middle and upper-middle classes. Principal, Miss Bishop; Sec., J. L. Clifford-Smith.

Holmes, Oliver Wendell, M.D., LL.D., b. at Cambridge, Mass., August 29th, 1809, and graduated at Harvard University. Originally intended for the law, he ultimately attached himself to the medical profession, of which he was a distinguished ornament, being successively appointed Professor of Anatomy both at Dartmouth College and the Massachusetts Medical School. From an early age, however, he evinced a taste for poetry and general literature, and it is in his capacity as an author that he is best known in England. During the American Civil War he was an ardent supporter of the North, whose cause was materially assisted by his powerful satires, especially his "Sweet Little Man." His most popular works are "The Autocrat of the Breakfast Table," "The Professor at the Breakfast Table," and "The Poet at the Breakfast Table." Many of his happiest efforts have been delivered at public dinners. He visited England in '86, and was everywhere received with the greatest cordiality. Hon. LL.D. (Camb.). On the occasion of his 80th birthday Dr. H. received congratulations from all parts of the world.

Holy Thursday (otherwise called Ascension Day). The fortieth day after Christ's resurrection.

Home Arts and Industries Association. established about the beginning of '85, having been previously at work in a small way under the title of "The Cottage Arts Association," founded and promoted by Mrs. Jebb. It has now over 450 classes in England, Scotland, and Ireland, with more than 5,000 pupils. Its immediate objects are to rouse the intelligence, educate the eye and train the hand. President, Earl Brownlow. Treasurer, Mr. Walter Besant. Secretaries, Miss Dymes and Miss M. H. C. Leigh. Office and studios, Royal Albert Hall.

Home Office. This is a many-sided department, and makes great demands upon the time and judgment of its parliamentary chief. He grants certificates for the naturalisation of aliens (q.v.). Addresses to the Sovereign and the gracious replies thereto pass through his office; reports of Royal Commissions are forwarded to him to be laid before the Sovereign, by whose command they are subsequently presented to Parliament; he nominates the principal officers of the Isle of Man and the Channel Islands, and most civil knightships are conferred upon his recommendation. Heavy fees are paid to the Department by those upon whom peerages and other dignities are bestowed. The Home Secre-

tary may grant provisional orders for the improvement of unhealthy areas in the Metropolis, and the functions of licensing and inspection in regard to the practice of vivisection, schools of anatomy, and retreats for habitual drunkards are vested in him. One staff of inspectors from the Department is charged with the supervision of coal and metalliferous mines (see MINING, and COAL MINES REGULATION ACT); another sees that the Acts relative to the manufacture and storing of explosives are properly carried out; and a third visits factories, printing works, bleaching works, brickyards, white lead works, and workshops (see FACTORIES AND WORKSHOPS ACTS). The Home Secretary is also charged with powers of inspection under the Burial Acts, and may permit in certain special cases interments in closed burial grounds, or the exhumation of bodies where there is suspicion of foul play. Under the Prevention of Cruelty to Children Act (see SESSION, sect. 72) he may direct a factory inspector to see that the conditions and restrictions of any licence granted in respect of the employment of children of between the ages of seven and ten years in theatres are duly complied with. The maintenance of peace and order within the kingdom, and the administration of justice, so far as the royal prerogative is involved in it, are, however, his leading responsibilities. His duties in connection with the police include the appointment of the Chief Commissioner of the Metropolitan Force, and the approval of rules made for the service by that officer (see METROPOLITAN AND CITY POLICE); he must be satisfied, before granting his certificate under the County and Borough Police Act, that the police of a county or borough has been maintained in a state of efficiency in point of numbers and discipline; and should his certificate of efficiency be withheld, the sum annually payable by the County Council in substitution for local grants towards the cost of pay and clothing of the police is forfeited. In any part of the United Kingdom he may authorise the employment of the military forces of the Crown in order to suppress riot and disorder. He appoints and frequently puts in motion the Director of Public Prosecutions (q.v.). The control of the prisons (q.v.) and convict establishments, and the inspection of reformatory and industrial schools (q.v.) are exercised by his Department, and he has the charge of criminal lunatics and insane prisoners. See LUNACY. He may recommend to the Crown the remission of punishment passed upon offenders, either by justices of the peace or by the judges, his most anxious and responsible function in this connection being in regard to petitions for commutation of the death sentence; but before deciding in such grave matters he usually takes such judicial, legal, and, in cases where insanity is suggested, medical opinion as he may think necessary, to enable him to arrive at a just conclusion. See MINISTRY, SECRETARY OF STATE.

Home Rule. The term applied to the movement for the restoration of self-government in Ireland, which was started by Mr. Isaac Butt, in Dublin, in 1870. The new movement, which in most respects had the same objects as the agitation of O'Connell for repeal of the Union, obtained at the general election of 1874, sixty members. The party was afterwards divided on policy, Mr. Parnell (q.v.) and Mr. Biggar advocating a more active course

than Mr. Butt approved. Mr. Butt died in 1879, and Mr. Shaw was elected leader of the Home Rule party in his stead. After the general election of 1880, at which the party was largely augmented, Mr. Parnell was elected in place of Mr. Shaw. The election of 1885 still further strengthened the party, which was yet again increased at the election of 1886, the Home Rule party now numbering eighty-six. Home Rule has various meanings—different proposals being made at different periods and by different leaders. The plan of Mr. Butt was to allow a parliament in Dublin, and at the same time to have the Irish members summoned to the Imperial Parliament at Westminster whenever questions arose affecting the relations of Ireland with the Empire. Since then the members of Mr. Parnell's party have signified a preference for the model of the Colonies—viz., a parliament in Dublin and no representation in the Imperial Parliament and no share in Imperial taxation. Some members of the Home Rule party now declare in favour of absolute independence. The arguments for and against Home Rule are as follow:—(1) That the only practical method of governing Ireland peaceably is to allow her to manage her own affairs; (2) That self-government has answered in the Colonies, and would answer in Ireland; (3) That Home Rule in Ireland would leave the English Parliament free for English business; (4) That the relaxation of the legal union would draw closer the bonds of sentimental union; (5) That the restrictions and safeguards of Mr. Gladstone's Bill could be maintained. On the other side it is argued: (1) That the method of ruling Ireland by steady and just administration has never yet been fairly tried; that there are now few Irish grievances to remedy; that the promised peace of Ireland left to herself is negatived by every indication of mutual class, religious, and race hatreds, and that the very mention of Home Rule made Ulster prepare for civil war. (2) That Home Rule is demanded merely that the weaker may be handed over to the stronger, and that the necessary interference of England at a later stage would involve the reconquest of Ireland. (3) That the self-governing Colonies were well affected towards England when granted Home Rule, whereas Ireland is disaffected. (4) That the English Parliament can find other ways of freeing itself from obstruction than the granting of Home Rule; and (5) That the restrictions and safeguards of Mr. Gladstone's scheme would either be so much waste paper or be made the subject of fresh agitations. Besides, it is pointed out that Ireland's place in the empire is one of diminishing significance. When Grattan's parliament was granted, the population of Ireland was about half as large as that of England and Wales, and the proportion was not much less than 1 to 2 of the rest of the United Kingdom in 1801. In 1841 it was still more than 8 to 19; but now it is barely 1 to 31, or less than 1 to 6. It is also urged that Irish disaffection is not of home growth, but is fostered and paid for by the American Irish. Since the great Irish famine, emigration has made these a potent factor in the world's politics; but emigration is lessening, the United States are growing, and in less than a generation the Irish Americans will be merged in the great body of American citizens. These are the Unionist reasons for patience and firmness.

For schedule of Mr. Gladstone's Home Rule Bill, introduced April 8th, '86, see ed. '87.

Home Rule for Scotland. See Session, sect. 36.

Honduras, a republic in Central America. Area, 46,400 sq. m.; pop. 450,000. Capital, Tegucigalpa, pop. 12,000. Governed by a President and Congress, elected for four years. Present President elected '83, and re-elected '87. Estimated revenue for '88-9, £225,000; expenditure, £231,000. Imports, not valued; exports, £670,133. Foreign debt, about £5,333,700. Internal, £250,000. The loans were raised for the purpose of constructing an inter-oceanic railway, but a small proportion only was expended for this purpose. Army nominally about 3800, including reserves. Prolonged civil strife, aggravated by wars with San Salvador and Guatemala, from '70 to '76, when exhaustion brought peace. Since '80 affairs more peaceable. In '73 Omoa was bombarded by the British, to obtain redress for injuries inflicted on their subjects. In '81 similar complications with France were settled by compensation, etc. For Ministry see DIPLOMACY.

Hong Kong. An island and British Crown colony, situated close to the mouth of the Canton river, and divided from the southern coast of China by a narrow strait—the Lyce-moon pass. The peninsula of **Kowloon**, opposite the island, and a small adjacent group, the **Lema Islands**, appertain to the colony. Capital **Victoria** (commonly called **Hong Kong**—see previous eds.). Government is in the hands of a Governor, with Executive and Legislative Councils. Religion and education are most abundantly provided for. The island is our "Eastern Gibraltar," and is both a military and naval station. There is a mixed European, Sikh, and Chinese police, numbering 700. It is also the great emporium for European trade with China, and is a free port. For latest financial statistics see BRITISH EMPIRE, etc. (table). Imports, chiefly goods for China, cottons, and other manufactured articles; exports, tea, silk, and other Chinese produce. For Executive Council see DIPLOMACY. Consult "Her Majesty's Colonies"; Denny's and Mayer's "China and Japan," etc.

Hook, James Clarke, R.A., b. 1819. Commencing his artistic career by painting pictures having for the most part a scriptural or poetical basis, Mr. H. afterwards produced many excellent paintings, the subjects of which were pastoral or modern. Elected R.A. ('60). Consequent upon the success of his well-known "Luff, Boy!" Mr. H. has more recently devoted his talents to marine pictures, and is a regular contributor to the Royal Academy.

Hooker, Sir Joseph Dalton, son and successor of the late Sir William Jackson Hooker, director of the Royal Gardens at Kew, was b. at Halesworth, Suffolk, 1817. Graduated M.D. Glasgow Univ. '39. Assistant-surgeon to the Government Antarctic expedition conducted by Sir James Clark Ross, '38, and on his return published a series of richly illustrated volumes on the *Flora of New Zealand, Tasmania, and the Auckland Islands*. He was appointed botanist to the Geological Survey of Great Britain in '46, and in '47 visited India, where he remained till 1851, having been kept prisoner for some time by the Rajah of Sikkim. On his return he published his *Himalaya Journals*. In '55 he was appointed assistant-director of Kew Gardens, and became Director in '65. Made

a tour in Syria for botanical purposes '70. President of the British Association at Norwich, '68, and in his address defended the Darwinian doctrine of Evolution. Accompanied by Mr. John Ball and Mr. Maw, Dr. Hooker made a journey into Morocco '71, to study its flora: He and his companions, during their explorations, climbed to the summit of the great Atlas mountain. Elected President of the Royal Society '73, resigned '76. Created K.C.S.I. '77.

Hop Industry Committee on. See Session, sect. 121.

Hopps, J. Page, was b. in London, 1834. Studied at the Baptist College, Leicester, for three years, and, after a brief pastorate in Leicestershire, became assistant to George Dawson at Birmingham in '58. After that, Unitarian minister at Sheffield, Dukinfield, Glasgow, and (now) Leicester. Editor of *The Truthseeker* for twenty-five years. Author of "The Bible for Beginners," and a large number of pamphlets on religious, social, and political questions of the hour. Mr. H. unsuccessfully contested S. Paddington in the Radical interest against Lord R. Churchill in '85.

Horological Institute, The British, has for its main object the encouragement of the English watch trade. Technical classes are held by the Institute at its headquarters, Northampton Square, E.C., and certificates are granted. It is in union with the City and Guilds Institute, and publishes monthly the "Horological Journal," which circulates among watchmakers, jewellers, and silversmiths. Sec., F. J. Britten.

Horsley, John Calcott, R.A., b. in London 1817, painted a picture in his youth which excited the admiration of Wilkie. In 1843 his cartoon of "St. Augustine Preaching" gained at Westminster Hall one of the three prizes in the second rank of £200. Other frescoes of his in the Palace of Westminster are entitled of "Religion" and "Satan surprised at the Ear of Eve." Since then he has painted many admirable pictures and portraits, as well as an altar-piece with figures of colossal size, intitled, "The Healing Mercies of Christ." The latter is in the chapel of St. Thomas's Hospital. Mr. Horsley was elected treasurer of the Royal Academy ('82), and in the Academy Exhibition '89 he had a portrait of Mr. Martin Colnaghi.

Horseflesh, Sale of. See Session, sect. 76.

Horse Racing. See TURF.

Horton, Robert F., M.A., congregational minister, b. 1855; ed. at Shrewsbury, whence he went to New Coll., Oxford ('74), where he commenced a brilliant college career by obtaining First Class in Moderations, and in '78 a First in Classical Greats. Elected Fellow of his college '79. Began his ministry at Hampstead ('80), and his success there soon necessitated the building of a larger church, which was opened '84. Mr. H.'s work on "Inspiration" caused considerable discussion. The exclusion of Mr. H. from a professorship at Oxford by reason of his Nonconformist views attracted attention at the time; but by his severance from college work London has gained a decided acquisition to its ranks of preachers.

House, Adjournment of the. See PARLIAMENTARY PROCEDURE.

House of Deputies, The Austro-Hungarian. See AUSTRIA-HUNGARY.

Hova. The ruling race of Madagascar (q.v.).

Howard Association. Instituted under the patronage of the late Lord Broughton for

the promotion of the best methods of Penal Treatment and Crime Prevention. It labours to indoctrinate the public mind with the importance of a reformatory and radically preventive treatment. Treasurer, Wm. Tallack, Esq.; Sec., Sir R. N. Fowler, Bart., M.P. Offices, 5, Bishopsgate Without, E.C.

Howard Centenary, The, is to be celebrated by a public ceremony at Bedford on Jan. 20th, '90, when a memorial is to be erected on some convenient site in the town. A general committee was formed on Oct. 15th to take steps in the matter, and the Rev. W. P. Irving, Bedford, was requested to act as secretary.

Howells, William Dean, the eminent American novelist, was b. in Ohio, 1837. After serving his time with his father as a printer, he adopted journalism as his profession, and in '71 was appointed editor of the *Atlantic Monthly*, from which he retired in '80. His poems, sketches, and stories, which are characterised by a lightness of artistic touch which marks the individuality of their author, have had a wide circulation on both sides of the Atlantic. Mr. H. was American consul at Vienna '65-65. In '89 the death of his eldest daughter was announced.

Huddleston, Sir John Walter, was b. in 1817, and married Lady Diana Beauclerk, daughter of the Duke of St. Albans. Called to the bar at Gray's Inn (1839), Q.C. (1857), but he failed repeatedly in his attempts to get into Parliament. Probably no man at the bar, in his time, except Mr. Hawkins, had so large a practice at Nisi Prius. Mr. Huddleston was created a justice of the Common Pleas (1875), then a baron of the Exchequer, and, finally, a judge of the High Court. He is, however, still known in legal circles as "Baron" Huddleston. Sir J. W. H. presided over the case of *Bessat v. Hoakyns* ('89), on which occasion the jury disagreed.

Hudson Bay. An inland sea of the Dominion of Canada, nearly as large as the Mediterranean, and styled "the Mediterranean of America," communicating with the Atlantic by Hudson Strait. Closed by ice seven months of the year. (See also HUDSON BAY RAILWAY.) Communication at present open in summer by canoe to Lake Winnipeg.

Hudson Bay Railway. This scheme, or more properly speaking, the Hudson Bay and Winnipeg Railway, is, to some extent, an adaptation of the old trade route of the Hudson Bay Company to modern requirements, and is of peculiar interest to those interested in the development of the Colonies, especially in regard to the great Canadian Pacific Railway scheme. The project is to connect Regina, the centre of the fertile belt on the west, and Winnipeg, the capital of Manitoba, on the east, with Port Nelson on Hudson Bay, from which point to Liverpool the distance is not more than 2,966 geographical miles. Both the places named are on the existing Canadian Pacific line, and this fact alone is of importance in connection with a scheme for opening up the shortest possible route to England. (For further details see eds. '88 and '89.) In the House of Commons on April 4th, '89, Mr. E. Beckett asked the Under Secretary for the Colonies with reference to the Act of the Legislature of the Province of Manitoba, passed in '86, which guaranteed the interest on the '86 issue of the Winnipeg and Hudson Bay Railway Co.'s bonds for twenty-five years;

whether he was aware that the road was commenced and the capital subscribed in England; whether he was aware that the present Premier of Manitoba in Nov. '88 recognised the guarantee officially in a letter to the chairman of the Railway Company, but that on March and, '89, the Premier and Legislature repudiated the statutory guarantee by passing an Act to which her Majesty's assent was required; whether the Secretary of State would advise her Majesty to withhold her assent; and whether he would make the necessary representations to the Canadian Government. Baron H. de Worms in reply said the subject was entirely one for the Provincial and Dominion Governments to deal with. Such Acts did not come under the cognisance of the Secretary of State for the Colonies.

Hudson River Bridge. On Jan. 4th, '88, a paper was read by Mr. Lindenthal, before the American Society of Civil Engineers on this ("North River") proposed bridge, described as the most important feature in a scheme to bring all the railroads terminating on the west shore of the Hudson River across it to New York. River piers being inadmissible, the author designed a bridge having a river span of 2,850 feet, a shore span on each side of 1,500 feet, and anchorage piers 320 feet long. It was on the suspension principle with wire cables, the height above high water mark 150 feet, and iron towers 450 feet high. There were to be six railway tracks, the bridge being 86 feet wide, with suitable approaches, the traffic allowed for being 50,000 passengers per hour in one direction, this being calculated to meet all demands for 50 years. The estimated cost for the bridge alone was put at 15,000,000 dollars, and of the whole project about 50,000,000 dollars. Mr. Lindenthal's scheme seemed to make a good impression from the first. News came over early in August that the project had taken definite shape, a company having been organised and bills introduced into both Houses, Mr. Lindenthal's plans and designs having been adopted. The work was to be commenced within a year of the approval of the plans by the Secretary of State, and to be finished in ten. It was then estimated that the total cost, including every appurtenance, yards, approaches, etc., would be 60,000,000 dollars. An exhaustive criticism of this great project by Mr. Max Am Ende, M. Inst. C.E., was published in the *Engineer* of May 17th, '89, when the question of Arch v. Suspension Bridge was argued. Early in September the work was steadily progressing, and it was the intention to push the north tunnel to completion first, so that trains might be run through for the World's Fair in '92.

Hudson River Tunnel. In June '87 it was reported that, after a lapse of 4½ years, the works at this tunnel had been resumed. It was understood that, although four headings were being worked simultaneously, the chief endeavour was to complete and open the north tunnel, which was then about one-third finished. Compressed air was being used to keep the heading free from water, the heading being excavated as fast as the sheathing and masonry could be put in. It was added that all the financial stumbling-blocks had been removed. According to the *Railroad and Engineering Journal* (U.S.) of March '88 the tunnel "continued in a state of suspended animation," the lack of funds apparently being the only reason for this. The *Engineer* of April 5th, '88, in pub-

lishing a statement that the tunnel was to be completed on Mr. J. E. H. Greathead's system, and under Sir John Fowler and Mr. B. Baker as consulting engineers, quotes from the *American Building and Engineering Record*:—"There was never any lack of confidence in the ability of the real engineers connected with this work, though there has been a decided distrust of the soundness of the working plans proposed and insisted on by its projector." It was reported (Sept. '88) that work at the tunnel was steadily progressing, and that it was the intention to push the north tunnel to completion first, so that trains might be run through for the World's Fair in '92.

Hue. Capital of Annam (q.v.).

Huggins, William, F.R.S., D.C.L. (Oxon), LL.D. (Camb. and Edin.), Ph.D. (Leyden), b. in London 1824. Educated at the City of London School (q.v.). In 1855 Dr. Huggins erected an observatory at his residence, at Upper Tulse Hill, and occupied himself for some time with observation of double stars and with careful drawings of the planets Mars, Jupiter, and Saturn, his object being to bring to bear upon the science of astronomy the practical knowledge he had obtained of general physics. In conjunction with Dr. W. A. Miller, he made some important discoveries with regard to the heavenly bodies, and for these researches Dr. Huggins received (Nov. 1866) one of the Royal Medals placed at the disposal of the Royal Society, and in the following year the Gold Medal of the Royal Astronomical Society was awarded Dr. Huggins and Dr. Miller for their conjoint researches. Dr. Huggins continued his prismatic researches with a more powerful spectroscope with most important results, and in 1880 he again received a medal from the Royal Society. His labours have also received recognition from foreign societies. President of the Royal Astronomical Society (1876-78).

Hughes, Rev. Hugh Price, M.A., the leader of the "Forward Movement" of Wesleyan Methodism, is a native of Wales, and was b. 1847. Educated at Richmond Theological Coll., and graduated M.A. at London Univ. Has held appointments at Dover, Brighton, Tottenham, Dulwich, Oxford, and Brixton, where he was recently stationed. Has been secretary to the Temperance Committee of the Wesleyan Conference; is a member of the Legal Conference; editor of the *Methodist Times* (1885); is the superintendent of the new mission to the West End, and is an earnest advocate of the proposed reunion of the various branches of the Methodist Church. During '88 Mr. H. joined in the Education controversy relating to the majority report of the Commission. He has recently published some of his St. James's Hall discourses in a volume entitled "Social Christianity." In '89 Mr. H. took an active part in the question of the licensing of music halls.

Hughes, Thomas, b. 1823. Educated at Rugby and Oxford. Called to the bar (1848). Radical M.P. for Lambeth '65-68, and for Frome '68-74, Q.C. ('69). In '70 he made a tour in the United States. He is the author of "Tom Brown's School Days" ('57), "The Scouring of the White Horse," "Tom Brown at Oxford," and "Life of Livingstone" (issued last year in Macmillan's "Men of Action" series). Appointed a County Court Judge ('82). During '89 Mr. H. directed attention in the *Times* to the fact of an unauthorised edition of his books having appeared in the States.

Humbert IV., King of Italy; b. 1844; succeeded his father Victor Emmanuel '78. While **Crown Prince** he distinguished himself by the active part he took in the movement for promoting Italian Unity. He shared with Garibaldi the triumph of the reorganisation of the kingdom of the two Sicilies. Prince Humbert served with distinction in the war of '66, and displayed much personal bravery in the moment of disaster at the battle of **Gustanza**, in which the Italians were defeated. He married in '68 his cousin, Princess Marguerite, daughter of the late Duke of Genoa. Their son, the Crown Prince Victor Emmanuel, Prince of Naples, was born Nov. 11th, '69. During his Majesty's visit to Naples, Nov. 17th, '78, a would-be assassin named Giovanni Passananti made an attempt upon his life with a poniard. Signor Carolyi, the prime minister, was wounded badly, and the king slightly. Made a tour through Southern Italy in August '88, and was enthusiastically welcomed. Visited the Emperor William II. of Germany at Berlin in March '89.

Hungarian Political Parties. The legislative power of Hungary is vested in the Emperor of Austria, as King of Hungary, and a national Diet, the latter consisting of a House of **Magnates** and a House of Representatives. The former comprises all hereditary peers paying a stipulated land tax, who number nearly 300, of some 50 high ecclesiastical dignitaries of the Roman Catholic, Greek, and Protestant Churches, of 50 life-peers, appointed by the king, of all the archdukes who have attained their majority, and of some 50 high-state dignitaries. The House of Representatives contains 453 members elected by open voting and limited suffrage for periods of five years. The present House, which was elected in June '87, contains some 260 supporters of the ministry of M. Tisza (q.v.), which has, with occasional changes, been in office since Nov. '75, of 150 members of the regular Opposition and of 40 Croatian deputies, who in most matters vote with the government. But while M. Tisza's following almost invariably supports the government in unbroken strength, the Opposition is divided into Moderates, Independents, Anti-Semites, and Nationalists, of whom the Independents number about one-half, and the Moderates one-fourth. As a result of this cleavage, the Opposition can hardly be said to have a definite programme, save that the object of the Independents is to effect, at all costs, the complete separation of Hungary from Austria. The desire for separation, however, is not limited to the Independents or indeed to the Opposition generally; many members of the ministerial party sharing the same view, although they may differ with the Opposition on the question of opportunity.

Hungary. See AUSTRIA-HUNGARY.

Hunt, William Holman, the well-known painter of religious and mystical subjects, was b. in London 1827. He first exhibited at the Royal Academy in '46, and was one of the originators of the Pre-Raphaelite movement. The occult meaning of his "Light of the World" and: "The Awakening Conscience," of 1854, founded the subject of a series of letters by Mr. Ruskin in the *Times*. Mr. Hunt subsequently painted "The Scapegoat" and "The Finding of the Saviour in the Temple," the latter of which attracted great notice when exhibited (1860). The largest of his works, "The Shadow of Death," occupied the artist during a four years' residence in

Palestine, and was finished in 1873. "The Triumph of the Innocents," by some considered his masterpiece, was in '88 reproduced in photogravure and published by the Fine Art Society. Mr. Holman Hunt is an ardent advocate for the reform of the Royal Academy.

Hunter, Sir William Wilson, K.C.S.I., C.I.E., was b. 1840, and educated at the Universities of Glasgow, Paris and Bonn. He passed first on the list of candidates for the Indian Civil Service, in '62, and has held the following appointments: Superintendent of Public Instruction in Orissa, special commissioner to the Secretariat of Bengal; acting under-secretary to the Government of India; and Director-General of statistics of India. He is the author of the following works: "The Annals of Rural Bengal," "A Life of Lord Mayo," "A Dictionary of the Non-Aryan languages of India and High Asia," "The Imperial Gazetteer of India," and "The Indian Empire." Sir William, during '89, wrote an article in the *Nineteenth Century* on "Missionaries."

Hunting. Stag-hunting, at one period so common in England, is now confined to 13 packs, with the addition of two in Ireland; and the present Master of the Queen's Buckhounds is the Earl of Coventry. Neither can it be said that Fox-hunting has increased in popularity of late, notwithstanding that every hunt now has a fund to reimburse farmers for any losses they may experience through the depredations of Reynard. Hunting-men strongly resent the barbed wire fencing which many farmers have lately adopted; and as a matter of fact several lives have been lost through the "thin line," whilst a number of valuable hunters have also prematurely journeyed to the "happy hunting grounds" through the same cause. In England there are 155 packs of fox-hounds, in Ireland 15, and in Scotland 7; England also boasts of 96 packs of harriers and 19 packs of beagles; Ireland possesses 23 packs of harriers, whilst Scotland is content with 5.

Huxley, Thomas Henry, M.D., LL.D., D.C.L., F.R.S.; b. May 4th, 1825, at Ealing. Educated at Ealing School (of which his father was one of the masters) and at Charing Cross Hospital. He served as assistant-surgeon on H.M.S. *Victory* and *Rattlesnake*, during the cruise of which latter vessel he made important observations on oceanic hydrozoa. Elected a Fellow of the Royal Society 1852; 1855, Professor of Natural History at the Royal School of Mines, and also Fullerian Professor of Physiology at the Royal Institution; 1862, President of the Biological Section of the British Association; 1870, President of the Association itself for the year, and member of the London School Board; 1872, Lord Rector of Aberdeen University; 1873, Secretary of the Royal Society; 1878, LL.D. Dublin and Edinburgh; 1879, LL.D. Cambridge; 1883, Rede Lecturer at Cambridge, and President of the Royal Society. In 1885 he resigned his official duties, which included the Inspectorship of Fisheries and the presidency of the Royal Society. Prof. H. has been a most prolific writer on scientific subjects. He was last year drawn into a controversy with Principal Wace; in reply to whom he sought, in the *Nineteenth Century*, to establish the reasonableness of the Agnostic position.

Hyderabad. For Resident, etc., see DIPLOMATIC.

Ibsen, Henrik, Norwegian dramatist and poet, b. in 1828, at Skien. The childhood of his "Peer Gynt" is said to be largely autobiographical. After serving his apprenticeship to an apothecary, he went to Christiania Univ. to study medicine. In '50 he produced his first play, "Catilina"; and in '51 was appointed director of the National Theatre at Bergen by Ole Bull. In '52 he travelled for a time in Denmark and Germany; and in '57 he received the post of director of the **Norake Theatre** at Christiania, which he managed till '62. During this period several of his plays were written and produced. Most of his works are translated into German, and some into English. His "Doll's House" was produced at the Olympic, in London, July '89. The realisation of an epicene ideal seems to be the aim of Ibsen's dramatic teaching. The "Pillars of Society" contains perhaps the best embodiment of his social philosophy.

Iceland. A large island, 130 m. east of Greenland, and 850 m. west of Norway, belonging to Denmark. Capital **Reykjavik**. **Exports**, sulphur, Iceland moss, wool, dried fish, sealskins and oil, whale-oil and baleen, eider-down, bird-skins, and ponies. Manufactures domestic. Consult Baring Gould's "Iceland," Lock's "Home of the Eddas," Ethel B. Hartley's "A Girl's Ride in Iceland" ('89), etc. During '89 a newspaper, entitled "*Lytur*," and edited by Pastor Jochumsson, was added to the already existing list of five newspapers.

Illegitimacy, Law on, in '89. The question whether the term "children" comprises illegitimate issue was raised in the Chancery Division (July 9th) before Mr. Justice Chitty. It was held that if the testator had intended to include his illegitimate children in the benefits of his will, he had failed to express it adequately, and that for this reason they could not take any interest under the residuary gift.

"Illustrated London News", established 1845, published weekly, contains illustrations of a high order, bearing upon subjects of current events and interest, with explanatory letterpress. Mr. G. A. Sala (*q.v.*), under the well-known *nom de plume* of "G. A. S.," was a contributor for some years; and the current article, "Our Note Book," is written by Mr. James Payn. A list of wills of persons deceased, and an obituary, form interesting features of the paper, which has a large circulation.

Imperial Docks of London. When the **Examiners of Private Bills** in Parliament resumed their labours during the latter part of Feb. '89, this project was entered; but such was the strength of the opposition from the London Dock and other Companies, that the promoters withdrew it. Subsequently, on the occasion of the Dockers' Strike (*q.v.*), the scheme was again somewhat vigorously discussed. The measure suggested the construction of a main dock, 706 by 353 yards, with a branch dock, 650 by 226 yards; also a ship dock, and two barge docks—entrance from the Thames—the site being partly that of the Victoria graving docks and partly on other land at West Ham. The capital was to be £750,000.

* **Imperial Federation**. The question of how best to consolidate or federate the British Empire had been studied by a few Englishmen

for some years previously, but it was not until '84 that a private committee consulted public men of both the great political parties, and upon their advice called together a conference of all who were known to accept the principle of Imperial Federation. This conference was held at the Westminster Palace Hotel on July 29th in that year, under the presidency of the late Mr. W. E. Forster, supported by eminent colonial and other officials and influential supporters of the scheme. Many others wrote approving the objects of the gathering. Resolutions were adopted affirming that some form of federation was essential; and at the adjourned conference, held in the following November, it was resolved to form the **Imperial Federation League**, whose object should be to secure by federation the permanent unity of the Empire; that no scheme of federation should interfere with the existing rights of local parliaments as regards local affairs; and that any scheme of Imperial Federation should combine on an equitable basis the resources of the Empire for the maintenance of common interests, and adequately provide for an organised defence of common rights. The League was duly constituted, Mr. Forster being appointed chairman of a strong executive committee, which office he held until his death. The League has made rapid progress, branches having been formed in a number of provincial towns, and also in several of the colonies. The movement so far has been supported by men who differ greatly on other questions; it has been approved by a very large section of the English press. (For concise history of the progress of the League and Imperial Federation to January '88, see ed. '88.) Early in '88 a movement for a commercial union between the Dominion of Canada and the United States, which had been in progress for some time, reached its crisis by the introduction into the Dominion Parliament of a motion by Sir R. Cartwright in favour of what was called "**unrestricted reciprocity**." This was rejected in a house of 181 by a majority of 57, the House of Commons singing "God save the Queen" on the announcement of the figures. The agitation of this question stimulated the desire in the dominion for closer connection with the mother country, which took the form of improved trade relations. Meetings were held throughout the Dominion in favour of this policy, and influential deputations approached Lord Lansdowne, the Governor-General, requesting that a conference of the Australasian and other colonies might be called to consider this matter. In May '89, in pursuance of this action on the part of Canada, a return of the treaties between the United Kingdom and foreign countries, which "preclude a preferential fiscal treatment of British goods in the colonies and dependencies of the British crown," was moved for in the House of Commons by Mr. Howard Vincent, a member of the Imperial Federation League. That return (**Commercial No. 2**) showed that by two treaties the right of a colony to favour in its tariff the goods of any other part of the empire over those of Germany or Belgium was expressly given up, and that under the most favoured nation clause this provision was extended to a large number of treaties with other countries. The publication

of these facts, hitherto unrecognised, has created a strong feeling in Canada and Australasia, and it is understood that the abrogation of those treaties will be sought by their representatives at an early date. The association of a Canadian statesman, Sir Charles Tupper, with Mr. Chamberlain during the negotiations for the settlement of the Fishery dispute (*q.v.*) with the United States, was an important precedent; and the subsequent rejection of that treaty by the United States, and their hostile attitude towards Canada, has tended to draw closer relations between the dominion and the mother country. The Imperial Federation League in Canada, which is now a powerful body, has made good use of the advantages thus offered. In October '88 strong representations were made by this body to the Dominion Parliament concerning the necessity for inviting the other self-governing colonies to consider with them the improvement of the trade relations between different parts of the empire. These representations have been acceded to, and the Dominion Government has announced its intention of issuing the necessary invitations. In March '88 a work entitled "*Tariffs and Trade of the British Empire*," prepared by Sir Rawson Rawson, chairman of its commercial committee, was published by the Imperial Federation League in the United Kingdom. For the first time the forty-four tariffs of the empire were placed side by side, and their effects compared in every possible way. Hong Kong and the Straits Settlements were found to be the only places in the empire where trade was wholly free. The distribution of the trade of the empire with the whole world was similarly dealt with. The total trade of the United Kingdom in '85 was found to be divided as follows:—

| | |
|--|------------------|
| With British possessions | . 26.4 per cent. |
| „ foreign countries | . 73.6 „ „ |
| The total trade of British possessions was:— | |
| With United Kingdom | . 48.5 per cent. |
| Other British possessions | . 23.5 „ „ |
| Foreign countries | . 28.0 „ „ |

the total trade of the empire being £1,046,340,000. The book was discussed in the press throughout the empire, and has thrown a valuable light upon the trade relations of the empire. Sir Henry Parkes, Premier of New South Wales, addressing his constituents, October 8th, '88, maintained that the imperial constitution must be re-cast to be permanent, and concluded as follows: "In uniting the outlying colonies to the mother country, England must present an object for love and loyalty and for the young passion for national authority in Australia, which would be more attractive than any elsewhere to be found within the wide circle of the family of nations." The Hon. James Service, late Premier of Victoria, speaking to the electors of the province of Melbourne on May 16th, '88: "Let us strive, whilst there are no interests calling upon us to separate, to cultivate that strong feeling of attachment which originates in the oneness of the blood between the two countries, and which, I think, may develop itself in the time to come into some practical shape which will enable us, without the people to this country or the people of England sacrificing their equality, to develop into an empire such as the world has never seen, with its one foot, we may say, on the south pole and another on the north, ruling the destinies of the whole

world. We know that such a rule, judging of the future by the past, and of the tendencies of things in recent years, would be a beneficent rule, and for the good of the whole world." The Right Hon. W. E. Smith, First Lord of the Treasury, speaking at Gloucester on Oct. 8th, '88, referred to the Imperial Defence Act, agreed upon at the Imperial Conference '87 (see ed. '88), as follows: "Four or five different colonies said to the Government of this country, 'If you will supply the ships, if you will find the crews, we will pay the cost of maintaining those ships and those crews, as an increased means of defence for the commerce of Australia.' They have gone into partnership with the Government of this country in order that their lives, their property, their trade, and their commerce and yours, shall be more secure against an invader and against an enemy. Talk about federation: this is the spirit of federation." On April 30th a motion was made in the Dominion House of Commons in favour of preferential trade relations between Canada and the United Kingdom. After an animated discussion, in which the proposal was influentially supported, its further consideration was adjourned. The difficulties which arose in the Australasian colonies with reference to the immigration of the Chinese have been of value in bringing home to the minds of their inhabitants the necessity for some form of representation of the self-governing colonies in the body which deals with the foreign policy of the empire, and in impressing upon statesmen at home the inconvenience of carrying on the affairs of the empire without reference to the wishes of large bodies of its citizens. The Australian Naval Defence Bill has been ratified by the Parliament of the United Kingdom, and by all the Australian Parliaments except that of Queensland, from which it was withdrawn in view of its probable rejection. The London offices of the Imperial Federation League are at 30, Charles Street, Berkeley Square, W., where its numerous publications can be obtained. See, A. H. Loring. *Organ, Imperial Federation* (monthly).

Imperialists, German. See GERMAN POLITICAL PARTIES.

Imperial Institute of the United Kingdom, the Colonies, and India. This Institute, which is to stand for all time as a record of Her Majesty's Jubilee, has been taking shape since January, '87. (For history of the origin of the Institute see ed. '87, and for detailed statement of its special objects see ed. '88.) In the main, and as forming the ostensible aims of the Institute, there may be said to be the formation of complete collections of the natural products of the British Empire, the establishment of a system of commercial intelligence to work with and supplement the display of the specimens, and the practical adaptation of both to the purposes and advancement of trade. The Government of the Institute is at present carried on by a chartered body called the "*Organising Committee*," in which the British Empire is fairly represented, and the members of which were nominated by H.R.H. the Prince of Wales, who is president; Lord Herschell is the chairman. The *Organising Committee* must, before the 15th of May, 1891, have devised a permanent form of constitution for the administration of the Institute. This

forms of constitution will have to be approved by a Royal warrant, and when this occurs the present governing body will cease to exist. After some considerable negotiations it was determined that the site of the Institute should be the southern portion of the now vacant land on which the recent exhibitions were held; and there appears a special fitness in the site when we bear in mind that this property belongs to the Commissioners for the Exhibition of '51, and was originally acquired out of the profits of that first great display in which the Prince Consort took so deep an interest. Throughout the whole of '87 the Organising Committee were inviting and receiving subscriptions; and both the Queen and the Prince of Wales specially marked their interest in the Institute by subscribing. For some time the Colonies held aloof; but first the Indian Princess subscribed handsomely, then the Canadian Dominion voted £50,000, and more recently the Australasian and other Colonies have come forward with official and private subscriptions representing nearly £100,000. Altogether about £450,000 have now been contributed or promised, the share of the United Kingdom being about £250,000, India over £100,000, and the Colonies nearly a similar amount. On July 4th, '87, Her Majesty laid the foundation stone of the building in person. The occasion was taken advantage of for a very imposing ceremony. The spot selected for the stone, which is of Colonial granite, is where the Central Avenue of the late Exhibitions was placed, near the entrance to what was Old London; and the building faces southward upon a new roadway, which runs through from Exhibition Road to Queen's Gate, near where the main Indian Court was situated in '86. The design selected was that by Mr. T. E. Colcutt, who is the architect. A great quadrangular tower with a domed roof rises from the centre of the building, there being smaller towers of similar design at each end, and graceful turrets break the outline of the roof. The style is Renaissance, and the main front will be 650 ft., with an elevation of 80 ft. The entrance hall, and the two halls at either end, stand prominently forward from the main building, and the entrance is approached by a handsome and broad flight of steps, flanked by pedestals, on which four lions are at rest. Groups of figures and friezes adorn the entire front, where, too, balustraded balconies add to the architectural effect. The figure of Britannia stands forward in strong relief, and the whole ornamentation is elaborate. The front is to be constructed of stone, and other portions of brickwork. The interior is divided into four floors. On the ground floor are arranged three great exhibition galleries surrounding four quadrangles, which could be covered in with glass if desired; and ascending to the principal floor by the grand staircase, 58 ft. wide, we reach the Reception Hall, 128 ft. by 60 ft., to be surrounded in panels by appropriate paintings and friezes. On this floor are the secretary, librarian, reading rooms, and intelligence offices, where mercantile matters can be arranged. The Conference Hall is situated in the left wing, while the upper floors are assigned to various institutions and societies, to emigration offices, refreshments, sample rooms, laboratories, committee rooms, and so on. The estimated cost of erection is nearly £300,000. The contract for the buildings has been let to Messrs. John Mowlem and Co. During '88 a Commercial

Intelligence Department and School of Modern Oriental Languages were announced as being in active formation; the organisation of the latter was completed in '89, and it commences actual teaching in Jan. '90. The work for the year '89 was of a most important character. Lord Kershall left in the autumn of '88 for India, and took advantage of his journey to negotiate with the Government of India, the provincial governments, and the native princes, for the supply of sample collections of natural products, and the transmission of reliable intelligence concerning them, to the Institute. With a similar object, Sir Somers Vane, the assistant secretary, was despatched at the commencement of '89 on a mission to the principal British colonies. The results of this tour—during which he visited Aden, Ceylon, Penang, Malacca, Singapore, Johore, Java, New Guinea, Queensland, New South Wales, Victoria, South Australia, Tasmania, New Zealand, the Samoan Islands, the Hawaiian Islands, all the provinces of Canada, certain portions of the United States, Jamaica, and Barbadoes—were exceedingly satisfactory. The interest of the colonies in the work of the Institute was aroused, and their practical co-operation promised. Organising Seco., Sir Frederick Abel, C.B., D.C.L., F.R.S.; Assistant Seco., Sir J. R. Somers Vane, F.R.S.; Offices, 1, Adam St., Adelphi Ter., W.C.

Income Tax, Rate of, 1842-90. £100 but under £180: '53, '57-8, *6d.* in the £; '54, *10d.*; '55-6, *11½d.*; '59, *6½d.*; '61-2, *6d.* £150 and upwards: '42-52, and '57, *7d.*; '54, *1s. 2d.*; '55-6, *1s. 4d.*; '58, *6d.*; '59, '61-2, *9d.*; '60, *10d.* Uniform duties on incomes of £100 a year and upwards, with abatement of £80 on incomes under £200: '63, *7d.*; '64, '68, '71, *6d.*; '65-6, '70, *6d.*; '67, *6d.* Abatement extended to £80 on incomes under £200: '72, *4d.*; '73, *5d.*; '74-5, *2d.* Exemptions extended to incomes under £150, and abatements to £120 on incomes under £100: '76-7, *3d.*; '78-9, '81, '83-4, *5d.*; '80, '84, *6d.*; '82, *6½d.*; '85-6, *8d.*; '87-8, *7d.*; '88-90, *6d.* According to a statement of the Chancellor of the Exchequer, a man whose income is under £150 a year cannot claim exemption from income tax if income derived from his wife's separate estate brings the amount above £150.

Income Tax, Law on, in '89. In the case of Colquhoun v. Brooks (Aug. 9th), the House of Lords laid down that a merchant residing in England, but carrying on business in Australia, is bound to pay income tax, not only on the profits of his business sent to him from Australia to this country, but upon his entire share of the profits during the year of assessment.—The case of the New York Life Assurance Co. v. Styles (House of Lords, July 1st) raised a question of importance to mutual insurance associations. The company in question has no shareholders, and there are no shares, the members of the company being the policy holders, and the business being done solely under the plan of mutual life assurance. The premiums contributed by the members left at the end of the year a certain surplus, the chief part of which was returned to the policy-holders as bonuses, or deducted from the next premium, while the balance of the surplus was carried forward to the credit of the members of the company. The surveyor of taxes contended that such surplus constituted profits or gains which must be assessed for income tax, and this had been decided in the affirmative by the Queen's Bench Division and by the Court of

Appeal. The House of Lords, however, by a majority, reversed this finding, declaring that the surpluses of such associations are not liable to income tax.

Incorporated Law Society, The. From some papers recently discovered at the Incorporated Law Society it appears that in the year 1730 a society called the "Society of Practisers in the several Courts of Law and Equity" was established, for the promotion of fair and honourable practice and the detection and discountenance of all unfair practice. The Society was during its existence also very active in carrying into effect many professional improvements, as well as a variety of changes in the law. This Society, which was supported by subscription, continued in active existence from that time till 1810, from which period all trace of it is lost. From '10 to '25 solicitors were without any sort of professional organisation beyond a few local societies. In that year certain leading solicitors issued a prospectus advocating the establishment of a "Law Institution." A committee was formed to give effect to the prospectus, and raised in the form of shares the capital necessary to provide a building and everything else necessary for the Institution. The deed of settlement was completed in February 1827, and a royal charter was obtained in December 1831. In 1845 the Society, which had been originally constituted as a joint-stock company, was remodelled upon the principle of other learned and professional bodies, and received a new charter. This charter was amended by a supplemental one in 1872. Any solicitor practising in England or Ireland, and any writer practising in Scotland, as well as any solicitor or writer who has ceased to practise, is eligible for election as a member of the Society. The administration of business is in the hands of an elective council of forty ordinary members, of whom ten vacate their seats every year, and ten extraordinary members chosen by the council from among those members of the Society who are presidents of provincial law societies. The President and Vice-President are annually elected by the members of the Society from the members of the council. The members of the Society at present exceed 6,200. Its buildings are situated in *Chancery Lane*, and comprise a handsome hall and a library of nearly 30,000 volumes. The general function of the Society resembles that which the Inns of Court are supposed to discharge. It takes care of the professional training, character, and interests of the profession. When it was founded no test was required from any person wishing to become a solicitor beyond evidence of character and of having served in articles for the prescribed time. The Society instituted lectures on law in 1833, and in 1836 obtained from the judges authority to examine students on the completion of their articles. Since then *Preliminary* and *Intermediate Examinations* have been added, and the entire control of all the examinations has been transferred to the Society. It also investigates cases of alleged malpractice by solicitors, and, where necessary, takes measures for the punishment of offenders. It exerts itself to promote what it considers the legitimate interest of the profession in such matters as scales of payment, right of audience, etc. It has also assisted in promoting reforms beneficial to the whole community, such as the concentration in one build-

ing of the various Courts, or the Conveyancing Act of 1881. The improved standing of solicitors is in part due to the exertions of the Society. See, *E. W. Williamson, Office, Chancery Lane. Consult the Calendar of the Incorporated Law Society.*

Incorporated Society of Authors, established in 1884 by Sir F. Pollock, Cardinal Manning, and other eminent literary men, under the presidency of Lord Tennyson. Its object is to defend the interests of literary property, to maintain authors' rights, to advise them as to questions of copyright, and in other ways to render them assistance in their agreements and the publication of their works. Also to further the establishment of an *International Copyright Union*, and to procure in England the passing of an Act which shall amend and consolidate the law of Domestic Copyright. It is the only association of the kind in England, but its model, "*La Société des Gens de Lettres*," has been flourishing for over fifty years in France. The Society has published four pamphlets in '88, the first of a series bearing the general title of "Literary Property." It has also been enabled to point out to the Secretary of State for the Colonies certain infringements of the Copyright Law, and so to secure the punishment of the offenders. *Office, 4, Portugal Street, Lincoln's Inn Fields, W.C. Chairman, Walter Besant (q.v.). Sec., S. Squire Sprigge. Office hours, 2 to 5 p.m.*

Independents, German. See GERMAN POLITICAL PARTIES.

India. A dependency of Great Britain, consisting partly of territory under the direct administration of British officials, and partly of native states, which are all subordinate, in varying degrees of relationship, to the suzerain power. The British territory was acquired by the *East India Company*, by conquest or treaty, in the course of one hundred years, dating from the battle of Plassey (1757). As a result of the mutiny of the Sepoy army (1857-58), the *East India Company* ceased to exist; and the direct sovereignty was vested by Act of Parliament in the Crown. The more powerful native chiefs continue to exercise every function of government within their own dominions, but their external relations are subject to the control of a British Resident. In other words, they have no international independence. In accordance with an Act of Parliament passed in 1876, Queen Victoria assumed the title of "*Empress of India*," *Kaisani-Hind*. The Parliament of the United Kingdom is, of course, supreme over India; but this supremacy is enforced rather by means of ministerial responsibility than by direct legislation. Practically, all the statutes relating to India are in the nature of either constitutional enactments or financial provisions. The Act of Parliament that abolished the Company also created a *Secretary of State for India*, together with a Council (selected from among Indian officials for the most part), in whom is vested the authority of the Crown. In England, every measure concerning India runs in the name of the Secretary of State; and he alone is responsible to Parliament. In practice, he is always a cabinet minister of the first rank. In India, the supreme authority, both executive and legislative, is vested in the Govern-

General in Council. The Governor-General, or Viceroy, who is usually a peer of political distinction, has power to overrule his Council in cases of emergency. For ordinary purposes, the council is composed of some six members, all appointed, like the Governor-General himself, by the Crown. One of these is the Commander-in-chief; another must have legal qualifications; another has charge of finance; another may be appointed with special reference to public works; the rest are usually experienced members of the civil service. For purposes of legislation, this Council is augmented by about twelve additional members, nominated by the Governor-General, of whom one-half must be non-official persons, and of whom some are always natives. The seat of the supreme government is Calcutta, with an annual migration to the hill station of Simla for the hot season. As regards the work of administration, India is divided into eight or more provinces. Two of these, Madras and Bombay, which boast an historic existence for two centuries, are styled *Presidencies*, and enjoy a certain precedence. They are each ruled by a Governor, appointed by the Crown, with councils modelled on that of the Governor-General. They each possess an army and a civil service of their own. Three of the other provinces (Lower Bengal, the North-Western Provinces, and the Punjab) are under a Lieutenant-Governor; and Bengal and the North-Western Provinces each have legislative councils. Three more, of less importance (the Central Provinces, Burma, and Assam) are under a Chief Commissioner. In addition, there are some smaller tracts under the direct administration of the Governor-General. Within the provinces, the actual unit of administration is the *District*, which forms the charge of an officer, usually styled *Collector*. His principal duties are executive, magisterial, and fiscal; but he also exercises supervision over police, jails, schools, public works, forests, etc. Judicial functions are, as a rule, vested in other hands, subordinate to the High Courts, with an ultimate appeal to the Privy Council in England. The staff of administration consists of: (1) the covenanted civil service, appointed after competitive examination in England; (2) the statutory civil service, selected from among natives; (3) military officers of the staff corps in civil employ; (4) a miscellaneous class of uncovenanted civil servants of different grades, who may be either Europeans or natives. The total area of India, including the outlying province of Lower Burmah (but not the recent acquisition of Upper Burmah), and the settlement of Aden in Arabia (which is subordinate to Bombay), amounts to 1,378,044 square miles; and the total population, according to the census of 1881, numbers 253,982,595 persons, showing an average of 184 persons per square mile. The area of British territory alone (excluding native states) is 868,314 square miles, with a population of 198,790,853 persons. Of the larger total, 187,937,438 are Hindus by religion, 59,721,595 Mohammedans, 3,418,895 Buddhists (almost all in Burma), 1,862,625 Christians (of whom less than 100,000 are Europeans), and 8,397 are Parsis (almost all in Bombay). Adding 1,500,000 for Cashmir, 3,000,000 for Upper Burmah, 2,000,000 for the Burmese Shan States, and an annual increase of $\frac{1}{2}$ per cent. for India generally, the total population in 1887 is officially estimated at 268,137,044

persons. In the official year ending March 1887, the total revenue of India amounted to £78,759,744, of which £23,189,592 was derived from the land (being in the nature of rent); £6,670,728 from the salt tax, £8,353,466 from opium (really paid by the Chinese consumer of the drug), while £16,899,972 represents gross receipts from public works—railways and canals. The total expenditure was £80,788,576, showing a deficit of £2,028,832. The chief items were: army, £20,417,934; civil departments, £12,906,364; interest on debt, £5,441,754; public works (including working expenses and interest on all capital not borrowed), £25,196,409. The total amount of debt bearing interest was £182,230,000, of which £84,140,000 bears interest in gold payable in England, and £98,090,000 bears interest in silver payable in India, while £105,910,000 represents capital expended on remunerative public works. The railways of India have been constructed by private companies to which the State guarantees interest, or directly by the State. In the calendar year 1888, the total number of miles open was 14,454, and the total net receipts £9,893,809, being a return of about 5 per cent. on the total capital expended. In the year ending March 1888 the total value of the merchandise imported into India amounted to £66,005,000, and of the merchandise exported to £90,544,000, showing an excess of £25,539,000 in the exports. The net importation of treasure was £12,221,000, thus reducing the true excess of exports to £13,318,000, which may be taken roughly to represent the tribute of India to England for cost of administration and interest on capital invested. The chief items among the imports were: cotton goods, £29,126,057; metals, £6,407,022; machinery, £1,800,208; railway plant, £2,577,603. Among the exports: raw cotton, £14,412,842; opium, £10,067,764; oil seeds, £9,385,024; rice, £9,291,687; wheat, £5,562,373; hides, £4,852,382; raw jute, £6,040,379; cotton manufactures, £5,227,930; tea, £5,174,440; indigo, £3,800,649. In 1887-88, the established strength of the army was 73,552 Europeans and 145,318 natives: total, 218,870 officers and men. The total number of schools and colleges was 133,125, attended by 3,460,844 pupils, of whom only 278,201 were girls; the total expenditure on education was £2,619,128, of which £729,357 was defrayed by the State.—In Dec. '88 Lord Lansdowne assumed the viceroyalty in succession to the Marquis of Dufferin, resigned. Amongst the principal events which have taken place during '89 the following should be mentioned. The *Educational Congress* at Lahore (Jan.), under the presidency of Sir Syed Ahmed. Two hundred and forty-seven members attended, and various practical resolutions were carried concerning the promotion of education, the improvement of public morals, and the reform of the marriage and other customs. The meeting of the National Association for providing Medical Aid for Indian Women, presided over by Lord Lansdowne (Feb.). The introduction in the Legislative Council of a bill to improve Patwari rates in the North-West Provinces and Oude, and the report on the Bill to facilitate the collection of debts on succession. The *Indian Savings Banks* report shows that at the end of March '88 there were 6159 Government savings banks containing 329,176 accounts, covering balances of Rs. 6,67,93,315, on which the sum of Rs. 22,38,609 interest was paid. The Punjab administration report shows a considerable increase in crime. The criminal cases

in '84 were 98,800, in '85 101,357, and in '86-7 rose to 103,372. The *Oxford case* excited considerable interest, and much comment was made on the treatment of the accused. The *Educational Report for '87-8* shows a total expenditure of Rs. 2,61,91,280. The percentage of the total population of school-going age that actually attended school was 11.8, as compared with 10.7 per cent. the preceding year. On March 31st, '87, 3,343,544 pupils were on the rolls of the different schools to which the statistics relate, while on the same date in '88 the number had risen to 3,460,844. The numbers attending school in '86-7 comprised 2,970,859 at public and 372,685 in private institutions; and, in '87-8, 3,021,721 at public and 439,123 at private institutions. There were 2,345,794 Hindoos, as compared with 2,303,812 in '86-7; 804,485 Mohammedans, as compared with 752,441; 23,160 Europeans and Eurasians, as compared with 23,185; 74,498 native Christians, as compared with 60,611; and 203,121 of other classes, including aborigines, as compared with 192,314. —The *Sushai expedition*. In March Lieut.-Col. R. P. Nisbet arrived at Calcutta with the recently discovered letters of the Maharajah of Cashmere, and placed them in the hands of the authorities. The *Sushai expedition* having destroyed Howsata's village, the inhabitants of which were returned in the murder of Lieut. Stewart, returned to Calcutta. The *Indian Budget*, introduced by Sir David Barbour at the end of March, showed that although the first two years of the financial triad both showed deficits, the amount in each case was below the official computation. But for the expenditure on special defence works, there would have been for '88 an actual surplus. A positive surplus was anticipated for '89-90. The estimates were favourably commented on by the Indian press. A most destructive fire devastated Surat (April), and destroyed 3000 houses, at an estimated damage of Rs. 5,00,000, rendering homeless 25,000 people. The report of the Revenue and Agricultural Departments expressed a generally favourable view of the wheat crop for '88-9, and stated that the supposed normal wheat area of each province was: Punjab, 6,765,000; North-Western Provinces and Oude, 5,081,000; Central Provinces, 3,067,000; Bombay (including Baroda), 2,871,000; Berar, 855,000; Bengal (Behar), 1,267,000; Rajpootana, 1,500,000; Central India, 2,500,000; Hyderabad, 1,016,000; Mysore, 17,000; Cashmere, 500,000; total, 26,339,000. Owing to deficiency of rainfall, severe famine and cholera prevailed in the Ganjam district during the spring and summer, causing great distress and many deaths, in May 4000 occurring from cholera alone. Strenuous efforts were made by the Government and the native princes to relieve the sufferers, and with considerable success, numbers being employed on the Ghopal Canal works. The Government of India, in reviewing the annual report on the irrigation works in Bengal, commented on the fact that during the year only one work paid its expenses, the loss upon the major works being Rs. 4,85,000, the largest record during twenty years. The total outlay, direct and indirect, to end of '87-8 was Rs. 7,06,14,592. The draft of a bill dealing with lepers prepared by the Government, by the provisions of which measure magistrates are empowered to arrest lepers who earn a livelihood by begging, and the local governments are authorised to increase

the number of retreats where the segregation of the sexes must be strictly observed. Serious floods in Scinde and on the N.W. frontier. In August measures were taken to place a portion of the Nizam's own army under special training. Capture of Tania Bheel, the famous Bheel robber chief of the Central Provinces (18th). At the meeting of the Council at Simla attention was drawn to the alarming increase of sickness amongst the British and native soldiers, and the Governor expressed the hope that the public would support the Government in its endeavour to lessen the evil. The Railway Administration report of '88 showed a net earning of Rs. 58,000, the interest payable exceeding this sum by Rs. 1,30,00,000, and that new lines with a total length of 886 miles were opened, and a tunnel through the Kwaja Amran mountain was bored for 7,373 ft. out of a total of 12,400 ft. Lord Lansdowne pointed out, in reply to the Maharajah of Cashmere, that his conduct left the Government no alternative but to accept his voluntary proposal to retire from all executive interference with affairs of State. Disastrous floods at Quetta, and later at Murshidabad. Serious riots between the Hindoo and Mohammedan communities in connection with the Mohurrum celebration at Rohtak (Sept.). Organisation of a Chin-Sushai field force (15th). The Mamlutdar's Indemnity Act was introduced in the Council (19th). It provided that those who paid bribes under pressure in order to obtain appointments and promotion should be retained in the public service, but that those who spontaneously offered bribes should be dismissed with compensation. Eight Mamlutdars had already been dismissed, and other cases were under consideration. Death of Dr. Porter, Roman Catholic Archbishop of Bombay (30th). The Bombay Millowners' Association reported (Oct.) that on June 30th there were 124 cotton mills in India, of which 91 were in the Bombay Presidency and 69 on the island of Bombay. This gives an increase of 10 mills in the year, of which 8 were in Bombay. The total number of spindles was 2,762,518, of which 2,002,994 were in Bombay; and 21,561 looms, of which 16,677 were in the same Presidency. The total number of hands employed was 91,598, and the consumption of cotton 3,110,289 cwt., or nearly 900,000 bales of 392 lb. each. It was decided that under the reformed mobilisation scheme the Punjab Frontier Force should constitute north and south divisions, under orders for immediate advance across the frontier in the event of war. An army circular notifies that the Commander-in-Chief is vested with larger spending powers without prior reference to the Government. This is not to exceed Rs. 10,000 in any one month in the case of the Commander-in-Chief in India, and Rs. 2500 in the case of provincial Commanders-in-Chief. A grand State Council, held at Patiala on the 10th, was the occasion of the assumption by the Maharajah of Mysore of full powers of government. Prince Albert Victor visited India (Nov.), where he met with a cordial reception. Frontier tour of the Viceroy and Viceregal Durbar at Quetta (19th). The first Viceregal Durbar held at Quetta—a fact which invested it with special political importance. Some interesting statistics have been compiled by the officials of the Indian Home Department with reference to the number of presses, and the various newspapers, periodicals, and books

published in India. In the year '85-6—the year dealt with in the return—there were 2094 presses worked in India. Of these 299 were in the N.W. Provinces and Oude, 229 in Bengal, 228 in the British territory in Bombay, 20 in the native States, 200 in Madras, 71 in the Punjab, 26 in Burmah, 16 in the Central Provinces, 5 in Berar, 4 in Assam, and 1 in Coorg. The number of newspapers printed in English during the same year was 127, as against 117 in the previous year, and of newspapers printed in the vernacular or bilingual 277, as against 259 in '84-5. The Punjab is not reckoned in the calculation, as the returns do not separate the English and the vernacular papers, but give a total of 67 for both. By far the greater number of the vernacular newspapers are published in the Bombay Presidency, which supports no less than 104, the N.W. Provinces and Oude coming next with 72, and Bengal next with 54. In Madras there are only 29, and in Coorg no newspaper either in English or in the vernacular is published. The number of periodicals published in India—excluding the Punjab—was 284, of which 102 were in English and 182 in the vernacular. In the Punjab there were 122 periodicals published during the year. Bombay is again at the head of the list of native periodicals with 88, while in Madras 40 English periodicals were published, and only 21 in the vernacular. The number of books published in the vernacular was much larger than in '84-5, when it was 6726. In '85-6 the number was 7990, of which Bengal contributed 2414, Bombay 1855, the Punjab 1597, the N.W. Provinces and Oude 1291, and Madras 718. On the other hand, the number of books printed in English has decreased—734 as against 770 in the previous year. Consult *Statesman's Year-Book*, Blue Books, etc.

India, Imperial Order of the Crown of, was instituted January 1st, 1878, and consists of the Sovereign and such as the Sovereign may think fit to appoint of the Princesses of Her Majesty's Royal and Imperial House; the wives and female relatives of Indian Princes; and the wives and other female relatives of any of the persons who have held, now hold, or will hereafter hold the office of Viceroy and Governor-General of India, Governors of Madras and Bombay, or Principal Secretary of State for India. The ladies of this order, as at present appointed, include the daughters and daughters-in-law of the Queen, numerous native Indian Princesses, and the wives or other female relatives of the above-mentioned officials, among the latest additions being the Countess of Dufferin, Lady Reay, Lady Randolph Churchill, Viscountess Cross, H.H. Maharanee Sunity Devey, of Kuch Behar, and the Princess Victoria of Schleswig-Holstein and Princess Victoria of Teck. The Registrar of the Order is Sir Albert W. Woodde.

India, The Most Exalted Order of the Star of. Established by letters patent in 1862, and enlarged in 1866 and 1878. Its badge is a light-blue ribbon with white stripes edgewards, and with motto, "Heaven's Light our Guide." It consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and three classes of members:—

G.C.S.I. . . Knight Grand Commander.

R.C.S.I. . . Knight Commander.

C.S.I. . . Companion.

Members of the first two classes, being Knights,

are entitled to the prefix "Sir." Of the first class there may be by the statutes of the Order be 30, of the second class 72, and of the third (or Companions) 144; but extra and honorary members may, and have been, from time to time appointed (see Knighthoods conferred during '89). The Registrar of the Order is Sir Albert W. Woods, and the Secretary is the Foreign Sec. to the Government of India.

Indian Association (National). Established in 1870 for the purpose of promoting social progress and education in India, and extending friendly intercourse between the English people and the people of India. The Association attempts to carry out these objects by the diffusion of information; by grants in encouragement of education, especially of female education, in India; promoting the employment of medical women in India; selecting English teachers for Indian families and schools; and helping Indian teachers and students visiting England. The Princess of Wales is Patroness of the Association, and Lord Hobhouse, K.C.S.I., the President. The Vice-Presidents include a large number of influential natives of India, Anglo-Indians, and other ladies and gentlemen interested in the welfare of the Empire. Organ of the I. A., *The Indian Magazine* (monthly). There are several branches of the Association in India: Hon. Sec. in England, Miss E. A. Manning, 35, Blomfield Road, Maida Hill, London, W.

Indian Civil Service embraces a much wider field of employment than does the Home Civil Service. Besides the ordinary departments of civil administration, it includes judicial posts, the medical service, the forest department, and officers of the staff corps in civil employ. Appointments in the Indian Civil Service are highly prized, and can only be obtained at the expense of much labour and energy. Situations in the *Covenanted Civil Service* are gained by passing a competitive examination in England—which examinations are as a rule held once a year in London. The candidates who have successfully competed are required to undergo two years' probation, and to pass periodical examinations in special subjects of study before proceeding to India. The limit of age for candidates is from 17 to 19 on the 1st of January of the year in which the examination is held, applications for admission to which must be made before the 1st of April. It has been announced that from 1891 the standard of age will be raised to 21. Candidates are encouraged, though it is not imperative, to obtain a university training; and to this end the Government makes an allowance of £150 per annum to all who pass their two years' probation in residence at a university; and as a further incentive, an additional bonus of £150 is granted to any student who, after remaining a third year at the university, obtains a degree in honours at Oxford or Cambridge. Having arrived in India, the candidate must within a specified period elect to serve either in the executive or the judicial branch of the service. In the former branch the Lieutenant-governorship of a province is the highest post to which a civil servant can attain, and in the latter branch a judgeship of the High Court. A covenanted civil servant in India commences with a salary of 4,500 rupees a year, and the number of such civilians is about a thousand at the present time. The members of the *Statutory Civil Service* of India are selected purely

from among the natives. Many appointments are in the gift of the local governments; but no one who is not a native, a covenanted civilian or an officer of the staff corps, can be appointed to a post with a salary exceeding 400 rupees a month without the approval of the Indian Government,—from which rule a few departments are excepted. The Public Works Department is recruited from the Royal Indian Engineering College (*q.v.*) at Coopers Hill, from the corps of Royal Engineers, and, as regards natives, from the Civil Engineering Colleges in India. The commencing salary of appointments in this department is 4,200 rupees a year; in the Telegraph Department, recruited much in the same manner, it is 3,000 rupees a year, which is also the commencing salary in the Forest Department. Examinations for the Medical Service are also held in this country, and successful candidates are required to attend a four months' course at the Army Medical School at Netley, during which period they receive an allowance to cover the cost of living. An important and voluminous report of the Commission appointed by the Government of India in Oct. '86 was laid on the table of both Houses of Parliament (March '88).

Indian Council, Reduction of. See **SESSION**, sect. 68.

Indian Empire, The Most Eminent Order of. Instituted in '78 to commemorate the proclamation of Her Majesty as Empress of India, and enlarged in '86, and in the Jubilee year, as a means of rewarding those whose services to the Indian Empire have merited the imperial favour. This order consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and of three classes of members, viz., Knights Grand Commanders (G.C.I.E.), Knights Commanders (K.C.I.E.), and Companions (C.I.E.). Only the two first of these, being knights, are entitled to the prefix "Sir." The motto of the order is "*Imperatricis Auspiciis*" (Under the favour of the Empress). See **KNIGHTHOODS CONFERRED DURING '89**.

Indian National Congress. Within the last few years a movement has taken definite shape among the educated classes of India of all races, religions, and provinces—to meet together and discuss their political wants. Hitherto, the people of India have been widely separated from one another by differences of language, creed, and caste; and these differences have been intensified by distance. It is the English Government that has for the first time united them in a common object. The original stimulus came from the education in English, which is given in all the colleges and higher schools; but the scheme could never have been realised if it had not been for the development of the railway system. The first National Indian Congress was held at Bombay in Dec. '85. The number of persons who attended was less than 100, and their deliberations were held in private, though the resolutions passed were afterwards published. The president was Mr. W. C. Bonnerjee, a Bengali Brahmin, and standing counsel to the Government of India. The second congress was held at Calcutta in Dec. '86, and was attended by about 430 delegates, most of whom represented local associations. The president was the Hon. Dadabhai Naoroji, a Bombay Parsi, not unknown in this country as a candidate for Parliament. The meetings were held in public; and the viceroy (Lord Dufferin) in-

vited the members—in their private capacity, as "gentlemen of more or less distinction and culture"—to a garden party. At the third congress, held at Madras in Dec. '87, the number of delegates rose to 607; and a temporary hall was erected for the meetings, which were often attended by as many as 2,000 spectators. The president was Mr. Budrudin Tyabji, the leading Mussulman barrister of Bombay. The fourth congress was held in Dec. '88, at Allahabad, the capital of the North-Western Provinces, under the presidency of Mr. George, a well-known Calcutta merchant, and former president of the Chamber of Commerce. The number of delegates who attended was 1248. The resolutions adopted at all the congresses have been of a very similar character. Questions of social reform—such as child marriage—have been altogether avoided, as affecting only special religions and castes. Loyalty to the British crown has been unhesitatingly avowed, both in the resolutions and in the speeches; but certain political changes in the administrative system have been as unhesitatingly demanded. First is placed the introduction of a representative element into the councils of the Viceroy and of the governors of provinces, so that the inhabitants of the country may have some voice both in the making of laws and in the levying of taxation. Second, perhaps, in importance comes a demand that the natives should be treated with greater confidence in the matter of self-defence—(1) By being admitted to the higher ranks of the army; (2) by being allowed to form volunteer corps; and (3) by being no longer prohibited to possess and wear arms. Other resolutions call for the appointment of a Royal Commission to inquire into the working of the Indian administration, for the entire separation of judicial and executive functions, for the extension of trial by jury, and for the introduction of a system of technical education. The proceedings at the congress have always been marked by absolute unanimity; but it would seem that this appearance is to some extent deceitful. It has, unfortunately, been found impossible to reconcile all classes of Mohammedans to the inevitable predominance of the Hindu element. The Mohammedans of Northern India, led by Sir Syud Amir Ali of Aligarh, profess that they prefer English rule as it is to Hindu rule as it might be. They do not oppose the resolutions of the congress, so much as decline to act with the Hindus in pressing for their realisation. A few of the great Rajput landholders have also taken up a similar attitude of opposition. True friends of India will have much cause for disappointment if a movement that promised so well, if only kept within sober limits, should be deprived of its national character through the recrudescence of religious bigotry. On Nov. 30th, '88 (St. Andrew's Day) Lord Dufferin (*q.v.*) delivered a speech at a public dinner, which was in the nature of a manifesto against the dangerous tendencies of some of the opinions associated with the movement. The Congress for '89 was held in December at Poona, in the Bombay presidency. The official report of the Allahabad Congress may be obtained from Talbot Bros., 81, Carter Lane, E.C. Consult an article by Sir W. W. Hunter in the *Contemporary Review* for Sept. '88.

Infectious Disease Notification Act, '89. See Session, sect. 79.

Inglis, Rt. Hon. John, son of the late Rev. Dr. Inglis, of the old Greyfriars Church, Edinburgh, was b. 1810. Educated at Glasgow Univ. and Balliol Coll., Oxford (B.A. '34, hon. D.C.L. '49). Was Lord-Advocate for Scotland in Lord Derby's first and second Administrations. Sat for Stamford in '58. Appointed Lord Justice Clerk of Scotland in the same year, and in the following year was sworn of the Privy Council. In '67 he was elevated to the highest legal position in Scotland—viz., that of Lord Justice General. Lord I., while at the bar, was one of the most powerful of Scotch advocates, and consummated his reputation as a pleader by his successful defence of the prisoner in the celebrated *Madeline Smith Case*. His lordship is Chancellor of the University of Edinburgh.

Inhabited House Duty. It appears, from a statement made by the Chancellor of the Exchequer (June '88), that though two parts of a house are separately let, and constitute separate tenements, this is not sufficient to entitle the business portion of the premises to exemption from inhabited house duty. In order to obtain exemption, business premises must not only be separately let, but must be structurally separate.

Inhambane. A port and town of the Portuguese territory of Mozambique, in East Africa, between Delagoa and Sofala, pop. 6,500. During '86 some native tribes in the neighbourhood, incensed by the imposition of heavy taxes upon them, took up arms, defeated the Portuguese native levies, and marched on Inhambane in great strength, but were at length induced to retire and disperse.

Institute of Actuaries. See INSURANCE, FIRE AND LIFE.

Institute of Painters in Oil Colours. Founded in 1883. The Exhibitions, which are held annually, commencing in November, are open to all artists, and the principle of selection is the same as at the Royal Academy (q.v.). Pres., Sir James D. Linton, P.R.I.; Vice-Pres., Frank Walton, R.I.; Sec., W. T. Blackmore.

Institution of Civil Engineers, The, founded Jan. 2nd, '18, incorporated by Royal Charter June 3rd, '28, and received a Supplemental Charter, with extended powers, August 3rd, '87. It was established for the general advancement of mechanical science, more particularly for promoting the acquisition of knowledge requisite for the profession of a civil engineer. According to its constitution, it consists of members, corporate associates (called associate members), and honorary members. There are also attached to it non-corporate associates and students. Members must be practising engineers who have occupied, for a minimum period of at least five years, adequately responsible and independent positions, and, as a general rule, they must be upwards of thirty years of age to be eligible for this class. Associate members must be upwards of twenty-five years of age, and be engaged in the practice of the profession at the time of their application for election. Honorary members are required to be persons eminent for science and experience in pursuits connected with the profession. Non-corporate associates must be upwards of twenty-five years of age, and occupy a definite and recognised position in some other walk of life than civil engineering. Students (who at the time of their application are required to be

between eighteen and twenty-five years of age) must be in the course of preparation and training under a corporate member of the institution, and have the intention of following the profession. At the close of the last financial year (March 31st, '89) the numbers of these several classes were: members 1,657, associate members 2,613, honorary members 19, associates 450, and students 989: total 5,728, of all classes. The sessions extend from the second Tuesday in November to the last Tuesday in May, the ordinary meetings being held on the Tuesday in each week. The record of the proceedings at these meetings is embodied in the *Minutes of Proceedings*, of which four 8vo volumes, each of about five hundred pages and amply illustrated, are issued annually. Besides the ordinary meetings there are every fortnight during the session special supplemental meetings for students only. The gross receipts were £21,764, including strict income £17,400, capital £3,841, and trust funds £522. The institution is possessed of three freehold houses, which cost £40,000, and its funded property amounts to £43,400, besides which it has under its charge trust funds of the nominal value of £14,643, aggregating £98,043. It has a library of upwards of 22,000 volumes, including 632 volumes of rare tracts, the number of which cannot be much less than 10,000. Offices: 25, Great George Street, Westminster, S.W.

Insurance.—ACCIDENT. The business of this branch is done by twenty-nine companies, who for certain premiums insure the payment of periodical sums for total and partial temporary disablement, and other fixed amounts on death or on total or partial permanent disablement. The *Railway Passengers Company* was the first established, which was in 1849. The premium income of these companies in '88 was £830,660, and the percentage of claims to premiums 54—about the same rate as last year's results. This part of insurance business is greatly increasing. In reference, however, to this item, no definite returns can be made, as in the reports of some companies a portion of the working expenses is included in the amount of accident losses. Three other companies, the *London and Provincial Horse and Carriage Insurance Company*, the *Guardian Horse and Vehicle Assurance Association*, and the *Imperial Live Stock Company*, have been formed to insure live stock in case of total loss or accidental injury, and also to provide compensation upon the loss or partial injury to carriages and other road vehicles. The majority of accident insurance companies also transact *Employers' Liability Insurance* and the insurance of workmen by collective policies against accidents for which the employers are not legally liable.

Law on, in '89. A most important case to the public was that of *Cornish v. The Accident Assurance Company, Ltd.* (Court of Appeal, Aug. 9th). The action was brought by the legal personal representative of the deceased to recover £1000 on a policy effected with the company. The policy contained a clause exonerating the company in the event of death being caused by "exposure of the insured to obvious risk of injury." The deceased was a farmer in Hertfordshire, and he had a farm which was intersected by a railway, which he was in the habit of crossing to get from one part of the farm to the other. One day in July '87 the deceased crossed the line for the purpose of getting a match with which to light

his pipe from a man in the field on the other side. He had obtained the match, and was recrossing the railway when a train came up and killed him. The defendants contended at the trial that the deceased had exposed himself to obvious risk of injury within the meaning of the proviso in the policy; whereas, on the part of the plaintiff, it was submitted that the death was one of pure accident, and that therefore the company was liable. The case was tried before Lord Coleridge, who directed the jury to find a verdict for the defendants, on the ground that the case came within the proviso of the policy. The jury found a verdict to the effect that while they were obliged by the ruling of the Lord Chief Justice to find that Cornish lost his life from incurring "obvious risk of injury," they were of opinion that it was a case of ordinary misadventure. On appeal it was held that the decision of the learned judge was right.—In an action which was taken to the Court of Appeal, a policy of insurance exempted the company from liability if the deceased died of poisoning. The deceased by accident took a poisonous mixture instead of medicine, and died immediately. It was held that the insurance company were protected by the exemption; but the Master of the Rolls expressed an opinion that the exemptions were so wide that the public ought to be warned against insuring under policies in that particular form (Court of Appeal, Aug. 9th).—**HEALTH Insurance** was only commenced in '85, and is effected by two companies, viz., the **Health Insurance Association** and the **Sickness and Accident Association**. They were established to answer a great requirement of the middle classes, which is, after the manner of the ordinary benefit societies, to pay weekly sums to those who are wholly or partially disabled from following their vocations on account of illness not resulting from accidents. These companies also combine accident with health insurance. The former company also insures against specific diseases. The Sickness and Accident Company has secured a premium income of £14,401, in which, owing to very careful selection of business, the losses are not more than 30 per cent. of the premiums.—**FIRE**. The statistics of fire insurance business, like those of life assurance, are not ready for publication as regards '89. The premium income of the previous year was nearly £300,000 more than that of '87, while the percentage of losses to premiums is 59·7 compared with 58·68 for '87. The spirit of retrenchment with regard to a reduction on large risks is now increasingly active. The heavy loss ratio of the last year has been caused by some great fires on the Continent, and especially that of Sundsvall in Sweden, from which English companies suffered. The following list gives the proportion of losses to gains in 57 companies:—22, 46·8; 4, 53·5; 10, 56·6; 10, 61·3; 5, 66·6; 4, 71·5; 3, 79·3; 3, 80. The returns of all the fire insurance companies are not yet available, particularly those of the Sun and Phoenix offices. From recent particulars in a prospectus of the former company an idea can be formed, not merely of the amount of its fire risks, but of the increase that has taken place in such during the last twelve years. The sums insured by the Sun Office in 75 was £247,000,000, in '81 £271,000,000, and in '87 £345,000,000. The Phoenix Company in one of its recent prospectuses states that it has

paid losses of over fourteen millions sterling. The amount of fire policies issued in the United States, however, by the Liverpool and London and Globe and a few other fire offices, are largely in excess of those effected with the Sun and Phoenix offices in America. The number of companies whose business is entirely that of fire insurance is now 43, and those established last century are the Sun, in 1710; the Westminster, in 1817; the Salop, in 1780; the Phoenix, in 1782; and the Norwich Union, in 1797. The number of companies who transact fire insurance business in the United Kingdom is 73, or 20 more than those whose business is limited to fire insurance. Five companies also transact fire re-assurance business. About 23 British offices do fire insurance business in the United States, and it has been stated on good authority that since they began this business there they had received, in aggregate premiums, about sixty millions sterling, while their losses had amounted to about thirty-six millions, the average ratio of losses to premiums being within a fraction of 60 per cent. A recent weeding-out process has been adopted with great benefit to these companies in regard to American fire risks. Flour mills, and especially the larger ones, in which the automatic roller system of gradually reducing the wheat into flour is adopted on a large scale, are very dangerous risks. Several fire offices refuse to insure them, and others reluctantly do so, and then only on condition that heavy premiums are paid and expensive precautions are adopted to guard against explosions from the ignition of flour dust. Oil mills are also very risky buildings to insure, and the fire companies are not disposed to take them except at higher rates than those paid a year ago. The Mutual Fire Insurance Corporation provides fire indemnity at cost price to its members, and makes liberal allowances on premiums to those who use the automatic water sprinklers under its approval. Much excellent work is also done by the officials of this Corporation by frequently inspecting fire-extinguishing appliances on insured premises. An expert analyst has been appointed for the examination of oils used for machinery. Great progress has been made in '89 by the installation of the electric light within buildings, and it is generally admitted that the adoption of the "Phoenix Rules" for securing their safety is an admirable plan.—**LIFE**. This business has made important progress during the year. As, however, the financial year with the great majority of life offices closes at the end of December, published reports of their position do not appear for several weeks subsequently. In '88, of 84 competing companies transacting ordinary life assurance, 76 publish their new yearly results, which give a total of about £32,930,000, represented by 98,750 policies, and new annual premiums amounting to £1,235,000. The premium revenue of the Ordinary Branch is £13,224,770, and of the Industrial Branch £4,210,828,—together £17,435,547, which is £589,271 in excess of the income of the previous year. The Life Claims and Endowments are £13,120,652, while those of '87 were £12,900,828. The following is a summary of the total results for '88 of 84 Life Assurance Companies transacting ordinary business:—Total life and annuity funds, £22,085,265; increase of funds in year, £10,539,694; life premium income, £26,344,677; commission and expenses of management,

£4,868,006; average cost per cent., 18.47. Of these last-named companies 80 are British, 3 American, and 1 Colonial. The results for 71 Industrial Companies and 8 Friendly Societies are as under:—Industrial Companies: Total funds, £7,087,010; increase in year, £982,297; life premium income £4,557,584; commission and expenses, £1,964,055; average cost per cent., 43.99. Friendly Societies: Total funds, £2,255,537; increase in year, £155,239; total collections, £1,097,599; commission and expenses, £478,585; average cost per cent., 43.60. According to returns made to the House of Commons by the Board of Trade under the Life Assurance Companies Act, 70, for all the years from '71 to '88 of the premium incomes and of the Life Assurance and Annuity funds of 91 British Life Offices, the following companies have increased their premiums above £100,000 during this period: viz., Prudential, £3,332,542; Refuge, £390,433; Scottish Widows', £339,238; Scottish Provident, £288,532; Gresham, £250,745; Pearl, £225,910; British Workman's, £170,621; Star, £162,325; United Kingdom Temperance and General, £140,131; Standard, £140,021; Wesleyan and General, £131,784; Life Association of Scotland, £119,228; Edinburgh, £112,192; London and Lancashire, £95,639; British Empire, £105,577; Clergy Mutual, £103,799. Those companies having Life and Annuity Funds exceeding £3,000,000 in '88 were the following sixteen: viz., Scottish Widows', £9,583,045; Prudential (Ordinary and Industrial), £7,634,870; Standard, £6,458,486; Scottish Provident, £6,080,256; North British and Mercantile, £4,455,015; Equitable, £4,341,885; National Provident, £4,321,177; United Kingdom Temperance, £4,180,867; Law Life, £4,095,851; Gresham, £3,994,990; London Life, £3,945,113; Liverpool and London and Globe, £3,857,456; Economic, £3,562,753; Clergy Mutual, £3,405,834; Royal, £3,222,103; Life Association of Scotland, £3,223,293. The amount of life claims and bonus in the case of twenty-seven companies for the year materially exceeds the premiums received. The difference is about £1,049,024. Much good has been done by the Institute of Actuaries, founded about forty-one years ago for the extension of actuarial knowledge. By the excellent system of examinations conducted by the Institute, much additional proficiency in life insurance transactions has been attained than otherwise would have been. Future actuaries will have imposed on them a much higher standard of skill relating to their vocation, and far more competence will therefore be required to be shown by candidates for the fellowship of the Institute than at present. The Actuarial Society of Edinburgh, the Faculty of Actuaries in Scotland, the Insurance and Actuarial Society of Glasgow, the Insurance Institute of Manchester, the Insurance Institute of Ireland, and the Birmingham Insurance Institute, the Royal Statistical Society, the Friendly Societies Registry Office, the Public Valuers of Friendly Societies, and the Actuaries authorised to certify Annuity Tables, have all rendered more or less admirable service to life assurance officials and others interested in actuarial knowledge. Some serious frauds, known as the "Belfast Frauds," were committed in '88 upon the Equitable Assurance Company of the United States. Life insurance as transacted by the Post Office is not suited to the habits of the working classes, and hence the very small amount of life assurance business

transacted by it. On the other hand, an enormous amount of life policies are granted to the poorer classes by Industrial Life Assurance Companies and Collecting Friendly Societies. This kind of insurance has immensely increased during the last twelve years. The following figures show the large premium incomes received by a few of these companies and societies: viz., (1) By Industrial Companies: Prudential, £3,058,501; Refuge, £399,666; Pearl, £233,130; British Workman's, £173,544; London, Edinburgh, and Glasgow, £82,563. (2) By Collecting Friendly Societies: Liverpool Victoria Legal, £376,024; Royal Liver, £389,719; Royal London, £172,280; Scottish Legal, £97,660. There are 52 of these societies in Great Britain—47 in England and 5 in Scotland—and all the large English and Scottish societies have branches in Ireland. The four societies last mentioned contain 90 per cent. of the members of collecting societies. The average premium paid by each member is 13d. per week. Sixty of the life offices grant immediate annuities; 35 lend on personal security with life assurance; and 26 transact fire business. Great progress has been made in life business in Australia and New Zealand, in which colonies there are 13 life offices. Most ordinary life assurance companies insure against issue of marriages when a birth is improbable.—MARINE. From a variety of causes Marine Insurance has been in a depressed state during the year. This is mainly owing to the very low rates which are charged for policies, and which are greatly inadequate to the risks involved. Such reduced rates have been occasioned by the influx of a great number of small marine insurance companies during recent years, who to get business have recklessly issued policies at such remarkably small premiums that they cannot be remunerative. Many first-class underwriters and insurance brokers condemn this practice as one that will become ruinous to marine insurance companies, since it will materially increase over-insurance of ships—a grievance that was forcibly pointed out in the House of Commons as existing in '84, and for the suppression of which Mr. Chamberlain's Merchant Shipping Bill was mainly introduced. In consequence of the prevalence of very low premiums for marine insurance during the last four years the large and old-established underwriting companies have refused to reduce their rates to anything like a level with those of the new companies, and hence the former have done much less business during this period than they previously did. They are, however, convinced that such rates will soon terminate, and then their business will be far greater and more profitable than previously. The most experienced underwriters properly state that as premiums for policies by marine insurance companies materially vary for similar risks, specific rates cannot reasonably be stated for publication, as they would be challenged by the representatives of nearly all the marine insurance associations. Unlike life and fire insurance companies, underwriters, as a class, endeavour to conceal from both ship-owners and shippers, as well as the general public, their premium rates and their general financial position. This is another reason why they have so much competition to contend against beyond life and fire insurance companies. Of twenty-one leading marine insurance

companies in Great Britain, the oldest are the Royal Exchange and the London Assurance Corporation, both established in 1720; and the Alliance and Indemnity Companies, both founded in 1824. The premium income of these twenty-one leading companies in '88 was £3,079,808, their losses and averages £2,580,197, and their percentage of losses to premiums 83'9. A large amount of marine insurance business is also done by private underwriters connected with Lloyds and the Liverpool Underwriters' Association. Marine insurances are generally effected through Marine insurance brokers, who are an important class in London, Liverpool, and Glasgow. Claims are determined by average adjusters in difficult cases. One of the previous malpractices in underwriting transactions is the use of so-called "honour policies" generally issued as insurances on prospective freight. The main objections to these "honour policies" were strongly pointed out to the Royal Commission in '89 on the Loss of Life at Sea by Mr. Dale, underwriter for the British and Foreign Marine Insurance Co., and Chairman of the Liverpool Underwriters' Association, when he stated that the present law is liable to be defeated by these policies, because they are the easiest mode whereby the ship-owners can over-insure, "and some not only over-insure, but insure the same interest in different firms many times over, and that without the knowledge of the underwriter on the ordinary legitimate policy—in fact, practically taking away from the underwriter on the legitimate policy the power to supervise the amount which is being incurred." To the credit of respectable shipowners, however, he said that these "honour policies" are but seldom used. All underwriters are opposed to these policies, and the Commission recommend that they should be rendered void and should be legally prohibited, and that the prohibition should be enforced by penalties against the parties to such. During the last thirty years the average shipowner's interest in his adventure has been continually diminishing, which is evidenced by the extension of general average under the York-Antwerp rules, the multiplication of protection, "one fourth" and other clubs, and the insertion of special clauses in the ordinary policies. Reforms are also recommended for the amendment of the law of constructive total loss; for causing the implied warranty of seaworthiness to apply to time as well as to voyage policies, and as respects both policies that the shipowner should be bound to use all proper means to keep his ship in a seaworthy condition after the policy is in force to enable him to recover under it; that in a policy on freight net and not gross freight should only be recoverable, and that no valuation of freight in a policy should be binding; for the trial of questions of seaworthiness in marine insurance cases should be tried by a judge with the assistance of nautical assessors, and without a jury, except when fraud is alleged; that better means should be adopted for the discovery of particulars in marine insurance in the interests of underwriters; and that a more satisfactory mode of procedure should exist for dealing with certificates of officers, and to punish them when required, than that which exists in the Marine Inquiry Courts.

Inter-colonial Conference. See IMPERIAL FEDERATION, NEW SOUTH WALES, QUEENSLAND.

International Copyright. Artists and authors have long desired to obtain an international law of copyright, by which works of literature and art might be protected, not only in the countries where they were first published, but in all civilised countries. An important step in this direction was taken by the conference upon international copyright held at Bern in September 1885, and attended by representatives of the following states: Germany, Spain, France, Great Britain, Hayti, Honduras, Italy, the Netherlands, Sweden and Norway, Switzerland, and Tunis. At this conference there was settled the draft of a convention for securing to the authors of literary or artistic works published in any one of the countries represented copyright in all the others. Such copyright is not to be more than the author enjoys in his own state, nor more than the state granting it secures to its own subjects. The provisions of the convention extend to dramatic and dramatico-musical works. They extend to all works which at the date of the convention have not become public property. They forbid the publication of a translation not sanctioned by the author of the original work. But if within a certain time there appears no authorised translation, an unauthorised one may be published. Articles which have appeared in newspapers or periodicals may be reproduced, unless such reproductions have been expressly forbidden by the original authors or publishers, and no prohibition by them can have effect in the case of articles discussing politics, current topics or news of the day. A work is not to be indirectly appropriated by a reproduction which, in spite of superficial changes, is essentially the same as its original. The convention establishes an Office of the International Union for the Protection of Literary and Artistic Works, which is to be under the surveillance of the Swiss Government, and is to be supported by contributions from all the contracting parties. Any State, not a party, which is willing to adopt the provisions of the convention, may give in its adherence, whilst any state which is a party to the convention, and wishes to withdraw, must give a year's notice of its intention. The convention is to take effect within three months from the adoption of the draft. Conferences for its revision are to be held successively in each of the countries by which it has been adopted. It does not annul or preclude any conventions already existing or hereafter to be made between any two or more of the contracting parties, provided that such special conventions secure at least as ample a protection to authors as it does, and do not otherwise conflict with its provisions. In this country Act of Parliament have been passed in 1844, 1852, 1875 and 1886, with the object of securing copyright to authors and artists who are subjects of foreign states which secure copyright to British artists and authors. These Act empower Her Majesty by Order in Council to grant copyright to the artists and authors of such countries, and Her Majesty has a large discretion in fixing the conditions with which they must comply. The existence of the copyright of the foreign author in his own country may be proved by a certificate under the official seal of a Minister of State in that country or of a British diplomatic or consular officer acting there. Copies of works made in any foreign country other than that in which the protected

work was first published and made without the consent of the proprietor of the copyright may not be imported into this country. An Order in Council issued under these Acts applies to works produced before the date of the Order, but not so as to prejudice any person who has lawfully produced any work in the United Kingdom. It shall be taken to apply to every British possession, saving only those which are expressly excepted. The Act of 1886 contains several modifications of previous statutes intended to harmonise with the provisions of the convention of Berne above noticed. Conventions for the mutual protection of copyright have been made between the United Kingdom and several foreign states. The question of an International Copyright Treaty between England and America has been much discussed during the past few years, on both sides of the Atlantic. In England the Incorporated Society of Authors (*q.v.*) have kept the question prominently before the public, and the American Copyright League have been similarly occupied. See also COPYRIGHT.

International Exhibition in the United States. In the beginning of July '89 it was determined that the year '92 should be celebrated throughout the Great American Union by the holding of a **World's Fair**, or **International Exhibition**. In the year '76 a similar undertaking took place at Philadelphia, and was altogether successful. This year a considerable amount of rivalry, and even some discord, was aroused by the question of "Where shall the Fair be held?" Boston, Chicago, St. Louis, Philadelphia—even Baltimore and Washington, D.C.—vied with New York and each other in propositions for a locality. New York, however, took the lead in raising money, finding a site, and making preliminary arrangements. And, as the idea originated in New York, it seems only just that the Empire City of the United States should have the honour. At any rate, with the exception of Chicago, the other cities soon drew out of the contest, and it now seems that there is some unanimity about the agreement. New York will probably see what is likely to be the biggest thing in international exhibitions the world has yet seen. Early in August '89 Mayor Grant of New York called a meeting, at which committees were appointed, as a preliminary to the more important work of purchasing or hiring a site, raising money, organising staff, and designing the buildings. Following are the committees appointed:—**Permanent Organisation:** E. D. Adams, C. C. Burke, John M. Bowers, Alfred C. Chapin, Orestes Cleveland, Grover Cleveland, T. C. Eastman, Franklin L. Gunther, Henry Goldberger, John H. Graham, Charles J. Gillis, E. I. Horsman, G. G. Haven, J. J. Little, Frederick Mohr, Charles A. Moore, E. L. Merrifield, Henry G. Marquand, T. F. Ryan, John Sloane, E. C. Stanton, Walter Stanton, Charles L. Tiffany, Benjamin Wood, and William Wicke. **Finance:** W. L. Bull, Calvin S. Brice, August Belmont, Samuel D. Babcock, Robert Dunlap, Jay Gould, C. P. Huntington, Henry B. Hyde, H. O. Havemeyer, John H. Inman, Morris K. Jesup, Eugene Kelly, F. A. Karsheedt, John McKesson, Ogden Mills, J. J. O'Donohue, Herman Oelrichs, Oswald Ottendorfer, W. Rockefeller, C. S. Smith, William Steinway, J. E. Simmons, Jesse Seligman, E. F. Shepard, and C. Vanderbilt. **Legislation:** D. F. Appleton, F. W. Cheney,

John C. Calhoun, William M. Evarts, Franklin Edson, Abram S. Hewitt, Joseph Liebman, H. S. Mendelson, Jackson S. Schultz, Ambrose Snow, James W. Tappan, Horace White, E. H. Ammidown, A. B. Cornell, Chauncey M. Depew, Joel B. Erhardt, Hamilton Fish, Elbridge T. Gerry, Levi P. Morton, Warner Miller, Thomas C. Platt, General W. T. Sherman, W. E. D. Stokes, F. B. Thurber, and W. C. Whitney. **Site and Buildings:** John T. Agnew, James Gordon Bennett, Cornelius N. Bliss, Edward Cooper, J. J. C. Clarke, Roswell P. Flower, Samuel Gompers, Andrew H. Green, Richard M. Hunt, D. Willis James, Joseph Pulitzer, John H. Starin, George Warner, W. W. Astor, John Bogart, Charles F. Chandler, John D. Crimmins, Charles A. Dana, John Ford, W. R. Grace, Henry Hilton, George Jones, Arthur Leary, Isidor Straus, and Henry R. Towne. The various trades are represented specially by the following gentlemen: **Artists and Art Collectors,** Henry G. Marquand; **American Federation of Labour,** Samuel Gompers; **Architects,** Richard M. Hunt; **Banks and Bankers,** Levi P. Morton; **Brewers,** Joseph Liebmann; **Brokers,** William L. Bull; **Builders,** John D. Crimmins; **Cotton,** John H. Inman; **Carpets, Rugs, and Oilcloths,** John Sloane; **Cattle and Stock,** T. C. Eastman; **Central Labour Union,** George Warner; **Clothing,** H. S. Mendelson; **Clocks and Watches,** Daniel F. Appleton; **Coffee,** Joseph J. O'Donohue; **Crockery, Glass, and China,** Isidor Straus; **Domestic Steamships,** John H. Starin; **Wholesale Dry Goods,** Charles Stewart Smith; **Retail Dry Goods,** Henry Hilton; **Drugs, Chemicals, and Dyes,** John McKesson; **Mechanical Engineers,** Henry R. Towne; **Civil Engineers,** John Bogart; **Elevated and Suburban Rapid Transit Roads,** Jay Gould; **Express and Freight Transportation Companies,** Thomas C. Platt; **Foreign Steamship Companies,** Herman Oelrichs; **Furniture and Decorations,** Frederick Mohr; **Furs,** Franklin L. Gunther; **Grain and Provisions,** C. C. Burke; **Wholesale Groceries,** F. B. Thurber; **Retail Groceries,** Henry Goldberger; **Hardware,** John H. Graham; **Hats,** Robert Dunlap; **Hotels,** E. L. Merrifield; **Insurance Companies,** Henry B. Hyde; **Iron,** Abram S. Hewitt; **Jewellery,** Charles L. Tiffany; **Lawyers,** William M. Evarts; **Leather Trade,** Jackson S. Schultz; **Laces, Embroideries, Trimmings, Braids, and Buttons,** Frederick A. Karsheedt; **Musical Instruments,** William Steinway; **Machinery and Railroad Equipments and Supplies,** Charles A. Moore; **Periodicals and Publishers,** John Ford; **Oils, Paints, and Oil Products,** James W. Tappin; **Plumbing and Steam Fitters,** Charles J. Gillis; **Printing,** J. J. Little; **Railroads,** Chauncey M. Depew; **Real Estate,** W. E. D. Stokes; **Scientific and Educational Interests,** Charles F. Chandler; **Shipping,** Ambrose Snow; **Silk,** F. W. Cheney; **South American Trade,** William R. Grace; **Street Railroads,** Cornelius Vanderbilt; **Stationery and Paper Trade,** Warner Miller; **Sugar,** Henry O. Havemeyer; **Tobacco Trade,** William Wicke; **Theatres and Places of Amusement,** E. C. Stanton; **Toys,** E. I. Horsman; **Wool,** E. H. Ammidown. The site which at present is most favoured, and which will probably eventually be selected, is on the west side of New York city, and is known as **Morningside Park** and **Riverside Park**. This locality extends from the Hudson (north) river halfway across Manhattan Island at its widest part; and besides being easily accessible from all parts, by road or rail, allows for the magnificent central park being used as a sort

of accessory beauty. As may be seen from the names on the committees, all, or nearly all, of the best and wealthiest men in New York have given their services and money in order that nothing may be wanting to insure success. It is calculated that a sum of from \$15,000,000 to \$20,000,000 will be required to purchase the site and erect the buildings; but no fears are entertained as to the possibility of raising this enormous sum immediately it is wanted. In the meantime, in the first week of October, a guarantee fund of \$5,000,000 was raised to show the sincerity and willingness of the citizens of New York to undertake and carry out this great enterprise. The question of the incorporation of the World's Fair Company of New York was mooted; but it was found that it will be necessary to have a special Act passed through the Legislature, as the laws of the State of New York provide for the limitation of the capital of corporations to \$2,000,000. A special Act of Congress will also be required to decide that the exhibition shall be held in New York; however, any very strenuous opposition to either of these Acts is not in any degree anticipated. At this early date it is impossible to go into any details of arrangements. Information respecting the World's Fair may be obtained from Mr. J. Pierpont Morgan, Chairman of the World's Fair Executive Committee, care of Mayor Grant, City Hall, New York.

International Sculling Sweepstakes. See AQUATICS.

International Telegraphy. The results of the International Conference held at Berlin in 1885 took practical effect on the 1st of July, 1886. Previous conferences were held at Paris in 1865, Rome, 1872, St. Petersburg, 1875, and London in 1879. At the last-mentioned conference the whole of the regulations and tariffs affecting the traffic on international telegraph lines was revised, and one very important change which resulted from that conference was the substitution of a word rate for the then existing twenty-word rate. For some time previously a word rate had been applied with much success to what is known as the extra-European system, and it was probably that fruitful experience which led the London Telegraph Conference of 1879 to adopt a general word-rate for the European system. The business transacted at the Berlin Conference of 1885 consisted mainly in revising and modifying the existing regulations; but some important reductions were also made in the rates to several countries, of which the following are a few examples:—Russia, from 9d. to 6½d.; Spain, from 6d. to 4½d.; Italy, from 5d. to 4½d.; India, from 4s. 7d. to 4s.; China, from 10s. to 8s. 6d.; Australia, from 10s. 8d. to 9s. 6d. Under the new convention the names of both the office and country are now counted in the address as one word each, whatever their length, provided they are written by the sender in the recognised official way. The charges for repeating a telegram from office to office during transmission have been reduced to the payment of an additional quarter-rate instead of a half-rate as formerly. The charges for any words omitted during the transmission of an extra-European telegram will be refunded. Another important alteration resulting from the Berlin Conference, which it is right should be generally known, is that if the sender of a European telegram prepays a reply, and the reply form is not used by the addressee, the amount prepaid for the reply is

not now refunded, as was formerly the case. Many other new regulations respecting foreign telegrams were also agreed upon at the Berlin Conference. See **SESSION '88**, sect. 65; also **TELEGRAPHS**.

Interpretation Act, '89. See **SESS.**, sect. 81.

Intestacy. See **WILL AND CODICIL**.

Inventions, '89. A selection is here given of inventions and improvements effected in manufacturing processes which in the course of the year attracted more or less attention. Mr. Webster's process for electrical purification of sewage was practically demonstrated at experimental works erected by Mr. W. at Crossness, and which have been in operation there for some time. The subject of sewage treatment is one of increasing importance, and many towns are under the necessity of seriously considering the question, not only as regards sewage proper, but also the discharge of refuse matter and noxious outflows into their rivers from oil-mills, factories, and other works. Mr. W.'s is an electro-chemical process, resulting in the oxidation of the organic matter, and the setting free of a harmless effluent. On sewage being electrolied the chlorides of sodium, magnesium, and other substances, always present, are split up. At the positive pole chlorine and oxygen are set free, and the organic matter is rapidly oxidised into innocuous compounds. An ordinary sample of sewage required, on an average, one ampere of current for ten minutes per gallon. The first cost of a complete plant for treating 1,000,000 gallons of sewage daily is computed to be from £6000 to £7000, the engines and dynamos being in duplicate. The new **Amines sewage process** was experimentally demonstrated at Wimbledon, last September, before many well-known experts, sanitarians and others. The process consists in using proportions of herring-brine and milk of lime. At W. the quantities actually used were per 1000 galls. about 6½ lb. of lime, and about 6½ oz. of herring-brine. When this mixture was applied to the sewage there ensued a rapid precipitation, the effluent being colourless and alkaline, but not entirely without odour. It is stated, on the authority of Dr. Klein, F.R.S., that sewage treated by this process is completely disinfected and "sterilised." A distinctive feature is that no disinfecting power is claimed for amines, but for a new gaseous reagent resulting from the action of the lime, called **aminol**. The patent-rights are being worked by the "Aminics" Syndicate, Limited, 101, Leadenhall St., E.C. Reverting to quite different processes in other fields, we may mention Mr. L. Perkins' improved cold producing apparatus, called the **Arktos**. It is very simple in construction, but extremely effective in operation. Intense cold is produced by means of ammonia tubes, and a special evaporative process. The manufacture of ice can be carried on with this apparatus analogous to the process of ice-formation in nature. Rooms of varying size can be kept cold in greater or less intensity by means of this method. At Mr. P.'s works in Regent Square, W.C., may be seen different "cold rooms." A large sized one is at a temperature of -8°F., another (of small size) at -35°. Some are intended to be used as pantries, and there is shown a side-board with part of the interior fitted as an ice safe with this apparatus. Messrs. Slack & Brownlow, of Manchester, have introduced a

new filter of an improved type. It has a complete outer case of nickel-plated metal that can be unscrewed. A tube and tap is placed at the side and near the base of the filter, which is used for conveying water direct from the main-pipe into the filter. The contents are drawn off from the top by means of a bent tube (with tap) springing from the inside of the filter. Two blocks of carbon are used, one over the other; the water being forced through the upper, making it therefore perfectly clear by this means. The Patent Heater Condenser Company, of 16, Great George Street, Westminster, have a useful and novel form of drawing or office table, the patent of Mr. J. Wright. The top is balanced by flexible bands running over pulleys, and to which suitable weights are attached, the whole being in the interior of the desk. The height can be regulated by means of two hand screws placed each side of the front, and the top may be sloped or kept horizontal. For draughtsmen, and for office work generally, it appears well adapted, particularly as it enable workers to vary their position. An industrial problem which has for some time occupied the attention of those interested in textile manufactures is the question how properly to utilise for commercial purposes the valuable raw fibre of the *rhea plant* or *ramie*. Although both the Indian and French Governments have offered inducements for the production of machines capable of reducing the fibre to a condition suitable for use, but few practical results have been obtained. The authorities at Kew Gardens are taking an active interest in the matter, and have afforded valuable assistance and advice to planters and to inventors of machines. The assistant director at Kew recently represented this country at a special series of trials held at Paris in connection with the late Exhibition. Notwithstanding the fact that there are several machines and processes for the decortication of the fibre under test in England, the entries were entirely French. Distinct advance had been made, however, in the proposed methods of treatment. The chief difficulty is in connection with the gummy matter surrounding the fibre, which it is necessary should be removed, so as to leave the fibres clean and ready for the spinner. A new and successful machine for the treatment of green stems was shown by M. Favier, of the Société la Ramie Française. The machine invented by M. de Landtsheer is also highly spoken of, and processes to prepare about 50 tons of green stems per week. Both these inventions obtained gold medals. One process was exhibited which consists of steeping the green, or the dry stems, in boiling water for a certain time, and then cleaning them by hand. It is known as the *Fléury-Morveau process*, and was awarded a silver medal. Capt. Doty recently patented a machine in this country, and his system has been tried near Rome, and a report published in the *Bollettino di Notizie Commerciali* for Sept. 29. Messrs. Spencer & Co., of Hitchin, are also experimenting—with, it is said, successful results—but their method is not made fully public yet. Once satisfactory machines are produced, there would seem to be excellent prospects for a satisfactory *rhea* industry.

Ireland. An island lying to the west of England and Scotland, bounded on the east by the Irish Sea or St. George's Channel, and on the south, west, and north by the Atlantic

Ocean. Greatest meridional length 225 m.; breadth about 120 m.; area, 32,520 sq. m., or 20,803,272 acres. Pop. (in 1881) 5,174,836. Till the middle of the eighteenth century the industry was almost exclusively pastoral, and at the present time the crops chiefly grown are hay, oats, and potatoes, with flax for the supply of a not too prosperous linen industry, the other principal manufactures being porter, whisky, and butter. (For concise history of Ireland to fall of Lord North's Ministry, see ed. '88.) On the fall of Lord North, in 1782, the short-lived **Rockingham Ministry** repealed the Act annulling the jurisdiction of the Irish Peers, and the next year established the Irish courts and parliament in the same position in Ireland that their counterparts occupied in England. At another time, and under changed circumstances, the experiment of two legislatures under one Crown might have succeeded. But the Irish had found the additional strength which the Catholic Relief Act and the arming of the Volunteers had given them; they had before their eyes the example of the successful revolt of the American Colonies; and the concession of much only made them long for more. Upon people so disposed came the example of the **French Revolution**, and the advantages it seemed to offer them. Although the desire for further Catholic emancipation was no doubt in itself genuine enough, this was soon seen to be desired only as a means to an end; and when secret negotiations with the French Directory seemed to promise a shorter road to independence they were entered into, and rebellion and massacre were timed to coincide with a French invasion in 1798. The abortive invasion and the bloody revolt cost Ireland 100,000 lives, and England 20,000, and upon peace being restored the Union had become a political necessity. It was Pitt's idea that with the Union he could safely grant the **Catholic Emancipation**, which alone would pacify the Irish, and which could not be granted except on the condition of Union. In this he was thwarted, and Ireland had to wait nearly thirty years till the concession was granted as the alternative of reconquest. Since the Union, but more especially since Catholic emancipation and the last two Reform Bills, the parliamentary history of Ireland has consisted in the formation and organisation of a **Repeal Party** in the House of Commons. The creation of such a party, acting upon the party system of English government, has had most pernicious effects in both countries. Even when what was called the Irish vote was comparatively small, it might decide a critical division, and was bought by concessions, the effect of which was neutralised by coercive measures whenever Irish disaffection so provoked the English constituencies that to tamper with it became politically dangerous. In this way England's Irish policy has for the last half-century alternated between severity and surrender, with the result that we have now presented to us the largest demand of all; and Mr. Gladstone has staked his political existence upon compliance with it. The political machinery which gave force to the demand was provided by Mr. Gladstone himself in the **Reform Act of 1868**, by which Ireland retained an excessive representation, and electoral power was thrown into the hands of the classes most disaffected. Returned to Parliament at the head of eighty-six supporters, unanimous in their demand for

Home Rule (*q.v.*), and ready to give their support to any leader who would aid them in getting it. Mr. Parnell soon found an ally in Mr. Gladstone, who in the year '86 brought forward two measures to secure this object for Ireland. The first gave Ireland a parliament free to legislate on all Irish subjects, but restricted from legislation concerning the Crown, war or peace, the army and navy, foreign affairs, trade and navigation, and other minor matters. There were also provisions intended to secure religious freedom and unjust taxation. It was also provided that the revenue of Ireland should be paid over to an English receiver, who should hand back the balance after deducting Ireland's share of Imperial burdens. The second Bill—to be read as one with the first—provided a scheme for buying out the landlords and handing over their estates to the tenants, whose payment of reduced rents should go to repay the purchase money and interest. The Irish party accepted the scheme so far as to vote for it, but did not conceal the fact that they objected to the restrictive provisions, and did not regard the measure as final. A section of the **Liberal Party**, believing in the finality, and relying on the restrictive safeguards, also supported the bills. The **Conservatives** and a considerable number of **Liberals** (**Liberal Unionists**) combined to defeat the project by 341 against 311; and on a dissolution this verdict was confirmed by the country. At the present moment there is no scheme of Home Rule before the country, Mr. Gladstone declining to put into concrete form his ideas on the subject, and the **Liberal Unionists** continue to maintain their former attitude. It is not our function to pronounce on the merits of the dispute. (See article **HOME RULE**).—The political history of Ireland during '89 may be described as a continuation—and a far more successful continuation than in '88—of the struggle between the Government and the disaffected section of the country. Mr. Balfour has unflinchingly put in force the powers which the Irish Executive has under the Crimes Act, and his firm policy, coupled with improvement in agriculture and trade, is stated to have done a great deal in repressing disorder and pacifying the country. Among the most prominent events of the year was the murder of District-Inspector Martin, which occurred on Sunday, Feb. 3rd, and arose out of the arrest of Father McFadden, parish priest at Gweedore. Inspector Martin, with eight constables, attempted the priest's arrest under a warrant of a Crimes Act court, outside the door of Derrybeg Chapel after mass, and an excited mob of Gweedore peasants set upon the constabulary, and injured several of them. Inspector Martin was struck down from behind, and beaten to death by the mob. Early in the year Mr. W. O'Brien, M.P., was imprisoned under the Crimes Act. His treatment in Clonmel gaol—he having been stripped of his clothes on account of his refusal to wear the prison uniform—caused much discussion. Several Irish members were imprisoned during the first half of the year, and the evictions upon the Olphert estate at Gweedore led to the imprisonment for three months of Mr. Conyngham, M.P., for inciting the tenants to resist eviction. At these evictions there were some exciting scenes, force having to be vigorously employed by the police. The **Plan of Campaign** was in active operation on several estates during the year, but was energetically

stamped out by the Government, numbers of persons, including Irish members, being imprisoned for offences arising out of it. In Sept. there was a good deal of trouble in Tipperary in connection with the recovery of rents on the **Smith Barry** and other estates, and there were numerous prosecutions. Much boycotting prevailed in this county and in the city of Cork, which was the scene of some rioting. In Oct. the trial of the prisoners concerned in the murder of Inspector Martin at Derrybeg took place, but evidence to hang the actual murderers was not forthcoming. One man was sent to penal servitude on an indictment for manslaughter for ten years; two others for five years; and three others for six months each. Seven other men were also sentenced to terms from two to six months. Father McFadden was let out on his own recognisances. Latterly the condition of Ireland has considerably improved. A feature of the year has been the employment of arbitration as a resort against wholesale evictions, and also the sale of holdings to tenants. The counties in which most of the agrarian outrages occurred during the disturbed quarter ending June 30th, were Galway, Clare, Cork, and Kerry. According to the latest report the registered population of Ireland is 4,777,534, a decrease of 55,000 in one year. During the year the usual fortnightly meetings of the **National League** (*q.v.*) were held, but a decadence in the influence of the League was apparent. In July, Mr. William O'Brien announced a new departure in a speech at Tipperary, in the course of which he said that he was authorised by Mr. Parnell to announce that a new **Tenants' League** would be formed "to protect the tenants against the combination of the landlords. This League," he said, "would be the official act of the whole Irish party." The title of the new organisation, the object of which is considered to be the supersession of the **National League** and the **Plan of Campaign**, is the **Irish Tenants' Defence Association**, and a convention of **National League** delegates to inaugurate it in County Cork was held on Nov. 5th. Mr. Parnell was to have inaugurated the League, but excused himself because of considerations of health. He wrote, however, advising that the working of the movement should be limited to defensive action, and that special regard should be paid to the following objects: "(1) The duty of protecting tenants threatened by the landlord conspiracy, and who are prevented by this cause from availing themselves of the benefits intended by Parliament for the tenants' advantage; (2) the assertion of the rights of freedom of speech and public meeting, now so frequently and wantonly assailed by the horde of unscrupulous partisans who administer much of the executive and judicial functions of the country; (3) the vindication of the same facilities for combination and organisation which are secured to English workmen by trade union enactments." The minimum subscription to the Association is a rate of threepence in the pound on the ratable value of the holdings of the members. At the time of writing the new organisation had not created much public attention. **The Land Question**. After all, however, it is urged, the great question in Ireland is the **Land Question** and that of the condition of the people. Here, too, a brief retrospect may be interesting and useful. For present purposes it would be

useless to go back beyond the reign of James I. In 1686 Ireland exported 440 tons of iron, 557 tons of lumber, 400,000 barrel staves and 25,000 pipe staves. The country was not yet cleared of its woods, and the exports of lumber continued for forty years longer. Agricultural produce and fish were also exported, and some coarse manufactures flourished. This prosperity was checked by the civil wars, but revived at the Restoration, and in 1686 the export trade amounted to £158,077, of which England took about half. Of this £309,000 was for agricultural produce, including some woollen goods; linen (yarn and cloth) appears for the first time, and figures for £18,000. "Manufactured iron" stood at £1,116. Imports the same year amounted to £336,000. By 1681 exports had risen to £583,000, and imports to £433,000. The wars of the Revolution utterly paralysed Irish trade, and it was not till 1697 that these figures were again reached. But the next year, after the peace of Ryswick, exports rose to close on £1,000,000, and imports to £576,000. Then began the policy of restrictions on Irish trade, and for a time the figures were kept down, but by 1715 had risen to £1,250,000 exports, and £882,000 imports. Varying from time to time from political causes, but rising on the whole, in 1772 the imports and exports stood respectively at £2,415,000 and £3,309,000. During the ten years that England was weakened and embarrassed by the American War, Ireland recovered her freedom of trade. By a series of statutes, tobacco was allowed to be grown and imported in Britain; bounties were given on the importation of hemp; woollens and glass were allowed to be imported from Ireland; and free trade with America, the West Indies and Africa, was conceded; the Turkey trade was opened to Ireland, and the exportation of gold and silver to that country was permitted. By these means, in spite of war, the Irish trade held its own, and after the peace with America largely increased. At the present day, now that the population of the country is again about what it was at the time of the Union, the exports of cattle, sheep, and pigs to Great Britain alone are worth at least £12,000,000 annually, whilst the value of the fish sent to us is close upon £1,000,000, and likely to increase. But while these and other figures might be quoted to show the comparative progress in wealth made during the century, they do not touch the real grievance that has been at the bottom of Irish discontent and has given strength to every anti-English agitation. No doubt that grievance was in the first instance the evil of absentee landlords—often men who neither by birth nor sympathies were Irish, but who drew from the Irish tenants the means of enjoying in England the comforts and civilisation which they must have missed had they done their duty by their estates. If they had contented themselves with their rents less harm might have been done; but they encumbered their property with mortgages, while the agents they employed farmed their rents for a lump sum, and served their own profit out of the unlucky occupier. Doubtless the Union, by centralising the Government in England, aggravated the evil which perpetual disturbances had encouraged; but during the Continental Wars the high prices of produce kept the Irish farmer alive though rents were going up. The battle of Waterloo and the Peace

brought a sudden collapse, and soon we begin to hear of starvation, default, evictions and outrages. The "Threshers" of 1806 developed into the Whiteboys or Reekites of 1820, or took the more constitutional form of the Catholic Association, to be duly suppressed by Peel's Police and Peace Preservation Acts. Catholic emancipation (1829) removed a stigma, but brought no food to hungry people; and soon the weary round of suffering, outrage, and repression was repeated. At length the Government set to work to grapple with the real evil, and the Devon Commission was issued in 1844, and reported early in 1845. Before this report could be acted upon came the potato blight and the famines of 1845 and 1846, during which time by death and emigration the Irish population was diminished by more than 1,000,000. The total in 1841 had been 8,175,124; in 1851 it was 6,515,794. There can be no doubt that, though not perhaps more than the land could support, the Irish population had been, and probably still is, greater than could be supported by the existing state of industry. At any rate, since the relief afforded by emigration has been discovered, the Irish have not been slow to avail themselves of it, as the present diminishing population of less than 5,000,000 sufficiently shows. It is also significant that for the last thirty years every Irish disturbance has been of foreign origin. Soon after the famine an Act was passed for the relief of encumbered estates by compulsory sale. This tended to clear away a number of landlords who could never have done anything but hang uselessly on the land; but they were not succeeded by men who put capital into the land. On the contrary, estates were largely bought by men who merely looked upon the purchase money as an investment on which, without further trouble to themselves, the rents would be a good return. They too were absentees, and the last state of the tenant was worse than the first. The gradual drain of population did something to mitigate the lot of those who were left, but the agitation for tenant-right increased rather than diminished, and growing discontent prepared the soil for the Fenian movement of 1865 to 1870. To this movement belongs the credit of having stirred up Mr. Gladstone to devote himself to the Irish question. The disestablishment of the Irish Church put the priesthood on his side; and his Land Bill of 1870 gave the tenant some guarantees against capricious disturbance, and compensation for his unexhausted improvements, and had fair provision to enable tenants to become proprietors. Had it been followed by a long series of good years it might have done much; but the years from 1877 to 1880 were bad, and disaffection, promoted as before from America, revived. The Irish parliamentary party were now much stronger, and Mr. Gladstone's Act of 1881 was accordingly more drastic. It established a Land Commission to revise rents and fix them for fifteen years, and to this fixity of tenure added freedom of sale. The extent to which tenant rights have since increased in value is a reasonable measure of the freedom with which rents have been reduced. A subsequent measure, known as Lord Ashbourne's Act, passed by the Conservatives, to advance money to tenants anxious to buy their estates, has been largely taken advantage of, and already heavy loans have been granted, with the result that land is

slowly but steadily passing from the hands of the old landlords into those of the tenants. See HOME RULE, and ENGLISH POLITICAL PARTIES.

Ireland, Government of. The head of the executive is the Lord Lieutenant, who is assisted by a Chief Secretary, the Lord Chancellor of Ireland, the Attorney-General for Ireland, the permanent officials, and a Privy Council (which is a separate and distinct body from the Privy Council of Great Britain); but the government of the country is in all essential points carried on under the direction of or in concert with the Ministry of the day in London. The Lord Lieutenant is charged with the maintenance of peace and order; the Irish Constabulary are under his control, and he may, if he think it to be necessary, direct the Commander of the Forces to send troops to their aid. He has power to commute sentences and pardon criminals, and he may by and with the advice of his Council issue proclamations under the Criminal Law and Procedure (Ireland) Act 1887 (*q.v.*). There are, however, more agreeable and less anxious functions attaching to the office; for, as representing Her Majesty, the Viceroy, assisted by his wife, holds courts, drawing-rooms, levees, and maintains in Dublin an establishment of a semi-regal character. On occasions he confers the honour of civil knighthood. During his absence the duties of chief governorship are performed by three or more Lords Justices, those who act in this capacity being usually the Lord Chancellor of Ireland, the Commander of the Forces, and some of the judges. The Chief Secretary to the Lord Lieutenant, or Chief Secretary for Ireland, as he is usually called, has been described as prime minister to the Viceroy; and although he is in theory subordinate to the Home Office, he has his own establishment at the Irish Office in London, as well as in Dublin, and is directly responsible to the House of Commons for the acts of the Irish administration. He is assisted by a Permanent Under-Secretary (Sir J. West Ridgeway: salary £2,000), and other officials. (The late Col. King-Harman acted for a while as Parliamentary Under-Secretary without salary. See SESSION '88, sect. 38.) There is a separate Local Government Board for Ireland; a Board of National Education, by which the grant made by Parliament for public education is administered, the inspection of Irish fisheries is kept separate from the supervision of those of England or Scotland; and there is a veterinary department in Dublin for dealing with cattle diseases, etc. See MINISTRY.

Ireland, Royal University of, Earlsfort Terrace, Dublin, founded 1879 under the University Education (Ireland) Act. On its establishment Queen's University, founded 1850, at Dublin, dissolved; and the relations of the Queen's Colleges at Belfast, Cork, and Galway to the new University were revised. Its degrees, exhibitions, and scholarships are open as well to female as male students. The number of candidates who presented themselves for the various examinations of the University in the year '88 was 3,130. Chancellor, the Marquis of Dufferin and Ava. Vice-Chancellor, Lord Emly. Secretaries, J. C. Meredith, LL.D.; D. B. Dunne, LL.D. The degrees and hoods are:—LL.D. (hood scarlet cloth, lined with pink silk); LL.B. (h. black silk faced with white); M.D. (h. scarlet cloth lined with scarlet silk); M.B. (h. black silk faced with scarlet); M.Ch. (h. black silk, lined

with white and faced with blue); M.A.O. (h. black silk, lined and faced with purple); D. Mus. (h. white figured silk, lined and faced with rose-coloured satin); B. Mus. (h. blue silk, lined with rabbit skin); M.E. (white silk, lined and faced with green); B.E. (h. black silk or stuff, lined and faced with green); D. Sc. (h. scarlet cloth, lined with blue silk); D. Lit. (h. scarlet cloth, lined with white silk); M.A. (h. black silk, lined with blue silk); B.A. (h. black silk or stuff, lined with rabbit skin). In '88 the Princess of Wales received the degree of D. Mus. Consult *The Calendar*.

"Irish Times," Dublin, a morning paper which claims to have the largest circulation of any Unionist paper in Ireland, and one of the leading organs among the merchants and commercial classes in the Irish metropolis, and in the north and south. Its politics are moderate Conservatism, and since the split in the Gladstonian party, it has warmly espoused the cause of the Liberal Unionists under the leadership of Lord Hartington. It has a London office, with a special wire to Dublin. Editor: J. A. Scott. London Office: 153, Fleet St., E.C.

Iron and Steel. Generally speaking, iron is employed in three different forms—namely, cast iron, wrought iron, and steel. Cast iron is a hard and comparatively brittle substance of crystalline character, which can be fused at a high temperature and moulded. Wrought or malleable iron is soft and tenacious, its structure being fibrous. Steel forms an intermediate link between ordinary cast and malleable iron, and unites within certain limits the properties of both. Steel is produced in a variety of ways, but the methods now adopted in most countries for producing steel, especially in large quantities, are the Bessemer, the Siemens-Martin, and the Thomas-Gilchrist processes, which are named in the order of their invention. By the latter process, steel is successfully produced from iron obtained from inferior ores of the more highly phosphuretted kind, which could not be converted into good steel by either of the other methods. The production of steel by this process from phosphoric pig-iron continues steadily to increase. As was to some extent anticipated in our last issue, the iron and steel trades for '88 proved prosperous to a degree in both output and prices. The report of Messrs. McGrigor, Donald, & Co., Glasgow, as representing the makers of Scotch pig-iron, shows the make during '88, from Christmas to Christmas, the stocks in hand at date, etc. Make of pig-iron in '88 (including hæmatite and basic), 2,027,774, against 932,240 tons; average number of furnaces in blast, 83,76, against 79,96; stock of pig-iron at Christmas, 213,213, against 285,332 tons; and number of furnaces then at work 77, against 85. The foreign shipments were 240,273, against 286,990 tons; coastwise, 173,200 against 121,297 tons; sent by rail to England, 9,259 against 8,170 tons. The output of ironstone in Cleveland in '88 was estimated at 5,400,000 tons, as against

4,980,000 tons, and the number of miners employed in both years at 5,750; while the returns of the Cleveland Ironmasters' Association, published early in Jan. '89, showed that the total decrease in the stocks of pig-iron for '88 came to 165,000 tons, the amount in hand on Dec. 31st being 472,628 tons. The following are the complete Board of Trade Returns of exports of the allied industries in '88, as against '87:—Pig-iron in '88, value £2,607,176, against £2,736,866; bars, angles, etc., £1,660,273 and £1,448,859; railroad, £4,673,148 and £4,617,919; wire, £863,218 and £630,998; telegraphic, etc., £581,174 and £817,385; cast and wrought, £4,880,561 and £4,122,515; hoops, sheets, etc., £4,049,819 and £3,314,757; old iron, £396,857 and £827,755; steel, unwrought, £1,531,978 and £4,093,275; tin plates, £5,538,310 and £4,792,854; tin, unwrought, £701,225 and £537,864. It is interesting to add that in '88 there were produced all the world over a total of 1,953,234 tons of basic steel against 1,704,481 tons in '87; with the former were 600,000 tons of slag, nearly all of which, being charged with phosphate of lime, sold as a fertiliser.—'89. Perhaps the shortest way to bring home to the reader the extraordinary developments in all branches of the iron and steel trades during the year is to quote the Board of Trade statistics for the first three quarters. The following were the exports: Pig and puddled iron (values), £2,011,670 in '89, against £1,668,564 in '88; bar, angle, etc., £1,185,059, against £1,228,220; railroad iron and steel, £3,800,350, against 3,574,606; wire, £587,936, against £643,097; telegraphic ditto, £693,916, against £397,139; cast and wrought iron, £3,877,267, against £3,618,192; hoops, sheets, etc., £3,014,346, against £3,035,299; steel, unwrought, £1,193,088, against £1,160,309; machinery, £2,287,906, against £6,951,250; steam engines, £2,659,731, against £2,607,872. It must be remembered that the wave of prosperity had already arisen in '88, that there was an enormous home demand, much encouraged by the orders arising from the Government's programme of national defence, and a general disinclination of makers to book too far ahead. It is almost useless to quote the prices decided upon at the last quarterly meeting of the iron trade at Birmingham on Oct. 10th—marked bars, £8 10s.; hoops, £9; and sheets and plates, £10—for in many cases they were departed from almost immediately, sellers not being anxious to commit themselves. In fact, soon afterwards something like a famine was felt from Glasgow to the Black Country. One authority (Nov. 13th), writing from Wolverhampton, says: "Since the month of October last year, when the quotations for branded bars of the ordinary quality were £7 per ton, there have been four distinct advances, bringing the price up to the now recognised standard of £9, with 12s. 6d. extra for Lord Dudley's round oak make. It is just ten years since common finished iron reached the same figure. But, whilst marked bars have advanced £2 per ton during the past thirteen months, the medium and inferior qualities of unbranded iron have gone up much more rapidly, present quotations showing a total advance of from £3 to £3 10s. per ton; whilst pig-iron has risen in proportion to a higher rate than has been known in the trade for the last ten or twelve years. The enhanced prices are firmly upheld on all new orders." Some further idea may be gained of the state of affairs when it is mentioned—

and this is not by any means an extreme case—that in the week ending Nov. 16th on the Glasgow market Scotch warrants advanced 3s. 3d.; Cleveland G.M.B., 6s.; Cumberland hæmatite, ss. 10½d.; while at the Middlesbrough market of Nov. 19th Cleveland G.M.B. was quoted 66s. prompt; warrants, 67s. 1½d.; hæmatite, 76s. If these figures are compared with those of even a year ago the enormous advance will be at once realised. Such was the tension of feeling, indeed, that a rumour was circulated at Middlesbrough in Nov. that a syndicate had been formed to secure all the pig in Connal's iron stores. Whether this be true or not, it is remarkable that, although on Nov. 21st a broker at Glasgow sold 50,000 tons presumably for the syndicate, Cleveland prices there closed at 67s. or 68s., this iron still retaining its lead of Scotch iron quotations—itsself a phenomenon. Happily, as the year went on, anything like a general labour dispute was avoided, and there does not appear to be anything of the kind ahead. Indeed, prosperity is assured for at least the earlier months of next year, as many of the masters are well sold forward. Of course, in the matter of both demand and price the above remarks apply to steel; and on Nov. 18th heavy sections of rails were quoted on the Barrow market at £6 18s.; light sections, £7 10s.; Bessemer iron, 78s. (the highest point touched during the year); and hæmatite ore, 14s. 6d. to 18s. The well-known Landore Siemens Steel Works were sold by auction on Feb. 13th. The property, which covered nearly 400 acres, cost upwards of half a million sterling, and was sold to Mr. C. P. Whiteley for £101,000 in one lot. The annual meeting of the Iron and Steel Institute was commenced at Westminster on May 8th, when Sir James Kitson, the new president for the next two years, delivered as his inaugural address an account of his connection with the manufacture of best Yorkshire iron. It was reported in May that a patent taken out in France and America for a steel process by M. Gustave L. Robert was attracting much attention in the latter country. It consists of making the air tuyères in the side of the converter instead of at the bottom, and thus the air-blast is directed on the surface of the molten metal instead of through it, and it is caused to impinge at a quarter or less angle by tilting the converter.

Ironclads. See NAVY, THE BRITISH.

Irredentists. Members of the "Italia Irredenta" (Unfreed Italy), a political organisation promoted in Italy in 1878. The organisation aims at freeing all Italians from foreign rule, and at reuniting to the Italian kingdom all those portions of former Italy which have passed under foreign domination. The "Italia Irredenta" is especially directed against Austria, the chief sphere of its agitation being the South Tyrol (Trient) and Trieste.

"Irving, Henry." The "stage name" of John Henry Brodribb, the famous actor. Born at Keinton, Glastonbury, 1838. Educated by Dr. Pinches at his school, George Yard, Lombard Street, London. Made his first appearance at the Sunderland theatre in 1856, and subsequently proceeded to Edinburgh, where he played for two and a half years. Appeared at the Princess's Theatre, London, in September 1859, for about three months. In April 1860 Mr. Irving proceeded to Glasgow, where he played till the end of the ensuing Sept.; subsequently going to the Manchester

Theatre Royal. From January 1866 to July of that year Mr. Irving was engaged at the Prince of Wales's Theatre, Liverpool, and then returned to Manchester. A London engagement followed at the St. James's Theatre, in December 1867 he was engaged at the Queen's Theatre, Long Acre, and at various other houses, till in the spring of 1870 he made a great success as Digby Grant in the "Two Roses" at the Vaudeville Theatre. In November 1871 he made his first appearance at the Lyceum. His first great effort here was in "The Bells." Mr. Irving scored a series of remarkable successes subsequently, in "Charles I." and "Eugene Aram" (by Mr. Willis), "Richard III." and "Hamlet"—his Shakespearean revival being a red-letter day in the history of the drama (1874). His claim as an English tragedian was further emphasized in September 1875 by the production of "Macbeth," and "Othello" (1876); and then followed an artistic study in the Philip of the Poet Laureate's "Queen Mary." A triumphal tour was next undertaken in England, Scotland, and at Dublin. At the Lyceum, in 1877, "Richard III." was produced, and then the curious piece "The Lyons Mail," in which Mr. Irving "doubled" in *Dubosoq* and *Lesurques*. This was followed by the poetical drama "Vanderdecken." In the December of that year Mr. Irving took over the Lyceum from Mrs. Bateman, and revived "Hamlet." Since this time the Lyceum has been looked upon as the home in England of high dramatic art, and both as actor and manager Mr. Irving has spared neither pains nor expense as the representations he has undertaken. In "Othello" he for one season alternated the characters of Othello and Iago with Mr. Edwin Booth, the American tragedian; and to exhibit the scope of his peculiar genius he at one time played "The Bells," with an adaptation of one of Dickens's well-known characters, "Jingle," as an afterpiece. Lord Tennyson's later piece, "The Cup," was also produced at the Lyceum (1881), the stage mountings of the ancient surroundings being perfect. In July 1882 Mr. Irving was accorded a public banquet at St. James's Hall, Lord Coleridge presiding over a brilliant company, previous to his first visit, with Miss Ellen Terry (*q.v.*) and the rest of the now far-famed Lyceum Company, to the United States. The experiences of this little band of artistes in America were unprecedented: speculators bought up all the tickets, and admission to the theatres could only be obtained at "famine" prices. A second visit to that country was made in 1884; and the latter end of 1885 was marked by the unprecedented success of a new dramatic version of "Faust." Mr. Irving taking the part of Mephistopheles. On June 26th, 1886, Mr. Irving lectured on Dramatic Art in the new University Examination Schools at Oxford, by invitation of the then Vice-Chancellor (Prof. Jowett); and at the close of the lecture was presented with an address, and a handsomely bound volume of Fleay's "Life of Shakespeare and his Works." This was revived at the same theatre in September '87, on the return of Mr. Irving from another American tour. The new scene, the Witch's Kitchen, was introduced into the play January '88. Subsequently Mr. I. made a tour of the provinces, and on his return to London reproduced "Macbeth." This was again revived in Jan. '89, and reached its 100th representation

on May 1st. Mr. Irving's most notable undertaking last year, however, was the reproduction of the late Watts Phillips' "The Dead Heart," a story of the French revolution, in which he took the part of the leading character. Mr. Irving was presented with a set of diamond sleeve studs by the Queen, after his performance before her at Sandringham in July '89.

Isaacs, Sir Henry A., b. 1829. Is a son of the late Mr. Michael Isaacs, by Sara, daughter of the late Señor A. de Mendoza, with whose progenitors the late Lord Beaconsfield was connected in the maternal line. He was elected a member of the Common Council for the Ward of Aldgate in '62; was chairman of the principal Corporation committees, including City Lands, Finance, and Markets (of the latter for three years in succession), until '83, when he was elected alderman of the Ward of Portsoken in succession to the late Sir Thomas White. He served the office of sheriff in '86-7, and was knighted on the occasion of Her Majesty's visit to the city, and is one of the few citizens to whom Her Majesty was graciously pleased to present the jubilee medal. He is one of Her Majesty's lieutenants of the City of London, a governor of the Royal Hospitals, and a past master of the Liners' Company. He is the senior partner in the firm of M. Isaacs & Sons, Fruit Brokers and Steamship Brokers, St. George's House, Eastcheap; and Valencia, Spain, and M. Isaacs, Sons, & Shaw, Fruit Brokers, Hull; and is a director of the General Steam Navigation Co., the London and Lancashire Life Assurance Co., and the Hansard Publishing Union (Limited).

Islam. See MOHAMMEDANISM.

Isle of France. Old French name for Mauritius (*q.v.*).

Isle of Man. Lies in the Irish Channel, equidistant from England, Scotland, and Ireland. Area 220 sq. m., pop. 54,089.—Divisions are 6 sheadings and 17 parishes. The principal towns are Douglas, Castletown, Ramsey, and Peel. Castletown is the ancient capital, but Douglas (pop. 15,719) is the chief town and the seat of government.—Physical aspect mountainous, well watered, and exhibiting lovely scenery. There are peculiar breeds of ponies, cattle, cats, &c.—Government is "home rule" under a Lieutenant-Governor, who, with Council and House of Keys, makes up the Tynwald Court. Acts, after assent of the Crown, must be proclaimed on Tynwald Hill.—Industries are farming, fishing, mining of lead, copper, iron, zinc and reception of tourists. The land is in a high state of cultivation.—(For financial statistics see BRITISH EMPIRE, etc.—table). Railways exist between the various towns.—The Manx people are a distinct Celtic nationality. Their language and old customs are rapidly disappearing. The island has had many sovereigns—Welsh, Scots, Northumbrians, Norse, English. The last kings were the Dukes of Athole, who sold their revenues in 1765, but did not give up entire rights till 1829, since when only has Man been an actual dependency of the British Crown.—See Scott's "Peveril of the Peak," Introduction.

Isle of Man Tower and Suspension Bridge. It was reported at the end of Oct. '89 that plans had been deposited with the Manx Legislature to erect a tower at the Isle of Man, rising 40 feet above the sea level, and connected with it will be a suspension bridge joining the tower to the promontory of Douglas Head. This bridge

will be 135 feet above high water, and will thus leave ten feet to spare for the largest vessels entering the harbour.

Isle of Pines or Pinos. An island south of Cuba (*q.v.*), and politically a part of it. Area, 600 sq. m.; pop. 20,000. For many years notorious as a resort of pirates.

Ismail Pasha, ex-Khedive of Egypt, was b. at Cairo in 1830. He ascended the throne of Egypt on January 18th, '63. Previously educated at Paris. Under his reign the construction of the Suez Canal took place. In '73 he obtained from the Sultan a firman giving autonomy to Egypt, and assuring to his family the Khedivate. In '75 he sold to England, through Lord Beaconsfield, his shares in the Suez Canal for £4,000,000. But Ismail had, in consequence of his extravagance, brought the **Egyptian Finances** into so bad a condition towards the end of '75, that Mr. Stephen Cave, M.P., and Colonel Stokes, R.E., were sent by the English Government to report on the financial position. In '76, Mr. Goschen for the English, and M. Joubert for the French bondholders, were despatched on a similar mission. In June '79 Ismail was deposed by virtue of a firman from the Sultan, obtained at the solicitation of England and France, by which Tewfik, his son, was raised to the throne. Ismail made, in March '86, a claim against the **Egyptian Government** for £5,000,000. Sir W. T. Marriott, who acted as counsel for Ismail, succeeded in securing for his client the greater portion of the claim.

Italian Dependencies. See COLONIES AND DEPENDENCIES OF EUROPEAN POWERS, ASSAB, and MASSOWAH.

Italian Political Parties and Parliament. The legislative authority of Italy rests with the King and two chambers, the **Senate and Chamber of Deputies**. The former (unlimited in number) is composed of princes of the royal house, after attaining their majority, and of members nominated for life by the king. The **Chamber of Deputies** (*Camera de' Deputati*) is elected by *scrutin de liste* (*q.v.*) by conditional universal suffrage for periods of five years, and contains 508 members, or one to every 57,000 of the population. For electoral purposes Italy is divided into 135 **districts**, which again are sub-divided. One-eighth of the inscribed electors must vote to render an election valid. The present Chamber of Deputies was elected on May 23rd, 1886, a dissolution having been decreed by the king on April 27th. His appeal to the country was necessitated by the inability of the Opposition to form a ministry after a virtual defeat of the Depretis Cabinet on March 5th on its budget. The result of the general election was to give the ministry a majority of about 60, which it has managed to retain, although occasionally many of its followers have deserted it on critical divisions; the Ministry has always, however, escaped defeat. At the end of Feb. '89, indeed, the Opposition to the financial proposals of the Government were so strong that Signor Crispi tendered his resignation, which he was more anxious to do as internal dissensions existed in the Cabinet. The task of forming a new Ministry was offered to several members of the Opposition, all of whom, however, declined it, and on March 7th a new Ministry, consisting of five members of the former Cabinet and four new ministers, was formed under Signor Crispi. The division of parties in the

Chamber is somewhat singular. The majority and the bulk of the minority alike profess Liberal principles, the one being known as the **Ministerial Left**, and the other as the **Opposition Left**, or Pentarchists, prominent members of which party are Signori Nicotera and Baccarini. There is also little difference in their political programmes. Forming part of the Opposition are some minor groups of varying tendencies, including a knot of **advanced Republicans**, or Socialists, and the so-called Moderates. There is little or no union in the Opposition, and it is this that has constituted the chief strength of the Ministerial Left, which has, after successfully surviving some nine or ten ministerial crises, been uninterruptedly in power for thirteen years, a result in large measure due to the skilful leadership of the late Signor Depretis. On the death of the latter, on July 20th, '87, the ministry underwent no change. As a matter of form its resignation was tendered, but was withdrawn at the request of the King, Signor Crispi taking over the Presidency of the Council in addition to the portfolios of the interior and of Foreign Affairs. Since his advent to power, Signor Crispi, although an old Garibaldian, a Republican, and a professed friend of France, has been the loyal and devoted servant of the monarchy, and so far from disturbing Italy's relations with Austria and Germany, as the **Irridentists** (*q.v.*) fondly hoped, it has remained for him to definitively cement the alliance of the Central European powers. In spite of parliamentary differences, however, on one point Opposition and Ministerialists are alike united—namely, in the desire to maintain the present Savoy dynasty, which they regard as the key-stone of Italian unity.

Italy. A kingdom governed by Humbert I., second constitutional King, assisted by a Senate (composed of the Princes of the royal house and of royal nominees of eminence, paying taxes to annual amount of £120), and Chamber of Deputies, elected by all citizens over twenty-one who can read and write, and pay annual taxes amounting to 16s. 8d. Area 114,410 sq. m.; pop. 29,943,607. **Estimated revenue**, '88-9, £61,897,662; **expenditure**, £62,502,932; **public debt**, £21,410,119. (For army and navy see **ARMIES, FOREIGN, and NAVIES, FOREIGN**.) The Pope is the spiritual head of the Roman Catholic world, and enjoys the dignity of a reigning prince. He is selected by a two-thirds vote, taken by ballot, of the College of Cardinals, which consists of seventy members and acts as his Council of State. Temporal power taken away in 1870, but he retained his sovereign rights, his guards, palaces, etc., free from taxes and from the jurisdiction of the common law of the land. In 1870 Italy was ruled by Victor Emmanuel, with the exception of the so-called Patrimony of St. Peter, the freedom of which was guaranteed by the "September Convention" between France and Italy. Pope Pius IX. summoned Ecumenical Council at Rome: doctrine of Papal infallibility promulgated; session interrupted by Franco-German war. After Sedan Victor Emmanuel declared himself released from September Convention, and occupied Rome and its territory. The Assembly voted Rome to be the capital on Dec. 5th, and on Dec. 31st the King made his public entry. (For history to '89 see previous eds.)—**POLITICAL.** The Pope, in receiving (Dec. 24th, '88) the members of the Sacred College, who were offering congratulations for the new year, pronounced a long **allocution**, devoted wholly

to a review of the Holy See in Italy. The European peace, which had been maintained during the past year, still further strengthened the Triple Alliance, and the relations between Italy and the two other Powers. In Jan. '89 the Marquis of Dufferin presented his credentials as British Ambassador at Rome (7th), and was present at the anniversary of the late King Victor Emmanuel, which was commemorated (9th) with the usual solemnities, the king and the royal cortège taking part in the proceedings. The same day it was stated at Brussels that the new Italian loan would amount to 600,000,000 lira, at 5 per cent. interest. It was stated by the *Débats*, Paris (24th), that the Italian Government had sold 750,000 Three per Cent. Railway bonds to the house of Bleichröder. Serious disturbances (27th) during the celebration of the anniversary of the battle of Digione by the Radical associations at Rome; collision with the police, due to offensive reflections upon the king. Appointment by the king of fifty new senators. A resolution was passed (31st) by the Chamber, authorising the Government to convey the regret of the Italian nation to the Austrian Government at the death of Crown Prince Rudolph. Much comment was caused in the Italian press by a letter from Mr. Gladstone to the *Marquess de Riso*, which advocated international arbitration as a general principle, but not in relation to the position of the Pope. The text of the letter was communicated by Mr. Gladstone to the *Riforma* (Feb. 1st). Budget presented, showing deficit of 90,000,000 lira, to meet which retrenchments would be made to the extent of 30,000,000 lira, and new taxes imposed to the amount of 50,000,000 lira. Interpellation, which terminated in a scene, was addressed to Signor Crispi with respect to the riot by unemployed workmen (9th). Attempt by Radicals at Milan (10th), against prohibition of authorities, to publicly commemorate the Republican rising of Feb. 6th, '53; dispersed by the police. Monsignor E. Stouor appointed Archbishop in *partibus* of Trebizond at the Vatican Consistory (11th). The Pope also nominated as Cardinals, Monsignor Macchi and D'Annibale and the Archbishop of Catania. Papal Allocution published (12th). After declaring that the negotiations between Rome and the Vatican are progressing satisfactorily and will shortly be concluded, His Holiness deals at length with the position of the Church in the modern world. A vote of confidence carried in the Chamber by 247 to 151 on the question raised in connection with the unemployed demonstration at Rome (16th). Motion brought forward (18th) by Extreme Left, censuring the Ministry for placing on half-pay Deputy Mattei, General of Artillery, for an alleged political vote, rejected by 173 to 32. Resignation of Signor Crispi (28th), to avoid hostile vote in Chamber on Ministerial proposal for additional taxation. The crisis was solved by the re-formation of the Cabinet by Signor Crispi (March 7th). In reply to an interpellation, Signor Crispi stated that the Government had accepted the Sultanate of *Oppia* (10th). Signor Crispi stated in the Chamber (28th) that, with the protective system now prevailing in Europe, it was impossible to introduce any radical reform in the Customs tariff, but he would be prepared to accept any temporary commercial arrangement with France. The Chamber (29th) adopted by 175 to 32 the treaty of commerce with Switzer-

land. The Bishop of Cremona (29th) publicly avowed himself the author of an article in the *Rassegna Nazionale* (27th), attempting to demonstrate the impossibility of restoring the temporal power, the arguments in which the Pope had formally repudiated. Father Agostino, the celebrated preacher, was (April 26th) severely reproached by the Cardinal-Vicar for pronouncing a benediction on the king and army. The Italian representatives at Hodeida were insulted in '86 by the local authorities, and it was demanded that a formal visit should be paid to the diplomatic agent. This was not done, and gunboats were sent from Massowah (26th), and the Governor then paid the required visit. The Chamber, by 278 to 33, negatived an inquiry into the War Department (May 9th). Signor Crispi, in the Chamber (10th), said he had always been favourable to the Triple Alliance, which he regarded as advantageous to Italy. King Humbert, on his way to Berlin, received at Goeschenen by the President of the Swiss Federal Council, the Vice-President, and the Minister for Foreign Affairs (20th). News of the Italian occupation of *Keren* received at Rome (June 5th), and formed the subject of interpellation in the Chamber on the following day. The Court of Appeal (7th) confirmed the sentence of three years' imprisonment passed upon Signor Costa, a member of the Chamber of Deputies, for acts of open rebellion against the authorities. The Pope, in a Secret Congregation of the Cardinals (July 1st), read an Allocution condemning the erection of the Giordano Bruno monument. Rumours subsequently arose that the Pope was going to leave Rome. News received (Aug. 5th) of the occupation of *Asinara* by General Baldissera from Massowah. Death (8th) of Signor Carli, ex-premier (see OCTUARY). Inspection of the naval squadron by the king at Spezzia (Aug. 14th). Tour of the king through his dominions, and subsequent reception (27th) of Shoan mission (see ABYSSINIA). A deputation of Sicilian notabilities waited on Signor Crispi (Sept. 3rd), requesting him to visit Palermo, which he promised to do. The king ratified the treaty between Italy and Abyssinia (Oct. 3rd), and a supplementary convention was signed, providing for the abolition of the blockade on the Abyssinian coast and for the establishment of customs and commercial relations with Ethiopia and the countries adjoining Italy's new possessions, which will be advantageous to trade in the latter. It also makes provision for the establishment of an Italian Consulate-General in King Menelek's country, and for reciprocal protection against a common foe. Visit of the Emperor and Empress of Germany to the king (10th). The Pope received the French pilgrims (20th) at the Vatican, and pronounced an allocution, in which he recommended the formation of associations for the social, religious, and material welfare of the working classes, and urged the Government to treat them with consideration, and restrain the luxury of the age. The article in the *Contemporary Review*, signed *Outisades*, alleged to be by the pen of Mr. Gladstone, excited much comment and interest in Rome (Oct.). Speech at banquet given in his honour at Palermo by Signor Crispi (14th). Deputation to Slavery Conference at Brussels. Count Tornelli appointed ambassador to St. James's in the place of Count Robilant, deceased. GENERAL. Serious accident occurred at Palermo (Jan. 16th) during the funeral obsequies

of the Marchesa di Torreara, thirty-six persons being injured by the fall of the roof on which they were standing. **riot in Rome (Feb. 8th)** by unemployed workmen, who smashed windows and made other demonstrations. The police dispersed threatening crowds in Victor Emmanuel Square (11th): no resistance offered. **Murder of M. Geisendorf**, son of the Swiss Vice-Consul at Cannes (March 26th), in the railway near Pietra, in the Italian Riviera. A soldier of the 7th Regiment, of Bersaglieri, fired at and wounded a corporal, a soldier, and two peasants, and killed Major Varino. It was supposed he acted under an access of madness. **Agrarian riots occurred at Corbetta (May 20th)**. The carabinieri defended themselves against the mob in the Communal buildings; three of them and the police superintendent were hurt, one peasant killed, and eight wounded. A spherical bomb was thrown into the Piazza Colonna, at the back of the Chamber of Deputies (Aug. 19th), which, in exploding, wounded six persons. Serious railway collision between Naples and Foggia: three killed and twenty-seven injured (Sept.). Restoration of the Palace of the Doge at Venice, completed (Nov.). —**SOCIAL**: Visit of Mr. W. E. Gladstone and party to Naples (Jan.). Requiem mass for the

Crown Prince Rudolph at All Souls' Church, Rome (Feb. 5th), attended by representatives of the Quirinal and Vatican. Celebration, with loyal demonstrations, of the birthday of the king (March 14th), who held a military review and laid the foundation of the new Courts of Justice at Rome. Congress of Republican Working-men's Societies opened (June 20th). Birth of infant son of Duc D'Aosta. Visit of Prince and Princess of Wales and daughter to Venice (Oct.). Celebration of the 50th anniversary of the representation, at La Scala at Milan, of Verdi's first Opera, "Oberto Conte di San Bonifacio (Nov. 17th). —**COMMERCIAL**. — The Italian Shipping Company La Veloce has arranged that its steamers sailing for La Plata shall touch regularly at Tangier, thus organising direct communication between that place and Italian ports (Feb. 10th). A financial crisis occurred at Turin (Aug. 24th), causing one of the leading banks to close its doors. Consult "Italy" (Story of the Nations Series), *Statesman's Year-Book, Almanach de Gutha*, etc.

Ivory Coast. A portion of Guinea, between Grain and Gold Coasts. The stations of Grand Bassam, Assinie, and Kutenou were reoccupied by France (1884). The coast is low and sandy and the climate inimical.

J

Jamaica. The largest of the British West India Islands, lying 90 miles south of Cuba. Divided into three counties—Surry, Middlesex, and Cornwall. **Turk's and Caicos Islands** have been annexed to the colony. Capital Kingston (pop. 40,000), with Spanish Town (the old capital) of next importance. The principal ports are Port Royal (the harbour of Kingston), Montego Bay, and Falmouth. Jamaica is an emporium of West Indian trade. (See previous editions.) Exports sugar, rum, pine-apples and various fruits, coffee, pimento, logwood, cacao, ginger, etc.—The island is ruled by a Governor, with a Privy Council and a partly elective Legislative Council. (For financial statistics see *BRITISH EMPIRE*, etc.—table). During '89 a deputation waited on the Secretary of State for the Colonies to arrange for the sale by the Government of Jamaica of the present Jamaican railway to a private company, which proposed to extend the line from its present length of 65 miles to 220 miles. Consult Bates's "South and Central America and West Indies"; "Her Majesty's Colonies."

James, Henry, was b. in America 1843, his father being the Rev. Henry James, a well-known philosophical writer. Began the study of law, but ultimately attached himself to literature. His novels, which deal largely with American life and character, are very popular. "*Princess Casanovassa*" ('87) fully sustained his reputation, differing from most of his others by its study of English life. Mr. J. has been for many years a resident in England. His most recent works are "*The Reverend*" and "*Partial Portraits*," both of which were most successful.

James, Rt. Hon. Sir Henry, O.C., M.P., E.C., was b. at Hereford, 1828. Educated at Cheltenham College; Lecturer's Prizeman at the Inner Temple (1850-51); called to the bar at the Middle Temple (1852). Nominated to ancient

office of "postman" of Court of Exchequer (1867); appointed Q.C. (1869). Was Solicitor-General (1873), and **Attorney-General** (1873-74 and 1880-85). During the latter period he introduced and carried through Parliament the Corrupt Practices (Parliamentary Elections) Bill. Returned in the Liberal interest for Taunton (1869-85), Bury (1885). On the formation of Mr. Gladstone's Govt. in '86, Sir Henry refused to join it, though offered the Lord Chancellorship, because he could not follow Mr. Gladstone upon the Home Rule question. Since then Sir Henry has been one of the active leaders of the Liberal Unionist party. Sir Henry was one of the counsel for the *Times* in the action of O'Donnell v. Walter, and as one of the leading counsel for that organ in the *Parnell Commission* (q.v.) delivered an able address, forming a retrospect of the history of Ireland.

Jamestown. Capital and port, *St. Helena* (q.v.). **Japan**. An empire adjacent to China, from which it is separated by the Eastern Sea and the Straits of Corea, formed of the archipelago of Nippon, which consists of four large islands, Yesso, Hondo, Kiushiu, and Shikoku, and of nearly 4,000 rocky islets. Its area is about 147,345 square miles, with a population of 38,507,177. Its history is almost as ancient as that of China, the present Mikado being the representative of a dynasty which claims to have possessed the throne since B.C. 660; but the legendary period comes down to a time much nearer our own than the well-authenticated annals of the Middle Kingdom during the last 2,000 years. The name of the present Mikado is Mutsu Hito, and he was born in 1852. (For other details see ed. '88.) —**Political**. — A curious report came from Philadelphia under date Dec. 24th, '88. It was to the effect that Don Juan Caballero, ex-Secretary of the Spanish Legation in Japan, was crossing the American

continent to Washington. In an interview at Winnipeg he stated that when he left Yokohama it was generally rumoured that a *secret treaty* had been concluded between Russia and Japan against England, in view of a possible Russo-British war. A writer in the *Times* of Dec. 26th, however, described the story as a ridiculous *canard* arising from the fact that two prominent statesmen, Counts Ito and Saigo, had during the autumn taken a sea-trip along the coasts of the Sea of Japan from Corea to the Russian settlements in Eastern Siberia. The new constitution for Japan was formally declared on Feb. 11th, '89. The following is a summary of its provisions:—The Constitution founded on the German system, provides for the establishment of a House of Peers, partly hereditary and partly elective, a further portion being nominated by the Mikado; and of a House of Commons composed of 300 members. The franchise is conferred on all men of 25 who pay taxes of \$25 a year. Liberty of religion, freedom of speech, and the right of public meeting are granted. Parliament will be legislative, and also financial up to certain limits; the judges irremovable except by special law (see *Times*, Feb. 21st). A *Supplementary treaty* of commerce, amity, and navigation with the United States was signed on Feb. 20th. Considerable interest was exhibited in the spring of the year by the visit to Europe of a special mission from Japan headed by General Yamagata, Minister of the Interior. The object of the visit of this enlightened statesman, who organised the army of Japan on the European model, is to study the practical working of the provincial and municipal institutions in some of the European states, and, as general, to obtain further information on military matters. The tour was to occupy eight months, and include France, Italy, Germany, Russia, Austria, and to return home *via* England and the United States. A long article on the Japanese Treaty question appeared in the *Times* of April 19th. The above-mentioned mission arrived at St. Petersburg on June 5th. By the mail arriving early in June it was reported that Count Goto, the leader of the most advanced section of Japanese politicians, had joined the cabinet, which caused some surprise among his followers. It was reported in May that the Japanese *Budget Estimates* for the current financial year showed a total revenue of \$79,600,000, and an expenditure of \$76,506,000. The land tax was estimated to yield \$42,248,900 the income tax \$1,053,500, the tax on *sake* (rice beer) brewing \$14,497,400. Under the head of expenditure the Imperial household is put down for the sum of \$3,000,000, the National Debt for \$20,000,000, and the various public departments for a total of \$65,990,890. The total extraordinary expenditure amounts to \$10,605,400. Sir J. Fergusson, in reply to Mr. F. Stevenson in the House of Commons on July and, said that Japan had entered into treaties (not then ratified) with Mexico and the United States, with the former on Nov. 30th, '88, and with the latter on Feb. 20th, '89, according to the citizens of those countries full rights of travel, residence, and trade throughout the country. Similar proposals were made to Her Majesty's Government, and were under consideration. A telegram dated Philadelphia, Aug. 10th, reported that Japan had signed a treaty with Russia to the same effect as those with Mexico and the United States. By the

mail arriving early in October news came to hand that, besides the great powers—Germany, United States and Russia—a treaty was said to have been concluded with Italy; while the negotiations with Great Britain and France were in progress. Great demonstrations had been held against this treaty revision. In October a Japanese Commission despatched by the Legislative Department arrived in London. In all there are four commissioners—two in England and two on the Continent—and their duty is to study the methods of European legislation. For this purpose the British, French, Italian, Austrian, German, and Belgian systems will be compared. A telegram from Yokohama (Oct. 19th) reported that an attempt had been made to assassinate Count Okuma, the Japanese Minister for Foreign Affairs, and that the would-be assassin immediately afterwards committed suicide. The Count's wound at first appeared to be only a slight one, but turned out to be more serious than at first supposed. The Cabinet resigned in October, and it was reported from Yokohama (Nov. 2nd) that Prince Sanjio, Keeper of the Privy Seal, had been appointed Prime Minister, and would hold both offices simultaneously. Count Kuroda, formerly President of the Cabinet, was appointed Privy Councillor. On Nov. 6th it was telegraphed that Prince Haru, the heir-presumptive to the throne, had been installed as Crown Prince. The German Emperor in November conferred the Grand Cross of the Red Eagle on Prince Arisugawa, the adopted son of the Mikado.—Commercial. A notification was issued that on and after Jan. 1st, '89, a large number of articles would be added to the list of those which might be exported free. The list ranges from drugs and textile fabrics to animals and seaweed. It was stated towards the end of May that certain works of great magnitude for the improvement of Yokohama harbour had been approved by the Government and were to be commenced at once by the district government. They are after a design prepared by an English engineer officer, Major-Gen. Palmer, who was to have the engineering control; a private company were to provide capacious docks. The half-yearly meeting of the shareholders of the Tokyo Tramway Co. was held on January 14th. A dividend equal to 20 per cent. per annum was declared, but even this was a decrease of 2 per cent. on the previous half-year. According to an issue of the *Japan Weekly Mail*, published in this country about the end of June, it appeared that at the close of '88 there were at work 114,636 cotton spindles, 13,376 having been added in the last six months of the year. There were 1,580 men and 3,461 women employed in the industry, both showing a large increase in numbers during the latter part of the year. The quantity of yarn manufactured was 7,398,261 lb. against 62½ million lb. imported, the former being 15 per cent. higher in price, but there is a local preference for it. The import of cotton yarn increased from 24½ million cattras (1½ lb each) in '86 to 33½ million in '87, and to 47½ million in '88, the values for the three years being 6, 8½, and 13½ million dollars respectively. The increases were about equally shared between England and India. In cotton manufactured goods the values of the imports were 4 million in '86, 7 million in '87, and 9 million dollars in '88. On July 10th Japan celebrated the completion of 1000 miles of railway in that

empire by a banquet; at present, it may be remarked, the greater country, China, has only 864 miles. The *Engineer*, of August 9th, published an important article on an elaborate report by Mr. C. S. Meik, M.I.C.E., harbour engineer to the Japanese Government, on the development of the *Hokkaido Harbours*. The official statistics of the foreign trade of Japan in '88 show that the total amounted to over \$131,000,000, against \$104,000,000 in '87 and \$50,000,000 in '72. The trade with Great Britain in '88 increased by 35 per cent. The accounts of nearly 100 Japanese national banks for the first half of '89 were published in the autumn, and showed a large average of dividends. The Yokohama bank paid 20 per cent. for the half-year, seven others between 15 and 20 per cent., and sixty-one between 10 and 15 per cent.—*Miscellaneous*. From some statements, published in December, of the Rev. T. Richard, a well-known missionary, it seems that *Christian Missions* are very flourishing in Japan. Statistics show that there are 19,829 Protestant converts, with 148 missionaries (men only), 103 unmarried ladies, and 102 native ministers; 32,000 Roman Catholics, with 61 missionaries, and 40 unmarried ladies; and 14,000 members of the Greek Church, 9 native missionaries and 90 catechists. On the other hand, according to an extract from the *Japan Weekly Mail*, published here in January '89, the *Buddhists* of Kioto were pursuing an active propaganda by the aid of a missionary magazine bearing the title of *Byon of Asia*. The death was announced in April of Mr. James Annand, engineer, who constructed the first railway in Japan, at the early age of forty-three years. He went out to Japan in '71, and laid the railway, 14 mile in length, from Yokohama to Yeddo. The line was opened in Oct. '72 by the Mikado amid national rejoicings, when Mr. Annand received a handsome gift and an autograph letter from his majesty. Mr. Annand remained some years longer in the service of the Japanese Government, when he retired and established a firm of iron merchants. In June the *Japanese Fine Art Association*, of 28, New Bond Street, opened an exhibition to the public. In an article on Protestant Missionary Work in China published in the *Times*, May 25th, some statistics compiled by the Rev. H. Loomis were given as to *Protestantism in Japan*. From this it appeared that there were 443 missionaries in '88, an increase of 40 over '87; baptised during the year 6,959, an increase of 1,939; number of communicants 25,514, increase 5,785; students in schools, 9,998, increase 2,553; contributions of native churches, \$64,454, showing an increase of \$2,283. From April to Sept. Japan was visited by a succession of storms and floods of a really awful character, varied by an earthquake at Kumamoto in July, causing loss of life. With regard to the former, the following appeared, with further details, in the *Times* of Nov. 19th: "The totals of the official returns so far are: 12 prefectures devastated, 4,419 persons killed, 155 wounded, over 90,000 deprived of the means of subsistence, over 50,000 houses swept away or submerged, 150,000 acres of crops destroyed, about 6,000 bridges washed away, and hundreds of miles of roads broken up. For thirty years no such calamity, or succession of calamities, has overtaken Japan. The Bandaisan eruption was insignificant compared to this." Consult Sir E. J. Reed's "Japan: its History, Tra-

ditions, and Religions"; Miss Bird's "Unbeaten Tracks in Japan"; Hon. Lewis Wingfield's "Wanderings of a Globe Trotter"; Prof. J. J. Rein's "The Industries of Japan," and "Japan, Travels and Researches in"; *The Statesman's Year-Book*, etc.

JAVA. An island of the Asiatic Archipelago, the chief seat of Dutch power in the East Indies. Divided into 22 Residencies. Capital *Batavia* (500,000), a large and important seaport. Other chief towns Samarang and Sourabaya. (See previous editions.) *Exports*, coffee, sugar, tea, rice, indigo, pepper, tobacco, etc. Administered by the Residents of Provinces and their subordinates under the Governor-General of the Dutch Indies. The mode of government is called the "culture system," and is based on officially directed labour. The army, as well for Java as for the other Dutch possessions in the East Indies, numbers about 15,000 Europeans and 16,000 natives, associated together. The colonial navy consists of 88 vessels, manned by 1,271 men. There are 599 miles of railroad. *Estimated revenue* of Dutch East Indies, '88, £11,148,670; *expenditure*, £11,573,000; *average imports*, £12,800,000; *average exports*, £16,000,000. Land is government property, except in the west, and is let on hereditary lease. Enforced cultivation insures provision for the large population. Consult Money's "Java" and Wallace's "Malay Archipelago." See BORNEO, etc.

Jebb, Richard Claverhouse, LL.D., the eminent Greek scholar, was b. in Dundee 1841. Educated at St. Columba's Coll., co. Dublin, Charterhouse School, London, and Trin. Coll., Camb., where he graduated Senior Classic '62. Public Orator of his Univ. '69. Professor of Greek in the Univ. of Glasgow '75, hon. LL.D. Edin., Harvard, and Bologna Univs. In May last Dr. J. was elected *Regius Professor of Greek* in the Univ. of Cambridge in succession to the late Dr. Kennedy. He has received from the King of Greece the Gold Cross of the Order of the Saviour, in recognition of his services in promoting the study of both classical and modern Greek. Amongst the most important of his works are "The Attic Orators," "Modern Greece," and a "Life of Richard Bentley." Dr. J. has for some time past been engaged in editing the *Complete Works of Sophocles*. It is mainly through his efforts that a *British School of Classical and Archaeological Studies* has recently been established at Athens.

Jenner, Sir Wm., Bart. K.C.B., M.D., F.R.S., b. at Chatham 1815. Educated at Univ. Coll., M.D. Lond. '44. Has held successively the appointments of Professor of Pathological Anatomy in Univ. Coll.; Physician to the Hospital for Sick Children, Physician to Univ. Coll. Hospital, Professor of Clinical Medicine, and Professor of Principles and Practice of Medicine in Univ. Coll., and is *Physician in Ordinary to the Queen and the Prince of Wales*, whom he attended with Sir William Gull in the serious attack of typhoid fever which prostrated H.R.H. in '71. Sir William J. also attended the *Prince Consort* in his last illness. His eminence as a physician is chiefly based upon his discovery of the symptoms which differentiates typhus from typhoid fever. *President of the Royal College of Physicians* 81.

Jersey. One of the Channel Islands (q.v.).
Jews. The numbers of Jews in the various countries of Europe, according to the *Archives Judaïques*, are as follows:—Russia, 3,000,000; Austria-Hungary, 1,644,000; Germany, 562,000;

Roumania, 263,000; Turkey (about) 105,000; Holland, 82,000; France, 65,000; England, 70,000; Italy, 40,000; Switzerland, 7,373; Scandinavia, 6,973; Servia, 3,492; Greece, 2,652; Iberian Peninsula, 2,102. Total in Europe, 5,400,000. Outside Europe no satisfactory enumeration is possible, but it is probable that Asia contains 300,000; Africa, 350,000; the Americas, 250,000; and Australia, 15,000. There are probably eight millions of Jews in existence at the present date (1889). Until very recently Jews were restricted in their rights throughout the world; and those of eastern Europe, Africa, and the East still labour under many disabilities, which it is the object of the "Alliance Israélite" of Paris, and similar societies in Germany, Austria, and England (Anglo-Jewish Association, 85, London Wall, E.C.), to remove. Even in western Europe much of the feeling of ill-will which led to earlier restrictions still remains. The chief country in which anti-Semitism still exists is Roumania, which, though enfranchised by the Treaty of Berlin on condition of freeing its Jews, still evades fulfilment of its treaty obligations. (See D. F. Schloss, "Persecution of Jews in Roumania.") In England, full emancipation was granted to Jews in 1858. They possess a special Jewish Board of Guardians (13, Devonshire Square, Bishopsgate), which provides for indigent Jews, a large orphan asylum at West Norwood, many other charities, and there are Jewish wards in several hospitals. There are six large Jewish elementary schools in London, the principal being the Jews' Free School, Bell Lane, Spitalfields, the largest and one of the most successful elementary schools in the world. Similar schools and charities are connected with the principal Provincial congregations: the most important are those of Liverpool (2), Manchester (5), Birmingham, Leeds (2), Newcastle, Hull, and Sheffield. The spiritual wants of Jews are provided for in the East-End by a number of *hebras* or minor congregations, which have been united (Federation of Minor Synagogues); while eleven of the larger synagogues are organised by the United Synagogue (2, Charlotte Street, Portland Place, W.). Ministers for these are mostly trained at Jews' College (Tavistock House, Tavistock Square), which has a very extensive library of works dealing with Jewish subjects. Another library specially noteworthy for Hebrew MSS. is situated at the Beth Hamidrash (St. James' Place, E.C.), where the sittings of the Beth Din, or ecclesiastical tribunal, are held, at which points of Jewish law are decided. Ecclesiastical matters are under the control of the Chief Rabbi, Dr. N. M. Adler, whose son, Dr. H. Adler, now acts as his delegate. His mandates are only binding on the so-called Orthodox Jews, while there are "Reform" congregations at Upper Berkeley Street, London, Manchester and Bradford. There has been a marked *rapprochement* of recent years between these two bodies. There are, besides, some 3,000 Spanish and Portuguese Jews (*Sephardim*) in London, who are under the spiritual charge of the Rev. Dr. Gaster and whose ritual slightly differs from that of the more numerous German and Polish Jews (*Ashkenazim*). As a religious term "Jew" has nowadays the very vaguest connotation, ranging from the superstition of the Chassidim of Russia and Galicia to the advanced agnosticism of the Society of Ethical Culture in New York. Jews have some special enactments connected with

registration of their marriages, modifications of the Factory Acts to suit their Sabbath, etc. These, and other legislation likely to affect them, are looked after by the Jewish Board of Deputies (36, Finsbury Circus). During the year '89 the events with which the Jewish community has been principally concerned are the election and installation of the third Jewish Lord Mayor, Sir Henry A. Isaacs (*q.v.*). There has been some subsidence of the anti-Semitic agitation in Austria and Germany, but the emigration of Jews from Russia has been continued, and the Argentine Republic has offered facilities for emigration to the Jews expelled from Russia, which several thousands have accepted. In Roumania there has been less active persecution or oppression of the Jews; though the change of Ministry in November is regarded with apprehension, M. Bratiano being an avowed leader of the anti-Jewish agitation in that country. Baron Hirsch has made munificent contributions towards improving the condition of the Jews in Galicia and other parts. M. Zadoc Kahn has been elected Chief Rabbi of France. There are three Jewish weeklies, of which the most important is *The Jewish Chronicle* (2, Finsbury Square, E.C.), Ed., A. T. Meyers). A new *Jewish Quarterly Review* was also started in Oct. '88. See ANTHROPOLOGY; and consult J. Loeb's article *Juifs*, in St. Martin's "Dictionnaire de Géographie"; L. Davis, *Jews, Modern*, in "Encyclopædia Britannica"; on the literature of the *Judenhetze*, J. Jacobs, "The Jewish Question," 1875-84 (Trübner); on their social and vital statistics, J. Jacobs' "Studies in Jewish Statistics" (*Jewish Chronicle* Office). Publications of the Anglo-Jewish Historical Exhibition, compiled by J. Jacobs and L. Wolf (*Jewish Chronicle* Office).

Joachim, Joseph. This distinguished violinist was born near Presburg, in Hungary, in 1831. Already famous as a youthful prodigy, he went to Leipzig in 1843, to the Conservatoire previously founded by Mendelssohn, who saw his genius and encouraged him. He first came to London in 1844, and has since annually visited us. Herr J. has been principal violinist of the Monday and Saturday Popular Concerts from their very commencement. In 1869 he became the head of the newly developed Academy of Music at Berlin. He has written several works for his instrument and the orchestra, the chief being the Hungarian Concerto. The University of Cambridge conferred on him the degree of Mus. Doc. in '77. Herr J. in '87 visited Paris, and had an enthusiastic reception. The University of Oxford previously conferred upon him the honorary degree of D.C.L. In celebration of the fiftieth anniversary of his first appearance in public, Herr J. was, on March 17th, '89, presented with a magnificent violin purchased by subscribers to a fund of which the Duke of Edinburgh was President and Sir F. Leighton, Chairman. On the same occasion he received from the German Emperor the Gold Medal for Art and many other compliments.

Jockey Club. See TURF.

Johanna. One of the Comoro Islands (*q.v.*).

Joint Stock Companies. A Parliamentary return, giving the names, objects or business, places where business is or was conducted, date of registration, number of persons who signed the memorandum of association, total number of shares taken up by such subscribers,

nominal capital, number of shares into which it is divided, number of shares taken up, amount of calls made on each share, and the total amount of calls received, of all joint stock companies formed in 1887, distinguishing whether the companies are limited or unlimited, and also the number of shareholders in each of the said companies at the date of the last return, and whether still in operation or being wound up; of the total number having their registered office in the city of London, or within five miles of the General Post Office; and of the total number and the paid-up capital of all registered companies which are believed to be carrying on business at the present time. This return can be obtained from Messrs. Hansard and Son, 12, Abingdon Street, Westminster (price 1s. 7d.). The following table shows the progress of the joint stock company movement during the last five years. Returns for '89 not yet issued (Nov. 27).

| DATE. | TOTAL. | |
|------------------|-------------|------------------|
| | No. of Cos. | Paid up Capital. |
| April 1884 . . . | 8,692 | £475,551,204 |
| April 1885 . . . | 9,344 | 494,909,862 |
| April 1886 . . . | 9,471 | 529,637,684 |
| April 1887 . . . | 10,494 | 591,508,692 |
| April 1888 . . . | 11,001 | 611,430,371 |

Journalists. The Institute of, was established on the 9th of March, 1889, by conversion of the National Association of Journalists, a professional society founded (chiefly by provincial journalists) in '84. The conversion and inaugural celebrations took place at the Mansion House, at a reception by the Lord Mayor (Sir James Whitehead, Bart.) and Lady Mayoress. In the bye-laws, the objects of the Institute are stated to be "to secure the advancement of journalism in all its branches; to obtain for journalists, as journalists, formal and definite professional standing; and to promote and serve in every possible way the interests of the profession of the Press." These objects are set forth in further detail in the bye-laws, under the head of "Duties of the Council." At this time (Nov. '89) the petition of the Institute for a Charter of Incorporation is before Her Majesty in Council. Care has been exercised in drawing up the constitution of the Institute to guard against the possibility of its operating at any future time in such a way as to exclude from the work of the newspaper press any honest and capable service, from whatsoever source it may come; and the decentralisation of authority which attends the system of organisation by branches (called "Districts" and "Sub-districts") is regarded as an efficient safeguard against that possibility. Although the central office and committee rooms are in London, there is no fixed or localised centre of authority; the council meetings and the annual conference both being movable, and held from time to time in the chief towns throughout the country. In certain districts proposals have been made for a system of qualifications for membership by examination tests; but although power is taken to institute a system of examinations if found desirable, the qualification at present is actual and proved

experience in professional journalism for a certain minimum period. At the date of conversion into the Institute there were about 1200 members, increased in the nine months since elapsed to about 1600, and including nearly all the well-known journalists of London and the provinces. General conferences were held in '84 (formation of the National Association of Journalists) at Birmingham; '86, London; '87, Leeds; Feb. '88, Newcastle-on-Tyne; Sept. '88 (special, to consider Institute scheme), Bristol; March '89 (conversion), Mansion House, London; Oct. '89, Town Hall, Manchester (first Annual Conference of the Institute). The first President of the Association was Mr. H. Flint, of Manchester, followed in '86-7 by Sir Algernon Borthwick, Bart., M.P., of the *Morning Post*, and in '88 by Mr. H. Gilzean Reid, of the *North-Eastern Daily Gazette*. For '89 Col. Thomas Sowler, of Manchester, has been chosen as President; but, owing to legal difficulties in connection with the Charter Petition, Mr. Reid continues in office for a time. The Annual Conference of '90 will be held at Birmingham. Sec. of the Institute: Herbert S. Cornish. Central Office: 78, Fleet St., London, E.C.

Jowett, Rev. Professor B., D.D., b. at Camberwell 1817. Became Scholar of Balliol College, Oxford (1835), Fellow (1838); appointed Regius Professor of Greek on the recommendation of Lord Palmerston (1855). Was member of a commission for taking into consideration mode of admission by examination to writer-ships in Civil Service of India. Professor Jowett has written commentaries on some of the Pauline Epistles, and an essay on the Interpretation of Scripture in "Essays and Reviews." In 1870 he was elected Master of Balliol, and in '86 Vice-Chancellor of the University. He published a translation of the "Dialogues of Plato," 1871; second edition (5 vols.), 1876; also a "Translation of Thucydides with Notes and Essay," 1880 (2 vols.); and a "Translation of Aristotle's Politics, with Notes and Essay," 1885 (2 vols.). The honorary degree of D.D. was conferred on him by the University of Leyden (75), LL.D. Edin. ('84), and Dublin ('86). Dr. J. is distinguished for his liberal theological views, and on the occasion of the opening of Mansfield College (*q.v.*) (for the training of Nonconformist ministers) at Oxford, in October '89, he assisted at the inauguration ceremony.

Juby, Cape. A low sandy point, on the west coast of Sahara, opposite the Canary Islands, where the **North African Company** (British), have recently established themselves.

Judge-Advocate-General is the legal adviser of the Government on military questions, and reviews the sentences of courts martial, recommending whether they should be confirmed or rejected. He is always a member of the Privy Council. There are three permanent officials in the department—viz., one legal and two military deputy judge-advocates-general. In the Estimates for '89 no provision is made for the payment of any salary to the Judge-advocate-general.

Judicial Separation. It was in the power of the ecclesiastical courts, which formerly determined all matrimonial causes, to grant a divorce *a mensâ et thoro*, which released the husband and wife from the duty of cohabitation, but did not enable either of them to marry again. By the "Matrimonial Causes Act, 1857," it was

provided that such divorces should no more be granted, but that in every case in which a decree might have been made for a divorce *à mensa et thoro*, a decree might thenceforward be made for a judicial separation. A decree for judicial separation may be obtained either by the husband or by the wife on the ground of adultery or cruelty, or desertion without cause for two years or upwards. Cruelty in this sense may be defined as injury to person or to health, or conduct raising a reasonable apprehension of bodily hurt. Even threats to a wife, not accompanied by personal violence, and cruelty to children in the presence of their mother, have been in some cases regarded as cruelty giving ground for a decree. Desertion must be wilful, and against the will of the person who complains of it. From the date of a decree for judicial separation, and so long as the separation continues, the wife is considered as a *feme sole* with respect to all property which she may acquire; and should she again cohabit with her husband, all such property is to be held to her separate use. But this provision has been made superfluous by the Married Women's Property Act, 1882 (*q.v.*). The court has power to order such alimony for the wife, and to make such provision for the custody, maintenance, and education of the children of the marriage, as it may think proper. Should the decree have been pronounced in the absence of one of the parties, and on the ground of desertion by him or her,

the party so absent may present a petition setting out such absence and reasonable ground for the alleged desertion, and may obtain a reversal of the decree. The separation, moreover, may be ended at any moment by the deliberate consent of the parties separated to a renewal of cohabitation. See **SEPARATION AGREEMENTS**.

Julian Period, The. Rather a measure of time than a true era, consisting of 7,980 years, which the sun, moon, and earth will take to come into precisely the same positions with regard to each other.

Jungfrau Railway. It was reported from Berne, Oct. 23rd, '89, that a second application for a concession to construct a railway up the Jungfrau had been made to the Bundesrath by Herr A. Trautweiler, the engineer of the Brünig line. He proposed to construct the railway entirely underground, the summit of the mountain being reached by a tubular tunnel. The cost was estimated at 5½ million francs.

Justices of the Peace were first appointed in England by Edward III., 1327; they were empowered to try felonies 1360-61; their wages were fixed by Richard II., 1389; their form of appointment settled by the judges, 1590; attorneys, solicitors, and proctors while in practice declared incapable of office by George II., 1732; jurisdiction in general and at quarter sessions defined by the Queen, 1842; duties further defined, 1848, 1851, and 1855.

K

Kaffraria. The country of the Kaffirs, in eastern South Africa. The name, when used now, implies the *Transkeian Territories* (*q.v.*), which lie between Basutoland and the sea, and from the Kei river to Natal. A district south-west of the Kei, formerly called *British Kaffraria*, was annexed to Cape Colony in 1863, and is now divided into the two districts of King William's Town and East London.

Kaiser Wilhelm's Land. The German portion of New Guinea (*q.v.*), together with the islands of New Britain and New Ireland.

Kalahari Desert. A vast, sandy plain of South Africa, north of Orange River, much of it included in the British Protectorate of Bechuanaland. It extends for about a distance of about 600 miles, at an elevation of 3,500 feet above the sea. It is of vast extent, subject to long-continued drought, and devoid of running water. Saline pools, called salt-pans, occur. It is inhabited by Bushmen, and there is abundance of antelopes and other game. The infrequent rains are stored by Nature in water-melons, and in certain tubers, both of which are amazingly plentiful, and retain their water in spite of fiercest drought. Man and beast can therefore exist in the desert. The soil is sandy, but patches of grass are found. Consult Farini's "Through the Kalahari Desert."

Kalnoky, Count Gustav Siegmund, b. '32 at Lettowitz in Moravia. After serving for a few years in the army, he entered the diplomatic service (1850), and from 1860 to 1870 he was Councillor of Legation at the Austrian Embassy in London. In 1874 he went as Minister to Copenhagen, whence he was transferred (1880) as ambassador to St. Petersburg. Thence

he was recalled in 1887 to assume the important office of the joint *Austro-Hungarian Minister of Foreign Affairs*, in succession to Baron Haymerle—a post which Count Kalnoky has since filled with much ability, pursuing the peace policy which is the foundation of the Central European Alliance. The *Star of the Black Eagle* in brilliants was conferred on Count K. by the Emperor William in '88; and in the same year the Order of the Annunciade was bestowed on him by the King of Italy. The Count paid a visit to Prince Bismarck at Friedrichsruhe, Nov. 89.

Kamarkan. An island in the Red Sea, off the Arabian coast, acquired in 1854 by Great Britain as a station for the Indian telegraph cable. It is now unoccupied.

Kandy. A town in Ceylon (*q.v.*), the former capital of the Sinhalese power. Near the centre of the island is an amphitheatre of hills.

Karoo. A Hottentot-Dutch name for certain elevated and comparatively barren plateaux in Cape Colony. The Great Karroo extends between the coast range and the main range of Cape Colony. It is 100 miles across, and covers an area as large as Ireland. Its elevation is 3,000 to 4,000 feet above sea-level. It affords excellent pasturage for sheep, cattle, Angora goats, and ostriches; and immense tracts are now occupied as farms. These are watered by permanent springs, and by large reservoirs, constructed for storing the superabundance of rain which in two years out of three falls during the summer thunderstorms. See ed. '87.

Kars. A famous Turkish fortress in North Armenia, now in the possession of Russia. Situated on the frontier of the two countries,

it has been repeatedly besieged. In 1854 it was gallantly, but unsuccessfully, defended by Sir Fenwick Williams. Captured by the Russians after defeating Mukhtar Pasha's army, (Nov. 1878). After the war the Russians connected it with Batoum and Tiflis by military roads, and enlarged the fortifications, so that Trans-Caucasia, hitherto slightly protected on the side of Armenia, is now able to defend itself against a very powerful European army, Kars being a place of great strength of strategic importance.

Kashmir (N.W. India). For Resident see DIPLOMATIC.

Kay, Sir Edward Ebenezer, b. at Meadowcroft, near Rochdale, 1822. Educated at Cambridge. Called to the bar at Lincoln's Inn ('47). For some years (during which he compiled the well-known "*Kay's Reports*") he was the authorised law reporter in the Court of Vice-Chancellor Wood (afterwards Lord Hatherley), Q.C. ('66). He was also for some time leader in Vice-Chancellor Bacon's Court, but subsequently cultivated a successful practice in the House of Lords. Appointed a judge of the High Court ('81). He is a brother of the late Sir James Kay-Shuttleworth, Bart., sometime secretary to the Committee of Council on Education; and of the late Joseph Kay, Q.C., Judge of the Manchester and Salford Palatine Court.

Keeling Islands. A dependency of the Straits Settlements (*q.v.*), 700 miles S.W. of Java.

Keewatin. A Canadian district under the jurisdiction of the Government of Manitoba. It lies between that province and Ontario, and stretches from United States boundary to Hudson Bay. Area not determined. Part has been assigned to Ontario. It is a difficult region of rock, swamp, and wood, with few tracts available for agriculture or pasturage; but mineral wealth is great, including copper and silver, and game is plentiful. See MANITOBA and HUDSON BAY RAILWAY.

Kekewich, Sir Arthur, b. in 1832. Called to the bar in 1858, made Q.C. (1877), Bench of his Inn (1881). He enjoyed a considerable Chancery practice, and for a long time was standing counsel to the Bank of England and several large insurance companies. He was raised to the Judicial Bench in '86. Mr. Justice Kekewich made several unsuccessful attempts to enter Parliament. In '89 Sir Arthur gave his decision in the "*Tooting case*," in which the Presbyterian and Congregational bodies were much interested.

Kelly, Rev. G. H., b. at Manchester 1833; ed. at Didsbury Coll., Manchester. On completion of his college course became President's Assistant, and subsequently Deputy-Governor. His successful administration was acknowledged by the presentation of a handsome testimonial. Became, '59, assistant to the Rev. Dr. Rule, at Aldershot, where he worked very successfully amongst the soldiers. In '61 took charge of a church at Chatham; in '67 removed to Chelsea as chaplain of the Household troops. Entering upon circuit work, he held respectively charges at Wandsworth and Westminster. Mr. K. has been very actively interested in Sunday-school work, and has occupied the position of secretary of the Connexional Sunday School Union for the past fourteen years. Elected President of the Wesleyan Conference, '90.

Kempton Park International. See TURF.

Kendal, Margaret Brunston, popularly known as "*Madge*" Robertson previous to her marriage with Mr. Wm. Hunter (Grimston) Kendal, actor, with whom she has since always appeared on the stage, was b. at Great Grimsby in 1849. She comes of a long line of actors, all the members of the Robertson family for four generations past (with the exception of the late Sir Tindal Robertson, M.P. for Brighton), having been players or playwrights. The late T. W. Robertson was her brother. She made her first appearance at the Haymarket as Ophelia in '65, and her first triumph as Blanche Dumont in Marston's "*Hero of Romance*" at the same theatre. Mrs. Kendal has played many parts, of which the most successful perhaps have been those of Lillian in "*New Men and Old Acres*," and Dora in "*Diplomacy*." In '81 Mr. Kendal, jointly with Mr. Hare, took the management of the St. James's Theatre, and Mrs. Kendal joined the company. In July '89 Mr. and Mrs. Kendal started on a successful American tour. Mrs. K. has recently contributed to *Murray's Magazine* a series of gossip articles, chiefly autobiographical, entitled "*Dramatic Opinions*."

Kerguelen Land. An island in the Southern Ocean, about midway between the Cape of Good Hope and Australia. Area probably not less than 1,500 sq. m. Lying within Antarctic currents, the climate is severe. The island is composed of igneous rocks rising into mountains. Its flora is very limited, including only one useful plant, a sort of wild cabbage; and its fauna comprises only marine animals and birds. Possession is claimed by France, in right of first discovery by Kerguelen in 1772. Captain Cook visited it in 1776, and called it "*Land of Desolation*." It has been included in lists of British possessions, but is really a "*No man's land*," visited only by occasional whalers and sealers.

Kerr, Mr. Robert Malcolm, Commissioner of the City of London Court, was b. in Scotland 1821, and called to the English bar in 1848. He has twice unsuccessfully contested Kilmarnock in the Liberal interest. Mr. Commissioner Kerr, who is a rigid stickler for the observance of professional etiquette, and who is well-known for his just administration of the law for the protection of the victims of unscrupulous usurers, has edited several valuable legal works.

Kew Gardens. First formed as Botanic Gardens, 1750-60. Parliamentary Committee to consider the management appointed 1838; Lindley's report presented 1840; gardens transferred to Commissioners of Woods and Forests 1840. Opened to the public free 1841. Palm-house built 1848. Open free to the public every weekday from noon, and on Sunday afternoons. Distributions of bedding out plants are annually in the autumn made to applicants.

K.G. See GARTER, ORDER OF THE.

Khar'koff. A rapidly developing Russian town (population 167,000), situated about 420 miles S. of Moscow. The development of the iron and coal fields of S.E. Russia is producing a favourable effect upon its industries, yearly increasing in number and importance. The University, containing 600 centres, was the most active Nihilist centre during the troubles culminating in the death of the late Tzar.

Kherson. A Russian town of 63,000 inhabitants on the Dnieper, about forty miles from Nicolaief, the growth of which as a dockyard has dwarfed the previous naval importance of

Kherson. It is best known as the resting-place of Howard the philanthropist, to whom a monument is erected. Founded by Potemkin 1778.

Khokand. A town (pop. 28,000) in Turkistan, alternately ruled by Khokand and Bokhara, which General Romanovsky captured (June 5th, 1866). Formerly of considerable commercial importance, it has decayed somewhat since. It was the scene of a serious outbreak in 1875, when Khokand revolted against Russia.

Khokand. A Mussulman khanate in Central Asia, the power of which was shattered by General Tchernayeff in 1864-65. A portion was left independent until 1875, when an outbreak caused the Russians to overrun and annex it. This campaign was the hardest the Russians had had in Turkistan in point of national resistance, but the people have since become reconciled to their rule. Khokand now forms the Turkistan province of **Ferghana**, an ancient name restored in 1876. The city of Khokand (pop. 35,000) ranks next in commercial importance and size to Tashkent and Bokhara.

Khorassan ("The country of the Sun"). One of the richest provinces of Persia, forming the north-east portion of that kingdom. It consists of 140,000 square miles, comprising nearly a quarter of Persia: population 860,000. The country is wonderfully fertile, except where the great desert of Persia encroaches upon it, and its prosperity may be expected to increase now that the Turcoman raids all the way along the north are suspended, in spite of the tyranny and imbecility of the rulers. The Russian outposts stretch for nearly 1,000 miles round the north, from the mouth of the Atrek to the Zulfikar Pass. On the south the great desert separates it from the rest of Persia. Communication with Teheran is only maintained by a couple of roads through the narrow cultivated gullet alongside the Caspian. Early in 1886 an exploring expedition under the direction of Dr. Radde and other eminent scientists, and the auspices of the Emperor of Russia, started from Tiflis to investigate the natural history of K.

Kidnapping. The term applied to the abduction of a man.

Kilima-Njaro. A mountain mass in East Africa with snow-clad peaks. Discovered 1847. Annexed by Germany in 1885-6, and forms part of the territory of the **German East African Company**. It is situated about 100 miles inland from the port of Mombasa, on the Suaheli coast, north of Zanzibar Island. The district has been lately explored. Its climate is said to be perfectly healthy for Europeans, with various plateaux and valleys suitable for the cultivation of coffee, cinchona, etc. The natives are not intractable, and the country is excessively beautiful—a sort of East African Switzerland. The highest peak was ascended in 1887 by Dr. Meyer, who estimated its elevation at 19,680 feet. Consult a paper by H. H. Johnston, in "Proceedings of the Royal Geographical Society," March 1885.

Kimberley. A fertile district lying between King Sound and Cambridge Gulf in the tropical portion of the colony of **Western Australia**. Has been recently explored and opened up for settlement. There are immense tracts of splendid pasturage. The chief port is Derby. In 1883 gold was discovered, a gold-field "proclaimed," and a great rush from all parts took place. Enormous finds were at first reported, but general disappointment was experienced, privations

incurred, and the field practically abandoned. See **WESTERN AUSTRALIA**.

Kimberley. The capital of the province of Griqualand West, **Cape Colony**, and chief centre of the diamond diggings. Though young, it is a large and important town, well provided with institutions and accessories of civilised life; pop. 25,000. Declared value of diamonds exported in 1886 was £3,504,756. It is connected by rail with Cape Town and Port Elizabeth. The extension of the line into Bechuanaland and into the Orange Free State is proposed. See **DIAMOND FIELDS**, and *Times*, Jan. 11th, '88.

Kimberley, John Wodehouse, P.C., 1st Earl of Great Britany, b. 1826; succeeded his grandfather in the barony of Wodehouse (1861). Educated at Eton and Christ Church, Oxon, where he graduated 1st class in Classics honours. Was Under-Secretary for Foreign Affairs (Dec. '52 to April '59); Envoy Extraordinary and Minister Plenipotentiary to Russia (May '56 to March '58); again Under-Secretary for Foreign Affairs (June '59 to July '60); was Lord Privy Seal (Dec. '68 to July '70); and Secretary of State for the Colonies from the last date to Feb. '74, and May '80 to Dec. '82); Secretary of State of India (Dec. '82 to June '85); Chancellor of the Duchy of Lancaster for a short time (82); sent on a special mission to Copenhagen (Dec. '53); Lord Lieutenant of Ireland (Oct. '64 to June '66), when he was created an earl. **Secretary of State for India** in the Gladstone cabinet (86). Lord K. has followed Mr. Gladstone in his Irish policy.

King-of-Arms. See **GARTER KING-OF-ARMS**.

King's Advocate. See **ADVOCATE, LORD**.

King's College, London. Established by Royal Charter 14th August, 1829, opened '31; charter annulled by Act of Parliament 19th May, '82, and College re-incorporated for the purpose of "giving instruction in literature, science, and the doctrines and duties of Christianity." The visitor is the Archbishop of Canterbury, and among the perpetual governors are the Lord Chancellor, the Home Secretary, the Lord Mayor of London, and the Lord Chief Justice of England. There are nine departments in the College—viz., theological, literature, science, engineering, medical, ladies', evening classes, civil service, and the school. To students who have acquired a certain degree of proficiency it grants the diploma of "Associate of King's College," to which is attached the privilege of free admission to all the classes in the department from which they have been elected, as also the use of the college libraries and museums. The associates of the theological department wear a distinctive hood—viz., black, poplin, edged on the outside with a quarter of an inch, and on the inside with one inch, of mauve silk. In addition to **King's College School** four other schools are in union with the College, and the pupils of these schools may become associates in two instead of in three years. The ladies' department is conducted in Kensington Square; certificates of proficiency are granted in passing the examinations, after a regular attendance of three terms. The students of the evening classes, which meet from October to March, and from April to June, receive certificates, and may become associates. The civil service department prepares for the excise, customs, Post Office, the navy, and other examinations; women also prepared. The whole college is under the supervision

of the Principal, Rev. Henry Wace, D.D. Last session there were 88 matriculated students in theology, 30 in general literature, 82 in engineering, 216 in medicine, and 53 in the evening classes.

Kingston. Capital of Jamaica (*q.v.*), pop 40,000.

Kingstown. Capital of St. Vincent (*q.v.*).

Kirghia. A nomad people dwelling chiefly in the steppes and deserts stretching from the northern part of the Caspian Sea to the Chinese Empire. Russia completed her conquest over them after the Crimean war, with the exception of a few settled in Chinese territory and near the Pamir. The majority, occupying the borderlands of the Aralo-Caspian basin, suffered dreadfully during the severe winters of 1879 and 1880, which thinned their numbers, and by the destruction of their herds shattered their prosperity. The expansion of Russia is bringing them yearly more and more within civilised influence, and by degrees their territories are being placed under the direct administration of Russian officials. See ed. 87.

Knights. In modern days knighthoods are conferred as a mark of the Sovereign's esteem, or as a reward for services of any kind, military or civil. They are bestowed by the Sovereign, or occasionally by the Lord Lieutenant of Ireland as directly representing her. The Royal Orders of Knighthood are: the Garter, the Thistle, St. Patrick, the Bath, St. Michael and St. George, Star of India, and the Indian Empire (see respective headings). Knights not belonging to any of these orders are termed knights bachelors. This last-mentioned dignity is that which is conferred upon the judges of the High Court, the Attorney-General and Solicitor-General, upon civic dignitaries, and upon persons who have attained distinction in various walks of life. The Sovereign bestows the dignity either by a tap with a sword upon the shoulder of the kneeling person honoured, who is then commanded to rise ("Sir" A—B—, or by letters patent. All knights are entitled to the prefix of "Sir," and their wives to that of "Dame or Lady" (see ADDRESS, FORMS OF; also next article for knighthoods conferred during 89).

Knighthoods conferred, and Promotions made in the different Orders, Dec. '88—Nov. 16th, '89. The office or rank given after several of the names was that held at the time the dignity was conferred, and some changes in that respect may have taken place since.

 Turney, John, ex-Mayor of Nottingham.

Welsh, Aubrey, formerly Chairman of the Justices of the Liberty of the Tower.
 Wathen, Charles, Mayor of Bristol.

Wilson, Jacob, Hon. Director of the Royal Agricultural Society of England.

Knights of Labour. A labour organisation in the United States, originating with the tailors of Philadelphia in '69. Under Mr. Powderly, grandmaster workman, its increase became very rapid. The operations of the order are conducted secretly. Its avowed objects are to include within its organisation all departments of productive industry, to secure for workmen a proportionate share of the wealth produce, to establish co-operative institutions, the revision of the land laws, and all legislation bearing unjustly on labour. It also claims equality of the sexes in pay and work, the reduction of the hours of labour, and the abolition of the contract system, with some other points of detail. The official report of the Executive Committee published in July '88 showed that the order had lost a considerable proportion of its members, and that dissensions had arisen, causing the number of members to decrease. During '88 but little attention has been directed to this movement.

"Knowledge." A monthly scientific magazine; was originally started as a weekly record of scientific progress. In 1885 it was changed to magazine form. *Knowledge* treats of the newest and most advanced scientific theories and researches, and gives especial prominence to astronomy. Editor, Mr. A. Cooper Ranyard, M.A. Office, 13, Waterloo Place, S.W.

Knowles, Mr. James, F.R.I.B.A., was b. 1831. Educated at Univ. Coll., Lond. From early years he pursued literature, and contributed articles to various magazines; and in '60 he published the "Story of King Arthur." Succeeded Dean Alford ('70) as editor of the *Contemporary Review* (q.v.), and on the establishment of the *Nineteenth Century* (q.v.) became its editor ('77). In addition to his literary work, Mr. Knowles has acquired reputation as an architect: Aldworth, the Surrey residence of Lord Tennyson, Kensington House, the Thatched House Club, and several churches having been erected from his designs.

Knox-Little, Rev. William John, was b. at Stewartstown, co. Tyrone. Educated at Trin. Coll., Camb., where he graduated in '62. Subsequently became Assistant Master in the Grammar Schools of Lancaster and Sherborne; curate of Christ Church, Lancaster, of Turweston, Bucks, and St. Thomas', Regent Street; rector of St. Alban's, Cheetwood, '75; Canon of Worcester '81. He is a High Churchman, and has published, in addition to a number of sermons, "Characteristics of the Christian Life," "Meditations on the Three Hours' Agony of our Blessed Redeemer," and "Motives of the Christian Life." Canon Knox-Little has also published several novels, including ('88) "The Child of Stafferton," which has met with success.

Koh-i-Noor. See DHULEEP SINGH.

Kossuth, Lajos, or Louis, b. near Pesth, 1805. In '32 he was elected to the National Diet of Pressburg. For publishing reports of the proceedings of that body he was, in '37, after a warning from the Government, prosecuted and sentenced to four years' imprisonment. In '40 founded the *Pesti Hírlap*, which became the organ of the Radical opposition. In '47

he was again elected to the National Diet, and forthwith became leader of the opposition. In March '48 he demanded the re-establishment of an independent government for Hungary with a ministry responsible to the country. Returned to Pressburg as Minister of Finance for Hungary in the cabinet of Count Batthyány. President of the provisional government ('48-49). In April '49, in the Diet at Debreczin, he declared Hungary an independent state. Created **Governor of Hungary**, he entered Pesth, but was compelled to retreat on the entry of the Russian troops. Kossuth, accompanied by a large number of refugees, entered Turkish territory on August 17th, and in the February following ('50) was, with his companions, interned at Kutahia, in Asia Minor. Liberated in September '51, Kossuth came to England, where, save for a visit to the United States, he lived for many years. He subsequently made several attempts to incite the Italians and Hungarians against Austria. For the last quarter of a century he has resided at Turin, where he has devoted himself to scientific studies. The aged patriot was visited by a deputation of Hungarians on the occasion of the celebration of his eighty-fifth birthday last August. In connection with the commemoration of the Hungarian revolution of '48, he wrote a letter which caused some political excitement. M. Kossuth suffered from serious illness in the early part of '89. On Nov. 24th M. Tisza, the Hungarian premier, was questioned as to the position in which M. Kossuth stood by reason of his permanent residence abroad, and he explained that M. K. retained the rights of a bourgeois under a perpetual title.

Kotl. A river, state and Dutch settlement in *Borneo* (q.v.).

Kowloon. A peninsula of South China, adjacent to *Hong Kong* (q.v.) and appertaining to that colony. Area about 3 sq. m.

Kraal (pron. krawl). The village or town of natives of South Africa. It usually consists of many huts surrounded by a palisade.

Krakatoe. An uninhabited volcanic island in the Straits of Sunda, between Sumatra and Java. Has been subjected to earthquake phenomena, notably in '83. See previous eds.

Krapotkin, Prince Peter Alexievitch, Russian revolutionary leader, b. at Moscow 1842. Formerly aide-de-camp to the Military Governor of Transcaucasia ('63-67), during which he made many journeys in Siberia and Manchuria. Studied at the St. Petersburg University ('68-72), and joined the most advanced Anarchist section of the *International Working Men's Association* in Belgium in '72. Returning to Russia, he took part in the *Tchaykovsky* conspiracy; was arrested '74, and after two years' imprisonment escaped to England. In '79 founded the Anarchist paper *Le Révolte*, at Geneva, whence he was expelled '81. Commenced then a crusade against Russian Government in the English and French press. In '82, while on a visit to Thonon, was condemned by the Police Correctionnelle at Lyons to five years' imprisonment for participating in the *International Working Men's Association*, this harsh measure

being due to the desire of the French Government to conciliate Russia. Released '86, and returned to England. During '89 Prince K. has delivered lectures on Socialistic questions in various parts of England.

Kriegspiel, or War Game. See ed. '88.

Kuching. Capital of *Sarawak* (q.v.), and now generally called *Sarawak*.

Kumassi. Capital of Ashanti, taken and burned by a British force in 1874. See *GOLD COAST COLONY*.

Kurdistan. A country of 50,000 sq. m. in Asiatic Turkey, situated on the Persian frontier. The Kurds (the ancient Karduchi) are tolerably brave, and good horsemen, but for want of proper training they have never proved efficient irregular cavalry in recent Turkish wars. See ed. '87.

Kuria-Muria Islands. A group off the coast of Oman, Arabia. Area 21 sq. m. Acquired by the Bombay Government in 1854, as a station for the Indian telegraph cable.

Kyrie Society, The. owes its origin to a letter written by Miss Miranda Hill, calling attention to the dull, common-place lives of the poor, and suggesting means to enliven and beautify their lives. In 1877 the Society was started, and its work has increased steadily up to the present time. The work is apportioned between four branches, each of which is regulated by a sub-committee, the superintendence of the whole being taken by the executive committee.

Objects of the K. S. :- 1. **Decorative Branch.**—To decorate by mural paintings, pictures, stencil works, mottoes, and other means, workmen's clubs, hospital wards, parish rooms, or any room used for social gatherings, without distinction of creed. 2. **Open Spaces Branch.**—To secure and assist in securing any open spaces in or near the Metropolis, and to prevent spaces being illegally built upon. To co-operate with local societies for the preservation of commons, footpaths, village greens, and roadside strips. To render available as public gardens, disused burial grounds and other waste spaces, and to provide seats, plants, etc., for them. To distribute cut flowers, plants, ferns, and bulbs to hospitals, workhouses, and other institutions, and amongst the homes of the poor. 3. **Musical Branch.**—To organise a voluntary choir of singers to perform oratorios for the poor. These are frequently given in churches, halls, and schoolrooms situated in poor neighbourhoods and districts of London (where good music could hardly otherwise be heard). To give miscellaneous concerts in halls, school-rooms, and other places, with a view to provide recreation and amusement in poor districts; and in connection with this branch of the society the Countess of Meath provides entertainments in workhouses and hospitals during the winter months. 4. **Literature Distribution Branch.**—To distribute as loans or gifts to hospitals, infirmaries, workhouses, clubs, and libraries for the benefit of the poor, books, magazines, and periodicals. Hon. gen. secs., T. Slingsby Tanner and Miss Lilian James.

Office, 14, Nottingham Place, W.

L

Laager. A South African word meaning an encampment more or less fortified. The original *laager* of the Boers was an inclosure formed by drawing together several waggons, within which the cattle could be heided at night.

Labouchère, Henry, M.P., was b. 1831. Educated at Eton. Entered the Diplomatic Service ('54) through the influence of his uncle the late Lord Taunton, and was successively *attaché* at Washington, Munich, Stockholm, Frankfort, St. Petersburg, Dresden, and Constantinople, where he became *Second Secretary* in '63. He retired in the following year. Married Miss Henrietta Hodgson, a well-known actress. Edits and owns *Truth*, and is part proprietor of the *Daily News*. Sat as a Radical for Windsor ('65-6), Middlesex ('67-8), and for Northampton since '80. Mr. Labouchère is noted for his vivacious speeches and quick lively repartee—gifts which render him popular in the House of Commons. He is an advanced Radical, and one of Mr. Gladstone's most energetic supporters. During the early part of '89 Mr. L.'s name came into prominence in connection with the "*Pigott Forgeries*." He made a political tour in Scotland in October last. See PARNELL COMMISSION.

Labouring Classes, Society for Improving the Condition of the (incorporated by Royal Charter). Established under present name (1844) by H.R.H. the late Prince Consort and the 7th Earl of Shaftesbury. *Object:* To improve the dwellings of the poor by erecting model buildings and renovating old courts and alleys. *Pres.,* Hon. Evelyn Ashley; *Sec.,* A. Humphreys; *Office,* 8, Southampton Row, W.C.

Labrador. A great peninsula on the east coast of British North America, lying between the Gulf of St. Lawrence and Hudson Bay. The fisheries are valuable. Population consists chiefly of Eskimos, among whom dwell Moravian missionaries at the settlements of *Hopedale*, *Nain*, *Okak*, *Zoar*, *Ramah*, and *Hebron*. See BRITISH EMPIRE (table).

Labuan. An island and British colony, situated in a bay on the north-west coast of Borneo. The port and town is *Victoria Harbour*. *Exports:* sago, beeswax, edible birds'-nests, camphor, hides, rattans, tortoiseshell, and trepang. *Imports:* cotton goods, hardware, opium. A valuable coal mine, the seam being 11 feet thick, is worked. There are sago factories. For financial statistics see BRITISH EMPIRE, etc. (table). There are only about a score of Europeans resident, the population being composed of *Kyans*, *Malays*, *Borneans*, *Klings*, and *Hindûs*. Labuan was purchased of the Sultan of Brunei in 1846.

Lacrosse. The home of this game is Canada, but since its introduction into this country, some sixteen years ago, it has become fairly popular, more especially in the northern districts of England, and clubs are now formed in various parts of the three kingdoms. The *Irish Association* was formed in '79, the *North of England Association* in the following year, and the *Southern Counties* (of which Mr. E. T. Sachs is hon. sec.) in '82. The Challenge Flag competitions extend over a greater portion of the season, and are always watched with interest by large crowds, as also is the annual encounter between teams representing North

and South. The latter division of the country somewhat unexpectedly won the match played at Richmond on April 13th, '88, by six games to five; but the North still claim six victories as against two scored by the South, the remaining contests having terminated in draws.

Ladakh. For Commissioners see DIPLOMATIC.

Lagos. A British colony on the Guinea coast, West Africa. Consists of Lagos, town and island, on the coast of Bight of Benin, 150 miles east of Gold Coast, together with *Badagry*, *Palma*, and *Leckie* on the mainland. *Products:* palm-oil and kernels, peppers, grains, lentils, cola and ground-nuts, cotton, and silk, camwood, indigo, and lead-ore. Manufactures are cloths, embroidered robes, mats, basket and bamboo-work, leather-work, and brass-work. The report of Governor Maloney for '88, issued Oct. '89, showed receipts for '87, £51,347; expenditure, £78,610. *Imports*, £415,343; *exports*, £491,169. See BRITISH EMPIRE (table).

Lagthing. Name of lower division of Norwegian House of Representatives. See STORTING.

Lakh. A term used in India to express the number 100,000 in the computation of money. A lakh of rupees=100,000 rupees. In 1835, when the currency was remodelled, the value of the rupee was fixed at two shillings. A lakh of rupees is therefore equivalent to £10,000.

Land Act, The (Ireland), passed in 1881, gave practically what were known as the "three F's"—fixity of tenure, free sale, and fair rents. Under the Act tenants are empowered to apply to land courts for a revision of their rents, and the rents then fixed are called *judicial rents*.

A parliamentary paper was published in '88, giving statistics, connected with the *Land Judges Court (Ireland)* for the four years ending '86. From this we learn that in '83 the number of petitions filed was 308; the rentals of 116 estates were settled; 108 receivers were appointed; the number of yearly settlements was 539, and the gross amount collected was £226,842. There was but little change in the number of petitions, rentals settled, and receivers appointed, in the years '84 and '85, although the yearly settlements rose in '85 to 735, and the gross amount collected to £243,063. But in '86 the number of petitions filed were 302; rentals settled, 110; receivers appointed, 135; yearly settlements, 791; and gross amount collected, £260,905.

Land Charges (Registration and Searches) Act, '89. See SESSION, sect. 8.

Land Law (Ireland) Act, '87, extends the Act of '81 to leases expiring within 99 years of the passing thereof, and to any longer lease if the court is satisfied that it was forced upon the tenant. A written notice may be substituted for the execution of an ejectment where the rent does not exceed £100 a year, and upon the determination of the tenancy by the service of such notice the person served shall be deemed to have been readmitted as a caretaker. Other enactments relate to town parks and land purchase. The equitable provisions set forth that as soon as possible after the passing of the Act the Land Commission, having regard to the difference in prices affecting agriculture, should without application determine what alteration ought equitably to be made in judicial rents fixed before Jan. 1st, '86; and the Commission

were in '88 and '89, if necessary, to make a similar adjustment of rent. Power is given to the court on any proceedings for the recovery of a holding valued at not more than £50 a year, for non-payment of rent, or any action for debt or damages against the tenant, to stay execution of an ejectment, or of a writ of *fiery facias* as against the tenant's interest in the holding, for such time as it thinks reasonable, and to order that the arrears and costs, or such sum in satisfaction thereof as may be agreed on between the parties, shall be paid by instalments. If the landlord offers to accept in full satisfaction of arrears such lesser sum as the court shall think reasonable, and the tenant refuses, no stay of execution shall be granted.

Landlord and Tenant. The relation of landlord and tenant is created wherever a person having an estate in land grants to another person in consideration of a rent a lesser estate in this land. Thus, when a freeholder lets his land to a farmer for a term of years, he becomes landlord and the farmer becomes tenant. Tenancies are of many kinds; and the most usual are a tenancy for a term of years, a tenancy from year to year, a tenancy at will, and a tenancy on sufferance. A tenant for a term of years is a leaseholder; and if the term be longer than three years the lease must be by deed, although, where no deed has been executed, evidence is admissible to prove that there has been an agreement for a lease. Where there is a lease in proper form the tenant is secured in his possession so long as he pays his rent, and at the expiry of his term he is supposed to give up possession without the formality of a notice to quit. Formerly a breach of any of the covenants contained in the lease was enough to avoid it; but now any breach may be compensated by a money payment. A tenancy from year to year arises when land is let from year to year, or when it is let without any express stipulation to that effect, but with the reservation of a yearly rent, or when the tenant holds over after the expiration of his term and pays rent for so doing. This tenancy cannot be terminated by either party otherwise than by giving a half-year's notice; so that if this notice be not given before the expiration of the first half year, another year is added to the tenancy, and so on. A tenancy from year to year may be created by word of mouth, and a verbal notice to quit is valid, although it is always desirable, as a precaution, to give written notice. A tenancy at will is a tenancy terminable at the pleasure of either party. The Courts are reluctant to construe any tenancy as a tenancy at will unless there is an express agreement to that effect. But this agreement need not be in writing. A tenancy by sufferance is little more than the fact of possession. It occurs when a tenancy of a higher kind, such as a tenancy from year to year, has expired, and the tenant remains in possession without either hindrance or sanction from the landlord. Tenancy by sufferance cannot be created by the will of the parties, but only by legal construction. If the landlord accept rent from the tenant by sufferance, he immediately creates, according to circumstances, a tenancy at will or from year to year. A tenant under a lease or from year to year may sub-let unless expressly restricted from so doing, but a tenant at will or on sufferance cannot do so. For the recovery of rent in arrear the landlord

has, beside the other remedies of a creditor, the remedy of distress. He may in person or by his bailiff take possession of so much of his tenant's chattels upon the holding as by their sale will produce a sum sufficient to discharge the arrears. He must distrain at one time for the whole of that which is due. No arrears of rent can be recovered by distress but within six years of their becoming due. After five days have elapsed from the seizure of the goods they may be sold, having been valued by two sworn appraisers, and the surplus, if any, must be repaid to the tenant. If the distress was unlawful the tenant has an action of replevin. It is a general rule that whatever is affixed to the freehold goes with the freehold; and this rule with its exceptions gives rise to a large part of the law of landlord and tenant. Fixtures made by the tenant may be subdivided into three classes: (1) fixtures for purposes of trade, (2) fixtures for ornament or convenience, and (3) fixtures for agricultural purposes. As regards (1) trade fixtures, like machinery, furnaces, brewing vats, salt-pans, etc., these may be removed by the tenant who has set them up, in every case in which their removal occasions no material injury to the freehold. (2) Fixtures for ornament or convenience, like window-blinds, marble chimney-pieces or kitchen ranges. These also, if set up by the tenant, may be removed by him, provided always that in removing them he does little or no damage. (3) Fixtures for agricultural purposes. The law relating to these is chiefly contained in the Agricultural Holdings Acts. Somewhat analogous to fixtures are emblements—that is to say, crops resulting from the tenant's cultivation which at the expiration of his tenancy are still uncut and growing. The general rule with respect to these is that the cultivator has the right, after such expiration, to enter on the land to reap and to carry away the produce of his labour. If he die before the harvest, such crops fall into his personal estate, and his executor or administrator succeeds to the rights which he had. Where a tenant from year to year holds of a landlord who has only a life estate, and the landlord dies in the course of the current year, the tenant is entitled to occupy the holding until the year has expired, and the new landlord is entitled to a proportionable part of the year's rent. The non-payment of rent does not affect the validity of a notice to terminate a tenancy. Thus, a notice given on March 25th to take effect on Sept. 29th is good, even though the rent due on March 25th may not have been paid.—Law on, in '89. By the Working Classes' Dwellings Act of '85 it is provided that "in any contract for letting, for habitation by persons of the working classes, a house, or part of a house, there shall be implied a condition that the house is in all respects reasonably fit for human habitation." In the case of *Walker v. Hobbs* (Queen's Bench Division, July and) the plaintiffs had recovered damages in the county court in consequence of the fall of the ceiling in the defendant's dwelling-house at Bermondsey; and it was now argued that the enactment gave no right of action to the tenant, but that it was merely a defence against an action by the landlord, and moreover was confined to sanitary defects. Lord Coleridge held that it would be irrational to give this narrow construction to the Act, which obviously meant that the tenant took the house on the terms that it should be reasonably fit

for him to live in.—Where the occupier of a flat and his servants had been in the habit of using a passenger lift, an injunction was granted restraining the defendants, who had prevented the servants from using the lift. It was held that it would be just as reasonable to exclude them from using the staircase. (*Froster v. Mdr.*, July 10th.)—The case of *Reinhardt v. Kentast Brothers* (Chancery Division, July) affirmed the principle that a man is not to use his property in such a way as to injure his neighbours. Defendants were the occupiers of a house which they proposed to turn into an hotel. For this purpose they selected as a kitchen a room that had previously been unoccupied, and introduced into it a stove for hot water and cooking. They did not place it, however, on the site of the original fireplace, but against a wall contiguous to the plaintiff's wine cellar. The heat consequently passed through the wall, and deteriorated the plaintiff's wines. Mr. Justice Kekewich decreed the removal of the obnoxious stove.

Land Tax. The existing land tax dates from the year 1692, when the parliament granted to William and Mary an aid of sixty in the pound to meet the expenses of the war with France. This aid was to have been levied on the rackrent of all real estate, upon all stipends or salaries, and upon personal property; the annual income from this last being assumed at £6 per cent. of the capital value. The tax was renewed from time to time subsequently, but personal property contrived to evade assessment. The valuation of real property, made in 1692, was never replaced by a new one. In the year 1798 the tax produced about £2,000,000, of which only £150,000 was levied upon personal property. In that year it was replaced (a) as regards land by a perpetual rent-charge, power of redemption being given to those interested in the property which paid it; (b) as regards personal property by a tax annually imposed; this tax was abolished in 1833. So much of the land tax has since been redeemed, that it now produces not more than £1,000,000 a year. Upon the subject of this tax there have been many inaccurate statements. Consult Dowell, "History of Taxation and Taxes," vol. iii., Bk. II., chapter i., § 5.

Land Transfer Bill. See Session, sect. 84.

Lang, Andrew, M.A., LL.D., was b. at Selkirk, 1844, and educated at Edinburgh Academy, St. Andrews University, and Balliol College, where he graduated first class in classics. Elected a Fellow of Merton, '68. He has for some time been on the literary staff of the *Daily News*, and is a well-known contributor to periodical literature. His style is characterised by a light touch, at once scholarly and humorous. His "*Ballades in Blue China*," '81, brought him into prominent notice. His subsequent works, especially "*Helen of Troy*," "*Rhymes à la mode*," and "*Custom, Ritual, and Myth*," increased his reputation. He is joint translator, with Prof. Butcher, of the "*Odyssey*," and with Mr. Myers and Mr. Leaf of the "*Iliad*." Mr. L. was in '88 appointed Gifford Lecturer on Natural Religion at St. Andrews University, and delivered his inaugural address Jan. 17th, '89. His recent works include "*Aucasin and Nicolette*," "*Ferrault's Popular Tales*," "*The Gold of Fairinlee*," "*Lost Leaders*," "*Prince Prigio*," and "*Blue Fairy Tale Book*" ('89).

Langtry, Lillie, daughter of Rev. W. C. L. Breton, Dean of Jersey, was b. 1852, and after her marriage with Mr. Langtry in '74, she became one of the chief attractions of London society. Her success at amateur theatrical performances subsequently induced her to adopt the stage as a profession. Her first public appearance was at the Haymarket Theatre, Dec. 15th, '81, when she took the part of Miss Hardcastle in "*She Stoops to Conquer*." Besides playing in London, Mrs. Langtry has starred the provinces, and engaged in a tour in America, where she chiefly resides. She played (Jan. '89) *Lady Macbeth* in New York. She has taken a farm in the valley of Howell mountains in California; and is now (Nov. '89) playing in the provinces.

Lankester, Edwin Ray, M.A., F.R.S., b. 1847. Educated at St. Paul's School and Christ Church, Oxford. Appointed Fellow and Lecturer of Exeter College, Oxford ('72), and Professor of Zoology and Comparative Anatomy in University College, London ('74). In '76, Professor Lankester prosecuted the spirit-medium Slade. He has taken a prominent part in the defence of scientific experiments on live animals, in the discussion of University reform, and in the advocacy of State endowment of scientific research. It was reported as probable (Nov. 25th, '89) that Prof. Ray Lankester would return to Oxford as Linacre Professor, a memorial urging his claim to the chair being in circulation and well signed, especially by biologists.

Lansdowne, Henry Charles Keith Fitz-Maurice, 4th Marquis of (creat. 1844); eldest son of the 5th Marquis by the Hon. Emily Jane, daughter of the Comte de Flahault and the Baroness Keith and Nairne, was b. 1845; succeeded his father 1866. Was Under-Secretary for War (April '72 to Feb. '74), and Under-Secretary India Office (May to Aug. '80); was Governor-General of Canada '83-88. His appointment was particularly popular with the French Canadians, owing to the fact that his lordship's mother was a French lady. The first Marquis (better known as Lord Shelburne) was a distinguished minister in the reign of George III.; the third Marquis was also a very distinguished minister during the reigns of George IV., William IV., and her present Majesty. The fourth Marquis, who sat in the House of Lords as Baron Wycombe for some years before he inherited the marquessate, was a Secretary of State and a Lord of the Treasury. Lord Lansdowne was invited to join the second Salisbury administration on the resignation of Lord Randolph Churchill. The invitation was, however, declined. On the retirement of Lord Dufferin from the Governor-Generalship of India, in '88, Lord Lansdowne was appointed his successor.

Law. For important cases occurring during '89 see under Ancient Lights; Arbitration; Bankruptcy; Petting; Bigamy; Bill of Exchange; Bills of Sale; Breach of Promise; Bribery; Building Law; Building Societies; Children, Custody of; Company Law; Copyright; Corporal Punishment; Criminal Prosecutions; Dishorning Cattle; Distress, Law of; Ecclesiastical Law; Habeas Corpus; Hawkers; Illegitimacy; Income Tax; Insurance Law; Landlord and Tenant; Libel; Licensing Law; Master and Servant; Maybrick Case; Omnibus Licensing; Solicitor; Stock Exchange Law; Trade Combinations; Trials in Private;

Trustees; Vaccination; Valuation; Water Supply; Whitechapel Murders; Will Cases; Women Councillors.

Law Courts, The New. There are nineteen Courts in all, with entrances from the Grand Central Hall, the Strand and Carey Street. The Courts are: Two Courts of Appeal; the Lord Chancellor's Court; the Lord Chief Justice's Court; four Chancery Courts; two Probate Courts; and nine Queen's Bench Courts. The Royal Courts of Justice were built from the designs of the late Mr. G. E. Street, whose statue is on the floor of the hall, and were opened by her Majesty, Dec. 11th, '82. The central hall is 230 feet long, 80 feet in height, and 48 feet in width. See SUPREME COURT OF JUDICATURE.

Law Officers of the Crown are the Lord Chancellor (*q.v.*), Attorney-General (*q.v.*), Solicitor-General (*q.v.*), Judge-Advocate-General (*q.v.*); for Scotland, the Lord Advocate (*q.v.*) and Solicitor-General; and for Ireland, the Lord Chancellor for Ireland, and Attorney-General and Solicitor-General for Ireland, all of these being political appointments changing with each administration. See also MINISTRY, and IRELAND, GOVT.

Law of Libel Amendment Act, '88. See Session, sect. 10.

Lawn Tennis. Major Walter Wingfield, late of the 1st Dragoon Guards, must be looked upon as the pioneer of lawn tennis in this country, and it may safely be conceded that no pastime ever more rapidly made its way into general favour. The gallant officer first introduced the game some sixteen years ago, under its classical appellation of *Sphairistiké*, and he gave birth to and fostered a large industry, as scarcely a country seat is now without the appliances necessary for the game, which quickly became known as lawn tennis. An Association has been formed, consisting of recognised lawn tennis associations and clubs willing to conform to the rules, for the purpose of advancing the interests of the pastime generally throughout the United Kingdom. The following are the chief records for '89:—For the Covered Court Championship, played on April 1st, Mr. E. W. Lewis (holder of title and challenge cup) defeated Mr. J. H. Crispie in the final. On May 25th, Mr. W. J. Hamilton beat Mr. E. Renshaw (holder) for the Single Championship of Ireland, at Dublin; Miss Martin also won the Ladies' Singles; the Gentlemen's Doubles were credited to Messrs. E. W. Lewis and G. W. Hillyard; Mr. W. J. Hamilton and Miss Rice won the Ladies' and Gentlemen's Doubles; and the Ladies' Doubles were taken by the Misses Martin and Stanwell. At West Kensington, on June 28th, Oxford beat Cambridge by 6 to 2, with one draw, in the Singles, but in the Doubles the Light Blues won all nine games. The Championship meeting at Wimbledon extended from July 1st to July 10th; and in the Singles, Mr. W. Renshaw beat Mr. E. Renshaw by 6 to 4, 6 to 1, 3 to 6, and 6 to 0; in the Doubles, Messrs. Lewis and Hillyard beat Messrs. Mewburn and Gore by 6 to 2, 6 to 1, and 6 to 3; and in the Ladies' Singles, Mrs. Hillyard beat Miss L. Price by 4 to 6, 8 to 6, and 6 to 4.

Lawson, Sir Wilfrid, Bart., b. at Brayton Hall, Cumberland, Sept. 4th, 1829, and succeeded to the baronetcy on the death of his father, who was a gentleman of strong temperance and anti-slavery principles. Returned in '59 as member for Carlisle, and lost his seat for that borough in consequence of the intro-

duction into the House of Commons of his "Bill for the Legislative Suppression of the Liquor Traffic" on March 4th, '64. He was, however, again returned in '68 for the same city, which he continuously represented till the general election of '85, when, Carlisle becoming a one-member constituency, he stood for the Cocker-mouth Division of Cumberland, but was defeated by ten votes. At the general election in the following year he was returned for that division by a large majority. Sir Wilfrid Lawson has thrice successfully proposed his Local Option (*q.v.*) Resolution. Elected President of the United Kingdom Alliance on the death of Sir W. C. Trevelyan. He is a familiar figure in the House of Commons, where, as in the provinces, he is very popular. During '89 Sir Wilfrid has been seriously ill, but is now recovered. A work containing many extracts from his speeches was published during the year.

Lawyers Deceased (Dec. 1st, '88—Nov. 21st, '89). See OBITUARY.

Layard, Rt. Hon. Henry A., G.C.B., b. 1817, and commenced his active career as correspondent of a London paper at Constantinople. With the assistance of Sir Stratford Canning, in '45 he commenced to make the series of discoveries of Assyrian antiquities, of which he gave a most interesting account in his well-known works "*Nineveh and its Remains*" ('49) and "*Monuments of Nineveh*" ('49-53). Mr. L. subsequently abandoned Oriental research for diplomacy. He was Under Sec. for Foreign Affairs for a short time in Lord Russell's first administration ('52), when he sat as member for Aylesbury. During the Crimean War Mr. L. proceeded to the scene of hostilities to ascertain the condition of the British troops, and was an active supporter of Mr. Roebuck in demanding the committee of inquiry into the state of the army. He subsequently proceeded to India, to ascertain for himself the causes of the outbreak of the Mutiny, in '57. He unsuccessfully contested York in '59; but was returned in the Liberal interest for Southwark, '60 (re-elected '66 and '68). He was Under Sec. for Foreign Affairs '61-66, and was Chief Commissioner of Works in Mr. Gladstone's first administration. In '69 he was appointed Ambassador at Madrid, and in '77, on the failure of Lord Salisbury's mission to Constantinople, was sent as our plenipotentiary to that city. He has recently published his "*Reminiscences*." In '89 he drew attention to the non-fulfilment of promises made to the trustees of the National Gallery (*q.v.*) by successive Governments.

Laymen, House of. A House of Laymen for the Province of Canterbury assembled for the first time with the Houses of Convocation at the opening of the parliament of 1886. It is composed of ten representatives from the diocesan conferences of London, six each from Winchester, Rochester, Lichfield, Worcester, and four each from the remaining dioceses of the province. To the representative body so formed the Primate may add ten laymen by nomination. Some dissatisfaction has been expressed in both Provinces as to the constitution of the House; and a revision of its constitution is pending, and will precede the formation of a similar House for the Northern Province. Chairman, Lord Selborne; Vice-Chairman, Mr. G. A. Spottiswoode; Secretary, Mr. R. Holland. The first sitting took place

Feb. 17th, 1886, when rules of procedure were adopted, the most important being that the procedure of the House of Commons should be as far as practicable followed. The House of Laymen is bound to avoid discussions upon doctrine. Like Convocation, the House of Laymen is elected with every fresh Parliament.

Members of the House of Laymen. [Names marked thus * were members of the last House of Laymen.] **Canterbury**—*Earl Stanhope, *Viscount Cranbrook, *Lord Northbourne, Lord Harris. **London**—*Earl Beauchamp, *Hon. T. H. W. Pelham, *J. A. Shaw-Stewart, *G. A. Spottiswoode, *J. G. Talbot, M.P., *Eugène Stock, P. V. Smith, F. A. Bevan, L. T. Dibdin. **Winchester**—*Earl of Selborne, *Lord Montagu, Lord Basing, *Melville Portal, *James White. **Bangor**—Lord Penrhyn, T. Pritchard, Hon. W. E. Sackville-West. **Bath and Wells**—Sir R. H. Paget, Bart., M.P., *F. H. Dickinson, *C. J. Elton, Q.C., M.P., *E. J. Stanley, M.P. **Chichester**—*Sir W. Barttelot, Bart., C.B., M.P., *Hon. Justice Grantham, *F. Barchard, *W. E. Hubbard. **Ely**—*A. Sperling, *O. C. Pell, Professor Stokes, P.R.S., C. P. Allix. **Exeter**—*Sir J. H. Kennaway, Bart., M.P., *J. Shelly, *Lieut.-Col. White, Thomson. **Gloucester and Bristol**—*Sir J. E. Dorington, Bart., M.P., J. Harvey, *W. K. Wait, B. St. John Ackers. **Hereford**—*Sir O. Wakeman, Bart., *Sir J. R. Bailey, Bart., M.P., *C. Purton, *J. Rankin, M.P. **Lichfield**—*Earl of Harrowby, *C. J. Blagg, *S. Leighton, M.P., *T. Salt, M.P., Major-General Buller. **Lincoln**—*Right Hon. F. Stanhope, M.P., *Sir W. E. Welby-Gregory, Bart., *A. G. Leslie Melville, Sir C. H. Anderson, Bart. **Llandaff**—*O. H. Jones, *J. A. Rolls, *J. E. Ollivier, *J. Watson. **Norwich**—Lord Henniker, *H. Rodwell, *S. Hoare, M.P. **Oxford**—*Earl of Jersey, *Right Hon. Sir J. R. Mowbray, M.P., *A. W. Hall, M.P., *J. H. Wilson. **Peterborough**—*The Duke of Rutland, *W. A. Heygate, *E. P. Monckton, *S. G. Stopford Sackville. **Rocheater**—*Sir C. D. Fox, Kt., D. Christopherson, Col. H. de Geary, *Sydney Gedge, M.P., *E. H. L. Penrhyn, *G. R. Richardson. **St. Albans**—*Right Hon. Sir H. J. Selwin-Ibbetson, Bart., M.P., *James Round, *A. Unwin Heathcote, *H. Hicks Gibbs. **St. Asaph**—*Earl of Powis, *P. P. Pennant, *W. Trevor Parkins, *Sir W. W. Wynn, Bart. **St. David's**—Viscount Emlyn, *H. Davies-Evans, *W. S. de Winton. **Salisbury**—*Earl Nelson, *Hon. Sydney Herbert, M.P., *H. B. Middleton, K. Williams, jun. **Southwell**—*H. H. Bemrose, *J. Borough, *F. Wright, *H. E. Thornton. **Truro**—*Earl of Mount Edgumbe, E. Carlyon, R. Foster, C. C. Ross. **Nominated members**—C. T. Dyke-Andland, M.P., Viscount Hardinge, F. Dixon-Hartland, M.P., Lord Norton, Sir R. Temple, Bart., M.P.

Learned Societies. The rapid progress of art and science during the present century has led to the establishment of innumerable societies and institutions for the furtherance of the study of special subjects. A list of these associations would occupy so much space that we are only able to indicate the chief of them. The names in brackets indicate the *Seos*.—Some leading ones, however, are separately noticed, or alluded to under the several sciences. **Anthropological Institute**, 3, Hanover Sq., W. (F. W. Rudler); **British Association for the Advancement of Science**, 22, Albemarle St., W. (President, Sir F. Abel); **British Archaeological**

Association, 32, Sackville St., W. (W. de Gray Birch); **British Medical Association**, 429, Strand (F. Fowler); **Chemical Society**, Burlington House, W. (Prof. Armstrong); **Clinical Society**, 53, Berners St. (T. Barlow, M.D.); **Entomological Society**, 11, Chandos St., W.C. (H. Goss); **Geological Society**, Burlington House, W. (W. H. Hudleston); **Institute of Painters in Oil Colours**, Piccadilly, W. (W. T. Blackmore); **Institution of Civil Engineers**, 25, Great George St., S.W. (J. Forrest); **Institution of Electrical Engineers**, 4, The Sanctuary, Westminster, S.W. (F. H. Webb); **Institution of Naval Architects**, 5, Adelphi Terrace, W.C. (G. Holmes); **Iron and Steel Institute**, Victoria Mansions, S.W. (J. S. Jeans); **Linnean Society**, Burlington House, W. (B. D. Jackson); **Numismatic Society**, 22, Albemarle St., W. (H. A. Grueber); **Pathological Society**, 53, Berners St., W. (S. Coupland, M.D.); **Royal Academy**, Burlington House, W. (F. A. Eaton); **Royal Academy of Music**, Tenterden St. (J. Gill); **Royal Archaeological Institute**, Oxford St. (H. Gosse); **Royal Asiatic Society**, 22, Albemarle St., W. (Prof. T. W. Rhys-Davids); **Royal Astronomical Society**, Burlington House (E. B. Knobel); **Royal College of Physicians**, Pall Mall East (W. Gurner); **Royal College of Surgeons**, 40, Lincoln's Inn Fields (E. Trimmer); **Royal Geographical Society**, 1, Savile Row, W. (D. W. Freshfield); **Royal Historical Society**, 11, Chandos St., W.C. (P. E. Dove); **Royal Institute of British Architects**, 9, Conduit St., W. (W. H. White); **Royal Institute of Painters in Water Colours**, Piccadilly (W. T. Blackmore); **Royal Institution**, 21, Albemarle St., W. (Lord Rayleigh); **Royal Meteorological Society**, 30, Great George St., S.W. (G. J. Symonds); **Royal Society**, Burlington House (Prof. M. Foster); **Royal Society of Literature**, 21, Delahay St., S.W. (E. G. Highton); **Royal Society of Painters in Water Colours**, Pall Mall East (A. D. Frapp); **Royal Society of British Artists**, Suffolk St., S.W. (H. H. Canty); **Royal Society**, 9, Adelphi Terrace, W.C. (J. B. Martin); **Society of Antiquaries**, Burlington House (Hon. H. A. Dillon); **Victoria Institute**, 7, Adelphi Terrace, W.C. (Capt. Petrie); **Zoological Society**, 3, Hanover Sq., W. (P. L. Slater).

Leaseholds Enfranchisement. See Session, sects 86, 136.

Leaseholds. See LANDLORD AND TENANT. **Lecky, W. E. H.**, b. in Dublin, 1838, where he was educated at Trin. Coll. In his "Leaders of Public Opinion in Ireland Mr. L. showed strong tendencies towards Irish Nationalism, but since the formulation of Mr. Gladstone's Home Rule policy has distinguished himself by magazine articles written against it. Mr. L. is the author of "History of the Rise and Influence of the Spirit of Rationalism in Europe" ('65); "History of European Morals from Augustus to Charlemagne" ('69); "History of England in the Eighteenth Century" ('78).

Lectures, Endowed. For the principal ones see under their respective alphabetical headings in our last edition.

Leeward Islands. The westward section of the Lesser Antilles (so called in distinction from the Windward Islands, with reference to the trade winds). Those which belong to Great Britain are grouped together in one federal colony, and consist of the five presidencies of Antigua, Montserrat, St. Christopher, Dominica, and the Virgin Islands. The Leeward Islands confederation has representative

government, with a Governor, Executive, and General Federal Council. The islands have possessed various forms of government in past times. The capital and seat of government of the Leeward Islands is **St. John**, Antigua. See under the names of the respective islands. **Committee** "Layard's" "Through the West Indies," "Her Majesty's Colonies."

Legal Tender. The following are legal tender up to and including the annexed amounts:—

| | | |
|--------|---|------------------|
| Of the | Gold coins . . . | up to any amount |
| Royal | Silver coins . . . | £2. |
| Mint. | 1 <i>d.</i> and ½ <i>d.</i> coins . . . | 1 <i>s.</i> |
| | ½ <i>d.</i> coins (farthings) . . . | 6 <i>d.</i> |

Bank of England notes are legal tender in England and Wales (except by the Bank of England itself), but a creditor cannot be compelled to give change. If a debtor require a receipt, he must prepare it, stamp it, and offer it for signature to his creditor, who by refusal to sign it renders himself liable to a penalty. The actual notes or coins must be produced by the debtor, and offered in payment, otherwise legal tender has not been made.

Legion of Honour. The. Instituted under the Republic of France (May 1802), was intended as a reward for military and civil services. There were three ranks—Grand Officers, Commanders, and Legionaries (see ed. '87). On the coronation of Napoleon I., the Grand Officers were divided into two classes—Knights of the Grand Eagle, and Grand Officers. The constitution of the Legion was remodelled by Napoleon III. in 1852, and during his reign upwards of 6,000,000 francs were distributed annually amongst the members. In 1871 the palace belonging to the Legion was destroyed by the Communists (see ed. '87).

Leighton, Sir Frederick. P.R.A., b. at Scarborough, 1830. Studied alternately at Rome, Berlin, Frankfurt-on-the-Main, Florence, Paris, and Brussels. His first exhibited work was a large picture of "Olimbus," which, appearing at the Royal Academy (1855), excited much interest. Purchased immediately by the Queen, it was re-exhibited at several exhibitions. Subsequently Mr. Leighton resided at Paris, where he had the benefit of the advice of A. J. Scheffer, Robert Fleury, and other French painters. Since his residence in London, whence he returned in 1860, Sir Frederick Leighton has been a constant contributor to the Royal Academy, of which he was made an associate (1864), and R.A. (1869). His genius as a painter and sculptor is no less remarkable than his industry, and in '78 he was chosen President of the Royal Academy, in succession to the late Sir Francis Grant. He was knighted on that occasion, and created a baronet in '86. In '88, Sir Fredk. was elected a member of the Royal Society of Painters in Water Colours. He exhibited at the Royal Academy in '89 "Greek Girls Playing at Ball," "An Invocation," and two original studies of "Sibyl." He was created a Commander of the Legion d'Honneur for services in connection with the Paris Exhibition. His famous picture "Captivè Andromache" has recently been purchased by the Corporation of Manchester.

Lema Islands. A group of small islands adjacent and belonging to Hong Kong (*q.v.*).

Leo XIII. See POPE, THE.

Leopold II., King of the Belgians. b. at Brussels, 1835, son of King Leopold I., to whom he succeeded. King Leopold has travelled much in Europe, Asia Minor, and

Egypt. He is the head of the International Association, whose object is to open to Europeans the Congo and its tributaries. He was the friend of Gordon, whom he had taken into his employ, but was deprived of his services when the latter was summoned from Brussels to go to the Soudan. King Leopold is the staunch friend of the great explorer Stanley. As head of the International Association, he has contributed very largely to the funds of the Society from his private purse. King Leopold married, in '53, the Archduchess Maria of Austria, by whom he has had two daughters and one son, the Duke of Brabant, who died when two years old. His Majesty takes great interest in the development of the Congo Free State, and is a firm supporter of all projects for its improvement. See CONGO RAILWAY, etc.

Leopoldville. Capital of Congo Free State (*q.v.*), on Stanley Pool.

Les Îles Malouines. The French name for the Falkland Islands (*q.v.*).

Leslie, George Dunlop, R.A., son of the late C. R. Leslie, R.A.; b. 1835. He first exhibited at the British Institution in '57, and has been a constant contributor to the Royal Academy since that date. A.R.A. ('68), R.A. ('76). Mr. Leslie's aim in art has always been to paint pictures from the sunny side of English life, and as much as possible to render them cheerful companions to their possessors. He has recently published "Our River: an Artist's Life on the River Thames," and exhibited "Sun and Moon Flowers" at the '89 exhibition of the Royal Academy.

Les Saintes. A group of islets in the West Indies, forming part of the French colony of Guadeloupe. Among them is one of the best roadsteads in the West Indies, strongly fortified.

Lessar, M. Gospodin, a young Russian officer of Engineers, b. June 25th, 1851. He was first brought to notice when employed by the controller of the Russian Trans-Caspian Railway, Prince Khilkoff (in 1881) to survey the section of the projected line from Askabad to Sarakhs, lying through a country which had never before been traversed by a European. This he satisfactorily accomplished, returning to Askabad; and then proceeding to Europe to obtain maps of Persia and Afghanistan, in order to prosecute a further survey from Sarakhs to Herat. M. Lessar returned, after this survey, *viâ* Meshed, to Askabad, and afterwards proceeded on another surveying expedition to Merv. Askabad could be irrigated and made fertile. Despatched to England by the Russian Government in the character of a negotiator in the Afghan difficulty. M. Lessar is about to be appointed to an important post in the Asiatic Department of the Russian Ministry for Foreign Affairs (Nov. 25th, '89).

Lesseps, Ferdinand de, was b. at Versailles in 1825. At the age of twenty-four he entered the French diplomatic service as attaché at Lisbon, and subsequently held consular appointments at Barcelona, Tunis, and Alexandria. In '41, while detained in quarantine at Port Said, his great project for cutting a canal through the Isthmus of Suez dawned upon him. During his eight years residence in Egypt he dreamed over this scheme, but it was not until Abbas Pasha acceded to power in '54 that the project received practical support. It required all M. Lesseps' diplo-

matic skill to overcome the opposition which his proposal aroused outside Egypt, and especially amongst English diplomatists and engineers. M. Lesseps, however, ultimately triumphed, and in '59 the first sod of the canal was turned, and on Aug. 15th, '69, the waters of the Red Sea and the Mediterranean met. M. de Lesseps received honours from various European Governments in recognition of his services. He was created a K.O.S.I. by Queen Victoria, and received the honorary freedom of the City of London ('70). The French Academy awarded him a prize of 5000 francs for his history of the canal published in '76. In '81 he was elected President of the French Geographical Society. On the outbreak of the troubles in Egypt in '82 M. Lesseps supported the cause of Arabi, and stoutly opposed the Egyptian policy of the British Government. He has long been engaged in a project for cutting a canal through the Isthmus of Panama, but has not been successful in raising the capital necessary for the completion of the work (see PANAMA CANAL). M. de Lesseps married, a few days after the opening of the Suez Canal, a young creole of English extraction, by whom he has a large family.

Letters of Distinction. See ABBREVIATIONS, LIST OF.

Levuka. In Fiji (*q.v.*); formerly the capital.

Lewes Meeting. See TURF.

Lewis, Mr. George, the celebrated London solicitor, was b. in 1833. He first made his mark in conducting the prosecution of the directors of the Overend and Guiney's bank, and many other mercantile and financial prosecutions were afterwards put into his hands. The prosecution of Madame Rachel the restorer of female beauty, and Dr. Shade the medium, are among the cases which he superintended as a solicitor. In '86 he was professionally engaged in the Dilke and Colin Campbell divorce cases. Mr. Lewis is an active man, commanding an enormous practice. His greatest undertaking has been, perhaps, the preparation of the case for Mr. Parnell and the Irish party, for whom he was solicitor at the Parnell Commission (*q.v.*). He was also connected with the great financial trial which engaged much attention during the autumn of '89.

Libel Law Amendment Bill, introduced by Sir A. Borthwick, gave rise to considerable discussion, and was greatly amended, not only in the Commons but when it reached the Lords, whose amendments were set down for consideration by the Commons in Nov. '88. As returned from the Lords the bill provided that fair and accurate newspaper reports of proceedings publicly heard before any court exercising judicial authority should, if published contemporaneously with such proceedings, be privileged; but nothing in the section is to authorise the publication of any blasphemous or indecent matter. A fair and accurate newspaper report of the proceedings of a public meeting, or (except where neither the public nor any newspaper reporter is admitted) of any meeting of a vestry, town council, school board, board of guardian, board or local authority formed or constituted under the provisions of any Act of Parliament, or of any committee appointed by any of the above-mentioned bodies, or of any meeting of any commissioners authorised to act by letters patent, Act of Parliament, warrant under the Royal Sign Manual, or

other lawful warrant or authority, select committees of either House of Parliament, justices of the peace in quarter sessions assembled for administrative or deliberative purposes, and the publication at the request of any Government office or department, officer of state, commissioner of police, or chief constable, or any notice or report issued by them for the information of the public, shall be privileged unless it shall be proved that such report or publication was published or made maliciously: Provided that nothing in this section is to authorise the publication of any blasphemous or indecent matter: Provided also, that the protection intended to be afforded by this section is not to be available as a defence in any proceedings if it shall be proved that the defendant has been requested to insert in the newspaper in which the report or other publication complained of appeared a reasonable letter or statement by way of contradiction or explanation of such report or other publication, and has refused or neglected to insert the same: Provided further, that nothing in this section contained shall be deemed or construed to limit or abridge any privilege now by law existing, or to protect the publication of any matter not of public concern. For the purposes of this section "public meeting" is to mean any meeting *bonâ fide* and lawfully held for a lawful purpose, and for the furtherance or discussion of any matter of public concern, whether the admission thereto be general or restricted. Where any person makes a speech to a meeting, and a report containing libellous words, purporting to be a report of such speech, is published in any newspaper, then, on proof that the words so published, or words of like import, were uttered by the person making such speech, that person shall, in the event of any civil proceedings being instituted against him for libel in respect of such words, be deemed for the purposes of such proceedings to have himself written and published the libellous words attributed to him. The proceedings, if taken, are to be in substitution for and not in addition to any proceedings, whether civil or criminal, that may be instituted against him. It shall be competent for a judge to make an order for the consolidation of two or more actions, brought in respect to substantially the same libel by one and the same person; the jury are to assess the whole amount of damages, if any, in one sum, but are to apportion the amount between the various defendants. Sect. 3 of the 44th & 45th Vict. c. 60 is repealed, but instead thereof it is enacted that no criminal prosecution shall be commenced against a newspaper for libel without either the written fiat of the Attorney-General, or the order of a judge at chambers; and every person charged with a criminal libel, and the husband or wife of such person, shall be competent but not compellable witnesses at every stage of such charge.

Libel, Law of. There are various species of libel: the defamatory libel, the seditious libel, and the obscene libel. Every libel must be written, printed, or in some other way addressed to the eye. One publication might combine the characteristics of all three kinds of libel, but they can best be explained separately. In order to constitute a publication a defamatory libel, it must be false. It must also be malicious in the legal sense; the law presuming malice in every injury done intentionally, without justification.

It must further have a tendency to bring its object into hatred or contempt. Further, it must not be privileged. A privileged communication in this sense is either privileged absolutely, or privileged when not malicious. A statement made in a court and in the administration of justice, or in either House of Parliament in the transaction of public business, is privileged absolutely. A statement presumably made in fulfilment of a moral duty to inform the person to whom it is made—e.g., by A to B, his relative, concerning the character of C, whom B is about to marry; or by A, an employer, to B, another employer, concerning the character of C, who has left A's employment and is about to enter B's; or a free criticism of public men, artists, etc.—is privileged, unless it can be shown to be malicious.—A libel is published if seen but by one person other than the person libelled. The publication of a defamatory libel gives ground both for civil and criminal proceedings. The publisher, as well as the writer, is liable to either. In criminal law it is a misdemeanor or to publish or threaten to publish a libel, or, as a means of extortion, to offer to abstain from or to prevent others from publishing a libel. The maximum punishment is three years' imprisonment with hard labour.—Any publication published with a seditious intention is a seditious libel, and a seditious intention is an intention to bring into contempt the Sovereign or either House of Parliament, or the administration of justice, or the constitution, or to promote sedition or civil discord, or to bring about alterations in Church or State otherwise than by lawful means. To publish such a libel is a misdemeanour.—Any obscene publication may constitute an obscene libel. To publish such a libel is an offence punishable by imprisonment with hard labour. The truth of such a publication is not sufficient to justify it; but Sir James Stephen, in his "Digest of Criminal Law," suggests that the publication may be justified if it be no more than is necessary to secure some important public good. (See LIBEL LAW AMEND. ACT).—**Law on '89.** Perhaps the libel action of the year which attracted the greatest attention was that of *Sir George Chetwynd v. the Earl of Durham*. The action was brought in the Queen's Bench Division, but was referred to the arbitration of Mr. James Lowther, M.P., the Earl of March, and Prince Soltykoff, three stewards of the Jockey Club. The plaintiff claimed £20,000 damages for a libel alleged to have been uttered by the Earl of Durham in a speech delivered at the Gimcrack Club, at York, on Dec. 13th, '87. In his speech Lord Durham did not mention any person by name, but afterwards admitted that he intended to attack Sir George Chetwynd, whom he accused of putting up jockeys whom he suspected, or knew, to be guilty of "pulling" horses, and of otherwise being guilty of dishonourable conduct on the turf. In the result the arbitrators assessed the damages sustained by the plaintiff at the sum of one farthing, and directed that each party should bear their own costs of the reference, and half the costs of the award (see *Turf*).—In a case in which a Congregational Minister at Cardiff had recovered £2000 damages against the *Western Mail* for libels imputing immorality to him, the Queen's Bench Division refused (May 4th) to reduce the amount of the damages.—In the case of *Campbell-Fraed v. Graham*, the defendant, the

editor of the *Gentleman* newspaper, had written to a lady contributor, stating that he could receive no more articles from her, on the ground that he had overheard her husband invite a young lady to dine alone with him on the following Sunday. This was complained of as a libel by the husband, and an action brought in the Queen's Bench Division (June 6th) resulted in the jury finding for the plaintiff, damages £500. Subsequent attempts to get this decision reversed were unsuccessful.—An interesting point was raised in the case of *Scherer v. Kuypers* (Queen's Bench Division, May), where the proprietor of a trade newspaper was sued for libel for publishing a statement that a county court judgment had been given against the plaintiff's firm for a certain sum. The judgment had been satisfied before the announcement was published, and it was contended by the plaintiffs that the alleged libel was meant to convey that judgment had not been satisfied, and that the plaintiff's credit would thereby be damaged. The jury found a verdict for the defendant.—In the case of *Tibbitts v. Macmillan* (Queen's Bench Division, May 28th), the plaintiff sought to recover damages for libel contained in a review in *Nature* of his work on massage. The jury awarded a farthing damages, and the defendants were refused their costs.—For libelling Miss Florence St. John, the actress, *Mr. Ellborough*, the proprietor of the *Wasp*, was ordered to come up for judgment when called upon, he having in the meantime made an ample apology for the attack upon the prosecutrix.—*Mr. Henry Visetelly*, for publishing certain unexpurgated French novels, was found guilty of obscene libel, and, having been previously fined for a like offence, was sentenced to imprisonment for three months as a first-class misdemeanant. *Mr. W. M. Thomson*, for a similar offence, was ordered to come up for judgment when called upon.—For slandering the Mutual Reserve Fund Life Association of New York, *Mr. William Reid*, the agent of a rival company, was cast in one farthing damages and costs (Queen's Bench Division, Oct. 31st); but the Lord Chief Justice characterised the plaintiff company's policies as full of pitfalls.—In the case of *Gibson v. Evans* (Queen's Bench Division, June 20th), the action being brought by one newspaper editor against another for libel, it was again decided that a newspaper proprietor cannot be compelled to disclose the name of a writer of a letter or article for which the proprietor admits his responsibility.—The case of *Fleming v. Dollar* came before the Queen's Bench Division (June 20th), by way of an appeal from an order of a judge in chambers who had struck out the defendant's defence. The defendant had pleaded that, "in the heat of the discussion he used words of the plaintiff's (being those complained of) which were not wholly justified by the facts herein stated, and cannot be considered in every respect fair comment"; and he brought into court 40s. as sufficient to satisfy the plaintiff's claim. Lord Coleridge, in his judgment, held that such a defence had rightly been struck out, as contrary to the rule, and as being embarrassing. The defendant could not justify some parts of a libel, and pay into court a sum of money in respect of those parts which he alleged to be doubtful.—In the case of *Maokay v. The Manchester Press Co.* (Queen's Bench Division, October 31st), in which the

defendants had stated in their newspaper that "It is not generally known that Mrs. Mackay, who entertained the Prince of Wales on Wednesday night, and whose parties will be a conspicuous feature of this season, was once what Americans call a washerwoman," a similar decision as to the defendants' defence was upheld.—An action for libel by Mr. William O'Brien, M.P., against the Marquis of Salisbury, was tried at the Manchester assizes. It arose out of a speech of the Prime Minister, in which it was alleged he had charged Mr. O'Brien with instigating certain persons to crime in Ireland. The jury, however, found for the defendant, and an application for a new trial resulted in a refusal on the part of the Queen's Bench Division.—Mr. M. Harris, Mr. W. O'Brien, and one or two other members of the Irish Parliamentary party, recovered damages from certain Irish newspapers in which they had been attacked.—Mr. Parnell's action for libel against the *Times*, in connection with the forged letters, which had been ordered to stand over pending the inquiry of the Special Commissioners (see PARNELL COMMISSION), did not appear in the list for the Michaelmas sittings. The action commenced in Edinburgh was abandoned earlier in the year.—The case of *Allbutt v. The General Council of Medical Education* (Court of Appeal, July 6th), raised a question of considerable importance to the medical profession. The plaintiff, a medical man, had published a work entitled "The Wife's Handbook," and the defendants had struck his name off the register. On this fact and the reason being published by the defendants, the plaintiff asked to have the decision of the Council reconsidered and reviewed by the Court, on an application for a *mandamus* to restore him, or to maintain an action for libel against them for the publication. The Court of Appeal affirmed the decision of Mr. Baron Pollock to the effect that the action could not be maintained in either of the ways proposed. It was laid down that the defendants had the jurisdiction to investigate and decide whether the complaint was substantiated, and were fully justified in stating the cause of the erasure of the plaintiff's name from the register.—The case of *Besant v. Hoskyns* (Queen's Bench, November) was an action for libel brought by Mrs. Annie Besant against the Rev. E. Hoskyns, rector of Stepney, Tower Hamlets. Her allegation was that at the School Board election for the Tower Hamlets division, at which she was elected by a large majority, the defendant circulated a handbill containing, among other things, these words,—"A Freethinker thus describes the practical outcome of her teaching: 'Chastity is a crime; unbridled sensuality is virtue.' Such teaching is carthy, sensual, devilish. Christian voters, do your duty." The defendant on his part pleaded justification. In the result the jury were unable to agree, and were discharged.

Liberals. See ENGLISH POLITICAL PARTIES.
Liberal Union, German. See GERMAN POLITICAL PARTIES.

Liberal Unionist Association. Formed to resist the Home Rule policy adopted by Mr. Gladstone in 1886, and embodied in his two projects, the "Government of Ireland" and "Land Purchase (Ireland)" Bills. In the contested election which followed the rejection of Mr. Gladstone's proposals, the Association did much to bring about the defeat of the Home

Rule party, and was effective in returning to the House of Commons seventy-five Liberal Unionist members. Since that time the Association has spread its organisation over the whole of the United Kingdom, and has nearly two hundred branches in England and Wales, besides those in Scotland and Ireland. For the purposes of organisation a representative body known as the Liberal Unionist Council has been called into being, and consists of seventy-two members, the majority of whom are elected by the branch associations in all parts of the United Kingdom, and the rest having seats on the Council by virtue of their official connection with the party both in and out of Parliament. **Chairman of the Association and of the Liberal Unionist Council:** the Marquis of Hartington, M.P. **Offices:** 31, Great George St., Westminster, S.W. **Liberation Society.** See DISESTABLISHMENT.

Liberia. A negro republic on the Grain Coast of West Africa. Area, about 14,300 sq. m., pop. 1,500,000, including 18,000 civilised Americo-Liberians and 1,050,000 half wild aborigines. Capital, Monrovia, pop. 3,400. The shore is low, but the country rises towards the interior, and is well wooded and watered by numerous streams. The climate is hot, and unhealthy for Europeans. The soil is fertile, and well adapted for the growth of tropical crops, such as rice, sugar, coffee, and cocoa. These, with palm oil, nut, caoutchouc, and ivory, form the principal exports. The bulk of the trade is with Great Britain, Holland, Hamburg, and America. **Revenue** (in '89), £40,000; **expenditure**, £38,000. In '71 a debt of £100,000 was contracted in England, on which no interest has been paid since '74. Liberia was founded in '22 by American philanthropists for the settlement of freedmen. It was declared independent in '47, was recognised as a sovereign state by Great Britain in '48, and by the United States in '61. The constitution is on the model of that of the United States. The President is elected for two years, the House of Representatives (13 members) for two years, and the Senate (8 members) for four years. For Ministry, etc., see DIPLOMACY.

Liberty and Property Defence League. The motto "Self help versus State-help"), was established in 1882 for resisting over-legislation, for maintaining freedom of contract, and for advocating individualism as opposed to socialism, entirely irrespective of party politics. The corporate action of the League is confined to: (1) The defence of the principle of individual ownership and freedom of contract in property of all kinds, real and personal; and the assimilation of the laws regulating their possession. (2) The defence of private enterprise in agriculture, ships, railways, mines, manufactures (textile, metal and miscellaneous), professions, and trades (wholesale and retail) of all kinds from harassing State regulation and inspection. (3) The furtherance of the rights and freedom of labour by voluntary and direct adjustments between trade-unions and employers, and the enjoyment by each workman of the full fruits of his own labour. (4) The federation of all these industries in the mutual defence of their common liberties and rights of self-government against encroachments by the State. **Federated with the League are 97 Defence and Protection Societies**, representing nearly every industry in the kingdom, the representatives of these societies forming a strong **Parliamentary Committee** for taking steps to resist the passage of

measures introduced into Parliament having for their object interference with the freedom and property of the individual. The League conducts the propaganda of its principles both by public lectures and by the publication and dissemination of literature. Of the latter there are several pamphlets by Lord Bramwell, the Earl of Wemyss, the Earl of Pembroke, Earl Fortescue, Sir Frederick Bramwell, Mr. J. A. Froude, M. Léon Say, Hon. Auberon Herbert, Mr. Wordsworth Donisthorpe, etc., also Mr. Herbert Spencer's "Over-legislation," and "The Man *versus* the State." At the Universal Exhibition, Paris, '89, the League was awarded the grand prize for publications, **Central offices:** 4, Westminster Chambers, S.W. Sec., W. C. Crofts. **Branches** exist in all the great commercial and industrial centres in England, Scotland, and Ireland, also in America, Australia, India, France, and Italy.

Libraries. Attempts have sometimes been made to measure the intellectual development of nations by comparing the statistics of their book-collections. The data, however, necessary for a satisfactory comparison do not as yet exist, the United States being the only nation which has carried out anything like a complete census of libraries. A **Special Report** issued by the Bureau of Education in 1876 recorded over 4,000 public libraries, which number has since been largely increased. The peculiar feature of the American library system is the large number of popular libraries. The library systems of Europe are characterised by the number of large collections of books of historical interest. This is peculiarly the case with Italy, Germany, and France. The amount of popular reading in these countries is small as compared with England and America, and their large collections are chiefly used by professional scholars. In France of late years attempts have been made to provide popular reading by a system of libraries in primary schools, of which over 20,000 have been established by the Government. The special feature of our **English library system** has been the work done under the **Public Libraries Acts** (*q.v.*). These Acts date from 1850, the Act of that year having been followed by Acts extending the principle to Scotland and Ireland and amending matters of detail. The Acts enable towns, local board districts, and parishes to establish libraries, to be maintained by a rate not exceeding 1*d.* in the *£*. The entire number of places which have adopted the Acts since 1850 was at the end of 1888 about 200. They include most of the larger towns of the country, though there a few notable exceptions. The capitals of the three kingdoms have been singularly backward in adopting the Acts. Dublin only established two libraries, without adopting the Acts, in 1884. Edinburgh only adopted them in 1886, when Mr. Carnegie (*q.v.*) offered a sum of £50,000 on condition of their adoption. London until quite recently had only adopted them in a single parish of Westminster, but in 1885 and 1886 Wandsworth, Fulham, and Lambeth followed suit, and in 1887-8 they were adopted in eleven other Metropolitan districts. Altogether the Acts were adopted in thirty-three places as a suitable means of celebrating the Jubilee year. There can be no doubt as to the value of the work done by these institutions, and there is a growing tendency to regard them as a necessary corollary to our system of compulsory primary education. In the year 1888

eighty-one of these libraries returned their stock of volumes as 1,448,192, and the total issue for a year as 9,023,742 volumes, which figures do not include the use made of the newsrooms usually connected with the libraries. The largest and most successful libraries are those of Birmingham, Bristol, Leeds, Liverpool, Manchester, and Newcastle; but the work accomplished in some of the smaller towns, having regard to their population and resources, will not suffer by comparison. Of the older libraries of the country the most important, of course, is that of the **British Museum** (*q.v.*), which is only exceeded in extent by the **Bibliothèque Nationale** at Paris. It possesses over 1,450,000 volumes and 100,000 MSS. and charters. It is entitled under the Copyright Acts to a copy of every work published in this country—a privilege which is also enjoyed by the Bodleian Library, Oxford (425,000 vols. and 30,000 MSS.), and the Cambridge University Library (225,000 vols. and 5,000 MSS.), the Advocates Library, Edinburgh (285,000 vols. and 3,000 MSS.), and the library of Trinity College, Dublin (215,000 vols. and 2,000 MSS.). Valuable and extensive libraries are attached to the other universities, to the colleges of Oxford and Cambridge, and to most cathedrals.—The most important **Subscription Libraries** outside London are those at Bristol, Edinburgh, Hull, Leeds, Liverpool, Manchester, Nottingham and Newcastle. But the tendency is for the smaller subscription libraries established during the last hundred years to disappear, from inability to compete with Smith and Madie, or by being absorbed or replaced by the libraries established under the Public Libraries Acts. There are a number of important **professional libraries** in London, Dublin, and Edinburgh, and a few **endowed libraries**, such as the Chetham at Manchester (1653). The concentration of literary and intellectual interests in London has naturally given birth to a large number of **special libraries**, many of which are open to the student upon proper introduction. The more important of them are included in the following alphabetical list of the **principal London libraries**:—Admiralty (25,000 vols.); Chemical Society (8,000); Colonial Office (12,000); Corporation, Guildhall (85,000), open free; Dr. Williams' (30,000); Foreign Office (70,000); Geological Society (17,500); Gray's Inn (13,000); House of Commons (40,000); House of Lords (30,000); Incorporated Law Society (30,000); India Office (10,000); Inner Temple (37,000); Institute of Civil Engineers (18,000); Lambeth Palace (30,000 and 14,000 MSS.); Lincoln's Inn (45,000); London Institution (70,000, subs.); London Library (100,000, subs.); Middle Temple (32,000); Museum of Practical Geology (20,000); Patent Office (85,000); Royal Society (50,030); Royal Asiatic Society (13,000); Royal Astronomical Society (8,000); Royal College of Physicians (16,000); Royal College of Surgeons (45,000); Royal Colonial Institute (5,000); Royal Geographical Society (25,000); Royal Institution (42,000, subs.); Royal Medical and Chirurgical Society (34,000); Royal Society of Literature (8,000); Royal United Service Institution (21,000); Russell Institution (18,000, subs.); St. Paul's Cathedral (9,000); Zion College (51,000); Society of Antiquaries (21,000); Society of Telegraph Engineers (4,000); South Kensington, Educational (43,000); National Art (58,000); Dyce (14,500); Forster (19,000); Royal Statistical Society (26,000); University College

(105,000); University of London (12,000); War Office (25,000); Westminster Chapter (12,000).—The provision which these libraries, together with the British Museum, have made for the studious classes, is not altogether inadequate, while the trade circulating libraries, together with the club and subscription libraries, provide for the well-to-do. But the needs of the poorer classes are still very slenderly provided for. The British Museum is not adapted to their requirements, and the library of the Corporation, though freely opened for reference, cannot suffice for so large and scattered a population. The question of opening the Guildhall Library on Sundays was mooted (Nov. '89), but it is improbable that consent will be obtained. Further advantage of the Public Libraries Act was taken by various towns during '89. In the provision for popular reading London still offers a striking contrast to Paris, where, beside four important libraries, not including the Bibliothèque Nationale, freely open to the public, the municipality has established a system of popular libraries, of which there are now nearly sixty, with an annual circulation of over a million volumes. The Library Association of the United Kingdom, founded 1877, now numbers nearly 500 members, including the chief librarians of the country. Hon. Secs., J. V. W. MacAlister, 53, Berners Street, W.; E. C. Thomas, 2, South Square, Gray's Inn, W.C.

Licensing Acts, '72, '74. These Acts contain only a part of the statute law with regard to licensing. The Act of 1872 is the principal Act. It applies only partially to Ireland, and not at all to Scotland. It imposes severe penalties upon the illicit sale of liquor, upon drunkenness in any public place or highway, upon permitting drunkenness or gambling or harbouring prostitutes on licensed premises, upon harbouring any constable on such premises in his hours of duty, and upon bribing or attempting to bribe him. It fixes the hours of closing (altered by the Act of 1874), but enables the local authority to grant exemptions from them when the convenience of many persons engaged in lawful business so requires. It provides that if any licensed person on whose licence two convictions for offences against the Act have been recorded is again convicted, he shall forfeit his licence, and he shall be disqualified for five years, and his premises for two years, from receiving another. But a conviction more than five years old is not to be taken into account for the purpose of increasing any penalty. In every licensing district must be kept a register of licences showing particulars of all convictions, etc., and this register must be open to inspection by any ratepayer, holder of a licence, or owner of licensed premises. In counties and in boroughs the justices must annually appoint from among themselves a licensing committee of not less than three members. But in boroughs no licence granted by this committee is to be valid unless confirmed by the body of justices who would, but for the Act, have been authorised to grant licences. Premises not already licensed at the passing of the Act cannot receive a licence unless they are of an annual value fixed by the Act with reference to their situation. Penalties under the Act are recoverable by summary conviction, subject to an appeal to Quarter Sessions. No justice who has any beneficial interest in the manufacture or sale of intoxicating liquors can do anything under this Act.

The Act of 1874 contains many modifications of the Act of 1872, and of these several mitigate the severity of the law. But both are so long and intricate that for precise information a reference to the text is necessary.—*Law* *en*, in '89. A case in which the magistrates had refused to transfer the license of a public-house to a person who had been convicted of felony, but had subsequently received a free pardon, came before the London Sessions (Oct.). It was held that it was not intended to bar a man who had received a free pardon from the Crown from exercising a lawful calling, and the case was sent back to the magistrates for them to act accordingly.—The decision of the Bedfordshire magistrates, that where the holder of a licence had been convicted of felony the license was at an end, and therefore could not be transferred, was affirmed by the Queen's Bench Division (May 6th). It was held that the application should have been made for a new licence, and not for a renewal thereof.—The question whether the tenant of a public-house, which is closed by the refusal of the justices to transfer the license, can sell, pending appeal, under permission from the Inland Revenue authorities, was raised before the Chester magistrates in May. The defendant was fined, but an appeal was granted.

Lichfield, Rt. Rev. William Dalrymple MacLagan, Lord Bishop of. The see was founded in 646; income £4,200. His lordship, b. 1826, is the son of David MacLagan, Esq., M.D., physician to the forces, who served with distinction in the Peninsular War. Educated at St. Peter's Coll., Cambridge; graduated B.A., Junior Opt. '56; M.A. '60; D.D., *jure dign.*, '78. Was ordained deacon '56, and priest '57, by the Bishop of London; consecrated Lord Bishop of Lichfield '78. Formerly curate of St. Saviour, Paddington, '56-'58; St. Stephen, Marylebone, '58-'60; curate in charge of Enfield, '65-'69; rector of Newtonington '69-'75; vicar of Kensington '75-'78; **Prebendary of St. Paul's Cathedral** '78; **Chaplain-in-ordinary to the Queen**. In '70 his lordship edited "The Church of the Age," and is the author of various charges, pamphlets, and pastoral letters, among which may be mentioned "Parochial Papers"; "The Church and the People; an Inquiry into the Neglect of Public Worship," '82, etc.

Liddon, Rev. Henry Parry, D.D., D.C.L., Canon of St. Paul's, was b. 1829. Educated at Ch. Ch., Oxford, where he graduated B.A. ('50), and ('51) obtained the Johnson Theological Scholarship; M.A. ('53). Vice-Principal of the Theological College at Cuddesdon, in the Diocese of Oxford ('54-'59). Examining Chaplain to the late Bishop of Salisbury. **Prebendary in Salisbury Cathedral** ('64); **Bampton Lecturer** ('66), his subject being "The Divinity of Jesus Christ"; **Canon Residentiary of St. Paul's Cathedral** ('70); **Ireland Professor of the Exegesis of Scripture in the University of Oxford** ('70), that University conferring upon him the degrees of D.D., D.C.L. Canon L. is one of the most prominent and distinguished members of the High Church party; his Easter sermon (1883) having emphasised his position as the leading exponent of that school at the present time, Canon L. is a very popular preacher, and when in residence (during June and December) always attracts large congregations to St. Paul's. In addition to many sermons published, he has written several

important theological works. In '88 Canon L. published a volume of sermons entitled "Advent in St. Paul's," and in '89 prefaced a new translation of Thomas à Kempis' "Imitation of Christ."

Lieutenant, Lord, of a county, is appointed by the Crown, and as a rule holds office for life. He attends the sovereign when she passes through the county, and nominates to the Lord Chancellor persons to serve as justices of the peace for the county (except in Lancashire). By modern legislation, his jurisdiction and powers over the militia, yeomanry, and volunteers, save as to raising the militia by ballot when such a course may be necessary, have been re-vested in the Crown, though he may still recommend for first commissions in the Reserve Forces. He appoints at least twenty duly qualified persons in the county (and the qualification is somewhat high) to be deputy-lieutenants, the appointments being subject to the approval of Her Majesty. In the county he is chief representative of the Crown, principal executive authority, and head of the yeomanry. Under the Local Government Act the new County of London has its own Lord Lieutenant.

Lifeboats (for their origin and development see ed. '87). The **Royal National Lifeboat Institution**, which is supported by voluntary contributions, was founded 1824. It has 293 lifeboats in Great Britain. Of this number, 212 are on the English coast, 44 on that of Scotland, and 37 on the Irish coast. Total number of lives saved since Institution founded, 34,043. Pecuniary rewards paid for gallant services since 1824, £103,000; besides gifts of 97 gold and 1,015 silver medals. The payments for last year amounted to £64,848; of which £26,434 were expended on lifeboats, lifeboat carriages and boat-houses, £21,526 on stores, etc., and £11,554 on wages, rewards, and special grants. During the past thirty-five years the self-righting boats have been launched more than 6,300 times on service, and have saved upwards of 13,000 lives. The boats have been capsized altogether 44 times while out on service, but only on 20 of those occasions was there any loss of life. The number of lives lost (counting 27 men who perished on the occasion of disasters which befell the Southport and St. Anne's lifeboats on 9th Dec., 1886) amounts to 93, including 14 shipwrecked persons. The 79 lifeboat-men lost represent about 1 in 913 of the men employed in the boats on service; and the upsettings were at the rate of 1 in each of the 126 service launches. The sum required to provide and endow a boat is £3,000. See, Mr. Charles Dibdin, 14, John Street, Adelphi, W.C.

Life Leases, Conversion of. See **SESSION**, sect. 186.

Light Gold Bill. See **SESSION**, sect. 64.

Light Railways (Ireland) Act, '89. See **SESSION**, sect. 83.

Li Hung-Chang, General, one of the most intelligent and enlightened Chinese of the present age, was b. 1823, in the province of Anu-Huei. Became Imperial Secretary ('50). Commanded the royal troops against the rebels, whom he defeated ('63 and '67). Governor of the **Thiang-Sin** Province, and afterwards created **Viceroy of the United Countries** ('65); Minister Plenipotentiary ('66); Viceroy of Hong Kuang ('70); Grand Chancellor ('68). In '70 he was disgraced for not having suppressed a rebellion, but was ('73) restored to his former honours and position. Li Hung Chang is known as a friend

to foreigners and to European culture and industry, and obtained much distinction for his successful negotiations with the United States on the occasion of the murder of Mr. Margery.

Lilly, William Samuel, b. at Fifehead, Dorsetshire, 1840. Ed. at St. Peter's Coll., Camb. Senior Scholar and Classical prizeman, and graduated in Law Tripos, '68; and entered Indian Civil Service by open competition. Was Under Sec. to Government, '69. Called to English Bar, '70. Sec. to Catholic Union of Great Britain, '74. He has published "Ancient Religion and Modern Thought," '84, and "Chapters in European History," '86, and, in '89, "A Century of Revolution," besides contributions to reviews.

Limitations, Statutes of. These statutes limit the time within which a man may seek redress for an injury he has sustained. Lapse of time will not protect any one who has ever committed a crime from being prosecuted for it. Redress from a trustee for a breach of trust may always be had, however long the interval since its commission. But with this exception the remedy for any civil injury may be barred by lapse of time. An action of debt or covenant, if founded on a deed, must be brought within 20 years of breach; if founded on any less formal agreement, within 6 years of breach. An action to recover land must be brought within 12 years after the right to bring it first accrued. Should the right have accrued to a person under disability, as an infant or lunatic, an action may be brought within 12 years of its accruing, or within 6 years of the disability ending, or the disabled person dying, but in no case of disability are more than 30 years to be allowed altogether. The above term of 12 years applies also to an action brought by a mortgagor to recover possession of his land, and to an action brought to recover money charged upon land by mortgage or otherwise. Only such arrears of rent as have accrued within 6 years before bringing an action for them can be recovered. Actions of trespass to goods, of assault, battery, wounding or imprisonment, must be brought within 4 years of the time when the injury was committed; actions for slander being limited to 2 years. Actions on penal statutes, if brought by the party aggrieved, are limited to 2 years; if brought by a common informer, are limited to 1 year. The lapse of 60 years bars actions for the recovery of real property, when brought by the Crown against a subject. The remedy in all the above cases may be lost by the lapse of time, but the right survives and may sometimes be made available in other ways than by action. Formal acknowledgment of a right by the person to whom it is adverse will render of no effect any lapse of time which has taken place, but time will run afresh from the acknowledgment. The law upon this subject is very complex and difficult. Consult **Banning** on the "Limitation of Actions."

Lincoln, Rt. Rev. Edward King, Lord Bishop of. The see was known formerly as Lindisae, then Leicester, then Dorchester, when in 1067 it became the diocese of Lincoln. The old see dates from 680. The present income is £400. His lordship, the son of the late Ven. Archdeacon King, and the 106th bishop of the total succession, was b. 1829. Educated at Oriel Coll. Oxon., where he graduated B.A. ('51), M.A. ('55), and D.D. ('73); was ordained deacon ('54), and priest ('55) by

the Bishop of Oxford, and consecrated Lord Bishop of Lincoln April 25th, '85. Formerly Dr. King was curate of Wheatley, Oxfordshire ('54-'58); chaplain and assistant lecturer at Cuddesdon College ('58), being made Principal ('63). Ten years later he became *Canon of Christ Church* and *Regius Professor of Pastoral Theology at Oxford*. From this position he was promoted to the episcopate. His lordship is also Provincial Chancellor of Canterbury, and Visitor of King's Coll., Cambridge, of Brasenose Coll. and Lincoln Coll., Oxford, and of Eton College. Dr. K., who is an enthusiastic High Churchman, is known as an author by his sermons "Ezra and Nehemiah," "Addresses to Men and other Sermons" ('78); "Meditations on the Last Seven Words" ('76); "Church Treasures" ('74). Besides other sermons, his lordship has prefaced one or two works, and edited a devotional book, "The Communicant's Manual" ('69), a second edition of which appeared in '71. In '88 proceedings were instituted against Dr. K. by the Church Association (*q.v.*) for alleged illegal ritualistic practices, and on Feb. 14th, '89, his trial was commenced at Lambeth Palace. He read a protest against the Primate's jurisdiction, and the court adjourned till March 12th, when the arguments were heard. On May 11th the Archbishop gave judgment to the effect that he had jurisdiction in the case, and the court adjourned to enable counsel to advise the Bishop. His lordship's subsequent contention that being a bishop he was not a minister was overruled by the court (see ECCLESIASTICAL LAW, '89). At the Diocesan Conference (Oct.) Bishop King delivered an address on ritual and loyalty to the Church.

Lincoln, Robert Todd, United States Minister to the Court of St. James, appointed ('89) by Pres. Harrison, was b. at Springfield, Illinois, '43, and is the only surviving son of the late President Abraham Lincoln. Graduated at Harvard University '64, and entered the Law School of that University. Applied for military service, and on the advice of his father joined the Staff of General U. S. Grant as a volunteer aide-de-camp. By the desire of General Grant he obtained a regular captain's commission and entered the army. Throughout the final campaign of the Civil War he served with zeal and efficiency, and, at its close, resumed the study of law and was admitted to the bar of Illinois. After practising with success in Chicago for some years, and refusing all temptations to enter public life, he was at length, during the administration of President Garfield, persuaded to accept office, and entered the Cabinet as *Secretary of State for War*. He retained his portfolio on the accession of Mr. Arthur to the Presidential Chair at the death of General Garfield, and held it till the end of the administration. At that time he was prominently spoken of as a presidential candidate, but as Mr. Arthur was himself intending to stand, Mr. Lincoln refused to allow his name to be presented. The appointment of Mr. Lincoln as United States Minister to St. James's was hailed with great pleasure by both the great political parties of America. Mr. L. is universally regarded as an able administrator, and possessed of a strong, positive, decisive character. He is married, and has two sons and a daughter.

Lincolnshire Handicap. See TURF.

Lindley, The Rt. Hon. Sir Nathaniel, eldest son of the late Dr. John Lindley, F.R.S., Professor of Botany at University College, Oxford, was b. 1828. Educated at University College, London. Called to the bar at the Middle Temple ('50). He practised with such success that he became Q.C. ('72). Appointed a Judge of the Court of Common Pleas ('75), became one of the Lords Justices of Appeal and a member of the Privy Council ('81). Lord Justice Lindley is well known in legal circles as the author of an "Introduction to the Study of Jurisprudence," and "A Treatise on the Law of Partnership and Companies."

Linotype. The. Considerable interest was excited in the printing trade of the Metropolis in the course of the summer by the exhibition of one of the most remarkable machines ever invented in connection with the art of printing. The machine is the invention of Mr. Ottmar Mergenthaler, of Baltimore, from whom the patents were bought by a syndicate. It has been introduced to a considerable extent in America, and the object of exhibiting it in London was to bring it under the notice of English newspaper proprietors and book publishers. The machine is named the "Linotype," and its object is to compose book and newspaper matter without the use of movable type. In a series of tubes conveniently placed are a store of small disconnected matrices of brass, and by the aid of a keyboard the operator brings these together into a line of any given length. The matrices form the bottom of a mould type high, and into this by an automatic arrangement molten type-metal is poured, and thus a line of the book or newspaper is produced. As soon as this operation is completed, the matrices are automatically returned to their tubes ready for use in the formation of succeeding lines. The casting is executed very exactly, and as each line, consisting of a single piece of metal, is produced, it is trimmed by a series of self-acting knife-blades and deposited in proper order on a galley. The machine, as may be supposed, is of a rather complex character; but in operation it is exceedingly simple, and the working of it is readily learned by a person of ordinary intelligence. It is capable when operated by a trained workman of producing as much work as half a dozen manual type-setters. Mistakes are less likely to occur, and distribution is got rid of entirely; while the newspaper is daily printed from what is practically new type. Each machine weighs about a ton and a half, occupies a space of 6 ft. by 4 ft. 6 in., and may be driven by a gas engine consuming half a dozen feet per hour.

Linton, Mrs. E. Lynn, daughter of the late Rev. J. Lynn, was b. at Keswick 1822. Is a well-known essayist and writer of fiction, and at one time was a constant contributor to the *Saturday Review*. The authorship of the famous article on "The Girl of the Period" was attributed to Mrs. Linton. Her letters *versus* the *Woman's Rights* agitation are characterised by that vigorous style for which she is so justly celebrated. Among the best known of Mrs. Linton's works are "Grasp your Nettle"; "Sowing the Wind"; "Patricia Kemball"; "The Rebel of the Family"; "The True Story of Joshua Davidson"; "Christopher Kirkland"; "Easton Carew, Millionaire and Miser"; and "Through the Long Night." Her husband is the well-known engraver and author, Mr. W. J. Linton, to whom she was married in '56. In a long letter to the

Question." She contributed (89) articles to several magazines, including one on "The Ethics of Friendship" in the *Universal Review*. **Liquor Traffic in India and Africa.** See *Session*, sect. 38.

Literary Men Deceased (Dec. 1st, '88, to Nov. 31st, '89). See OBITUARY.

"**Literary World**" (weekly). Founded Feb. 14th, '68. First editor, the late James Clarke. The *L. W.* supplies a weekly survey of the best new books, combining choice extracts with critical reviews. It aims to be a faithful reflector of the best books in all departments of literature. Its "Queries and Answers" on literary subjects constitute a special feature. **Editor:** Mr. J. G. Clarke, M.A. **Office:** 13 and 14, Fleet Street, E.C.

Literature, '89. "Of making many books there is no end," and the literary record of '89 was not inferior, in respect either of quality or quantity, to that of the preceding year. Probably the place of honour must be assigned to Mr. Bryce's great work on "*The American Commonwealth*," which, although published in last December, to all intents and purposes ranked with the productions of the year under review. The leading periodicals succeeded, to a somewhat unusual extent, in exciting widespread interest and curiosity. It will be useful to particularise a few of the more remarkable instances. The February number of the *Contemporary Review*, for example, contained a scathing indictment of Prince Bismarck's policy, aims, and methods, in an article entitled "The Bismarckian Dynasty." For several weeks the question of the authorship was hotly debated. The paper was attributed to Mr. Stead, Professor Bunsen, Madame de Novikoff, Mrs. Crawford, and even to Sir Morell Mackenzie; while many affected to believe that it was a joint production. But the secret was well kept, and to this day the mystery has not been penetrated. Once more the *Contemporary Review*, in its October number, attracted general attention by its article on "*The Triple Alliance*," in which Italy was taken to task for its unwisdom in allying itself with the two other contracting Powers, and thereby running the serious risk of economical ruin. In this instance Mr. Gladstone was almost universally identified with the authorship of the essay. But whoever was the writer, his strictures were severe enough to elicit an elaborate reply from Signor Crispi (q.v.), at Palermo, on Oct. 14th. Perhaps one of the most brilliant performances of the year, however, was Mr. Oscar Wilde's article on "*The Decay of Lying*," which appeared in the January number of the *Nineteenth Century*. For splendid audacity and wit this is certainly Mr. Wilde's masterpiece. In the March number of the same periodical Mrs. Humphry Ward published a dialogue, entitled "*The New Reformation*," in which she answered certain of the criticisms of her famous novel, "Robert Elsmere." A controversy on the well-worn subject of "Agnosticism" also "ragged" in the pages of Mr. Knowles's magazine between Professor Huxley and the Rev. Dr. Wace, and the varying fortunes of the combatants were followed with keen zest by thousands of readers. From these instances it will be seen that the fugitive literature of the year was extraordinarily varied and attractive. In June Professor

Henry Morley retired from the chair of English Literature in University College, London, which he had filled for several years. This interesting event may fitly be chronicled here. In withdrawing from active teaching, it is fortunate that Professor Morley's services will not be lost, for he will still continue to "howk" in the deep mine of English literature, and will not utterly abandon the platform.

BIOGRAPHY.—In this department of literature many books were published of a high standard of merit. Mr. P. W. Clayden completed his study of the poet-banker in a work showing much industry and care, entitled *Rogers and his Contemporaries* (Smith, Elder). Out of the fulness of his knowledge Professor Knight produced what will probably be accepted as the authoritative *Life of Wordsworth* (Pater-son). The diligent Professor also found time to edit *Wordsworthiana* (Macmillan), which comprised a valuable selection from the papers read to the Wordsworth Society. Mr. Charles S. Miall's *Life of Henry Richard, M.P.* (Cassell) was a sterling piece of work, in the preparation of which he had the co-operation of Mrs. Richard, so that this may be regarded as the standard biography of the steadfast preacher of Peace. In *The Diary and Letters of Gouverneur Morris*, edited by Anne Carey Morris (Kegan Paul), there is much matter possessing literary qualities of altogether unusual excellence. Mr. J. C. Jeaffreson displayed all his customary powers of research in his *The Queen of Naples and Lord Nelson* (Hurst & Blackett). Mr. D. G. Ritchie edited a collection of *Early Letters of Jane Welsh Carlyle* (Sonnenschein) that were very welcome to every admirer of that gifted woman. Her equally gifted husband, too, contributed, through the medium of Professor Charles Eliot Norton, to the literary pleasures of the year, although the title of the volume, *Letters of Thomas Carlyle, 1836-38* (Macmillan), seems to suggest that we have not heard by any means the last of the epistolary performances of the seer of Chelsea. Mr. Barry O'Brien did timely, if tardy, justice to one of the ablest and most sympathetic Under-Secretaries of Ireland, in his *Life and Letters of Thomas Drummond* (Kegan Paul). The death of Father Damien in the leper settlement in the South Seas—deeply lamented, though inevitable—lent special interest to the record of his heroism which was written by Mr. Edward Clifford, *Father Damien: a Journey from Cashmere to his Home in Hawaii* (Macmillan). Dante Gabriel Rossetti as Designer and Writer (Cassell) was a painstaking memoir by his brother, W. M. Rossetti, one of the most competent men to perform the task adequately. Full of varied excellence was *The Correspondence of John Lothrop Motley* (Murray), edited by G. W. Curtis. Mention must be made of Mr. H. S. Salt's *The Life of James Thomson* ("E.V."), with a Selection from his Letters and a Study of his Writings (Reeves & Turner), as a serviceable introduction to the powerful poetry of a writer of remarkable genius. Messrs. Macmillan's two admirable series of "English Statesmen" and "English Men of Action" will form very desirable companions to the older series of "English Men of Letters." The "English Statesmen" series was begun last year, and the most learned addition made to it in '89 was the *Henry the Seventh* of Mr. James Gairdner, though the volume which attracted most attention was Mr. John Morley's masterly monograph

on Sir Robert Walpole. As to the "English Men of Action" series, it is perhaps invidious to particularise; but some of the volumes call for special mention, such as Sir William Butler's spirited account of General Gordon, Mr. George Hooper's thorough study of Wellington, Mr. Clark Russell's appreciative volume on William Dampier, and Mr. H. D. Traill's *Stafford*, distinguished by its literary finish. On the other hand, Mr. Thomas Hughes's *David Livingstone* was a disappointing rendering of an excellent subject, and the Rev. A. J. Church's book on *Henry the Fifth*, despite its good points, was scarcely the ideal presentation of the warrior statesman. Mr. G. A. Aitken is entitled to the credit of having produced, on the whole, the best Life of Richard Steele (*Jobister*). Mr. Wilfrid Ward had a subject quite after his own heart in William George Ward and the Oxford Movement (*Macmillan*), and he did it amply, but not more than amply, justice. In the "Statesmen" series, which Mr. Lloyd C. Sanders is ably editing for Messrs. Allen & Co., there appeared a capital memoir of The Marquis of Dalhousie, from the practised pen of Captain L. J. Trotter. The biographical sketch of Delia Bacon (*Simpson Low*) was characterised by passages of pathetic interest. In all likelihood the work most calculated to hold a permanent position amongst the biographical books of the year was *The Letters and Literary Remains of Edward Fitzgerald*, edited by W. Aldis Wright, M.A. (*Macmillan*). Soon after the publication of these volumes, there appeared in the issue of the *Athenaeum* for July 13th some vitriolic verses, addressed by Robert Browning to Edward Fitzgerald. An incidental allusion to Mrs. Barrett Browning, which Mr. Aldis Wright had inadvertently omitted to expunge, occasioned Mr. Browning's angry lines. Mr. Aldis Wright immediately apologised for his unfortunate oversight, and the offending passage will be suppressed in future editions of the Fitzgerald "Letters." Towards the end of '89 there appeared one of the most notable biographical works published during the year. This was the *Life of Lord John Russell (Longmans)* by Mr. Spencer Walpole, who was probably the most competent man for the task, and who discharged his duty with conspicuous ability. The autobiography of Mary Howitt, edited by her daughter, Margaret Howitt (*Jobister*), may be commended as an exceedingly pleasant book, though it contains, not unnaturally, much about William Howitt as well. Edgar Pemberton must be admitted to have produced the most entertaining book of the year in his *Memoir of Edward Askew Sothern (Bentley)*, the prince of practical jokers. In *The Life and Letters of Mary Wollstonecraft Shelley (Bentley)*, carefully edited by Mrs. Julian Marshall, justice was done to the memory of Shelley's widow. Though in no way intended to supersede Mr. Torrens's biography, *Lord Melbourne's Papers (Longmans)*, edited with great judgment by Mr. Lloyd C. Sanders, and with a preface by Lord Cowper, may be usefully consulted by the historical student.

FICION.—By the deaths of Mr. Wilkie Collins and Miss Amy Levy—the former at the close of a comparatively long and honoured career, the latter on the very threshold of a career of which the highest hopes had been formed—two gaps have been created in the ranks of novelists that cannot, of necessity, be easily filled. Mr.

Collins, indeed, so far as the weaving of intricate plots is concerned, had not his equal among his British contemporaries, and one had to go to Gaboriau for his compeer. Miss Levy, whose melancholy death all must deplore, evinced talent of an entirely different order; but her qualities were rare and choice, as her sketch entitled *Reuben Sachs (Macmillan)* amply proved. Miss Edna Lyall, whose recovery from serious illness was the subject of general felicitation, showed her fine skill and honest workmanship in *Derriok Vaughan, Novelist (Methuen)* and *A Hardy Norseman (Hurst & Blackett)*. Once more Mr. D. Christie Murray and Mr. H. Herman collaborated in *Wild Darrell (Longmans)* and *A Dangerous Catapaw (Longmans)*. Certainly Mr. Stevenson must have had the utmost cause for satisfaction at the reception which his *The Master of Ballantrae (Cassell)* met with from the critics, who were almost unanimous in declaring it to be his best work in fiction. The Rev. S. Baring-Gould's *The Pennycomequicks (Blakett & Hallam)* did not reach that high standard which he has himself taught us to expect in all work proceeding from his pen. On the other hand, Mr. W. E. Norris displayed excellent power in his *Miss Shatto (Bentley)*. Noticeable for its very comic negro humour may be mentioned Mr. Frank R. Stockton's *Amos Kilbright, and Other Stories (Fisher Unwin)*. Mr. Julian Coibett's *Kopetua the Thirteenth (Macmillan)* met with deserved success. It goes without saying that Mr. Grant Allen exhibited his wonted power in *The Tents of Shem (Chatto & Windus)*. Miss Yonge was at her best in *A Reputed Changeling (Macmillan)*. *Little Hand and Muckle Gold: a Study of To-day (Blackwood)*, by X. L., was meritorious. Mrs. Comyns-Carr revealed considerable facility in *Margaret Maliphant (Blackwood)*. Charles Gibbon—an old favourite—still possessed all his cunning, as his *Blood-Money and Other Stories (Chatto & Windus)* testified. Mr. Walter Besant went to the rebellion led by the hapless Monmouth for his splendid *For Faith and Freedom (Chatto & Windus)*. He was also seen at great advantage in *The Bell of St. Paul's (Chatto & Windus)*, and he published, besides, a volume of shorter stories, *To Call Her Mine (Chatto & Windus)*. Mrs. Oliphant is a standing proof that thoroughness and diligence are not incompatible. Her industry was seen in no less than three works, all worthy of her reputation—*Neighbours on the Green (Macmillan)*, *Lady Oar: the Sequel of a Life (Longmans)*, and *A Poor Gentleman (Hurst & Blackett)*. The appearance of Mr. Froude among the novelists was one of the sensations of the year as the author of *The Two Chiefs of Dunboy*, or an Irish Romance of the Last Century (*Longmans*). Mr. William Black's *The Penance of John Logan (Simpson Low)*, like all his works, was "very good." Miss Beatrice Whitby's reputation will grow apace should her future work be equal to *The Awakening of Mary Fenwick (Hurst & Blackett)*. If Maxwell Gray's *The Approach of Anseley (Kegan Paul)* will not rank with her "Silence of Dean Maitland," it is not because the former is not admirable, but because the latter was superlative. Mr. Frank Barrett is coming rapidly to the front, and he has done nothing better so far than his *Under a Strange Mask (Cassell)* and *Fettered for Life (Chatto & Windus)*. Mrs. Molesworth, whose books for children have a world-wide fame, catered with her usual skill and pleasantness, for

children of an older growth, in her *Neighbours (Hatchards)*. Such is *Life (Longmans)*, by May Kendall, created a most favourable impression. The anonymous author of *A Chronicle of Two Months (Bentley)* made such an excellent *début*, that her next novel will be eagerly waited for. In *Marooned (Macmillan)* Mr. Clark Russell displayed all his well-known powers. Versatile as ever, Mr. G. Manville Fenn was ably represented by his *The Lass that Loved a Soldier and Of High Descent (Ward & Downey)*. Ouida's *Guilderey (Chatto & Windus)* gratified her numerous admirers. Mr. James Baker showed to distinct advantage in his *By the Western Sea: a Summer Idyll (Longmans)*, which is, in some respects, the best piece of work he has yet done. Mr. Rider Haggard's wonderful gift of story-telling was amply proved in his *Oleopatza (Longmans)*, which is, no doubt, also the most ambitious work that he has hitherto attempted. Everybody who pondered over the *Daily Telegraph's* conundrum, "Is Marriage a failure?" which arose out of Mrs. Mona Caird's powerful paper in the *Westminster Review*, turned with avidity to her novel *The Wing of Arael (Tubner)*, only to find that the subject was not worked out in it, but that the story was vivid and interesting. Those who have followed Mr. J. M. Barrie's literary career cannot have been surprised to see him pass onwards from success to success. His *A Window in Thrums (Hodder & Stoughton)* fully justified the general chorus of approval with which it was hailed. Few novelists have met with so speedy and so well-founded a recognition of their merits as Dr. Conan Doyle did with his *Micah Clarke (Longmans)*. There was considerable charm in Mr. Julian Sturgis's *Comedy of a Country House (Murray)*. Sustained power distinguished Mr. F. Marion Crawford's *Sant' Ilario (Macmillan)*. Miss Braddon's right hand has lost none of its cunning, as *The Day Will Come (Simpkin)* abundantly evidenced. "Q"—by the way, this *lettre de plume* might as well be discarded, since it no longer serves the purpose of covering the identity of Mr. A. T. Quiller Couch—essayed an incursion into the domains of history in his last novel, *The Splendid Spur (Cassell)*, and produced a work of unusual interest, written with much felicity of diction. Hitherto best known as a writer of boys' books, Mr. G. A. Henty successfully catered for parents in his *The Curse of Carne's Hold (Blackett & Hallam)*. Quite a phenomenal success rewarded the brilliant enterprise of Messrs. Macmillan in publishing a Sixpenny Edition of Charles Kingsley's novels in excellent type on excellent paper. Of *Westward Ho*, with which the series opened, no fewer than 300,000 copies are said to have been sold.

HISTORY.—Mr. C. A. Fyffe has at length completed his scholarly and attractive *History of Modern Europe (Cassell)*, in which the record is brought down to 1878. The work is remarkable for its well-balanced tone, neither pedantry nor partisanship disfiguring its pages. The second volume was added, dealing with the years 1644-7, to Mr. S. R. Gardiner's *History of the Great Civil War (Longmans)*, in which the painstaking care and research that characterised its predecessor were again made manifest. Parts of antiquarian and partly of topographical as well as of historical interest, were two works of great merit—namely, *In and About Ancient Ipswich (Jarrold)*, by Dr. J. E. Taylor, and Mr. Walter Rye's *Cromer,*

Past and Present (Jarrold), the profits of the latter being reserved for the fund now being raised to restore the parish church of the popular seaside resort. Here, too, more appropriately than elsewhere, may be mentioned Archdeacon Farrar's *Lives of the Fathers: Sketches of Church History in Biography (A. & C. Black)*, an erudite and eloquent work that cannot fail to enhance its author's reputation as a scholar and a theologian. The English translation, by Mr. C. B. Pitman, of another instalment of M. Renan's masterly *History of the People of Israel (Chapman & Hall)* appeared during the year, the narrative being brought down from the reign of David to the capture of Samaria. Mr. Edmund Gosse handled, with singular discrimination and ability, the *History of Eighteenth Century Literature, 1680-1780 (Macmillan)*. Mr. W. S. Lilly discussed, with wonted skill and vigour and some amount of prejudice, *A Century of Revolution (Chapman & Hall)*. Considering how much the late Dr. William Chambers did for the restoration of the fine old cathedral-church, it was fitting that Messrs. W. & R. Chambers should publish, and that the Rev. Dr. Cameron Lees should write, the authoritative history of *St. Giles's, Edinburgh: Church, College, and Cathedral. In the Viking Age (Murray)*. M. Paul du Chailu laboured, with a wealth of illustration and rare industry, not only to describe the Age itself, but to prove that the English folk are in the main of Norse rather than of Saxon stock.

MISCELLANEOUS.—Whatever Mr. James Bryce, M.P., undertakes to do is sure to be characterised by scholarship, ripe judgment, and thoroughness. The grand work on *The American Commonwealth (Macmillan)* published last year, but subsequent to the issue of "HAZELL'S ANNUAL" for '89, occupied twenty years in its preparation, necessitating several visits to the States, and an extraordinary degree of research. On the whole, it may be fittingly described as the work, *par excellence*, of the year under review. It comprised six Parts, respectively dealing, in a comprehensive, masterly, and exhaustive manner, with (1) the National Government; (2) the State Governments; (3) the Party System; (4) Public Opinion; (5) Illustrations and Reflections; (6) Social Institutions. Under the title of *Christianity East and West: an Ecclesiastical Pilgrimage (Hodder & Stoughton)*, the Rev. Thomas Grieve Clark produced a really remarkable book, the true worth and character of which are not properly indicated by the title. At a season of storm and stress Mr. Clark found it necessary to interrupt his theological studies and take a prolonged tour through Europe. He carefully studied not only the creeds and ritual of each country in which he sojourned, but the manners and customs of the people also; and the whole of his experience is set forth in this very suggestive volume, which is distinguished by welcome toleration, quiet humour, and much thoughtfulness, besides being written in a picturesque and graphic style, full of literary strength. Mr. Alfred Ewen Fletcher may be felicitated on having edited a *Cyclopædia of Education (Sonnenschein)* of quite superlative excellence, in which he had the valuable assistance of several practised educationists; Principal Donaldson, Rev. E. F. MacCarthy, Professor Sully, Oscar Browning, Professor Murison, Arthur Sidgwick, and Dr. Wormell

being amongst their number. **Traders' Tokens** (*Stock*), forming the standard work on the illegal coinage of the 17th century, edited by Mr. G. C. Williamson, contained much historical, genealogical, and heraldic information of high value. The previous edition of this book is very rare, and of the present edition only 250 copies were issued. The *Daily News* was responsible for three of the most charming books in the year, since in its columns there first appeared Mr. Andrew Lang's **Lost Leaders** (*Kegan Paul*), and Mr. F. A. Knight's **By Leafy Ways: Brief Studies in the Book of Nature**; and **Idylls of the Field** (*Stock*). Dr. Charles Creighton, the writer of the article "Vaccination" in the *Encyclopædia Britannica*, presented a strong statement of the case against the practice in his **Jenner and Vaccination** (*Sonnenschein*). Social reform still holds the field as the question of the day. Among several works dealing with various aspects of the subject, there may be named Mr. and Mrs. Barnett's **Practicable Socialism** (*Longmans*), Mr. E. Belfort Bax's scholarly book on the **Religion and Ethos of Socialism** (*Sonnenschein*), and Sir Lyon Playfair's **Subjects of Social Welfare** (*Cassell*). Mr. J. C. Dibdin's **The Annals of the Edinburgh Stage** (*Simpkin*) showed that the stage in Edinburgh has a history and traditions of its own that cannot be surpassed in any other town in the world. Painfully interesting was Mr. H. H. Johnston's **History of a Slave** (*Kegan Paul*), with its numerous admirable illustrations by the author. Sir Charles Russell's great speech on behalf of the Irish folk was published in volume form under the title of **The Farnell Commission: The Opening Speech for the Defence** (*Macmillan*). Professor Blackie's breezy, cheery book on **Scottish Song** (*Blackwood*) excellently exemplified the *perfidivum ingenium* of its gifted author. Mr. Alfred Russel Wallace, the eminent naturalist, gained fresh renown by his **Darwinism: an Exposition of the Theory of Natural Selection, with some of its Applications** (*Macmillan*), which attracted much attention in scientific circles from its masterly treatment of the subject. The second Part of Sir John Lubbock's **The Pleasures of Life** (*Macmillan*) afforded as widespread enjoyment as the first Part did. Thoughtful and able to a degree was Mr. D. Nicol's **The Political Life of Our Time** (*Chapman & Hall*), even where his conclusions may be dissented from. Mr. Hamerton's **French and English** (*Macmillan*) proved to be in every respect worthy of his reputation. **The Swiss Confederation** (*Macmillan*), by the late Sir F. O. Adams and C. D. Cunningham, must rank as the classical work on the subject. That the natural features of the Australian continent are beginning to make their charms felt was proved by Mr. Samuel Cook's enthusiastic account of **The Jenolan Caves: an Excursion in Australian Wonderland** (*Eyre & Spottiswoode*). Mr. William Morris achieved the proud distinction of turning out one of the very few books of the year that will take a permanent place by reason of its high literary qualities. This was **A Tale of the House of the Wolfings and all the Kindreds of the Mark** (*Reeves & Turner*). Able and original was Mr. W. C. Brownell's **French Traits** (*Wells*). The appearance may be chronicled of Bishop Lightfoot's **Essays on the Work** entitled "Supernatural Religion" (*Macmillan*) and of the **Reply to Dr. Lightfoot's Essays** (*Longmans*)

by the author of "Supernatural Religion." Sir Robert Stawell Ball's delightful **Star-Land: being Talks with Young People about the Wonders of the Heavens** (*Cassell*) appeared in the nick of time. The late Sir Henry Maine's series of lectures delivered before the University of Cambridge on **International Law** (*Murray*) will become a standard work. In **Cap and Gown: three Centuries of Cambridge Wit** (*Kegan Paul*), edited, with Introduction and Notes, by Charles Whibley, B.A., did not give one a very lofty idea of the wit of the Dons and undergrads. at Cambridge. But that was not Mr. Whibley's fault, the collection saying a great deal both for his editorial skill and for his industry. The Marchioness of Dufferin and Ava gave a graceful and interesting account of **Our Viceregal Life in India** (*Murray*). Of the later school of critics there is no one so competent to speak on art matters as Mr. W. E. Henley, and the text of **A Century of Artists** (*MacLehose*) is more valuable in a sense than the plates by which it is illustrated, the volume being intended as a memorial of the art treasures which the Glasgow Exhibition of '88 brought together.

POETRY.—Far and away the best book of the year in this department was Mr. W. J. Linton's **Poems and Translations** (*Ninnes*), many of whose pieces will, surely, live. Mr. Wilfrid Scawen Blunt turned his imprisonment to some account, as the fine sonnets in his **In Vinculis** (*Kegan Paul*) plainly show. In **Nights and Days** (*Macmillan*) Mr. Arthur Symonds won great distinction. Though not a poet of the first rank, Mr. Alfred Austin never does inferior work, as his **Love's Widowhood and Other Poems** (*Macmillan*) testified. Miss E. Nesbit may be heartily felicitated on the success that attended her **Leaves of Life** (*Longmans*). She has been favourably known for several years by her fugitive pieces, but, if we err not, this is the first occasion on which she challenged criticism to her collected writings. **The Ascent of Man and Other Poems** (*Chatto & Windus*), by Miss Mathilde Blind, evinced remarkable power, and was a very notable poetry book of the year. That Mr. J. Crawford Wilson possesses to a very considerable degree the gifts of imagination and melody, was shown by his **Pastorals and Poems** (*Kegan Paul*), dedicated, by the way, to the members of the Whitefriars Club, of which he was the founder. A pathetic interest attaches to the late William Allingham's collection of some of his scattered poems issued in volume form under the title of **Flower Pieces and Other Poems** (*Reeves & Turner*). Michael Field seems, despite her masculine name, to be a poetess, and her **Long Ago** (*Bell*) proved that she had a full share of the divine afflatus. Gerald Massey's **My Lyrical Life** (*Kegan Paul*) contained more old poems than new, but everybody must be grateful to this true singer and people's poet for affording them an opportunity of procuring a good selection of his choicest work in a convenient form. **Sorsum Corda** (*Kegan Paul*), by G. F. E. Scott, amply justified the high praise lavished on the author's previous work, "Theodora," and showed true poetic feeling. Mrs. Woods' **Lyrical and Ballads** (*Bentley*) were real gems. On the whole it must be said that Professor Veitch's **Merlin and Other Poems** (*Blackwood*) were literary efforts rather than the spontaneous effusions that we associate with the word "poet" or "maker." The late

Mr. Thomas Tod Stoddart's *Angling Songs* (*Blackwood*) certainly deserved to be collected, and Miss Anna M. Stoddart's pleasant memoir of her father made the volume additionally acceptable. Mr. W. Winter's *Wanderers* (*Douglas*) was a first-rate example of polished poetry. Unusual excellence was displayed in *Sketches from Nature* (*Pickering & Challo*) by J. S. Spencer, *Blooms and Brambles* (*Stuck*) by Edgar Fawcett, and particularly in *Venetia Victorix* (*Macmillan*) by Caroline Fitzgerald. *Songs of the Great Dominion* (*Scott*), ably and judiciously selected and edited by Mr. W. D. Lighthall, introduced the bulk of British readers, for the first time, to the really extraordinary merits of the singers of Canada. Ballad lovers will be glad to note that the *Boxburgh Ballads* (*Ballad Society*), the editing of which has been a labour of love to the Rev. J. W. Ebsworth, are approaching completion. Part 19, ending volume vi., appeared during '89; and with volume vii. the work will be finished.

SERIALS.—The public taste for series of books seems to be keener than ever. We have already mentioned Messrs. Macmillan's series of *English Men of Action*. In October Messrs. Smith, Elder & Co. issued the first volume of a pocket edition of *Mrs. Gaskell's Novels*, and in November the first volume of a new edition of *Mrs. Browning's Poetical Works*. Under the title of the *Carlsbrooke Library* Messrs. Routledge & Sons began the publication of a new series of the classical works of English literature, a volume being issued every two months. Swift's "Tale of a Tub" led the way, and it seems scarcely necessary to add that Prof. Henry Morley edits the series. Besides this Professor Morley produced with unflinching regularity his weekly volume for Messrs. Cassell & Co.'s famous *National Library*, in which he was able to include two copyright works—namely, Aubrey de Vere's "The Legends of St. Patrick," and Prof. Palgrave's "The Visions of England,"—both poets following the public-spirited example of Coventry Patmore and Thomas Woolner. The principal addition to the *Parliament Library* (*Kegan Paul*) during the year was Carlyle's "Sartor Resartus," a work peculiarly suited for appearance in this select series. During the year, too, the *International Scientific Series* (*Kegan Paul*) was enriched by Professor C. N. Starcke of Copenhagen's "The Primitive Family; its Origin and Development." Messrs. George Philip & Son began in October their series of *Great English Explorers and Explorations* with a "Life of John Davis" by Mr. Clements Markham, whose ponderous and learned pen, however, hardly fitted him to start a series intended to be popular. All the "old favourites" continued to appear at intervals, among others, Dr. Murray's vast *New English Dictionary* (*q.v.*) (*Clarendon Press*), Mr. Leslie Stephen's exhaustive *Dictionary of National Biography* (*q.v.*) (*Smith, Elder*), vols. iii. and iv. of *Chambers' Encyclopædia* (*q.v.*), most fair to look upon, Mr. Walter Scott's admirable sets of the *Camelot Classics*, *Canterbury Poets*, *Great Writers*. Mr. Scott also inaugurated a *Contemporary Science Series*, edited by Havelock Ellis, which led off with "Evolution of Sex," by Prof. Geddes and J. A. Thomson; and Messrs. Bell & Co. added six volumes to their *Recent Read Library*. Among the new issues were, of course, should also be noticed Blackie's and Ash's compendious *Modern Encyclopædia*. J. E. T.

(*q.v.*), three volumes of which were issued; and the *Century Dictionary* (*q.v.*), whose first volume appeared in October, the work of eminent American specialists. Particular mention must be made of Messrs. J. M. Dent & Co.'s *Temple Library*, with the dainty etchings of Herbert Railton and John Jellicoe; and the *Stott Library* must also be carefully noted, as well as the very elegant *Lotos Series* of Messrs. Trübner.

TRAVEL.—The literary gift does not always go hand in hand with opportunity for travel, and in '89, at least, the travel record was barren. A melancholy interest attached to the late Lady Brassey's *The Last Voyage, to India and Australia*, in the "Sunbeam" (*Longmans*), the narrative of the last part of the voyage being supplied by Lord Brassey. *Ohrist, or Confucius—which?* (*Snow*), by Rev. J. MacGowan, gave a vivid account of missionary work in Amoy, and contained a careful discussion of Amoy characteristics, which will be extremely valuable. Oliver Wardrop's *The Kingdom of Georgia* (*Sampson Low*) was a very fine work. In *The First Ascent of the Kasai* (*Philip*) Mr. C. S. L. Bateman gave some graphic records of service under the Lone Star. Mrs. Alec Tweedie's *A Girl's Ride in Iceland* (*Griffiths & Farren*) contained a lively description of that misnamed island. Mr. J. K. Werner published an interesting account of *A Visit to Stanley's Bear-Guard at Major Barttelot's Camp on the Aruhwimi* (*Blackwood*), the portion of the work devoted to river life on the Congo being especially well-timed. Of course so experienced a traveller as Mr. Joseph Thomson could not fail to make a great deal out of *Travels in the Atlas and Southern Morocco* (*Philip*). A book that bears the title of *Glimpses of Feverland* (*Sampson Low*) hardly required the second title of "A Cruise in West African Waters," unless Mr. A. P. Crouch knows of another fever quarter, *par excellence*. In *The Sportsman's Eden* (*Bentley*) Mr. Clive Philipps-Wolley gave a bright and useful account of Canada from the sportsman's standpoint. Mr. H. H. Romilly, fortunately favoured with an Introduction written by Mr. Andrew Lang, obtained a large clientele for his *From my Verandah in New Guinea: Sketches and Traditions* (*Nutt*). Something new still remained to be said about life by the shores of Victoria Nyanza, as readers of Mr. R. P. Ashe's *Two Kings of Uganda* (*Sampson Low*) discovered, agreeably to their surprise. The man with time and money for travel and adventure is one of the most fortunate of creatures. This was Mr. W. H. Seton-Karr's case, and his *Ten Years' Wild Sports in Foreign Lands* (*Chapman & Hall*), gave an excellent account of his experiences. Mr. W. H. Mallock described, with considerable literary skill, a winter's holiday in Cyprus, under the title of *In an Enchanted Island* (*Bentley*).

Liverpool. Rt. Rev. John Charles Ryle, D.D., 1st Bishop of (founded 1880), eldest son of the late John Ryle, Esq., M.P., of Macclesfield, b. '16. Was educated at Eton, and at Christ Church, Oxford; graduating ('36) Craven Scholar and first-class Classics. Rector of Helmingham ('44-61); vicar of Stradbroke ('61-80); appointed Bishop of Liverpool by Lord Beaconsfield ('80). Author of "Christian Leaders a Hundred Years Ago," "Expository Thoughts on the Gospels," in 7 vols., and other works. In '89 his lordship engaged in correspondence respecting ritualism.

Llandaff, Rt. Rev. Richard Lewis, Lord Bishop of. See founded in the sixth century. His lordship, the 93rd bishop, is the son of John Lewis, Esq., of Henllan, Narbeth, co. Pembroke, and was b. 1821. Educated at Bromsgrove School, and Worcester Coll., Oxford. Graduated D.D. by diploma '83, in which year he was consecrated Lord Bishop of Llandaff in St. Paul's Cathedral. The income of the see is £4,200. His lordship was formerly rector of Lampeter Velfry '51-83; Prebendary of Caerfechell and of Mydrim in St. David's Cathedral '67-75; Archdeacon of St. David's; and chaplain to the Bishop of St. David's '75-83. His lordship presided at the Church Congress (q.v.) '89, at Cardiff.

Lloyd, Edward, the famous tenor vocalist, was born in London 1845. When seven years old he entered Westminster Abbey choir. Afterwards he became solo tenor at the Chapel Royal, St. James's. Mr. L. was engaged in '67 at Novello's Concerts, and in ('71) at the Gloucester Festival, where he attracted much attention from his singing in Bach's "Passion." In '88 Mr. L. went on a tour in America, taking part in the Cincinnati Festival, where he obtained much applause. His singing in the Handel Festival ('88) also created a sensation. He was principal tenor at the Leeds Musical Festival, Oct. '89. Mr. L. will probably visit the States in '90.

"Lloyd's Clauses." These clauses are so important, and they are passing into such general use, particularly in London, Liverpool, and Glasgow, in contracts for marine insurance, that we give them, with the remark that although a bill of lading whose terms shall be absolute and unvarying is probably an impossible dream, the increasing adoption of Lloyd's clauses shows that this is not the case with contracts of marine insurance.—**F.P.A. Warranted free from particular average** unless the vessel or craft be stranded, sunk, or burnt, each craft or lighter being deemed a separate insurance. Underwriters, notwithstanding this warranty, to pay for any damage or loss caused by collision with any other ship or craft, also to pay any special charges for warehouse rent, re-shipping, or forwarding, for which they would otherwise be liable, and to pay the insurance value of any packages which may be totally lost in transshipment. Grounding in the Suez Canal not to be deemed a strand, but underwriters to pay any damage or loss which may be proved to have directly resulted therefrom. **G. A. General Average** and salvage charges payable according to foreign official adjustment, if so claimed, or per York-Antwerp Rules, if in accordance with the contract of affreightment. **F. O. and S. Warranted free of capture, seizure, and detention**, and the consequences thereof, or of any attempt thereat, piracy excepted, and also from all consequences of hostilities or warlike operations, whether before or after declaration of war. **Deviation.** In the event of the vessel making any deviation or change of voyage, it is mutually agreed that such deviation or change shall be held covered at a premium to be arranged, provided due notice be given by the assured, or receipt of advice of such deviation or change of voyage. **Continuation Clause (Ship or Ships Policies).** In the event of any shipment coming upon this policy, the value of which is in excess of the sum then remaining available, it is mutually agreed that the

underwriter shall grant a policy for such excess up to, but not beyond the amount of this policy, and the assured shall pay the premium thereon at the same rate. **Continuation Clause (Time Policies).** Should the vessel hereby insured be at sea on the expiration of this policy, it is agreed to hold her covered until arrival at port of destination at a premium to be arranged, provided due notice be given on or before the expiration of this policy. **No Thirds as applying to Iron Ships and Steamers.** No thirds to be deducted except as regards hemp, rigging, and ropes, sails, and wooden deck. **Lloyd's Warranties.** Warranted not to sail from the Baltic, White, or Black Seas, or British North America, between the 1st day of October and the 1st day of April, nor from the West Indies or Gulf of Mexico between the 1st day of August and the 15th day of January, nor to go to the Azores, nor to sail the Baltic before the 20th day of March or after the 10th day of September. **M. O. Warranted free from particular average** below the lead waterline, unless occasioned by fire or contact with some substance other than water.

"Lloyd's Weekly London Newspaper" founded Nov. 1842, is an exponent of advanced Liberal principles. It gives the latest telegrams and news, and contains much information of literary and general interest. **Douglas Jerrold**, who filled the editorial chair until his death, was succeeded by his son; while the present Editor is Mr. Thomas Catling. **Offices**, 12, Salisbury Square, Fleet Street, E.C.

Loanda. Capital of Angola (q.v.).
Loa River Viaduct. This interesting piece of engineering work, which forms a portion of the Antofagasta Railway in Bolivia, is believed to be the highest railway viaduct in the world. The cañon it spans is in the upper Andes at an altitude of 10,000 feet above sea level, of rugged sides; and, in fact, all the material used in building had to be lowered into the gorge. Foundations of masonry having been made, light iron piers, seven in number, were erected, and then the girders laid across. As before stated, all the material required had to be lowered into the cañon, and this was accomplished by stretching wire ropes across—a span of 800 feet—and hauling a carrying truck backwards and forwards, lowering the ironwork at given points. The dimensions are: length, 800 feet; height from water to rail level, 3364 feet; gauge of railway, 24 feet. The iron contract was secured by Horsley & Co., of Tipton, and they fitted the parts together before leaving England, with the result that with unskilled labour the erection was completed in nine months, and the line opened Feb. 16th, '89. The consulting engineer was Mr. E. Woods, past President I.C.E.

Local Government (England and Wales) Act, 1888, was introduced by Mr. Ritchie, President of the Local Government Board, on March 18th, '88, in an elaborate statement, of which, as the substance of the Act is set forth below, it is only necessary to give a few words. The bill proposed to establish a council for each county, three-fourths of the members of which would be elected, while the other fourth would be selected, to which councils were to be transferred the administrative power and financial business of the county justices, whose judicial functions would, however, be left untouched. The raising and management of the police in counties was to be placed in the hands

of a joint committee of the county council and quarter sessions, but the appointment, control, and dismissal of chief constables was reserved to the latter. It was proposed to create district ~~constables~~ *constables* in the county, to take the place of local boards and rural and urban sanitary authorities. There was, however, to be no alteration as to the areas of poor-law unions or the election of guardians. There were special provisions as to the Metropolis, but these were not put forward as a complete settlement of the great problem of the government of the Metropolis; and the Government had, Mr. Ritchie stated, their own proposals to make at some future time, on the line, not of creating separate municipalities throughout London, but of amalgamating throughout the different areas the existing local authorities, and of constituting the county council in connection with large and important district councils, possessing large and important administrative functions. In regard to the question of licensing, the authority to inquire into complaints against licensed houses was to remain with the justices, but that duty would be simply ministerial, and under direct instructions from the county council; each county was to be divided into licensing divisions, with a licensing committee for each, which would be empowered to refuse renewals and to require the closing of licensed houses on Sundays, Good Fridays, and Christmas Days. In cases where renewals were refused compensation was to be given, based on the difference in value between the house with and without a licence, this compensation to be in the first instance payable out of the county fund, but to be paid ultimately, unless in special cases the council should otherwise direct, by the licensing division in which the premises were situate. On the other hand, the councils were to be empowered to increase the licence duties by 20 per cent., which it was estimated would produce £300,000 a year. *Second reading* of the bill was agreed to on April 20th, after a debate in which Mr. Stansfeld remarked that the great blot on the Bill was the entire exclusion of the poor-law system, and the Government replied that the inclusion of so difficult and complicated a subject would have so overloaded the measure as to enormously increase the difficulties of passing it. An instruction, moved by Mr. F. Stevenson on the committee stage, for the insertion of provisions for the reform of pariah vestries, was negatived by 220 to 183. In committee an amendment of Mr. Stansfeld, proposing that all councillors should be elective, and that there should be no aldermen, was opposed by the Government, and negatived by 250 to 214. The words "county alderman" were substituted for the expression "selected councillor." Mr. Ritchie assented to a considerable extension of the list of boroughs dealt with as separate counties. On June 12th the right hon. gentleman announced that, having regard to the opposition with which the licensing clauses were threatened, and to the fact that there remained only about two months before the ordinary date for bringing the session to a close, the Government had decided not to ask the House to proceed with them. The proposals in reference to district councils were also withdrawn. An amendment of Mr. Heneage, vesting the control of the police in the county councils, was rejected by 264 to 218. Sir W. Barttelot proposed that the entire control of the police should remain, as heretofore, in the hands of the county

magistrates, but this being opposed by the Government, was rejected by 306 to 77. Mr. John Morley then moved to omit the words which left the appointment, control, and dismissal of chief constables in the hands of quarter sessions, and his motion was carried against the Government by 246 to 216. A promise that facilities should be afforded for the discussion of Mr. Stevenson's Sunday Closing Bill satisfied certain Liberal Unionists who had objected to the withdrawal of the Sunday Closing clause, and the committee decided to omit the clause by a majority of 275 to 213. Subsequently the clause empowering the councils to impose an extra licence duty of 20 per cent. was struck out by a majority of 199 to 137. An amendment by Mr. J. Rowlands, to the effect that there should be no selected councillors in the county of London, was rejected by 102 to 148. An amendment of Mr. J. Stuart, giving the London county council the same powers, duties, and liabilities with respect to the police as are vested in the watch committee of a borough under the Municipal Corporations Act '82, was opposed by the Government, and rejected by 220 to 150. An amendment of Mr. Pickersgill, depriving the Courts of Aldermen and Common Council of their judicial patronage, was supported from all quarters of the House, and acquiesced in by the Government. A proposed new clause by Mr. Channing, providing that any rates made under the Act by the county council might be divided between the owner and occupier, was objected to by the Government (who pointed out that if it were adopted the reconstruction of the Bill would become necessary, but promised to consider how they could in future best deal with the question), and rejected by 259 to 174. When the Bill reached the Lords it was read a second time without a division after some rather hostile criticisms from the Earl of Carnarvon; several changes were made in the clauses, among them being the insertion of a provision permitting the Recorder of London to be appointed by the Court of Aldermen, subject to the condition that he should not exercise judicial powers unless he were appointed by the Crown to exercise them. On the Bill being returned to the Commons this was agreed to by 119 to 86. [Royal assent, Aug. 13th.] The Act '88 (51 & 52 Vict. ch. 41), provides that a council shall be established in every administrative county as defined by this Act, and be intrusted with the management of the administrative and financial business of the county, and shall consist of the chairman, aldermen, and councillors. Three-fourths of the members of the council (the councillors) are to be elected by the burgesses and electors throughout the county, the other fourth (the county aldermen) are to be selected by the councillors. The county council is to be constituted and elected, and is to conduct its proceedings in like manner, and be in the like position in all respects, as the council of a borough divided into wards. Clerks in holy orders and other ministers of religion are not disqualified for being elected and being aldermen or councillors; and a person is qualified who, though not qualified in manner provided by the Municipal Corporations Act '82, as applied by this Act, is a peer owning property in the county, or is registered as a parliamentary voter in respect of the ownership of property situate in the county. The county councillors are to be elected for a term of three years, and are then to retire

together. The county is to be divided into electoral divisions, each returning one councillor. The electors of the county councillors are to be, in a borough, the burgesses enrolled in pursuance of the Municipal Corporations Acts, and elsewhere the persons registered as county electors under the County Electors Act, '88 (see sect. 12). The chairman of the council (who is not to be called mayor) is to be appointed by the council from amongst their number, and is by virtue of his office to be a justice of the peace for the county. There is to be transferred to the county council all business done by the quarter sessions in respect of the following matters:—The making, assessing, and levying of a county, police, hundred, and all rates, and the application and expenditure thereof, and the making of orders for the payment of sums payable out of any such rate or out of the county stock or county fund, and the preparation and revision of the basis or standard for the county rate; the borrowing of money; the passing of the accounts of and the discharge of the county treasurer; shire halls, county halls, assize courts, judges' lodgings, lock-up houses, court houses, justices' rooms, police stations, and county buildings, works, and property, subject, as to the use of buildings by the quarter sessions and the justices, to the provisions of this Act respecting the joint committee of quarter sessions and the county council; the licensing under any general Act of houses and other places for music or for dancing, and the granting of licences under the Racecourses Licensing Act, '79; the provision, enlargement, maintenance, Management, and visitation of and other dealing with Asylums for pauper lunatics; the establishment and maintenance of and the contribution to reformatory and industrial schools; bridges and roads repairable with bridges, and any powers vested by the Highways and Locomotives (Amendment) Act '78, in the county authorities; the tables of fees to be taken by and the costs to be allowed to any inspector, analyst, or person holding any office in the county, other than the clerk of the peace and the clerks of the justices; the appointment, removal, and determination of salaries of the county treasurer, the county surveyor, the public analysts, any officer under the Explosives Act '75, and any officers whose remuneration is paid out of the county rate, other than the clerk of the peace and the clerks of the justices; the salary of any coroner whose salary is payable out of the county rate, the fees, allowances, and disbursements allowed to be paid by any such coroner, and the division of the county into coroners' districts, and the assignment of such districts; the division of the county into polling districts for the purposes of parliamentary elections, the appointment of places of election, the places of holding courts for the revision of the lists of voters, and the costs of and other matters to be done for the registration of parliamentary voters; the execution as local authority of the Acts relating to contagious diseases of animals, to destructive insects, to fish conservancy, to wild birds, to weights and measures, and to gas meters, and of the Local Stamp Act, '69; any matters arising under the Riot (Damages) Act '86; the registration of rules of scientific societies; the registration of charitable gifts under 52 Geo. III., ch. 102; the certifying and recording of places of religious worship under 52 Geo. III., ch. 155; the confirmation and record of the rules of loan

societies under 3 & 4 Vict. ch. 110; and any other business transferred by this Act. On any vacancy occurring in the office of coroner for a county, the county council is in future to appoint a fit person, but a person holding this office may not be an alderman or councillor for the county for which he is coroner. The county councils are to have power to purchase or take over existing bridges not being at present county bridges, and to erect new bridges; and there is to be transferred to them the business of the justices of the county out of sessions in respect of the licensing of houses or places for the public performance of stage plays, and of the execution as local authority of the Explosives Act, '75. There is reserved to quarter sessions business in relation to appeals against the basis or standard for the county rate, or against that or any other rate, and all business not transferred by the Act. The powers of quarter sessions with respect to the county police are to be exercised through a standing joint committee of the quarter sessions and county council, but nothing is to affect the powers, duties and liabilities of the justices as conservators of the peace, or the obligation of the police to obey their lawful orders given in that behalf. The Local Government Board is empowered to make from time to time a provisional order (which is subject to confirmation by Parliament) for transferring to county councils certain powers of the Privy Council, the Secretary of State, the Board of Trade, the Local Government Board, the Education Department, or any other Government department, conferred by or in pursuance of any statute and appearing to relate to matters arising within the county, and to be of an administrative character. The entire maintenance of main roads is vested in the councils, though an urban authority may claim to retain the powers and duties of maintaining and repairing a main road within its district, and the council is to make an annual payment towards the cost of the same; the council and any district council may contract for the undertaking by the latter of the maintenance, repair, and other dealing with any main road, and the county council is empowered to contribute to the cost of maintenance, repair and improvement of any highway or public highway in the county, although the same is not a main road. The county council is to have power, in addition to any other authority, to enforce the provisions of the Rivers Pollution Prevention Act '76 in relation to so much of any stream as is situate within any part of their county; to oppose bills in Parliament, to make bye-laws, and to appoint a medical officer of health. The proceeds of the duties on local taxation licences are, after the financial year ending on the 31st day of March, '89, to be paid by the Commissioners of Inland Revenue into the Bank of England to the local taxation account, and the amount ascertained to be the proceeds of the duties collected in each administrative county is to be paid to the council of each county. The licence duties referred to are those for the sale of intoxicating liquors by retail, to deal in game, for beer dealers, spirit dealers, sweets dealers, wine dealers, refreshment-house keepers, dogs, killing game, guns, appraisers, auctioneers, tobacco dealers, carriages, trade carts, locomotives, horses and mules, horse dealers, armorial bearings, male servants, hawkers, house agents, pawnbrokers, and plate dealers. The

county councils are also to receive four-fifths of one-half of the probate duties. The probate duty grant is to be distributed in proportion to the share received by each county during the financial year '87-8 out of the grants heretofore made in aid of local rates, which will cease to be granted after the passing of this Act (see FINANCE, NATIONAL). All sums received by a county council in respect of licence duties or the probate duty grant are to be applied in paying the costs incurred in respect thereof, or otherwise chargeable thereon; in payment of the sums required to be paid in substitution for local grants, and of the grants required to be made in respect of costs of union officers; and in repaying to the general county account of the county fund the costs on account of general county purposes for which the whole of the area of the county is liable to be assessed to county contributions; provision is also made for the application of the surplus, if any. The sums to be paid by the county councils in substitution for local grants are, towards the remuneration of teachers in poor law schools, to public vaccinators, school fees for pauper children sent to a public elementary school outside the workhouse, to every local authority by whom a medical officer of health or inspector of nuisances is paid one-half of the salary of such officer; towards the remuneration of registrars of births and deaths; four shillings per week towards the maintenance of each pauper lunatic; for compensation payable to certain county officers; and one-half of the costs for the pay and clothing of the police—in the case of the Metropolitan Police the various county councils concerned having to pay to the receiver of police in each year a sum bearing such proportion to the sum actually raised in the same year by rates from the parishes in that county for the said purpose as the Secretary of State certifies to be the proportion which would have been contributed out of the Exchequer under the arrangement in force during the financial year next before the passing of the Act. Each of the following boroughs is for the purposes of the Act to be an administrative county of itself: *i.e.*—Barrow, Bath, Birkenhead, Birmingham, Blackburn, Bolton, Bootle-cum-Linacre, Bradford, Brighton, Bristol, Burnley, Bury, Canterbury, Cardiff, Chester, Coventry, Croydon, Derby, Devonport, Dudley, Exeter, Gateshead, Gloucester, Great Yarmouth, Halifax, Hanley, Hastings, Huddersfield, Ipswich, Kingston-upon-Hull, Leeds, Leicester, Lincoln, Liverpool, Manchester, Middlesbrough, Newcastle-upon-Tyne, Northampton, Norwich, Nottingham, Oldham, Plymouth, Portsmouth, Preston, Reading, Rochdale, Saint Helen's, Salford, Bedford, Southampton, South Shields, Stockport, Sunderland, Swansea, Walsall, West Bromwich, West Ham, Wigan, Wolverhampton, Worcester, York. The mayor, aldermen, and burgesses of each county borough are, subject to certain modifications, to have all the powers of a county council under the Act in so far as they are not already in possession of or subject to the same, but they will still be governed in many respects by the Municipal Corporations Act; and the provisions of the Local Government Act with respect to the constitution, election, proceedings, or position of the county council or the chairman thereof, the county treasurer and other county officers, the standing joint committee of the justices and

the council, coroners, gas meters, the transfer to the council of powers relating to county and other rates, and the preparation or revision of the basis or standard for the county rate, are not to apply to county boroughs. Nor is Part IV. of the Act, relating to finance, to apply, save so far as is expressly provided. Provision is made for an adjustment of the financial relations between counties and county boroughs by agreement or by the Commissioners (the Earl of Derby, Mr. Shaw Lefevre, M.P., Mr. J. L. Wharton, M.P., Mr. F. Mowatt, C.B., and Mr. J. J. Henley) appointed under the Act. A quarter-sessions borough not being a county borough, but containing a population of 10,000 or upwards, is to retain its powers as local authority under any Act (save as in this Act expressly mentioned) and under the Municipal Corporations Act, but, subject to these provisions and to other savings, the borough is to form part of the county for the purposes of the Act. In the case of quarter-sessions boroughs of a population of less than 10,000, or in the case of a borough of a population of under 10,000, provision is made for transferring to the county council several of the powers and duties those boroughs at present enjoy. The Metropolis, as defined by the Local Management Acts, is to be an administrative county of itself, by the name of the administrative county of London. The area in question forms part of the counties of Middlesex, Surrey, and Kent, which part is now to be severed from those counties, and is to have a lord-lieutenant, a sheriff, a commission of the peace, and a court of quarter sessions of its own; though for the purpose of the jurisdiction of the justices under such commission and of such county, as well as for other non-administrative purposes, the City of London may continue a separate county, with its own sheriffs, who are, however, no longer to be jointly Sheriff of Middlesex. The number of county councillors for the administrative county of London is to be 118, or double the number of members (59) returned by the parliamentary boroughs in the Metropolis; each borough or each division thereof being an electoral division for the purposes of the Act; the number of county aldermen in the county of London is not to exceed one-sixth of the whole number of the county councillors; the powers, duties and liabilities of the Metropolitan Board of Works are to be transferred to the London County Council, and the Board is to cease to exist. The Metropolitan Police remain under the control of the Home Secretary, the City is placed in the position of a quarter-sessions borough, and retains control of its own police; the Common Council, and in any other part of the Metropolis the district board, may claim to retain the power of maintaining and repairing the main road. The Sheriffs of the City of London are not to have any authority except in the City, and a Sheriff is to be appointed by the Crown for that part of Middlesex which is outside the county of London. The London County Council may petition Her Majesty to appoint a barrister of not less than ten years' standing to be paid chairman or deputy chairman, or one of the paid deputy chairmen, as the case may be, of the quarter sessions for the county of London. The rights claimed by the Court of Common Council to appoint to the offices of common sergeant and judge of the City of London court are to cease, and in any future vacancy in each of the said offices, the Queen is to appoint a duly qualified barrister to be such

common serjeant or judge; and from and after the next vacancy no recorder is to exercise any judicial functions unless he is appointed by Her Majesty to exercise such functions. The London County Council is to pay to each poor law union within its limits such sums as the Local Government Board may certify to be due from time to time in substitution for local grants towards the remuneration of poor law medical officers, and towards the costs of drugs and medical appliances, and is also to grant to such unions *4d.* per head per day for every indoor pauper. The London County Council may from time to time appoint any fit person to be deputy chairman, and to hold office during the term of office of the chairman, and may pay to such deputy chairman such remuneration as they may from time to time think fit. Part IV. of the Act enables a county council, with the consent of the Local Government Board, to borrow, for purchasing any land, or building any building authorised by any Act, for any permanent work which they are authorised to execute or do, for making advances in aid of the emigration, or colonisation, of inhabitants of the county, with a guarantee for a repayment of such advances from any local authority in the county, or the Government of any colony; and for any purpose for which quarter sessions or the county council are authorised to borrow; but where the total debt of the county council exceeds, or if the proposed loan is borrowed will exceed, the amount of one-tenth of the annual ratable value of the property in the county, the amount shall not be borrowed except in pursuance of a provisional order made by the Local Government Board, to be confirmed by Parliament. Loans under this section are to be repaid within a period not exceeding thirty years; an annual budget is to be submitted to each county council. The supplemental provisions of the Act include certain regulations for bicycles, etc. The first election of county councillors was appointed for January '89, and the county councillors elected at the first election are to retire on the ordinary day of election in November in the third year after the passing of the Act; and of the first county aldermen one half, to be determined by ballot, are to retire in November in the third year after the passing of the Act, and the remaining half are to retire in November in the sixth year. The members of the county council first elected are not to enter on their ordinary duties until the first day of April, but are to meet on the second Thursday after the election and other subsequent days, and act as a provisional council to bring the Act into operation, to select the county aldermen, and to choose a chairman.

Local Government Board, which was constituted August 10th, 1871, under an Act passed earlier in the same year, was established to take over all the powers and duties vested in or imposed on the Poor Law Board (which Board from that time ceased to exist) under the Acts relating to the relief of the poor, the powers vested in or imposed on the Home Secretary in regard to the registration of births, deaths and marriages, public health, local government, sanitary matters, baths and washhouses, public improvements, towns improvement, artisans' and labourers' dwellings, returns as to local taxation, and the powers and duties of the Privy Council with regard to the prevention of disease and vaccination (*q.v.*). Since that time its powers have been increased,

and its sphere and operations extended by many statutes. The Board consists of a president and of certain *ex-officio* members, all of whom are members of the Government for the time being. The president is assisted by a parliamentary secretary, a permanent secretary (Sir Hugh Owen, K.C.B., salary £1,500), and a numerous staff of officers and inspectors, etc. The duties of the Department include a general supervision and control of the administration of the **Poor Law** (*q.v.*), the inspection especially of Metropolitan vagrant wards, workhouse schools, and the regulation of infirmaries; and it may authorise the emigration of orphan and deserted children. Its medical department includes a medical inspector and staff for general sanitary purposes, under it being the **National Vaccine Establishment** and the animal vaccine lymph station. It may order the appointment by sanitary authorities of medical officers of health and inspectors of nuisances, may constitute a port sanitary authority in certain cases, carry out local inquiries as to special epidemics, and may make orders as to dairies and cowsheds. It inspects **alkali works** (*q.v.*) and **canal boats** (*q.v.*). It has certain statutory powers as to bridges and highways. It examines the accounts of boards of guardians and other local bodies, and may make disallowances and surcharges. It may sanction, after due inquiry by members of its staff, the borrowing of loans for cemeteries, sanitary improvements, improvement schemes, workhouse buildings, water supply, baths and washhouses, and for other purposes; and it satisfies itself that any sums advanced by the **Public Works Loans Commissioners** are applied to the work for which they were intended. It grants **provisional orders** (see **BILL, PRIVATE**) for the constitution or alteration of unions and the division of parishes, for the acquisition of land, and for other local objects. It reports to Parliament upon local bills, and it publishes periodical returns as to the prevalence and cost of pauperism, sanitary matters, vaccination, local taxation and the valuation of property, and the financial position of the local authorities of England and Wales. It exercises numerous and important functions under the Local Government Act. For example, it determines the number and apportionment of county councillors in certain cases; it may make provisional orders transferring certain powers under local Acts to a county council, and the powers possessed by certain Government departments and other authorities under general Acts to county councils generally; it may, on the application of two or more local authorities, grant a provisional order creating a body capable of dealing comprehensively with the whole of a river under the **Rivers Pollution Prevention Act**; it may grant an order for altering the boundary of any county or borough, or constituting any borough having a population of not less than 50,000 into a county borough, or for uniting two county boroughs, —all of which provisional orders are subject to confirmation by Parliament. Notice of a petition for the grant of a charter of incorporation to a new borough must be sent to it, and any representations it may make are to be considered by the Privy Council; it may in certain cases arbitrate regarding the amount to be paid by the county council to an urban authority for the maintenance of main roads; it certifies as to the share heretofore received by

each county out of the grants in aid of local rates, this being the basis on which the Probate Duty Grant is to be distributed; it certifies the amount due from county councils in substitution for local grants for poor law purposes; county councils cannot borrow for certain purposes without its consent; it prescribes regulations as to the creation, issue, etc., of county stock; and it appoints the district auditors who are to audit the county accounts. Under the Infectious Diseases Notification Act, '89 (see Session, sect. 79), a local authority may not permanently apply the Act to any infectious disease other than those specifically mentioned in the Act without the consent of the Board. A water examiner under the Board reports on the condition of the water supplied by the eight Metropolitan Water Companies. The powers of supervision and control exercised by the Department extend over the Metropolitan Asylums Board. See LOCAL GOVERNMENT ACT, '89.

Local Government (Scotland Act) '89. See Session, sect. 87.

Local Option. This phrase is now applied to such legislation as would enable the inhabitants of districts to reduce or extinguish the sale of intoxicating liquors in their own midst. The Local Option resolution was first moved by Sir Wilfrid Lawson on March 11th, 1879, and again on March 5th, 1880, being rejected by majorities of 88 and 114. But on June 18th, 1880, he again brought it on in the Parliament recently elected, and it was carried by a majority of 29. In 1881 another motion was carried by 42 majority, and a third motion in 1883 by a majority of 87. There has yet been no legislation on the subject, but it is believed that some means will be adopted before long by which the issue or renewal of licences will be put under the power of localities. There are several schemes of Local Option seeking to effect a reform in the licensing system, but Sir W. Lawson and the United Kingdom Alliance are only desirous of a power of direct veto, by which the electors of any place might veto, if so pleased, the issue of all licences for the sale of liquor, and thus stop among themselves the sale of strong drink with its attendant evils. The phrase "Local Option" is borrowed from a letter by Mr. Gladstone in 1868, when, writing on the subject of the Permissive Bill, he said that he was disposed to "let in the principle of local option wherever it is found satisfactory." The difficulty which has hitherto stood in the way of Local Option in the liquor trade has been that of deciding what considerations should determine a "locality," who should be the constituents, and what should be the majority necessary to vote the abolition of the trade. A further question is that of compensation to those who have invested in the trade in a locality where a subsequent vote excludes it.

Local Taxation and Valuation. The annual report of the Local Government Board for 1888-89, issued in November last, gives the local taxation returns for '86-7. From these it appears that there are 28,389 local authorities in England and Wales, whose aggregate receipts, excluding loans, were from—

| | |
|---|-------------|
| Public rates | £26,637,017 |
| Treasury subventions and payments | 3,975,896 |
| Tolls, dues, and duties | 3,554,860 |
| Revenue from real and funded property | 1,246,001 |
| Sales of property | 548,181 |

| | |
|--|--------------------|
| Fines, penalties, fees, and licences | 1,076,103 |
| Waterworks | 2,171,358 |
| Gasworks | 3,355,383 |
| Other undertakings producing revenue | 709,156 |
| Repayments in respect of private improvement works | 775,106 |
| Receipts from other sources | 1,281,731 |
| Total | £46,330,992 |

The expenditure of the authorities during the year, so far as it was not defrayed out of loans, amounted to £45,122,815. The following are some of the principal purposes in respect of which it had been incurred:—

| | |
|---|------------|
| Relief of the poor | £6,450,302 |
| Pauper lunatics and lunatic asylums | 1,433,789 |
| Police | 3,767,033 |
| Education | 3,635,938 |
| Highways, street improvements, and turnpike roads | 5,502,107 |
| Gasworks | 2,477,650 |
| Public lighting | 893,530 |
| Waterworks | 768,781 |
| Sewerage and sewage disposal | 999,771 |
| Harbours, docks, and piers | 1,065,765 |
| Other public works and purposes | 4,236,469 |
| Private improvement works | 573,806 |
| Principal and interest on loans | 10,715,645 |
| Salaries and remuneration of officers | 1,453,385 |
| Establishment charges | 5,6978 |

The receipts from loans during the year amounted to £9,270,987, and the expenditure out of loans to £8,642,192. The following are some of the principal purposes for which the loans were raised, and the amounts raised for each purpose:—

| | |
|---|------------|
| Highways and street improvements | £1,450,626 |
| Waterworks | 835,666 |
| Schools | 1,040,378 |
| Sewerage and sewage disposal | 962,360 |
| Gasworks | 395,602 |
| Poor law purposes | 472,000 |
| Harbours, docks, and piers | 868,711 |
| County purposes | 348,957 |
| Markets | 95,072 |
| Artisans and labourers' dwellings improvement schemes | 36,455 |
| Bridges and ferries | 912,945 |
| Tramways | 32,095 |

The outstanding loans of the local authorities at the end of the year amounted to £18,621,642.

The following statement shows, so far as it has been found practical to apportion them, the amounts outstanding in respect of the principal purposes for which these loans had been raised:—

| | |
|---|-------------|
| Waterworks | £32,427,279 |
| Harbours, docks, and piers | 29,901,617 |
| Highways, street improvements, and turnpike roads | 29,021,594 |
| Sewerage and sewage disposal | 18,369,376 |
| Schools | 16,812,398 |
| Gasworks | 14,669,015 |
| Poor law purposes | 6,888,422 |
| Markets | 5,284,948 |
| Public buildings, offices, etc. (not included under other headings) | 3,771,352 |
| Artisans and labourers' dwellings improvement schemes | 3,562,108 |
| Lunatic asylums | 3,594,772 |
| Bridges and ferries | 4,020,679 |

| | |
|--|-----------|
| Parks, pleasure grounds, commons and open spaces | 2,797,406 |
| Cemeteries and burial grounds | 2,427,346 |
| Land drainage, embankment, and river conservancy | 2,262,092 |
| Tramways | 1,316,478 |
| Private improvement works | 917,484 |
| Police stations and gaols | 1,020,179 |
| Baths and washhouses | 698,309 |
| Hospitals | 507,465 |
| Libraries and museums | 445,379 |
| Fire brigade | 346,415 |
| Cattle Diseases Prevention Act, '66 | 119,655 |
| Slaughter-houses | 84,805 |
| Public lighting | 34,673 |
| Loans charged on Church rates | 13,304 |
| Other purposes | 5,451,092 |

£186,821,642

Loch, Sir Henry, G.C.M.G., K.C.B., Chief Commissioner of the Cape. In the course of his diplomatic career was taken prisoner during the war with China, and subjected to much cruelty and insult. With Mr. Boulby, correspondent of the *Times*, his fellow-prisoner, he was carried about in a cage by his captors and exhibited to the natives. After his liberation he returned to England, and was appointed **Governor of the Isle of Man**, where he effected many public improvements and legislative reforms, including the reconstitution of the House of Keys. He was subsequently appointed to the Mines department of Her Majesty's Woods and Forests. Afterwards became Governor of Victoria, where he made himself very popular. G.C.M.G. '87. While in England, on leave of absence, in April '80, he was appointed to succeed Sir Hercules Robinson as Chief Commissioner at the Cape.

Lockwood, Selva A., b. at Royalton, N.Y., 1842. The champion of the Woman's Rights party in the United States. Formerly a teacher in a public school at Lockport, N.Y.; graduated with honours at Genesee College, N.Y., in '57; removed to Washington and practised law there; was the first woman authorised to practise before the Supreme Court of the United States. Has been eminently successful as a lecturer and lawyer, and has twice been candidate for President under the auspices of the Woman's Suffrage party.

Lockwood, Frank, Q.C., M.P., was b. 1846. Educated at Cambridge. Called to the bar at Lincoln's Inn '72; Q.C. '82; Benchers '86. Appointed one of the Commissioners to inquire into corrupt practices at Chester '80. Recorder of Sheffield '74. Elected Liberal member for York '85, which he still represents. Mr. L. is well known as a humorous speaker, and is an accomplished caricaturist. He appeared, in company with other eminent counsel, on behalf of the Irish Party, before the Parnell Commission (q.v.). In '89 he illustrated Mr. C. J. Darling's facetious legal work, "*Scintilla Juris*."

Lockyer, Joseph Norman, F.R.S.; b. at Rugby 1836. Appointed to the War Office ('57), and editor of *Army Regulations* ('65). He was subsequently transferred to the Science and Art Department. Elected F.R.S. ('69). He was chief of the *English Government Eclipse Expedition to Sicily* ('70), and to *India* ('71). Bakerian Lecturer, '88. Inaugurated the series of Saturday afternoon lectures at South Kensington Museum Feb. '89. He has pub-

lished several works on astronomy, and has done much to advance the interests of that science. The Second Report of the Committee on Solar Physics (issued as a Parliamentary Blue Book in Oct. '89) contains an account of Mr. Lockyer's recent investigations of solar phenomena. The Syllabus of Physiology recently issued by the Science and Art Department for the guidance of students and teachers of elementary physics was prepared by Mr. Lockyer. From the pen of Mr. L. an article, "The History of a Star," appeared in the November number of the *Nineteenth Century*.

Loisinger, Fräulein Amalia, lately a singer at the Darmstadt Court Theatre, was b. at Pressburg, April 18th, 1865, and is of humble origin. Her father, who died a short time ago, was valet to the Austrian Field-Marshal-Lieutenant Martin Signorini, and her mother, who is still alive, is a native of Bruneck, in the Tyrol. She received her musical training at Pressburg, and made her first appearance in public at a concert in Vienna in '80. In '83 she took up her residence at Prague, where she and her mother occupied a modest apartment in the Carolinenthal suburb. There she lived for two years, continuing her studies and occasionally singing at concerts. Her rich and captivating voice, her beautiful face, and her blameless life soon made her a general favourite, and, although disinclined to enter on a theatrical career, she yielded to her mother's wishes, and, early in '85, accepted an engagement for the town theatre at Troppau, in Silesia. From April 16th to May 17th in the same year she played at Linz, where she appeared with great success as *Eva* in the *Meistersinger*, and *Zerlina* in *Don Juan*, and in several other parts. From Linz she went to Leipzig, and then to Darmstadt, where she obtained a permanent engagement at a salary of 4000 m. (equal to £200) for the first year, 5000 m. for the second, and 6000 m. for the third year. Married Prince Alexander of Battemberg (q.v.) in Feb. '89.

London Central Subway Railway. Notice was given in November '88 that application would be made to Parliament for leave to bring in a bill for the construction of subway railways from **St. James Street, Piccadilly, to Holborn Circus.** The railway is to be in three sections, of the standard gauge 4 ft. 8½ in., and be worked by electricity. A meeting of the ratepayers of Holborn was held on Jan. 2nd, '89, under the presidency of Mr. Gainsford Bruce, Q.C., M.P., when it was explained that the bill consisted of fifty-four sections, and that the capital of the Company was to be £750,000. A resolution was adopted strongly opposing the project, a committee being formed for that purpose. It was stated that Mr. W. Leatham Bright, M.P. was one of the promoters of the scheme. A deputation of tradesmen and others from Piccadilly, Shaftesbury Avenue, and Holborn, attended before the Metropolitan Board of Works on Feb. 8th, and presented a memorial against the bill, the matter being referred to the Works Committee. The Company's bill was read a second time in the House of Commons on March 7th, but only after a sharp discussion. The promoters of the Bill having lodged objections to the Metropolitan and the Metropolitan District railways appearing against them, the question of *locus standi* was argued on May and before the Court of Referees. The main point

of contention was the competition, and the Court decided that neither Company was entitled to oppose.

London Chamber of Commerce, The. Incorporated under the Limited Liability Act, Oct. '81. First President, Mr. Chas. Magniac, M.P. The L. C. C. takes cognisance of all questions affecting the good of the community at large, and which from time to time occupy the attention of the mercantile world. Among these topics may be mentioned the Anglo-French Treaty Negotiations, the Burmah Monopolies, the Russo-Chinese Treaty of Kuldja, and Telegraph Rates in Russia; in '82 Coffee Adulteration, the Bill for Amending the Laws relating to Customs and Inland Revenue, Eastern Bills of Lading, Cattle Plague Regulations, Consular Reports, Bankruptcy Reform, Thames Communications, different matters referring to the Suez Canal (*q.v.*), Parcels Post, the Spanish Treaty, Coal and Wine Dues (*q.v.*), Sixpenny Telegrams, Colonial and Imperial Federation (*q.v.*), Merchant Shipping Bill, Railway Rates and Fares, Postal Reform, Arbitration, State Guarantee of War Risks, Technical Education, Emigration, Commercial Treaties with Morocco, Mexico, Spain, and various foreign countries, Annexation of Burmah (approved of), Commercial Museums, Decimal Coinage, the Silver Question, Merchandise Marks Act '87, Development of Burmah. A number of subjects similar to these are considered yearly by the meetings, and whatever steps after due deliberation are considered advisable to be taken upon them, by way of petitioning Parliament or otherwise, are adopted. The Chamber, too, has frequently been consulted confidentially by Government concerning matters affecting trade. The affairs of the Chamber are governed by a Council. From its first formation the Chamber has adopted the principle of dividing itself into sections, each dealing with some particular subject, and twenty-seven trades have already been organised in this way. The Chamber has on its premises the nucleus of a valuable commercial library, to which presentations have been made by the late Mr. Samuel Morley, Sir John Lubbock, M.P., and others. The principal work effected in '89 was the organisation of an effective opposition by the Chamber, in conjunction with other bodies, to the proposals of the Railway Companies under the Railway and Canal Traffic Act of '89. The scheme of Commercial Education, on which the Chamber has been engaged for some two years past, was also completed, and issued for the adoption of those concerned. President, Sir J. Lubbock, Bart., M.P. *Organ. Chamber of Commerce Journal* (monthly). *Office*, Botolph House, E.C. *Sec. and Editor*, Mr. K. B. Murray.

London Civil Duties Abolition Act, '89. See *SEASIDE*, Sect. 63.

London Congregational Union. This, the only society representing the interests of London Congregationalists, was formed in March 1873. The limits of its operations are comprised within the area known as Greater London, including the whole of Middlesex, and such portions of Surrey, Kent, Essex, and Herts as are within twelve miles of Charing Cross, these being divided into ten districts. The objects of the Union are to promote spiritual intercommunion between the Congregational Churches of the Metropolis, to aid such of them as are weak, and to promote church extension,

and secure their common, religious, and social interests. An annual average of about £3,500 is expended in aiding churches to support their ministers and in extending and consolidating mission work. In addition, grants are made in aid of Chapel Building, and Free Loans are granted for a term of years from a fund amounting to £11,050. About £18,000 has been raised during the last six years for children's breakfasts, and other philanthropic work. The membership of the Union consists of the representatives of affiliated churches and of ministerial, personal, and honorary members. The Council consists of sixty members; thirty ministerial and thirty non-ministerial, together with the Chairman, ex-Chairman, Chairman-elect, Treasurers, and Secretary. Each District Committee is entitled to nominate for the Council in the proportion of one member for every seven affiliated churches in the district. Fourteen members retire annually, and these are not eligible for reappointment before the following annual election. *Offices*, Memorial Hall, Farringdon St., E.C. *Sec.*, Rev. A. Means.

London, Corporation of the City of, consists of the whole body of the citizens or freemen, under the style of "the Mayor, Commonalty, and Citizens." The small portion of this great Metropolis which is comprised within the City and its liberties is divided into 27 wards, including Bridge Without. There is an alderman for this ward, but no freemen and no common councillors. Each of the other wards, with the exception of the two Cripplegate wards (which return an alderman jointly), elects one alderman and a number of common councillors varying from 4 to 16, but amounting in all to a total of 232. An alderman is elected when a vacancy occurs, and holds office for life; the councillors are elected on St. Thomas's Day, and hold office for one year, but are of course eligible for re-election. The electors are in each case freemen, who may have obtained their freedom by birth, apprenticeship, purchase, or gift; but who must be rated householders before they can vote at a ward-mote, as a meeting of the ward is termed. A liveryman is a freeman who, by payment of a fee, has entered the livery of one or other of the City companies or guilds, and was first so called because he was entitled to wear the livery of his company. He has the right to vote at the elections of Lord Mayor, sheriffs, chamberlain, and other Corporation officers, and also for M.P.'s for the City. The Lord Mayor is elected on Sept. 29th by the liverymen of the several companies assembled together at the Guildhall, and as it is termed in Common Hall, and to be eligible he must have served as sheriff (*q.v.*) of London. The Livery may select any alderman thus qualified, but they almost invariably accept the names of the two senior aldermen who have not passed the civic chair. These two names are submitted to the general body of the aldermen, who choose usually the first, but sometimes for a special reason, prefer the second. The Lord Mayor elect is presented to the Lord Chancellor to receive the assent of the Crown to the election; he is sworn before the retiring Lord Mayor and aldermen on Nov. 8th, and on Nov. 9th he goes in procession to the Royal Courts of Justice to be presented to the Lord Chief Justice and again sworn. The mayoralty thus commenced lasts a year, but the same alderman has in some instances been re-elected for a

second, and in ancient times for even a third period of service. His public duties absorb every moment of the Lord Mayor's time, and the £10,000 annually voted by the Corporation does not anything like cover his expenses while in office. He is expected to preside during the day over meetings for public or benevolent objects, and to take part in many important ceremonies: to open schools, distribute prizes, initiate subscriptions for relief of distress; and by night to entertain eminent and distinguished personages at his official residence. As head of the Corporation he presides at Common Hall, the Court of Aldermen, and the Court of Common Council, and may have to attend committees, and the Commissioners of Sewers; he presides at the justice room of the Mansion House, and is first commissioner of the Central Criminal Court; he is a trustee of St. Paul's and a governor of several charities. He is head of the Thames Conservancy Board. He is styled "right honourable," and, although not of the Privy Council, he attends when, on the demise of the Crown, the new sovereign is proclaimed; and at the coronation he is present as chief butler, receiving therefor a golden cup and cover. [The Lord Mayor's private secretary is Mr. W. J. Soulsby, Mansion House.] The **alderman** of the ward presides over the ward-mote for the election of common councillors. Each alderman is a justice of the peace, and may preside at the Guildhall or Mansion House justice rooms. The aldermen are the bench of magistrates for the City, the visiting justices to the prisons; they admit and swear brokers, and decide disputes at ward elections. When a vacancy in the aldermanic representation of the ward of Bridge Without occurs, they choose one of their number, usually the senior alderman, to fill it, whose successor in the ward he retires from is elected in the usual manner. They sit in the Court of Common Council, the full title of which is "Lord Mayor, Alderman, and Commons of the City of London in common council assembled," and no business can be done unless some of each body be present. The **Common Council** manages the financial and general affairs of the Corporation, has charge of its own police (see METROPOLITAN AND CITY POLICE), lets its lands, has full power over its funds, and has charge of certain of the Thames bridges. The **Recorder** (Sir T. Chambers, Q.C., salary £3500, and £57 as steward of Southwark) presents the Lord Mayor elect to the Lord Chancellor and to the Lord Chief Justice, is principal adviser of the Lord Mayor, and attends him on all occasions of State ceremony. He tries cases in the Mayor's Court, is one of the judges in the Central Criminal Court, and is chairman of quarter sessions for the City. This officer is appointed for life by the Court of Aldermen, but from and after the next vacancy he is not to exercise any judicial functions unless he is appointed by Her Majesty to exercise such functions. The **Chamberlain** (Mr. Benjamin Scott, F.R.A.S., salary £2500, who has held this office since 1858) is elected by the Livery on Midsummer Day, and comes up annually for re-election. He receives the revenues of the Corporation or City cash, pays all salaries, charges, and outgoings, and has the custody of accounts, admits all duly qualified persons to the freedom, and is custodian of the records relating to freemen. The **Common Serjeant** (Sir W. T.

Charley, Q.C., D.C.L., salary £2000) attends the Lord Mayor on all public occasions, and is present at meetings of the Court of Aldermen or Common Council; he is a legal adviser of the Corporation, one of the judges at the Central Criminal Court, a judge of the Mayor's Court, and acts on certain occasions as Deputy Recorder. The **Town Clerk** or **Common Clerk** (Sir J. Monckton, F.S.A., salary £3000) keeps the charters and records of the City, and attends all courts held before the Lord Mayor and aldermen. He signs documents with his surname only. The **Remembrancer** (Mr. G. F. Goldney, salary £2000) attends the Lord Mayor on certain days, puts the Corporation in mind of the business to be transacted, attends the Parliament House during session, and watches the interests of the Corporation in all legislative matters. The **Sword Bearer** carries the sword, being the emblem of justice, before the Lord Mayor. The last four are appointed by the Common Council. In any future vacancy in the offices of Common Serjeant and Judge of the City of London Court, the rights claimed by the Court of Common Council to appoint to such offices are, under the Local Government Act, to cease, and it shall be lawful for the Queen to appoint a duly qualified barrister to be such Common Serjeant or Judge.

London Council (Money) Act, '89. See heading COUNTY COUNCILS.

London, County Council for. See COUNTY COUNCILS, SECT. 4.

"**London Gazette.**" The. Originally a two-paged fortnightly journal—founded in 1642, and removed in 1665 to Oxford, whither the court had retired to escape from the contagion of the plague, and whence the first extant series was issued—it is the official organ for all public announcements, and is now published bi-weekly. It is Government property, and all bankruptcies, dissolution of partnerships, etc., are advertised in it. Office, 47, St. Martin's Lane, London, W.C.

London Great Tower. During the autumn of '89 considerable interest was aroused by a statement that a project was on foot to erect a great exhibition tower in London which was to out rival the Eiffel Tower at Paris (*q.v.*), and the locality named was Muswell Hill. In October some tangibility was given to the scheme by an advertisement headed "The Tower," in which designs were invited for a structure not less than 1200 feet in height, and estimates giving the weight of the material, cost of lifts, and cost of labour in construction. A specification was to be ready by Nov. 1st. The designs to be in by the end of Feb. '90. A premium was offered of 500 guineas for the best, and of 250 guineas for the second best design and estimate. Sir E. W. Watkin's name appears at the head of the promoters' list, and the jury to decide will be Sir Frederick Bramwell, C.E., F.R.S.; Benjamin Baker, Esq., C.E.; Edmund H. Carbutt, Esq., C.E.; Sir Edward Harland, Bart., M.P.; Professor Kennedy, C.E., F.R.S.; Charles Liddell, Esq., C.E.; J. F. Moulton, Esq., Q.C., F.R.S. (with power to add to their number).

London Missionary Society. See MISSIONARY SOCIETIES.

London Produce Clearing House Co. The object of this Company, which was launched in Feb. 1888, is to place on a secure basis, by a system of deposits, the dealing in produce for future delivery. Dealings in each article are

subject to regulations drawn up in conjunction with the leading brokers in each trade. The regulations are so framed as to avoid disclosure of the names of principals. During the first year of its existence, 2,265,500 bags of coffee and 1,277,000 bags of sugar were registered by the Company. These large operations are having their effect on the trade of the port of London, as more coffee is being attracted here in consequence. The Company is now registering dealings in China tea, silk, and wheat, as well as in coffee and sugar; but the bulk of the business is done in the last two commodities. The capital of the Company is £1,000,000 sterling, divided into 100,000 shares of £10 each, of which 100 are founders' shares.

London, Rt. Hon. and Rt. Rev. Frederick Temple, P.C., Lord Bishop of. This see was founded at a very early date, the bishops formerly possessing archiepiscopal powers. The income of the see is £10,000, and in precedence it ranks after Canterbury and York. His lordship is the son of the late Lieut.-Governor of Sierra Leone, and was educated at Tiverton Grammar School and Balliol College, Oxford, graduating B.A. (double first, 42), B.D. and D.D. (58). Formerly his lordship was Fellow and Mathematical Tutor of his College, and was appointed Principal of the Training College at Kneller Hall, Twickenham (48), resigning this appointment '55. Appointed ('58) **Head Master of Rugby School**, a member of Lord Clarendon's Education Commission (60), Chaplain in-ordinary to Her Majesty; Bishop of Exeter (69), translated to London (85). His lordship is the author of the opening essay, "Education of the World," in the "Essays and Reviews." This article led to numerous pamphlets attacking his lordship's position. His lordship is the author of "Sermons Preached at Rugby" (58-65); "The Relation between Science and Religion, being the Bampton Lectures for '84" (85); "Good Manners" (83). He is a prominent leader of the **Temperance movement**. His lordship took part in the Arbitration Committee in the **Great Strike** (74-8) in Oct. '83, and also presided at the great meeting convened in St James's Hall Oct. 16th, to support the **Licensing Committee** of the London County Council in their efforts to purify the **Music Halls**.

London Salvage Corps. Was established in 1866, when the London Fire Engine Establishment was transferred to the Metropolitan Board of Works by the Fire Insurance Companies, and re-formed as the Metropolitan Fire Brigade. The S. C. was established by and has since been maintained at the expense of the **Fire Insurance Companies**, who bear the cost ratably. It is managed by a **Committee** of the leading officials of the Companies, the **Secretary** of each of which is a member. Mr. E. Brace Hall is the **Chief Officer** of the Corps. The remainder of the Corps consists of 5 superintendents, 10 foremen, 18 first, 20 second, and 40 third class m.c.n. A good system of pensioning and insuring the lives of the members exists, somewhat similar to that of the Metropolitan Fire Brigade (q.v.). The number of **free** attended in '88 (latest return) by the S. C. was 1,779, at which 571 salvage services were rendered by the Corps. The number of **watching duties** performed was 18,238, which has caused the employment of temporary assistance. The receipts of the corps for '88 amounted to £24,319 13s. 1d., made up

as follows: viz., £4,520 5s. for rate in aid from the Fire Insurance Companies, £9,934 8s. 3d. for services and turn outs, £500 from the Wharf and Warehouse Committee, £1,314 1s. from rents, £58 2s. 6d. from interests, and £268 12s. 5d. from watching. The expenditure was £24,319 13s. 1d.; which, among numerous other items, includes £10,860 19s. 8d. for salaries, £6,593 16s. 6d. for rents and taxes, and £1,431 16s. 9d. for coach and horse hire. The Corps has five stations, and owns a great number of salvage vans. All the stations are in communication by telephone, and with the Chief Office and superior Stations of each District of the **Metropolitan Fire Brigade**. Headquarters of the S. C., Watling Street, E.C.

London School Board. See **SCHOOL BOARD FOR LONDON**.

London University is an examining body with the power of conferring degrees, which it does under its 4th royal charter, dated 1863. In '78 it received an additional charter admitting women to all degrees without exception. Besides holding examinations in London, the University extends them when required to the provinces and the colonies. From its foundation, in '36, to '89, it had examined 66,766 candidates. Lord Granville is the **Chancellor**, and Sir James Paget the **Vice-Chancellor**. **Parliamentary representative**, Sir John Lubbock, Bart. The degrees with their distinguishing hoods are:—**LL.D.** (hood scarlet cloth, with a lining of blue silk); **LL.B.** (h. black silk, with an edging of blue silk; if a member of Convocation, black silk, lined with white silk, with an edging of blue silk); **M.D.** (h. scarlet cloth, with a lining of violet silk); **M.S.** (h. black silk, with a lining of violet silk); **M.B.** and **B.S.** (h. black silk with an edging of violet silk; if a member of Convocation, black silk or stuff, with a lining of white silk, edged with violet silk); **D. Sc.** (h. scarlet cloth, lined with gold-coloured silk); **B. Sc.** (h. black silk or stuff, edged on the inside with gold-coloured silk, or, if a member of Convocation, lined with white silk edged with gold-coloured silk); **D. Lit.** (h. scarlet cloth, lined with russet-brown silk); **M.A.** (black silk, lined with russet-brown silk); **B.A.** (h. black or stuff, edged on the inside with russet-brown silk, or, if a member of Convocation, with a lining of white silk, edged with russet-brown silk); **D. Mus.** (h. blue silk, with a lining of white watered silk, or, if a member of Convocation, scarlet cloth, with a lining of white watered silk); **B. Mus.** (h. blue silk, with a lining of white watered silk). A necessary preliminary to proceeding in any faculty is the passing of the **Matriculation Examination**. For the regulations of this and other examinations apply to the **Registrar**, Mr. A. Milman, M.A. Univ., Burlington House, Piccadilly. Consult **London University Calendar**.

London Wesleyan Mission, The. This movement was the outcome of the interest aroused by the "Bitter Cry" issued in '85 by the **Congregational Union**. On March 10th, '85, a great meeting was held in the City Road Wesleyan Chapel to initiate a work amongst the outcast classes of London. A large sum of money was speedily raised, and the work was started. (1) In the **East End** by the Rev. Peter Thompson, at St. George's-in-the-East, who, assisted by several lay agents—men and women—has since extended his work to "Paddy's Goose" (a notorious old public-house in Ratcliff Highway, now used as a mission hall), Wilton's

Theatre, the Seamen's Chapel, Commercial Rd.; and Spitalfields. (3) **St. John's Square, Clerkenwell**, by the Rev. E. Smith (*q.v.*). This branch is intended as an effort amongst the working rather than the outcast classes, though both are aimed at. The chapel at St. John's Square was an old one, worked under the ordinary Wesleyan rules, with a very small congregation. In three years the congregation has been

from about 100 to 1000, and is extending on all sides, and a working men's club and girls' parlour have now been added. (3) What is known as the **West End Mission**, at St. James's Hall, Prince's Hall, Wardour Hall, Cleveland Hall, Lincoln House, Katherine House, and Wiclif House, with the Rev. Hugh Price Hughes (*q.v.*) at the head, assisted by the Rev. Mark Guy Pearse and a powerful staff of lay agents. Orchestral and military bands are used for the musical part of the services at St. James's Hall, social and high-class entertainments at Wardour Hall, a house for the lady workers of the mission to reside in—these ladies wearing a uniform and being called "Sisters of the People"—all indicate the broad views held by the superintendent, Mr. Hughes. **Hon. Sec.**, Rev. J. Ernest Clapham; **Sec.**, Rev. W. D. Walters; **Treas.**, R. W. Perks, Esq. **Offices**, Wesleyan Mission House, Bishopsgate St., E.C. **"Longman's Magazine"** (monthly), founded Nov. 1882; contains serial and short stories, essays (especially on social subjects), popular science, and occasional poetry. Editor, **Mr. O. J. Longman**. **Offices**, 39, Paternoster Row, E.C.

Lopes, The Rt. Hon. Sir Henry Charles, 3rd son of the late Sir Ralph Lopes, and Bart., b. at Devonport 1828, and ed. at Winchester School and Balliol College, Oxford. Called to the bar at the Inner Temple ('52). Joining the Western Circuit, he soon became a leading junior. Elected to Parliament in the Conservative interest as member for Taunton ('68-74), Q.C. ('69). M.P. for Frome ('74-76). Appointed to a judgeship in the Court of Common Pleas ('76), and a Lord Justice of Appeal ('85).

Lord Campbell's Act. By this Act, passed in 1846, and more precisely entitled "An Act for Compensating the Families of Persons Killed by Accidents," it is provided that when the death of any person is occasioned by such a wrongful act or default as would (if death had not ensued) have entitled the party injured to recover damages in respect thereof, then the person who would in that case have been liable shall still be liable to an action for damages, notwithstanding the death of the injured party. Every such action must be for the benefit of the wife, husband, parent, and child of the deceased, and must be brought by or in the name of his executor or administrator. The jury may give such damages as they think proportioned to the injury resulting from the death to the parties respectively for whose benefit the action is brought; and the amount so recovered, after deducting costs not recovered from the defendant, is to be divided among the parties in such shares as the verdict shall direct. No more than one action lies in respect of the same subject-matter; and every action must be commenced within twelve calendar months after the death of the injured person. The plaintiff must deliver to the defendant a full particular of the person or persons on whose behalf the action is brought, and of the nature of the claim in respect of which he seeks to recover damages. Damages under this Act can be

recovered only where pecuniary advantage or the reasonable expectation of such advantage has been lost in consequence of the injured person's death. No damage can be given for funeral expenses or the cost of mourning. On the other hand, the receipt of insurance money cannot be taken into account in reduction of damages. The Act is chiefly important in its bearing on railway accidents.

Lord Chamberlain. See CHAMBERLAIN, LORD.

Lord Mayor's Court. An action will lie in the Lord Mayor's Court when a debtor "shall dwell or carry on business within the City of London," or if the cause of action arises in the City. A question was raised (April '88) whether a solicitor's clerk engaged in the City, but living in Canonbury, "carried on business in the City" in such a way as to entitle him to bring an action in the Court. A Divisional Court of the Queen's Bench Division held that such a person did not carry on business in the City, and granted a prohibition to restrain the action he had commenced.

Lord Privy Seal, The, was so denominated from his having the custody of the privy seal, which was used to all charters, grants, and pardons signed by the king before they came to the great seal. Modern legislation has deprived the office of all but the most nominal duties, but the holder is fifth great officer of State, and as such takes precedence next after the Lord President of the Council.

Lords, House of, Alphabetical List of. See PEERAGE, and ENGLISH POLITICAL PARTIES.

Lords Justices were appointed by William III. to govern England during his absence in 1694. Two Lords Justices, assigned to the Court of Appeal in Chancery, were selected Oct. 1st, 1851, and the salary was fixed at £6,000. There are now five **Lords Justices**—Sir H. Cotton, Sir N. Lindley, Sir C. S. C. Bowen, Sir E. Fry, and Sir H. C. Lopes, each of whom receive a salary of £5,000.

Lords of Appeal. See PEERAGE.

Lords, Privileges of. See PRIVILEGES OF PEERS.

Lords Spiritual and Temporal. See PEERS.

Los Hermanos. West Indian islands on the Venezuelan coast, belonging to that State.

Lourenço Marquez. The port and settlement in Delagoa Bay (*q.v.*). Now a rising town. Belongs to Portugal, which has a garrison there. Is the starting-point of railway to Transvaal gold-fields, and hence likely to become a place of consequence.

Low Church. See CHURCH OF ENGLAND.

Lowell, James Russell, D.C.L., LL.D., son of Rev. Charles Lowell, D.D., was b. at Cambridge, Massachusetts, U.S.A., 1810. Graduated at Harvard College (1838), and at Harvard Law School (1840). Published some poems (1841) entitled "A Year's Life," another volume of poems (1844); some directed against slavery (1848); followed by the "Biglow Papers," a satirical essay against slavery and the Mexican war. Travelled in Europe (1851-52); delivered a course of lectures before Lowell Institute, Boston, on "British Poets" (1854-55); appointed **Professor of Modern Languages and Literature at Harvard College** (1855); spent a year at Dresden; was editor of the *Atlantic*

Monthly (1857-62), and *North American Review* (1862-72); published (1868) "Commemoration Ode" in honour of the alumni of Harvard who fell in the Civil War, and afterwards six other works; travelled again in Europe (1872-74), and received the above degrees from Oxford and Cambridge respectively. His wife, Maria W. Lowell, was a poet of considerable merit and a native of the same State. In 1880 he was appointed Minister of the United States, America, to Great Britain, from which he was recalled (1885). Under the title of "Democracy and other Addresses" Mr. L. in 1887 republished the speeches which he delivered on important occasions during his residence in this country. Mr. L. again visited England in '88, and on leaving Liverpool made the relations existing between England and America the subject of a speech conceived in his happiest vein. Another volume of poetry, entitled "Heartsease and Rue," was issued by Mr. L. in '88. In '89 he wrote an introduction to Macmillan's "Compleat Angler."

Lower Canada. The former name of Quebec (*q.v.*).

Loyalty Islands. A dependency of the French colony of New Caledonia (*q.v.*).

Lubbock, Sir John, Bart., M.P., F.R.S., b. in London, 1834. Ed. at Eton. Entered ('48) his father's bank in Lombard St., becoming a partner in '56. Sir J. L. has been a member of many Commissions, including the Public School Commission, the International Coinage Commission, and the Advancement of Science Commission. M.P. for Maidstone from '70 to '80, when he was elected by the Univ. of London, which seat he still holds. During his parliamentary career Sir John has taken an active interest in educational and financial questions, and several public measures of importance (the principal being the Bank Holidays Act and the Bankers' Books Evidence Bill) owe their existence mainly to his influence and exertions. He has recently devoted himself to the promotion of the Shop Hours Bill. Sir J. L. is also distinguished as a scientist. In '65 he published "Pre-historic Times," in '70 the "Origin of Civilization and the Primitive Condition of Man," and in '88 "The Senses, Instincts, and Intelligence of the Animals, with special reference to Insects," and "The Pleasures of Life." He is also the author of various works on Ants, Bees, and Wasps, besides many other valuable scientific works. He was elected first President of the Institute of Bankers, and in '81 President of the British Association. He has also been Vice-President of the Royal Society. He has received the hon. degrees of D.C.L. from Oxford and LL.D. from Dublin, and held the office of Vice-Chancellor of the Univ. of London, which he resigned in '80, on becoming the parliamentary representative of the University. Sir John is a Liberal Unionist. In Nov. '88 he was entertained at a banquet in honour of his labours in connection with the Early Closing movement. He was returned at the head of the poll for the City Division for the London County Council Jan. 17th, '89, and was subsequently elected Vice-Chairman of that body. In April the second part of his "Pleasures of Life" was issued, and, like the first part of the interesting work, added greatly to his reputation.

Lucy, Henry W., b. at Crosby, near Liverpool, Dec. 5th, 1845. Entering the journalistic profession, he was successively on the

staffs of the *Shrewsbury Chronicle* ('64) and *Pall Mall Gazette* ('70). Joined the *Daily News* as special correspondent, chief of the gallery staff, and writer of the parliamentary summary ('73). He was appointed editor ('86); but in '87 resigned the editorship, and returned to his old post in the gallery. Mr. Lucy is the author of a "Handbook of Parliamentary Procedure," and "Men and Manners in Parliament," "Diary of Two Parliaments," and a novel, "Gideon Fleyce." On the death of Mr. Tom Taylor, who in succession to Mr. Shirley Brooks had written the "Essence of Parliament" for *Punch*, Mr. Lucy was invited to continue the work. This he did in a new style, now familiar as "The Diary of Toby, M.P."

Luderitzland and Angra Pequena. A German colony on the west coast of Africa. Administered by the German West African Society. Area under 100,000 sq. m.; pop. probably 100,000. Coast extends from Walvisch Bay to the Orange river. Inland it is bounded by the 20th meridian E. long., including Great Namaqualand. Angra Pequena, now called Luderitz Bight, is the port and nucleus of settlement, with Moravian missionary village of Bethany further inland. Regular sea communication with the Cape has been established. Climate favourable, but soil sterile and sandy. Water at present has to be brought from Cape Town. Natives are docile, of the Namaqua Hottentot tribes. There are copper-mines. Herr Luderitz, who is supposed to be dead, effected purchase of land from Namaquas and settled here. The German Government annexed the territory in '84-5. See DAMARALAND.

Lunacy. According to the latest returns made to H.M. Commissioners in Lunacy for England and Wales, the number of persons registered as lunatics, idiots, or persons of unsound mind, was 82,643. On January 1st, '89, the total was made up as follows:—7,795 (3,974 male and 3,821 female) private patients (excluding criminals), 74,171 (33,171 male and 41,054 female) pauper patients, and 677 (510 male and 167 female) criminal patients. These figures show an increase on the record of 1st Jan., '87, of 1 male, and a decrease of 13 female private patients, an increase of 962 male, and 766 female pauper patients, and an increase of 29 male and 7 female criminal patients. The aggregate increase for the year was 1,752 (992 males and 760 females). This considerably exceeds the average annual increase of the previous ten years (1,425), and justifies the doubt as to the permanence of the decline in the rate of increase shown by the figures of 1st Jan., '86 and '87. A remarkable fact in connection with the statistics of lunacy, is that for the four years, '85 to '88, the annual increase of males was considerably greater than that of the females while in the period ('59-'84), the proportion was almost always largely the other way.

Lunacy Acts Amendment Act, '89. See SESSION, sect. 90.

Luxemburg. The King of the Netherlands is Grand-Duke of Luxemburg, and nominates the Government; but by the Treaty of London, 1867, Luxemburg is declared neutral territory. Area, 1,706 sq. m., pop. 217,447. Capital, Luxemburg, pop. 17,964. For commercial purposes the Grand-Duchy is included in the German Zollverein. The Chamber of Deputies consists of 42 members, elected directly by the cantons for six years. See NETHERLANDS.

"**Lyall, Edna**" (Miss Ada Ellen Bayly), the well-known novelist, is the youngest daughter of the late Mr. R. Bayly, a barrister of the Inner Temple. She commenced her literary career at an early age, and her books have attained a very widespread popularity. They include "**Donovan**" (which inculcates the lesson of charity in religious differences), "**We Two**," "**In the Golden Days**," "**The Autobiography of a Slander**," "**Derrick Vaughan**," and her latest, "**A Hardy Norseman**," which first appeared in the pages of *Good Words*, '89. Statistics of a London public library recently disclosed the fact that Edna Lyall's books were in greatest demand in the list of fiction.

Lytton, Rt. Hon. Edwd. Robt. Bulwer-Lytton, and Baron and 1st Earl of, only son of the late Lord Lytton, the novelist and dramatist, was b. in 1831. Was educated at Harrow and the Univ. of Bonn, and early gave promise of the inheritance of his father's literary genius, by the publication of "**Clytemnestra** and other Poems," under the nom de plume of "**Owen Meredith**." He early entered the diplomatic service. In '63 he was appointed Secretary of Legation at Copenhagen, and the following year served in the same capacity

city at Athens. He subsequently became *chargé d'affaires* at Lisbon, and at Madrid, and Vienna, and in '72 was appointed secretary of the embassy to Paris. Two years later he was sent as Ambassador to Lisbon and in '76 was appointed Viceroy of India. His vicereignty is memorable for the proclamation of the Queen as Empress of India, and for the declaration of war upon Afghanistan. Lord L. resigned simultaneously with Lord Beaconsfield after the defeat of the Conservative Ministry in '80. He was raised to the rank of an earl in the same year. Lord Lytton was in '87 appointed Ambassador to Paris in succession to the late Lord Lyons. In addition to the volume of poems already mentioned, Lord L. is the author of "**Lucile**," "**Tannhauser**," "**The King of Amasas**," "**Fables and Songs**," "**Glenavril**," etc., and of a Life of his father. He is Lord Rector of Glasgow University. His lordship's absence from Paris at the time of the inauguration of the Centennial Exhibition last year gave rise to much comment. It was, however, stated that he returned to London to undergo a surgical operation. His poem entitled "**Ad Esopum**" appeared in the March No. ('89) of the *Grande Revue de St. Petersburg*.

M

Macao. A Portuguese trade-port and settlement at the mouth of the Canton river, China. Has declined since the opening of the Chinese free ports. Area, 214 sq. m.; pop. 66,036. Ceded to Portugal in 1586.

McCarthy, Justin, M.P., was b. at Cork in 1830, and educated in that city. In '53 he commenced his career as a journalist in connection with a Liverpool paper, and in '60 joined the staff of the *Morning Star* as parliamentary reporter, becoming ('64) chief editor. In '68 he severed his connection with the *Morning Star*, and subsequently visited the United States. On his return in '72 he joined the editorial staff of the *Daily News*, from which he retired in '86, but which he has since rejoined. Mr. McCarthy represented Longford '79-85. He unsuccessfully contested Derry at the general election of '85, but was returned by a large majority for Longford. In '86 he again contested Derry, against Mr. (now Sir) C. E. Lewis, who was returned by a majority of three. On petition, however, Mr. McCarthy was declared to be the sitting member. He is one of the most powerful of Mr. Parnell's supporters. Mr. McCarthy is also well known as a novelist and historian, and, besides being the author of "**A Fair Saxon**," "**Dear Lady Dindane**," "**Lisley Rookford**," "**Camola**," etc., he has written "**A History of Our Own Times**," "**The Epoch of Reform**," "**History of the Four Georges**," a volume of essays entitled "**Con Amore**," and "**Prohibitory Legislation in the United States**." In '88 Mr. McCarthy brought out "**The Right Honourable**" and "**The Ladies' Gallery**" (which latter he wrote in conjunction with Mrs. Campbell Praed); and in '89 a prose translation of "**Bubaiyat**," the work of the Persian poet Omar Khayyam.

MacCunn, Hamish, the composer, was b. at Greenock, 1868, and consequently attained his majority in '89. Gained a scholarship at the

Royal College of Music. His "**Lay of the Last Minstrel**" first brought him into public notice; and, prior to the death of Mr. Carl Rosa, he had been commissioned by that gentleman to write an opera entitled "**Waverley**." An overture by Mr. M., which was produced at the Crystal Palace in '87, has brought him much popularity. His latest work is "**The Cameronian's Dream**," which is to be given by the Glasgow Choral Union.

Macdonald, Dr. George, poet and novelist, b. 1824, at Huntly, Aberdeenshire. Educated at University of Aberdeen, and subsequently at Highbury Independent College, with the idea of becoming a Congregational minister. He afterwards, however, decided to devote himself to literature. Dr. Macdonald's works are characterised by deep poetic and religious feeling, and great power of mental analysis. His views are extremely broad and liberal, and the charm of his style has a peculiar fascination. His best known works are "**David Elginbrod**," "**Alec Forbes**," "**Adela Cathcart**," "**The Portent**, a Story of Second Sight," "**Annals of a Quiet Neighbourhood**," "**The Seaboard Parish**," "**Robert Falconer**," "**The Vicar's Daughter**," "**Thomas Wingfield**, Curate," "**The Marquis of Lossie**," "**At the Back of the North Wind**," "**The Gifts of the Child Christ**," "**The Wise Woman**, a Parable," etc. Dr. M. is also an eloquent preacher and lecturer, and has during '88 frequently occupied Congregational and other pulpits.

Mackay, Charles, LL.D., b. at Perth 1814. Educated in Belgium, and witnessed the events of the Revolution of '30. In '34 he became connected with the *Morning Chronicle*, and in '44 editor of the *Glasgow Argus*. When the *Daily News* was started under the editorship of Charles Dickens, Dr. Mackay contributed to that journal the popular songs entitled "**Voices from the Crowd**." He is the author of several volumes

of poems and other works, of which "*Moments of Extraordinary Popular Delusions*" obtained a large circulation in its day. It is, however, as the author of "*There's a good time coming, boys*," and other popular songs, that Dr. Mackay is best known. A testimonial was presented to him in '88. He published his literary recollections under the title "*Through the Long Day*."

Mackenzie, Alexander Campbell, author of the oratorio "*The Rose of Sharon*" (written for the Norwich Festival of 1884). Was b. at Edinburgh '47. He studied and played as violinist in Germany ('57-62), when he became King's Scholar at the Royal Academy of Music, London. Since then, till his great success, his life was one of hard work, and his compositions, very scholarly and original, though few, were on a scale too small to make known the great genius he is now seen to possess. Mackenzie composed a violin concerto for the Birmingham festival of '85, which was very favourably received. He has produced two operas, "*Colomba*" and "*The Troubadour*," both brought out at Drury Lane by Mr. Carl Rosa, the last-named in the summer of '86. In the autumn of the same year his cantata "*The Story of Sayid*" was brought forward at the Leeds Festival. He was elected Principal of the Royal Academy of Music (g.v.) in Feb. '88, in succession to the late Sir G. Macfarren. His latest musical work ('89) is "*The Pibroch*," which Señor Sarasate (g.v.) played at the Leeds Festival.

Mackenzie, Sir Morell, M.D., was b. at Leytonstone, Essex, 1837. Educated at the London Hospital and the medical schools at Paris and Vienna; M.D. Univ. of London. Sir M. M. has been for some years physician to the London Hospital, and lecturer at that institution on diseases of the throat. In recognition of his services to her august relative, the late Emperor Frederick, Her Majesty conferred a knighthood upon Dr. Mackenzie in '88. Shortly before his death the Emperor also conferred upon Sir Morell the Grand Cross of the Hohenzollern Order, with the Star of the same Order. Dr. Mackenzie at first disagreed with the German doctors as to the nature of the disease from which His Majesty suffered, urging in opposition to them that there was no evidence of cancer. Difference of opinion, unfortunately led to a personal quarrel between Sir Morell and Dr. Bergmann. Serious charges were made by the former against the latter in the book, which he subsequently published, on "*The Fatal Illness of Frederick the Noble*" (Oct. '88). Dr. Bergmann replied by denying Sir Morell's statements, and threatening him with legal proceedings. The book in question was prohibited in Berlin ('88), but the restriction has since been removed. Sir Morell is the author of standard works on diseases of the throat, and founded the Hospital in Golden Square for the treatment of those diseases. He claims the merit of having introduced the laryngoscope into English practice. He resigned his connection with the College of Physicians at the close of '88. In '89 Dr. M. contributed to the *Contemporary Review* more than one essay on "*The Voice in Singing and Speaking*."

MacMahon, Ex-President Marshal Marie Emile Patrick Maurice de, Duke of Magenta, b. of an Irish family, at Sully, in France, July 12th, 1808. He was educated for the army at St. Cyr. From 1830 to 1848 Captain Mac-

Mahon was mostly engaged in the Algerian war. He distinguished himself in the storming of Constantine. Major in 1840, and Colonel of the Foreign Legion, he was made a General in the Crimean war, and succeeded General Canrobert at the head of a division. For his gallantry in storming the Malakoff he received the G.C.L.H. and K.G.C.B. In the Franco-Italian war he came unexpectedly upon the Austrians at Magenta, and defeated them. For this deed he was created Field-Marshal and Duke of Magenta. He was made Governor of Algeria in 1864. In the Franco-Prussian war he commanded the First Army Corps. He was forced to retreat before the Crown Prince after two preliminary battles, and suffered a crushing defeat, after having been severely wounded at Sedan. He was commander-in-chief of the French army at Versailles, which invested Paris under the Commune. In Nov. 1873 Marshal MacMahon was elected President of the Republic for a term of seven years, but resigned Jan. 1879. He was succeeded by M. Grévy, and has since retired from political life, although still a familiar figure in Parisian life.

"Macmillan's Magazine" (Bedford Street, Covent Garden, monthly) was founded October 1859. It contains articles and essays of general literary interest, and fiction. Editor, Mr. Mowbray Morris.

Macnaghten, Edward, son of Sir Edw. Macnaghten, and Bart., b. 1830. Educated at Cambridge. Called to the bar (1857); Q.C. (1880). Appointed a Lord of Appeal in Ordinary (1887), in succession to Lord Blackburn. He was returned to Parliament as Conservative member for Antrim in 1880, and continued to sit for that constituency until his appointment as a Lord of Appeal.

MacNeill, Rev. John, the successor to Rev. Dr. Oswald Dykes at Regent Square Presbyterian Church, was connected for some years with railway work—being at one time a railway porter at Inverkip. Afterwards he was engaged as a booking-clerk, but his power as a public speaker soon denoted another career for him; and in 1877 he entered Edinburgh University, and at the conclusion of his college course entered on mission work for a time. His first pastorate commenced at McCrie-Roxburgh Church, Edinburgh, where his remarkable success soon compelled the holding of the services in a circus, capable of accommodating 4000 persons. In '89 he removed to Regent Square. During the year, Mr. MacNeill has been heard on many platforms, and on more than one occasion he has occupied Mr. Spurgeon's pulpit.

Macwhirter, John, A.R.A., b. 1839, at Slateford, near Edinburgh. Elected an Associate of the Royal Scottish Academy (1863). In the following year he came to London, and was elected an Associate of the Royal Academy (1879). Hon. member of the Royal Scottish Academy (1882). Mr. M. has painted some excellent pictures of Highland Scenery. Among his recent works are "*The Three Witches*," "*Winter Morning*," "*Autumn Evening*," "*Edinburgh from Salisbury Crags*," "*Misty Gleams*," "*Harbour of Genoa*," "*Shores of Iona*," and "*Constantinople and the Golden Horn from Eyoub*," which was exhibited at the R. A. Exhibition of '88.

Madagascar. Native name *Nossi Dambo*. A large island separated by the Mozambique Channel from south-eastern Africa. Now

virtually a French Protectorate. It is about 900 miles long by 350 broad, area 228,500 sq. m., pop. 3,500,000. Capital Antananarivo, a striking and well-built town of pop. 80,000, upon a lofty hill about two hundred miles inland. Ports are Tamatave, pop. 3,000, on E.; Majunga, on N.W. An enormous mountain mass traverses the island from north to south. The soil on the eastern slopes is fertile, and the island has rich deposits of silver, copper, iron, and salt, and magnificent forests of valuable timber. Coal is found in the north-west; cattle, hides, gum, indiarubber, wax, cotton, sugar, vanilla, rice, lard, and coffee are exported to Mauritius, Réunion, and Europe. Climate very hurtful to Europeans, especially on the east coast. There are no large animals, but crocodiles abound in the rivers, and the lakes are remarkable for their enormous harvests of fish, which, with rice, are chief articles of diet amongst the poorer classes. Immense herds of cattle roam over the grassy plains. Cattle herding and agriculture are the principal occupations. Government an absolute monarchy, the Queen (Ranavalona Manjaka III.) being assisted by a Council of nobles and heads of clans chosen by herself. Power really in the hands of Prime Minister (Rainilaiarivony), who is husband of the Queen. By treaty, December 1885, a French Resident, with military escort, resides at the Court and controls foreign relations. The standing army consists of 20,000 men, armed with modern weapons; during the war, 50,000 were mobilised and trained by English officers. Christianity has taken firm root amongst the Malagasy, and a system of national education has been introduced with marked success. Total imports and exports before the war with France valued at £800,000 annually, official returns. The trade of the island has, in consequence of the war, suffered considerably. Manufactures consist of ornaments, hardware, beautifully dyed textiles made of the fibre of the palm, silk and woollen weaving. The ruling and most civilised section of the Malagasy are the Hova (central province). Other tribes are the Betsimisaraka (east coast), Sakalava (north and west coasts). They are an intelligent, industrious, and progressive people, speaking Malay dialects, and though black, are believed to be chiefly of Malayo-Polynesian origin. There are Arabs and Africans in the island, and probably some admixture. Since 1642 France has made repeated efforts to obtain a footing in Madagascar, and has long held some small islands on the coast. In 1883-5 regular conquest was attempted, but failed, a desperate resistance being offered. But the Malagasy, being unable to find any Power to aid them against the invader, were obliged to cede Diego Suarez Bay, to be formed into a French naval station, to pay £800,000 war indemnity, and to enter into a treaty giving France the control of foreign relations. Early in 1887 French troops withdrawn. During the year rupture of French Resident with Hova Government on account of alleged British encroachments. Peaceable solution of difficulty. A most successful journey was during '89 made right across Madagascar, from Tamatave, *via* Antananarivo, to Majunga, by Colonel and Mrs. Colville. This was the first time that any lady had accomplished such a journey. They received unequalled kindness and assistance from the French Resident-General, who accompanied them to the capital, and finally placed a French

man-of-war at their disposal to convey them to Mozambique. Consult Sibree's "Great African Island"; Shaw's "Madagascar and France"; Leroy's "Les Français à Madagascar"; and the *Antananarivo Annual*.

Madeira Islands. A group off N.W. African coast, belonging to Portugal, and regarded as an integral part of the kingdom. Area, 505 sq. m., pop. 132,223. Capital and port Funchal, a fine town of 20,000. Climate and scenery renowned. Products, wine, fruit, sugar, coffee. People Portuguese. A celebrated sanatorium. Wine has lost its former excellence, and trade is not what it was. The group consists of the two islands of Madeira, and Porto Santo, and the three islets called the Desertas. Discovered 1420. Consult "Reports of H.M.'s Consuls, '82, Part ix., and '84, Part vii. (Madeira)."

Madras. See INDIA. For Ministry, etc., see DIPLOMACY.

Magdala. A hill-fort in Abyssinia (*q.v.*), taken and destroyed by a British force, '68.

Magenta, Duke of. See MACMAHON.

Mahaffy, Rev. John Pentland, D.D., was b. in Switzerland, 1839. Received his early education in Germany, but at the age of seventeen matriculated at Trinity College, Dublin, where he graduated in '59 with high honours both in Classics and Philosophy. Since '71 he has held the chair of Ancient History in that college. In '82 he was elected an honorary Fellow of Queen's College, Oxford. Prof. M. is a kind of "Admirable Crichton," being an excellent musician, an expert angler, a crack shot, and an accomplished cricketer, as well as an eminent scholar and philosopher. He was for some time precentor of the Chapel at Trinity College. He is the author of many learned works, amongst which the best known are those illustrative of old Greek life. He has recently contributed, with the collaboration of Mr. Arthur Gilman, "Alexander's Empire" to "The Story of the Nations" Series. For Professor Knight's series of "Philosophical Classics for English Readers" Professor M. has written "A Sketch of the Life and Teaching of Desocartes."

Mahé. Chief of the Seychelles Islands (*q.v.*).

Maintenance. Word used in law to signify the illegal helping of one person as against another in carrying on a law-suit.

Malacca. A town and territory of the Straits Settlements (*q.v.*).

Maldivé Islands (The Thousand Islands). An extensive chain of coral islets, 500 m. due west of Ceylon, forming seventeen atolls, each enclosing deep lagoons fringed with reefs. Richly clothed with cocoanut palms. Sultan pays yearly tribute to the Ceylon Government.

Mallock, William Hurrell, was b. 1849. Graduated at Balliol College, Oxford, and obtained second-class honours in the Final Classical School; Newdigate prize (1871). Mr. Mallock is a frequent contributor to the monthly magazines, especially to the *Nineteenth Century*. Among his published works are "The New Republic," "The New Paul and Virginia," "Is Life Worth Living?" ('79), "A Romance of the Nineteenth Century" ('82), "Property and Progress" ('84), "Atheism and the Value of Life" ('85), "The Old Order Changeth" ('86), in each of which he, in one form or another, propounds his political and social views, which may be termed philosophical conservatism. In Nov. '89 there appeared Mr. M.'s experiences

in Cyprus, under the title of "In an Enchanted Island."

Malta. Anciently *Malta*. Situated in the Mediterranean, 56 miles south of Sicily. Is a British Crown colony and stronghold. With lesser islands, Gozo and Cumino, area 117 sq. m., pop. 160,679, exclusive of garrison, about 10,000.—**Capital** *Valetta*, a fine city, impregnable fortified, commanding a noble harbour. It is a great naval station, with dockyards and arsenals, and seat of some commerce. To the west of *Valetta* is *Porto De San Paolo*, the traditional scene of St. Paul's shipwreck.—Originally barren rock, Malta has been fertilised, water stored in vast reservoirs, and is now highly cultivated. It yields fine crops of grain, cotton, vegetables, fruit, etc., and has extensive pastures. Climate dry and healthy.—**Executive** in the hands of a military Governor and **Executive Council**.—A **New Constitution** was provided for by letters patent issued in Dec. '87. Legislative Council to consist of Governor as president, without vote; 6 official members; 4 members who will represent clergy, nobility, landowners, the University, and merchants, on basis of £60 franchise; and 10 members elected by present electorate, but for single constituencies instead of *scrutin de liste* as formerly. Elected members to have full control of finance and local matters, and 3 of them to be salaried members of Executive Council. Right of veto reserved to Governor; right of legislation by letters patent or order in council reserved to Crown. Salaries and pensions provided for by permanent civil list of £38,000. A **Royal Commission** to divide the dependency into electorates was appointed.—The forts require 25,000 men to man them in case of siege. There is a regiment of Malta Fencible Artillery. For financial statistics see **BRITISH EMPIRE**, etc. (table). Gardening, agriculture, pastoral farming, and fishing, are the pursuits of the people, who are of African origin, with Italian and English admixture.—In 1522 Malta came into the hands of the Knights of St. John. It was taken from the Order by Bonaparte in 1798, and was captured from the French by the British in 1800, assisted by the Maltese. Finally annexed 1814. The central position of Malta in the Mediterranean makes it an important commercial depot, and an invaluable naval station. Accordingly the British have provided it with excellent docks and strong fortifications. A serious disturbance occurred in April, '89, between soldiers and civilians, five men on each side being wounded. Steps were taken to prevent a recurrence of the disturbance. For Governor, etc., see **DIPLOMATIC**.

Mammoth Hunters' Steeplechase. See **TURF**.

Man. See **ISLE OF MAN**.

Manchester Grammar School. Founded in 1515 by Hugh Oldham, Bishop of Exeter, and others. The school has three main branches, classical, modern, and scientific. Three scholarships of the value of £35 each are given yearly to boys going to the University; and the school has a number of close scholarships at Wadham and Brasenose College, Oxford, and St. John's College, Cambridge. **Head Master**, M. G. Glazebrook, M.A. **Motto**, *Sapere aude*. **Alumni**—De Quincy, Harrison Ainsworth, James Bradshaw (the Manchester Martyr), General Drinkwater, John Byrom, Prebendary Smith.

Manchester New College, founded in Manchester 1786, now at Oxford, "exists for the

purpose of promoting the study of Philosophy, Theology, and Religion, without insisting upon the adoption of particular doctrines." No subscription or doctrinal statement is required either of trustees, professors, or students. Exhibitions and free admission to lectures are given to students for the ministry, without restriction as to the sect in which they will minister. The lectures are open to all persons on payment of fees. **Principal**, Rev. James Drummond, LL.D. The centenary of the institution of the College was celebrated in '86.

Manchester November Handicap. See **TURF**.

Manchester, Rt. Rev. James Moorhouse, Lord Bishop of. The see was founded 1847; income £4,200. His lordship was b. at Sheffield, 1826. Educated at St. John's Coll., Cambridge, graduated B.A., Sen. Opt., 1853, M.A., 1860, D.D. *jura dig.* 1876. Was ordained deacon 1853, and priest 1854, by the Bishop of Ely. Consecrated Lord Bishop of Melbourne 1876, where he succeeded Dr. Perry, and translated to Manchester 1886. Formerly curate of St. Neots 1853-55, Sheffield 1855-59, Hornsey 1859-61; perpetual curate of St. John, Fitzroy Square, 1861-67; vicar of Paddington and rural dean 1867-76; Warburtonian Lecturer 1874; chaplain-in-ordinary to the Queen, and prebendary of Coddington Major in St. Paul's Cathedral 1874-76. His lordship is also known as the author of "Nature and Revelation—Four Sermons," 1861; *Hulsean Lectures* ("Our Lord Jesus Christ the Subject of Growth in Wisdom") 1865; "Jacob—Three Sermons before the University of Cambridge," 1870; and "The Expectation of Christ." Dr. M. presided at the **Oxford Congress (q.v.)** held at Manchester, Sept. '88.

Manchester Ship Canal. This great engineering scheme, which is to convert the cotton metropolis, Manchester, into a seaport, was introduced in the shape of a parliamentary bill early in the session of 1883. (For early history of this scheme, the original project, and the amended plan, with details of progress to Jan. '88, see ed. '88.) On Nov. 11th, '89, the works were commenced at **Eastham Ferry**, on the Cheshire side of the Mersey. Two articles on the general subject of the Canal appeared in the *Times* of June 6th and 7th, '89. It was asserted that the appearance of things seemed to point to the waterway, etc., being ready for traffic by Jan. 1st, '92. The half-yearly report presented at the meeting in August '89, after dealing with financial matters, which were in a satisfactory condition—in all the expenditure had been £5,427,231 and the receipts £5,565,496—continued by stating that during the half-year good progress had been made with the works, and at the present rate the contractor would be able to complete in time. There were then on the works 163 locomotives, 566 waggons, 96 steam navvies, 121 steam cranes, and 32 steam pile engines; 20½ miles of temporary railway had been made, and there were upwards of 12,000 men and boys and 173 horses at work. At the meeting on Aug. 26th Lord Egerton of Tatton, the chairman, said that at the rate they were going on the whole of the excavations would be complete in three years from the commencement.

Manchester (Thirlmere) Water Supply. This great work has been commenced, the idea being to convey to Manchester the waters of Thirlmere, in the Lake district. The contracts for the first part were let towards the end of 1885,

the **best works** consisting of some $\frac{3}{4}$ miles of tunnelling, and $\frac{1}{2}$ mile of open cutting. The aqueduct is to convey 50,000,000 gallons of water daily. After leaving the tunnel, the aqueduct, it is arranged, will appear in the valley leading to Grasmere, keeping to the high land above Rydal and Windermere, and passing under Chapel Green, Nab Scar, and Skelgill Wood. After crossing Troutbeck, the water, passing through inverted iron siphon pipes, covered with earth, will pass behind several residences by means of a tunnel, leaving Windermere railway station two miles to the east. Then the valleys of the rivers Kent, Lune, and Ribbles will be crossed by inverted siphon pipes, and the rivers by bridges, till the neighbourhood of Bolton is reached; when the water will pass through cast-iron pipes chiefly laid along main roads to the Manchester reservoirs. It is calculated that there will be nearly thirty-three miles of 40-inch cast-iron siphon pipes, nine miles of 36-inch piping, and about eighteen miles of 33-inch. The works are still in progress.

Manilla. Capital of the Spanish colony of the Philippine Islands (*q.v.*); pop. 182,242.

Manistey, Sir Henry, b. in 1808 at Edlingham, of which parish his father was vicar. Educated at Durham Grammar School. Practised as a solicitor ('30-42). Called to the bar at Gray's Inn ('45). He rapidly acquired an extensive practice, Q.C. ('57). Appointed a judge of the Queen's Bench Division of the High Court of Justice ('76). Sir H. M. has given during '89 many important decisions.

Manitoba. A province of the Dominion of Canada, formerly known as the **Red River Settlement**; entered the Dominion in 1870. It takes its name from Lake Manitoba, which is situated 60 miles S.W. of Lake Winnipeg. Area, 73,720 sq. m.; pop. 130,000. Capital Winnipeg, at the junction of the Assiniboine and Red rivers. Province divided into counties, which are grouped into eastern, central, and western. District of Keewatin now under government of Manitoba. General surface a level prairie, 80 feet above Lake Winnipeg and 700 feet above the level of the sea. Principal stream the Red River, which rises in Minnesota, U.S., flows north through the province for 140 miles, and empties itself into Lake Winnipeg. Climate healthy, but great extremes of temperature. Owing to dryness of atmosphere, winter cold not felt severely, snow falls lightly, and horses winter on the prairies without shelter. Soil very fertile, wheat being staple crop, and yields abundantly, twenty-five bushels to the acre being commonly raised. All other cereals, roots, and fruits of Europe thrive well. Flax and hemp have also been grown with success. The prairie grasses furnish excellent pasturage and good hay. Large numbers of horses, cattle, sheep, and swine are raised. Wood is scarce, and is chiefly confined to narrow strips along the Red and Assiniboine rivers. Principal trees are elm, oak, maple, and poplar, spruce, cedar and fir also occurring; the ash-leaved maple yields sugar. Rivers and lakes swarm with fish of several kinds. Game is plentiful, and coal abounds throughout the province. **Executive** vested in a Lieutenant-Governor appointed by the Governor-General of the Dominion, and an Executive Council, consisting of 5 members, with a Legislative Assembly, numbering 31 members, elected by

districts for four years. Three members are called to the Dominion Senate, and five elected to the House of Commons. Religion and education are provided for in Winnipeg and other centres. Laws are enacted to protect and further agriculture, and stringently enforced. Grain-growing and other kinds of farming are the main industries. The Canadian Pacific Railway (*q.v.*) traverses the province; there are local branches, a junction with the United States systems, and a line is to be built through Keewatin to Hudson Bay. Serious disputes with the Red River Railway Co. took place in '88. Quarter section of square mile = 160 acres, free grant. Lands reserved to support free education. Many half-breeds among the population. In August '89 the Government issued its official bulletin, stating that the yield of wheat from that province was estimated to average fourteen bushels an acre, which was below the average; this was due to the great drought which had been experienced. See CANADA; and for Ministry see DIPLOMATIC. Consult Bryce's "Manitoba," Macoun's "Manitoba and the Great North-West," etc.

Manning, His Eminence Henry Edward, Cardinal, Archbishop of Westminster, was b. 1808. Educated at Harrow and Balliol Coll., Oxford. Graduated (1830), and became Fellow of Merton Coll. Rector of Lavington and Graftham, Sussex (1834-40); Archdeacon of Chichester (1840-51). Resigned these preferments (1851) and joined the Church of Rome. He was ordained a priest of the Roman Catholic Church (1851), and appointed rector of St. Helen's and St. Mary's, Bayswater, where he founded a congregation entitled the "Oblates of St. Charles Borromeo." The degree of D.D. was conferred upon him at Rome. On the death of Cardinal Wiseman he succeeded him as Archbishop of Westminster (1865); Cardinal (1875). Besides numerous volumes of sermons, he has written a large number of works on the doctrines of the Church of Rome and its relations with civil society, including "The Temporal Power of the Pope," a reply to Mr. Gladstone's "Exposition," as to the Vatican Decrees (1875), "The True Story of the Vatican Council," etc. Cardinal Manning takes a leading part in all the social (see STRIKES) and philanthropic movements in the Metropolis; and is also an earnest supporter of temperance, being President of the Catholic Total Abstinence League of the Cross.

Mansfield College, Oxford. Established for the education of men for the Nonconformist ministry, but its classes are open to all persons possessed of the requisite academic qualifications. It is purely theological, and its students must, before entering on its distinctive studies, be graduates of some recognised university, or undergraduates of Oxford who have passed Moderations. It has two kinds of **Scholarships**: (1) Arts, value £60 a year, tenable by undergraduates at any college in Oxford (other than Mansfield); (2) Theological, value £60 a year, with tuition free, tenable during the course at Mansfield, which extends over three years. The staff consists of five Professors and as many Fellows. The lectures have been held in temporary premises, but handsome buildings in the early Perpendicular style, from designs by Basil Champneys, Esq., were opened on Oct. 15th, '89, when most cordial wishes for the success of the College were expressed by many distinguished heads of colleges and others.

Mansion House Conciliation Committee. See STRIKES.

Manlaughter. See CORONERS' INQUESTS.

Manufacturing Inventions, '89. See INVENTIONS.

Margarine Act, '87 (see PARLIAMENTARY SESSION, ed. '87), enacts that substances, whether compounds or otherwise, prepared in imitation of butter, and whether mixed with butter or not, shall only be sold under the name of "Margarine"; and every package, whether open or closed, containing that substance shall be branded or durably marked "Margarine" on the top, bottom, or sides, in printed capital letters not less than $\frac{1}{4}$ in. square; there is to be attached to each parcel exposed for sale by retail, and in such manner as to be clearly visible to the purchaser, a label marked in printed capital letters not less than $\frac{1}{4}$ in. square "Margarine"; and the paper wrappers in which the article is delivered to the purchaser are to have the word printed on them in capital letters not less than $\frac{1}{4}$ in. square. The Act came into force Jan. 1st, '88.

Margarita, or Nueva España. An island off the coast of Cumana, Venezuela, to which it belongs. Formerly the seat of extensive pearl fisheries.

Marianne Islands, or Ladrões. A group in N. Pacific, east of the Philippines, discovered by Magellan, 1521. Capital, San Ignacio de Agaña, which serves also as a penal settlement. Area 440 sq. m., pop. 8,665. See COLONIES OF EUROPEAN POWERS.

Marie-galante. A West Indian island in the Leeward group. A possession of France, included in colony of Guadeloupe. Area 60 sq. m. Is hilly, producing a little cotton and coffee.

Marine Biological Laboratories. Institutions near the sea-shore, provided with dredging apparatus, tanks, and scientific instruments, for scientific study. The object is the study of marine animals, for the twofold purpose of gaining information as to the habits of our food fish and extending our knowledge of marine zoology and botany. They are thus of commercial and scientific importance. On the European and American coasts several laboratories are in existence. Of the former the one on the Mediterranean at Naples, founded by Dr. Dohrn, is the most important. Its cost has been about £20,000, and its annual expenses are about £4,000. A marine laboratory has recently been established in Japan, under Professor Mitsukuri. The United States Fish Commission have erected several small laboratories, and are now laying out £10,000 on one at Wood's Hole, and £20,000 on fishponds protected by piers of masonry. This Commission has received in all from the Imperial revenue some £300,000. In England a Marine Biological Association has been founded, towards which a site at Plymouth, a sum of money, and an annual income has been granted by the Government. The Fishmongers' and other City Companies, the leading English scientific societies, and private individuals have subscribed. Altogether above £15,000 has been raised. The Laboratory was formally opened on June 30th, '88, and soon afterwards naturalists began to make use of the facilities afforded by it for research. The record of work done in the Laboratory is to be found in the *Journal of the Association*, published at Plymouth. Pres., Professor Huxley; Hon. Sec., Professor Ray Lankester; Sec. and resident director, Mr. G. C. Bourne.

Marine Insurance, '89. See INSURANCE.

Market Rights and Tolls, Royal Commission on, was appointed in '87 to inquire as to the extent to which market rights are in the hands of (1) local authorities; (2) trading companies; and (3) private persons or bodies of persons other than trading companies; and to inquire generally how and under what authority such rights are exercised; what are the revenues in respect of those rights (distinguishing the receipts from tolls, rents, stallages and other dues from other sources of receipt); what is the accommodation given in return for the charges levied; in what ratio market tolls and dues stand to the value of the marketable commodities on which they are levied, and how far market rights, market by-laws and regulations, market tolls, rents, stallages, and dues and tolls affecting market towns are restrictive of trade; and to report as to the advisability of local authorities acquiring existing market rights, and the arrangements desirable for that purpose, and as to the advisability of prohibiting the farming by local authorities of market tolls, rents, stallages and other dues, and the placing of restrictions on the sale of goods outside the market that may be lawfully sold in the market, and also of providing that the tolls, etc., of markets held by local authorities shall from time to time be revised with the view to their being regulated by the necessary expenditure in connection with the markets, and that such markets shall be free and open when the capital charges in respect of them have been paid off by the incomes from the markets or otherwise; and also to report generally as to the existing law relating to markets, having due regard to the interests of those concerned. The Commissioners are Lord Derby (chairman), Lord Balfour of Burleigh, Mr. Childers, M.P., Sir J. P. Corry, Bart., M.P., Sir T. Martineau, and Messrs. C. J. Elton, M.P., F. W. Maclean, M.P., Spencer Charrington, John J. Harwood, William C. Little, J. A. Pictou, Pierce Mahony, M.P., and H. A. P. Rooke (secretary). The Commission issued their first Report in October '88. It contains much interesting information respecting the markets under the control of the Corporation of the City of London.—The following is a schedule of the inquiries held up to 31st Oct., '88 (according to vol. iv. of the Commissioners' Report, issued Sept. '89) by Mr. Cecil M. Chapman, Assistant Commissioner:—Banbury, Bedford, Berwick-on-Tweed, Bradford, Carlisle, Cockermouth, Croydon, Darlington, Durham, Faringdon, Guildford, Halifax, Harrogate, Huddersfield, Hull, Hungerford, Kingston-on-Thames, Leeds, Leighton Buzzard, Luton, Middlesbrough, Newbury, Newcastle-on-Tyne, Oxford, Penrith, Pontefract, Reading, Scarborough, Sheffield, South Shields, Spennymoor, Stockton, Sunderland, Wakefield, West Hartlepool, Whitby, York.

Markets and Fairs, Weighing of Cattle Act, 1887, enacts that in or near to every market and fair in which tolls are taken, accommodation for weighing cattle shall be provided. The Local Government Board may exempt any market or fair where the sale is likely to be so small that it is inexpedient to enforce the Act.

Mark Twain. See CLEMENS.

Marks, H. Stacy, R.A., whose pictures in the Royal Academy have constantly been among the most popular of those exhibited there of later years, was elected R.A. in '79.

His subjects have not infrequently partaken of a humorous nature, and an adaptation of one of his pictures to the purposes of advertisement is too well known to be specified.

Marlborough, Rt. Rev. Alfred Earle, D.D. Bishop of, Suffragan Bishop of London, was b. 1832. Educated at Oxford, and ordained deacon in '58 by the Bishop of Sarum. Was for some time vicar of Marlborough, and afterwards of West Alvington, in the diocese of Exeter. Appointed Archdeacon of Totnes in '72, and Canon Residentiary and Prebendary of Exeter in '65. His recent appointment as rector of St. Michael's, Cornhill, and Bishop Suffragan of London, under the title of Bishop of Marlborough, was made, it is understood, on the strong recommendation of Dr. Temple, the Bishop of London, with whom Dr. E. actively co-operated at Exeter. The living of St. Michael's, Cornhill, is worth £1,500 a year. Dr. E. is a moderate High Churchman.

Marlborough College, Wiltshire. Founded 1843, incorporated by royal charter 1845, received additional charter 1853. Exhibitions to Universities, one each of £50, £40, and £30 for three years, offered annually, and every three years the "Old Marlburian," £50, the Council Exhibition £30, and Leaf Exhibition £22 10s., fall vacant. Pupils, 580. Head Master, Rev. G. C. Bell, M.A.

Marquesas Islands. A Polynesian group belonging to France. Area 478 sq. m., pop. 5,776. Chief island Nukahiva. Mountainous, picturesque, fertile. Natives handsome, warlike, barbarous. Consul Bonwick's "French Colonies," Wallace's "Australasia," &c.

Marriage-Rate. See POPULATION RETURNS. **Marriages, Jan. 1st to Nov. 21st, '89.** The following is a list of some of the more important marriages of the year:—

Abraham, Charles Arthur, 2nd s. late Canon and Hon. Mrs. Abraham—Mary Hyde, 5th d. Sir William Parker, Bart. (April 25)

Agnew, Andrew Noel, J.P. Wigtownshire, *e. s.* Sir Andrew Agnew, Bart.—Gertrude, *y. d.* late Hon. Gowran Chas. Vernon (Oct. 15)

Amherst, Earl—Alice, Countess of Lisburne (Sept. 25)

Anstruther, H. T., M.P. St. Andrews, and s. late Sir Robert Anstruther, Bart., M.P.—Hon. Eva Hanbury-Tracy, *e. d.* Lord Sudeley (Aug. 24)

Appelwhite, Col., late commanding 4th Battn. Norfolk Regt.—Mary Florence, *y. d.* Joseph Truman Mills, J.P. (April 30)

Armstrong, William H. Watson—Winifreda, e. d. Gen. Sir John Adye, late Governor of Gibraltar (June 15)

Arnold, Rev. Chas. Lowther, s. Lady Arnold and g.s. 3rd Marquis of Cholmondeley—Mary Delamere Tyler (Nov. 14)

Arnan, Earl of—Hon. Mrs. John Montague Stopford, Lady-in-waiting to Princess Christian (July 29)

Ashburton, Lord—Hon. Mabel, e. d. Viscount Hood (July 25)

Austria, Archduke Leopold Salvator of—Princess Blanche de Castile, at Vienna (Oct. 24)

Baillister, Herbert, B.A., Pemb. Coll., Oxon.—Lilian Flora Buxton, 3rd d. Major-Gen. E. Melville Lawford, 4th Madras Cav. (Feb. 27)

Barry, A. H. Smith, M.P.—Mrs. Post, wid. Arthur Post (Feb. 28)

Barton, Francis Saville, Scots Guards—Mabel Mary, 3rd d. late Capt. Frederick Sayer (Jan. 8)

Battenberg, Prince Alexander of—Fraulein

Loisinger, operatic singer of the Darmstadt Court Theatre, at Darmstadt (Feb. 6)

Bell, William—Annie, n. late Benjamin Webster (July 25)

Blaine, Gilbert Gordon—Mabel Augusta, d. late Admiral Keith Stewart (Dec. 12, '88).

Blessard, Robert—Hon. Katherine Frances, y. d. Visct. and Viscountess Chetwynd (June 6)

Bragg, William Henry, M.A., Elder Prof. of Mathematics and Nat. Philosophy, Adelaide Univ.—Gwendoline, 3rd d. Charles Todd, C.M.G., M.A., F.R.S., F.R.A.S., Postmaster-Gen. and Govt. Astronomer of S. Australia, at Adelaide (June 1)

Brassey, Hon. Thomas Allnutt, s. and h. Lord Brassey—Lady Idena Mary Nevill, d. M. of Abergavenny, K.G. (Feb. 28)

Brooklebank, Frederick Charles H., 3rd s. Sir T. Brooklebank—Isabel Katherine, d. late Capt. P. C.G. Webster, 8th Hussars (June 25)

Brooks, Marshall J., 2nd s. Thomas Brooks—Florence Margaret, e. d. Frederick F. Thomas, and g. s. Viscount Hampden (April 29)

Brown, John A., Bengal C.S.—Mary, y. d. Major-Gen. de Symons Barrow, Madras S.C. (retd.), late Insp.-Gen. Oudh Police (May 21)

Browne, Cecil Seymour, s. late Major the Hon. G. Browne—Miss Crosbie, only d. late Sir William Crosbie (Oct. 31)

Bryce, Prof. M.P.—Elizabeth Marion, d. Thos. Ashton, at Geecross, nr. Manchester (July 23)

Capel-Cure, Edward Henry, e. s. Rev. Capel-Cure, M.A., Chaplain in Ordinary to H.M., Canon of St. George's, Windsor, and rector of St. George's, Hanover Sq.—Muriel, *e. d.* P. D. N. Oxenden, J.P. (July 16)

Carr, Lloyd James—Jane Emma, e. d. Sir Henry St. John Midway, Bart. (April 24)

Cary-Elwes, Gervase Henry, e. s. Mr. V. Dudley Henry Cary-Elwes, F.S.A.—Lady Mary Winifrede Elizabeth Fielding, d. E. of Denbigh (May 11)

Casa-de-Agreda, Count de—Mrs. George L. Lovillard, of New York, at Torquay (Feb. 11)

Cavanagh, Wentworth Odienne, Capt. 1st Beds Regt., s. Gen. Orfeur Cavanagh, K.C.S.I.—Marion, d. Gen. Sir Julius Glyn, K.C.B., at Epsom Parish Church (July 30)

Oecil, Lord Edgar Algernon Robert Gascoyne, 3rd s. M. of Salisbury, K.G.—Lady Eleanor Lambton, 3rd d. late E. of Durham, and sis. of present peer, n. M. of Lansdowne (Jan. 22)

Chapman, Gen. Sir Frederick E., G.C.B., R.E.—Matilda Sara, d. late Benjamin Wood, wid. John Rapp, formerly agent and Consul-Gen. in London for Switzerland (May 23)

Charrington, Charles E. N., only s. late Charles Charrington—Monica, d. Count and Countess de Lepasture (March 19)

Chenevix-Trench, Philip—Gwendoline, and d. Sir John Heron-Maxwell (July 16)

Cheney, Edward Henshaw—Georgina Agnes, e. d. Judge Beresford, at Temple Ch. (Feb. 19)

Chetwynd, Hon. Richard Walter, only s. Visct. Chetwynd—Florence Mary, only d. Col. Naylor-Leyland (Jan. 8)

Chevellier, Comdr. Barrington H., R.N., e. s. B. Chevellier, M.B.—Janet, 3rd d. Joseph Fison, at Ipswich (Aug. 13)

China, Emperor of (Feb. 26)

Chisholm, Edward C.—Arabella, e. d. Capt. Windsor Cary-Elwes (Oct. 5)

Christie, Arthur, Capt. 14th Royal Lancers, e. s. late Robt. Christie—Lina, only d. N. Trübner, and g.w. Field-Marshal Lord Napier of Magdala (Feb. 27)

Mainwaring, Comdr. Guy, R.N., *s.* late Admiral Rowland Mainwaring—Gertrude Henrietta, *d.* Michael Henry Williams, D.L. and J.P. Cornwall (July 10)

Mant, Rev. Newton John, B.A., vicar of Sledmere, York—Margaret, 4th *d.* late Rt. Hon. Alex. James Heresford-Hope, P.C., LL.D. of Cambridge and D.C.L. of Oxford (Jan. 3)

McCarthy, Michael, T., M.D., R.N.—Cecil Mary, and *d.* His Honour late Judge Bere (June 25)

McGunn, Hamish, Scottish composer—Allison Quiller, only *d.* Mr. Pettie, R.A. (June 3)

McDougall, Archibald Blair, M.A., minor canon of Ely—Ada Mary, *d.* late John Croome Lane (April 30)

McRae, John, of Black Watch—Ellen, and *d.* George Gilstrap, *n.* Sir William Gilstrap, Bart. (March 4)

Metaxas, Dr. Themistocles, *n.* Dr. Stavros Metaxas, the famous oculist of Marseilles—Mary Eumorfopoulos, *d.* Greek merchant in London, and *s.* Mrs. John Ralli, at "Aglia Sophia," Bayswater (June 15)

Mildmay, Capt. Wyndham F. St. John, *e. s.* Rev. Arundel St. John Mildmay—Hon. Alice Hamilton Russell, *e. d.* Visct. Boyle (July 27)

- Miller**, John A., *y. s.* late Sir William Miller, Bart.—*d.* late Capt. William Mitchell-Innes, at Ayton Castle, Berwick (Sept. 30)
- Mitchell**, Lt.-Col. Sir Charles Bullen Hugh, K.C.M.G., late Royal Marines—Eliza Conway, and *d.* Rev. J. J. Wellidon, D.C.L., vicar of Kennington, and Hon. Canon of Canterbury (Jan. 10)
- Moltano**, Percy A., *s.* late Sir John Moltano, First Premier of Cape Colony—Miss E. M. Currie, and *d.* Sir Donald Currie (Sept. 18)
- Morston**, Lord, *e. s.* Earl of Ducie—Ada, *e. d.* Dudley Robert Smith (Dec. 18, '88)
- Morley**, A. Noce—Jessie M. J. Ford (Oct. 24)
- Morris**, Edward Ashurst, M.A.—Minnie, *e. d.* Sir John Puleston, M.P. Devonport (July 2)
- Morris**, George Lockwood, *n.* Sir John Armie Morris, Bart.—Elizabeth, 3rd *d.* Thomas Cory, colliery proprietor (March 5)
- Mulholland**, Alfred—Mabel, *e. d.* Mr. and Lady Rachel Sanderson (June 1)
- Murdoch**, Capt. John Burn, R.E.—Maud, *wid.* late Hon. William Forster, agent-general for New South Wales, at Sandhurst (Aug. 6)
- Naylor-Leyland**, Herbert, and Life Guards—Jeanie, and *d.* Mr. W. S. Chamberlain, of Cleveland, U.S. (Sept. 5)
- Nevill**, Lord William, *y. s.* M. of Abergavenny—Milla, *d.* Murietta, *d.* Marquis de Santurce (Feb. 12)
- Newcastle**, Duke of—Kathleen Florence, *d.* Major and Hon. Mrs. Candy, at All Saints', Margaret St. (Feb. 20)
- Nisbett**, North More, *s.* Mr. and Lady Agnes More Nisbett—Hon. Mary, *g.d.* Field-Marshal Lord Napier of Magdala, Constable of the Tower (May 21)
- Nordheimer**, William—Ethel Maud Parkinson, *e. d.* James Parkinson Taylor (Jan. 16)
- Oakeley**, Charles John, *e. s.* Sir Charles Oakeley, Bart.—Enily, *d.* Col. Andrew Green, late Rifle Brigade, and R. H. Chelsea (Aug. 13)
- Oliver**, Henry St. John—Edith, *y. d.* Dr. Edward Stewart, M.R.C.S. (Nov. 2)
- Orde**, Somerville, J.P. Suffolk—Margaret Susan, 4th *d.* Rev. James Stracey, M.A. (April 25)
- Orr-Ewing**, C., *s.* Sir Archibald Orr-Ewing, Bart., M.P.—Hon. Beatrix, *d.* Lord Ruthven (Dec. 5, '88)
- Perrett**, M.—Mlle. Carnot, *n.* M. Carnot, French President (Jan. 9)
- Phillips**, Edgar Vaughan, M.R.C.S.L., L.R.C.P.—Mary Louisa, *e. d.* Thos. Macaulay (Jan. 8)
- Pitt**, A. Fox, *s.* Gen. Pitt-Rivers—Alice Ruth, *d.* Lord Henry Thynne (April 25)
- Portland**, Duke of, Master of the Horse—Dallas Yorke, only *d.* Thomas Yorke Dallas Yorke (June 11)
- Powell**, Henry Lloyd, Royal Horse Artillery—Mildred Eileen May, 4th *d.* late Col. Patrick Lewis Cole Paget, at Farnham (Oct. 12)
- Pratt**, George—Florence Dickenson, *n.* Colonel North (Aug. 31)
- Primrose**, George Anson, R.N., 4th *s.* Hon. B. F. Primrose, C.B.—Mary Cecilia, *e. d.* Thos. E. Kenny, of Halifax, Nova Scotia (April 30)
- Prussia**, Prince Frederick Leopold of—Princess Louisa of Schleswig-Holstein, at Berlin (June 24)
- Pulsine**, Rt. Rev. John James, Bp. of Penrith—Louisa, 3rd *d.* Rev. Penrynian Warton Worsley, canon resid. Ripon Cathedral and rector of Little Ponton, Grantham (April 24)
- Ralkas**, Henry St. John Digby, *e. s.* Postmaster-Gen.—Linda, *d.* late Gen. Dan. H. Mackinnon (July 23)
- Ramsden**, Major H. T. Smyth, Madras S.C., 3rd *s.* Rev. C. H. Ramsden, M.A., vicar of Chitham, Canterbury—Hon. Edwyna S. E. Fiennes, and *d.* Lord Saye and Sele (Aug. 20)
- Reeks**, Rev. Charles, *e. s.* C. F. Reeks—Edith, 5th *d.* Lt.-Gen. Hill (April 30)
- Richards**, Herbert Melville—Evelyn Augusta, *d.* Rev. Rolla C. M. Rouse (Feb. 28)
- Roche**, Hon. Alexis Charles Burke, 3rd *s.* late Baron Fermoy, and *br.* present peer—Maude Goschen, *e. d.* Chancellor Exchequer (April 24)
- Rooper**, Percy Lens, C.E., P.W.D., *y. s.* Capt. Rooper, late Rifle Brigade—Alice Nancy, *e. d.* T. B. Royden, M.P. (June 27)
- Routledge**, Leonard Arthur, and *s.* Col. Robert Routledge—Mabel Kate, and *d.* Mr. Walter Gilbey (July 5)
- Rowley**, Major the Hon. W., *br.* Lord Langford—Mabel, *d.* William Leigh (July 24)
- Russia**, Grand Duke Paul of—Princess Alexandra of Greece, at St. Petersburg (June 15)
- Russia**, Grand Duke Peter of, *s.* Grand Duke Nicholas, *br.* of the Tzar—Princess Militza, and *d.* Prince of Montenegro, at the Imperial Castle, Peterhof (Aug. 7)
- Savage**, Rev. E. Sydney, vicar of St. Mark's, Barrow-in-Furness—Sybil, 4th *d.* Ven. Archdeacon Farrar (June 25)
- Schreiber**, Actor Lemuel, Lieut. Roy, Engineers—Evelyn Amy, 4th *d.* Col. E. D'Arcy Hunt (June 18)
- Scott**, Hon. John, *s.* Lord Montagu—Lady Cecil Victoria Kerr, *d.* Marquis and Marchioness of Lothian (June 3)
- Shaw**, John—Emma Alderson Wilberforce Wistar (April 23)
- Skelmersdale**, Lord, Royal Horse Guards, *e. s.* Lord Chamberlain and Countess of Lathom—Lady Wilma Playdell-Bouverie, only *d.* Earl of Radnor, at Britford, nr. Salisbury (Aug. 15)
- Skelton**, Tom, well-known steeplechaser—Helen Trevor, 3rd *d.* Councillor Joseph Trevor, ex-Mayor of Lichfield (Jan. 3)
- Smith**, Abel Henry, *e. s.* Abel Smith, M.P.—Hon. Isabella Anna Brownlow, 4th *d.* late Lord Lurgan, and *sis.* of present peer (July 17)
- Smithett**, Lieut. Henry Cecil East, 1st York and Lancaster Regt.—Coralie Charlotte Moore-Harrington (Nov. 11)
- Smythe**, William Grenville, J.P. and D.L. Lincs.—Annie Lillie, *e. d.* Cosmo Gordon (Feb. 6)
- Spencer**, Capt. J. Trevor, Essex Regt.—Lilian, *d.* Robert Gordon (Jan. 23)
- Stafford**, Edward Tytler Stafford Howard, *e. s.* Sir Edward Stafford, G.C.M.G.—Teresa Enriqueta Carmen, *e. d.* Don Federico Kruls, of Buenos Ayres (Dec. 22)
- Stanley**, Hon. Edward George Villiers, Gren. Guards, *e. s.* Lord Stanley of Preston, Gov. Gen. of Canada—Lady Alice Montague, *y. d.* Duke of Manchester (Jan. 5)
- Strahan**, James Andrew, M.A., LL.D., of Mid. Temple, bar.-at-law, Regius Prof. of English Law, Queen's Coll., Belfast—Emma, only *d.* Baron William Pergler von Perglas, and *g.d.* Rev. Sir Henry Dryden, Bart. (Dec. 20)
- Sutherland**, Duke of—Mrs. Mary Caroline Blair, *m.* at Church of Good Shepherd, Dunedin, Florida, U.S.A. (March 4)
- Swinburne-Banham**, J. C.—Marion, 3rd *d.* Sir Spencer Wells, Bart. (Nov. 2)
- Swire**, John—Emily Hamilton Campbell Kidston (April 4)
- Sykes**, Dudley Whitworth—Harriett A. F. Stead (June 1)

Templer, Major James Broke Lethbridge, *c. s.* late J. A. Templer, Master of H.M. Court of Exchequer, N.R.R. Instr. of Ballooning—Florence Henrietta, 3rd *d.* John Saunders Gilliat, M.P. (Jan. 13)

Thomson, Basil Hume, *s.* Archbishop of York—Grace Indja, only *d.* of Felix Webber (Nov. 1.)

Thomson, Remington White, Eton Coll.—Hon. Theodora Sclater-Booth, and *d.* Lord Basing (April 11)

Thornton, Edward, *s.* Sir E. Thornton—Emma Jessie Ranson, at Slangham, Sussex (June 25)

Tredcroft, Lt.-Col. Lennox—Hon. Mary Fitzalan, *d.* late Lord Howard of Glossop (March 4)

Tranah, Benjamin Bloomfield, *y. s.* late Henry Trench—Dora, *y. d.* Mr. and Lady Caroline Turnor (July 25)

Truthbeck, Rev. Dr., Chaplain in Ordinary to Queen, and minor canon of Westminster (July 25)

Tuzle, Major William G., late 60th Regt.—Florence Caroline, *c. d.* late Sir Charles Wheatstone, at St. Leonards (Nov. 14)

Waetjen, Carlos A. Piero, *c. s.* C. J. Waetjen, Consul-General for Venezuela in Algiers—Violet Vaughan, 4th *d.* Mitchell Henry, formerly M.P. for Galway (Nov. 20)

Wainwright, William—Lady Bagge, *wid.* Sir Ernest Bagge (July 30)

Walker, James Heron, *c. s.* Sir James and Lady Walker—Maud, *c. d.* Major-Gen. and Hon. Mrs. Cecil Ives (June 12)

Wala, Alex.—Agnes Hedenström, founder and head of the Scandinavian Sailors' Temperance Home, West India Docks (Jan. 21)

Wentworth, C. B. Beaumont, *c. s.* Wentworth Beaumont, M.P.—Lady Aline Vane-Tempest, *d.* late Marquis of Londonderry, and *sis.* of present peer (Nov. 12)

Whatman, Capt. William Douglas, 20th Hussars—Anna Mildred, and *d.* S. Gurney Buxton, at Old Clatton, Norfolk (Sept. 5)

Whitehead, Arthur—Olivia Lucy Annette, *c. d.* Sir F. Darnley, Chief Justice of New South Wales, at Woolahra, Sydney (March 29)

Whitehead, George Hugh, *c. s.* Lord Mayor of London (Ald. Whitehead)—Gertrude Grace, 3rd *d.* Wm. Ascroft, J.P., at Preston (Sept. 5)

Whittick, Samuel Henry Pemberton, vicar of Heywood, Wilts—Nina Hastings, *y. d.* Sir Thomas B. Dancer, Bart., at Bath Abbey Church (July 25)

Wightwick, Dr.—Helen D'Alton, the well-known contralto singer (Aug. 14)

Wilkinson, Rev. R. W. M.A.—Florence Edith, and *d.* Col. Edmond D'Arcy Hunt (June 18)

Williams-Drummond, Hugh Henry John, Lieut. and Battn. Rifle Brigade (Prince Consort's Own)—Gertrude Emily, *c. d.* Hon. Mark Rolle (May 18)

Willoughby, Hon. Alexander Hugh, *y. s.* 8th Lord Middleton—Mary Selina Honoria, only *d.* late Gen. the Hon. James Macdonald (Aug. 14)

Wingfield, Henry Jocelyn, *y. s.* late Capt. Edward F. Wingfield, and Life Guards—Sybil Mary Kerr, and *d.* Vice-Admiral Mark Pechell (June 12)

Wodehouse, Hon. Armine, and *s.* Earl of Kimberley—Eleanor, *d.* late Matthew Arnold (June 6)

Wray, Philip Bourchier, and *s.* Sir Henry Bourchier Toke Wrey, Bart.—Alice Mary, *d.* late Capt. Borton, R.A. (Aug. 13)

Wylie, Capt. John Alfred, Madras S.C.—Amy, *c. d.* Sir Charles Munro (Jan. 22)

Marriage with Deceased Wife's Sister Bill. See Session, sect. 91.

Married Women (Maintenance in case of Desertion) Act, '86. This Act provides that it shall be lawful for any married woman deserted by her husband to summon him before two justices in petty sessions or a stipendiary magistrate. If satisfied that the husband, being able partly or wholly to maintain his wife, or wife and family, has wilfully neglected to do so, and has deserted his wife, the justices or magistrate may order him to pay to her such weekly sum not exceeding £2 as may be considered to be in accordance with his means and any means the wife may have for her support, the payment to be enforced in the same way as the payment of money under an affiliation order. The order may be varied by the justices or the magistrate upon proof given that the means of husband or wife have varied since the order was made. No order for payment shall be made in favour of a wife proved to have committed adultery, unless such adultery has been condoned; and any such order may be discharged upon proof that the wife since the making thereof has committed adultery. The Act does not extend to Scotland.

Married Women's Property Act, '82. A short historical preface is necessary to the explanation of this Act. At common law the husband and wife were regarded as one person. By marriage the woman was merged in the man. He became entitled to all her personal property and to the rents and profits of her real property. He also became answerable for her debts. In equity a married woman was always regarded as capable of holding property, and the word and thing "separate estate" owe their origin to the Court of Chancery. The chief sources of the separate estate have been settlements, devises and bequests to the separate use of married women. Over this separate estate the married woman enjoyed all the rights of an owner, save that in gifts to her separate use it has always been usual to insert a proviso against anticipation of income. This anomalous proviso has been enforced by the courts upon a consideration of the strong pressure which may be put upon a married woman improperly to anticipate her income. In this way the common law became in a great degree obsolete in so far as it affected women of the richer class, who have been almost invariably protected by settlements. But it continued to press hardly upon married women in other classes; and the Married Women's Property Act 1870, amended by the Married Women's Property Act 1874, was designed to protect married women in the enjoyment of several important kinds of property. Both of these Acts have been repealed by the Married Women's Property Act 1882, the effect of which may be summed up by saying that it almost altogether annuls the effect of marriage upon a woman's right of property. In the case of all marriages contracted after the last day of 1882, the married woman, the *feme covert*, has the same rights of acquiring, holding and transmitting property which are possessed by the spinster or widow, the *feme sole*, or by the man. In the case of all marriages contracted before that day the married woman has the same rights in reference to all property accruing to her after that day. In respect of her separate estate the married woman has all the means of redress by civil or criminal pro-

readings which are enjoyed by any other owner of property. She is also liable in every respect as though she were unmarried; she is liable for her ante-nuptial debts, and to the parish for the maintenance of her husband and children. Such, subject to judicial construction, is the general effect of this statute. It provides no restraint upon the anticipation of her income by a married woman; nor does it annul such restraint, thus leaving marriage settlements nearly as useful as ever. It provides that money lent by the wife to the husband shall in the event of his bankruptcy be treated as assets, and shall not be recoverable by the wife until all other creditors have been satisfied. It does not allow husband or wife to take criminal proceedings against each other so long as they are living together. It protects as a trust in favour of wife and children a *bona-fide* insurance by the husband of his life for their benefit, and a similar insurance by the wife.

Marshall, William Calder, R.A., b. in Edinburgh 1813, and received his training under Chantrey and Bailey. First exhibited at the Royal Academy in '35; removed to London '39; A.R.A., '44; R.A., '52; *Chevalier of the Legion of Honour* '78. He has chiefly devoted himself to classical and poetical subjects. Many commissions have been received by Mr. Marshall from the Art Union, whose prize of £500 was rewarded to him for his "Dancing Girl Reposing." His "Sabrina" and "First Whisper of Love" are amongst his best known works executed for the Union. The statues of Lord Clarendon and Lord Somers were executed by him for the Houses of Parliament, and those of Sir R. Peel in Manchester and Jenner and Campbell in London are from his chisel. In '57 he was awarded the first prize of £700 for a design for a national memorial of the Duke of Wellington. Mr. M. has not recently exhibited at the Academy.

Martin, Sir Theodore, K.C.B., b. in Edinburgh 1816. Educated at the High School and University of Edinburgh, subsequently practising as a solicitor in that city. In '46 he removed to London, and in '58, under the *nom de plume* of "Bon Gaultier," published, with the assistance of the late Professor Aytoun, his "Book of Ballads," and a translation of the "Poems and Ballads of Goethe." His "Life of the Prince Consort" was written by command of her Majesty, who, on the completion of the work in '60, created him a K.C.B. The most important of his other works are translations of "Odes of Horace," the Complete Works of Horace, Schlegel's dramas, *Corregio* and *Aladin*, Goethe's *Faust*, the "Vita Nuova" of Dante, and Henrik Hertz's drama *King René's Daughter*, and a "Life of Lord Lyndhurst." In '51 he married the celebrated actress Helen Faucit. Sir T. M. was elected Reader of the University of St. Andrews in '80. His latest publications include a book on the Shakespeare-Bacon controversy, and a translation of Schiller's "The Song of the Bell." During the visit of the Queen to Wales in the early part of '89 Sir Theodore was constant in his attendance on Her Majesty.

Martineau, Rev. James, D.D., LL.D., comes of an old Huguenot family. He is a brother of the late Harriett Martineau, and was b. at Norwich 1805. Educated at Norwich Grammar School, Dr. Lant Carpenter's School at Bristol, and Manchester New College (q.v.). He entered the Unitarian ministry in '28. After officiating for some years as minister in Dublin and

Liverpool, accepted the chair of Mental and Moral Philosophy at Manchester New College '41. Was minister of Little Portland Street Chapel '59, and Principal of Manchester New College '68. Many eminent men, including Darwin and Lyell, were occasional worshippers at Little Portland Street Chapel during Dr. M.'s pastorate. He retired from the ministry in '73, and from the professorate in '86. Dr. M. is a voluminous writer on ethical and theological questions, and amongst the best known of his works are "Studies of Christianity," "Modern Materialism," "Ideal Substitutes for God Considered," "Hours of Thought on Sacred Things," "Types of Ethical Theory," and "Study of Religion" ('88). Dr. M. is hon. LL.D. Harvard and D.D. Leyden and Edinburgh, and D.C.L. Oxford, '88. He is at present engaged on a critical work on the Gospels.

Martinique. A West Indian island of the Windward group. It is a French colony. Area 379 sq. m.; pop. 169,322. Fort Royal (or Fort de France) is the seat of government; St. Pierre, pop. 18,000, the principal town. Interior high and rocky, of volcanic origin. There are many streams. Lowlands very fertile; cultivation of sugar, coffee, cacao, and cotton largely carried on. The colony is governed as a French Department. Trade amounts to over £1,000,000. Originally settled by France in 1635, it has several times been in English hands, but was finally confirmed to France in 1814. See COLONIES OF EUROPEAN POWERS; and consult Vignon's "Les Colonies Françaises," Norman's "Colonial France."

Marvin, Charles, author and journalist, b. 1854. Spent his early life in Russia; entered the English Civil Service '75. The untoward disclosure of the Anglo-Russian Agreement led to his retirement from the Foreign Office, in '78. His first work, "Our Public Offices," attracted considerable attention; this was followed by "The Russian Campaign against the Turcomans." A series bearing upon the Russo-Asian question succeeded, of which the best known is "The Russians at the Gate of Herat." Sent on a mission to Russia by Mr. J. Cowen, late M.P. for Newcastle, to ascertain Russian views of Central Asia. Accompanied the English mission to the Czar's coronation ('83), and subsequently travelled in the Caucasus and the Caspian district. His latest works include the "Moloch of Paraffin" and "English Africa" ('88).

Mass, Days of Attending. See DAYS.

Massey, Gerald, poet and lecturer, b. at Tring 1828. His parents being very poor, his childhood was passed under all the distressing circumstances to which children were liable previous to the adoption of the Factory Acts. At the age of fifteen he obtained a situation as errand boy at Messrs. Swan and Edgar's, Regent Street, and picked up his education by reading at the second-hand bookstalls at such odd moments as he could spare. He subsequently became editor of a Radical paper, the *Spirit of Freedom*, and in '54 published the "Ballad of Babe Christabel and other Poems," which attracted the attention of Walter Savage Landor, who pointed out the great promise which the young poet gave in this volume. Mr. M. subsequently published other poems, which won for him great popularity; and for some years he wrote the poetical criticisms for the *Athenaeum*. Mr. M. has also devoted much attention to the subject of spiritualism, and has lectured with great success in England,

America, and the Colonies. Mr. M. was some years ago placed as a pensioner on the Civil List in recognition of his services to literature as "a poet sprung from the people." He has recently completed his new work on *Shakespeare*, and published "*My Lyrical Life*," 99.

Massowah. An island and town at the entrance of a bay on the African coast of the Red Sea, about 330 miles N. of the Straits of Bab-el-Mandeb. It is the natural port and commercial outlet for Tigré and Northern Abyssinia. Was an Egyptian possession till 1885-6, when taken possession of by Italy. War with Abyssinia soon broke out, and some reverse was at first experienced by the Italians, who, afterwards reinforced, have effectually made good their position, and have occupied territory to some distance inland, through which they are now pushing a railway. Massowah has been fortified, and its development as an Italian dependency may be anticipated (see ITALY).

Master and Servant. Servants are practically of two kinds—domestic servants or menials (Lat. *infra mania*, within the walls), and labourers or workmen employed with a view to profit. Domestic servants, in the absence of express stipulation, are understood to be hired for the year, subject to a month's notice by either party. They are entitled to proper lodging and food, but not, as a rule, to medical attendance. Illness and consequent incapacity to work does not render them liable to be dismissed without notice; but wilful neglect or disobedience does. On leaving service they cannot claim a character from the employer, or obtain damages for an unfavourable character which he may give *bona fide* to a person having a right to ask for information. But they can obtain damages for an untrue character maliciously given. The relation between employers on the one hand, and on the other labourers or workmen, has been regulated by many statutes. In the first place the employer in getting servants must not transgress the Factory or Elementary Education Acts. In the next place the *Truck Act* compels the employer in all the more important trades to pay his workmen in current coin, and not otherwise; and an *Act* of 1883 forbids him to pay his workmen in any premises used for the sale of intoxicating liquor. Thirdly, a variety of Acts give to the county courts and to the justices a certain jurisdiction in disputes between employer and workman, and provide for the appointment, by consent of both parties, of arbitrators and boards of conciliation, whose awards the law will enforce. As a rule, breach of the contract of service by either party now gives ground for a civil action only. But as regards merchant seamen, the captain, the employer's agent, is necessarily invested with extraordinary powers of discipline. A workman is criminally liable for a wilful breach of contract in cases where he has reasonable ground to believe that the result of such breach would be to stop the public gas or water supply, or to occasion serious injury to life or property. But in the prosecution of a trade dispute any number of persons may combine to do anything which, if done by one person, would not constitute a crime. A master is not criminally liable for any act of his servant; but he is civilly liable for everything done by his servant in the course of service. A master is now

civilly liable to one servant for injuries inflicted by the negligence of another servant. A master may bring an action for any injury done to his servant whereby he loses the benefit of the service—e.g., an assault, a seduction, etc. A master may justify an assault committed in defence of his servant, and *vice versa*. A master may maintain, *i.e.* aid and abet, his servant in an action—a thing generally unlawful. If any one wilfully entice a servant to quit his master's service, the master has an action against him and the servant. Formerly it was only by apprenticeship that persons could qualify themselves to exercise a trade. But at the present day the necessity of serving an apprenticeship survives only to a limited degree. The apprentice was an infant bound out by indenture for so many years to serve a master, who undertook to maintain and teach him, and exercised over him a parental authority. The children of parents unable to maintain them may still be apprenticed till the age of twenty-one years by the guardians or overseers to persons willing to take them. In all cases the infant's consent is necessary.—*Law on, in '89.* Cases under the Employers' Liability Act have continued to occupy the attention of the courts, which have laid down that where a person is engaged to perform dangerous work, and takes the risk of the danger, he cannot recover for an injury caused by such dangerous work. Moreover, it is incumbent upon the plaintiff to show negligence on the part of the defendants causing the injury. (*Smith v. Baker*, Court of Appeal, May 30th.)—It has been held, in the case of *Tarmouth v. Franco*, that a man who is injured by a vicious horse, as to the conduct of which he has complained to his master, is entitled to damages.—When a cab driver hires a horse and cab by the day from a cab proprietor, the latter is deemed to be his master, and to be responsible for the negligence of the driver. (*King v. The London Improved Cab Co.*, Court of Appeal, June.)—The question whether an employer is liable for the criminal act of his servant in causing smoke to issue from a furnace in the Metropolis was raised in the Queen's Bench Division (April), in the case of *Onisholm v. Doulton*. It was the first case of the kind under the 16th & 17th Vict., c. 128, sect. 1. The Court held that no negligence had been proved on the part of Sir Henry Doulton, and that he could not be held liable for the criminal negligence of his servant.

Master and Servant Act, '89. See Session, sect. 92.

Master of Faculty. See DEANS.

Master of the Rolls. See ROLLS.

Matabelerland. An extensive country in South Africa between Limpopo and middle Zambesi rivers, north of Transvaal and Bechuanaland. Is mountainous, and has been famous from a very early age for its productive gold mines. Ancient ruins of unknown origin have been seen here by Mauch, who passed through the country. Was conquered fifty years ago by King Moselekatshe and a Matabeli army, the native tribes, Maashona and Makalaka, subdued and incorporated, and a military despotism set up on the model of Chaka's in Zululand. This endures under Lo Benguela, successor of Moselekatshe. Its proximity to the British Protectorate, and its awiferous wealth, are also likely to bring Matabelerland into public attention ere long. The Matabels (near kinsmen of the Zulus) are numerous, warlike, drilled in

regiments, every able-bodied man a soldier, and they are said to be well armed. The king is an absolute autocrat, possessing unquestioned authority. It is announced that arrangements are being made for the establishment of a postal service by native runners, between British Bechuanaland and Matabeleland (Sept. '88).

Mathew, Sir James Charles, was b. in 1830. Educated at Trinity College, Dublin, where he was Senior Moderator and Gold Medallist. Called to the bar at Lincoln's Inn ('54). He was a member of the South-Eastern Circuit, and, like Lord Justice Bowen and Mr. Justice A. L. Smith, had not taken silk when he was appointed a Judge of the Queen's Bench Division. Just previously Mr. Mathew had acted as a member of the Committee on the subject of the "Costs of Legal Proceedings." Mr. Justice Mathew was the third Catholic judge appointed since the Catholic Emancipation Act, the two previous ones being Mr. Justice Shee and Mr. Justice Hayes.

Matthews, Rt. Hon. Henry, M.P. for East Division of Birmingham, and Home Secretary, is the son of the Hon. Henry Matthews, late puisne judge of Ceylon, where he was born in 1826. He was educated partly on the Continent and partly in England. Having graduated at the Univ. of Paris B.A., he studied at Univ. Coll., London, and subsequently graduated B.A. and LL.B. at the London Univ., where he obtained the Univ. Law Scholarship of £50 a year for three years. In the same year he was appointed a Fellow of Univ. Coll., the only other Fellow of the year being Bagehot the economist. In '45, when he was only eighteen, Mr. Matthews was admitted at Lincoln's Inn, and in '50 he was called to the bar. Eighteen years later he took silk, was elected a Bench of Lincoln's Inn, and was returned to the House of Commons as Liberal member for Dungarvan. From '72 to '76 he acted as Examiner in Common Law to the Council of Legal Education. In '85 he unsuccessfully contested North Birmingham as a Conservative. In July '86 he contested East Birmingham, and by the fusion of the Unionist Liberals with the Conservatives was returned. When Lord Salisbury formed his second administration after the general election, Mr. Matthews was appointed Home Secretary. He has been connected with several *causes célèbres*, notably the Borghese case, the Slade case, *Lyon v. Home* (the spiritualist), Boulton and Park, the Tichborne case, Armstrong case, Crawford divorce case, Cass case, the Trafalgar Square riots, etc. His refusal to offer a reward for the discovery of the perpetrator of the Whitechapel murders gave rise to much comment. In the celebrated *Maybrick case* (*q.v.*) Mr. M. in the exercise of his official jurisdiction commuted the sentence of death to penal servitude for life, '89.

Matterson, Nell (Australian Sculler). See AQUATICS.

Mauritius. So named by the first Dutch occupiers in 1598, after Prince Maurice of Holland. An island in the Indian Ocean 500 miles east of Madagascar, 2,000 miles from India, and 2,300 from the Cape. It is a British Crown colony. Area 708 sq. m., pop. 366,145. The island is divided into nine districts. Capital and chief port is Port Louis, pop. 30,000, connected with other centres by lines of railway and excellent macadamised roads. Dependent appanages of the colony, under the administra-

tion of its governor, are various groups in the Indian Ocean. The *Seychelles*, *Rodrigues*, the *Amirantes*, *Diego Garcia*, and the *Chagos Islands*, are the chief of them. Total area about 350 sq. m., pop. 16,000. Mauritius is mountainous, the highest peaks attaining 2,700 feet. It is well watered and fertile, vegetation luxuriant and scenery charming. Climate of the uplands delicious, that of the lowlands hot and unhealthy. Violent, frequent and destructive hurricanes. Some uncleared forest still remains, in which are deer and game. A unique native bird, the dodo, was exterminated by the Dutch. Barrier reefs surround the shore. A Governor presides over administration, which is conducted by Executive and Legislative Councils, both of Crown nominees. Staple industry is cultivation of sugar-cane. Cotton, coffee, indigo, tortoiseshell, ebony, vanilla, and aloë-fibre are also exported. For financial statistics, see BRITISH EMPIRE, etc. (table). The capital is strongly defended, but former large garrison now reduced to 400. There is a constabulary of about 1,000. The Church of England and the Roman Catholic bodies receive some State aid. There is a Royal College, and also many Government and other schools. Many of the people are of African, Hindoo, Chinese, and Malagasy race. Among the whites is a preponderance of French blood. Mauritius is the scene of St. Pierre's tale of "Paul and Virginia." The Dutch abandoned the island in 1710. In 1721 the French took possession, and the island was then called *Ile de France*. Its prosperity was founded by the French Governor, Mahé de Labourdonnais. A British force under Abercrombie captured Mauritius in 1810, since when it has remained a colony of England.—In 1886 the Governor (Sir John Pope Hennessy) became involved in serious disputes with the people. The Governor of Cape Colony was sent to investigate matters, as Royal Commissioner, and he exercised the authority delegated to him by suspending Sir J. P. Hennessy (*q.v.*), who was ordered home for further inquiry (see DIPLOMATIC). This resulted ('87) in Sir John's acquittal and reinstatement as Governor.—'89. Sir J. Pope Hennessy, in opening the session of the Legislative Council at Port Louis, announced a further extension of local government, and said that the sugar crop and financial position of the country were satisfactory; its assets being twenty lakhs of rupees in excess of its liabilities. Consult *Fleming's "Mauritius"* and "*Her Majesty's Colonies*."

Maybrick Case. Undoubtedly the most important criminal trial during the year '89 was that of Mrs. Maybrick, a lady residing at Aigburth, near Liverpool, who was charged at the Liverpool assizes with the crime of poisoning her husband. The facts were that the prisoner, who is of American origin, was married to an English gentleman, a good many years her senior, and it was apparent from the correspondence disclosed that she had been carrying on an intrigue with a person named Brierley. The case for the prosecution was that Mrs. Maybrick had administered poison in the shape of arsenic to her husband, and so caused his death; and in support of this contention evidence was adduced as to the finding of arsenic on the prisoner's dressing-gown and handkerchief, the presence of arsenic in a bottle of meat juice she had sent to her husband, and the purchase of fly-papers. The motive suggested for the crime was her intrigue with

Brierley, and her consequent desire to get rid of her husband. On the other hand, the amount of arsenic found in the body of the deceased was comparatively small, and the symptoms which invariably present themselves in cases of arsenical poisoning were not all manifested. Moreover, there was evidence as to the habit of the deceased man to dose himself with various kinds of medicines and stimulants. There was no question that there was little, if any, concealment on the part of the prisoner as to her dealings with poisons and the purchase of the fly-papers; but, on the other hand, a phrase used in a letter to Brierley contained the expression, "My husband is sick unto death," and this, it was argued, indicated a criminal knowledge on the part of the prisoner. In the result, after a long trial, Mrs. Maybrick was found guilty, and sentenced to death. The verdict excited a good deal of popular indignation, and, as the *Times* claimed, not one in three persons was prepared for such a result. A formidable agitation was at once commenced; public meetings were held, and petitions were signed, calling not merely for a reprieve, but for the free pardon of the convicted woman. In the newspapers the circumstances of the case, both medical and legal, were discussed with great force. The Home Secretary, Mr. Matthews, in the end came to the conclusion that, although there was some doubt as to whether the death of the deceased was due to the poison administered by the prisoner, yet there was no doubt she had attempted the destruction of her husband's life by administering poison to him. He therefore advised the Crown to commute the sentence to one of penal servitude for life.

Mayotta. One of the Comoro Islands (*q.v.*).

Medical Relief Disqualification Removal Act, '86. The occasion for this Act was in the passing of the Representation of the People Act of the same year, which assimilated the borough and county franchises. It was found that in rural districts many persons who would otherwise have obtained the franchise under that Act were regular recipients of medical relief given by the poor-law authorities, and would be disqualified from voting by the rule until then maintained, that by receipt of poor-relief within a certain time of the elections an elector lost his right to vote. The Act therefore provides that no person shall lose his right to be registered or vote at any parliamentary or municipal election because he has received for himself or his family any medical or surgical assistance, medicine, etc., at the expense of the poor-rate.

Medical Women. Medical degrees are granted to women by the London University and by the Royal University of Ireland, and medical diplomas by the following corporations: (1) The Apothecaries' Society of London; (2) The Conjoint Board in Scotland formed by the Royal Colleges of Physicians and Surgeons in Edinburgh and the Faculty of Physicians of Glasgow; (3) The Conjoint Board of the King's and Queen's Colleges of Physicians and the Royal College of Surgeons in Ireland. These degrees and diplomas are only granted after satisfactory examinations are passed, similar to those which must be passed by male students before these qualifications are awarded. As no person is allowed, according to the regulations of the General Medical Council, to be registered as a medical student unless he or she shall have

passed a preliminary examination in subjects of general education as specified in a list mentioned by the Council, such examination must be passed by all ladies who intend to become registered medical practitioners. The subjects are English language, Latin, Elements of Mathematics, Elementary Mechanics of Solids and Fluids, and one of the following optional subjects: viz., Greek, French, German, Italian, or any other modern language, Logic, Botany, Zoology, or Elementary Chemistry. If the student desires to obtain the degree of the University of London, or of the Royal University of Ireland, which give a higher professional status than the diplomas, she will, after passing the matriculation, have to devote a year to the study of Science, after which the Preliminary Scientific M.B. Examination of the University of London must be passed by her before beginning her medical studies or the First University Examination and First Examination in Medicine of the University of Ireland. To gain one of these degrees a lady must devote five years after matriculation to a systematic course of training. As no proper opportunities for receiving medical education by women to qualify themselves for the degrees and diplomas referred to exist in schools for male students in the United Kingdom, these deficiencies are well supplied by the London School of Medicine for Women, 30, Handel Street, W.C., of which Mrs. Garrett Anderson, M.D., is the Dean, and by the Edinburgh School of Medicine for Women, Surgeon Square, of which Dr. Sophia Jex-Blake is the Dean. At both of these schools a full course of instruction can be begun in any year. Lectures are given by eminent authorities in both schools upon all subjects connected with medicine and surgery. Both institutions contain rooms for lectures, reading, dissecting, and the study of anatomy, physiology, chemistry, materia medica, etc. There are prize scholarships connected with these schools. The students of the London School of Medicine for Women are admitted to the Royal Free Hospital, Gray's Inn Road, and the students of the Edinburgh School of Medicine to the Leith Hospital, for their practical instruction. Complete medical education for the before-mentioned degrees and diplomas can be obtained at both schools in about four years. The total fees for school hospital instruction are £105 for the London and £80 for the Edinburgh school. Students are not admitted to these schools under the age of eighteen. The winter sessions begin in October and the summer sessions in May. In Ireland lady students are admitted to the school of the Royal College of Surgeons, Ireland. Within the last few weeks Queen's College, Belfast, has also been thrown open to women, who are admitted to the ordinary classes in all subjects. The average fees for the whole course amount to about £45. The instruction there is in mixed classes, except parts of the few courses. The cost for full medical education in Ireland is 95 guineas. Students who wish to follow their studies in Dublin can obtain the necessary information from the Secretary of Council, Royal College of Surgeons in Ireland. Some of the medical women who have passed examinations entitling them to be entered on the British Medical Register have gained high distinction. Mrs. Scharlieb, who obtained the M.B. and B.Sc. degrees at the London University in '82, passed its M.D. examination in

December last, being the first lady who has done so. In July last Dr. Sophia Jex-Blake, Dean of the Edinburgh School of Medicine for Women, passed with great distinction her examinations as lecturer in the Extra-Mural School of Edinburgh. She is now one of the recognised lecturers on Midwifery of that School. The press commend this appointment, as it marks a new and very significant stage in the medical education of women movement, being the first instance of the admission of a lady as lecturer in a public school of medicine. Several medical institutions in London and the provinces for women and children are officered by registered medical women; and other public appointments, some of which are lucrative, are held by them in this country. Several lady doctors, who have qualified for the British Medical Register, are also employed by the National Association for Supplying Female Medical Aid to the Women of India, organised by Lady Dufferin in '85. The Schools of Medicine for Women in London and Edinburgh have also the advantage of the services of eminent lady doctors as lecturers.

Meissonier, Jean Louis Ernest. A French painter, b. at Lyons, 1811. Came to Paris in 1830 to study. He made very rapid progress in his art, and being gifted with an original order of talent, he adopted a particular branch of art—namely, that of painting pictures of very small size, but remarkable for the truth and correctness of the figures, the extreme fineness of touch, and precision of detail. He sent some works to the "Salon" in 1836, which attracted much attention and won high approbation. From that time till 1855 he continued to devote himself to the small works above mentioned, imparting such truth to his figures that they almost wore the semblance of life. In 1855 he received the cross of the Legion of Honour in 1845, and the grand medal of honour at the Universal Exhibition of 1855, the cross of Officer in 1856 and Commander in 1867. He was elected a member of the Academy "des Beaux Arts" in 1861. In 1864 he adopted a new branch of art, painting historic subjects in the same small dimensions. Among his famous paintings are "Napoleon and his staff, 1814," the "Battle of Solferino," etc., and he has recently completed an enlarged copy in water-colours of his famous picture "1807."

Melbourne. Capital of Victoria (q.v.), on Port Philip; pop. 360,000.

Melkite Church. See COPTIC CHURCH.

Members of Parliament, Privileges of. See PRIVILEGES OF PEERS AND MEMBERS.

Merchandise Marks Acts, '87. (consolidates and strengthens the law relating to fraudulent marks on merchandise. The Act is applied to watches; and every person who sends or brings a watch-case, whether imported or not, to any assay office in the United Kingdom for the purpose of being assayed, stamped, or marked, shall make a declaration as to what country or place the case was made in, and if the case was made in some country or place outside the United Kingdom, the assay office is to place on the case a mark differing from the mark placed by the office on a watch-case made in the United Kingdom. All goods which if sold would be liable to forfeiture

under the Act, and all goods of foreign manufacture bearing any name or trade mark being or purporting to be the name or trade mark of any manufacturer, dealer, or trader in the United Kingdom, unless such name or trade mark is accompanied by a definite indication of the country in which the goods were made or produced, are prohibited to be imported into the United Kingdom. There is a provision in the Act which renders any person who falsely represents that any goods are made by a person holding a royal warrant, or for the service of the Queen or any of the royal family or any Government department, liable to a penalty not exceeding £20. Consult the treatise by Mr. Howard Payn of the Secretary's Department of the Board of Custom.

Mercantile Marine of the World. The total number of steamships and sailing vessels in the world, of 100 tons register and upwards, in '89, is 32,662, and their estimated tonnage about 21,048,704 tons. According to Lloyd's Universal Register of Shipping, from which the following statistical tables are taken, the number of such ships belonging to the different countries in the world are as follows, viz. :—

| Countries. | No. of Ships. | Tonnage net of sailing vessels and gross of steamers. |
|--------------------------|---------------|---|
| United Kingdom | 8,930 | 9,425,183 |
| Colonies . . . | 3,087 | 1,404,019 |
| Total | 12,017 | 10,829,202 |
| America (United States). | 3,573 | 1,918,175 |
| Argentine | 104 | 36,913 |
| Austro-Hungarian | 380 | 276,294 |

| Siamese | 6 | 2,217 |
| Spanish | 24 | 10,318 |
| Swedish | 954 | 537,781 |
| Turkish | 1,460 | 462,392 |
| Uruguayan | 875 | 217,068 |
| Venezuelan | 23 | 8,227 |
| Zanzibar | 13 | 3,758 |
| Other Countries | 6 | 4,723 |
| Total | 22,662 | 21,048,704 |

The number of sailing vessels of all countries is 22,402, with a net tonnage of 9,496,603 tons. The number belonging to the above-mentioned nations and our Colonies are given in Table B. The number of steamships in the world is 10,360, having a gross tonnage of 11,558,101 tons. Of these steamers, the numbers owned by the before-mentioned countries are given in Table C. Table D. shows the number and tonnage of all ships of 100 tons and upwards built by each

iron and steel ships, though Sweden and Norway construct what merchantmen they require. There is but little for British shipbuilders to fear from competition with France, but much from Germany, as the latter is fast becoming a shipbuilding country, and now builds about two-thirds of her large requirements. No nation, however, except the United Kingdom, can now supply a demand for shipbuilding beyond itself. Much improvement in the British

of the several countries of the world during '88, as recorded in the "Universal Register." Table E. shows the material of construction of which vessels of 100 tons and upwards are built in the world in '88, and their tonnage. Table F. gives an account of the number of ships classed by each of the principal classification societies of the world.—The late Liverpool Underwriters' Registry is now amalgamated with Lloyd's Register. The figures stated above as to the latter do not include ships classed in the Society's Yacht Register. Germany and France are the only two foreign nations which build any appreciable number of

Mercantile Marine has been influenced in '89, as in the three or four previous years, by triple expansion engines, whereby much economy in fuel is effected. During the last six years first-class ocean passenger ships have been better constructed than previously, both for safety and speed, while the comfort of passengers has been further improved, and especially in the enlargement of cabins, and better food and sanitary accommodation, and the installation of the electric light, which has made great advance. As regards the extraordinary speed of ocean steamers during '89, the most noteworthy are those between Queenstown and New York and Southampton and New York. In May last the

City of Paris, of the Inman and International Line, made a voyage between Queenstown and

running was 6 days 1 hr. 47 min. The following are the daily runs of these four passages, viz. :—

TABLE D.

| Country in which built. | Whether sail or steam. | No. | Ton-nage. |

Sandy Hook, near New York, in 5 days 23 hrs. 7 min., a distance of 2788 knots. In July she made the passage in 5 days 23 hrs. 10 min., and in the following month the time of her passage was reduced to 5 days 19 hrs. 13 min., but she ran 102 less knots than in the previous voyage. For three consecutive days on this last voyage she steamed more than 500 knots, or nearly 21 knots an hour. The fastest voyage of any of the other Atlantic liners on the Queenstown route is that of the *Etruria*, of the *Omard* Line, made in June '88, when the time of

| | City of Paris. | | | Etruria. |

In the voyage from Queenstown to New York in August last, the *City of New York*, also of the Inman and International Line, was 6 days, 14 hrs., and the *Teutonic*, the new steamer of the White Star Line, 6 days 14 hrs. 20 min. in making the run. The former, however, of these last-named ships steamed 10 knots farther. As their engines are new than those of the *City of Paris*, an attempt has not yet been made to drive the two former steamers at their highest rate. On the Southampton route the fastest voyage made was by the new Hamburg-American liner *Columbia*, which went from New York to Southampton, a distance of 3049 knots, in 6 days 19 hrs. She also went from Southampton to New York, 3049 knots, in 6 days 18 hrs. 20 min. These performances much surprised the shipping community, as it was thought that the North-German Lloyds liner *Larhin* was the fastest steamer on this route. The best speed record, however, of this ship is only 6 days 21 hrs., which was from Southampton to New York in August last. The *Augusta Victoria*, of the Hamburg-American Company, maintained a speed of 19 knots an hour between Hamburg and Southampton on her voyage to New York in

May last. On a test of her speed at Stokes Bay she went over the measured mile six times, and made over 19 knots an hour against the tide. The best steaming time between England and the Cape has been done by Donald Currie & Co.'s *Castle Line*. In August and September the *Roslin Castle* was driven from Plymouth to Cape Town, *via* Lisbon and Madeira, in 17 days 13 hrs.; while her fastest steaming time on the homeward passage

on the same route was 16 days 18 hrs. 45 min. The quickest steaming time of the ships of the *Union Line* on the same route also, and which run from Southampton, was as follows: Outward, *Moor*, September, 17 days 23 hrs. 45 min.; *Mexican*, September, 17 days 22 hrs. 55 min. Homeward, *Moor*, May, 17 days 5 hrs. 6 min.; *Tartar*, 17 days 6 hrs. 11 min. The outward passage of the *Moor* would have been much better had it not been for the very strong S.E. trades experienced during the last five days of the voyage. The engines were also driven slowly for ten hours during the fog in the Channel and Bay of Hiscay. The voyage to Southampton from Table Bay is 94 knots more than to Plymouth; therefore, if the *Moor* and *Tartar* on their homeward voyages had gone to that port, their steaming time would have been under 17 days, though their speed would have then been eclipsed by the *Roslin Castle*. In April and May the *Arawa*, of the *Shaw, Savill and Albion Line*, made the fastest passage on record between New Zealand and England. She had previously made the fastest passages, but on the last voyage her run was 4 hrs. 26 min. sooner, her nett steaming time being 34 days 23 hrs. 18 min., including stoppages at Rio de Janeiro and Teneriffe, only 36 days 11 hrs. 48 min. The new steamer *Magdalena*, of the *Royal Mail Line*, was a few weeks ago propelled from Lisbon to the River Plate in 14 days; and the *Duc de Braganca*, of the *French General Transatlantic Co.*, from Marseilles to Algiers at the rate of 18 knots an hour. Liberal subsidies have been given for the encouragement of the building of steamships capable of being converted into cruisers during war by Great Britain, France, Germany, Italy, and the United States. The following is a list of the *Royal Naval Reserved Merchant Cruisers* held by the owners for the use of the Admiralty, viz.:-

| Name. | Owners. | Gross Tonnage. | Average Ocean Speed. |

In the two new *White Star* ships their construction has been specially considered with

regard to their protection during war. They are divided by longitudinal and transverse bulkheads running the entire length of the ships above the water-line. They are propelled by twin screws. The steering gear, engines and boilers are below the load water-line, and will be protected by the coal in the bunkers. They are universally admitted to be the best merchant ships which have yet been built to comply with Admiralty requirements as cruisers. The *Teutonic* took part in the *Naval Review (q.v.)* at Spithead. She was fitted with four 5-in. guns out of her total armament of twelve guns. She is 582 feet long, 57 feet broad, and 39 feet 4 in. deep. Her sister ship, the *Majestic*, will very soon be ready for sea. There are about four hundred or more large steamers on the Admiralty list complying with Admiralty conditions, but which are not retained by the Government for national service. They are suitable for receiving an armament. Their owners, however, are promised that preference will be given to these ships for occasional State employment. Of the more important new ocean liners which have been built in '89 are the

Teutonic of the *White Star Line*, by Harland & Wolff, of Belfast; the *Columbia* for the *Hamburgh-American Co.*, by Messrs. Laird, of Birkenhead; the *Augusta Victoria*, by the *Vulcan Shipbuilding Co.*, at Stettin. These are for the *Atlantic service*. For the *Indian service*, the P. and O. Co. have had delivered to them two fine boats of about 5000 tonnage, called the *Peninsular* and *Oriental*, from the building yard of Messrs. Caird & Co., of Glasgow. The *Arato* and *Magdalena*, two 17-knot boats, have been constructed by Napier & Co., of Glasgow, for the *West India and River Plate service* of the *Royal Mail Co.* The *Naval Construction and Armaments Co.*, of Barrow, have built for the *Pacific Steam Navigation Co.* the *Oruba*, for employment in their trade between Liverpool and Valparaiso. It is a 16-knot boat of 6000 tons gross, and is the fastest employed in the Pacific South American trade. The *Vulcan Steamship Co.*, of Stettin, have also built for the *North German Lloyd Co.* a splendid steamer christened the *Kaiser Wilhelm II.*, of 6600 tons, for their Australian service. She is expected to reduce the mail time between London and Adelaide to twenty-six days. An 18-knot steamer has been built for the *French General Transatlantic Co.* at their works at St. Nazaire for voyages between Marseilles and Algiers. Of the higher speed

liners building are the following: (1) For Transatlantic service, the *Majestic* for the White Star Co., 10,000 tons, and 19 knots speed; *La Touraine* for the French General Transatlantic Co., 8,000 tons and 18 knots speed; the *Spre* for the North German Lloyd's Line, 9,000 tons and 18 knots speed; and another steamer not yet named, but rather larger and faster; the *Normanne*, of 10,000 tons and 18½ knots speed, for the Hamburg-American Co., and another of the like size and speed not yet named. The *Friesland*, of 6,700 tons and 17 knots speed, for the Belgian-American Navigation Co., commonly called the Red Star Line. (2) For the India, China, and Australian services: *The Australien*, *Polynesian*, *Tasmanian*, and *Malaisien*, of about 5,500 tons and 17 knots speed, by the Messageries Maritimes Co., at their works at Marseilles. (3) For the Cape Service: a steamer not yet named of about 5,000 tons and 16 knots speed, for Donald Currie & Co.'s Castle Line. (4) Brazil and River Plate Service: *The Thames* and *Clyde* for the Royal Mail Co., of 5,600 tons and 17 knots speed. (5) Liverpool and West Coast of South America Service: the *Oratava* and two other steamers not yet named, of 6,000 tons and 16 knots speed for the Pacific Steam Navigation Co. (6) For the Vancouver, Yokohama, and Hong Kong Service: three steamers not yet named, of 7,000 tons and 18 knots speed, for the Canadian Pacific Railway Co. One of the main objects of this company is to provide another and a much faster route to Japan and China from the United Kingdom, and also an alternative means of communication between this country and India and Australia, if the Suez Canal should be blocked during war or from other causes. (See CANADIAN PACIFIC RAILWAY.) Steps have been taken to shorten the time of transit between Great Britain and the Far East by the before-mentioned order of three fast ships which has been given in pursuance of a contract made on the 15th of July, '89, between the Postmaster-General and the Commissioners of the Admiralty and the Company for the conveyance of mails, troops, and stores between Halifax, Quebec, and Hong Kong. The company have by this contract agreed, for a subsidy of £60,000 per annum, £15,000 of which will be paid by the Dominion Government, to provide a monthly mail service between Halifax or Quebec, according to the season, and Hong Kong. The steamers between this last named port and Vancouver will call at Shanghai and Yokohama, and take mails and passengers to and from these ports. The times of passage between Halifax or Quebec and Hong Kong are not to exceed 684 hours from April to November, or 732 hours from December to March, including stoppages. The three steamers are to be built according to Admiralty requirements, in order that they may be suitable for cruisers or transports; and the Admiralty are empowered to purchase or hire them. The contract is to last for ten years from the departure of the first of the new steamers from Hong Kong. Although no definite arrangements have been published for an improved Atlantic service in connection with the new line of steamers to Japan and China from Vancouver, satisfactory assurances have been given by the Canadian Government that an accelerated Atlantic service of steamers would be secured. They will sail to and from Quebec in the summer, and to and from Halifax in the winter, and will be able to

cross from port to port in about five days. It is expected that, when fast steamers are run on both oceans in connection with express trains on the railway, the mail service which is now performed *via* Brindisi and Suez between England and Hong Kong in 33 to 36 days, Shanghai in 38 to 41 days, and Yokohama in 42 to 45 days, will be done *via* the Canadian Pacific Railway in 38½ to 39½ days, 27 to 29 days, and 23 to 25 days respectively. If this new service succeeds a further one will probably be provided in the near future between Vancouver and Brisbane *via* Honolulu, whereby the passage between Great Britain and Queensland may be reduced to about 26 days.—Much difference of opinion exists respecting forced draught, and it is a question far from being satisfactorily settled. In the mercantile marine its successes and failures are about equal. An excellent paper was read on the subject at the Institution of Marine Engineers on Oct. 19th last, and several cases were mentioned in which, owing to lack of attention to details, faulty design of boilers, or inferior arrangement of forced draught, bad results had followed. It was, however, stated by the chairman, in summing up the arguments, that with a few improvements and the construction of boilers to meet the conditions of forced draught, its general introduction in the merchant service would be accepted without question. Shipbuilders have been very busy this year, both in British and Irish ports, in construction and repairs. In October prices of steamers further advanced for new and second-hand tonnage, and a large number of purchases have been made at from £9 to £10 7s. per ton for early delivery of new steamers, and proportionate prices for second-hand ships. Both builders and engine-makers are now very full of work, and few take new contracts under £10 per ton dead weight, ordinary specification, and late delivery. The cost of labour and materials continues to advance without any prospect of a check for some time. During the year freights have been fairly good, but they have given way between several ports during the early part of November. From North America all freights for prompt loading have kept up well, and cotton freights are firm. To third-class or emigrant traffic to Australia from the United Kingdom a great impulse has been given by the reduction of fares of foreign steamship companies, who take passengers from London *via* Antwerp. In July last, however, a remarkable change was made for the better accommodation of third-class passengers. A regular line of steamers to Australia *via* the Suez Canal was then started from Hamburg for the conveyance of third-class passengers only every four weeks from that port and Antwerp. The passengers are not only berthed on the main deck in the poop, where saloon passengers are carried on other lines, but have the use of the upper promenade deck, which is 186 feet in length. Each of these steamers is fitted throughout with the electric light. The sleeping compartments for the passengers are very spacious compared with those generally provided for emigrant or third-class passengers. The ventilating and sanitary arrangements of these steamers are also excellent. Passengers from London for embarkation on the steamers of this and two other foreign shipping companies at Antwerp for Australia, and other ports, are conveyed

by the Great Eastern Railway Co. from Liverpool St. station to Harwich, and then by its steamers to Antwerp. A few weeks ago a new arrangement was made for taking third-class passengers by the North German Lloyd's steamers from Antwerp. This is to convey them there by the London, Chatham & Dover Railway *via* Dover and Ostend. All fares and expenses are included in the passage money. An important experiment was tried by the Great Western Railway Co. in October, with the view of causing Milford Haven to become a port of call for Atlantic liners. It was arranged that the Anchor Line steamer the *City of Rome*, which left New York on Oct. 10th, should land its passengers, all of whom were members of Barnum's company, at Milford, and that they should be taken to London by a special express train. The steamer anchored at Dale Road, one of the inlets within Milford Haven, at 5.30 p.m. on the 24th of that month. After landing the run from Milford to London was made in 6 hrs. 30 min., over a distance of 270 miles, with only two stoppages between the termini. Inside Milford Haven the finest steamers in the world speed can be securely berthed, and its advantages as a port of call are likely to be very great. Although it is 130 miles farther from New York than Queenstown, it is ten hours nearer London, and will avoid the tedious and costly journey from Cork to Dublin. Milford might become an important port of call for the new line of steamers to Canada, which is expected to start in about a year and a half hence from Plymouth, and also for the steamers of the North German Lloyds and the French General Transatlantic Company for taking up London mails and London passengers. It is further stated, and with good reason, that Milford may become an important rival with Liverpool for the passenger steamship traffic of the whole of the north of England. A new daily service of steamers commenced running in August last between Weymouth and the Channel Islands (except Sundays) belonging to the Great Western Railway Co.—Oceanic passenger traffic in sailing vessels is now practically limited to the carriage of first and second class passengers to Calcutta, Bombay, and the Antipodes, to whom economisation of time is no object. Since '68 these vessels have not been constructed for speed; the new type of such have been built for carrying larger cargoes. There are now several four-masted vessels capable of transporting five thousand tons of cargo. A contract has recently been placed on behalf of a French firm for the construction on the Clyde of a five-masted steel sailing ship to carry 6000 tons dead weight. She will be the first five-master built, and will be the largest sailing vessel in the world. The fastest long distance voyages by sailing vessels were made by the *Crusader*, belonging to the Shaw, Savill, & Albion Co.'s Line, about twelve years ago, and by the *Thermopylae*, of the Aberdeen Line in '68. The former vessel performed a voyage from London to New Zealand in 65 days, and the latter a passage between London and Melbourne in 60 days. In one day the *Thermopylae* made 335 knots on the voyage, and she ran at the rate of 27 knots an hour for a few hours consecutively. The *Patriarch*, *Pericles*, and *Aristides*, belonging to the same line, have performed voyages nearly as quickly.

—One of the more important events in the year connected with the mercantile marine is the growth and power of the Seamen and Firemen's Union, started in '88. Its first annual congress was held at Cardiff on Oct. 8th. It has now more than 60,000 members and 35 branches. Mr. Plimsoll is its chairman. The officers of the Union assert that under its influence British seamen have been benefited to the extent of a million and a half pounds. The opinion among the shipping community is that it will do considerable good by causing an intelligent expression of opinion by seamen upon the grievances of their position and the means of getting rid of or diminishing them. A deputation of the members waited upon the President of the Board of Trade concerning the representation of seamen upon Local Marine Boards, and succeeded in obtaining it. At the next election, therefore, in Jan. '90, they will for the first time send representatives. The questions of marked freeboard, seamen's diet, and an extension of employers' liability to seamen, are now mostly engaging the attention of the members of this Association. The congress lasted for four days, and was a great success.

Merchant Taylors' School, London. Founded (1561) by Sir Thomas White, founder of St. John's College, Oxford, and the court of the Merchant Taylors' Company. The company remains the governing body of the school, which has always continued a day school. In 1875 it was reorganised, enlarged, and removed from Suffolk Lane to its present site in Charterhouse Square. Amongst the famous scholars of Merchant Taylors' are Edmund Spenser, author of the *Faerie Queene*; Archbishop Juxon; Bishop Lancelot Andrewes; Bishops Wren and Buckeridge of Ely; Dove, Bishop of Peterborough (called by Queen Elizabeth "the Dove with the silver wings"), and many other bishops and church dignitaries; James Shirley, the dramatist; Lord Olive, founder of the Indian Empire; Charles Ewing, the tragedian; Charles Mathews, the elder and younger; Albert Smith; and Edward Bond, late of the British Museum. Amongst alumni recently deceased: Edward Hawkins, Provost of Oriel; Dean Mansel; Dr. Samuel Birch; Sir Charles Bright; Bishop Woodford (Ely). Twenty-six scholarships, and exhibitions of £86 and £100 for five and seven years, to St. John's College, Oxford; others, ranging from £50, to Cambridge—altogether 30. Pupils 500; on entrance must be over nine and under fourteen. **Head Master**—Rev. W. Baker, D.D. Sec., C. Waters, M.A. **Motto**—*Homo plantat, homo irrigat, sed Deus dat incrementum*. It has recently been determined to found a Merchant Taylors' School Mission in some poor parish in the north or west of London, but the locality is not yet determined upon.

Merchants' Lecture, The. Was established (1672) during the reign of Charles II., by the Presbyterians and Independents conjointly, at Pinners' Hall, being supported by contributions from the principal merchants of the City of London. Its professed design was "to uphold the doctrines of the Reformation against the errors of Popery, Socinianism, and Infidelity." From Pinners' Hall it was removed (July 1778) to New Broad Street Chapel, and thence to the Poultry Chapel (1844), Weigh House Chapel (1869), and Finsbury Chapel, Moorfields (1883). The lecture is delivered

every Tuesday morning (12 to 1). A course of lectures by Rev. A. Rowland, LL.B., entitled "Ecce Homo," was delivered in '89.

Meredith, George, poet and novelist, is a native of Hampshire, and was b. 1828. After studying for some time in Germany he commenced his literary career with the publication of a volume of poems in '51. This was followed by the "Shaving of Shagpat, an Arabian Entertainment" ('55), "Farina, a Legend of Cologne" ('57), "The Ordeal of Richard Feveril" ('59), "Modern Love: Poems and Ballads" ('62), "Emilia in England" ('64), "Rhoda Fleming" ('65), "Vittoria" ('66), "The Adventures of Harry Richmond" ('71), "The Egoist" ('79), "The Tragic Comedians" ('81), "Poems and Lyrics of the Joy of Earth" ('83), and "Diana of the Crossways" ('85). His novel, "The Journalist," is promised for early publication, and is eagerly looked for. By some of the best critics, including Mr. Justin McCarthy, Mr. M. is regarded as a novelist of the first rank.

Mersey and Birmingham Canal. This is a scheme which is supported by the Manchester Ship Canal and the local authorities in the neighbourhood, besides those who would be most interested in its success at Birmingham. It is proposed to construct an entirely new canal from Birmingham, through the iron and coal centres of Staffordshire and the Potteries to the Weaver Navigation at Winsford, and finally connect it with the Manchester Ship Canal and the Mersey, the differences of level being met by hydraulic lifts. The proposed width 8-72 feet, for vessels of 500 tons, and the capital outlay is estimated at £3,000,000. In Sept. '89 it was stated that a Parliamentary Bill would shortly be promoted.

Mersey Railway Tunnel. The. This is a passage constructed under the river Mersey, to connect the two shores at Liverpool and Birkenhead, for railway purposes. On Feb. 13th, '85, the tunnel was formally opened; but, of course, much work had to be done before traffic could be commenced, and the actual inauguration was eventually fixed for the end of Jan. '86, when the Prince of Wales performed that ceremony. The length of the tunnel, including the approaches, is $\frac{1}{2}$ miles. There are two stations in the city, a lift being used at one of them (James Street) calculated to raise 230 passengers to the road level in 40 seconds; on the Birkenhead side there are four. The height between the bed of the river and the roof of the tunnel is given as about 30 ft., the tunnel itself being 21 high and 26 wide. Alongside the tunnel is the ventilation heading, 7 ft. 4 in. in diameter, and there are ventilating fans 40 ft. and 30 ft. in diameter. It may be added that 100 ft. below is the drainage heading driven to test the strata beneath the river. On the day of opening it was stated that the expenditure was £1,250,000 sterling. (For further details see our previous editions.) In the session of Parliament for '89 the Company introduced a bill having for its object the making of agreements with other lines, the idea being to have a combined agreement to bring goods—chiefly South Wales coal—through the tunnel. The occasion for the Bill was primarily the approaching completion of the Dee Bridge (q.v.).

Merv. An oasis in Central Asia, situated almost midway between Meshed and Bokhara, and Herat and Khiva. In ancient times the city of Merv, now in ruins, was famous for its

vast size, magnificence, and prosperity. The locality became notorious when Russia, having conquered Khiva in 1873, threatened to occupy the oasis. The oasis has an area of 1,600 square miles, and a population of a quarter of a million Turcomans. There is no town of Merv; the thickly packed prosperous settlements spread over the oasis constituting what is recognised under that name. Outside the country is not desert in the usual sense of the term, but consists of good clay soil, which fails to grow vegetation because the water supply is too limited to irrigate it. The Russians, however, are rapidly enlarging the cultivable area by extensive irrigation works, and have successfully introduced the culture of American cotton. The Transcaspian Railway (q.v.), which is to connect the Caspian with the Amu-Daira, was completed in July '86 to Merv. About 10,000 troops are maintained in the oasis, distant 200 miles from Herat, and also including in its administrative area Penjdeh, half that distance from the key of India. The Turcomans of Merv are considered the bravest and best mounted horsemen in Central Asia.

Meteorological Society, The Scottish. See BEN NEVIS OBSERVATORY.

Metrical System. This is based upon the length of a quarter of a terrestrial meridian. A *metre* is the ten-millionth part of this arc, and was selected as the unit of measures of length. The cube of its tenth part has been chosen as the unit of capacity, and is called a *litre*. A *kilogramme* represents the weight of a *litre* of distilled water at its greatest possible density; and the thousandth part of a kilogramme represents the unit of weight, and is known as a *gramme*.

Metropolitan Asylums Board. See POOR LAW.

Metropolitan Fire Brigade (established Jan. 1st, 1866). During the twenty years of its existence the strength and appliances of the Brigade have been more than quadrupled, although no material alteration has been made in the constitution of the force. The chief officer, Captain Shaw, who has had the command of the Brigade since its commencement, is now assisted by a second officer, Mr. J. S. Simonds, appointed 1881. The area protected by the Brigade is about 122 square miles, including the City of London and the Metropolitan Board of Works district, and extends from Highgate in the North to Sydenham in the South, and from Roehampton in the West to Plumstead in the East. An excellent system of Fire Alarm telegraphs and telephones between fire stations, and to police stations and to public and other buildings, is provided. At the end of 1886 every land station had an appreciable method of fire alarm which gave about 350 call points within the Brigade area. The substitution of telephones for telegraphs is now completed throughout the whole of the system. The total annual expenditure of the Metropolitan Fire Brigade is about £113,000. Of this sum the fire insurance companies contribute £25,000; the Government £10,000, for the protection of the public buildings; and the ratepayers £77,000—being the amount realised at $\frac{1}{4}$ d. in the pound on the estimated gross ratable value of the Metropolis. In Aug. '89 a detachment of English firemen visited Paris, in connection with the Fire Congress, and a return visit was paid by some members of the French Fire Brigade. Head Quarters, Southwark Bridge Road, S.E.

Metropolitan Hospital Sunday Fund.

For a long period it has been customary on the Continent to make a special collection on one Sunday in the year in the churches for the hospitals in the district. The practice is now pretty general in this country. The **Metropolitan Hospital Sunday Fund** was started in '73 by the late Dr. James Wakley, editor of the *Lancet*, and by the then Lord Mayor, Sir Sydney H. Waterlow, Bart., who is still its Vice-President. The total sum collected on behalf of the Hospital Sunday Fund during '89 was £41,744. Report of the Council is published in the third week of December. Sec., H. N. Custance; address, Mansion House, E.C. There are also one or more days set apart, as the delegates of the Hospital Saturday Fund (which is quite distinct from the Hospital Sunday Fund) may from year to year determine, for collection in aid of Hospitals and Dispensaries under the auspices of the **Hospital Saturday Fund**. The total collected in '89 by the street collection amounted to £5080. The offices of the latter fund are at 41, Fleet St., E.C. Sec., R. Frewer. Consult, in reference to hospitals generally, the *Hospital* (weekly).

Metropolitan Police. Established by Act of Parliament (1829), and the protection of the district by watchmen was discontinued by that statute and entirely intrusted to the then newly appointed force. The Metropolitan police area includes nearly 700 sq. miles, and embraces all places within a radius of fifteen miles of Charing Cross, except the City of London, which is protected by its own police. The Metropolitan police district consists of twenty-two land divisions, in addition to its jurisdiction on the river Thames. Every land division is under the immediate charge of a superintendent, and the subdivisions under that of two or four inspectors. A certain number of beats are provided in each subdivision to be patrolled by constables, and are visited by sergeants who have sections of beats allotted to them for this purpose, and who report to their inspectors the occurrences thereon. The sections are also supervised by the inspectors both day and night, and very frequently by the superintendent. The former officers send reports daily to their superintendents respecting public matters in their subdivisions, and the superintendent furnishes diurnal reports to the Commissioner concerning occurrences in the division under his charge. Each subdivision has a station house in charge of inspectors, who are sometimes assisted by sergeants. Mounted police patrol the more distant parts of the outer subdivisions. In each division there are from thirty to forty men selected as a reserve force to carry out special duties, headed by an inspector and assisted by several sergeants. The supreme government of the Metropolitan police is under a Commissioner appointed by the Home Secretary. The former is empowered to make rules and regulations for the service, subject to the approval of the latter. The superior officers under the Commissioner are three Assistant Commissioners, five Chief Constables, and two Assistant Chief Constables. The latest returns give the strength of the force as 14,261, comprising 30 superintendents, 837 inspectors, 1,369 sergeants, and 12,025 constables. There is also a receiver, a chief surgeon, two surveyors, and about thirty Civil Service clerks. There are local surgeons of the police in divisions. The

most important branch of the police not engaged in ordinary divisional duty is the **Criminal Investigation Department**, started in 1878. It is now under the immediate direction of Dr. Anderson, assistant commissioner, who is assisted by Chief Constable Williamson. A part of this service is the Scotland Yard department, and consists of a superintendent, five chief and three first-class inspectors, seven second-class inspectors, and about fifteen sergeants. There is also a branch of the Criminal Investigation Department in each division, under the charge of an inspector. The number of members belonging to each branch is regulated according to local circumstances. The **Convict Supervision Office**, established in 1879, is in connection with the Criminal Investigation Department. It registers the names and particulars of discharged convicts on licence, and persons sentenced to police supervision in England, and retains photographs and marks of these persons, under the provisions of the Prevention of Crimes Act of 1871. Among other departments of the Metropolitan police are the executive branch, the public carriage branch, the lost property branch, and the common lodging-house branch. Satisfactory provisions are made for rewards for diligence and praiseworthy acts by the police, as well as for punishment for breach of discipline. Appreciable regulations also exist for promotion and testing by examination the qualifications of members to fill the higher offices. A **superannuation fund** for pensioning the police is made up from various sources, the great bulk of which comes from the Metropolitan Police Fund. No member of the Metropolitan police is entitled to retire on a pension in any grade under sixty years of age unless certified by the chief surgeon of the force to be unfit for further work. For grave misconduct a member of the force may be deprived of a pension which he otherwise would receive. Nearly one-half of the funds required for the expenses of the police is from the money voted by Parliament, but the greater amount is from parochial rates. A report is presented annually by the Commissioner of the Metropolitan police to the Home Secretary as to the result of its operations. Mr. J. Monro, C.B. (q.v.), was (Nov. '88) appointed Chief Commissioner.

Metropolitan Public Gardens. The invasion of bricks and mortar at almost every point of the green border-land of London, and the increasing congestion of the population within, have made the provision of Metropolitan recreation grounds necessary for sanitary, if for no other reasons. The difficulty of securing breathing spaces for the people in the overcrowded districts, however, is annually increasing; and would probably be insurmountable, but for the action of the **Metropolitan Public Gardens Association**. Much of the income of the Association is subscribed on the condition that it should be expended in wages to the "unemployed." Last year the income was increased by subsidies received from Mansion House funds raised for the benefit of the unemployed. The provision of seats in thoroughfares, the planting of trees, the formation of public gymnasia and the opposing of illegal encroachments upon commons, burial-grounds, etc., are among the several undertakings carried out by this society. Chairman, the Earl of Meath; Sec., Basil Holmes. Office, 83, Lancaster Gate, W.

Mexican (Gulf and Pacific) Railway. It was reported from Philadelphia Sept. 9th, '88, that Mr. Joseph Pool, of an English-American syndicate, proposed to construct a railway across Mexico from the Gulf to the Pacific, stating that he had obtained a subsidy from the Government for the purpose. The western terminus was fixed at Tonalá, and the eastern at San Juan Baptista, on the river Grijalva, 200 miles from the Gulf. The river, it was calculated, would take vessels drawing 25 ft. up to the terminus of the line. The railway would be 225 miles long, the necessary capital had been subscribed, and President Díaz was said to be actively interested in the scheme. The route from the western point to New York would be shorter by 800 miles than that *via* Panama.

Mexico. A country forming the southern extremity of North America, and stretching into Central America. Bounded on the north by the states of Texas, New Mexico, Arizona, and California; on the south by Guatemala and British Honduras. Area, 747,791 sq. m.; pop. 10,447,974. Capital Mexico, pop. 300,000. Chief ports on Gulf of Mexico are Vera Cruz, Campeche, and Tampico; on the Pacific, Mazatlan and Guaymas. Besides these some twelve important cities. Divided into twenty-seven states, one territory, and one district.—The country is an elevated plateau, varied in contour, with volcanic peaks, Popocatepetl, etc., attaining nearly 18,000 feet. There are three great divisions: the torrid regions, chiefly on the coast, very unhealthy at some seasons; the temperate regions, occupying the lower slopes of the mountains, limited in extent, agreeable, humid, and prolific; and the cold regions, not less than 5,000 feet above sea-level. With the exception of the Rio Grande del Norte, which is the boundary of the United States, rivers are few and unimportant. There are lakes, some large, mostly impregnated with sodic carbonate. Resources enormous, but, from political and social causes, inadequately developed. All cereals, fruits, and vegetable produce of southern Europe thrive in Mexico. Wheat, barley, maize, pulse, pepper, sugarcane, potatoes, coffee, cotton, tobacco, vanilla, flax, grapes, etc., are the chief crops. The forests abound in valuable timber, mahogany, rosewood, ebony, caoutchouc, the maguery (from which a sort of wine is produced), fibre-plants, etc. The flora and fauna are rich and profuse, the bird and insect tribes being especially notable for beauty and variety of colouring. Vast herds of cattle are bred, but the sheep are of inferior breed. Horses, of a fine description, are wild in great numbers, and even beggars ride. Mules, of a beautiful and vigorous breed, are raised in large numbers. The mineral wealth is great, comprising gold, silver, mercury, iron, tin, zinc, lead, antimony, arsenic, and sodic carbonate. The Republic is governed by a President and Ministry. There is a Senate, each state electing two members, and a House of Representatives elected by universal suffrage. The states have also their individual autonomous local governments. Prevailing religion Roman Catholic; but all sects tolerated, and none state-aided or allowed to possess land. Primary education nominally compulsory, but the law is not enforced. There are some 9,000 schools publicly supported. There is an army of 28,000 on the peace footing, raised to 160,000 in time of war. The navy consists of five small gunboats.—Industries comprise

mining and smelting of silver and other metals, agriculture, and cattle-herding. From 1821-80 the mines produced £180,000,000 of silver, and £968,200 of gold. Estimated revenue ('88), \$32,800,000; expenditure, \$36,765,906; debt about £42,000,000; exports ('88), \$49,500,000. There are 3,703 miles of railway. Capital joined to New York by rail. Of the inhabitants 19 per cent. are Europeans or of European origin, 38 per cent. are Indians, and 43 per cent. are of mixed race. Proclamation of independence, 1810; Emperor Hurbide shot and republic proclaimed, '24; Emperor Maximilian shot and republic again proclaimed, '67. Of late years there has been decided progress and less disorder. The opening of railways and spread of education are aiding in the development of this fine country. During '89 the Mexican-British Extradition Treaty was ratified by both Governments in February. Signor Sebastian Lerdo de Tajada, ex-President of Mexico, died in April. A serious flood, causing the loss of many lives, occurred throughout the country in August. Count St. Foix, the new French minister to Mexico, presented his credentials in September. A cyclone of unprecedented violence visited the island of Carmen, in the Gulf of Mexico, in October. Twenty-seven vessels were wrecked, 125 houses damaged, and there was a heavy loss of life. Intelligence was received at New York (Oct. 13th), from Sonora, Mexico, that two companies of Mexican soldiers, while bathing, were massacred by a number of the Yaqui Indians, and that the Mexican Government had despatched a punitive expedition of 4000 men against the aggressors, who inhabit a tract of country in the State of Sonora, in the extreme north-west of Mexico. The bodies were terribly mutilated. The Indians are believed to be rapidly retreating northwards towards Arizona. In November General Corona, Governor of Jalisco, was assassinated, and it was stated that letters found on the body of the assassin indicate that the outrage was of a Nihilist character. Signor Mariano Bascaña had been appointed to act as Governor for the late Governor's unexpired term. For Ministry, etc., see DIPLOMATIC. Consult Hamilton's "Mexican Handbook." Conkling's "Mexico and the Mexicans," etc.

Middlesex, County Council for. See COUNTY COUNCILS.

Milan Obrenovitch I., ex-King of Servia, b. 1854, at Jassy, in Moldavia. He studied at Paris, at the Lycée Louis-le-Grand. The assassination of his cousin, Prince Michael, caused his recall to Servia, where he was proclaimed prince at the age of fourteen. A Council of Regency administered the government till the Prince came of age (1872). In 1875 he married the Princess of Stourdza, from whom he is now divorced, and by whom he has a son, Prince Alexander. Much attention was attracted to King Milan in '88, owing to his summary treatment of Queen Natalie. Owing to the troubles arising out of his quarrel with the Queen, he abdicated in favour of his son March 6th, '90, but retained the command of the Army. See SERVIA.

Milais, Sir J. Everett, Bart., R.A., was b. at Southampton 1829. At the age of eleven he became a student at the Royal Academy, gaining the principal prizes for drawing. His first picture "Pizarro seizing the Inca of Peru," was exhibited at the Academy (1846). In conjunction with Dante Rossetti and Holman Hunt he set up a school of painting from nature, which

obtained the title of "pre-Raphaelite" (*q.v.*), and published a periodical entitled "The Germ, or Art and Poetry," in support of this school (1850). Their views were afterwards supported by Mr. Ruskin (*q.v.*) in the *Times*, as well as in a pamphlet on pre-Raphaelitism, and in "Lectures on Architecture and Painting." He was elected an A.R.A. (1853) and became R.A. (1863). He has exhibited a large number of pictures up to the present time. A large and representative collection of his works, embracing from his earliest to his latest styles, and illustrating his emancipation from the trammels of "pre-Raphaelitism," was exhibited at the Grosvenor Gallery in '87. Sir J. E. M. was decorated with the "Legion of Honour" (78), and a baronetcy was conferred upon him (85). He is chiefly distinguished for his portraits and exquisite delineation of child faces. His portrait of Mr. Gladstone is considered one of his finest efforts. In '89, Sir J. E. M. contributed to the Royal Academy "The Old Garden," "Murthly Water," and "Mrs. Paul Hardy." He also exhibited at the Grosvenor Gallery a picture of a maiden "Shelling Peas."

Military and Naval Men Deceased (Dec. 5th, '88, to Nov. 31st, '89). See OBITUARY.

Military Ballooning. See BALLOONING.

Military Engineering. The principal recent changes in this science are the provisions made for the first line of defense of important cities and towns, which are required to be placed much further out, owing to the increased range and accuracy of modern ordnance and larger machine guns (see ARMOUR PLATES AND ORDNANCE, and ARTILLERY). The penetrative power of projectiles has so greatly advanced, that iron-plated forts or turrets have been specially constructed in positions likely to be attacked at close quarters; while iron-shields are fixed into granite forts to narrow the embrasure and provide against splinters. All important regular armies have each a distinctive and scientific body of specially trained officers and men for its military engineering services. The professional duties of these persons include the preparation of plans and designs for, and the execution of, fortifications, roads, bridges, barracks, storehouses, magazines, and other military works and buildings belonging thereto; the conservation of these erections and War Department lands, the making and working of railways, the construction and superintendence of electric and visual military telegraphs, siege-works, surveys, land and submarine mining, ballooning, and such additional engineer duties as the general or other officer, under whom they are serving, may direct. Until 1763 military engineering in the United Kingdom was performed by officers taken from the regular army. In that year a corps of engineers was formed. In 1783 it was made a Royal corps. In 1812 several companies of artificers were converted into sappers and miners, and placed under the engineers. The non-commissioned officers and men were called sappers and miners until 1850. This designation was then abolished, and they became the Royal Engineers. The Indian Military Engineers in 1861 were amalgamated with the Royal Engineers, and became one regiment, or corps. In time of peace the officers are all over the world. As the purchase system has never

been introduced into this branch of the service, promotion is by seniority. The officers, except on permanent retirement, receive no half-pay; nor have they an unemployed list. Their regular pay is equal to that of other active officers of similar rank; but the foremen alone receive beyond this remuneration extra pay, which is one-half of their ordinary pay when on duty at home, and equal to their ordinary pay when engaged abroad or in the London district. The non-commissioned officers and privates are nearly all workmen who have learned some mechanical trade, and they are therefore skilful in constructive operations. They are specially selected with the view to their various duties. Beyond their ordinary remuneration they receive "engineer" pay, varying from about $\frac{1}{2}$ d. to $\frac{3}{4}$ d. per hour when doing duty on the piece-work system. **Military Foremen of Works** are selected from the most competent non-commissioned officers. **Military Mechanists** have also very important work to perform in connection with repairing of marine engines and other steam machinery, hydraulic and hoisting machinery, the repair of telegraphic and submarine mining instruments, the erection of electric-light installations connected with submarine mining defences, the working and testing of all electrical appliances and arrangements in relation thereto, or steering or taking charge of "miners," etc. None but highly-qualified non-commissioned officers, or men of the R.E., or specially enlisted civilians, are appointed as Military Mechanists. There are about 900 officers in all ranks of the R.E. Nearly all of them are engaged in detached duty in various parts of the British Empire. On account of their high scientific knowledge numbers are employed in purely civil vocations requiring this qualification. All persons before becoming officers of the R.E., except officers of the Coast Battalion of Submarine Miners and the quartermasters, who are promoted from the ranks, must pass through the **Royal Military Academy at Woolwich**, or the **Royal Canadian College, as Cadets**. Admission to the former is granted to successful candidates between the ages of 16 and 18 at an open competitive examination on subjects of sound general education. They will then undergo a course of instruction for two years, divided into four terms. At the end of each term they will have to pass an examination. The subjects for such examination include mathematics, military topography, artillery, French or German, chemistry and physics, model and freehand drawing, tactics, military administration, and military law. **Cadets** who have passed these examinations are entitled to commissions as second lieutenants. The terms of payment at the Academy differ very much, and depend upon the position held by the father of the cadet in the service of the Government or otherwise, and vary from £40 to £150 yearly. On joining the corps the officers will be required to undergo a special course of training at the **School of Military Engineering at Chatham**, which is the headquarters of the corps and the leading scientific military school in Europe. There are about 5000 non-commissioned officers and men in the corps, consisting of 22 companies, 1 field telegraph battalion in 2 divisions, 1 bridging battalion in 2 troops, and a field depot at Aldershot, and 1 Coast Battalion of Submarine Miners. The **Ordnance Survey**, whose head office is at Southampton, is also carried out. In India there are 25

companies of native sappers and miners: Bengal has 10 companies, with 1000 members; Madras 10 companies, with 1050 members; and Bombay 5 companies, with 400 members. Several of the before-mentioned 52 companies are stationed at the Colonies. Chatham is the place, however, where most of them are stationed. The **Militia and Volunteer Engineers** are affiliated to the R.E. The **Militia Engineers** consist of 2 regiments of fortress engineers and 6 divisions of submarine miners. The **Volunteer Engineers** have 22 regiments of fortress and railway engineers, 1 of railway transport, and 9 divisions of submarine miners. The whole force is under the **Inspector-General of Fortifications and of Royal Engineers**. In concert with the Quartermaster-General he prepares the annual estimates for R.E. services. He is assisted by two deputies. The responsibility for R.E. works, in each district at home and at each station abroad, is vested in the general or other officer commanding. Certain districts are divided into sub-districts, the duties in which may be carried on by officers as sub-district commanding R.E., or by officers acting under the commanding R.E. of the district. The charge of the works in a district or sub-district, or at a station, will be split up into different divisions, each of which will, when practicable, be under the charge of an officer. According to the **Regulations for R.E., '88**, there will, during war, be an **Engineer-in-Chief**, with an army in the field. With each **Army Corps** there will be a chief engineer, and a staff engineer to each division when it has to act independently. There will be a staff engineer in the line of communications, where heavy engineering work is expected. These several engineers will, however, have no executive command. A director of railways and a director of telegraphs will also assist the army in maintaining the efficiency of the railway and telegraphic service respectively. The **R. E. Institution** was formed at Chatham in 1873. It contains an excellent library, and publishes annually a volume of professional papers, with the view of notifying to its members the information and experience acquired by the officers in the corps. Consult Porter's "History of the Royal Engineers" ('89); Conolly's "History of the Royal Sappers and Miners"; Clodes' "Military Forces of the Crown"; "Regulations for Royal Engineer Services" ('89); *The Monthly Army List*, etc.

Militia. See ARMY.

Mill Hill School. Situated in the N.W. district of London, founded 1807, reconstituted '69. Awards the "Bousfield" scholarship of about £50, tenable either at University College or New College, London, for three years. Pupils, 150. The society of "Old Mill-Hillians" is in a very prosperous state. **Head Master.** C. A. Vince, M.A.

Missionary Societies. The earliest missionary operations in modern times were carried on by the Jesuits in Japan, where great progress was made; but their work was overthrown, and the missionaries expelled before the sixteenth century. They also carried on operations in China and India. The **Society for the Propagation of the Gospel in Foreign Parts** was established by Act of Parliament in 1647, and work commenced amongst the North American Indians. Frederick IV. of Denmark founded a mission on the coast of Coromandel in the beginning of the eighteenth

century. The **Moravian Church** was the first to begin missionary operations in its corporate character by establishing mission stations at the Cape of Good Hope, in the West Indies, and at Labrador. Norway sent missionaries to Greenland in 1721, where work has since been carried on successfully ever since. The **Baptist Missionary Society** was founded in 1793, the **London Missionary Society** in 1796, the **Church Missionary Society** at the commencement of the present century, and the **Wesleyan Methodist Missionary Society** in 1814. The following details are extracted from the last published reports of each society. — **Baptist Missionary Society.** Received on behalf of the Society during 1888-9, £80,818; deficiency on the operations of the year £2,863. In India operations are carried on in Western India, Bengal, and the North-West Provinces; there are 162 stations and sub-stations, 55 European missionaries, and 103 native evangelists. In China the principal stations are in Shansi and Shantung; there are 60 stations and sub-stations, 21 European missionaries, and 5 native evangelists. Japan has a station at Tokio, and 18 sub-stations; there are 3 European missionaries and 6 native evangelists. In Palestine the chief station is at Nablous, and there are 3 sub-stations and 1 European missionary. Africa has 5 stations on the Lower Congo and 3 on the Upper Congo. There are 22 European missionaries at work, and 1 female school teacher. Mission work is also carried on in the island of Ceylon; in the West Indies; at Jamaica; and in Norway, Brittany and Italy. The statistics for 1888-9 summarised show the following results: missionaries, 129; self-supporting churches, 62; evangelists, 581; baptised, 2,871; number of members, 47,133; day-school teachers, 371; Sabbath-school teachers, 2,225; day-scholars, 16,381; Sabbath-scholars, 26,870. **Mission House**, 19, Fournival Street, Holborn, E.C. — **Church Missionary Society.** Amount raised in 1888-9 £250,016. The Society labours in West Africa (Sierra Leone, Lagos and Yoruba country, and the Niger); in Eastern Equatorial Africa (Mombasa, Taita and Chagga, Usagara, Unyamwezi, etc., and Uganda). Palestine (Jerusalem, Nazareth, Salt, Nablus, Jaffa, Gaza, and Hauran). In India it has five missions, having headquarters in Calcutta, Lahore, Bombay, Madras, and Travancore and Cochin. Besides these, mission work is carried on in Egypt, Arabia, Persia, Ceylon, the Mauritius, China, Japan, New Zealand, North-west America, and the North Pacific. The summary of the work shows the following results:—Stations, 305; Missionaries in holy orders, including European, Eurasian, and native clergymen, 560; European laymen, female teachers, and native unordained teachers, 3,790; native adherents, the great majority baptised, 188,037; native communicants, 47,754; schools, 1,768; scholars, 73,036. **Mission House**, Salisbury Sq., London. — **London Missionary Society.** Amount received in 1888, £125,250 5s. 11d. Mission operations carried on in China, at Hong Kong, Canton, Amoy, Shanghai, Hankow, Tientsin, and Peking. In India at Calcutta, Berhampore, Benares, Mirzapore, Kumaon, Almora, Ranee Khet, in the north; and at Belgaum, Bellary, Gooty, Cuddapah, Bangalore, Tripattoor, Madras, Travancore, and other places in southern India. In Madagascar 28 principal stations are sustained. In South Africa there are 11 and

in Central Africa 3 stations. Mission work is also carried on in the West Indies and Polynesia. A general summary shows that the Society has 190 European missionaries and 5,504 native agents; 74,127 Church members, and 316,355 native adherents, while they conduct 2,005 native schools, with 110,027 scholars. The total amount raised and appropriated at mission stations was £14,294 6s. 2d. **Mission House:** 14, Blomfield Street, London Wall, E.C.—**Wesleyan Methodist Missionary Society.** The total sum received in 1888 (last statement to hand) from the home districts amounted to £105,020 18s. 7d., Ireland £4,690 1s. 1d., foreign districts £4,678 9s. 7d.; these sums, with a number of extraordinary receipts, amounting to £35,974 12s. 6d. made a total of £150,364 1s. 9d. The expenditure was £142,877 os. 5d., leaving a deficiency, inclusive of the debt of 1887 (£16,866 7s. 8d.), of £9,382 6s. 4d. Mission operations carried on in France, Germany, Italy, Spain and Portugal, and Malta; in four districts of Ceylon, seven districts of India, two districts in China, in Southern and Western Africa, and in the West Indies. The summary of the year gives the following results:—Circuits, 1,055; chapels and preaching places, 8,005; missionaries, 1,810; other paid agents, 9,143; unpaid agents, 31,813; full church members, 226,521; on trial for church-membership, 23,450; scholars, 81,229. **Mission House,** Bishopsgate Street Within. In June '88 an interesting **International Missionary Conference** was held in Exeter Hall; also an important gathering in celebration of the **centenary** of Protestant Missions. The discussion on missionaries subsided during '89. Consult Johnson's "Report of International Missionary Conference," and "Handbook of Foreign Missions."

Ministry. When a Ministry **resigns** it is the function of the Sovereign to call upon some person to form another administration. There is no restriction upon the Royal choice, but the statesman usually selected is the leader of the opposing party in one of the two Houses. If the individual chosen undertake the task of forming a ministry, he commences by nominating his Cabinet, taking himself the principal position, which is variously designated as head of the Government, or First Minister, or Prime Minister, or Premier. The offices which invariably give the holder **Cabinet rank** are those of First Lord of the Treasury, Lord Chancellor, Lord President of the Council, the Secretaries of State for the Home Department, Foreign Affairs, the Colonies, for War, and for India, Chancellor of the Exchequer, and First Lord of the Admiralty. The **Prime Minister** usually takes the office of First Lord of the Treasury himself, but Lord Salisbury has twice given that position to another member of the Cabinet, and associated with himself the office of Foreign Secretary; or the Prime Minister may be First Lord of the Treasury and Chancellor of the Exchequer, or First Lord of the Treasury and Lord Privy Seal. The other offices, the holders of which may or may not be in the Cabinet, include those of Lord Privy Seal, Chancellor of the Duchy, First Commissioner of Works, Postmaster General, Lord Lieutenant of Ireland, Lord Chancellor of Ireland, Chief Secretary for Ireland, Secretary for Scotland, President of the Board of Trade, President of the Local Government Board. **Appointments** to all these offices, and to many others, a full list of which follows this article, are made by, or on the recommendation of, the

new Prime Minister, and each person so appointed may hold office as long as he does. **Cabinets** vary in number from eleven or twelve to sixteen or seventeen; their members are necessarily **Privy Counsellors**, and their deliberations are confidential. If a cabinet minister was in office before election there is no re-election necessary, as there is when the acceptance of office comes after a general election. Ministers on going from one office to another do not vacate their seats. There is, in effect, no limit to the duration of a ministry but the confidence of the Commons; it will not now resign upon the adverse vote of the House of Lords, nor if it be defeated upon a trifling matter in the Commons, but only when it is placed in a minority there upon some question of importance. In such a case the **Prime Minister** either places his resignation in the hands of Her Majesty, or asks leave to appeal to the country, and should the latter course be decided upon a general election follows. If the elections go against the Government it is now the custom for the ministry to resign and a new administration to be formed before the meeting of the new Parliament. The chief **Executive power** (see Crown), though theoretically vested in the Crown, is actually exercised by the Cabinet, which is responsible to Parliament, and to the House of Commons more especially, for all its acts. While each minister conducts the ordinary business of his own office without reference to his colleagues, the most important business of every office is brought under the consideration of the whole Cabinet, who in Parliament are bound to act together on all executive questions. From an early period the kings of England were advised on public affairs by a **privy council**; matters of state being discussed in the sovereign's presence, and the result determined by vote subject to his pleasure. The selection by the sovereign of a few of the whole number was no doubt the origin of the Cabinet Council. It was not until the Restoration, says Macaulay, that the interior council began to attract general notice. "It at length drew to itself the chief executive power, and has now been regarded, during several generations, as an essential part of our polity. Yet, strange to say, it still continues to be altogether unknown to our law; the names of the noblemen and gentlemen who compose it are never officially announced to the public; no record is kept of its meetings and resolutions; nor has its existence ever been recognised by any Act of Parliament." The sovereign cannot now constitutionally preside at a Cabinet Council. "The Cabinet," says Mr. Gladstone ("Gleanings of Past Years"), "is the threefold hinge that connects together for action the British constitution of King or Queen, Lords and Commons. . . . Every one of its members acts in three capacities: as administrator of a department of State, as member of a legislative chamber, and as a confidential adviser of the Crown. Two at least of them add to those three characters a fourth; for in each House of Parliament it is indispensable that one of the principal ministers should be what is termed its leader." On the next pages is given a full list of all those who go out of office at a change of ministry, and under corresponding headings throughout this work will be found a summary of the powers and duties exercised by most of them, whether they be ministers or officers of the Royal Household. See CROWN, PARLIAMENT.

Ministers from 1880 to 1889.

* *Notes.*—The names of Cabinet Ministers are indicated by an asterisk (*). In columns 1, 2, and 3, the names of those forming the original administrations are printed in roman type, and those who took any particular office subsequently in *italics*.

Mining, '89. Notwithstanding the increase in the output of coal, the number of deaths by explosions in mines in '88 was the lowest recorded, being 43. It has been suggested that the effects of the new Act for the Regulation of Mines, which came into force at the beginning of that year, had much to do with this result. The first calamity of '89 occurred on Jan. 18th, at the Two Foot Mine of the *Hyde Colliery*, some 23 lives being lost by an explosion, although the pit was considered a "safe" one. Another disaster of a like nature took place at the *Pendwll Pit* of the *Brynmallo collieries*, Wrexham, on March 13th, there being 20 killed. Mr. Edward Ashmead, writing in the *Mining Journal* of Jan. 5th, '89, stated that during '88 there was a very considerable increase in the number of new mining ventures registered, there being 365 new companies (one for every day in the year!), with £52,663,400 nominal capital against 269 companies with £34,002,041 nominal capital in '87. Of these 365 there were 169 mainly for gold mining, 30 for silver, 14 lead, 18 tin, 33 copper, 1 each for zinc, manganese, and asbestos, 2 arsenic, 5 nitrate, 28 iron and coal, 12 quarries for slate and stone, 6 precious stones, and 43 undefined, but chiefly syndicates for exploration purposes. From a return issued later in the year by the Home Office it appeared that the number of persons employed at mines and collieries in '88 was 592,656, of whom 5680 were women. The number of fatal accidents was 885, involving 960 deaths, an increase of 81 over '87; while there were 182,660,163 tons of mineral wrought, being an increase of 9,160,368 tons on the previous year. In the 10 years ending '60, the average ratio of death in the mine was 1 in 245 persons employed; while for '88 the ratio was 1 in 602. An abstract from a recently issued report of the production of iron ores in the United Kingdom under the provisions of the Coal Mines Regulation Act, with comments as to other sources of supply, appeared in the *Times* of April 20th. During '88 it appears there was an increased demand for our home ores to the extent of nearly 1,000,000 tons. The South Staffordshire Mines Drainage Commissioners in March instructed their engineer specially to consider a project of pumping dry the coal in a certain portion of the *Wedgesbury* portion of the district which it was said might be largely carried out without additional outlay on pumping machinery. On April 3rd Mr. Wilson Lloyd, the chairman, said a new level would be driven which would open up mines having a ratable value of £20,000 a year, and that the unwatering of the thick coal in the *Wedgesbury*, *Darlaston*, and *Bilston* districts was being considered. On the other hand, it was asserted that the driving of new levels would be useless till the water had been pumped out of the deep mines. On May 18th the *Bilston* "pound" was tapped by a new deep level, thus commencing the work of draining an important area. A short time afterwards the legal arbitrators under the mines drainage scheme announced that no concessions or "graduations" could be allowed to mine owners for twelve months, as the rate already levied did not produce enough to allow of it. This caused much dissatisfaction, some of the proprietors declaring that the enforcement of the full rate would lead to the closing of some of the pits. The arbitrators sitting at *Wolverhampton* on May 29th said they had

only to administer the Act as they found it. From estimates made at the time for the ensuing year, it was calculated that about £20,000 a mean level would be received, and against this the estimated working expenditure was £13,670, interest on loans £12,808, total £26,478, showing a deficiency of fully £6000. In the House of Commons on June 18th, the terms of reference to a Royal Com. being formed to inquire into the incidence of Mining Royalties were explained, and added that the following gentlemen had been asked or had intimated their readiness to serve:—Lord Northbrook, Lord Macnaghten, Mr. Burt, M.P., Mr. Chisholm Robertson, Mr. W. Abraham, M.P., Mr. Josiah Thomas, Mr. S. Auldjo Jamieson, Sir W. Lewis, Mr. W. Cole Pendarves, Mr. Archibald Hood, Mr. N. Wood, M.P., Mr. John Knowles, Mr. D. Dale, Mr. G. Baker Forster, Mr. H. Hucks Gibbs, Mr. Kenrick, M.P., Prof. Munro, Mr. T. R. Redington, and Mr. C. Whitmore, M.P. At a meeting of the South Staffordshire Commission, on Aug. 7th, it was stated that the total weight of coal and fireclay drawn during the year ending June '89, was 726,350 tons, estimated to produce in rates the sum of £18,907, the expenses being £14,500; but at the annual meeting at *Wolverhampton*, on Oct. 2nd, the general revenue account showed a surplus balance of £10,087. A shocking calamity occurred on Sept. 5th, by the outbreak of fire at the *Mauricewood* pit of the *Shotts Iron Co.*, at *Penicuik*, *Midlothian*, where both ironstone and coal were worked. The perpendicular shaft is 80 fathoms deep; then comes an incline of similar depth, having a fall of 80 in 100. It was in the latter the fire occurred, all the miners losing their lives except two, who jumped upon a "bogie" in time to be carried through the smoke. There were about 70 men and boys in the pit. The mining statistics for '88 were issued on Oct. 12th. The number of persons employed about all mines was 592,656, of whom 5680 were women above-ground. Exclusive of those employed on private railways and in washing and coking coal, the number was 578,417, of whom 5375 were women, the aggregate increase being 10,391. The number of fatal accidents was 885, and the total number of deaths occasioned thereby 960; being an increase of 4 in the fatal accidents, and a decrease of 91 in the lives lost, the ratio of fatal accidents and deaths being 1'660 per 1000 employed, against 1'850 in '87. The death-rate is more favourable than in any previous year. Statistics are then given to distinguish coal mines from the above aggregates. The total quantity of material wrought was 182,660,163 tons, of which 169,935,219 tons were coal, and 8,625,032 ironstone, the rest being fireclay, etc.; being a total increase of 9,610,368 tons compared with '87, the increase of coal being 7,815,407, and of ironstone 1,065,114. In the early hours of Oct. 16th a terrible explosion occurred in the *Mossfield* pit, *Longton*, *Staffordshire*, causing the loss of 64 lives, the mine subsequently taking fire.

Mining Royalties. A Royal Commission was appointed in the session of '89 to inquire into the terms and conditions under which the Royalties are paid, as well as the economic operation thereof upon the mining operations of the country. It is further to inquire into the terms and conditions under which mining enterprise is conducted in India, the Colonies, and foreign countries, by the system of con-

cession or otherwise, and the economical operation thereof. The Commissioners are the Earl of Northbrook, Baron Macnaghten, Sir William Thomas Lewis, Messrs. William Abraham, M.P., Alfred Barnes, M.P., Thomas Burt, M.P., David Dale, George Baker Forster, Henry Hicks Gibbs, Archibald Hood (President of the Mining Association of Great Britain), George Auldjo Jamieson, William Kenrick, M.P., John Knowles, Joseph Edwin Crawford Munro, LL.D., William Coles Pendarves, Christopher Talbot Redington, Frederick Parker Rhodes, Robert Chisholm Robertson, Josiah Thomas, Charles Algernon Whitmore, M.P., and Nicholas Wood. On Aug. 16th it was announced that Mr. Barnes, M.P., and Mr. Parker Rhodes had been appointed; and the terms of reference, as finally settled, were published on the same day.

Minority Representation. The Reform Bill, which was passed August 15th, 1867, contained provisions for the representation of minorities in such constituencies as returned three members. The principle was to limit each elector to two votes. Lord Cairns introduced the proposal on the bill being brought into the Lords (July 30th), and the principle was afterwards accepted by the Commons.

"Mint Par of Exchange." See FOREIGN EXCHANGES.

Miquelon and St Pierre. Islands in the Gulf of St. Lawrence, south of Newfoundland. They belong to France; area 90 sq. m.; pop. 6,300; and are chief centre of French cod-fisheries. Export to France valued at £1,000,000 per annum. Consult Bonwick's "French Colonies," and Norman's "Colonial France."

Mississippi River Bridge. It was reported in October '88 that operations had been commenced on the bridge for the Kansas City, Birmingham, and Memphis Railroad, across the river at Memphis, Tennessee, to replace a train ferry. There is to be a cantilever channel span of 770 ft., and two others of 620 ft.; the width will be 34 ft., and the height above high water mark 75 ft. On the east, the approach will be an embankment and an iron trestle 1,000 ft. long, on the west an embankment 1,800 ft. long, and an iron trestle 5,200 ft. long. The cost is estimated at 2,250,000 dollars. The project has been in contemplation for a number of years.

Mivart, St. George, F.R.S., b. 1827. Educated at Harrow, King's Coll., London, and St. Mary's Coll., Oxon. Called to the bar in '51, but abandoned the law for the study of natural history. He joined the Roman Catholic Church in '44. Appointed lecturer at St. Mary's Hospital '62. He is the author of "The Genesis of Species," a work of much power, in which he grapples with Mr. Darwin's theories of evolution. Mr. M. does not dispute the existence of the principle of evolution, but contends that it does not extend to men. He further denies the Darwinian doctrine that natural selection can be the cause of evolution, even granting that evolution were true. In another work he has condemned evolution on the ground that between man and the lower animals there is a fundamental distinction—a distinction which clearly manifests itself in the superiority of the human intellect over the instinct of the brutes. Among other works written by M. Mivart are "Man and Apes," "Lessons in Nature," "Contemporary Evolution," "Defence of Freedom and Liberty of Conscience," "The Cat," etc.

Mobilisation Scheme. See ARMY.

Mohammedan Era, The. Dates from the flight of Mohammed to Medina, July 12th, 622 A.D. This date is frequently spoken of as the Hegira.

Mohilla. One of the Comoro Islands (q.v.).

Mojanga. A port on the north-west of Madagascar (q.v.).

Moltke, Field-Marshal Helmuth Carl Bernhard, Count Von, b. Oct. 26th, 1800, at Parchim, in Mecklenburg. He left the Danish service ('22) for that of Prussia, and became ('32) one of the staff officers. In '35 he superintended the Turkish military reforms, and went through the Syrian rebellion ('39). He was in '56 aide-de-camp to Prince Frederick William of Prussia. He was appointed ('64) chief of the staff in the Danish war. In '66, in the Austro-Prussian war, his successful tactics as General of infantry won the battle of Sadowa. On the conclusion of the war the decoration of the Black Eagle was conferred upon him, and he was created General-in-chief of the staff. The successful conduct of the Franco-Prussian war ('70-'71) was also due, in great measure, to the tactical plans of Count Moltke. He was made Field-Marshal in '71, Count, '72. For some years Field-Marshal Von Moltke was assisted by General Waldersee (q.v.), who has now succeeded him as chief of the General Staff of the German Army. On the retirement of the Count, in Aug. '88, the Emperor William II. appointed him President of the National Defence Commission, an office held by the first German Emperor when Prince of Prussia, and by the late Emperor Frederick when Crown Prince. On March 8th, '89, the veteran general celebrated the seventieth anniversary of his entrance into the army, and received presents and congratulations from the sovereigns and the people of all the German States. Von Moltke's claim to rank as the greatest of modern strategists is undisputed. He is called "Father Moltke" by the German people.

Moluccas, or Spice Islands. A group of the Asiatic Archipelago, between Celebes and New Guinea, all more or less under Dutch authority. Area, 42,420 sq. m.; pop. 353,000. Amboyna is the chief seat of Dutch government and trade. See COLONIES OF EUROPEAN POWERS.

Mommsen, Theodor, the eminent German jurist and historian, b. at Garding, Schleswig, 1817. Educated at the Univ. of Keil. Professor of law successively at Leipzig, Zurich, Breslau, and Berlin; and in '82 he was tried on a charge of libelling Prince Bismarck, and was acquitted. His best known works, in addition to his splendid collection of Latin inscriptions, are his "Earliest Inhabitants of Italy," and "History of Rome." In '80, when Prof. Mommsen suffered the misfortune of having his library destroyed by fire, he was presented by his admirers in England with a collection of historical classics printed in this country. On the occasion of his seventieth birthday, in November '87, a congratulatory address was sent to him by members of Oxford University, signed by sixty-two dons.

Monaco. A principality, surrounded on all sides by the French department of Alpes Maritimes, except to the south where it borders on the sea. Consists mainly of the town of Monaco and its suburbs, 9 m. N.E. of Nice. Area 9 sq. m., pop. 12,548; pop. of town 3,242. Italian in language and traditions, but virtually

under French control. Noted casino, where gambling is licensed. At the end of '89 the Prince of Monaco died at the Chateau Marchais, near Saon, in the department of Aisne, and was succeeded by his son, Prince Albert of Monaco.

Monarchists. See FRENCH POLITICAL PARTIES.

Money Market. The Money Market in this country is composed of three groups of dealers—the Bank of England, the private and joint-stock banks, and the bill brokers (discount houses). The last named, as their title indicates, act as intermediaries between the banks, finding money for those who want to discount bills, and bills for those who want to invest money. The banks, on the other hand, collect and utilise the deposits intrusted to them by the public, issue notes, etc. There is, however, a great distinction between the Bank of England and the other banks of the country. The Bank of England is not only the banker of the Government, but also the bankers' bank. All the other banks keep their bullion reserves at the Bank of England, and it is this circumstance which gives that establishment its special importance as the centre of our monetary system. The Bank's reserve is really the banking reserve of the entire kingdom, and for this reason it forms the barometer of the Money Market. We work, as it is said, on a "one reserve" system, and the value of money in this country mainly depends upon the amount of reserve held by the Bank of England. The discount rates quoted by the other banks and bill brokers, who collectively are called "the market," are generally below the Bank of England rate; and one reason for this is, that there is a very important difference between "gold" and "money" as these terms are technically used. It is quite possible to discover that gold is scarce, whilst money is plentiful. For example, the Bank's reserve may be low,—which means that gold is scarce,—but if under such circumstances the bill brokers or merchants borrow money from the Bank for ten days or a month, the supply of money in the market would immediately be plentiful, although the Bank's stock of bullion would not have been increased by a sovereign. This is what is constantly occurring, and the level at which the private deposits at the Bank of England stand is therefore a very important element in controlling the course of market rates. The "price of gold" is another expression which constantly puzzles the public. It seems strange that anything can have a price measured in terms of itself, but the paradox is easily explained. By law the Mint is compelled to coin gold sovereigns for any person tendering bar gold at the rate of £3 17s. 10½d. per ounce; but, owing to the time taken by that establishment in minting, importers usually resort to the Bank of England, and sell it outright at the buying-price fixed by law for that institution—viz., £3 17s. 9d. As, however, the Bank, when selling bar gold, only does so at the price of £3 17s. 10½d., the difference of 1½d. per ounce allows bullion brokers to make a profit in times when gold is in demand for export by intercepting imported gold and selling it to the exporters at a little below the Bank's price. The gold movements at the Bank are the result of banking operations made either on home or foreign account. The internal movements are remarkably regular.

There is always an outflow of cash to the provinces during the spring and autumn, and a subsequent reflux of money to London in the early summer and the winter. These movements, however, have become less important during recent years. It is the foreign movements of gold that are of chief interest; and as regards these, the only law, if law it can be called, is that gold usually tends to leave the country during the autumn. It is then that we frequently export gold to the United States in payment for imports; and it is then, too, that the Continent and other parts of the world often draw upon our gold reserve for payments on foreign loans subscribed for here during the earlier part of the year. The Bank's reserve is seldom allowed to fall below £10,000,000. A fair average is £13,000,000 to £14,000,000. The Bank rate is never reduced below 2 per cent., and it has never exceeded 10 per cent.

Money Orders. See Post Office.

Monier-Williams, Sir Monier, the distinguished Orientalist, b. at Bombay 1819, of which Presidency his father was Surveyor-Gen. Educated at King's Coll. Lond., and Balliol and Univ. Colleges, Oxford. Professor of Sanscrit at Haileybury '44-58, and in '60 Bodley Sanscrit Professor at Oxford. Prof. M.-W. is the author of a well-known Sanscrit Grammar, an English and Sanscrit Dictionary, and has edited a number of Oriental classics. His "Hindooism," "Modern India and the Indians," and "Religious Thought and Life in India," are amongst the most popular of his writings. Professor M.-W. has been instrumental in founding an Indian Institute and a School of Indian Studies at Oxford. He represented the Government of India at the International Congress of Orientalists at Berlin, in '81, and was knighted in '86. Was appointed Duff Lecturer at Edinburgh, '88.

Monro, James, C.B. Chief Commissioner of the Metropolitan Police; is a son of the late Mr. George Monro, solicitor, of Edinburgh, and was born in that city in 1838. At the age of nineteen he entered the Bengal Civil Service, and successively held various appointments, both magisterial and executive, including those of secretary to the Bengal Board of Revenue, district and sessions judge, the inspector-general of the Bengal police, and Commissioner of the Presidency Division. He was, on the retirement of Mr. Howard Vincent, appointed Director of the Criminal Investigation Department at Scotland Yard, with the title of Assistant Commissioner. On the resignation of Sir Charles Warren, in Nov. '88, Mr. Monro was nominated his successor by the Home Secretary (Mr. Matthews).

Monte Carlo. The casino at Monaco (q.v.). First stone laid in '58.

Montenegro. A principality under the patriarchal rule of Prince Nicholas I., which is practically absolute, though nominally shared with a council of eight, half elected by the inhabitants capable of bearing arms, and half nominated by the prince. Area (including town and district of Dulcigno, ceded by Turkey in '80), 3,630 sq. m.; pop., 236,000. Capital, Cetinje. pop. 1,500. Prevailing religion, Greek Church, Education compulsory and free. No official returns of the revenue exist, but it is supposed to be about £60,000. A debt of £100,000 was raised on security of the salt monopoly in 1881. An annual pension of £4,800 was paid by Russia in return for consistent support, and an annual sum of £3,000 from Austria as a

subvention for carriage roads. Imports valued at £20,000; exports at £200,000. Chief exports, shumac, flea powder, smoked sardines, smoked mutton, cattle, goats, etc. There is no standing army except a bodyguard of 100 men; but all the male inhabitants capable of bearing arms (about 20,000) are called out in war time. The nation joined the Servians in their war against Turkey in 1876, repelling with heavy loss all attacks made by the greatly superior forces of the Turks; at the close of the war they were declared independent, and accessions of territory were granted. During the past few years the Black Mountain has been comparatively quiet, though the army has been increased, in view of the unsettled state of affairs in Bulgaria.—'89. The betrothal of Princess Miliza of Montenegro to the Grand Duke Peter Nicolaievitch took place in June. Political importance was attached to the fact of the betrothal. In connection with the congratulations on the event, the Tzar appointed the Prince an hon. col. in the 15th Russian Chasseur Regt. The hereditary Prince attained his majority in July. The harvest of '89 proved a total failure, and the Government took steps to relieve the suffering. Dispute arose with the Turkish Government on the subject of a deserter who took refuge on Montenegrin territory. The marriage of Princess Anastasia, third daughter of Princess Nicholas, and Prince George Romanovski, Duke of Leuchtenberg, took place on Aug. 28th. The Marquis Bianchi Lavagna, the newly appointed Italian Minister to Montenegro, presented his credentials to Prince Nicholas (Nov. 18th). For Ministry, etc., see DIPLOMATIC.

Montreal. The largest and most attractive city in Canada, and the present commercial and financial centre of the Dominion. Pop. 200,000. Situated on the St. Lawrence river, in the province of Quebec (q.v.).

Montserrat. A British West Indian island, forming a presidency of the **Leeward Islands**. Capital, **Plymouth**. The island is of volcanic formation, and there is no good harbour. About half of it consists of mountain and forest. Is called the most healthful and pleasant of the West India Islands. Soil extremely fertile. Sugar, limes, and fruits principally cultivated. The woods afford many valuable drugs, dyes, timbers, etc. Sulphur, iron, and aluminous schist are its minerals. Governed as a Presidency of the Leeward Islands. Education well provided for. For financial statistics, see **BRITISH EMPIRE**, etc. (table). Montserrat was colonised by English in 1632. It passed into French hands for a time, but was finally restored in 1784.

Moravians, The. A body of Christians, thought to have formed at one time a part of the **Assautes**. Withdrew into Moravia in the fifteenth century. In 1722 they formed a settlement called "**The Watch of the Lord**" on the estate of Count Zinzendorf. There were 500 members of the Church in 1727. The Society was introduced into England by Count Zinzendorf in 1738. In 1817 a London Association was formed. They also founded settlements abroad in 1739. See **MISSIONARY SOCIETIES**.

Moreton Bay. Port of Brisbane, capital of Queensland (q.v.).

Morganatic Marriage. Morganatic or "left-handed" marriages are by the common law of Germany permitted to the royal houses and the higher grades of nobility; the Prussian

law allowing a like indulgence to the lower nobility. They are, practically, marriages contracted by princes and nobles with their inferiors in rank, so far recognised that they do not reflect upon the wife's honour or the children's legitimacy, but do not preclude a subsequent full marriage with an equal in rank during the lifetime of the morganatic wife.

Morley, Rt. Hon. John, M.P., was b. at Blackburn, 1838. Educated at Cheltenham and at Lincoln Coll., Oxford, where he graduated B.A. ('59), subsequently called to the bar at Lincoln's Inn ('73). Hon. LL.D. of Glasgow Univ. Author of various works on the **French Philosophers of the eighteenth century**, of an essay on **Compromise**, a "**Life of Cobden**," and of "**Edmund Burke**." He has also recently published an essay on aphorisms. He was for some time editor of the **Literary Gazette**, the title of which he altered to **The Parthenon**, and for fifteen years ('67-82) conducted the **Fortnightly Review** (q.v.). For three years he was editor of the **Pall Mall Gazette** (q.v.), with which he terminated his connection in 1883, on his acceptance of the editorship of **Macmillan's Magazine**, from which he retired in '85. In '69 Mr. Morley unsuccessfully contested Blackburn as a Liberal. He was also defeated in Westminster in '80. Three years later, however, he succeeded at Newcastle-on-Tyne, for which he has sat ever since. When Mr. Gladstone propounded his **Home Rule** scheme he found in Mr. Morley one of his ablest and most enthusiastic supporters, and who subsequently became **Chief Secretary for Ireland**. Mr. Morley retired with his leader when the Government collapsed in June '86, but he has never swerved from the advanced position he took up at first. He is one of the five Liberals who met (Jan. '87) for the purpose of discovering a *modus vivendi* for the reunion of the Liberal party. In '88 he visited Dublin in company with Lord Ripon, and was received with demonstrations of the most extraordinary enthusiasm. During the past year ('89), Mr. Morley has delivered many stirring political speeches in the provinces; and his literary work received an addition in November, in the shape of "**Walpole**," in the "**Twelve English Statesmen Series**." He underwent (Nov. '89) a severe "heckling" from one or two deputations relative to the **Eight Hours' Movement** (q.v.), and expressed his strong objection to Parliamentary interference with the hours of labour.

Mormonism. The Mormons, or **Letter Day Saints**, are a sect founded by Joseph Smith at Manchester, N.Y. (1830). (For history of Mormonism up to last year, see previous eds.) On Jan. 12th, '87, the **House of Representatives** passed without division a bill for the **suppression of polygamy in the Territory of Utah**. The bill is a substitute for that passed by the Senate, though it aims at similar results. Its chief provisions are: (1) Polygamy is declared to be a felony; (2) The chief financial corporations of the Mormons are dissolved, and the Attorney-General is directed to wind them up by process of the courts; (3) Polygamists are made ineligible to vote; (4) All voters in Utah are to be required to take an oath to obey the laws of the United States, and especially the laws against polygamy; (5) Woman suffrage in Utah is abolished; (6) Lawful wives and husbands are made competent witnesses against persons accused of polygamy. The following are the

statistics relating to the Mormon Church: It has 12 apostles, 70 patriarchs, 3,919 high-priests, 11,805 elders, 2,066 priests, 2,923 teachers, 11,670 deacons, 81,809 families, 119,915 officers and members, and 49,303 children under eight years of age. The number of marriages for the six months ended April 16th, '89, was 530; number of births, 2,754; new members baptised, 488; excommunications, 113.

"**Morning Advertiser**," a daily paper founded Feb. 8th, 1794, is the recognised organ of the licensed victuallers. It possesses distinctive features of its own; while being Liberal and Independent and Constitutional in politics, it is not exclusively the advocate of any one party. Editor, **Thos. Wright. Offices, 127, Fleet Street, E.C.**

"**Morning Post**" (daily). Conservative in its politics, it is the fashionable chronicle of the party, giving events of interest among the higher circles of society. It also, in addition to news of the day, home and foreign, gives critiques on literature, science, and art. **Offices, Wellington Street, Strand.**

MOROCCO. The westernmost of the Barbary States, occupying the N.W. corner of Africa. An empire consisting of the kingdoms of Fez and Morocco, and the territories of Suse, Draha, and Taflet, with the oasis of Twat. Area (estimated) about 260,000 square miles, of which the Tell, or coast-region, occupies 76,000, the steppes 56,000, and the Sahara districts 158,000. Population estimated at 2,500,000 to 5,000,000. There are three capitals: Fez (pop. 80,000), Morocco (pop. 50,000), Mequinez (pop. 56,000). Chief ports are Mogador and Tangier, on the Atlantic; Tetuan and some smaller places on the Mediterranean. Taflet is the point of arrival and departure for the caravans through the Sahara. Country little known to Europeans. The highlands are said to be romantically beautiful, well wooded and fertile. Products are wheat, barley, maize, olive oil, esparto grass, hemp, many fruits, wool, &c. It is said there are coal, iron, antimony, copper, lead, tin, gold and silver, and other minerals in quantity. Chief manufactures are carpets, slippers, and famous leather. Exports, produce and manufactures, also fowls, eggs, cattle, gums, ostrich feathers. Ruled by a sultan (**Muley-Hassan**) usually styled "emperor" by Europeans. He is absolute, but the tribes beyond the mountains scarcely acknowledge his authority. The sultan is head of religion as well as of the state. He has six ministers, from whom he receives advice, and through whom he carries on the executive: Vizier, Ministers for Home and Foreign Affairs, Chief Chamberlain, Chief Treasurer, and Chief Administrator of Customs. Disciplined standing army 10,000 infantry, 400 cavalry, and some artillery; militia infantry 10,000, cavalry 10,000; irregular forces 40,000. Imperial revenue about £500,000 per annum. Imports ('87), £1,379,328; exports, £1,225,288. Trade chiefly with Great Britain, France, and Germany. Three-fourths of the trade with Great Britain, which takes maize and beans, gum, almonds, olive oil, and sends cotton manufactures. Trade passes mainly through Tangier, which is under European influence. Inhabitants are Berbers, descendants of ancient Numidians; Moors, half-caste descendants of Arab conquerors of eighth century; Arabs, Negroes, and Jews. Religion, Mohammedanism. In '83 Spain acquired a port south of Mogador, and holds some "presidios" on the coast. (See

SAHARA COAST.) In '86 the Moors declined new commercial treaties with the Powers, on the ground that foreign consuls already abused rights conceded to them. Some of them gave "protections" to Jews and others, who were thus enabled to set the government at defiance and exact sums from Moorish subjects under false pleas of debt. The first step towards remedying this state of things was taken by the United States Government early in 1887. A new consul (Mr. Reed Lewis) was appointed to Morocco. He abandoned the claim to "protections" on the part of his Government, and caused all persons imprisoned on such pretext to be released. The representatives of other Powers have more or less followed this example. In October an alarming illness of the Sultan caused a general fear of revolution and resulting anarchy. Most of the Powers despatched war-ships to Tangier for the protection of their subjects. The alarm subsided with the Sultan's recovery. During '88 the dervishes at Taflet proclaimed a holy war. Serious disputes arose between the United States and Morocco, which were ultimately settled in May. A Spanish Red Book on Morocco was issued early in '88. During the year '89 the Sultan sent a special mission to Germany, France, and Madrid. In September he visited Tetuan—a noteworthy event, as it is a great many years since a Sultan of Morocco has been seen there. He also visited Tangier, honouring the chief mosque by his presence in the afternoon of the 27th, the town being gaily decorated for the occasion. Advice from Tangier stated that the Moorish authorities had issued a proclamation in Tetuan warning the subjects of the Sultan not to harm Christians under pain of death. In reply to the Note of the Spanish Government asking for the release of the crew of the Spanish vessel which was captured off the island of Alhucemas, the Moorish Minister for Foreign Affairs states that there is some suspicion that the vessel in question carried contraband of war, and asks that an inquiry be instituted. A subsequent despatch from the Spanish Minister stated that the Sultan had ordered the Spanish captives in the hands of the Riffians at Alhucemas to be delivered up immediately to the Spanish authorities at that place, and had promised, if the capture of the Spanish vessel proved to have been without justification, that the Riff Moors shall be punished and compensation paid; but if, on the other hand, it should be shown that the Spaniards were engaged in smuggling arms, then his Shereefian Majesty hoped that the Spanish Government would punish its offending subjects as a warning to other smugglers. On Nov. 13th some men, believed to be Moors, entered the house of the Marquis Galletti Cambiaggio, the Italian Chargé d'Affaires at Tangier, during his Excellency's absence, and laid hands upon all the money and valuables they could find. The Marquis, returning home while the robbers were still on the premises, was set upon and beaten by the burglars. His Excellency is laid up from the injuries which he received. (For relations of Morocco with Spain see SPAIN; and for Ministry see DIPLOMATIC.) **Osmail De Amicia**, "Morocco," Hooker's "Tour in Morocco," Leared's "Morocco and the Moors," Watson's "Visit to Wazan," "Morocco," by H. P. de la Martinière, and Jos. Thomson on "Morocco." **Morris, Lewis**, author of the "Epic of Hades," "Songs of Two Worlds," "Gwen," "The Ode

of Life," "Songs Unsung" etc., originally published anonymously as the productions of "A New Writer," was b. in Carmarthen. Graduated First Class in Classics at Jesus College, Oxford, 1855. Called to the bar '61, and ('80) served on the Committee of Inquiry into Intermediate and Higher Education in Wales. He succeeded the late Mr. W. Adam as vice-chairman of the political committee of the Reform Club. He unsuccessfully contested Pembroke as a Home Ruler in '86. Mr. M. (Jan. 88) received a silver medal from Her Majesty in recognition of his Jubilee Ode. A new and enlarged edition of Mr. M.'s works was published Dec. '89.

Morris, Philip Richard, A.R.A., b. at Devonport, 1838. He early attracted the notice of Mr. Holman Hunt, by whose advice he studied the Elgin marbles at the British Museum. Afterwards a most successful student of the Royal Academy. His first exhibited picture appeared under the title of "Peaceful Days," since when Mr. Morris has become celebrated for his tender and poetic rendering of scenes of humble life, and his delicate arrangement of colour. Among his best known pictures are "The Shadow of the Cross," "Prison Fare," and "A Procession at Dieppe." He exhibited "Home: a Family Group" at the Royal Academy Exhibition '89. Elected A.R.A. ('77).

Morris, William, artist and poet; b. at Walthamstow in 1834, educated at Marlborough and Exeter Col. Oxford. Mr. M. turned his attention for some time to the study of architecture; and in '68, together with his friends Dante G. Rossetti and Burne Jones, endeavoured to elevate the artistic taste of the public. For this purpose a business of "art fabrics," wall-papers, and stained glass, was started. Though undertaken rather as an artistic venture than as a business speculation, the concern has been extremely successful. Mr. M. published in '67 his poem "The Life and Death of Jason," which was followed in '68-70 by "The Earthly Paradise," a series of twenty-four romantic tales. His later works include "Love is Enough," "The Story of Sigurd the Volsung," and "Hopes and Fears for Art." He has recently translated the Odyssey of Homer, and in conjunction with Mr. Eirikr Magnusson recently rendered into English verse a number of Icelandic Stories, and in '89 published "A Tale of the House of the Crofings, and the Kindreds of the Mark." Mr. W. M. is one of the leaders of the Socialistic Movement in England.

Morrisonianism, a name used to designate the principles held by members of the Evangelical Union, formed by Dr. Morrison and others, in May 1843, of those who disagreed with the doctrine held by the Presbyterian Churches that Christ only died for the elect. Evangelical Unionism first originated in 1841, when its founder and three other ministers separated from the United Secession Church. The Evangelical Union Churches, which are mainly confined to Scotland, have a theological hall, where a number of students attend; and a weekly official organ, the *Christian News*. Many of the ministers, all of whom are total abstinents, have settled in England in Congregational churches, which are somewhat similar in church government. In all there are about ninety E. U. churches. The distinctive tenets are that the Divine Father loves all, the Divine Saviour died for all, and the Divine Spirit strives with all.

Mortmain, Statute of. Gifts in Mortmain first prohibited by Henry III. (1225); afterwards by Edward I. (1279) applied to restrain growth of Church funds; Richard II. (1392) extended prohibition to all lay corporations; statutes suspended by Philip and Mary (1554); legacies by Mortmain restricted by George II. (1736).

Mozambique. A Portuguese possession on the east coast of Africa, nominally extending from Cape Delgado to Delagoa Bay, over 1,200 miles, with area 382,583 sq. m., pop. 350,000. In reality the Portuguese only occupy a few points, to which their authority is limited. The chief of these settlements on the coast, mostly on islands, are Mozambique (the capital), Quillimane (at one of the entrances to the Zambesi), Sofala, Inhambane, and Lourenço Marques, in Delagoa Bay. Up the Zambesi 120 miles is Sena, of little importance; 260 miles up is Tete, and 500 miles up the stations of Zumbo and Ohiova. This territory has been in Portuguese hands since 1497, yet nothing has been done by them to open up the country. Government and trade are in the most debased condition. A small military force, composed of convicts and natives, is little respected. The slave trade continues in spite of laws against it. The coast is unhealthy, but rich in products. Gold has been worked at some places inland. Recently a splendid harbour has been discovered—**Nakala**, in Feniço Veloso Bay. Some portions of the inland border are now being opened up by the Blantyre Mission of the Universities' African Missions. The settlement in **Delagoa Bay** (q.v.) attracted a good deal of attention during '89, owing to the strenuous efforts of the Boers to obtain it.

Müller, Frederick Max, b. 1823. Educated at Leipsic Univ., where he graduated ('43). Studied for some time in Paris, and ('46) came to England, where he found employment in collating MSS. at the East Indian Museum and at the Bodleian. Appointed ('50) Deputy Taylorian Professor, and ('54) Taylorian Professor at Oxford. Made the first Professor of Comparative Philology in Oxford ('68), with which University he has been associated ever since. Professor Müller is one of the eight foreign members of the Institute of France, and is a Knight of the *Ordre pour le Mérite*. He is an honorary LL.D. of Edinburgh and Cambridge. Among his published works are "The Rig-Veda: Translation from the Sacred Books of the East," "The Religions of India," "A Survey of Languages," "Buddhism and Buddhist Pilgrims," "Lectures on the Science of Language," "Chips from a German Workshop," "Biographical Essays," "Biographies of Words and the Home of the Aryas," etc. Elected Gifford Lecturer on Natural Theology at Glasgow Univ. '89.

Murders. The return of all murders committed in the United Kingdom, during 1880 and '86 respectively, show that in '80 the cases reported were—in England and Wales 145, in '86 152; in Ireland 16 and 24, and in Scotland 28 and 17. This makes a total for '80 of 189, and for '86 of 193.

Murray. See VICTORIA.

"Murray's Magazine" (monthly). Started January 1887 by the well-known firm of John Murray, Albemarle St. Is a popular magazine for the general reader, containing articles upon topics of the day, sport, travel, literature, and art, and devoting considerable space to fiction.

Short notices of new books are given monthly under the heading of "Our Library List." Editor, Mr. Edward A. Arnold (a nephew of the late Matthew Arnold). Office, Albemarle St., W.

Muscat. For Political Agent see DIPLOMATIC.

Muska and Efat Islands. Two small unoccupied islands in Tajurah Bay, Gulf of Aden. Acquired by Great Britain in 1858. In 1887 formally admitted by the British Government to be within the sphere of French claims.

Music, '89. During the year most of our native composers gave proof of their activity, and in the majority of instances the result was highly satisfactory. Among the earliest novelties claiming attention in the Metropolis was *The Dream of Jubal*, a cantata composed by Dr. A. C. Mackenzie to an original poem by Mr. Joseph Bennett, given at Novello's Oratorio Concerts, after it had been heard at the jubilee celebration of the Liverpool Philharmonic Society, for which it was written. Employing for much of the narrative portion a reader whose utterances were accompanied by picturesque instrumentation, the work was somewhat akin to Mendelssohn's *Athalie* and *Antigone* music. For the present day it was a bold experiment, but the favour accorded was quite commensurate with reasonable expectations, and subsequent performances had the effect of completely endorsing the original verdict. Both in its choral and instrumental features (the latter being particularly conspicuous) the work may be pronounced worthy to stand beside the most finished labours of its accomplished composer. It was among the productions chosen for the Festival of the Three Choirs—held this year at Gloucester—and attracted considerable attention.—In the autumn Dr. Mackenzie composed an elaborate violin piece for Señor Sarasate, called *Fibrooh*, which was first heard at the *Leeds Festival* in October. To this festival it was hoped that Sir Arthur Sullivan would be able to contribute some new work that would further have associated his name with a triennial gathering that already contained on its roll of exceptional successes the English composer's *Martyr of Antioch* ('80) and *The Golden Legend* ('86), but it was understood that he had been too busy with the new opera to follow *The Yeomen of the Guard* at the Savoy Theatre. Sir Arthur, however, arranged for concert purposes his incidental music to *Macbeth*, composed for Mr. Henry Irving's magnificent revival at the Lyceum; and this, with the ever popular *Golden Legend*, was played to a crowded assemblage at the "extra" concert which is customary at the great musical meeting of Yorkshire. To the *Leeds Festival* Dr. Hubert Parry, Dr. Villiers Stanford, and Mr. F. Corder furnished novelties that awakened much curiosity. Encouraged by the commendation accompanying his "new departure" in his oratorio *Judith* (Birmingham, '88, and one of the principal items of the Gloucester Festival this year) Dr. Parry pursued the same path in his setting of Pope's ode on *St. Cecilia's Day*, and the issue again commanded universal praise. As his choral ballad *The Evening* (Leeds, '86) did so much to extend his popularity throughout the United Kingdom, Dr. Stanford acted wisely in taking up another of the Poet Laureate's works for treatment in Yorkshire. *The Voyage of Maeldune*, is, however, a much more important work than its predecessor. Solo voices are utilised as well

as band and chorus, and the fancifulness of Lord Tennyson's theme is reflected by the musician in the most felicitous manner. Abounding with grace and melodic charm, and at the same time scholarly, a good reception for *The Voyage of Maeldune* may be guaranteed whenever it is adequately interpreted. Gauged by his pleasing opera *Nordis*, Mr. Frederick Corder's cantata *The Sword of Argantyr* was somewhat disappointing. The remaining novelty of the *Leeds Festival*—a busy gathering for all engaged—was a brief cantata called *The Sacrifice of Fraix*, composed by Dr. William Creser, the organist of the parish church, a work that suffered by being only a portion of the original design, the sudden death of the author of the book (the learned Dr. Francis Hueffer) preventing the completion of later sections that had been determined upon.—The one absolute novelty of the Gloucester Musical Festival was a church cantata, *The Last Night at Bethany*, modelled by Messrs. Joseph Bennett and C. Lee-Williams (the cathedral organist), upon those of Bach, composed with a view to the congregation participating at certain points of the sacred story. In all quarters the venture was approved, and the expressively devotional character of Mr. Lee-Williams's music created so deep an impression as to warrant further essays in a like direction. In every respect the *Three Choirs Festival* of '89 was eminently successful. That very promising young Scottish composer, Mr. Hamish MacCunn (*q.v.*), in *The Lay of the Last Minstrel* added another agreeable composition to his characteristic settings of well-known poems. This was given by Mr. Manns at the Crystal Palace Concerts, where in April, at the benefit concert of the esteemed conductor, Mr. Frederic Cliffe obtained his opportunity by the introduction of a symphony from his pen. Fresh in style, full of glow, and spirited in execution, this work (originally intended, it was rumoured, for the *Leeds Festival*) at once made its mark, and before the summer musical season ended was adopted by the *Philharmonic Society*, the subscribers to which appended their congratulations to those so liberally bestowed upon the composer at Sydenham. In connection with the oldest musical institution of which London can boast, it may be mentioned that during its annual series of concerts the Russian pianist M. Sapellnikoff, another pianist M^{me}. Backer-Grondahl, and the Belgian violinist M. Ysaye, respectively made their first appearance here and were cordially received. Fraulein Geisler-Schubert (a grand-niece of the ill-fated composer) visited the Metropolis as a pianist, and Otto Hegner (*q.v.*), the boy pianist, both in the spring and the late autumn, fully maintained the reputation he had previously gained without affording the slightest indication that he was being overtaxed either physically or mentally. Edward Grieg (*q.v.*), the Scandinavian composer, who was one of the musical "lions" of '88, accompanied by his wife, again came to England for a few weeks, and they drew crowds wherever they appeared. *Madame Adeline Patti* (*q.v.*) in January gave some concerts at the Royal Albert Hall prior to leaving Europe for a South American tour, and again sang in the autumn on her return—each occasion of her appearance, whether in London or in the provinces, seeming to demonstrate that her popularity is as great as of old. Two interesting

features in the season of the *Royal Choral Society* at the *Royal Albert Hall* were the production in London in February of Mancinelli's oratorio *Isaías* (given at the Norwich Festival of '87), and in April of the Flemish composer Peter Benoit's sacred cantata *Lucifer*, a strikingly original work. Late in the year came the announcement that the operations of *Novello's Oratorio Concerts* would henceforth be amalgamated with those of *Mr. Baraby's* choir. Before the *Novello* season ended a hearing was afforded of *Dudley Buck's* thoughtful work *The Light of Asia*, and of *Handel's Saul* as given at the *Birmingham Festival* the preceding autumn. The departure of *Mr. Santley* (*q.v.*), the celebrated English baritone, for Australia, was severely felt, particularly at the provincial musical festivals. To compensate in some measure for this temporary loss to the United Kingdom, *Mr. F. H. Cowen* returned from his highly prosperous visit to the Antipodes, and resumed his post as conductor of the *Philharmonic Society*. Great was the satisfaction when it became known that he had ready for production a new dramatic cantata called *St. John's Eve*, the libretto by *Mr. Joseph Bennett*. During April, May and June the concerts of lesser known vocalists and instrumentalists—many of them as yet scarcely free of their tutors—were more numerous than ever, but as a rule the proceedings were only of interest to the executants and their friends. *Mr. Henschel*, as conductor of the *London Symphony Concerts*, invited *Mr. Broughton's Leeds* choir to the *Metropolis* to sing in *The First Walpurgis Night* and Beethoven's "Choral Symphony," and the reception of the Yorkshire chorallists was in harmony with their widely acknowledged deserts. The Monday and Saturday Popular Concerts continued their steady course. In terminating the record of concerts it may be said that from time to time creditable displays were made by the pupils of the *Royal Academy of Music* (*q.v.*), the *Royal College*, the *Guildhall School*, and like institutions.—A good deal was done in the department of Opera from the middle of May until the end of July. The *Royal Italian Opera* at *Covent Garden* was recommenced on the 18th of May by *Mr. Augustus Harris*, with a very strong company, that included *Mmes. Albani, Nordica, Ella Russell, Melba, Valda, MacIntyre, Van Zandt, and Scalchi*, and *MM. Lassalle*, the brothers *D'Andrade, Barton M'Guckin, Winsgradow*, and last, but very far from least, the brothers *De Reszke*. The conductorship was shared by *Signors Luigi Mancinelli, Randegger*, and *Arditi*. *Mr. Harris* made arrangements for the addition to his repertoire of Gounod's *Romeo et Juliette* (in French), *Les Pêcheurs de Perles*, *Die Maisteringer* (in Italian), and *Le Prophète*; but the last-named had to be relinquished in consequence of the hindrance to preparations through the special visit to the opera of the *Shah of Persia* and the English royal family, when a brilliant spectacle was presented that will not soon be forgotten by those who witnessed it. During the ten weeks *Mr. Harris* played sixteen operas, the honours being carried off by Gounod with *Faust* (with grand combination casts), and *Romeo et Juliette* (with *Madame Melba* and the two *De Reszkes*), each of which was given seven times. The Italian version of *Die Maisteringer*, with *Madame Albani* and *MM. Jean De Reszke, Lassalle, Montariol*, and *Isardon* (a Belgian

singer engaged for the part of the spiteful Beckmesser), as principals, was played four times—a number that would certainly have been exceeded had Wagner's work been produced earlier in the season. The whole of the operas were finely mounted, and both from the artistic and financial aspects the issue of *Mr. Harris's* third Italian Opera campaign was very gratifying. A memorable event was the bringing to London in July by *Mr. Mayer* of *Verdi's* last opera, *Otello*, first produced at *La Scala* in Feb., '87. Instead of playing it at the *Lyceum*, with a scratch company and makeshift accessories—conditions that might not have checked the eagerness of English amateurs to make acquaintance with the work, however much the effect of the music may have been spoiled—the enterprising director secured *Signor Tamagno* and *M. Maurel*, the respective representatives of *Othello* and *Iago* chosen by *Verdi*, and transferred here the *La Scala* band, chorus, and scenery, together with the famous conductor, *Signor Faccio*. Thus the performance was the nearest approach to the original that seemed possible after the lapse of two years. That the stupendous cost of the venture, independently of the dramatic qualities of the music and the fine acting and singing of the two male principals, should be extensively discussed, was inevitable, and on all sides it was admitted that patrons of opera owed a debt of gratitude to *Mr. Mayer*. The *Venator impresario*, *Mr. Mapleson*, opened *Her Majesty's Theatre* for Italian Opera, and brought forward several singers new to this country. He gave a few familiar works, and revived *Donizetti's* charming *L'Elisir d'Amore*; but before he could produce the promised Italian version of *Bizet's La Jolie Fille de Perth* the season came to an abrupt conclusion. The most fortunate essays in light opera were made at the *Prince of Wales's Theatre* and the *Lyric*. At the former, *Plaquette's Paul Jones* had the exceedingly valuable co-operation of that pleasing vocalist *Miss Agnes Huntington*; and at *Mr. Leslie's* new house, *Dorothy*, after 931 representations, yielded its place to the same composer's *Doris*, while the *Red Hussar* (Nov. 3rd) seemed attractive. Other operas produced during the year were *Signor Tito Mattei's La Prima Donna* (at the Avenue in October), *Major George Cockle's The Castle of Como* (Opera Comique, October), *Mr. Henry Parker's Mignonne* (*Royalty Theatre*, May), *Mr. Walter Slaughter's Marjorie* (Prince of Wales's, July), and *Mr. Edward Solomon's* tuneful trifles *Fickwink* and *Penelope* (both at the Comedy). During August, September, and October, *Covent Garden* and *Her Majesty's Theatres* were in opposition with promenade concerts. The *Ballad Concerts* commenced Nov. 19th, at *St. James's Hall*.

Mutsuhito. The present *Mikado* (or Emperor) of Japan; b. 1859. Ascended the throne in 1867. His reign has been marked by great reforms, prompted by a liberal spirit, resulting in abolishing entirely the feudal system which has impeded the general progress of the country. Under the rule of the present *Mikado*, Japan has entered into an unprecedented era of prosperity. Civilisation has made rapid progress, and the introduction of Western arts and ideas has secured for Japan a foremost place amongst the Asiatic nations. He has recently given the Japanese a parliamentary constitution based on European principles. See JAPAN.

Mysore. For Resident, see DIPLOMATIC.

N

"Named." See PARLIAMENTARY PROCEDURE.
Nansen, Frithjof, Ph.D., distinguished as a rising zoologist, and leader of a scientific expedition across Greenland, '88, was b. in Christiania 1861; appointed curator of the zoological department of Bergen Museum '82, which position he resigned in '89 on his return from Greenland. Married, Sept. '89, *Mlle. Eva Sara*, youngest daughter of the late eminent zoologist *M. Sara*, Professor of Zoology in Christiania University, and herself an eminent singer. Dr. N. has published several important zoological memoirs, and his account of the Greenland expedition is shortly to be issued.

Napier of Magdala, Robert Cornelis Napier, P.C., 1st Baron (cr. 1868), was b. 1810. Was brigade-major in the Sutlej campaigns (45-46), where he was severely wounded; acting Chief Engineer during part of the siege of Moulton, where he was again wounded; commanded the Engineers during the operations which ended in the capture of Lucknow ('58); was made K.C.B. for his services ('58), and received the thanks of Parliament ('59). Again received the thanks of Parliament ('61) for the "skill, zeal, and intrepidity" shown in the operations which terminated in the capture of Peking. Appointed to conduct the expedition to Abyssinia (October following), on the successful conclusion of which, and capture of Magdala, he once more received the thanks of Parliament, was created a peer, and granted a provision of £2,000 per annum for himself and his next heir. Subsequently Governor of Gibraltar. *Constable of the Tower* ('87).

Napoleon, Victor, son of Prince Napoleon and Princess Clotilde, b. 1862. When his father, after the death of the Prince Imperial in '79, took the position of head of the house of Bonaparte, the claim was disputed by *M. Paul de Casagagnac* and several other Imperialists, who put forward the young Prince Victor as his father's rival. But this move was not encouraged by the son, though the latter, it is understood, was nominated in the Prince Imperial's will as his successor. When the Expulsion Bill of '86 became law, the Prince and his father were exiled from France. An estrangement between the father and son has long existed. In '89 he issued a manifesto previous to the general election. In November he received a commission as major in the Russian army, and will serve in the Caucasus.

Nasr-od-Din, Shah of Persia, son of the late Mehemet Shah; b. in 1829. He ascended the throne in '48. At the age of fourteen he was made Governor of Azerbeidjin. On his accession he was for some time guided by the counsels of the Ameer, *Mirza Taghi*, who was appointed Grand Vizier. The Ameer, being a man of great ability and energy, instituted many reforms, and was at first rewarded for his services with the hand of the Shah's sister in marriage. The jealousy of courtiers, however, subsequently influenced the Shah's mind against the Grand Vizier, who was banished and, according to some accounts, murdered. The Shah's position, owing to the rival claims of England and Russia for influence at his court, and for commercial intercourse with his subjects, is not an easy one. He has shown his desire to cultivate closer relationships with England by the commercial concessions he

granted last year in a convention obtained through the influence of Sir Henry Drummond Wolff (q.v.). The Shah made a tour of Europe in '73, and again in '89, when he was favourably received in England and elsewhere.

Nassau, Capital of the *Bahama Islands* (q.v.).

Natal. A British colony on the south-east coast of Africa, discovered by Vasco de Gama on Christmas Day 1497, and hence named *Terra Natalis*. Sea-board extends from the *Umtamfuna* river on S., to the *Tugela* on N., a distance of 170 miles. Zululand borders the colony on the N.E., Transvaal on N., Orange Free State and Basutoland on W., Transkeian Territories on S.W. Area 24,000 sq. m.; pop. 477,100. Capital *Pietermaritzburg*, pop. 14,429; the only port is *D'Urban*. Other centres inland are *Verulam*, *Isipingo*, *Richmond*, *Lady-smith*, etc. The colony is divided into fourteen districts.—The coast scenery is bold, and the whole country inland romantically beautiful, being dominated everywhere by the precipitous heights of the *Drakensberg*, some of the peaks of which attain an altitude of 9,500 feet. The numerous rivers are not navigable, although some of them are considerable streams, so that the country is well watered and fertile. The climate is very fine: the winter bright and tolerably cool, and the summer heat tempered by cloud and rain. Country divisible into three belts or terraces—coast-land, midland, and upper. The low-lying coast-land, extending about fifteen miles inland, is highly fertile, and has been found suitable for the growth of sugar, coffee, arrowroot, spices, tobacco, cotton, flax, silk, and tropical fruits; at present sugar-growing is a profitable and flourishing industry. For sugar cultivation it has been found necessary to introduce Indian and Chinese coolies. Coal and lime are worked; iron, copper, and gold are found. The native fauna and flora are extensive and interesting; the hippopotamus is still to be found, as also crocodiles, iguanas and chameleons, leopards, hyenas, tigers, etc. Timber trees are numerous and valuable, especially the yellow wood, the stink wood, and the iron wood. The middle region is well adapted for cereals and European farming. The upper region, mountainous, is pastoral—sheep, cattle, and horses being reared in great numbers.—The colony has representative government. There is a Governor, an Executive Council of officials, and a Legislative Council of thirty members, of whom seven are nominated by the Governor and the remainder elected by property-holders in the boroughs and counties. Religion well provided for by denominational bodies, but no State aid. There are 10 Government schools, 42 aided, besides others, and 85 native and Indian schools. There is a force of 350 mounted police and 800 volunteers.—For financial statistics see *British Empire*, etc. (table). Principal exports, wool, hides, sugar, arrowroot, maize, ostrich feathers, mohair. Of the area, 8,000,000 acres have been acquired by colonists, 2,000,000 reserved to Kaffirs, and 2,778,000 are Crown property, open to lease, sale, or grant. 65,883 acres are under cultivation: leading crop, sugar. Nearly 300,000 more are cultivated by natives. The colonists own 165,127 cattle, 55,872 Angora goats, 448,348 sheep, 23,376 horses. Kaffirs own 446,667 cattle, 251,186 goats, 35,940 sheep, and 30,950 horses.

There are 27 miles of railway, now extending inland to Ladysmith, near the Transvaal border and the goldfields. Natives are chiefly of the Zulu nation. Most of them belonging to the colony are peaceable, orderly, good herdsmen, farmers, or labourers. But the recent troubles in Zululand, particularly the invasion of it by Boers, have caused and are causing a large influx of Zululand natives into Natal, giving rise to no little anxiety for the future.—In 1837 a party of Dutch Boers "trekking" from Cape Colony settled in Natal. Their conduct speedily brought about a series of desperate struggles with the powerful Zulu nation. Owing to these disturbances, the Governor of the Cape sent troops to take possession of Natal, and in 1843 the country was annexed, whereupon many of the Dutch re-crossed the Drakensberg. In 1849 numerous British settlers located themselves in Natal. In 1853 a bishopric was created, under Bishop Colenso. In 1856 Natal was erected into a separate colony, distinct from the Cape. In 1873 there was an outbreak of the Amalubi Kafirs, under Chief Langalibalele. Colonial troops were employed to quell it. Langalibalele and others were brought to justice, transported and imprisoned, though afterwards amnestied. The question of native government was brought into prominence. The Imperial authorities sent out Lord Wolsley as Administrator, and in 1875 an Act came into force for the better management of native affairs. In 1879 Natal became the base of operations in the Zulu war. In 1886 a serious dispute arose between the Governor (Sir A. Havlock) and the Legislative Council and people of the colony. Appointed by the Imperial Government to settle affairs in Zululand, where Boer raiders had established themselves, the Governor gave way to the Boer claims, whereas the people of Natal desired their expulsion and the annexation of Zululand to the colony. The Legislative Council adopted resolutions of censure, and refused supplies to the Governor. But this difficulty has since passed over. The chief matters which interested the colony during the year '89 was the question of Free Trade in Cape Colony, which was much discussed, but eventually Natal withdrew from the negotiations. In June the Natal Council passed the new tariff, fixing a 5 per cent. *ad valorem* rate, enlarging the free list, and empowering the Government to reduce at discretion the duties on all articles going out of Natal. See ZULULAND, SWAZILAND, TRANSVAAL, GOLDFIELDS, etc.; and for Executive Council, etc., see DIPLOMATIC. Consult Peace's "Our Colony of Natal," Brooks's "Natal," Gillmore's "Great Thirst Land," Petherick's "Catalogue of York Gate Library," and *The Statesman's Year-Book*.

Natalie, Queen. See SERVIA.

National Association for the Advancement of Art, and its Application to Industry. Founded for the purpose of holding an Annual Art Congress in the principal manufacturing towns of the kingdom in rotation, to discuss problems of a practical nature connected with the welfare of the Arts, Fine and Applied. Bears the same relation to Art that the British Association (*q.v.*) bears to Science. The First Congress was held at Liverpool Dec. '88, the Second at Edinburgh Oct. 27th to Nov. 1st, '89. President ('89), The Marquis of Lorne, K.T. Hon. Secs., W. M. Conway and A. H. Mackmurdo. Office, 22, Albemarle St., W.

National Association for the Employment of Reserve and Discharged Soldiers. founded 1885, for the purpose of finding employment for warrant officers, non-commissioned officers, and young soldiers, returning to civil life and to the Army Reserve, after a few years' service in the ranks. Income for '88-9, £1,389 15s. 13d. Sec., Lt.-Col. Boyes. Offices, 12, Buckingham Street, Strand.

National Biography, Dictionary of. Projected by Messrs. Smith, Elder, & Co., under the editorship of Mr. Leslie Stephen, assisted by a staff of eminent writers. The first volume, published in '85, began with Dr. Abbadie, Dean of Killaloe, and ended with Queen Anne. Volume xx., published Sept. '89, reached to Forrest-Garner. A volume is published at the end of each quarter. Office: 15, Waterloo Place, S.W.

National Footpath Preservation Society. The, was formed Sept. 30th, 1884, for the "preservation of ancient foot and bridle paths, and all other rights of way by land and water, fishing, vacant spaces, as village greens, roadside slips of land, etc." Branch societies have been started in Henley, Kendal, Lancaster, Croydon, Keswick, Carlisle, Cardiff, Leicester, Bristol, Wirral District, Godalming, Witney, North Durham, and elsewhere. The patron of the parent society is the Duke of Westminster. Lord Ribblesdale is president, and among the vice-presidents are the Archbishop of Canterbury, Lord Claud J. Hamilton, Baron Henry De Worms, M.P., Lord Randolph Churchill, M.P., Sir Lyon Playfair, M.P., Earl Granville, Viscount Cross, Mr. W. H. Smith, M.P., Marquis of Hartington, M.P., Sir Henry James, M.P., Lord Brassey, Mr. Chaplin, M.P., and Lord Tennyson. The Society publishes a lengthy list of honorary solicitors. The subscription is 5s. a year, but a 10s. 6d. subscription entitles the member to legal advice gratis. It is stated that scarcely a week elapses but the newspapers chronicle attempts to close footpaths, or other encroachments. It may be assumed that an encroachment on an ancient common or open space, such as a village green, can generally be successfully resisted, if care is taken to adopt a legal course of procedure. Complaints may be addressed either to a local Footpath Society or to the Sec. and Surveyor, Mr. Henry Allnutt, 42, Essex St., Strand, W.C.

National Debt Act, '89. See Session, sect. 86.

National Fruit Growers' League. The, was founded by Mr. Sampson Morgan, for the purpose of securing (1) the advancement of horticulture; (2) the development of the food resources of the people at home; (3) the revival of village industries; (4) the creation of small holdings of land under equitable systems of tenure; (5) the opening up of the land, so that English capital and labour may be kept at home; (6) the application of improved and intelligent systems of culture to the soil. Sec., F. Harris; Office: 21, New Bridge St. E.C.

National Gallery. (For earlier history see ed. '88.) The present trustees of the Gallery, in the order of their nomination, are:—Sir Henry Layard, Sir William H. Gregory, Lord Northbourne, Viscount Hardinge, The Earl of Carlisle, and Sir Richard Wallace. The Director is Sir F. W. Burton; the Keeper and Secretary is Mr. Charles L. Eastlake. The abolition of the autumnal recess, during which the Gallery was formerly closed for six weeks; the

extended hours for keeping the collection open to the inspection of visitors; and the annual grant by means of which the contents of the library have been supplemented, are all recent measures which indicate that the trustees and director are keeping pace with the times. What was for a long time urgently needed—viz., a new edition of the official catalogue—was published in '89, after enlargement and careful revision. The public are admitted free on Mondays, Tuesdays, Wednesdays, and Saturdays. The National Gallery, as may be supposed, contains by far the best examples of the English school of painting to be found, comprising as it does the masterpieces of Turner, Reynolds, Landseer, Gainsborough, Wilkie, Romney, Constable, Herring, Callcott, Ety, and others. On the other hand, the foreign masters are well represented, the paintings including works of Raphael, Rembrandt, Vandyck, Rubens, Cuyp, Teniers, Correggio, Titian, Murillo, and others. Among the recent additions are five landscape paintings by Constable, and a Gainsborough. The "Madonna degli Ansdei" of Raphael was purchased by the Government out of the Blenheim collection for £70,000, and Vandyck's "Equestrian Portrait of Charles I." obtained from the same source for £17,500. The purchase of these two pictures led the Government to suspend for a term of years their annual grant of £10,000 to the Trustees of the National Gallery for the augmentation of the collection. A portion of this grant has, however, been recently renewed, £2000 being voted in '88, and expended as follows:—Mocetto's "Massacre of the Innocents" (two pictures) £600; and Pedro Campaña's "Preaching of Christ," £500; Alexander Nasmyth's "Stirling Castle," £126; a Dutch "Portrait of a Young Man," £50; "Card Players," £1244. The number of visitors in '88 was 550,877. Consult *Annual Reports*.

National League, founded in 1882 on the ruins of the Land League, after the suppression of the latter by the Government. It is both a political and an agrarian organisation, its main objects being the reform of the Land Laws, the weakening of the power of the landlords, the increase of peasant proprietors, and the creation of some kind of independent or semi-independent Government for Ireland, under the name of Home Rule. There were nearly 2000 branches of the League scattered throughout Ireland, each with its president, secretary, and treasurer. In America there is an organisation of a similar character, and another in England, whose chairman is Mr. T. P. O'Connor, M.P. (q.v.); Scotland also has a League, principally composed of Irishmen, which advocates the principles of the parent institution north of the Tweed. The main resources of the N. L. are drawn from America, whence, a year or two ago, from £2,000 to £3,000 were often received between one and the other of the fortnightly meetings in Dublin. Though Mr. Farnell is President of the League, neither his health nor his disposition fit him to carry on the practical work of such a great political organisation, which is mainly done by Mr. T. Harrington, M.P., the Secretary. In the columns of *United Ireland* (q.v.), the organ of the N. L., Mr. William O'Brien, the editor, propounded about two years ago what was known as "The Plan of Campaign." This "Plan" was, in brief, a recommendation to tenants not to pay rent to landlords, but to pay to officials representing the League what was

deemed a fair rent, which would be handed over to the landlords provided the latter accepted it as payment in full. The "Plan" was not long in being put in operation, and proved so embarrassing that the Government proclaimed it as illegal. In spite of this, however, the "Plan" was long subsequently in operation in remote districts, and is so even now, though it gives much less trouble to the Government. On the August 10th, '87, it was announced in both Houses of Parliament that the League had been proclaimed as "a dangerous association"; thus giving the Government power to suppress at any moment the League or its branches, or disperse its meetings. The proclamation produced much excitement both in England and Ireland, and gave rise to a great Parliamentary debate on a Resolution brought forward by Mr. Gladstone condemning the action of the Lord Lieutenant (see Session '87, ed. '88). The Government emerged from the debate with a large majority, but the League persevered with their meetings in spite of the efforts made by the Government for their suppression. See IRELAND (political history), in which is incorporated an account of the new Tenant's Defence Association, which in the opinion of politicians is considered as intended to supersede the National League and the Plan of Campaign.

National Liberal Federation, The. For history see ed. '88. The headquarters of the Federation are now removed to London—42, Parliament Street, Westminster, S.W.

National Liberals. See GERMAN POLITICAL PARTIES, and GERMANY.

National Society for the Prevention of Cruelty to Children has for its object the prevention of the cruel treatment, wrongful neglect, or improper employment of children, also all conduct by which life or limb or health is wrongfully endangered or sacrificed, or by which morals are imperilled or depraved. These objects are sought to be secured by (1) remonstrance and moral suasion; (2) enforcement of existing laws; (3) promotion of any amendment of the law that may be necessary or desirable. H.R.H. Princess Christian is Royal Patroness. The Rt. Hon. the Lord Mayor is Patron, the Duke of Abercorn is President, and among its Vice-Presidents are Cardinal Manning (whose paper, "The Child of the English Savage," in the *Contemporary Review*, excited much attention), the Bishop of London, and Archdeacon Farrar. Hon. Director, Rev. Benj. Waugh; Sec., Mr. John Faulkn'r. Organ, *The Child's Guardian*; Editor, Rev. B. Waugh. Office (where a shelter for children is provided), 7, Harpur St., Bloomsbury, W.C.

National Temperance League. See TEMPERANCE SOCIETIES.

National Union of Teachers, The, founded 1870.—Objects: (1) promoting the spread of education; (2) bringing practical knowledge to bear on educational legislation; (3) uniting the teachers of public elementary schools in a strong professional organisation; and (4) watching the interests and advancing the welfare of teachers. The Union includes local associations and district unions, consisting of not less than three local associations, whose object is to guide public opinion in various ways. Conferences are held at Easter. There are now more than 350 local associations in England and Wales with over 14,000 members. There are a *Provident Society* and *Benevolent*

Find in connection with the Union. See, T. E. Hillier. *Office*, 71, Russell Square, W.C.

"*Nature*," a scientific journal and review (weekly), founded Nov. 4th, 1869. Treats of current scientific topics, with articles contributed by the leading specialists of the day. Its columns are also open to correspondence on scientific questions. Editor, J. Norman Lockyer.

Naval Construction and Equipment. See NAVY, BRITISH.

Naval Defence Act, '89. See SESSION, sects. 40 and 98.

Naval Manœuvres, British. Many of the Continental nations have for several years past exercised a portion of their fleets annually, for the purpose of giving their officers and men instruction and experience, testing the new material of war, and solving, so far as is possible by operations in peace time, problems of naval strategy and tactics under modern conditions. In this country the first attempt to do anything of the kind on a large scale was in '87, when, after the Jubilee Review, most of the ships present at that pageant were divided into various squadrons and operated against one another. The force consisted of 56 armoured ships, 9 cruisers, 3 torpedo cruisers, 33 gunboats, and 38 torpedo boats, manned by 20,000 officers and men. The special object of these manœuvres was to afford information as to the best means to adopt for the protection of British interests in home waters when the British fleet assumed a defensive attitude and the force of the enemy was nearly equal to our own. The operations were carried out in the Channel, where Rear Admiral the Hon. E. R. Freemantle was opposed to the late Vice-Admiral Sir W. N. Hewett, V.C., and in the Irish Sea, where Commodore (now Rear Admiral) Fitzroy was opposed to Rear-Admiral W. J. Baird. These manœuvres conclusively proved that under the conditions which then ruled no efficient defence was possible. They demonstrated also the value of fast ships and our lack of cruisers. In '88 the operations undertaken were more complete in all respects, and a partial mobilisation of the ships in reserve also took place. This measure was necessary as a test of the new scheme prepared by the then recently established Admiralty Intelligence Department. Although by no means demonstrating that the new arrangements were perfect in all their details, an immense improvement was certainly shown to have been effected in the methods for apportioning officers and men to ships, and speedily commissioning the latter for sea service. The manœuvres in '88 were intended to afford information as to the probable result of an attempt to blockade a hostile power in his own ports by a British fleet slightly superior in numbers. The force engaged consisted of 22 armourclads, 22 cruisers, and 24 torpedo boats, and the numerical proportion which the defending squadrons bore to those of the pretended enemy was framed upon the proportion which our battle-ships and cruisers in the Mediterranean and at home bore at the time to those of France in the same waters. Ireland was supposed to be the enemy's country, and the ports chosen therein for the blockaded fleets, and the bases from which the defending fleets worked bore, comparatively speaking, the same positions and distances from one another as the fortified ports of France bear to those of England. The mimic

war lasted from July 24th at noon until Aug. 21st at noon, but the blockade was only maintained just as long as the Admiralty prevented the enemy from breaking it. In every way the operations proved most instructive, the following being among the lessons taught by them:—

(1) That with the British fleet at its present strength and proportion to those of other powers, we could not reasonably hope to succeed in shutting up in their ports the squadrons of France alone, nor afford adequate protection to our coasts and commerce. (2) That the plan of sealing up an enemy's ports is impracticable, and that battle-ships should never be brought within range of the enemy's torpedo boats. (3) That speed is now more than ever of value in all ships, while a large supply of swift cruisers is indispensable for scouting and protecting commerce. (4) That our system of signalling and communication needed great amendment and extension, and that both a reserve fleet and a mobile coast defence are highly necessary as supports behind the squadrons which take the offensive. A committee, consisting of three distinguished admirals—Sir W. Dowell, Sir Vesey Hamilton, and Sir F. Richards—was appointed to report upon the results of these operations. Extracts from their report were published (Parliamentary Paper, C. 5632, Feb. '89), and form a most important document. (A concise account of these operations appears in *ed. '89*.) The manœuvres of '89 have been on a still more extensive scale. They were preceded, as in '88, by a mobilisation of a number of vessels in the reserve, and also by an official inspection of the assembled squadrons at Spithead by the Prince of Wales representing Her Majesty, and by the German Emperor, who visited this country for the purpose. The mobilisation consisted in the main of an apportionment of the officers on half-pay and of the men usually found in the harbour ships or training establishments to the ships in the First-class Reserve. A great scarcity of certain grades of officers was experienced, especially lieutenants, but neither the Royal Naval Reserve nor the Pensioners Reserve was called upon to any extent. The act of mobilisation on July 11th and 18th added 94 pendants, a displacement of 220,000 tons, 394 guns, and nearly 15,000 officers and men to Britain's available force afloat. Considered as a test for the purpose of finding weak spots and shortcomings, this operation was exceedingly useful; many of the ships, however, were undermanned and far from being thoroughly fit to meet an enemy. On August 1st the fleet assembled at Spithead included 20 battle-ships, 29 cruisers, 6 armoured monitors for coast defence, 3 gun-vessels, 14 gunboats, 2 special service vessels, and 38 torpedo-boats, manned by 22,147 officers and men. A special feature in the composition of the fleet was the appearance of several entirely new classes—the "Admiral" barbette battle-ships, the belted cruisers, and the 25-knot *Medea* class of cruisers. A new Atlantic liner, the *Tenison* of the White Star line, specially built to Admiralty requirements, was present with part of her gun equipment on board (see MERCANTILE AUXILIARIES). The German Emperor arrived (Aug. 2nd) at Spithead, escorted by a squadron of his ironclads. The composition of the German squadron, under the command of Rear-Admiral von Kall, with Rear-Admiral Hollman as second in command, was as follows:—

| Ships. | Commanders. | Class. | Armament. |
|------------------------|--|--|----------------------------|
| Hohensollern . . . | Capt. von Arnim . . . | Yacht | 2-5-in. |
| Baden | Capt. Scharzlose . . . | Bar. Battle-ship . . . | 6-18t.; 6m. |
| Sachsen | Capt. von Diedrichs . . | Bar. Battle-ship . . . | 6-18t.; 6m. |
| Oldenburg | Capt. Kuhn | Bar. Battle-ship . . . | 8-14t.; 4-4t.; 6m. |
| Irene | Capt. H.R.H. Prince Henry of Prussia . . . | Cruiser | 14-6in.; 8m. |
| Wacht | Com. Burich | Desp.-boat | 2-4in.; 10m. |
| Kaiser | Capt. Hoffmann | C.B. Battle-ship . . . | 8-23t.; 1-4t.; 5-3½t.; 6m. |
| Deutschland | Capt. von Reiche | C.B. Battle-ship . . . | Ditto. |
| Friedrich der Grosse . | Com. Klaus | Tur. Battle-ship . . . | 4-18t.; 2-6t.; 6m. |
| Preussen | Capt. Turpitz | Tur. Battle-ship . . . | Ditto. |
| Zieten | Lt.-Com. Oelrichs . . . | Torpedo-cruiser . . . | 4-5in. |
| Niobe | Capt. Aschenborn . . . | Sailing Training-ship for Naval Cadets | ... |

Owing to the inclemency of the weather, the inspection, which was to have taken place on Saturday, Aug. 3rd, was postponed until Monday, Aug. 5th, and then was carried out under somewhat adverse conditions of wind and sea. On Sunday, Aug. 4th, the German Emperor, accompanied by the Prince of Wales, Prince Henry of Prussia, the Princes Albert Victor and George of Wales, made a personal inspection of the *Teutonic* and H.M.S. *Howe*, in which ship Admiral Sir E. Commerell, K.C.B., V.C.,

flew his flag as senior officer in command of the assembled fleet. The German Emperor was made an honorary admiral of the British navy. On Aug. 6th the squadrons left Spithead, and after having been again inspected by the Royal and Imperial personages while under weigh and steaming full speed off Sandown Bay in the Isle of Wight, proceeded to their various destinations in preparation for the manoeuvres. The composition and stations of squadrons were as follows:—

A Fleet. Headquarters: Milford Haven.

(Vice-Adm. Sir George Tryon, K.C.B., in the *Hercules*; Rear-Adm. R. E. Tracey in the *Rodney*.)

| Ships. | Commanders. | Speed in Knots. | Armament.* | Tonnage. |

* Except quick-firing and machine guns. M. Muzzle-loading guns; B. = Breech-loading guns.

The general idea of the operations was that a maritime power has prepared in its fortified ports a fleet of battle-ships and cruisers, and that a British fleet had been stationed in the most suitable strategical position for masking the enemy's force, while, in addition, small squadrons are placed in suitable positions round the coast for the purpose of affording protection against the attacks of cruisers. On the declaration of war the two admirals were given a free hand, the enemy to attack the British fleet or any portion of it he could catch at a disadvantage at sea, or in any but certain specified fortified ports, to destroy commerce, or to land troops for raiding. The British admiral was to endeavour to foil any such attempts. The information which it was principally desired to obtain was the amount of protection which could be afforded to British interests in home waters when the British admiral adopts the policy of masking the enemy's fleet from a suitable base, keeping watch, if possible, by cruisers, and being pre-

pared to follow and destroy any force sent to sea. Rules were laid down, as in the previous year, for the conduct of the operations (see Parliamentary Paper already referred to), the principal alteration being that whereas actions were heretofore to be decided by numbers, they were now to be decided by force, engaged ships to reckon according to classification in the official Navy List. The time allowance for destroying a town was also reduced to eight hours, and the bombarding distance for doing so increased to five miles. The area of operation, too, was extended 1° to the west. War commenced at 6 a.m. on Thursday, Aug. 15th, the ships being then distributed as in accompanying tables, except that a portion of Baird's squadron was at Berhaven. The fleets simultaneously put to sea, two portions of Admiral Baird's from Queenstown and Berhaven proceeding to a given rendezvous, about 30° south of the Irish coast, where they arrived at midnight, while a third went north to Lough Swilly. Adm. Tryon's command from Milford

to Lamlash was also subdivided. His cruisers—*Undaunted*, *Narcissus*, *Galatea*, and *Aurora*—pushed out to scout and watch the southern Irish ports. Another portion from Lamlash steamed to Belfast Lough, the *Mercury* and five torpedo boats to Kingstown and Dublin Bay, and the *Warspite* and a larger flotilla to Waterford. The object of these three expeditions was to destroy all the resources existing in the enemy's ports which might be utilised to the disadvantage of British commerce. The expedition of the *Mercury* was not successful, the others were. Admiral Tryon, with his main force, followed his detached flotillas to sea, and after proceeding over to the Irish coast, stood towards the entrance of the English Channel, and on Friday morning (16th) distributed his ships on a line of observation from Ushant to the Lizard, with Falmouth, for which he had improvised a mine defence, as an alternative coaling station to Milford Haven. Baird's principal squadron of attack consisted of a fast detachment under Rear-Admiral D'Arcy Irvine, consisting of *Anson*, *Collingwood*, *Australia*, *Camperdown*, *Hero*, and *Immortalité*. The ships were to leave the pre-arranged rendezvous on the night of the 15th, and proceed on their individual tracks to a rendezvous south of Beachy Head, there to combine on the 18th and attack the flotilla defending the Downs. The ships of this force, proceeding on separate courses, encountered the British force in the Channel at daylight on the 17th. The *Camperdown* and *Hero* discovered the *Thames* and *Rodney* on the south end of line; the *Anson* sighted the *Hercules* a little earlier, and, turning, became lost to sight in the morning mist. Chase was given by the whole British fleet to the two other vessels, and very soon the *Immortalité* was seen to join them. A few hours afterwards the remaining three ships of the enemy's fast division appeared in sight, but a long way to the north and west of their chased comrades. In fact, the two subdivisions did not see one another, while Admiral Tryon now imposed the whole of his fleet between them, and to dive them still farther apart stood with his slower ships towards the new arrivals. About noon the *Hero* and *Immortalité* became prizes to the *Rodney*, *Howe*, and *Warspite*, and the *Camperdown* was also captured, and remained so to the end of the operations, but by decision of the umpires this capture was eventually disallowed. The *Anson* and her two consorts, after being followed by the main body of the British fleet till nightfall, returned to Queenstown on the evening of the 18th. Next morning Admiral Baird himself returned with the *Northumberland*, *Monarch*, *Devastation*, and *Iron Duke*. Of the remainder of his ships, the *Inflexible*, *Hecle*, and torpedo boats, would have gone to Lough Swilly to await the return of the fast divisions if they had succeeded in their intended exploit. The cruisers *Mersey*, *Arethusa*, *Iris*, *Magicienne*, and *Calypso* were despatched to destroy commerce, and for this purpose were to lie in the track of homeward and outward-bound merchantmen. His first attempt having failed, Admiral Baird now altered his plans. The *Anson* and *Collingwood* were despatched on the night of the 19th to raid the Scotch ports in the North Sea. On the morning of the 20th the *Inflexible* received similar orders, the *Australia* and *Hecle* were sent to join the commerce destroyers, while the torpedo boats

were ordered to the east coast of Ireland, and Admiral Baird, with his remaining battle-ships and small craft, remained in Queenstown harbour. Between the 19th and 24th, the next date on which the British admiral heard of the enemy, Sir George Tryon cruised between the English and Irish coasts with his main fleet, thus giving rise to an incorrect rumour that Queenstown was blockaded. On the morning of the 24th Tryon learnt from the signal station at the Lizard that the enemy were on the north coast, and he at once detached Rear-Admiral Tracey with the *Rodney*, *Howe*, *Narcissus*, and *Medea* to meet them. This detached squadron was afterwards stiffened by the addition of the *Ajax*, *Thames*, and *Undaunted*, and the despatch of the *Invincible* and *Shannon* to the Downs on receipt of the news on Monday night (26th) that the *Inflexible* was also on the north-east coast. On the 24th and 25th Peterhead, Aberdeen, and Leith were captured by D'Arcy Irvine, who then stood to the north. On the 26th he found the *Inflexible* bombarding Wick, and, increasing the strength of his squadron by that battle-ship, again turned south to re-continue raiding. This he did with success, destroying the *Tyne* ports, etc., until at about noon on Wednesday he fell in with Tracey's superior force, and in the action which ensued lost the *Collingwood* and *Inflexible*, narrowly escaping capture himself. The war terminated on Thursday, Aug. 29th, without further incident of importance. As in '88, the public took great interest in the operations, full reports of which appeared in the leading newspapers. The *Times* correspondents were on board the *Hercules* and *Northumberland*; those of the *Standard* in the *Hercules* and *Collingwood*; *Daily News*, *Hero* and *Sandfly*; *Daily Telegraph*, *Howe*; *Daily Chronicle*, *Rodney*; *Morning Post*, *Narcissus*; *Morning Advertiser*, *Thames*; *New York Herald*, *Anson* and *Medea*. The service journals were represented in the *Hercules*, *Undaunted*, *Anson*, and *Mercury*; the *Illustrated News* and *Graphic* in the *Hercules*, *Northumberland*, *Conqueror*, and *Australia*; and the provincial press by the Exchange Telegraph Co. in the *Warspite*. In addition to the graphic descriptions of these correspondents with pen and pencil, articles and letters on the subject appeared in the *Times* and other journals over the signatures of Admirals Mayne, Elliot, and Colomb, Lord Brasse, Sir A. Clarke, and others, and papers have also been written for the *Contemporary*, *Blackwood*, *Colburn*, and many foreign periodicals. As the relative strength and numbers which the contending fleet bore to one another was, as in previous years, that of the British and French fleets, the lessons of the manoeuvres are looked at in this light. They may be summarised as follows:—(1) Although Britain possesses "the finest fleet in the world," she has not one "sufficient for her needs"; the teaching of last year was thus emphasized, but in no way reversed. (2) Her battle-ships are insufficient in number, relatively to the possible number of an enemy's vessels of similar class which might be opposed to them. There are defects in the construction and equipment of the newer types, but none are incapable of remedy. Second-class battle-ships exhibited deficiency of stern fire. The old vessels may be usefully supplied with new engines, boilers, and armament. (3) Cruisers are insufficient in numbers relatively to the duties required

of them, which are—(a) scouting, (b) carrying messages, (c) protecting commerce. Every battle-ship requires at least two cruisers, in addition to a proportion for the duties (b) and (c). Accepting the official explanation that the sea speed of a ship is 10 per cent. less than the trial speed, and the horse-power only two-thirds of that realised on the measured mile, the new types of cruisers answered fairly well. They are generally considered too heavily armed, too short, and too low in the water. (4) Everything points to the certainty that one of the tactics of modern naval war will be the despatch of small, swift squadrons for the work of destroying resources and material for ship-building, coaling, etc., and for requisitioning, under threat of bombardment, inadequately defended cities on the sea-coast. These manoeuvres point to the only efficient means of defence against such tactics being found in a powerful naval force, the effective zone of fixed defences being too limited for safety. (5) As a training and practice for officers and men in the handling and working of modern machinery of war these annual manoeuvres are absolutely invaluable; it is impossible also to overestimate their value as object lessons to the nation of their present insecurity in the event of war with a naval power or powers. (6) The new system of conveying intelligence from and to the coast and the defending commander was found to work effectively and smoothly; with further experience and practice it will be more satisfactory still. Of points mentioned last year, the disaffection of the executive and engineer officers is still very marked, as is the scarcity of signalmen and the inferior quality of the engine-room complements.

Navy, The British. (For concise history of Navy from early times to end of French war see ed. '87; for continuation of history and modern progress see ed. '88 and '89.) The total cost of the Navy for the financial year '88-89 is estimated at £14,361,810, of which £676,410 is found by appropriations in aid, leaving a net estimate of £13,685,400. The various heads of expenditure are:—

Effective Services:—

| | |
|---|--------------------|
| A. No. of officers, seamen, boys, coastguard and royal marine . . . | 65,400 |
| 1. Wages, etc., of above . . . | £3,201,700 |
| 2. Victualling and clothing . . . | 1,061,100 |
| 3. Medical establishments and services . . . | 121,900 |
| 4. Martial law . . . | 11,400 |
| 5. Educational service . . . | 71,900 |
| 6. Divine service . . . | 31,900 |
| 7. Royal Naval Reserves . . . | 147,500 |
| 8. Shipbuilding, repairs, maintenance, etc.:— | |
| Section 1. Personnel . . . | 1,619,300 |
| " 2. Material . . . | 1,475,500 |
| " 3. Contract work . . . | 1,565,000 |
| 9. Naval armaments . . . | 1,463,500 |
| 10. Works, Buildings, and their repairs, at home and abroad . . . | 451,000 |
| 11. Miscellaneous effective services . . . | 128,800 |
| 12. Scientific services . . . | 57,900 |
| 13. Admiralty Office . . . | 217,400 |
| Total | £11,625,800 |

Non-Effective Services:—

| | |
|---|--------------------|
| 14. Reserved and retired pay . . . | 718,500 |
| 15. Naval pensions . . . | 757,700 |
| 16. Widows' pensions and compassionate allowances . . . | 168,300 |
| 17. Civil pensions and gratuities . . . | 336,800 |
| Total | 2,050,600 |
| Grand Total | £13,685,400 |

The above figures will be seen to show an increase in numbers of 3000; in cost of effective services of £506,900; and in cost of non-effective services of £95,700. In consequence of the growing feeling (referred to in our last issue) that a larger navy is necessary for the protection of British interests in the event of attack, a second committee, presided over by Lord Hartington, was convened to report upon the administration of the naval and military services; and a third committee, of which the Prime Minister was chairman and its members all Cabinet councillors, took in hand the question of strengthening the Navy and settling the standard of its relative strength. The investigations of the Commons Committee completely justified the charges of divided counsel and responsibility which had been brought against the Board of Admiralty. Lord Hartington's committee have not yet reported, but the outcome of the work of the committee of the Cabinet has been a determination to lay before the nation a programme of naval shipbuilding which, it is promised, when completed will render the British Navy stronger than the combined navies of any other two Powers in the world. On March 7th Lord George Hamilton, the First Lord of the Admiralty, presented the new scheme to the country when introducing the following resolution:—"That it is expedient to authorise the expenditure of a sum not exceeding £21,500,000 for the purpose of building, arming, equipping and completing for sea, vessels for her Majesty's Navy. Of this expenditure a sum not exceeding £10,000,000 is to be issued out of the Consolidated Fund in the seven years ending March 31st, 1896; and a sum not exceeding £11,500,000 to be issued out of the moneys provided by Parliament for naval services during the five financial years ending on March 31st, 1894." Seventy ships are to be added to the Navy within the next four years, at a cost of twenty-one millions, inclusive of their armaments. This is inclusive also of a part of the regular shipbuilding for those four years; but, of course, before the end of 1893-94 some more vessels will have to be begun to make up for wastage. The 70 ships include 8 first-class battle-ships, each of 14,000 tons displacement and 17 knots speed; 2 second-class battle-ships, each of 9000 tons displacement (one of these to be laid down in '91); 9 first-class cruisers of 7300 tons displacement; 29 second-class cruisers of 3400 tons displacement; 4 third-class cruisers of 2600 tons, and 18 torpedo gunboats of 735 tons each. Of this number 32 were to be laid down, built, armed, and equipped by contract at once:—4 battle-ships, 5 first-class cruisers, 17 second-class cruisers, and 6 torpedo gunboats. Twenty vessels were to be at once laid down in the public dockyards:—4 first-class and 1 second-class battleships, 3 first-class and 6 second-class cruisers, and 6 torpedo gunboats. The remaining 18 vessels to be laid down as the slips in the dockyards become vacant. Owing to the

prices asked by shipbuilders some of these vessels have not yet been laid down. The first-class battle-ships were to be finished inside of four years, the second-class in three years, the large cruisers in two and a half years, and smaller in two years, the gunboats in eighteen months. More details of the programme will be seen in the annexed tabulated statement. Other announcements by the First Lord were: That better provision would be made for a supply of naval ordnance, and delays would not occur again; that the designs of the new battle-ships met with the approval of a special committee of naval experts; that a number of the older ironclads would be refitted, and some of them rendered "more efficient and powerful than on the day they were first commissioned." The following ships have been taken in hand for refit: at Portsmouth *Thunderer*, *Devastation*, *Rupert*, and *Minotaur*; at Chatham *Superb* and *Nelson*; at Devonport, *Achilles*, *Audacious*, and *Nimph*. Effective ironclads would be substituted for the wooden hulks carrying the port admirals' flags. The *Northampton* has replaced the *Duncan* at the Nore, the *Achilles* is to replace the *Duke of Wellington* at Portsmouth, the *Black Prince* the *Royal Adelaide* at Devonport, and the *Nimph* the *Revenge* at Queenstown. The *Medway* would be dredged so that the heaviest armourclads could go up or down the river with all their weights on board at ordinary tides; 1100 marines, 1000 stokers and 900 seamen would be added to the personnel of the fleet, and something would be done to supply the deficiency of lieutenants. Finally, in connection with coast defence and the naval volunteers, on which subjects a deputation from the five principal mercantile centres, the Mersey, Clyde, Forth, Tyne and Tees, had presented an address to Lord Salisbury on Jan. 4th, '89, the First Lord said that the ports must supply their own matériel for local purposes, all the Government would find being a capitation grant, and possibly some assistance in hire of vessels, inspection, instruction, and armament. The scheme was generally well received, not as by any means placing this country in a position of naval strength equal to that of the military position of Germany among nations, but as being a reasonable apportionment of our resources to the work of supplying absolutely essential needs, and as giving promise of a continuity in naval policy of which it had never previously had the benefit. The resolutions were discussed on two nights, Mr. Gladstone, Mr. Childers and other members criticising the Government proposals. Mr. Forwood said that the proposed expenditure would give this country in '94, 77 armoured and 88 protected vessels, making a total of 165, while it was estimated that at the same date France would only have 62, Russia 30, Germany 50, and Italy 36 vessels of both classes. Since this speech was made all these Powers have decided to further increase their naval armaments. The discussion was virtually put an end to by the First Lord moving the closure, which was carried on a division by 200 to 136, and the division on the resolution was carried by 215 to 128. The resolution having been carried, on April 4th a bill was introduced to give effect to it, the following being a summary of its chief features. Section 1 provides that the Admiralty shall forthwith cause to be built, equipped, and completed for sea with sufficient armament, the number of vessels of the different classes men-

tioned in Lord George Hamilton's statement, and which are contained in a schedule, and that each of such vessels shall approximately be of the tonnage and speed, and have as parts of its armament the guns specified. Such vessels, with their armament, are to be completed for sea before April 1st, '94. The Admiralty may expend in pursuance of this Act for the above purposes the sum of £21,500,000 as follows: that is to say—for the purpose of building and completing by contract the vessels specified in Part I. of the schedule, and of the armament of those vessels, the sum of £10,000,000; and for the purpose of Dockyard shipbuilding—that is to say, of building, equipping, and completing for sea in Her Majesty's dockyards, and of surveying, equipping, and completing for sea in Her Majesty's dockyards the contract vessels after their delivery by the contractors, the sum of £8,650,000; and for the purpose of the armament of the dockyard vessels, the sum of £2,850,000. Clause 2 sets out the financial arrangements for contract vessels by providing for the opening of an account at the Bank of England, to be called the Naval Defence Account, the money issued to which is to be applied for the purpose of building and completing contract vessels. A sum of ten millions is to be issued out of the Consolidated Fund for this purpose, in seven equal annual payments ending March 31st, '96. Any deficiency between this amount and the amount which may be expended for the purposes named may be paid out of the Consolidated Fund, or by the issuing of Exchequer bills or bonds. Any surplus at the end of seven years is to be applied as part of the new sinking fund. Clause 3 describes the financial arrangements for dockyard work, whereby for the five years ending March 31st, '94, there shall be applied out of the moneys provided by Parliament a sum per annum of not more than £2,650,000 for dockyard shipbuilding, and £600,000 per annum for the armament of dockyard vessels. Any surplus or deficit in this account is provided for in the same way as in the contract account. Clause 4 provides that before any money is applied under the Act an estimate of the total expenditure on each vessel and its armament is to be submitted to the Treasury, and estimates under any sub-heads which the Treasury may ask for. Clause 5 provides for the preparation and audit of expenditure under the Act; and Clause 7 contains supplemental provisions, including one that the sums authorised by the Act shall not be applied in meeting establishment or incidental charges, and authorising the Governor and Company of the Bank of England to lend any money which the Treasury are authorised by the Act to borrow.—The second reading was carried May 7th by 277 to 136 votes, the opposition being led by Mr. Labouchere and Sir W. Lawson; the bill was read a third time on May 20th by 183 to 101 votes; and on May 31st was passed by the House of Lords, and subsequently received the royal assent. The building of a great number of the ships has since been begun, but before this took place the design of the battle-ships formed the subject of an acrimonious controversy in the public press and elsewhere, and the Chief Constructor of the Navy received permission to read a paper on the subject before the Institution of Naval Architects. The audience was composed of all the greatest naval scientists in the world, and the sense of the meeting was undoubtedly in favour

of the new designs. The criticism on Mr. White's paper was begun by Sir E. J. Reed, who advocated a broader belt of armour and a better protected womb. He was followed by Sir N. Barnaby, who would have preferred a number of smaller vessels, and by Lord Armstrong, who deprecated altogether the construction of large ironclad ships. Admiral of the Fleet Sir Geoffrey Hornby, Admiral Lord Clanwilliam, and Captains Lord Charles Beresford and Fitzgerald, R.N., spoke from the point of view of the users of the ships, and expressed their general satisfaction, believing that, as a battle-ship must be at best a compromise, and armament and speed the chief factors, the new ships would be found as good or better than any others which can be got ready for foreign nations by the same date.—Several changes have taken place in the composition of the Board of Admiralty during the year. The First Sea Lord, Admiral Sir Arthur Hood, has retired. Admiral Sir Anthony Hoskins also vacated the post of Second Sea Lord to take command of the Mediterranean Squadron, in succession to the Duke of Edinburgh, whose term of service on that station expired. These two officers have been replaced by Admiral Sir Vesey Hamilton, who was one of the committee of three distinguished admirals who reported on the Manœuvres of '88. Extracts from this important report were published early in the year. Rear-Admiral Henry Fairfax is now Second Sea Lord, having come home from Australia to take the post, and having been succeeded in command of that station by Rear-Admiral Lord Charles Scott. Vice-Admiral George Watson also succeeded Admiral Sir Algernon Lyons as Commander-in-chief on the North American Station, and Rear-Admiral Richard Tracey took the place of Rear-Admiral Davy Irvine as second in the command of the Channel Squadron, these officers' term of service having expired. Rear-Admiral Lord Walter Kerr has been nominated as second in command of the Mediterranean Squadron, which is to be augmented in strength. The remaining Admirals on foreign stations are: in the Channel, Vice-Admiral John Baird in command; Pacific, Rear-Admiral Algernon Heneage, about to be relieved; China, Vice-Admiral Sir Norell Salmon; East Indies, Rear-Admiral Hon. E. Freemantle, and the Cape, Vice-Admiral Richard Wells.—Captain Cyprian Bridges has succeeded Captain R. Hall as Director of Naval Intelligence, the latter officers who had organised the department from its commencement, having commissioned the *Severn*.—Several disastrous mishaps have occurred to ships of the Navy during '89. In March the battle-ship *Sultan* (Captain Ernest Rice) struck a rock in the Conino Channel, near Malta, and in spite of strenuous efforts went to the bottom, her crew being fortunately saved. A court-martial subsequently censured the captain for her loss, but a Court of Inquiry found that after she had taken the ground every possible effort had been made to save the ship. A private firm of contractors have since successfully raised the ship, and it is expected that she will be able to return to England in December. In March also a dreadful catastrophe occurred at Samoa, where in a hurricane three German and three United States men-of-war were wrecked, the only vessel escaping from the roadstead being H.M. cruiser *Calliope* (Captain Kane). In October the *Lily* gunboat was lost off the coast of Labrador, six of the crew perishing in an attempt to land from the wreck. Other men-of-war that have touched

the ground, happily without serious injury, are the *Anson*, *Turquoise*, *Falcon*, and *Amphion*. The disabling of the *Victoria's* 110-ton guns on trial have given rise to a controversy on the merits and demerits of the system of designing, manufacturing, ordering, and testing naval ordnance.—There is a growing feeling in the Navy now finding expression in the press that Elswick open-hearth steel is not so good or trustworthy as crucible steel, such as is made and used by Whitworth, Krupp, and other gun builders, and that it would be wiser to go back to lighter guns of about fifty tons, with more armour than is possible where such heavy guns as the 110-ton breechloaders are carried. Lord Armstrong having advanced the proposition that light cruisers like the *Piemonte*, launched by his firm and sold to the Italians, would form better protection for commerce than heavier armoured ships, it is necessary to say that the consensus of naval opinion is directly opposed to such ideas. Naval officers view with apprehension the apparent inclination of some authorities to accept without criticism the opinion of the builders and constructors of guns and ships on such questions, instead of that of the real experts who will be called upon to use these articles in war time. Vessels launched during '89 were:—Protected cruisers: *Blake*, 9000 tons; *Pandora*, Australian Squadron) 2575 tons; *Barraqueta* and *Barrosa*, 1580 tons. Torpedo Depot-ship: *Vulcan*, 6620 tons. Sloops: *Beagle* and *Basilisk*, 1170 tons. Torpedo gunboats: *Speedwell*, *Spanker*, *Sheldrake*, *Shipjack*, *Seagull*, and *Salamander*, 735 tons. Gunboats: *Maggie*, *Goldfinch*, *Lapwing*, *Redpoll*, *Sparrow*, *Thrush*, and *Kingdove*, 805 tons. The number of commissioned officers, warrant officers, petty officers, seamen, pensioners, and boys for the Fleet is 46,244; of coastguardsmen, 4200; of marines, 13,874; of officers and others serving on shore, 1082; of Royal Naval Reserve men, 20,118; of seamen and marines, pensioners' reserve, 2220; and of R.N.A. Volunteers, 2000.

Commit Brasse's "British Navy" (5 vols., 1882); **"The Naval Annual"** for 1886-87, 1887-88, and 1888-89; **Mr. White's** (chief constructor of the navy) **"Naval Architecture"** (new edition, 1889); **Sir E. J. Reed's** **"Steel Shipbuilding and Modern Ships of War"**; **Sir N. Barnaby's** **"The Naval Review"**; **Lloyd's** **"Warships of the World"**; **Bedford's** **" Sailor's Pocket Book "**; **Sleeman** on **Torpedoes** (new edition, 1889); **Bainbridge-Hoff** on **naval tactics**; **Nordenfeldt** on **machine guns**, and **Hovgaard** on **submarine boats**. **"Future Naval Battles, and How to Fight Them,"** **"The Battle of Port Said,"** **"The Great Naval War of 1887,"** **"The Russia's Hope,"** and **"Down with England,"** are works of imagination dealing with maritime warfare of the future from the points of view of various writers. In the following periodicals for '89 will be found articles on naval subjects: *Nineteenth Century* for Jan., May, and Sept.; *National Review* for Jan. and March; *Blackwood* for March and October; *Edinburgh Review* for May; *New Review* for August and Oct.; *Murray's Magazine* for May; *Harper's* for June; *Scribner's* for Oct. and Nov.

Netherlands, Political Parties in the. The political parties in the States-General are divided into **Liberals** and **Anti-Liberals**, the latter being composed chiefly of such opposite elements as **Catholics** and **Orthodox Protestants**, who are also called **Conservatives**. In the **Upper House**, or **First Chamber**, which consists of 50 members, the **Liberals** number 34, the **Catholics** 10, and the **Orthodox Protestants** 6. The members of the **First Chamber** are elected for 9 years, one-third retiring every 3 years. The **Lower House**, or **Second Chamber**, is composed of 100 members, who are elected for 4 years under a limited manhood suffrage. The present **Lower House**, which was elected in March '88, is composed of 45 **Liberals** and 55 **Anti-Liberals**, the latter being thus divided: **Orthodox Protestants**, or **Conservatives**, 28; **Catholics**, 26; and one **Socialist**. In the previous Chamber the **Liberals** had a slight majority, and in consequence of the '88 elections **Dr. J. Heemskerck**, who had held office as **President** of the Council since April '83, resigned, his example being naturally followed by his colleagues. An **Anti-Liberal** cabinet, with **Baron Mackay** as **President** of the Council and **Minister of the Interior**, was then formed, and is still in power.

Netherlands, The. A kingdom under **William III.** of the House of **Orange**. Area, excluding **Luxemburg** (*q.v.*), 12,648; estimated pop. in '89, 4,595,032. Constitution of 1848 vests executive in the king, and legislative authority in the **States-General**, sitting in two chambers: the first, consisting of 93 members, elected by the provincial states; the second, of 86 members, elected by ballot, one to every 45,000 of population. Every two years one-half of the second and every three years one-third of the first chamber retires by rotation, unless dissolved by the king, in which case new elections must take place within forty days. The second chamber alone possesses the initiative in legislation; the upper house having the right of approval or rejection, but not of amendment. The king has a veto. Alterations in constitution to be made by a two-thirds vote of both houses, followed by a general election, and confirmation by a similar vote of the new **States-General**. Entire liberty and social equality granted to all religions. Estimated revenue, '89, £10,050,247; expenditure,

£11,129,782; debt, £89,850,285; imports, '87, £94,750,000; exports, £82,630,000. (For army and navy see **FOREIGN ARMIES** and **FOREIGN NAVIES**.) Colonies include **Java** and territories in **Sumatra**, **Borneo**, and numerous other islands in **Eastern Archipelago**; **Curaçao** and five other small islands in the **West Indies**, and **Surinam** in **South America**. (For history to '89 see previous eds.).—**HISTORY, '89.** The illness of the King continued to cause grave anxiety, and ultimately (**April 3rd**) the **States-General**, assembling in plenary sitting, decided upon the necessity for the appointment of a Bill to provide for a **Regent**. The **Duke of Nassau** shortly after assumed the **Regency of Luxemburg** as the nearest agnate, which caused considerable speculation in political circles as to the future relations of the **Grand Duchy** with **Germany** and the **European Powers**. The King's state of health having greatly improved, the Council of State proposed that His Majesty should resume the **Government** (**30th**), the **Duke of Nassau** resigning his **Regency of Luxemburg**. Both Houses (**May 2nd**) of the **States-General** unanimously resolved that His Majesty be invited to resume the **Government**; the King thereupon resumed his State. Celebration of the fortieth anniversary of the King's accession (**12th**). At the opening of the Session of the **States-General** (**Sept. 17th**), the speech from the throne stated that negotiations had been opened to terminate the existing uncertainty regarding the frontier delimitation of **Surinam** and **Dutch Borneo**. The negotiations concerned the **Dutch territory** and a portion of **Borneo**, where the **British protectorate** was established last year in virtue of the treaties concluded with the **British North Borneo Company** and the **States of Sarawak and Brunei**. At the same time the **Government** intended to settle the differences which have existed for a considerable time past with the **British North Borneo Company** on the subject of the boundaries on the east coast of the island. It also said that **Colonial affairs** presented generally a favourable aspect. The **internal finances** of the country were satisfactory, and the general condition of trade, manufactures, and navigation showed signs of improvement. **M. Beelaerts van Blokland** was re-elected **President** of the **Second Chamber**. The **Government Bill on Primary Education** was adopted by the Chambers (**30th**). Its most important provisions were that every school, having at least twenty-five pupils, under the direction of a corporate body, and not founded for the purpose of gain, has a right to a subsidy from the **Government**; that the **Commissioners** could no longer decree gratuitous instruction except for pauper children; that the minimum annual school fee was to be 2 fr. 60c., and that all unnecessary expenditure had to be most carefully avoided. They also (same date) voted the necessary credit for the establishment of a **Consulate-General at Teheran**, and the **Bill** prohibiting fishing in the **Dutch territorial waters** by foreign crews. In **October** the **Second Chamber** adopted the **Government Bill for deepening and ameliorating the Waal**; 2,500,000 fl. are to be devoted to this purpose. The navigation of the whole **Rhine** will thereby be much improved.—**GENERAL.** International skating match at **Amsterdam**. Great sensation caused by pamphlet **"The Netherlands in Danger,"** by **M. Tindal**, condemning the defensive organisation of the country on land and sea. Great damage done

at Rotterdam by storms (Feb.). The ninth anniversary of the birthday of the Crown Princess Wilhelmina was celebrated (Sept. 1st and 2nd) with much enthusiasm. Serious strikes at Rotterdam (28th), with conflicts between the rioters and the police and civic guard. A number of the rioters received bullet or bayonet wounds. Death of M. Joost van Vollemhoven, Burgomaster of Rotterdam (30th). Agitation amongst Amsterdam dock labourers (Oct. 7th). A general meeting of the shareholders of the Dutch-Rhenish Railway, held at Utrecht (13th), ratified the sale of the line to the State. The Dutch-American Steamship Company increased its capital by 2,000,000 fl., for the purpose of giving a greater development to the communications with South America. The Dutch firm of J. C. Van Hattum & Co. obtained the contract (14th) for the construction of the South African Railway. After coming to an agreement with their employers the dock labourers at Rotterdam refused to join the Socialist party, and affiliated themselves to the English trade unions. (For Ministry, etc., see DIPLOMATIC.) Consult "Holland" (Story of the Nations Series), *Statesman's Year-Book*, *Almanach de Gotha*, etc.

Nevis. A British West Indian island included in the presidency of St. Christopher, of the federal colony of the Leeward Islands. Area (including Redonda) 50 sq. m.; pop. 11,864. Capital, *Charlestown*. The island is simply a single cone-shaped mountain, surrounded by a margin of low lands. Drought is felt, though springs exist in the mountain. It is fertile. Sugar and limes are the chief crops. Redonda is a dependent islet. Statistics included in those of St. Christopher (see BRITISH EMPIRE, etc., table). The colony was independent till 1883. Formerly a slave mart, Nevis was completely ruined by emancipation, and is only beginning to recover.

"**Newbery House Magazine, The**," is a monthly review and family magazine for Churchmen and Churchwomen. It is issued from the establishment founded by John Newbery in 1740, and made famous by the publication of the works of Dr. Johnson, Oliver Goldsmith, Dr. Smart, and numerous other celebrities. It is a High Church periodical, combining articles of a scholarly nature with lighter and more generally interesting and instructive matter. It makes provision for every member of the family, stories by the best authors, and is illustrated by the best artists, and papers on domestic and household matters by well-known writers.

New Britain. Now part of KAISER WILHELM LAND (q.v.).

New Brunswick. A province of the Dominion of Canada. It lies along the Bay of Fundy. Area 27,322 sq. m.; pop. 321,233. Capital *Fredericton*; chief commercial centre *St. John*. Divided into fifteen counties.—Chief rivers are the St. John and the Miramichi, which are navigable in part. Country generally level, but hilly on the north-west. There is much fine timber. Coal abundant; iron, manganese, gypsum, building stone, and albertite. Good agriculture; fertile. Summer warm, winter very cold; healthy.—Administered by a Lieut.-Governor and Executive Council. The people elect a Legislative Council and a House of Assembly. The Province has ten seats in the Dominion Senate and sixteen in

the House of Commons. Religion abundantly provided for. Both high and elementary education publicly provided and supported—the latter free, but not compulsory.—Industries are chiefly connected with the forest and the fisheries, but there is good class farming and shipbuilding. Only one-tenth of the land suitable for agriculture yet taken up, and free grants may be had on advantageous terms. The history of New Brunswick is comprehended in that of Nova Scotia until 1784, when it was made a separate Government. Joined the Dominion in 1867. See CANADA; and for Executive Council, etc., see DIPLOMATIC. Consult Hayden and Selwyn's "North America," etc.

New Caledonia. An island situated about 800 miles E. of Australia, about 900 N. of New Zealand. It is a French penal colony. With adjacent *Loyalty Islands* area 7,624 sq. m., pop. 56,463. Capital *Noumea*. Island mountainous, surrounded by reefs, well watered and wooded, climate warm but healthy. Half the land unfit for cultivation or pasture. Produces copper, cobalt, and nickel. Natives of Negrito or Papuan race. Annexed by France 1853. Frequent escape of convicts to Australia a source of trouble and international dispute. Consult Bonwick's "French Colonies," Norman's "Colonial France."

New Code. See SESSION, sect. 41.

Newcastle, Right Rev. Ernest Roland Wilberforce, D.D., first Bishop of, third son of the late Dr. Wilberforce, successively Bishop of Oxford and Winchester, and grandson of Samuel Wilberforce, the emancipator; was b. at Briggstone, Isle of Wight, 1840. Educated at Exeter Coll., Oxford, where he graduated in '64. Ordained deacon the same year by his father, and appointed curate of Cuddesdon, Oxon. Subsequently held the curacy of Lea, Lincs., the rectory of Middleton Stoney, Oxon. ('66-73), and the vicarage of Seaford, Liverpool. Canon of Winchester ('78); Sub-Almoner to the Queen ('71-82); Bishop of Newcastle ('82).

Newfoundland. A British colony and island lying across the mouth of the Gulf of St. Lawrence. Area 40,200 sq. m., excluding that part of the territory of Labrador on the mainland which appertains to this colony; pop. 193,124. Capital *St. John's*—pop. 23,896. Villages on Avalon Peninsula. Atlantic cable lands in *Heart's Content* Harbour. Interior uninhabited. Great Bank to southward, shallow seas where Gulf Stream and Arctic Current meet; ever foggy, but teeming with fish, especially cod. Climate not liable to so great changes in temperature as that of the neighbouring continental provinces; winter, milder, summer not so warm. Timber lands of high importance. Great agricultural capabilities. Valuable coal beds, and copper, silver and lead mines. Some fur-bearing game, deer, dogs, etc. Exports are codfish, cod-liver oil, seal oil, sealskins, and copper ore.—Governor and responsible Ministry form Executive. Two houses of parliament: Legislative Council of 15 members, called by Governor; House of Assembly of 33 members, elected every four years on house tenancy suffrage. Religion chiefly divided between Anglican, Roman Catholic, and Wesleyan bodies. Education denominational. There are no defences. Industries mainly fishing and preparing fish: cod, seal, lobster, herring, salmon. Produce has reached £9,000,000 in the year. Mining of copper, silver, and lead

becoming important. Farming and dairying very slight. For financial statistics see BRITISH EMPIRE, etc. (table). There are 340 miles of railway open, and a line is being constructed across the island to Straits of Belleisle.—Discovered by Cabot in 1497, but not really settled till 1624. Subsequently many vicissitudes, owing to struggle for supremacy between England and France. The latter Power still holds the islands of Miquelon and St. Pierre, off the coast. Responsible government granted in 1833. The colony as yet declines to join the Dominion of Canada, though provision has been made for it to do so. In '87 the Legislature pressed upon the Imperial Government a grievance relating to the fisheries, and the encroachment upon them by French subjects. A bill dealing with the matter had been disallowed by the House of Commons. Diplomatic action resulted, but the desires of the colony remain unsatisfied, owing to the state of our relations with France. In '89 the Government of Sir Robt. Thorburn appealed to the people on a platform comprising almost all the recent events in the colony. The *Bait Act* forbidding sale of bait to French fishermen, who being bounty-aided were able to undersell Newfoundlanders in foreign markets was the principal subject of contention. After being vetoed by Imperial authorities it was finally allowed on earnest petition of the colony. It deprived a number of colonists of livelihood, but is said, despite conflicting testimony, to effectually handicap French fishermen, with corresponding benefit to the islanders. Through it the value of the fish product of Newfoundland has been increased 20 per cent. The Government were able also to point to the establishment of an *Agricultural Commission* to encourage settlement; a subsidy of £4000 from the Imperial Parliament to aid the *ocean mail service*; a new railway from Harbor Grace to Placentia, and an extensive railway scheme to continue for ten years to connect various chief towns in the colony; the raising of a loan on the London market on good terms; creation of a fisheries department to cultivate the Island's staple industry with a specially qualified official at its head brought from Norway; the granting of votes by ballot and manhood suffrage. Union with Canada was repudiated by both political parties as being outside of practical politics. Sir William Whiteway led the Opposition. Consult Hutton and Harvey's "Newfoundland," Murray's "Survey of Newfoundland," etc.

New Gallery, The. The founders are Mr. Comyns Carr and Mr. Halle, who, as the result of disagreements with Sir Coutts Lindsay, of the Grosvenor Gallery (*q.v.*), severed their connection with that institution and announced their intention of establishing a new art gallery in London. The dispute turned upon the management of the Grosvenor, it being alleged that the original aims of the promoters were not being carried out, and that art was thus suffering. Mr. Burne-Jones took a prominent part in the controversy, and there ensued a long private correspondence, and subsequently a somewhat heated discussion in the public press. Messrs. Carr and Halle formally withdrew from the Grosvenor, and a new building was erected in Regent Street, and opened in May '88. Architecturally the New Gallery was a surprise, and it has met with general approbation. Whether the new venture would succeed was, of course, an inter-

esting problem, but it appears to have become a decided success. The Gallery opened with an exhibition of paintings, which has been followed by an arts and crafts exhibition, under the auspices of the Arts and Crafts Exhibition Society, of which Mr. Walter Crane is the president. The idea was to furnish an exhibition in which the handicraftsman should be directly represented, and that the public should know who the designers were and who the artificers. The work shown has not, it is true, introduced to public notice much new inventive genius, but undoubtedly the advantages to be derived from the establishment of a direct "touch" between purchaser and producer are manifold. Textiles, wall-papers, metal-work, stained glass, bookbinding, and general decorative work have been represented. Messrs. Morris & Co., Mr. Burne-Jones, Mr. Crane, Mr. H. Holiday, and others, have made important contributions. A special feature has been the issue of a descriptive catalogue embracing articles upon the various classes of exhibits, and they are of a most instructive and educational character. A course of practical demonstrations of the art of letter-press printing was also arranged. In the winter of '88-9 an exhibition of pictures and relics of the Royal House of Stuart was held, under the patronage of the Queen, the Earl of Ashburnham being president; and in the autumn of '89 the second exhibition of the Arts and Crafts Exhibition Society took place, and this will probably be maintained from year to year. See, J. W. Beck.

New Guinea, or Papua. An island lying directly N. of Australia, and after Australia the largest island in the world. It is about 1,490 miles from E. to W., with a breadth at centre of 410 miles. The area is now computed to be 305,900 sq. m. That half of the island lying west of the 141st meridian is assigned to Holland, and comprises 150,755 sq. m. The boundary between the German territory on the north, now called *Kaiser Wilhelm's Land*, and the English territory on the south starts from the N.E. coast on the 8th parallel of S. lat., and follows it to intersection with 147th meridian; thence N.W. to intersection of 6° S. lat. with 144° E. long.; and thence W.N.W. to intersection of 5° S. lat. and 141° E. long. Adjacent islands north of 8° S. lat. are German, south of that parallel English. Kaiser Wilhelm's Land contains 70,300 sq. m.; pop. 109,000; the English territory 86,457 sq. m., pop. 135,000, with Port Moresby as the official centre. The island is rich in tropical products, possesses a copious and peculiar flora and fauna, and is suitable for tropical agriculture. The coast is miasmatic, the mountainous interior reported healthier. It is becoming better known, various exploring expeditions having been at work. The delimitation and division of the island between Great Britain, Germany, and Holland was settled in 1885. (For history of preceding disputes, see ed. '87.) Under an arrangement with the Imperial Government by which Queensland, New South Wales, and Victoria each contribute £5000 annually towards the expenses of governing British New Guinea, Dr. MacGregor, now Sir William MacGregor, arrived at Port Moresby in Aug. '88, and at once took an active part in the development of the new colony. From the date of his arrival until July '89, when he left for a brief holiday, he travelled through the colony in different directions on foot,

accomplishing among other things the ascent of Mt. Owen Stanley, 13,600 ft., an undertaking which had completely baffled previous explorers. Starting with his secretary, Mr. Cameron, two other white men, and forty natives, he cut his way through the dense shrubs which clothe the lower ranges, on one occasion making only a mile in three days. Above 8000 ft. a different climate was experienced, and it was found to be very cold. After several weeks of climbing, in which one after another of the party gave in, the Governor, with a Fijian named Joe, and three natives, reached the top. As a result of this expedition, several new birds, and many hitherto unknown plants and grasses, have been added to science. The discovery of gold (Aug. '88) in Lud-Est, an island in the Louisiade Archipelago, about two hundred miles from New Guinea, has given a great impetus to the country's prospecting, and no doubt is entertained that before long payable gold will be found in the mainland of New Guinea. Good gold has now been found in many of the islands; and under the firm rule of Sir William MacGregor conflicts between the miners and the natives have hitherto been avoided, while the Governor's personal assistance has been given to parties wishing to prospect. The Governor has entirely disproved the stories of other travellers of the intractable hostility of the natives in the interior of New Guinea. He found them superstitious and shy, but absolutely friendly. Attempts are being made by the Germans to open up their portion of New Guinea, but although they have secured by far the most valuable part of the island, their efforts have at present been unattended by success. For Commissioners, etc., see *DIPLOMATIC. Consult* Chalmers & Gill's "Work and Adventure in New Guinea," D'Alberti's "New Guinea," Bastian's "Der Papua," Petherick's "Catalogue of York Gate Library," *The Scottish Geographical Magazine* for Oct. 1885, *Proceedings of the Royal Geographical Society* for Feb. 1887, etc. See also *QUEENSLAND, and COLONIES of EUROPEAN POWERS.*

New Hebrides. A long chain of volcanic islands in western Polynesia, lying W. of Fiji and N.E. of New Caledonia. Area about 3,000 sq. m. Extremely fertile, producing coconut, sandal-wood, fruits, and other Polynesian produce; but the climate is rather unfavourable to Europeans. Native population numerous, of Negrito origin. People barbarous, and formerly cannibals, but missionaries have produced a civilising influence. (For history of the relations between England and France in respect of N. H. see ed. '88.)

New Ireland. Now part of KAISER WILHELM'S LAND (q.v.).

New Jerusalem Church. A religious body, sometimes designated the New Church, sometimes Swedenborgian, consisting of those who believe that the Lord Jesus Christ effected His second coming through the instrumentality of Emanuel Swedenborg (d. 1772), through whom He revealed the internal, spiritual sense of the Divine Word; the doctrines of which sense, together with the science of correspondences, furnishing the key by which that sense may be unlocked, are contained in the theological writings of Swedenborg. The two fundamental doctrines of Swedenborg's theological system are, that the Lord Jesus Christ, in His glorified humanity, is the only God of heaven and earth, and that in Him is the Trinity of

Father, Son, and Holy Spirit; and that in order to be saved it is necessary to believe in Him, and shun the evils forbidden in the Decalogue, as sins before God. Swedenborg's writings were introduced into this country by a clergyman of the Church of England, the Rev. John Olweus, rector of St. John's, Manchester. He translated the greater portion of Swedenborg's works, especially his greatest work, the "Arcana Coelestia," in thirteen volumes. The Rev. William Hill, also clergyman, translated the work second only in importance to this, the "Apocalypse Explained" (6 vols.) The Rev. Thomas Hartley, a clergyman, translated "Heaven and Hell" (1 vol.) Very early, some clergymen, and others who had been Methodist preachers, students of Swedenborg, formed a separate organisation for worship (1788), which has continued and increased. At the present time (Nov. '89), there are 77 societies, with 6,078 members, and a large number of hearers who are not members. They have Sunday-schools with 7,500 children, and day-schools with 6,000 scholars. There are twelve societies in London and its neighbourhood, and in various parts of the country there are believers of the teachings of Swedenborg who worship with the Church of England or with some of the other religious bodies. In America the number of the societies of the New Jerusalem Church is much greater; and in every foreign country, both in Europe and elsewhere, they possess numerous and zealous adherents. The body is governed by a Conference in Great Britain, which meets annually, consisting of the ministers and of representatives of societies, from one to three according to the number of their members. **Swedenborg Society**, 36, Bloomsbury St., W.C.

Newman, His Eminence Cardinal John Henry, was b. in London 1801. Educated at Trin. Coll., Oxford, where he graduated with classical honours (1820), and was elected Fellow of Oriel Coll. Vice-Principal of St. Alban Hall (1825), under Dr. (afterwards Archbishop) J. Whately. Incumbent of St. Mary's, Oxford, and chaplain of Littlemore (1828-43). By his preaching he acquired great influence, and became, together with Dr. Pusey, one of the recognised heads of the "High Church" party, founded at Littlemore. Contributed to the "Tracts for the Times," and took a leading part in their publication, bringing upon himself the censure of the University authorities for the doctrines propagated. Succeeded from the Church of England (1845) to that of Rome, and was appointed head of the Oratory of St. Philip Neri at Birmingham. Rector of the new Roman Catholic University of Dublin (1844-58); afterwards principal of a Roman Catholic school at Edgbaston. Elected Honorary Fellow of Trinity Coll., Oxford (1877). Was created a Cardinal (1879) by Pope Leo XIII. Has written several remarkable works sustaining the doctrines of the Church of Rome, and particularly a reply to Mr. Gladstone's pamphlet on the Vatican decrees (1875)—"Apologia pro Vita Sua," etc. Cardinal Newman is one of the most learned and remarkable members of the Roman hierarchy at the present day. In '89 he was drawn into correspondence in connection with statements made respecting him in Dean Burgon's "Reminiscences."

Newman, Francis W., brother of Cardinal Newman (q.v.), b. 1805. Educated at Worcester Coll., Oxford, graduating ('26) double first.

Fellow of Balliol Coll. ('26), but four years later he resigned, having conscientious scruples about signing the Thirty-nine Articles. Classical tutor at Bristol Coll. ('32), and subsequently held a similar post in Manchester New College. Latin Professor in Univ. Coll., London ('46-63). He is the author of numerous works, of which the best is "Phases of Faith." Mr. N. takes a great interest in vegetarianism. He is a frequent contributor to *The Echo*. In '89 he published "Anglo-Saxon Abolition of Slavery."

New Providence. The most important of the *Bahama Islands* (q.v.).

New Republic, or Nieuwe Republiek. Was formed in Zululand 1886-7, by a party of Transvaal Boers. Lies on the northern and western side of Zululand, adjacent to the Transvaal and Swaziland. Area 1,380 sq. m.; pop. very limited. Capital Vryheid. On the death of Cetewayo his rule had been usurped by the chief Usibepu. Dinizulu, son of Cetewayo, fought and obtained Boer assistance against the usurper, and, as the price of it, ceded territory to the Boers. This they were gradually increasing by various means, when they came into collision with the British authorities, which resulted in negotiation. The New Republic was then defined and delimited, and the remainder of Zululand annexed by Great Britain, including all the coast. See ZULULAND, SWAZILAND, AMATONGALAND, etc.

"New Review, The" (monthly). The first number appeared June 1st, '89. The object of the *N. R.* is to place within the reach of everybody a critical periodical, conducted on the lines of the half-crown Reviews. Its contributors include some of the most eminent writers of the day, a special feature being articles by distinguished European savants. Politics, science, art, and literature are embraced in its scope of signed articles. The *N. R.* is published on the first of each month. Editor, Mr. Archibald Grove.

Newspaper Press. See ed. '89, and consult *Newspaper Press Directory*, *Sell's Dictionary of the World's Press*, etc.

New South Wales. The oldest of the British colonies in Australia. Was founded as a penal settlement in 1788. Originally embraced half the continent. Since 1859 it extends from lat. 28° 10' to lat. 37° 28' S. It has Queensland on the north, and Victoria on the south. From the sea upon the east it stretches to long. 141° E., which meridian divides it from South Australia. Greatest length 900 miles; greatest breadth 850 miles; total area 310,000 sq. miles; pop. 1,042,919. Capital Sydney, on Port Jackson; pop. 330,000. It is a splendid city, and is the oldest, and still the most important, in all Australasia. Among other great public institutions of Sydney may be mentioned the Royal Mint, University, Free Library, National Gallery, and Observatory. Besides the metropolis are 46 boroughs and 45 municipalities. Leading large towns are Albury, Bathurst, Deniliquin, Goulburn, Grafton, Hay, Maitland, Newcastle, Parramatta, Tamworth, Wagga-Wagga, Wollongong, and Yass.—New South Wales is divided into districts and counties. Of the latter there are now 142; but only 90, which occupy the earlier settled territories near the coast, have much individuality. The remainder are part of the 13 pastoral districts. Of these districts, which are extensive regions, Murrumbidgee, Lachlan, Wellington, Bligh and Darling are good grazing

lands; Liverpool Plains, New England, Macleay, and Clarence are suitable for agriculture; Monaro is a high and rugged table-land; Gwydir and Albert are both pastoral and agricultural; Warrego partly barren.—The country may be divided into three sections: coast district, from 30 to 120 miles wide, between coast range and the sea, fertile, settled, well watered; table-lands, extending from coast range westward to long. 141° E., poor pastoral suffering from drought; plains of interior, well watered and grassed, chief pastoral region. Coast rocky and precipitous, with few indentations. Chief harbours are Port Jackson, Twofold Bay, Jervis Bay, Broken Bay, Port Stephens, and Port Hunter. Dividing range makes two watersheds, east and west. Eastern rivers short: principal, Hawkesbury, Hunter, Shoalhaven, Clarence, Macleay, Richmond, Manning (100 to 300 miles). Western system includes Darling (1,160 miles), Lachlan (700 miles), Murrumbidgee (1,350 miles), Murray (1,120), and their affluents. There are enormous tracts of natural pasture interspersed with more or less wood. Valuable timber abounds, among it some of the largest trees in the world. Flora and fauna present the general types of Australia, and have both been supplemented by many importations. Among the latter the rabbit has proved a dreadful plague. New South Wales gardens and orchards are extremely luxuriant. Large areas are suitable for grain-growing, and almost all productions of temperate and semi-tropical countries can be successfully grown. Orange and lemon groves very prolific. Tobacco, sugar-cane, maize, sorghum, root crops, arrowroot, cotton, and vines do well in sundry districts. The mulberry flourishes, and silk culture is a rising industry. Minerals include gold, coal, silver, tin, copper, iron, antimony, lead, cinnabar, zinc, small diamonds, opals, rubies, and sapphires, kerolene-shale, etc. Climate uniformly healthy, though differing as to heat and moisture in various districts.—Ruled by a Governor and responsible Ministry. Legislative power is vested in a Parliament of two houses. The upper, or Legislative Council, consists at present of 58 members (not to be less than 21) appointed by the Governor for life. The lower house, or Legislative Assembly, is composed of 122 members, elected triennially by 72 constituencies on a basis of manhood suffrage. The Ministry is responsible to the Legislative Assembly. New South Wales as yet refrains from taking part in the Federal Council of Australasia. Education under Government control. Public schools, grammar schools, and colleges of the University; fees very low. The University is of importance, being well endowed and conferring degrees. Religion well provided for. Protestants about three-fifths of population; Presbyterians are most numerous. Church of England has six dioceses in the colony. For defence there is a Naval Brigade of 750 and torpedo corps of 230 men; a paid artillery force of 1,200, engineers 120, partly-paid infantry 4,500, cavalry 400, volunteer reserves about 5,000. Port Jackson is strongly defended by heavy batteries and submarine mines. For latest financial statistics see BRITISH EMPIRE, etc. (table). There are 1,935 miles of railway open, including the line which connects with the Victorian system at Albury, besides that almost finished to connect with Queensland. There are 10,618 miles of telegraph line. Staple

export is wool, increased to present amount of about 300,000,000 lb. per annum, value £7,350,000. Next come tin, value £750,000; copper, £400,000; tallow, £380,000; meat, £160,000. Gold output 100,667 oz., value £402,668. Coal mining employs over 6,000 men, about 2,870,000 tons being raised. Area leased in pastoral runs over 220,000 sq. miles, agricultural holdings 38,500,000 acres, cultivated 972,000 acres. Wheat 265,000 acres, maize 115,000 acres, sugar-cane 9,583 acres, yielding 22,000,000 lb. of sugar, vineyards 5,247 acres, yielding 555,470 gallons of wine and 3,893 of brandy, besides fish fruit and grapes. Orangeries, 7,733 acres. Sheep exceed 39,000,000; cattle 1,300,000; horses 360,000; pigs 210,000. Manufacture is increasing, there being 3,622 factories, works, and mills, employing 33,884 hands. Land of best quality can be bought at £1 per acre, payable by instalments of 2s. per acre at once and 1s. per acre per annum subsequently.—Convict immigration ceased in 1840. The colony received a constitution and representative government in 1843, and responsible government in 1855. Gold was discovered in 1851, and produced an immense rush from England and elsewhere to Australia. The first railway was opened in 1855, and telegraph to Melbourne opened 1858. Since 1872 there has been marked progress, free trade introduced, great extension of railways, etc. Sydney Exhibition held in 1879. Towards the close of 1883 an Intercolonial Conference was held at Sydney, called together principally by the feeling aroused throughout Australia in consequence of Imperial Government disallowing annexation of New Guinea. Federation schemes discussed. In 1885 Imperial Parliament passed the Federal Council Act of Australasia, but New South Wales has found difficulties in the way of her taking advantage of it. In 1884-5 the colony, amidst immense enthusiasm, raised, equipped, and sent a contingent of 800 soldiers to the Soudan—being the first occasion on which colonial troops have served with a British army abroad. A terrible colliery accident occurred at Bulli in March 1887. Eighty-five miners were entombed alive. A Bill to change the name of the colony into "Australia" was introduced in 1887. In '88 the leading question of public interest was that of immigration, which aroused much feeling, and led to the passing of certain laws, and communications between the Home Government and New South Wales. A conference of the Australasian Colonies on the subject also took place at Sydney. New South Wales celebrated its centenary as a colony, and is issuing a special series of stamps of an elaborate design to commemorate the event.—'89. The revenue for the year ending Dec. 31st, '88, showed an increase of £303,000 as compared with '87. The revenue from taxation showed an increase of £17,000, but the land revenue a decrease of £10,000. The receipts from the various public services had increased by £418,000, which included £249,000 from railway receipts, and £38,000 from postal department; receipts from miscellaneous sources showed a decrease. Resignation of the Ministry on an adverse vote on the question of the appointment of Mr. Fehon to the Railway Board (Jan. 10th). Mr. Waut having declined to form a Ministry (11th), the Hon. G. R. Dibbs was called by the Government, and succeeded in forming a cabinet, which, however, was

defeated on a vote of want of confidence (17th), and dissolved. The result of the elections showed (Feb. 16th) 68 supporters of the Ministry and 69 against, Sir Henry Parkes leading the Opposition. All the Ministers were re-elected. The Ways and Means Committee (16th) reported to the House of Representatives the Tariff Bill drawn up by them, reducing the revenue by about £70,000,000, together with another Bill reducing taxation and for other purposes, effecting a total reduction in the revenue of £42,000,000. The Appropriations Committee also reported a Bill repealing certain international tobacco duties, amounting in the aggregate to £30,000,000. It was not thought likely that either Bill will pass this session. The new Parliament was formally opened (27th), and Lord Carrington, in the inaugural speech, said it was not safe to predict that the estimates would be realised. The House would only be asked to sanction important and necessary public measures, and proposals would be submitted for the adjustment and gradual extinction of the accumulated deficit (28th). On the motion of Sir H. Parkes, a vote of want of confidence in the Ministry was carried by 68 to 64 (March 6th). The Ministry resigned. Sir H. Parkes was sent for. In the Legislative Assembly (11th) the Hon. J. P. Garvan, Treasurer in the outgoing Administration, explained that the estimated deficit for '88 and previous years amounted to £2,676,000, to which had to be added £689,000 accrued interest on the public debt, and the interest for '88 payable in January and the subsequent months, as well as the amount from the supplementary estimates for '88 and previous years, which was £697,000, the total accumulated deficit being £4,064,000, less possible savings to the extent of £320,000 in the estimated expenditure. He further explained that the accrued interest on the public debt had hitherto been excluded from statements of the deficit. In his address to his constituents (12th), Sir H. Parkes said the Government would deal with the questions of water and timber conservation, the encouragement of agriculture and the establishment of agricultural colleges, irrigation, the amendment of the mining laws, rivers, and harbours improvement, the equalisation of taxation, the reform of the electoral system by the establishment of single electorates, and the extension of the franchise to women. The Government accepted a motion (April 3rd) to abolish the duties on butter, bacon, cheese, and kerosene. Sir H. Parkes expressed, in the Assembly, the hope that the session would terminate in six weeks (4th). The Assembly passed a resolution, by 45 to 25, in favour of payment of members. The Hon. William Macmillan, Treasurer of the new Ministry, presented his budget (5th). He announced that the revenue of the colony in '88 amounted to £9,110,000, and the expenditure to £9,147,000, leaving a debit balance of £37,000. He estimated the revenue for '89 at £8,938,000, and the expenditure at £8,913,000, leaving an estimated surplus of £25,000. The actual deficit in the public accounts up to that time had not exceeded £2,600,000, which sum he proposed to gradually liquidate by means of treasury bills issued under security of the suburban lands to be sold from time to time in the colony. The steel bridge built over the Hawkesbury River on the railway between Sydney and Newcastle, which has been under construction for the last two and a half years,

was opened (May 1st) by the Governor of New South Wales in presence of the Ministers, the members of both Houses of Parliament, and a large assemblage of the general public. It carries a double line of rails, and is the third largest structure of its kind in the world, and the largest of any in the Southern Hemisphere, having seven spans of 415 ft. each. The headway above high water is 40 ft. The new bridge completes the system of railway communication between Brisbane and Adelaide. The Rt. Rev. Dr. Pearson telegraphed from England that he had resigned the bishopric of Newcastle (9th). At a meeting at Melbourne (10th) Sir Somers Vane's proposals for supporting an imperial institute were unanimously adopted, and a deputation appointed to confer with the Government on the matter. The Land Amendment Bill was read a second time, and the Bill for Payment of Members a first time (June 6th). The Crown Lands Bill passed the Legislative Assembly (July 15th). The Bill for Payment of Members was withdrawn by the Ministry (26th), on the Assembly restricting its operation to the next two Parliaments only. Sir H. Parkes introduced a second Bill for Payment of Members (31st), which passed all its stages in the Assembly at one sitting. The Treasurer announced that the revenue for the six months ending June 31st, '89, showed an increase of £159,000. The Assembly approved the continuance of the San Francisco mail service for another year (Sept. 6th). The Land Law Amendment Bill passed both Houses (27th), and the Parliament was prorogued the following week. Sir Henry Parkes sent (Oct. 16th) an invitation to each colony to send six representatives appointed by Parliament and chosen in equal numbers from each of the two political parties, to a proposed National Convention, four members being taken from the Assembly and two from the Council in each colony. Western Australia, having only one House, might, he suggested, only send four representatives; and thus, if New Zealand thought proper to join the Convention, the total number of representatives would be forty. This Convention would be empowered to discuss and recommend for adoption a form of Federal Constitution. "The scheme of federal government, it is assumed, would necessarily follow close upon the type of the Dominion Government of Canada, and would provide for the appointment of a Governor-General, and for the creation of an Australian Privy Council and of a Parliament consisting of a Senate and House of Commons." For Ministry, etc., see DIPLOMATIC. Consult, besides official publications, Blair's "Cyclopedia of Australasia," Gordon and Golch's "Australian Handbook for '89," Lang's "New South Wales," Lyne's "Industries of New South Wales," Wallace's "Australasia," Petterick's "Catalogue of York Gate Library," etc. "New Style." See article CALENDAR.

New Westminster. A city of British Columbia, in the Dominion of Canada. Situated on Fraser river. The chief town on the mainland, formerly capital, now second city. Pop. 4,000.

New York (Exhibition) Tower. It was reported in this country, at the end of Nov. '89, that, in connection with the exhibition to be held in New York in '92, a syndicate had been formed to build a tower 1600 ft. high. The preliminary plans, it was added, had been prepared by the Phoenix Bridge Co., which company had offered to subscribe \$100,000

towards the estimated cost of \$2,500,000. The design is circular, with 24 vertical or slightly tapering columns arranged in two concentric rings. A spiral roadway, 75 ft. to 50 ft. wide, on a uniform grade of 8 per cent., with a development of 3.76 miles, will run nearly to the top; it will be a double-deck roadway, with a car line on the upper part, which is to be operated on the Judson threadless screw system for street railways. At the top there are to be restaurants, etc., with a promenade and an observatory. A circular promenade will be made at a height of 450 ft., with a large café, and another at about 900 ft. A footwalk will be at the outside of the roadway.

New Zealand. A colony of the British Empire, consisting of a group of islands in the South Pacific, about 1500 miles E. by S. from Australia. There are two large islands: **North Island**, or **Ahine-mau**, 500 m. by 250, area 45,687 sq. m.; **South Island**, or **Te Wahi Ponamu**, 500 m. by 200, area 57,579 sq. m.; also **Stewart Island**, area 1000 sq. m.; **Chatham** and **Auckland Islands** at some distance E. and S., area 377 sq. m. Total area 104,403 sq. m. Population, 645,330. Capital **Wellington**, pop. (including suburbs) 27,833; chief cities, **Dunedin**, 45,518; **Auckland**, 57,048; **Christchurch**, 44,688. Other rising and important towns, mostly seaports, taken in order of size, are **Invercargill**, **Nelson**, **Oamaru**, **Napier**, **Thames**, **Wanganui**, **Lyttelton**, **Timaru**, **New Plymouth**, **Hokitika**, **Greymouth**, **Masterton**, and **Blenheim**. Country divided into 63 counties, which are subdivided into ridings and boroughs. The original provinces, now called "provincial districts," have no longer any political importance.—**Main Islands** are separated by Cook Strait, on north of which is **Port Nicholson** and the capital. Coast is much indented by bays and harbours, estuaries and firths. Chief rivers are N. **Wairoa**, **Thames**, **Waikato**, and **Wanganui** in North Island; **Wairau**, **Buller**, **Grey**, **Waitaki**, **Taieri**, **Clutha**, **Mataura**, and **Waiau**, in South Island; also many smaller streams. Surface rugged. Volcanoes and volcanic belt across centre of North Island. Alpine chain descends along west coast of South Island. Its eastern slopes are the great grazing region. Lakes numerous: **Taupo** in North, **Wakatipu** in South Island are largest. Famous "Hot Lakes" and geyser regions between **Taupo** and **Bay of Plenty**, where the **Tarawera Eruption** occurred in June 1886. Immense tracts of forest, containing splendid timber, notably **kauri pine**, in the north. E. and S. of South Island much open grass. No native animals except dogs and rats, now nearly extinct. No reptiles but lizards. Deer, cattle, pigs, goats, etc., wild in some parts; rabbits a plague in the south. Native birds sufficiently numerous: among them three small species (apteryx) of an extinct gigantic struthious family, are still found. Turkeys, pheasants, etc., introduced and plentiful. Natural productions of most value are **kauri timber** and **gum**, **phormium** or native flax, **coal**, **gold**, **iron**, and other minerals. There are coal mines and gold fields in several parts. Seas contain various excellent food fish in vast abundance. The climates of New Zealand are equable, very healthy, and generally of the warmer temperate zone. There is an abundant rainfall. All British plants may be raised to perfection in the fertile soil. For the English labouring class it is a veritable paradise.—Government is carried on by a Governor, who is advised by

a responsible Ministry. Of the two houses of parliament, the Legislative Council consists of 54 members nominated by the Governor for life, the House of Representatives of 95 members elected triennially on a manhood suffrage. Maori representatives sit in both Houses. New Zealand takes no part in the Federal Council of Australasia as yet. There is no State-aided church, but most Christian sects are well provided for. Education is compulsory, free, and secular. The New Zealand University is an examining board, chartered to grant degrees. Affiliated to it are the Otago University (Dunedin), the Canterbury College (Christchurch), and University College (Auckland), besides some minor institutions. Ports defended by heavy batteries, mines, and torpedo-boats. There are 8000 to 10,000 volunteers, and 450 armed constabulary. Exports consist of wool, grain, gold, kauri gum, tallow, timber, rabbit skins, flax and cordage, leather, meat, etc. Manufacture is progressing well, particularly as regards woollens. There are 1806 miles of railway, which extent is being rapidly increased, as well as numerous roads, and water communication. Telegraph line, 4546 miles. There are over 200 daily, weekly, and monthly periodicals. The land under cultivation amounted in '88 to 6,845,177 acres. The colony has made phenomenal progress since '40. Its resources are immense, and still inadequately worked. Depression has affected the colony, but wages are very high and living very cheap. Native troubles are now at an end. The public debt, though large, is secured by the works carried out. Government lands are now reserved on a new leasehold system, instead of being sold as formerly; but plenty of land is to be had cheap, and farming is lucrative. Artificial values of land also provided against to some extent.—Maori chiefs signed *Treaty of Waitangi* in 1840, whereby New Zealand became a British possession and a Crown colony. Auckland was founded as the capital. Representative government was soon introduced. Between 1840 and 1850 settlements were formed at Wellington, Taranaki, Nelson, Otago, and Canterbury. These became provinces, with autonomous government under the general direction of central government at Auckland. Subsequently Hawke's Bay, Marlborough, Westland, and Southland, were added to the list of provinces. In these early days there were several small wars with different native tribes, at Wairau, Wanganui, round the Bay of Islands, and again in Taranaki. In 1852 the colony received a constitution and responsible government. Maori wars 1855 to 1869. The central parts of North Island were the scene. Sundry Maori of various tribes drew together under a "prophet," and professed a new religion called Paimariri. The Waikatos elected a Maori "king." These two sections waged a guerilla warfare with British. Finally they became dissociated. After 1869 the "kingites" remained peaceable, but isolated in their own districts, and the "prophet" and his followers withdrew to a village in Taranaki. The latter were eventually dispersed in 1881—about which time, too, the "king" gave up the policy of isolation, visited England, and is now much on a par with chiefs of other tribes, who have become a part of the general community. A disturbance about land occurred in 1886 in Patea county, fomented by the "prophet" Te Whiti and his followers. It was promptly suppressed,

Te Whiti and others being arrested and fined. In 1865 the seat of government was removed to Wellington, and in 1873 the Public Works Policy was inaugurated. Large loans were now raised, and the funds devoted to immigration, to the construction of harbours, railways, roads, etc. In 1876 came into force a very important measure. The provinces were then done away with, and their several governments abolished. The topics which engaged public attention in '89 were a Bill for altering the constitution of the Legislative Council, an Electoral Bill, and a measure for amending the Property Assessment Act. The subject of a Federal Union was also much discussed. For Ministry, etc., see DIPLOMATIC. Consult Stone's "Otago and Southland Directory and New Zealand Annual" (Crosby, Lockwood), "The Official Handbook to New Zealand," Hector's "Handbook to New Zealand," Hay's "Brighter Britain," Wallace's "Australasia," Petherick's "Catalogue of York Gate Library," etc.

Niagara. A river connecting Lakes Erie and Ontario, and, throughout its course, forming a part of the boundary between the United States and the Dominion of Canada. The famous Falls occur about midway. Navigation between the lakes is conducted by means of the Welland Canal on the Canadian side.

Nicaragua, a Central American republic, bounded on the N. by Honduras, S. by Costa Rica, W. by the Pacific, and E. by the Caribbean Sea. Is governed by President, Senate, and House of Representatives, elected by universal suffrage. Area 49,500 sq. m.; pop. 500,000. Estimated revenue in '87 £678,659; expenditure £656,000; imports £373,585; exports £911,510. Public internal debt £210,707; foreign debt, about £285,000, contracted in '87. Army about 10,000, including police and militia. Exports, coffee, india-rubber, and cattle. Railways and telegraphs have been constructed. Scheme for inter-oceanic canal revived in '79. The treaty by which the United States took power to construct the same, objected to by England in '84. United States legislature finally refused ratification (Jan. '89).—During '89 (Aug.), the President, Don Evaristo Carazo, died, and was succeeded by Don R. Sacusa. For Ministry, etc., see DIPLOMATIC.

Nicaragua Ship Canal. On Dec. 1st, 1884, it was announced in President Arthur's message to Congress that a treaty had been signed between the Government of the United States and that of the Republic of Nicaragua, in Central America, for the construction of a ship canal through the latter country as a connecting link between the Atlantic and Pacific Oceans. Nicaragua is one of the five confederated republics, and is situated south of Guatemala and north of Panama, on the isthmus which connects North and South America. According to this treaty the waterway was to be made by the engineers of the United States army from the plans of Mr. A. G. Menscal, of the United States navy. (For details of the vicissitudes of the scheme down to the end of '88, see our earlier editions.) The Nicaragua Canal Bill was passed by the House on Feb. 6th, '89, and the incorporation of the Maritime Canal Co. of Nicaragua was duly authorised. Under date, New York, May 24th, '89, it was reported that fifty men, provided with all necessary implements, were to be despatched by the Nicaragua Canal Co.

as a pioneer expedition to begin the work of constructing the canal. The party left in the as. *Alonso* immediately afterwards for Greytown. The total length of the route finally decided upon (says the *Engineer* of June 7th) is 170 miles, made up as follows: river navigation, 64 miles; lake navigation, 56 miles; basin navigation, formed by small dams, 20 miles; actual canal, 29 miles. There are three locks on each side of the divide, and it is thought that each lock can pass thirty-two ships a day. The general depth is 30 ft., the earth slopes are 1½ to 1 ft., and the rock slopes nearly vertical in places. It was reported from New York (June 8th) that the construction of a breakwater had been begun. In August it was reported that the arrangements for the workpeople were being specially prepared to prevent the heavy death list as seen at Panama. Good dwellings, food, and pure water, brought for fifteen miles to Greytown, were being provided. From information which reached this country in Oct., it appears that the total length of the route as finally located is 170 miles; of this 121 miles is free navigation of Lake Nicaragua and the San Juan river, requiring only a little dredging, etc.; 21 miles is free navigation of basins formed by the flooding of two valleys, leaving 28 miles only of canal excavation. There will be five locks. The total cost for construction, exclusive of hospitals, shops, etc., is estimated at 55,000,000 dollars. After rumoured disagreements between the Company, the Nicaragua Government and Costa Rica, the first sod of the Canal was turned on Nov. 11th.

Nicosia. Capital of Cyprus (*q.v.*), pop. 11,500. Also written Lefkossia and Leucossia, of which it is a corruption.

Niger. The greatest river of Western Africa, draining the Western Soudan. Called also Ku Joliba in its upper course, and Ku Kworra in its middle and lower. Was declared a "free trade" river at the Berlin Conference. France is acquiring control of the Upper Niger through Senegambia. Consult Richardson's "Story of the Niger."

Niger Districts. A British protectorate in West Africa since 1884. Extends over the delta from the Rio del Rey and up the Niger to the Benue, its great eastern tributary. In '87 was added the entire coast from Lagos to the Rio del Rey, and territories in the Niger basin acquired by the Royal Niger Company. Consult Richardson's "Story of the Niger."

Nilsson, Madame Christine. One of the greatest operatic singers of the present day, b. near Vexio, in Sweden, in 1843. At first she travelled about the country playing and singing at fairs, when M. Tornérhjelm, accidentally hearing her, made her his *protégée*, placing her under the care of Mr. Franz Berwald, of Stockholm, M.M. Masset and Wurtch, at Paris, for her musical education. She made her first appearance, which was very successful, at the Théâtre Lyrique, Paris, in the part of Violetta in "La Traviata." She visited London in '67, and the United States in '70. She again visited London, and sang at Drury Lane. In '83-4 she made a brilliantly successful tour in the United States. In '73 she married M. Auguste Rouzaud, who died in '82; and subsequently married at Paris the Count A. de Miranda. In June '88 Mdme. N. appeared at a farewell concert at the Albert Hall, and received a rapturous reception. The Comtesse

has made a unique collection of fans. In Nov. '89 it was rumoured that she contemplated a tour in the United States.

"Nineteenth Century Review" (monthly). First number issued March 1877. Editor, Mr. James Knowles (*q.v.*) ('77). Deals with the leading social, scientific, literary, and political questions of the day. The writers are among the foremost men of the time. Mr. Gladstone, Cardinal Manning, and Professor Huxley are among the contributors. Office, 1, Paternoster Square, E.C.

Nitrate of Soda. The production of nitrate of soda is beginning to assume very large proportions, so much so that the supply is now considerably in advance of the demand. The shipments from the west coast of South America for the nitrate year ending 30th June, '89, amounted to 853,000 tons. The consumption during that period, although showing an increase, did not exceed 740,000 tons. Germany, France and Belgium augmented their supply by 15 per cent., the United States 10 per cent., but Great Britain took about 7 per cent. less. The Continent absorbed altogether about 546,000 tons, the United Kingdom 100,000, and America 60,000. The visible supply on 30th June was 283,000 tons against 190,000 tons at the corresponding period of '88. The following figures give the consumption throughout the world in the past decade, between 1st July and 30th June, together with the average Liverpool prices per cwt. for the twelve months:—

| | | | |
|---------|----------------|----------------|----------|
| '78-79, | 280,000 tons ; | average price, | 13s. 6d. |
| '79-80, | 170,000 " ; | " | 16s. 3d. |
| '80-81, | 250,000 " ; | " | 14s. 6d. |
| '81-82, | 350,000 " ; | " | 13s. 9d. |
| '82-83, | 430,000 " ; | " | 12s. 3d. |
| '83-84, | 530,000 " ; | " | 10s. 0d. |
| '84-85, | 490,000 " ; | " | 9s. 9d. |
| '85-86, | 440,000 " ; | " | 10s. 6d. |
| '86-87, | 510,000 " ; | " | 9s. 9d. |
| '87-88, | 670,000 " ; | " | 9s. 4d. |
| '88-89, | 730,000 " ; | " | 9s. 10d. |

A very large amount of capital has been invested in the trade, and seventeen companies have been organised with capitals aggregating upwards of £5,000,000. The dividends paid upon most of these companies range from 20 to 80 per cent., and this in the face of an export duty of £2 12s. 6d. per ton. The cost *f.o.b.* varies from 1 dol. 85 cents. per quintal (about 22 to the ton) to 2 dols. 75 cents., and the freight to Europe from 22s. 6d. up to 37s. The cost of producing nitrate by the *Primitiva*, San Jorge, and Rosario companies is about 40 cents per quintal at the works; which is the lowest price at which it can be manufactured. In '88 the district of Tarapaca produced 15½ million quintals; Antofagasta 650,000 quintals, and Taltal 650,000 quintals. The Antofagasta returns show a falling off, for in '79 the output was over 1,000,000 quintals, but those of the other districts mark a very considerable increase—especially Tarapaca. Numerous experiments have been made with nitrate of soda for agricultural purposes, and the results prove that a combination of superphosphate and nitrate of soda, in the proportion of 3 cwt. of the former to 2 cwt. of the latter to the acre, is the most beneficial to the land, while giving the highest yield of wheat as compared with other manures. On the Continent nitrate of soda is chiefly used for beet-growing, and has become a necessity, for the only other fertiliser suitable

for this purpose is sulphate of ammonia, which is more expensive. Chili derives a very large revenue from the export of nitrate of soda.

Nitroglycerine. See DYNAMITE.

Noms de Plume, etc. The word *nom-de-plume* is not known in French, in which language the proper equivalent is *nom-de-guerre*. The following list of pseudonyms or pen-names deals chiefly with modern and English or American writers; it includes some initials and maiden names used by married ladies in authorship.

[* implies only occasional or early use.]

- A., Major* C. B. Coles.
A.K.H.B. Rev. A. K. H. Boyd.
A.L.O.E. (= A Lady of England) . . . Charlotte Maria Tucker.
Acheta Domestica . . . Miss L. M. Budgen.
Adeler, Max Chas. Heber Clark.
Alexander, Mrs. . . . Mrs. A. F. Hector.
Alexander the Corrector Alexander Cruden.
**Alcibiades* Lord Tennyson in *Punch*, 1846.
Ali Baba Abergh Mackay.
Ally Sloper Chas. H. Ross.
**Almaviva* Clement Scott.
Amateur Angler . . . Edward Marston.
Amateur Casual, An . . Jas. Greenwood.
Amusat Batuk N. L. Thieblin.
**Amicus ("Times")* . . . Sir Thos. Fairbairn.
Ange-Bénigne Mme. de Molènes.
Ansley, F. F. Anstey Guthrie.
Antijanus Dr. P. Hergenroether.
Ape ("Vanity Fair") . . . Pellegrini(caricaturist).
A Raven's Feather . . . Ll. F. W. Jewitt.
Argles, Mrs. now Mrs. Hungerford.
Aristocratic Tout . . . T. Wood.
**Atlas ("World")* . . . Edmund Yates.
Auber Forrester . . . Annie Aubertine Woodward.
**Augustsohn, W.* . . . W. von Kotzebue.
**Aunt Fanny* Mrs. F. D. Gage.
" Hester Miss G. M. Craik.
" Judy Mrs. Alfred Gatty.
" Kitty Maria Jane Macintosh.
" Louisa Mrs. Valentine.
Autocrat of the Breakfast Table . . . O. W. Holmes.
B ("Times") Lord Bramwell.
**Bab* W. S. Gilbert.
**Baptistel* Alphonse Daudet.
Barker, Lady now Lady F. N. Broome.
Barrister ("Sat.Rev.") . . Sir J. F. Stephen.
Basil Richard Ashe King.
Beaumont, Averil . . . Mrs. Marg. Hunt.
Bede, Cuthbert Rev. Edw. Bradley.
Bee-Master Dr. John Cumming.
Bell, Acton Anne Brontë.
" Currer Charlotte Nicholls (née Brontë).
" Ellis Emily Jane Brontë.
Bertall Albert D'Arnault.
**Bewick, Mary* Adel. Anne Procter.
Besieged Resident in Paris H. Labouchère.
Baltina Eliz. von Arnim.
Bibliophile Jacob Paul Lacroix.
Bickerdyke, John . . . C. H. Cook.
Bickerslaff, Isaac . . . Jon. Swift; and Steele in *Taiter*.
Bideford Postman . . . E. Caperne.
**Biglow, Hosea* J. Russell Lowell.
Buldings, Josh Henry W. Shaw.
Bodkin, Tammas . . . W. D. Latta.
Bolderwood, Rolf . . . T. A. Browne.

- *Bon Gaultier* Sir Theod. Martin and W. E. Aytoun.
**Bos* Chas. Dickens.
Braddon, Miss M. E. . . now Mrs. John Maxwell.
Breitmann, Hans . . . Chas. G. Leland.
**Brooke, Nelsie* Mrs. E. Ross.
Brown, Mrs. Geo. Rose.
Brown, Pisistratus . . . William Black.
Brown, Tom Thos. Hughes.
Browne, Matthew . . . W. B. Rands.
Browne, Phillis Mrs. Hamer.
**Brownrigg, Henry* . . . Douglas Jerrold.
Buntline, Ned E. Z. C. Judson.
Bystander Goldwin Smith.
C. Mrs. Southey.

**Yorke, Oliver* . . . F. S. Mahony.
Zadkiel . . . Lieut. R. J. Morrison.
**Zeta* . . . J. Anthony Froude.
Zeta ("Graphic") . . . John Lovell.
- Nordica, Mdme.*, the *prima donna*, is an American by birth, and received her early education at the Boston Conservatoire of Music, where she greatly distinguished herself. She afterwards proceeded to Italy to complete her training. Her chief triumph on the operatic stage has been her impersonation of the part of *Marguerite* in Gounod's *Faust*. Gounod is said to regard Mdme. N.'s *Marguerite* as second only to that of Mdme. Patti. Mdme. N. married some years ago Mr. Gower, now deceased.
Norman, General Sir Henry W., G.C.B., G.C.M.G., C.I.E., ex-Governor of Jamaica, has had a distinguished military career. He joined the Bengal army in 1844, and served through the *Indian Mutiny* of '57-59. Was present at the relief of Lucknow, where his horse was shot under him. Appointed in '83

the Governor of Jamaica, and, on the occasion of colonial opposition to the choice of Sir H. Blake (*q.v.*), Sir Henry received the Governorship of Queensland, which he assumed in April '89.

North, Colonel J. T., the "Nitrate King," is a native of Leeds, and owes his sobriquet to the fact of his having accumulated immense wealth by his speculations in nitrate mines in South America. In Jan. '89 he presented Kirkstall Abbey and grounds to his native town, and also made handsome contributions to the funds of the Leeds Infirmary and the Yorkshire College of Science. He received the honorary freedom of the borough Jan. 25th, '89. The Colonel is building for himself a very fine palace at Eltham in Kent. The ball which was given in honour of the attainment of the majority of his daughter ('89) was on an exceptionally magnificent scale.

North, Sir Ford, b. at Liverpool, 1830. Educated at Winchester and at Oxford. Called to the bar at the Inner Temple ('56). Obtained a large practice in the equity courts and at the Lancaster Chancery and Palatine Courts. *Q.C.* ('77). On the elevation of Mr. Justice Lindley to the Court of Appeal ('81), Mr. North was appointed a judge of the Queen's Bench Division of the High Court of Justice. He was subsequently transferred to the Chancery Division, for which his training has especially fitted him.

Northern Territory. That portion of South Australia (*q.v.*) lying north of 26° S. lat., and between 129° and 138° E. long. Annexed to the colony in 1863. S.W. capital Palmerston (on the noble harbour of Port Darwin). The outlet for a very large extent of country, and the commercial centre of the trade of the north coast. The Territory possesses a coast line, counting the chief inlets, of 2,000 miles. Watered by several navigable rivers. Is rich in minerals—gold, copper, silver, iron. The gold-bearing areas include both quartz and alluvial workings. Well adapted for tropical agriculture—maize, sugar-cane, indigo, tapioca, cinchona, coffee, rice. Considerable areas devoted to the pasturing of sheep and cattle, the native grasses being rich and nourishing. Timber of a varied character—eucalyptus, pines, palms, banksia, mangroves. There is increasing settlement, but population still very scanty, and labour unobtainable. Local administration, with a Resident and officials appointed by Government of mother colony. The telegraph runs overland from Port Darwin to Adelaide, and a through railway is projected. Consult Daly's "Life, etc., in the Northern Territory."

North-West Territories. A province or group of provinces of the Dominion of Canada, as yet hardly organised. Including Labrador, District of Keewatin, and Great Prairie Territory to Rocky Mountains; area 2,553,337 sq. m.; pop. 56,446, and 45,472 aborigines; taken as the region westward from Lake Superior to the Rocky Mountains, and northwards from the boundary to the 60° parallel, area 500,000 sq. m., a territory equal to the British Islands, France, and Germany combined. Capital Regina. Contain great lakes and large navigable rivers—the Mackenzie, Slave, Peace, Saskatchewan, among the chief. Great fertile region, similar in character to Manitoba, divided into districts: Assiniboia, 95,000 sq. m.; Saskatchewan, 124,000 sq. m.; Alberta, 100,000 sq. m.; Athabasca 122,000

sq. m. These are destined to become separate provinces. Resources enormous, agricultural, pastoral, mining. 10,000 miles navigable rivers. Railway across. — Administered by Lieut.-Governor and Council of five. Electoral districts in course of formation. General features, land laws, etc., as in Manitoba (*q.v.*) See CANADA; and for Executive Council, etc., see DIPLOMATIC. Consult Tuttle's "Our North Land," Adams' "Canadian North-West," etc.

Norwich, Rt. Rev. and Hon. John Thomas Pelham, D.D., Lord Bishop of, was b. in 1811, and educated at Westminster School and Christ Church, Oxford. He was successively rector of Burgh Apton, incumbent of Christ Church, Hampstead, and rector of Marylebone. Appointed Bishop of Norwich '57. He is uncle of the Earl of Chichester.

Nossi Bé. A small island on N.W. coast of Madagascar, held by France since 1843; and a flourishing trade-port.

Nossi Dambo. The native name of Madagascar (*q.v.*).

"Not Contents." See DIVISIONS.

"Notes and Queries." A medium of intercommunication for literary men, general readers, etc., was founded Nov. 49, by the late W. J. Thoms. Few literary undertakings of importance have since its establishment been concluded without its assistance. Office, Took's Court, Chancery Lane, E.C.

Notification of Infectious Disease. See SLESSION, sect. 79.

"Not Proven." A form of verdict in Scotch criminal trials which implies that, although the prisoner has not been proved to be guilty, yet neither has he been proved to be innocent. Its practical effect is the same as that of a verdict of "not guilty."

Noumea. Capital of New Caledonia (*q.v.*).

Nova Scotia. A province of the Dominion of Canada. It is a peninsula connected by narrow isthmus with New Brunswick. Incorporated with it is Cape Breton Island, formerly distinct colony. Area 21,731 sq. m.; pop. 449,572. Capital Halifax, pop. 40,000, a fine city and harbour, also an Imperial military and naval station. Divided into 18 counties.—The interior is a moderately elevated plateau, containing lakes. The rivers are short; the coast much indented, with many harbours. Cape Breton is hilly. There is much forest, and the country is a sportsman's paradise, filled with furred and feathered game, big and little. Between two parallel ranges of hills is a wide and fertile valley, embracing the entire length of Nova Scotia. The agricultural productions are limited. Wheat will not grow and corn will not ripen near the Atlantic and Gulf coasts, but the Bay of Fundy shore is a perfect garden, where the plum, the pear, apples, etc., come to perfection. Nova Scotia is in point of mineral wealth the richest province in the Dominion—productive coal and gold mines, manganese, gypsum, building stone, and (on Cape Breton Island) petroleum.—Administered by a Lieut.-Governor and Executive. The people elect a Legislative Council and a House of Assembly. The Province has 10 seats in the Dominion Senate and 21 in the House of Commons. Education receives some Government support, and is free and to some extent

compulsory.—**Industries** are agriculture, fruit-farming, dairying, mining, fishing, lumbering; and manufacture is progressing rapidly. Government uncleared lands are sold at 1s. 10d. per acre, and improved farms are often available at £1 to £2 per acre. The colony was originally a French one, and then called Acadia; ceded to England 1714; entered Dominion 1867. See CANADA; and for Executive Council, etc., see DIPLOMATIC. Consult Fream's "Canadian Agriculture," Small's "Canadian Industries and Manufactures," etc.

Nova Scotia Ship Railway. This extraordinary line, being made from the designs of Sir John Fowler, Messrs. B. Baker, and McKetchom, by Mr. J. G. Meigs, runs from Fundy to the Gulf of St. Lawrence, some 17 miles. It is quite straight, laid with 110-lb. steel rails (2 pairs), 4 ft. 8½ in. gauge, and 16 ft. apart. The sleepers are "close spaced," and the heaviest gradient is 1 in 509. At each end of the line vessels up to 2,000 tons will be raised 40 feet on 16-wheeled trucks resting upon hydraulic lifts. It was reported about the middle of April '89 that the **Canadian Government** had granted a subsidy of £35,000 a year for twenty years to this line owned by what is known as the Chignecto Ship Railway Co. According to the Government requirements the weight of the vessel and cargo transported is not to exceed 2000 tons dead weight, or vessels of 1000 tons gross register laden.

Nubar Pasha. Egyptian statesman, Armenian by nationality, Christian by creed, b. at Smyrna 1825. Sec. to Boghos Bey (Mohammed Aly's premier) '42. Married '49, dau. of Kevosh Bey Eramian. Sec. to Ibrahim Pasha at Paris '58, and Cairo '49. Dismissed on accession of Abbas Pasha, '51. Egyptian Minister at Vienna '54. Entrusted with negotiations for Suez Canal '57-60. Created by Ismail Minister of Foreign Affairs '66. Negotiated treaty with Constantinople giving Ismail title of Khedive and to Egypt practical autonomy, '67. Negotiated judicial reform establishing International Tribunals '69-74. Dismissed from office '74. Formed Anglo-French Ministry with Wilson and Blignieres '78. Dismissed from office by Ismail's *coup d'état* '78. Consulted by Dufferin '81. On Cherif's refusal to abandon Soudan called to office, and formed ministry in January, '84. Disputes with Baring in London, '87. Dismissed by Khedive June '88.

Nurses. The British Association of, is a professional organisation of trained nurses, with a membership of over 2500. Its objects are to improve the status of the nursing profession and to carry out benevolent schemes for the advantage of members. It seeks incorporation by Royal Charter, with power of registering nurses and midwives. There is at present no means of preventing any woman, however ignorant of the duties of nursing, from calling herself a trained nurse, and obtaining employment as such, to the possible danger of the patient and the public and the discredit of the medical attendant. The scheme of the association is that the Charter should authorise the formation of a register for nurses, under the control of an influential Board of

medical men and hospital matrons; that upon this register should be entered the names only of those who hold certificates of efficiency, their addresses, the date of their registration, and the name of the Nurse's training school which granted the certificate; that from this register should be removed the name of anyone who should be considered by the Board to have shown herself unworthy of trust as a nurse; and that the register should be published yearly so that the authoritative information it would contain should be readily accessible to all. The scheme is thoroughly supported by the *Lancet* (*vide* issue July 6th), but is opposed by a section of the nursing profession on the ground that "the proposed enrolment of nurses on a common register would lower the position of the best trained nurse, be detrimental to the advancement of the teaching of nursing, disadvantageous to the public, and injurious to the medical profession." In July '89, a meeting was held at the **Mansion House**, at which Dr. Crichton Browne, Mr. Savory, Mr. Brudenell Carter, Dr. Priestly, Sir Hy. Acland, Professor Marshall, Dr. Pavy, and other eminent medical men supported the movement. See: Miss C. J. Wood, 8, Oxford Circus Avenue, Oxford St., W.

Nurses. The National Pension Fund for. This fund, which was founded by Mr. Henry C. Biddett in October '87, and was incorporated February '88, may be considered to hold the position of an **Assurance Company for nurses.** Its successful establishment is in a large measure owing to the generosity of Lord Rothschild, Mr. Henry H. Gibbs, Mr. E. A. Hambro, and Mr. Junius S. Morgan, who each deposited £5,000 with the Accountant-General in Chancery as security for the annuitants and policy holders. The fund is open to all responsible paid officials connected with hospitals and kindred institutions. The chief object of the fund is to give nurses an absolutely safe means of providing an allowance during sickness, and a certain income when their strength is declining. In '89 it was announced that the four gentlemen named above had most munificently placed the sums mentioned at the permanent disposal of the fund. Office, 8, King St., Cheapside, E.C. See., Mr. Philip Grove.

Nuwara Eliya. An elevated plateau (6000 ft.) and a favourite sanatorium in Ceylon (*q.v.*).

Nyassa. A great lake in the south-east of Central Africa, 350 miles long, averaging 38 broad; 1,600 ft. above the sea level, average depth over 100 fathoms, teems with fish. Encircled by lofty mountains, rising 10,000 feet—**Livingstone Mountains.** Scotch settlement at **Livingstonia**, on south. Steamer on lake. Settlers growing sugar and coffee. Smaller lake, **Shirwa**, isolated to south. Outlet the **Shire** river, affluent of **Zambesi**. There are several British missions and trading settlements about these lakes. A road has been made from Nyassa to Tanganyika, where there is also a steamer; and another road is in process of construction from Nyassa to Dar-es-Salam, on the Suaheli coast. The blighting Portuguese influence is little felt here; and the gradual formation of a British colony, independent of any government, is a matter for reflection. See BLANTYRE, ZAMBESI, MOZAMBIQUE, etc.

Oaks, Ths. See **Turr.**
Oath, Parliamentary. See **House of Commons.**

Oaths Act, '88. See **Session, sect. 12.**
Obituary (Dec. '88 to Nov. 21st, '89).

*. The date of decease is given after each name, and in cases in which it could not be exactly ascertained the letter *a* is affixed to denote that the death took place at about that time. The italic figures after each name indicate the age of deceased. Where no mention is made of the year, the death took place in '89.

Hartwell, Sir Brodrick (Dec. 11), '88, '75

Hughes, Rev. Sir Thomas, of Little Billing Rectory, Northamptonshire; vicar of S. Tawton '60-72 (May 22), '88

Hughes, Sir Frederick, 2nd s. of late Rev. Robert Hughes; by his uncle, Sir Thomas Collingwood Hughes, rector of Little Billing, Northamptonshire; died at Launceston, Tasmania (Feb. 1), '71

Meredyth, Sir Henry, D.L. and J.P. co. Meath (Aug. 30 a)

Donel, Sir George Clendining, 5th Bart.; formerly Lieut. in 62nd Foot; High Sheriff of Mayo '57 (Jan. 22), '66

Oxenden, Sir Henry Chudleigh (Aug. 10 a), '95

Pearce, Sir William, M.P. (Dec. 18), '88. See COMMONS, HOUSE OF.

Peto, Sir Samuel Morton, civil engineer and contractor; formerly of Grissell & Peto and Peto & Betts; D.L. for Suffolk and J.P. for Middlesex, M.P. for Norwich '47-55, Finsbury '59-65, Bristol '65-8 (Nov. 13), '80

Stewart, Sir Augustus, a barrister; J.P. and D.L. co. Donegal; High Sheriff '83 (Aug. 26), '67

Stirling, Sir Walter G., D.L. and J.P. Kent and Middlesex (Dec. 1), '88, '86

Swale, Sir Benjamin, 9th Bart. (Oct. 9), '73

Walrod, Sir John, 1st Bart.; D.L. and J.P. Devon and J.P. Somerset; High Sheriff Devon '74; M.P. for Tiverton (C) '65-8 (April 23), '70

Walseley, Sir Clement, 7th Bart., J.P. and D.L. co. Carlow (Oct. 16)

M.P.s.

(See "COMMONS, HOUSE OF," in each case.)

Anderson, C. H., Elgin and Nairn (Aug. 29)

Bright, Rt. Hon. John, M.P., statesman, was b. at Greenbank, near Rochdale, Nov. 16th, 1812. Elected for Durham '43, and afterwards became member for Manchester. Took a very prominent part in the Free Trade movement, and was associated with Richard Cobden in

his struggle for the Repeal of the Corn Laws. Actively denounced the Crimean War. Lost his seat at Manchester after the defeat of Lord Palmerston, and became member for Birmingham, which he represented till his death. In '68 he became President of the Board of Trade, but serious illness caused him to resign this office. On his recovery he re-entered Mr. Gladstone's Cabinet as Chancellor of the Duchy of Lancaster, an office he also held in '80. Resigned office on the eve of the bombardment of Alexandria. His views differing from Mr. Gladstone's Home Rule Bill caused Mr. Bright to act with the Unionist party. Fine tributes to his memory were delivered in both Houses on the announcement of his death (March 27), '77

Dickson, Major, Dover (July 4)

Ewart, Sir William, Bart., M.P. (July 30). See BARONETS, *supra*.

Firth, J. F. B., Dundee, Deputy Chairman of the London County Council, died suddenly while in Switzerland (Sept. 4)

Fitzwilliam, Hon. William John Wentworth, Peterborough (Sept. 11)

Menzies, Robert Stewart, E. Perthshire (Jan. 25)

Peacock, R., Lancashire, Gorton Div. (March 4)

Pearce, Sir William, Bart., sat for Lanarkshire Govan Div. (Dec. 18)

Powell, W. R. H., W. Carmarthenshire (June 26)

Robertson, Sir William Tindal, Brighton (Oct. 6)

Ross, Major A. H., M.P. for Maidstone (Dec. 3), '88. See COMMONS, HOUSE OF

Trotter, Lieut.-Col. H. J., Conservative Member for Colchester, *ex.* s. of the late Lieut.-Col. Trotter; ed. Oriol Coll., Oxford, where he graduated M.A. ('63), D.L. and J.P. for Durham County, F.S.A. and Director of the G.E. and N.B. Railway Companies; elected in '85 for Colchester (Dec. 5), '88, '88

Ex-M.P.s. (Not included in the above.)

Crawford, Robert Wigram, formerly one of the four M.P.s. for City of London; a director of the Bank of England since '50; head of firm of Crawford, Colvin and Co., East India merchants; Governor of the Bank of England '70, member of Lieutenancy of the City of London and Fishmongers' Co. (Aug. 3), '75

Young, Michael, Liberal candidate for Central Hackney, and well known for his advocacy of temperance (Oct. 21)

Young, W., secretary of the Society for the Abolition of Compulsory Vaccination (Sept. 15)

Obligation Days. See DAYS OF OBLIGATION.

Oboock. A French dependency in **Tajurah Bay** (*q.v.*), on east coast of Africa.

Obstruction, Parliamentary. See PARLIAMENTARY PROCEDURE for the rules submitted in '87, and PARLIAMENTARY SESSION for the proceedings upon them *ed.* '88.

O'Connor, Thomas Power, M.P., b. at Athlone, 1848; graduated M.A. Queen's University. Connected with the press from an early age, first in Dublin and afterwards in London. Was elected for Galway at the general election of '80 as a Home Ruler, and took a prominent part in the debates in Parliament. Visited America for the Land League in '81. Was present at the Irish-American Convention of '81, with Mr. Healy (*q.v.*) and Father Sheehy. Returned to England in May '82. Elected for the Scotland division of Liverpool, and for Galway borough—in both cases by large majorities—in '85. Sits for the former. Has written "Lord Beaconsfield: a Biography," "Gladstone's House of Commons," "The Parnell Movement," "Dead Man's Island," and many tales and essays. President of the National League in England and Scotland. Was the founder, in '88, and the first and present editor of the *Star* (*q.v.*).

October Handicap. See TURF.

Odelsthing. The name of the upper division of the Norwegian House of Representatives. See STORTHING.

Odessa. A rapidly developing Russian port on the Black Sea. Although less than a century old, its population is 190,000, and in point of size it ranks as fourth city in the Russian empire. Distant 1,137 miles from St. Petersburg and 933 from Moscow, Odessa has good ground for regarding itself as the capital of Southern Russia. It has derived its rapid growth largely from the export of grain. Twenty years ago the total exports were valued at £4,000,000; they now exceed £12,000,000, in spite

of the competition of other Black Sea ports and the rivalry of America and India. Recently a new trade feature has been introduced. Tea and other goods from the East, that formerly made their way to London, and were thence despatched to Russia, are now conveyed direct through the Suez Canal to Odessa by the vessels of the Moscow volunteer fleet and the Black Sea Steam Navigation Company.

Official Secrets Act, '89. See **Session, sect. '89.**
Ohio River Bridge. The Wheeling and Harrison Railway Co., U.S., on Oct. 10th, '88, commenced operations on the **Union railway bridge** over the Ohio river at Wheeling, West Virginia, a work which is to cost several million dollars. The bridge, which was designed by Mr. Gustav Lindenthal, C.E., who is the engineer, will be 2100 feet long, with a channel span of 535 feet. It is in connection with the new terminal system for the railways centring at Wheeling, and is to be completed with its approaches in Jan. '90. The terminal arrangements include a tunnel 1600 ft. long, and another bridge over Wheeling Creek.

Oil Islands. In the Indian Ocean. Part of the **Chagos Archipelago** (*q.v.*).

"Old Style." See article **CALENDAR.**
Oliphant, Mrs. Margaret, b. near Musselburgh, Midlothian, 1828. She is one of the most vigorous and popular of modern novelists, and in addition to her numerous works of fiction (the first of which—"Passages in the Life of Mrs. Margaret Maidland of Sunnyside"—established her reputation before she was twenty-one), she has contributed "Dante" and "Cervantes" to the well-known series "Foreign Classics for English Readers," and written "S. Francis of Assisi," "The Makers of Florence," and "Literary History of England." In '88 she published "The Second Son," and a "Memoir of Principal Tulloch, D.D.," and in '89 "Neighbours on the Green"; "Lady Car: the Sequel of a Life"; "A Poor Gentleman," and a biography of "Laurence Oliphant." Her novels are remarkable for their accurate delineation of Scottish characteristics. Her maiden name was Wilson.

Omnibus Licensing, Law on, in '89. The Nottinghamshire magistrates decided (Oct. 10th) that an omnibus is not a "hackney carriage" within the meaning of the Act, and is liable to pay a duty of £2 2s. as a stage carriage instead of 15s. as a hackney carriage. The magistrates expressed their willingness to state a case, as the question is an important one to omnibus and tramcar owners throughout the country. On the other hand, at the Westminster Police-court (Nov. 2nd) Mr. Sheil refused to hold that an omnibus did not come within the term "hackney carriage," and dismissed the summons taken out by the Excise authorities with costs. He also granted a case. In this second action the magistrate also granted a case for the consideration of the High Court of Justice.

One Thousand Guinea. See **TWENTY.**
Onslow, William Hillier, K.C.M.G., 4th Earl of; b. 1853; educated at Eton, and Exeter Coll., Oxford. Succeeded to the peerage 70. Is High Steward of Guildford. Appointed Lord-in-Waiting to H.M. '80, and again in '86. One of the delegates at the Conference on the Sugar Question '87. His lordship formed one of the Lords Committee on the **Sweating System**, '88. Lord Onslow was Under-Sec. of State for the Colonies from '87 to '88, and Parlia-

mentary Sec. to the Board of Trade Feb. to Nov. '88, in which latter month he was gazetted **Governor of New Zealand** in succession to Sir W. D. Jervois. His lordship has quickly attained great popularity in New Zealand, and the illness of his son, in '89, excited much sympathy.

Ontario, a province of the Dominion of Canada. It extends along the north shores of the great lakes, and is important as containing the Dominion metropolis, **Ottawa** (pop. 118,403). Provincial capital **Toronto**, pop. 86,445, on Lake Ontario, the second city in Canada in wealth and population. Besides the two capitals, important towns are Hamilton (pop. 41,280), London (pop. 26,047), Guelph, St. Catherine's, Brantford, Belleville, and Chatham.—Divided into some forty-six established counties, eighty-eight electoral districts, etc. The peninsular and southern portions of the province very fertile. Fine scenery on the St. Lawrence and Ottawa. Behind are elevated tracts with immense stretches of forest, abounding in game, large and small, furred and feathered. Besides the shore-line of the great lakes, there are many smaller lakes and innumerable streams. **Niagara** River and Falls, between Lakes Erie and Ontario, divide the province from the United States. Climate very healthy; winter cold, with heavy snow and ice, but dry and pleasant. Summer warmer than in England, admitting of a richer flora. The extreme south-west of the province is the track most favoured by climate of any in Canada; the peach ripens in the open air, and the finer kind of grapes grow well. The most important mineral products of Ontario are petroleum, salt, gypsum or "plaster," silver, copper, iron, and phosphate.—**Administered** by a Lieut.-Governor and responsible Ministry. There is only one Chamber, the Legislative Assembly, elected for four years by 88 constituencies. Ontario has 24 seats in the Dominion Senate and 92 in the House of Commons. Religion not State-aided. Education very good: university, high schools, elementary public schools—the latter in the hands of local boards, supported by rates, free and compulsory.—**Industries** comprise a good deal of manufacture of various kinds. Agriculturists grow wheat and other grain, hemp, tobacco, hops, etc. Apple and peach orchards are extensive, the fruit export increasing rapidly. Vineyards are being more planted, though the wine made is not yet exported. Mining employs many hands. The fresh-water fisheries are valuable, and pisciculture is attended to. Cheese-making is carried on in 470 factories, dairy stock numbering nearly two million head. There is an agricultural college at Guelph. The timber trade is large. Homesteads are granted free under certain conditions, but of the twenty million acres already occupied much is very valuable, and land costs £4 to £20 per acre in settled districts.—Ontario, called Upper Canada, became British after the fall of Quebec and the formal cession in 1763. It joined with other provinces to form the Dominion in 1867. See **CANADA**, and consult Canadian Almanack, '90, and "Commercial Geography" by Prof. Zehden (trans. F. Muirhead); and for Executive Council see **DIPLOMATIC.**

Opium Trade, Society for the Suppression of. Formed 1874. Object: Suppression of the opium trade between India and China, by abolition of poppy cultivation under Government licences in Northern India, and by

arrangement with Native States, on whose exports of opium a transit duty is now levied. Also suppression of the opium trade in India, Straits Settlements, etc., except for legitimate medical use. **President**, Sir Joseph W. Pease, M.P. See, J. G. Alexander, LL.B. **Office**, Broadway Chambers, Westminster, S.W.

Opium Traffic. See **SECTION**, sect. 42.

Opportunists. See **FRENCH POLITICAL PARTIES**.

Orange Free State. An independent Dutch republic in South Africa. It has Cape Colony on S. and S.W., Bechuanaland on N.W., Transvaal on N., Natal on E., Basutoland on S.E. **Area** estimated at 41,500 sq. m.; **pop.** 133,518, of whom 61,022 are whites. It is divided into 17 districts. **Capital**, Bloemfontein; **pop.** 2567. Other centres are Ladybrand, Winburg, Kroonstad, Harrismith, Fauresmith, etc. The State is mainly pastoral, scarcity of water rendering great part of it unfit for agriculture. **Principal products** are wool, hides, ostrich feathers, also diamonds and garnets. There are rich coal-mines. Gold was found in '87. Ostrich-rearing is being developed. Executive vested in **President** (Judge Reitz, elected '89), elected every five years by universal suffrage, and a Council appointed by the Volksraad. There is also a Landrost appointed to each of the districts by the President, if confirmed by the Volksraad. The latter consists of 56 members, elected by universal suffrage for four years, half of whom vacate their seats every two years. Roman-Dutch law prevails. There is a Supreme Court of three judges, and a Circuit Court. There is no standing army, except a small body of artillery at the capital; but about 14,000 men are on the rolls as liable to be called out in case of war. The Dutch Reformed Church is the dominant religion. The State devotes £12,000 a year to education. Estimated revenue for '88-9, £148,200; expenditure, £144,534; debt, £85,000. Commerce passes through Natal and Cape Colony: statistics included in theirs. Imports for '86 estimated at about £1,000,000, exports at £2,000,000 (chiefly wool, hides, diamonds, and ostrich feathers). The capital has telegraphic communication with Natal and Cape Colony. The State is, generally, prosperous and orderly. It was formed in 1836-40, when Dutch Boers, becoming disaffected towards the new British Government at the Cape, "trekked" northward into the wilds in large numbers. Their outrages on the natives, and the wars that resulted, obliged the British authorities to annex Natal in '49, and the Orange River Sovereignty—as it was then called—in '48. However, by convention in '54, it was declared to be "a free and independent state," and has since remained so under the title of Orange Free State. A constitution was proclaimed in that year, and was amended in '66 and '79. During '89 the Volksraad approved of the proposed railway extension to Bloemfontein and Harrismith, its further extension to the Vaal river remaining contingent on the conclusion of a convention with the Transvaal. At a conference between the Free State and South African Republic a treaty for mutual defence and the construction of railways was signed. A Customs Union was arranged with Cape Colony. For Ministry, etc., see **DIPLOMATIC**. Consult Norris Newman's "With the Boers," Sandeman's "Eight Months in an Ox-wagon," Weber's "Quatre Ans au Pays des Boers," Petherick's "Catalogue

of York Gate Library," "Cape of Good Hope Directory, '89," Theal's "History of the Boers," Silver's "Handbook to South Africa," etc.

Orchardson, William Quiller, R.A., b. 1835, first exhibited in Edinburgh, his native city, under the auspices of the Royal Scottish Academy. Subsequently he came to London. Elected an Associate of the Royal Academy (1868). His "Challenge" and "Christopher Sly" at the Paris Exhibition secured the approval of the French critics, and obtained for the painter one of the few medals awarded to British artists. His "Napoleon I. on Board H.M.S. Bellerophon," exhibited at the Royal Academy in 1880, was purchased under the terms of the Chantrey bequest. R.A. (1877). His latest great work, "The Young Duke," was the picture which attracted most attention at the Royal Academy '89.

"Order of the Day," in parliamentary language, is a Bill, or other matter, which the House has ordered to be taken into consideration on a particular day.

Ordinance Survey Office is a department under Government for the preparation of maps and plans of the United Kingdom, which are issued on various scales. The survey was commenced many years ago, and is approaching completion. A revision of the survey has been undertaken, and is now in progress in Yorkshire and Lancashire. The Chief Office is at Southampton. The Director General is Col. Sir Charles W. Wilson, K.C.B., K.C.M.G., R.E.; assisted by Lieut.-Col. John Farquharson, R.E. (executive officer); Major F. F. Washington, R.E.; Major C. R. Condon, R.E., and others.

Ordinance, Surveyor-General of the See WAR OFFICE, ARMY, etc.

Oriental Languages, English School for Living, is one of the schemes in connection with the Imperial Institute (q.v.). Arrangements were made ('89) for its organisation for giving instruction in modern Oriental languages as well as the pursuit of studies relating to the history, etc., of the country where these languages are spoken. A strong committee has been formed, including, as members, Sir Frederick Abel, Prof. Henry Morley, and Sir Charles W. Wilson.

Orientalists, Congress of, was founded, '73, by M. Léon de Rosay, Prof. at l'Ecole Spéciale des Langues Orientales, Paris. Its first meeting was held at the Sorbonne, Sept. '73. The second meeting was held at the Royal Institution, London, '74 (president, Dr. Samuel Birch); the third at St. Petersburg University, '76 (president, Prof. Grigorovitch); the fourth at Florence, '78 (president, Prof. Amari); the fifth at Berlin, '81 (president, Prof. Dr. Dillmann); the sixth at Leyden, '83 (president, Prof. Kuennen); the seventh at Vienna, '86 (president, Archduke Rainer, brother of the Emperor of Austria). The eighth and latest was held at Stockholm, Sept. and to 7th, '89. An adjourned session at Christiania, Sept. 9th to 11th, was opened by the King of Sweden and Norway in person. The active and genial interest shown by the sovereign and several members of the royal family in all the proceedings of the Congress distinguished it from all its predecessors. M. d'Ehrenheim was the president; and the Congress was divided into the several sections of (1) Semitic and Islam; (2) Languages and Literatures of Islam; (a) Semitic languages other than Arabic, text, and cuneiform inscriptions; (a) Aryan languages; (3) African languages;

including Egyptology; (4) Central Asia and the extreme East; and (5) Malayan and Polynesian languages. The attendance was unprecedented, nearly four hundred persons being present. On the whole no such reception has ever been accorded to a gathering of Oriental scholars; a result for which the members were indebted to the exertions of Count Landberg, the general secretary of the Congress, and to the liberality of the most scholarly of living sovereigns, Oscar II., and his sympathetic people.

Ormerod, Eleanor A., consulting entomologist to the Royal Agricultural Society, and lecturer on entomology at the Royal Agricultural College, Cirencester, is a native of Cheshire. She is one of the first of living authorities on the history and habits of insects, and has assisted Mr. Whitehead, the entomologist to the Agricultural Department, in the preparation of the official reports on insects injurious to crops, trees, and vines, periodically issued by the Department, the last (12th) being issued in '89.

Ornaments Rubric. (See RITUALISM.) This rubric, which appears in the English Church Prayer Book immediately before the "Order for Morning Prayer," is the *crux* upon which turns the whole controversy with respect to Ritualism in the Church of England. It reads as follows:—"And here it is to be noted, that such ornaments of the church, and of the ministers thereof, at all time of their ministrations, shall be retained and be in use, as were in this Church of England, by authority of Parliament, in the second year of King Edward the Sixth." The ornaments referred to include all the furniture, necessities, and decorations of a church. The authority of Parliament involves, not merely the statutes then in existence relating to public worship, but such "other order" as may have been taken by authority of the Crown. It is contended, on the one side, that this rubric (settled in 1562) revives the Act 25 Henry VIII., xix. 7, which decrees that all the old canon laws and ordinances which do not contradict any civil statute or oppose the royal prerogative are still to remain in force; also Henry VIII.'s Injunctions of 1545, the Orders in Council of the first and second years of Edward VI., and the Act authorising the Prayer Book of 1549. On the other hand, it is contended that "other order" was taken in the reign of Elizabeth which puts a different construction upon the rubric. The preamble of the *Advertisements of Elizabeth* (as this order is termed) declares:—"The Queen's Majesty, calling to remembrance how necessary it is that the State Ecclesiastical be conjoined in one uniformity of rites and manners in open prayer and ministration of Sacraments, . . . hath, by her letters, directed unto the Archbishop of Canterbury and Metropolitan, enjoined that some order be taken whereby all diversities and varieties among them of the clergy and people . . . might be reformed and repressed, and brought to one manner of uniformity throughout the whole Realm." This has been adjudged in the ecclesiastical courts to modify the comprehensive significance of the Ornaments Rubric of 1562. The year '89 has witnessed a partial *rapprochement* between Church parties on the basis of a permissive interpretation of the rubric, but this *modus vivendi* is repudiated by the extreme Evangelicals.

Oruba. An island off the Venezuelan coast. Is a Dutch possession, under the government of Curaçao. Gold has been found on it. See COLONIES OF EUROPEAN POWERS.

Oscar II., King of Sweden and Norway, b. 1829. Is a great-grandson of Napoleon I.'s famous general, Marshal Bernadotte, the first King of the new independent kingdom of Norway. He ascended the throne in '72, in succession to his brother Charles XV. He is an excellent scholar and writer, and has translated Goethe's "*Faust*" into Swedish. Issued in '88 a volume of minor poems under his *nom de plume* of "Oscar Frederik." He married, in '57, the Princess Sophia of Nassau, by whom he has as issue four sons: Gustaf, Duke of Wermland; Oscar, Duke of Gotland (who in '89 married Miss Ebba Munck, dau. of Col. Munck); Carl, Duke of Westergötland; and Eugene, Duke of Nerike. In Aug. '88 his Majesty visited the Emperor William II. at Berlin. His address, delivered in September last, on the occasion of the meeting of the *Orientalists' Congress* (q.v.) in his capital, was worthy of his literary reputation.

Osmán Nuhur Pasha, Marshal. Celebrated for the defence of Plevna against the Russians (1877); b. in 1832 in Asia Minor. He took part in suppressing the rebellions of Syria (1860), of Crete (1867), and the Yemen (1874). After his gallant resistance and the fall of Plevna (1877), he returned to Constantinople, and became Commander-in-Chief of the Imperial Guard (1878), Governor-General of Crete, Minister of War 1878-82.

Ottawa. Capital of the Dominion of Canada (q.v.), pop. 34,753. It is situated on the Ottawa river, province of Ontario, and is a handsome city, containing some of the finest buildings in all America. *Entrepôt* of the timber trade.

Ottoman Empire. See TURKEY and for Ministry, etc., see DIPLOMACY.

"Ouida" (Mlle. Louisa De la Ramée) was b. at Bury St. Edmunds in 1840. She commenced when very young to contribute to *Colbourn's New Monthly*. The scenes of many of her stories are laid in Italy, where she is now a resident. Her works are very numerous, and comprise the following amongst many:—"Held in Bondage," "Chandos," "Idalia," "Under Two Flags," "Folle Farine," "In a Winter City," "In Maremma," "Bimbi," "Wanda," "Othmar," and "Guilderoy" '89. She is a most romantic and impassioned writer, and her novels abound with true poetical feeling. "Ouida" is also an artist. *The Woman's World* (May '89) contained reproductions of some of her paintings of Italian scenery. She adopted the *nom de plume* of "Ouida" in memory of her childish pronunciation of her own name "Louisa."

Oulesse, Walter William, R.A., b. in Jersey 1848. Educated at Victoria Coll. Becoming a student of the Royal Academy ('64), he took a silver medal in the Antique school. He has constantly exhibited at Burlington House since '69, his first works being subject pictures, of which the principal were "*Home Again*," and "*An Incident in the French Revolution*." In '72, on the advice of Mr. Millais, Mr. Oulesse took to portrait painting, and has since devoted himself with great success to that branch of his profession. He exhibited a portrait of "G. H. Pope, Esq.," at the Royal Academy last

year. Created Chevalier of the French Legion of Honour Nov. '89. Elected R.A. ('81).

Owen, Rev. John, M.A., the recently appointed Dean of St. Asaph, has been for some time warden and head-master of the College, Llandoverly. Mr. O. was a scholar of Jesus Coll., Oxford, where he obtained a 2nd class in Classical and Mathematical Moderations, and a 2nd class in Finals in '76. Mr. O. formerly was tutor and Welsh professor at St. David's Coll., Lampeter.

Owen, Sir Richard, K.C.B., F.R.S., the veteran comparative anatomist, b. at Lancaster 1804. Educated at Lancaster Grammar School and the Medical Schools of Edinburgh Univ. and Paris. After being in practice for a short time as a surgeon, in London, he became, through the influence of Dr. Abernethy, assistant curator of the Hunterian Museum. In '34 he was appointed Professor of Comparative Anatomy at St. Bartholomew's Hospital, in '36 first Hunterian Professor in the same subject at the Royal College of Surgeons, and in '56 Superintendent of the Natural History Department in the British Museum. Prof. O., from the examination in '39 of a fossil bone sent to him from New Zealand, propounded a theory of the existence, in remote ages, of a bird more gigantic than the ostrich; and the accuracy of his theory was subsequently, by the discovery of the whole fossil, established beyond doubt. This led him to the adoption of his famous theory of the extinction of species. He is a voluminous writer on the subject to which his scientific researches have been successfully devoted. He is an honorary graduate of several universities, a corresponding member of various foreign scientific associations, and in recognition of his eminent services was ('73) created a K.C.B. An interesting interview (Nov. '89) with Sir R. O. appeared in the *Pall Mall Gazette*.

Owens College, Manchester. John Owens, a liberal Churchman, vexed with the tests at the Universities, bequeathed, on his death in 1848, £98,654 for the purpose of founding this college, which commenced with 62 students. In '72, when their number had risen to 337, the old Quay Street buildings became too small, and vieing with Glasgow University extension, the Owens College Extension Fund was started, and reached £211,152; the old buildings being sold for £13,000. Present era of college history commences with the opening of the new buildings and the amalgamation with the Manchester Medical School in '73. Further and rapid development was promoted by the Clifton bequest of £21,572, and the yet more princely Beyer bequest of £107,000 in '76. Since that date, also, bequests have been very numerous, including the Wrisley, Asa Lees, Mothersill, and Phillips, bequests, amounting to £10,000 apiece, and several others, ranging from £500 and less. In '83 further additions to the college buildings became necessary, and were built, and, four years later, the new Beyer Laboratories and the Natural History Museums were erected, at a cost of £80,000. In '88 the Sir Benjamin Whitworth bequests to the College (supplemented by the liberality of his residuary legatees) amounted to over £100,000, of which about £60,000 was devoted to building and partial endowment of a hospital in connection with the Medical School. Total students '89: 846, composed of 405 art students, 67 women, and 380 medical students. The admission of women was sanctioned by the Extension Act, though contrary to the founder's

instructions. There are two halls of residence, the "Hulme," (conducted on Church lines) and the "Dalton," both for men only. The College receives annually £1800 from Government, and £1000 from the Manchester Hulme Trust. Further generous arrangements were made in '89 by the residuary legatees of Sir B. Whitworth for the success of the College. Principal registrar, H. W. Holder, M.A. Consult Thomson's "History of Owens College."

Oxford and Cambridge Boat Race. See AQUATICS.

Oxford and Cambridge Cricket Match. See CRICKET.

Oxford and Cambridge Locals. Promoted by the delegates of the sister Universities, for the examination, classification, passing or rejection of pupils; the Oxford being held in June, the Cambridge in December. The pupils are divided into Seniors, over fifteen and under eighteen, and Juniors under fifteen years. The examinations are held at various centres throughout the United Kingdom, each centre being presided over by a secretary, and the examinations conducted by an examiner sent from the University. In the results the pupils are placed in Class I., II. or III., according to merit; or simply catalogued alphabetically as having satisfied the examiners, the names of the unsuccessful being omitted. Trinity College, London, has also instituted Local Examinations.

Oxford, County Council for. See COUNTY COUNCILS.

Oxford, Rt. Rev. William Stubbs, Lord Bishop of, the 32nd bishop, was ed. at Ripon grammar school and Christ Church, Oxford, where he graduated 1st class Lit. Hum. and 3rd class Math. (1848), became a Fellow of Trinity College, and proceeded M.A. (1851), D.D. by decree of Convocation (1879). Ordained deacon (1848), and priest (1850), by the then Bishop of Oxford. **Regius Professor of Modern History at Oxford** (1886), and has held various other appointments of importance at the University. Author of many learned works, amongst which are "Registrum Sacrum Anglicanum," "Select Charters and other Illustrations of English Constitutional History, from the Earliest Period to the Reign of Edward I.," and "The Constitutional History of England in its Origin and Development." Formerly his lordship was vicar of Navestock, Essex (1850-67); Examiner in the School of Law and Modern History (1865-66), Select Preacher (1870), Examiner in the School of Theology (1871-72), and of Modern History (1873-76, and '81); rector of Cholderton, Wilts (1875-79), Canon of St. Paul's (1879-84). Consecrated Bishop of Chester (April 25th, 1884) and translated to Oxford in '89. His lordship has recently undertaken important work for the Deputy Keeper of the Public Records. At Diocesan Conference (Sept. '89), he delivered an address on "Lay Help."

Oxford University. This seems to have grown up in the twelfth century, and is one of the three oldest universities of Europe, the other two being Paris and Bologna. The number of students seems to have greatly varied at different periods of its history, and now is about 3,000, it having received considerable impetus from the great Tractarian movement, and the reforms introduced by the University Commissions. By the Oxford Reform Act (1864) the present constitution was fixed. The government of the University is in the

hands of three bodies—the **Hebdomadal Council**, of about twenty members; **Congregation**, which includes all resident graduates; and **Convocation**, which is made up of all graduates whose names are on the register. The following is the list of colleges in the University: **Founded (1249), University—Head, J. F. Bright, D.D.—Undergraduates, 110; (1262), Balliol, Benjamin Jowett, M.A., 261; (1270), Merton, Hon. G. C. Brodrick, D.C.L., 119; (1314), Exeter, W. W. Jackson, M.A., 141; (1326), Oriel, D. B. Monro, M.A., 99; (1340), Queen's, J. R. Magrath, D.D., 134; (1386), New, J. E. Swell, D.D., 219; (1427), Lincoln, W. W. Merry, D.D., 55; (1437), All Souls, Sir W. R. Anson, D.C.L., 4; (1456), Magdalen, T. H. Warren, M.A., 163; (1509), Brasenose, C. B. Heberden, M.A., 111; (1516), Corpus, T. Fowler, D.D., 84; (1532), Christ Church, H. G. Liddell, D.D., 264; (1554), Trinity, H. G. Woods, M.A., 145; (1555), St. John's, J. Bellamy, D.D., 122; (1571), Jesus, H. D. Harper, D.D., 70; (1613), Wadham, G. E. Thorley, M.A., 99; (1624), Pembroke, Evan Evans, D.D., 64; (1714), Worcester, W. Inge, M.A., 119; (1869), Keble, Robt. James Wilson, 168; (1874), Hertford, H. Boyd, D.D., 88. **Halls, (1269), St. Edmund's, E. Moore, D.D., 43; (1325), St. Mary, D. P. Chase, D.D., 35; (1392), "Non-collegiate,"** and students at private Halls, 255: Total, 2,072. Since 1868 students have been enabled to become members of the university without joining any college or hall; they are known as "**Non-collegiate.**" In 1880 arrangements were made for the affiliation of provincial colleges, of which privilege St. David's College, Lampeter, University College, Nottingham, and Firth College, Sheffield, have availed themselves. The examinations for the degree of **Bachelor are Responsions****

(Smalls), **First Public Examination** (Moderations, Honours, or Pass), **Second Public Examination** (Finals, Honours, or Pass). Residence for twelve terms is required, of which there are four in the year. Honours may be taken in **Litteræ Humaniores** (Ancient History and Philosophy), **Mathematics**, **Jurisprudence**, **Modern History**, **Theology**, **Natural Science**, and **Oriental Languages**. **Women** are admitted to the same examinations, but do not receive degrees. There are three halls for their reception—**Somerville Hall, Lady Margaret Hall, and St. Hugh's Hall**. St. Alban Hall and New Inn Hall have been respectively annexed to Merton College and Balliol College, in accordance with the decision of the last Royal Commission. Similarly St. Mary's Hall is destined to be united with Oriel College, and St. Edmund's Hall with Queen's College. Mansfield College, for Congregationalists, was opened in October '89, and a similar institution for Unitarians is in process of establishment. **Degrees, D.D. (hood scarlet cloth, lined with black silk); B.D. (h. plain black silk); M.A. (h. black silk, lined with red silk); B.A. (h. black corded silk, trimmed with white fur); M.D. (h. scarlet cloth, lined with crimson silk); M.B. (h. dark blue silk, lined with white fur); D.C.L. (h. scarlet cloth, lined with crimson silk); B.C.L. (h. pale blue silk, lined with white fur); Mus. D. (h. white silk, lined with crimson silk brocade); Mus. B. (h. pale blue silk, lined with white fur).**—**Chancellor, The Marquis of Salisbury, K.G.; Vice-Chancellor, J. Bellamy, D.D. (St. John's); Parliamentary representatives, Sir J. R. Mowbray, Bart., and Mr. J. G. Talbot. Proctors for '89-90, J. W. Russell, M.A., Merton; A. Clark, M.A., Lincoln.**

P

Paget, Sir James, Bart., F.R.S., D.C.L. Oxon., b. at Great Yarmouth 1814. He is **Sergeant-Surgeon Extraordinary to the Queen, Surgeon to the Prince of Wales, and Consulting Surgeon to St. Bartholomew's Hospital.** Created a baronet (71), and appointed **President of the College of Surgeons (75).** Sir James Paget was one of the scientific celebrities who received an honorary degree in '82, at the commemoration of the 300th anniversary of the founding of the University of Würzburg. He was the principal speaker at the Mansion House Meeting convened July 1st, '89, to promote a fund for the establishment of a **Pastour Institute (q.v.)** in this country.

Pahang. A large state on the east coast of the Malay peninsula, northward of Johore, and touching on the west, Perak and Selangore. A treaty between Great Britain and P., concluded in '86, provides that the ruler shall be styled Sultan of P., and that the guidance and control of the foreign relations of P. is henceforth conveyed to the Straits Government (q.v.).

"**Pall Mall Gazette.**" Evening newspaper and review. Established 1865, by George Smith, of Smith, Elder & Co. Transferred to Henry Yates Thompson, his son-in-law, in 1880. Edited first by **Frederick Greenwood**, next (1880)

by **John Morley**, who in turn was succeeded in 1883 by **W. T. Stead (q.v.)**. Its characteristics are the three 'I's'—Independence, Interviewing, and Illustration. It is the first daily illustrated English newspaper. Originally issued at 2d. It was first published at 1d. Jan. 1st, '82. "**Pall Mall Budget**" (weekly 4d.), an illustrated summary of the news of the week with special cartoon. **Offices, 2, Northumberland Street, Strand.**

Palmer, Elwin, b. 1852. Educated at Lancing College. Proceeded to India in '70; appointed to Indian Financial Department. Served in India till '85, when appointed Director-General of Accounts in Egypt. Grand Officer of the Medjidieh, and C.M.G. in '88. Appointed **Financial Adviser to the Government of Egypt** Oct. '89, in succession to Sir Edgar Vincent.

Palmerston. Capital of Northern Territory (q.v.) of South Australia.

Panama Canal. This waterway, which, if completed, will be the greatest engineering work of the kind the world has ever seen, is designed to connect the Atlantic Ocean, from Aspinwall (or Colon), with the Pacific at the capital city of Panama—the oldest existing European settlement in the whole of America—thus cutting through the southern portion of the narrow neck of land connecting North and

South America, generally described as the **Isthmus of Panama**. The idea is to follow the course of the single-line railway already connecting the two cities, except in certain places, where the bed of the river Chagres will be more closely followed. The whole length, from entrance to exit, is calculated at fifty-four miles; and the two chief difficulties are recognised in the flood waters of the river, and the fact that the **Cordilleras** have to be cut through. The river bed is to be crossed several times; and it has been decided to cut through the **Culebra Col**, in the **Cordilleras**, which about the point chosen will mean the excavation of a lengthy ravine about 350 feet deep. (For history of the scheme down to end of 1888 see ed. '88, also previous editions.) On Dec. 1st, '88, **M. de Lesseps** addressed a letter to the shareholders of the Company, saying that the remainder of the bonds of the Lottery Loan authorised in the previous April were about to be issued, and the subscription would hold good if 400,000 bonds were applied for. In conclusion he said: "I appeal to all Frenchmen, to all my associates whose fortunes are threatened. I have devoted my life to two great works, which were pronounced to be impossibilities—namely, the Suez and Panama canals. The Suez canal is constructed, and has enriched France. If you wish to complete the Panama canal, your chance is in your own hands. You must decide." The **Panama Loan Subscription** closed at Paris on Dec. 12th, the condition being, as above mentioned, that unless 400,000 of the 1,000,000 obligations were taken up the subscription should be annulled. On the following evening the Company published a note referring to the good impression produced in the financial world by the spirit shown by the shareholders and bondholders in subscribing for securities which could be obtained on the market at as much as a hundred francs cheaper than those offered. On the same day the question came before the Cabinet, when two schemes were submitted—one for the formation of a new company, interest to be deferred till the Canal was working; the other securing the existence of the old as well as a new company on certain terms, and interest to both companies to be deferred till the completion of the Canal. **M. de Lesseps** was understood to be in favour of the latter scheme, but no decision was arrived at by the Cabinet Council. On Dec. 13th the **Panama Canal Company suspended payment**, the notice posted up at the offices stating that the subscriptions had not extended to 400,000 obligations, while those that had been received would be returned. A special meeting of the Cabinet was at once held, and to prevent speculation on the Bourse, its decision, to propose a three months' suspension of payments, was placarded. At a subsequent meeting of the Chamber the same day a bill was brought in to this effect, and urgency was carried by 333 to 155 votes. In the evening it was announced that **M. de Lesseps** and his colleagues had resigned their posts as administrators of the Company, and that at their request the Tribunal of the Seine had appointed three judicial liquidators, **MM. Hué, Baudelot, and De Normandie**. The 15th, however, saw the rejection of the bill by 256 to 28, the committee having reported against it on the ground that it was for the tribunals to grant or refuse a postponement of payments. The *Times* of the 17th gave a brief summary

of the history of the Canal and the rival projects. From Philadelphia (Dec. 19th), it was reported that Senator Edmunds (Vermont) had introduced into the Senate a resolution to the effect that the United States viewed with serious concern and disapproval any connection of any European government with the construction or control of any ship canal across the Isthmus, and it was referred to the Judiciary Committee. A meeting of some seven hundred shareholders and bondholders of the Company was held at Paris on Dec. 20th, when it was decided to forego the payment of the coupons and the redemption of the shares. Those present signed documents binding themselves to subscribe to any fresh issue. Another gathering was held at Paris on Dec. 27th, when it was estimated that four thousand holders of shares and bonds were present. A resolution was adopted declaring confidence in **M. de Lesseps**, resolving to cease to claim payment of coupons and annuities till the Canal was opened, and agreeing that it was desirable at once to raise the necessary capital to complete the work. From New York, Dec. 27th, it was reported that work was still going on at the Canal, there being nine thousand men still employed. —Under date Paris, Jan. 6th, '89, it was reported that **General Boulanger (q.v.)** had been waited upon by a deputation of bondholders, and had promised the Canal scheme his support, subsequently subscribing for twenty-five new bonds. It was also reported that on the previous day a meeting of bondholders addressed a letter to **M. de Lesseps (q.v.)** offering him the chairmanship of a new company, with a capital of twenty-five million francs to complete the work. From New York, Jan. 5th, it was stated that the work at the Canal was lessening, and difficulties were feared with the labourers. At Washington, on Jan. 7th, the Senate discussed the Panama Canal question in secret session, and by forty-nine votes to three passed a joint resolution disapproving of any connection of any European Government with the construction or control of any ship canal across the Isthmus of Darien, and the President was requested to communicate this resolution to the Governments of Europe. News from Panama, Jan. 8th, said that all was quiet and that there had only been a stoppage of work for a few hours. **M. Floquet (q.v.)**, the French Premier, received a deputation of bondholders at Paris on Jan. 11th, and expressed his sympathy with them, and it was reported that on the following day **M. de Lesseps** and the Administrative Council of the Panama Canal Co. signed an agreement with the **Banque Parisienne** for a fresh issue of 60,000,000 fr. worth of shares, to be subscribed in two lots. The prospectus of the Panama Canal Completion Co. was issued at the end of the month, 60,000 shares at 500 fr. each being issued at par, and payable in three instalments. An important meeting of the Company was held on Jan. 26th, when it was resolved that an agreement come to with the contractors to continue to Feb. 15th be adopted, and that **M. Brunet** be appointed liquidator of the old Company. On Feb. 4th the Civil Tribunal at Paris gave judgment in favour of the winding up of the Panama Canal Co., with power to the liquidator to enter into arrangements with any new company. (The *Times* of Feb. 5th reviewed the position of the enterprise to this point.) On the 6th **M. de Lesseps**, in a letter to the subscribers, stated

that, as a deposit of a quarter of the share capital had not been made, according to law, he was not in a position to constitute the new company; it would be therefore necessary to leave the matter in the hands of the liquidator. The sum of 250,000 dollars was voted by the United States Senate, for the protection of American interests at the Isthmus, in secret session on Feb. 11th. A telegram dated Philadelphia, Feb. 16th, stated that numbers of men had been discharged from the works, and many people were leaving the Isthmus. On Feb. 26th President Cleveland signed the bill enabling the President to protect the interests of the United States in the Isthmus of Panama. In the French Chamber of Deputies on March 7th M. Gaudin de Villaine suggested that the Government should appoint a technical commission of engineers to ascertain the true state of affairs at the Canal; but the order of the day pure and simple was adopted by 444 to 185 votes. The first chamber of the Court at Paris decided an appeal from the judgment of the Tribunal of the Seine on March 8th, finding that the Company was a *société civile*, and that therefore the Tribunal could not take cognizance of the demand upon the Company by the Société de Travaux Publics et de Constructions. Intelligence received at New York April 9th stated that, owing to the distress among the negroes lately employed on the Canal works, the British consul had ordered bread to be distributed among them. On April 15th a Paris telegram stated another draw in the Canal Bonds Lottery took place, the chief prize of 500,000 fr. again falling to a non-issued bond. M. Brunet, liquidator, made a speech, in which he said he had reduced the outlay at the works from fifteen or sixteen million francs to about two million, the latter sum being necessary to prevent deterioration. He believed he could save the Canal if he were allowed to dispose of the unissued bonds at less than 300 fr., but the Government saw no prospect of Parliament agreeing to such a bill. On April 20th, M. Brunet had an interview with M. Rouvier with regard to a projected loan in London. The *Temps* of May 11th asserted that at a Cabinet Council held on the previous day it was decided to submit to Parliament a proposal to authorise the liquidator of the Panama Canal Co. to issue bonds to the value of 1,500,000 fr., at 25 fr. each, for carrying on the work, pending the formation of a new company. The Cabinet on June 13th decided to introduce a bill for allowing the liquidator to dispose of some of the unissued bonds at any price he could obtain in order to save the works pending the formation of a new company. From an American source it was stated in August that a new company was being formed by private capitalists in France, and that they were arranging with the American Contracting and Dredging Co. to finish the work. At the bond drawing on Oct. 15th, at Paris, M. Brunet said he was anxious to find a company who would complete the Canal and take over the plant; and to facilitate this he had decided to have an independent investigation—an Englishman, a Dutchman, and a Belgian being already appointed on a commission which would start in time to be at Panama for the dry season (December).

Paraguay, Republic of. One of the most rising states of South America, situated between the rivers Parana and Paraguay. Capital, Asunción, pop. about 25,000. Area,

about 145,000 sq. m.; it is therefore about one-fifth larger than the United Kingdom of Great Britain and Ireland. It is governed by a President elected every four years, a congress consisting of a Senate and a Chamber of Deputies, and five Ministers of State chosen by the President. The State religion is Roman Catholic, but all others are tolerated. Revenue ('87), \$1,938,176; expenditure, \$1,400,503; the internal debt at the beginning of '88 amounted to \$1,068,260; external debt about £800,000. During the five years' war, '65 to '70, against three of its most powerful neighbours the country was completely ruined; but now, owing to the extraordinary riches of its soil, to its very healthy climate and its central geographical position, it is making such rapid strides that it will very soon become one of the most important states of South America. The country is covered with most valuable timber, and well watered throughout with a great number of small and large rivers, most of them navigable for hundreds of miles. A railway of about 92 miles is now in traffic, and another 30 miles will be opened very shortly. Concessions have been granted for about 300 miles more. The chief crops are maize, rice, coffee, cocoa, indigo, manioc, tobacco, sugar-cane, oranges, cotton, and the celebrated tea called Yerba Mate. A law has been lately passed by Congress for establishing a metal currency.

Paramaribo. Capital of Surinam (q.v.).

Parcel Post, The. See Post Office.

Paris, Comte de. son of the late Duc d'Orléans, and grandson of King Louis Philippe, b. 1838. He was educated in England, having left France after the overturn of the monarchy in '48. He and his brother the Duc de Chartres were on the staff of General McClellan during part of the American Civil War. He married in '64 the eldest daughter of the Duc de Montpensier, and has three children. After the death, in '85, of the Comte de Chambord, the head of the Royal House of France, the Comte de Paris was acknowledged by nearly all the Legitimists as his successor. In '86, on the passing of the Expulsion Bill, the Comte de Paris once more left for England. After his return from the United States he allied himself with the Liberals and Republicans against the Empire, and subsequently with the Legitimists against M. Thiers. In '89 he lent his aid to the Boulangists. The Comte and Comtesse celebrated their silver wedding at their seat near Tunbridge Wells last July. He is the author of an interesting and comprehensive work in six volumes on *English Trade Unions*.

Paris Underground Tramways. It was reported, under date Paris, Nov. 21st, '89, that in all probability an underground railway scheme for that city would be introduced in the session of '90.

Paris Universal Exhibition, The. held during the summer and autumn of '89, was successful far beyond the highest expectations of its promoters. As the Exhibition was designed to commemorate the centenary of the French Revolution, foreign Governments, with the exception of those of Switzerland and the United States, declined to identify themselves officially with it; and it was at first feared that the show, on this account, would be limited in its scope and dimensions. In response to the invitation of M. Berger, the director-general of the Exhibition, however, executive commissions

were formed in the United Kingdom and other countries (except Germany), and these undertook the organisation of exhibits representative of their respective nationalities. The result was that the "universal" character of the Exhibition was well maintained. Thanks to the energy of the committee formed in London early in '88, the British exhibits formed a conspicuous feature of the show, though they were not nearly so numerous as they would have been but for the political considerations referred to. The committee was organised by the then Lord Mayor (Sir Polydore de Keyser), who, at a meeting held at the Mansion House in February, was appointed president; Lord Brassey being chosen vice-president. The committee comprised leading representatives of art, science, industry and commerce, whose names were a guarantee that the work they had undertaken would be carried out in a creditable manner. The space allotted to the United Kingdom in the various sections amounted to 232,845 square feet, and it was promptly taken up, and many applications by intending exhibitors had to be refused. To meet current expenses and liabilities a guarantee fund of £20,000 was formed. In response to an application from the secretaries of the British section, the Queen by an order in Council recognised the Exhibition as an International one, so that inventors exhibiting in it could avail themselves of the privileges provided by the Patent Law for the protection of their inventions, which might be shown previous to their being patented without invalidating their right to a patent at a later date. The Exhibition occupied a much larger space than any of its predecessors. It completely covered the Champ de Mars, from the Ecole Militaire to the Seine, a distance of 1,000 yards, with a width of 450 yards. It was connected by the Pont de Jena with the garden of the Trocadéro, which, together with the unoccupied parts of the Palace, were requisitioned. In addition to all this accommodation there was erected on the Quai d'Orsay, and parallel with its curved course, a line of double galleries 3,000 feet in length, serving to communicate with the Esplanade des Invalides, which was also utilised for the purposes of the Exhibition. The portion of the Exhibition located on the Champs de Mars comprised five main divisions. At the end farthest from the river, and facing the Ecole Militaire, was the great palace provided for the accommodation of machinery, and running parallel with this was a vast range of galleries containing industrial products. Extending from these galleries were two wings devoted respectively to the fine arts and the liberal arts, the open space between the wings being laid out as an ornamental garden, a conspicuous object in which was the Eiffel Tower (*q.v.*). Flanking the tower, and continuing the range of buildings to the bank of the Seine, were a number of pavilions containing the exhibits of some of the smaller countries, and a range of structures illustrating the history of human dwellings. On the opposite bank of the river the gardens of the Trocadéro were devoted to illustrations of horticulture and arboriculture. In the buildings extending along the Quai d'Orsay food products and the agricultural exhibits were accommodated. The Esplanade des Invalides was given over partly to agriculture, and partly to the French colonies and French ministerial exhibits. The Exhibition buildings were constructed chiefly of iron

and glass, and some of them presented quite

diameter, and having on its apex a figure of France in the attitude of distributing prizes to the competitors at the Exhibition. The interior of the dome was richly decorated. The piers were surmounted by groups of statuary representing respectively water, air, steam and electricity, and over them ran a painted frieze representing France conducting the nations to the Exhibition. The Machinery Palace was the largest building under one roof in the world. It covered an area of 60,000 square yards, was 1,350 feet in length, and its roof had a span of 370 feet clear. Some idea of the extent of the Exhibition buildings may be gleaned from the fact that 930 tons of glass was used in their construction. The glass was a quarter of an inch thick, and the total area covered by it was nearly 18 acres. The fixing of the glass occupied 80 glaziers for 240 days. It is impossible, in a condensed description, to do more than mention a few of the more conspicuous features of the vast collection of exhibits. In the Palace of the Fine Arts was to be seen a grand collection of pictures by French artists, and a fair representation of the arts of various other countries. The French pictures were divided into two groups—first, pictures painted between the years 1788 and 1878; and second, pictures painted during the last eleven years. English art was well represented, the amount of space allotted being larger than in the case of any other foreign country. The works shown, which filled five rooms, included examples of all our leading artists. In the Palace of General Industries the British exhibits covered a floor space of nearly 60,000 square feet. The first object to meet the gaze of the visitor to this department was an extensive display of the products of some of our best-known porcelain and pottery manufacturers and dealers. Furniture and cabinet work came next in order, and included many beautiful and interesting examples, notably some admirable reproductions of Chippendale and Sheraton work. Of table and cut glass the samples shown were of a very high order, and the same may be said of the gold and silversmiths' work and jewellery. Chronometers, clocks, and watches were exhibited by some of the most distinguished English makers. Textile fabrics were well represented, one of the more interesting exhibits being some products of the looms of Spitalfields weavers, which showed that the skill of these workers enables them to compete most successfully with their Continental rivals. One piece of broadest satin was of such an elaborate design that the cost of preparing the loom to produce it was considerably over £100. Guns, rifles, and other accessories of sport made a goodly show. In the division of general industries the colonies of Victoria, New Zealand, and the Cape of Good Hope made characteristic displays of their productions. Conspicuous features of the Cape collection were the model of the great diamond mine at Kimberley and the illustrations given of diamond cutting and polishing. In a case in this department was shown a collection of diamonds valued at a quarter of a million sterling. For France was reserved a large proportion of the Palace of General Industries, and the space was crowded with illustrations of products of the chief industrial centres of

the country. In the Palace of Liberal Arts were arranged specimens of printing, bookbinding, painting and drawing materials, photographs and photographic apparatus, musical instruments, etc., and to all these the **British exhibitors** made noteworthy contributions. **Italy, Switzerland, and the United States** were also well represented here. Of the space in the Machinery Palace, France herself occupied fully three-quarters. No fewer than twenty-eight powerful steam-engines were provided for driving the hundreds of machines shown in motion. The **English exhibitors** had 71,175 square feet of space in this department, and this they fully occupied with a fairly representative assortment of machines, tools, engines, and various products of mechanical industries. The railway and shipping exhibits were specially interesting. In the grounds adjoining the main Exhibition buildings were a large number of separate structures. A series of these illustrated the history of the **habitations of man**, beginning with caves and ending with the modern French villa in the Renaissance style of architecture. Hard by, too, and designed to link the Exhibition with the great historical event which it was instituted to commemorate, were very substantial reproductions of the **Bastille**, the **Tour de Nesle**, and the **Châtelet**. The accessories with which these buildings were surrounded and furnished, in the shape of antique buildings, men and women in costume, arms and implement of torture, etc., tended to give to them a most impressive and realistic character, which was intensified by the enactment at certain intervals of the escape and recapture of the famous **Latude**. In a Hall of Justice in the **Tour de Nesle** mock trials were held upon representatives of eminent French criminals. The **Anglo Indian Palace** recalled the visitor to more agreeable associations. The Indian Government declined to participate in the Exhibition; but as some English gentlemen thought it desirable that our great Eastern possession should be represented, they formed a committee, over which Sir George Birdwood presided, and employed Mr. Purdon Clarke, C.I.E., to design a suitable building. The **Palace** was an elegant structure, the interior of which represented a bazaar surrounded by twenty shops, which were let to vendors of Indian commodities, who were not allowed to sell their goods in the main buildings. Adjoining the Egyptian court was an exceedingly faithful and picturesque reproduction of a **street in Cairo**, which was a never-failing source of interest to the visitors. A **Chinese Pavilion** and a **Moorish Pavilion** (the latter erected at the cost of the Sultan of Morocco and filled with beautiful objects) may also be mentioned. Abundant diversion was provided for visitors to the Exhibition in the shape of frequent performances by military bands, ballets, pantomimes, and so forth. In the evenings the grounds were beautifully illuminated and the prismatic fountain played. On Sundays the **Eiffel Tower** was lit up from base to summit by Bengal fires, and the effect was truly grand. The Exhibition was closed on Nov. 6th, and the total number of visitors was then announced to have been 25,000,000, exclusive of those who went in with the 30,000 free passes issued to exhibitors and others. Some interesting statistics are published relating to the Exhibition. Without taking into account the hundreds of thousands of persons who

stopped at the houses of their relations and friends, the statistics furnished to the police by the hotels and lodging-houses show that about 5,000,000 French people from the provinces journeyed to Paris to visit the Exhibition. In calculating that, on an average, each visitor from the provinces spent but 100 fr., the amount of money left in the capital by the inhabitants of the departments would be 500,000,000 fr. In addition to this, it is estimated that 1,500,000 foreigners visited the Exhibition, spending on an average 500 fr. each during their stay in Paris, and thus making a further sum of 750,000,000 fr. The total amount estimated to have been spent in Paris by visitors to the Exhibition is therefore 1,250,000 fr. The police statistics show that, among these 1,500,000 foreigners there were about 225,400 Belgians; 380,000 British subjects; 160,000 Germans; 52,000 Swiss; 56,000 Spaniards; 38,000 Italians; 7000 Russians; 2500 Swedes and Norwegians; 50,000 Greeks, Roumanians, and Turks; 32,000 Austrians; 3500 Portuguese; 8250 people belonging to various Asiatic nations; 12,000 people from Africa (Algerians forming the great majority); 90,000 North Americans; 25,000 South Americans; 3000 people from Oceania, etc. It but remains to say that out of the 63,000 exhibitors 903 gained **grand prizes**, 5153 **gold medals**, 9690 **silver medals**, 9323 **bronze medals**, and 8070 **honourable mentions**, making a total of 33,739 awards. The awards to **British exhibitors** numbered 810, thus leaving only 107 without awards. Of 297 fine art exhibitors 7 received a grand prize, 21 a gold medal, 33 a silver medal, 54 a bronze medal, and 15 an honourable mention. Of 673 industrial exhibitors, 29 received a grand prize, 181 a gold medal, 243 a silver medal, 179 a bronze medal, and 107 an honourable mention. Of social economy exhibitors, 7 received a grand prize, 14 a gold, 13 a silver, 4 a bronze medal, and 1 an honourable mention. There were thus 43 grand prizes, 218 gold medals, 289 silver medals, 237 bronze medals, and 123 honourable mentions.

Parker, Rev. Joseph, D.D., minister of the City Temple, Holborn Viaduct, was b. at Hexham, 1830. Student in University College, London (52). Ordained in the Congregational body (53). Has held the following church appointments:—Banbury (53); Manchester (58); London, City Temple (60); Chairman of the Congregational Union of England and Wales (84); Chairman of the London Congregational Board (83); Chairman of the London Congregational Union (90). Founder of the Nottingham Congregational Institute. Dr. Parker, in addition to being a popular and vigorous preacher, is also an author of repute. Among numerous works written by him may be mentioned "The Paraclete," "Ecce Deus," "Springdale Abbey," "Inner Life of Christ" (3 vols.), "Apostolic Life" (3 vols.), and "Weaver Stephen." It was at his house that Mr. Gladstone, in May '37, met a large number of Nonconformist ministers, and expounded to them his Irish policy. Dr. Parker in '88 visited the United States, and on his return held a series of noonday conversations at the City Temple with working men. During '89 he issued "The People's Prayer-Book," and a further addition to the "People's Bible." He has also written "The History of a Soul" for *Great Thoughts*.

Parkes, Sir Henry, K.C.M.G. (1877), is the son of an agricultural labourer, and was born

at Stoneleigh, Warwickshire, '15. He emigrated to Sydney in '39. Returned to the New South Wales Parliament as member for Sydney in '54. Became Colonial Secretary '66, and distinguished himself by carrying the New South Wales Public Schools Act. Prime Minister '72-5, '77, '78-89. Sir Henry has been distinguished for his successful advocacy of Free Trade. He is one of the remarkable men who have risen to political eminence through journalism. For seven years ('49-56) he conducted the *Empire*, a daily newspaper of Sydney. He visited England in '61, in '81, and again in '87 as the representative of New South Wales at the Colonial Conference which met in London, and which has been described by Lord Rosebery as the "inauguration of Imperial Federation." On that subject Sir Henry issued an important manifesto in Oct. '89.

Parliament is composed of the Sovereign and the three Estates of the Realm, which are the Lords Spiritual, the Lords Temporal, and the Commons; the Lords Spiritual and Temporal sitting together and forming the House of Lords. The Sovereign alone has the power of summoning or proroguing or dissolving Parliament, and gives the Royal Assent to measures which have passed both Houses. On the first day of the meeting of a new Parliament the Clerk of the Crown delivers to the Clerk of the House of Commons a list of the names of the members returned at the general election. Members are then summoned to the House of Peers, and the Royal pleasure is signified by the Lords Commissioners that the Commons do proceed to elect their Speaker (*q.v.*). On the following day the Speaker elect is presented to the Lords Commissioners for the Royal approbation. If the same Government be in office as had been in power at the dissolution, the swearing-in of members goes forward for a week or so, and then Parliament is formally opened; but if there should have been a change of Government after the general election, then members of the administration who hold office direct from the Crown will have vacated their seats, and the leading members of the Government present in the Commons will be the Secretaries to the Treasury. This was the state of affairs in 1874, 1880, and August 1886, on which occasions authority to issue writs for the re-election of Ministers was given by the Crown, through the Royal Commissioners, within a few days after the election of Speaker, and there was then a short adjournment for the re-elections before Parliament was opened. But as in January 1886 the Ministry had not gone out of office, there were no writs to be issued for re-election, and consequently there was no need for any adjournment, and Parliament was opened nine days after it met. Parliament is sometimes opened by Her Majesty in person—this being now the only occasion during a session on which the Queen is personally present—but more frequently by Royal Commission. In either case the Speaker and the Commons are summoned (see **BLACK ROB**) to hear Her Majesty's Speech. This is read sometimes by the Sovereign, but more often when Her Majesty is present by the Lord Chancellor; and it is always delivered by him when Parliament is opened by Commission. At the resumption of business in the evening of the day on which Parliament is opened, and, an address in reply to the gracious tidings from the Throne, is moved in each

House. After the mover and seconder have spoken, some critical remarks upon public affairs are usually made by the Leader of the Opposition, and the Leader of the House replies. The debate on the Address in the Lords is usually finished on one evening; the debate in the Commons has of late years extended over several nights. So soon as the Address has been agreed to by the Commons, the House decides that it will on a future day resolve itself into a Committee of Supply, and into a Committee of Ways and Means (see **SUPPLY**, and **WAYS AND MEANS**). The Houses at their ordinary daily sittings consider private business (see **BILLS**, **PRIVATE**), *Petitions (q.v.)* are presented, questions are put to Ministers, motions are made and discussed, and public bills are submitted by the Government and by private members. The ordinary time for the commencement of the session is early in February. There is usually a recess at Easter, and at Whitsuntide, and great efforts are usually made to bring the session to a close at about the middle of August. The House, on resuming after an adjournment, takes up business at the stage where it had been left at the previous sitting; but a prorogation ends all uncompleted public business. Unless it be dissolved by the Crown, Parliament exists seven years from the date on which it was first to meet. The demise of the Crown does not dissolve Parliament, but, on the contrary, renders an immediate assembling of the two Houses necessary; and if there be no Parliament in existence, the old Parliament must reassemble, and may sit again for six months, if it be not within that time dissolved by the new Sovereign. When Parliament is about to be dissolved by the Crown on the advice of her Ministers it is customary to prorogue on a given day, and in the evening of the same day to issue the proclamation of dissolution. The writs are posted the same night, and are made returnable not less than thirty-five days after date. But although the new Parliament cannot in any case be summoned to meet in less than thirty-five days after the day of dissolution, it may happen when the general election is over that no necessity for an early meeting of Parliament exists, and in such case the new Parliament may be prorogued by proclamation until a later date. Should it, however, be found desirable to call Parliament together for the despatch of business on an earlier day than that to which it stands prorogued by proclamation, whether that prorogation has taken place before the first meeting of a new Parliament, or during the ordinary recess between sessions, or if the House be adjourned for a longer period than fourteen days, it is in the power of the Crown to call Parliament together by proclamation for the despatch of business in six days from the date of such proclamation. See also **CROWN**; **HOUSE OF COMMONS**; **PEERAGE**; and **PARLIAMENTARY PROCEDURE**. Consult Sir T. Erskine May's "Law, Privileges, Proceedings, and Usage of Parliament," and "The History of English Parliament," by Dr. Rudolph Gneist, translated by Professor A. H. Kene.

Parliament, Privileges of. See **PRIVILEGES OF PEERS AND MEMBERS OF PARLIAMENT**.

Parliamentary Papers consist of the notices of questions, resolutions, votes, and proceedings in both Houses of Parliament

issued daily during the session; the official **Blue Books, Drab Books, and White Books** (so called from the colour of their covers) are Papers prepared by the different Government departments, and presented by command of Her Majesty to both Houses of Parliament, and also of all reports and returns specially ordered to be printed by either House. As soon as possible after the close of each session lists are prepared of all the papers printed and issued during the year, and are procurable, as also the **Journals of the proceedings of the House of Lords and House of Commons** (price 6s. per volume). To the general public the papers are issued on the following terms: Single papers, Blue Books, etc., are charged for at the rate of one halfpenny per sheet of four pages, excepting in instances where special prices are fixed; but for an annual subscription of £20 subscribers can obtain all the Parliamentary publications issued during the year; an annual subscription of £18 entitles the subscriber to all the Parliamentary Papers excepting the daily votes and proceedings, which can be had separately for an annual subscription of £3; and the reports on petitions and appendix to the votes, which can also be had separately for an annual subscription of £1. The papers of each House can also be had separately. The annual subscription for the House of Lords papers is £10, and for the House of Commons papers £15, or in each case £1 10s. less without the daily votes and proceedings. An additional charge is made for delivery within the town district, according to distance, and a charge of 10s. or 20s. for packing and sending by post or rail the votes or papers respectively. Lists of the papers for each year, giving title and price, and later ones, even the postage, can be sent post free for The Parliamentary Publishers are Messrs. Eyre and Spottiswoode, East Harding St., London, E.C.; and 32, Abingdon St., Westminster, S.W.; Messrs. A. and C. Black, North Bridge, Edinburgh; and Messrs. Hodges, Figgis and Co., 104, Grafton St., Dublin.

Parliamentary Procedure. The Houses of Lords and Commons differ from each other not only in regard to their constitution, but likewise in respect to their powers and methods of procedure. It is in the House of Peers, for instance, that the Sovereign meets Parliament, and the formal ceremonies connected with the opening or proroguing of the Legislature are gone through. On these occasions, as also when the Royal Assent is given to public or private bills, the "faithful commons" merely attend upon their lordships. But, on the other hand, the House of Commons has an individuality of its own, which is yearly becoming more marked. Its powers and privileges are enormous: it is in the Lower Chamber exclusively that the national estimates are voted, and it is in the Commons that the majority of important legislative proposals are initiated. The powers of the Lord Chancellor, who presides over the deliberations of the House of Lords, differ widely from those exercised by the Speaker of the House of Commons. He is not the judge of questions of order, and if two or more peers rise together the House itself decides who shall first be heard. The simple duties of the Lord Chancellor (who need not necessarily be a peer) consist in "putting the question," and he is not debarred from taking

part in a debate. He has, however, no casting vote in divisions, and if the numbers are equal the "not-contents" prevail. Another peculiarity of procedure in the House of Lords is that the speakers do not address the presiding peer but the whole House. With regard to the origination of bills, the House of Lords has exclusive power concerning those relating to a restitution in blood and a restitution in honour. It has always been held that bills of "pains and penalties," or other measures founded on oral testimony, should originate in the Lords; and until 1871 the House of Commons had not the power which their lordships had of examining witnesses on oath. The Royal Assent to bills is always given in the House of Lords, more frequently by commission than otherwise; and it is a curious circumstance that the French language is still employed in connection therewith. When a public bill is approved, the clerk says, "*Le roy (or, la reine) le veult.*" If the measure be a private one he says, "*Soit fait comme il est désiré.*" Should the bill have subsidies for its object, the official says, "*Le roi (or, la reine) remercie ses loyaux sujets, accepte leur bienveillance, et aussi le veult.*" If the Sovereign thinks fit to refuse approval to a measure, the clerk then says, "*Le roi (or, la reine) s'avisera.*" This power of rejection, it may be noted, was last exercised by Queen Anne, in the year 1707. The most striking feature in connection with the procedure of the House of Commons is the wide power vested in the Speaker. This great officer must have been anciently, as at present, the organ or spokesman of the Commons, although in modern times he is more occupied in presiding over the deliberations of the House than in delivering speeches on their behalf. Unlike the Lord Chancellor, the Speaker must abstain from debating, unless in committee of the whole House; and even there he rarely takes advantage of his right. The member of the House who is elected to the office of Speaker usually acts quite independently of party considerations. He never votes, save when the numbers happen to be equal, in which case he gives the casting voice. The chief duty of the Speaker undoubtedly is the preservation of order, with respect to which the rules of the House of Commons are very stringent. It is out of order, for instance, for a member of Parliament to refer to any other member by name; he must speak of him as "the hon. member for so-and-so." Again, all remarks must be addressed to the Chair, and not to the House. It is likewise out of order to speak in direct terms of any proceedings of the other House of Parliament, unless they have been formally made known by "message," or recorded on the minutes of the House of Peers. When a reference to the proceedings of the House of Lords is desired, however, the difficulty is got over by alluding to what has transpired "in another place." It is irregular, too, to refer to the opinions of the Sovereign, speeches and messages from the Throne being regarded as the sentiments of the Ministry alone. The rules of procedure passed in the year 1882 (see '86, '87, and '88 editions), provided among other things that a member who disregarded the authority of the chair might under a new standing order (Order in Debate) be "named" by the Speaker, and suspended from the service of the House, on the first occasion for a week, on the second for a fortnight, and on

the third, or any subsequent occasion, for a month; empowered the Speaker, when in his opinion a subject has been adequately discussed, and it was the evident sense of the House that the "question be now put," to so inform the House, when a motion to close the debate might be made, and placed restriction upon the practice of making motions of adjournment. In the House of Commons no public bill can be introduced without leave, and on that being given, the measure is formally read a first time. On the second reading the principle of the measure receives consideration, and until it has passed this stage it cannot be altered or amended. The bill is subsequently considered in committee of the whole House, or it may, in certain cases, be sent to a select committee. After amendment in committee, a formal report is received, the measure is subsequently passed, and taken to the House of Lords, where practically the same form is gone through. The only exception to these proceedings arises in the case of an *Amnesty Bill*, which is read but once in each House. Only the royal assent can convert a bill into an Act of Parliament. It occasionally happens that the opponents of a bill are not desirous of meeting the motion for its second reading with a direct negative. An amendment is therefore proposed to the effect that the bill "be read this day, three months," or "this day six months," it being understood that three months or six months hence the House will not be sitting. In the cases of motions in respect to which the House is also unwilling to come to a decision, "the previous question" may be carried, in which case the other business of the day is at once proceeded with. The business of both Houses of Parliament, but more especially of the House of Commons, is transacted very largely "in committee." When the whole House is in committee the Speaker vacates the chair, the mace is removed by the Serjeant-at-Arms, and the Chairman of Ways and Means or another member of the House presides. Proceedings relating to the expenditure of public money take place in *Committee of Supply (q.v.)*, while in *Committee of Ways and Means (q.v.)* resolutions having reference to the funds by which such expenditure is to be sustained, are passed. There are also *Select Committees* chosen for specific purposes, and committees for the consideration of private bills, the procedure in respect to which is not very dissimilar to that followed in regard to public measures. No member of the House of Commons can, as a matter of fact, resign his seat, but this end is attained by his acceptance of the "*Chiltern Hundreds*." No office having emolument attached can be conferred on a member of the House of Commons without his vacating his seat; and therefore by obtaining "the stewardship of Her Majesty's Chiltern Hundreds, of East Hendred and Northstead, or the Echeatorship of Munster," a member may rid himself of his duties. In cases where appointments are not directly conferred by the Crown, but by the heads of departments, a member need not resign his seat; and by the Reform Act of 1867 it was specially enacted that members already in office should not vacate their seats on accepting other Crown appointments. The first Salisbury administration, in Jan. 1886, made new rules of procedure one of their principal measures; Mr. Gladstone

on succeeding them in office adopted the main principles indicated, and a *Select Committee* appointed by the House of Commons to inquire into the rules of procedure of the House held their first meeting March 2nd, 1886, the Marquis of Hartington having been elected chairman at a preliminary meeting on March 18th. (For the names of the Committee, and the substance of the important recommendations they made, see ed. '87.) At the commencement of the session of '87 the Government proposed certain draft Rules of Procedure for the acceptance of the House of Commons, (for the text of these see ed. '88), but the only one of them which was adopted, and that after many modifications, had been made in it, was that which has reference to the *Closure of Debate*. This was found to work somewhat inconveniently inasmuch as it necessitated the presence of not less than 201 members to enforce the closure when the minority numbers 40 or upwards. At the commencement of the session of '88 the subject was once again brought under the notice of the Commons, and being discussed in a conciliatory and non-party spirit was very speedily and satisfactorily disposed of. Subjoined is the substance of the new rules then adopted:—*I. Sittings of the House*. Provides that unless the House shall otherwise order, the House shall meet every Monday, Tuesday, Thursday and Friday, at 3 o'clock, and shall, unless previously adjourned, sit till 1 o'clock a.m. when the Speaker shall adjourn the House without question put, unless a bill originating in Committee of Ways and Means, or unless proceedings made in pursuance of any Act of Parliament or standing order, or otherwise exempted from the operation of the standing order, be then under consideration. At midnight on Mondays, Tuesdays, Thursdays, and Fridays, except as aforesaid, and at half-past 5 on Wednesdays, the proceedings on any business then under consideration are to be interrupted, any dilatory motion which may be before the House is to lapse without question put; and the business then under consideration, and any business subsequently appointed, is to be appointed for the next day on which the House shall sit, unless the Speaker ascertains by the preponderance of voices that a majority of the House desires that such business should be deferred until a later day. On the interruption of business the closure may be moved, and in such case the Speaker or Chairman is not to leave the chair until the questions consequent thereon have been decided. After the business under consideration at midnight, or at 5.30 on Wednesdays, has been disposed of, no opposed business is to be taken. A motion may be made by a Minister of the Crown at the commencement of public business, to be decided without amendment or debate, to the effect that the proceedings on any specified business if under discussion at midnight that night be not interrupted under this standing order. The Chairman of Ways and Means may take the chair as Deputy Speaker, when requested to do so by the Speaker, without any formal communication to the House; and the Speaker is to nominate, at the commencement of every session, a panel of not more than five members, to act as temporary Chairmen of Committees when requested by the Chairman of Ways and Means.—*II. Closure of Debate*. Questions for the closure of debate are to be decided in the affirmative, if when a division be taken it appears by the numbers

declared from the Chair, that not less than one hundred members voted in the majority in support of the motion (the standing order of '82 which left it to the Speaker to take the initiative for the closure of a debate was repealed).—

III. Disorderly Conduct. "That Mr. Speaker or the Chairman do order members whose conduct is grossly disorderly to withdraw immediately from the House during the remainder of that day's sitting; and that the serjeant-at-arms do act on such orders as he may receive from the Chair, in pursuance of this resolution. But if, on any occasion, Mr. Speaker or the Chairman deems that his powers under this Standing Order are inadequate, he may name such member or members in pursuance of the Standing Order (Order in Debate), or he may call upon the House to adjudge upon the conduct of such member or members. Provided always, that members who are ordered to

withdraw under this Standing Order, or who are suspended from the service of the House under the Standing Order (Order in Debate), shall forthwith withdraw from the precincts of the House, subject, however, in the case of such suspended members, to the proviso in that Standing Order regarding their service on Private Bill Committees."—

IV. Irrelevance or Repetition. Mr. Speaker or the Chairman, after having called the attention of the House or of the Committee to the conduct of a member who persists in irrelevance, or tedious repetition either of his own arguments or of the arguments used by other members in debate, may direct him to continue his speech. (This is only a slight modification of the standing order of '82).—

V. Motions for Adjournment in abuse of the Rules of the House. "That, if Mr. Speaker, or the Chairman of a Committee of the whole House, shall be of opinion that a Motion for the adjournment of a debate, or of the House, during any debate, or that the Chairman do report progress, or do leave the Chair, is an abuse of the rules of the House, he may forthwith put the question thereupon from the Chair, or he may decline to propose the question thereupon to the House."—

VI. Government Business. "That on days on which the Government business has priority, the Government may arrange such Government business, whether Orders of the Day or Notices of Motions, in such order as they may think fit."—

VII. Committees of the whole House. That whenever an Order of the Day is read for the House to resolve itself into Committee, (not being a Committee to consider a message from the Crown, or the Committee of Supply, or of Ways and Means, Mr. Speaker shall leave the Chair without putting any question, and the House shall thereupon resolve itself into such Committee, unless notice of an instruction thereto has been given, when such instruction shall be first disposed of).—

VIII. Amendments on Report. That upon the report stage of any Bill no amendment may be proposed which could not have been proposed in Committee without an instruction from the House.—

IX. Divisions. That Mr. Speaker, or the Chairman, may, after the lapse of two minutes as indicated by the sand-glass, if in his opinion the division is frivolously or vexatiously claimed, take the vote of the House or Committee by calling upon the members who support, and who challenge his decision, successively to rise in their places, and he shall thereupon, as he thinks fit, either declare the determination of the House or

Committee, or name tellers for a division. And, in case there is no division, the Speaker or Chairman shall declare to the House or the Committee the number of the minority who had challenged his decision, and their names shall be thereupon taken down in the House and printed with the lists of divisions.—

X. Address in Answer to the Queen's Speech. That the stages of Committee and Report on the Address to Her Majesty to convey the thanks of the House for Her Majesty's most gracious Speech to both Houses of Parliament at the opening of the session be discontinued.—

XI. Public Bills. That after Whitsuntide public Bills, other than Government Bills, be arranged on the Order-book so as to give priority to the Bills most advanced, and that Lords' amendments to public Bills appointed to be considered be placed first, to be followed by third readings, considerations of report, Bills in progress in Committee, Bills appointed for Committee, and second readings, —

XII. Standing Committees. The resolutions of '82 relating to the constitution and proceedings of standing (or grand) committees for the consideration (1) of Bills relating to law and courts of justice and legal procedure, and (2) to trade, shipping, and manufactures, were revived, trade being ordered to include agriculture and fishing. Other resolutions passed by the House provided that motions for Bills and for the nomination of select committees, might be set down for consideration at the commencement of public business, and that, if such motions were opposed, the Speaker, after permitting if he thinks fit a brief explanatory statement from the member who moves, and from the member who opposes, any such motion respectively, may put the question thereon, or the question that the debate be adjourned; that when the House meets at 2 o'clock for a morning sitting, the sitting shall be suspended at 7 (no opposed business to be taken after 10 minutes to 7), and shall be resumed at 9, and continued, unless previously adjourned, until 1 o'clock a.m., when the Speaker is to adjourn the House without question put, unless business exempted from the operation of the Standing Order sittings of the House be then under consideration. It will thus be seen that when the House meets at 3, opposed business is as a rule not taken after midnight, but that when it meets at 2 o'clock opposed business may be proceeded with until 1 a.m. On Wednesdays the House meets at noon, opposed business is not taken after 5.30, and the House adjourns at 6. Several old standing orders, which were inconsistent with or which had been superseded by the new rules, were repealed, among them being the well-known half-past twelve rule.

Parliaments, Clerk of the. An officer of the House of Lords, by whom, in conjunction with the Clerk Assistant and the Reading Clerk, is performed such duties as making minutes of the proceedings, swearing peers and witnesses, and signifying the Royal assent to bills which have passed both Houses. The Clerk of the House of Commons acts as chairman and is addressed by members during the election of Speaker. All members are sworn by him and introduced to the Speaker, and the roll is subscribed under his supervision. He reads the order of the day, turns a sand-glass when a division is called, reads petitions if required, and takes charge of accounts and

papers. He, like the Clerk of the Parliaments, is appointed by the Crown, and is associated with two clerks assistant, who make minutes of the proceedings. The office of Clerk of the Parliaments is held by Mr. Henry J. L. Graham; and Mr. Reginald Palgrave, C.B., is Clerk of the House of Commons.

Parnell, Charles Stewart, M.P., b. at Avondale, in county Wicklow, 1846, is a descendant of Parnell the poet, and his family have been associated with Irish parliamentary life for upwards of a century. His great-grandfather, Sir John Parnell, was Chancellor of the Exchequer in Grattan's Parliament, and the most vigorous opponent of the Act of Union, for his denunciation of which he was dismissed from office, he having previously resisted all efforts of the Imperial Government to allure him into acceptance of their proposals. The family came originally from Congleton, Cheshire; and Sir Henry Parnell, grand-uncle of Mr. Parnell, and a prominent member of the English Parliament in the time of Lord Grey and Lord Melbourne, under whom he held offices of distinction, when raised to the peerage, took the title of Lord Congleton. Mr. Parnell was educated at Cambridge University, but did not take any degree. After a tour in America—his mother is an American by birth, daughter of Admiral Charles Stewart, a famous American sailor—he settled down on his property in Avondale; was High Sheriff of the county in 1874; wished to stand for the county, but was not allowed to resign his office. A month later, when Colonel Taylor, on appointment to the Chancellorship of the Duchy of Lancaster, sought re-election, Mr. Parnell opposed him, but was defeated. Stood for county Meath on the death of John Martin (1875), and was elected. First took an active part in parliamentary affairs in the session of 1876, when in association with Mr. Biggar he initiated what was known by the various names of the "obstructive" and the "active" policy. He opposed with great persistence the bill for annexing the Transvaal; the flogging clauses in the Mutiny Act; and the Prisons Bill; and there were many scenes of violence and excitement, and several all-night sittings of the House. He finally succeeded in getting some modifications in the treatment of political prisoners introduced into the Prisons Bill; and being joined by Mr. Chamberlain and other leading Radicals, he led to the abolition of flogging in the army. He joined in the foundation of the Land League (*q.v.*), and October '79 was elected its first president. He first, at a meeting at Westport in the previous June, used the phrase "Keep a firm grip of your homesteads," which became the watchword of the agitation. He went to America in December '79, raised the sum of £70,000 in aid of the distress then widespread in Ireland, and for the Land League movement. At the general election of 1880 he was elected for county Meath, county Mayo, and the city of Cork; and elected to sit for the last mentioned place. He was elected in May 1880 leader of the new party by twenty-three votes to eighteen for Mr. Shaw. He took an active part in the Land League agitation outside parliament, and in the debates in the House; and after the Land Act was passed was arrested in October 1881 on a charge of intimidation and obstructing the working of that Act. He was released on parole in April 1882, and finally in May. At the general election of 1885 he was

re-elected for Cork, and his action in influencing the Irish vote secured the return of many Conservative candidates, and proportionally weakened the Liberal party, with whom, however, Mr. Parnell later on formed an alliance, and by the vote of the Irish party overthrew the former Government of Lord Salisbury on Mr. Jesse Collings' amendment to the Address (Jan. 30th, 1886). Mr. Parnell's name has been prominently before the public in connection with the Home Rule proposals of Mr. Gladstone. He introduced a land bill in the beginning of 1887, which was rejected, though its leading provisions with modifications were subsequently embodied in the Government's own measure. Later in the session a sensation was caused by the publication in the *Times* newspaper of the facsimile of a letter purporting to have been written by Mr. Parnell to a member of the party of Irish Invincibles, excusing the murder of Mr. Burke, though regretting that of Lord Frederick Cavendish. On the night of the publication of this document Mr. Parnell returned to the House of Commons, from which he had been absent, and in an animated speech denounced the letter as a base and infamous forgery. Subsequently, on a motion of Sir Charles Lewis—which, though demanding that the publisher of the *Times* should be brought to the bar of the House, was not framed in the interests of the Irish Party—the prominent Irish members promptly demanded that the question of the authenticity of the letter should be investigated by a committee of the House of Commons, composed, if the House thought fit, entirely of Conservative members. The Government declined to grant a committee, but promised that if Mr. Parnell liked to take action against the *Times*, he should have the assistance of the law officers of the Crown, a proposal which was treated with ridicule by the Irish members and their friends. Mr. Parnell refused to bring an action for libel on account of the alleged forgeries and the charges of complicity with assassins, brought against him and his associates in the series of articles published by the *Times* under the title of "**Parnellism and Crime**," because he had no confidence in a Middlesex jury. After the collapse of the action brought against the *Times* in May '88, by Mr. Frank Hugh O'Donnell, a former colleague, at which other damaging letters were put in by the Attorney-General, Mr. Parnell again demanded a **Parliamentary inquiry**, and alleged that these other letters were also forgeries. The Government refused to grant a committee of the House on a question of privilege, but decided that the whole of the charges against Mr. Parnell and the Irish party should be investigated by a Commission of judges, consisting of Sir James Hannen, Mr. Justice Smith, and Mr. Justice Day (see **PARNELL COMMISSION**, and **SESSION, PARLIAMENTARY** '89). Mr. Parnell was represented at the Commission by Sir Charles Russell, Q.C., M.P. (*q.v.*), who delivered a most eloquent oration, and by Mr. H. H. Asquith, M.P. (*q.v.*). Up to the exposure of the Pigott forgeries he was a regular attendant at the Court. On April 30th, '89, he entered the witness-box, and with remarkable coolness went through the ordeal of several days' examination and cross-examination. Subsequently he attended great meetings at the Memorial Hall and St. James's Hall, and was received

with extraordinary enthusiasm. He sought to bring an action for damages against the *Times* in Edinburgh, but Lord Kinnear held there was no jurisdiction. He was presented with the freedom of Edinburgh, July 20th, '89, and was present at a large meeting in the Corn Exchange, when an address by 146 Liberal associations was presented to him.

Parnell Commission, The. Was constituted under an Act of Parliament for the purpose of inquiring into the charges and allegations made against certain members of Parliament and other persons by the defendants in the trial of an action heard in August entitled "*O'Donnell v. Walter and another*," in which the plaintiff was Mr. Frank Hugh O'Donnell, a former member of the Parnellite party in the House of Commons, the action being brought against the *Times* newspaper in connection with the publication of the articles "*Parnellism and Crime*." The effect of the charges made against Mr. Parnell and other members of the Irish party was that they were members of a conspiracy and organisation which had for its ultimate object the establishment of the absolute independence of Ireland as a separate nation, and the expulsion from the country of the Irish landlords; and that the mode of action was to organise a system of coercion and intimidation in Ireland, which was sustained and enforced by boycotting and the commission of crimes and outrages, and that they knowingly associated with persons guilty of crime or the advocates of treason, sedition, assassination, and violence. Letters were also alleged to have been written by Mr. Parnell proving his complicity in, and sanction of, crime, but these letters were denounced by Mr. Parnell as forgeries. The Commissioners appointed were Sir James Hannen (president), Mr. Justice Day, and Mr. Justice Smith; and Mr. H. Cunyngname was nominated as secretary. A preliminary meeting was held on Sept. 17th, when Monday, Oct. 22nd, was fixed for the actual commencement of the inquiry. The counsel engaged were:—For the *Times*, the Attorney-General, Sir R. E. Webster, Q.C., M.P. (q.v.), Sir H. James, Q.C., M.P. (q.v.), and Messrs. Murphy, Q.C., Graham, and Askwith, of the English bar, and Mr. Atkinson, Q.C., and Mr. Ronan, of the Irish bar. Mr. Parnell was represented by Sir Charles Russell, Q.C., M.P. (q.v.), and Mr. Asquith, M.P. (q.v.); and for such of the other members of Parliament against whom charges and allegations have been brought who do not appear in person, Mr. R. T. Reid, Q.C., M.P., Mr. Frank Lockwood, Q.C., M.P. (q.v.), Mr. Lionel Hart, Mr. A. O'Connor, M.P., and Mr. A. Russell of the English bar, and Mr. T. Harrington, M.P., of the Irish bar, appear. The opening speech of the Attorney-General occupied five days. He alleged that a connection existed between certain Parnellite members and the extreme men of the dynamite section in America, and referred to the large sums which had been received from that source. He quoted speeches delivered at crimes and outrages committed in the counties of Galway, Mayo, Clare, Kerry and Cork, in support of his contention that concurrently with the delivery of the speeches, and following directly thereon, outrages increased both in number and violence. Referring to the letters incriminating Mr. Parnell, and which were alleged to be forgeries, the Attorney-General said that at the proper time all the names of the persons connected with the way and the circumstances in which these

communications were obtained, and the sum of money which was paid for them, would be laid before the Court. After the first week it was decided that the Commission should sit for four days in each week—Tuesdays, Wednesdays, Thursdays and Fridays. On Tuesday, Oct. 30th, the first sitting of the second week, a long discussion took place as to the disclosure of the bank books of the Land and National Leagues, counsel appearing specially for the Hibernian and National Banks. The result was that an order was made for the disclosure of the books. The evidence commenced with the proof of speeches by public shorthand writers, but at the seventh sitting (Nov. 1st), Capt. O'Shea was called, as it was stated that he wished to go abroad. He made a statement relating to the *Kilmainham Treaty*, and in cross-examination alleged that all the memoranda relating thereto had been destroyed, as Sir William Harcourt had told him that Mr. Gladstone desired him to be "reticent." Capt. O'Shea added that, from his experience of the handwriting of Mr. Parnell, he believed that the signature to the incriminating letters was Mr. Parnell's. Owing to the time taken up by the reading of the numerous speeches referred to in the opening, an arrangement was come to that they should be printed in full and that the portions relied upon by the *Times* should be indicated. Evidence was then given of the outrages in Galway, Kerry, and other counties; the principal being the murder of the *Huddys*, whose bodies could not be found for three weeks, and were eventually discovered in Lough Mask. Miss Blake detailed the painful circumstances of the murder of her husband and a servant as they were driving into Loughrea on a fair day. Lady Mountmorres was called to prove her husband's murder, and the hostility of the people to herself and her children, and fainting whilst she was under cross-examination by Sir Charles Russell, who asked no further questions. Miss Lizzie Curran and Miss Norah Fitzmaurice also related the tragic circumstances under which in each case their father lost his life. On Tuesday, Nov. 20th, the Attorney-General called attention to an article in the *Kerry Sentinel*, of which Mr. Edward Harrington, M.P., who is included amongst those against whom allegations are made, is editor, accusing the Commissioners of unfairness and partiality. On the next day Mr. Reid, Q.C., intimated that Mr. E. Harrington, one of the members for whom he appeared, had not thought fit to adopt his views, and therefore he was not in a position to address their lordships. Mr. E. Harrington then said he had nothing to say, except that he accepted the responsibility for whatever appeared in his paper. The judges retired to consult, and on their return the President said he hoped to have been spared the duty which devolved upon him; but following the precedent of the case of Onslow v. Whalley, they adjudged Mr. Harrington to pay a fine of £500 to the Queen. A mass of important evidence was given with the object of proving that the moonlighting outrages were connected with the League and were carried out by an "inner circle" known as "The Boys." On Dec. 24th, '88, the Attorney-General called attention to an article in *United Ireland* attacking the procedure of what it called "The Forgeries Commission," in wasting time in a meaningless parade of eight-year-old outrages, and demanding immediate investigation of the authenticity of the letters. He made an appli-

cation for the committal of **Mr. Wm. O'Brien** for contempt of Court. **Mr. Reid**, for **Mr. O'Brien**, thereupon made a similar application against **Mr. G. O. Brodrick**, Warden of Merton College, Oxford, who, in a speech intended to be humorous, had made use of language interpreted as instituting a comparison between the "persons charged" and the Whitechapel murderer. On the resumption of the Court on Jan. 15th, '89, **Mr. O'Brien** appeared before their Lordships, and made a speech accepting full responsibility for the article, denying that it implied disrespect or discourtesy to the Court, expressing his regret if it did so, and boldly claiming that he had a perfect right as a public journalist to comment upon the procedure of the Commission. The President having laid down rules the Court considered should govern public writers with regard to the Commission, and declined to admit that **Mr. O'Brien** had established his right to make the comments in the article complained of, stated that in no case would the Court have thought it necessary to inflict more than a lenient punishment upon **Mr. O'Brien**, but that for many reasons which appeared to them to have weight, they had decided to remit any punishment in this case. **Mr. Brodrick** having denied the interpretation put upon his words, and having expressed regret, the President decided that no further action was necessary. **Major Deane Tanner** was then called, and gave evidence of intimidation and refusal to pay reasonable rents after the establishment of the Land League in Tipperary, where he had agencies. **Francis Iago**, a member of the Committee of the Killoo branch of the Land League, gave evidence of outrage following upon resolutions of boycotting. He admitted giving a man named Houligan "a stroke" from the effects of which he died, and said he was appointed by the League, with Kane, who had been evicted from the farm Houligan had taken, to lie in wait for the latter. Cross-examined by **Sir Charles Russell**, he said he was sworn into a moonlighting society, was in communication with the police during the time of the outrages of which he had given evidence, and had twice undergone sentences of two months' imprisonment for assault. **Patrick Delaney**, an imprisoned Fenian, said that in '75 he joined the Fenian organisation, and took an oath "to take up arms at a moment's notice to gain the independence of Ireland and to be obedient to superior officers." He was a member until his arrest in '82; **Patrick Egan**, **Thomas Brennan**, **Dr. M. Alister**, and **John Devoy** were the principal leaders. **Dr. Kenealy**, **John Devoy**, and **General Millen** came over from America in '79 as delegates from the Supreme Council to inquire into the work of the organisation. Arms were to be given by the American body. The leaders had secret meetings with these delegates. After the Land League meeting in the Rotunda, Dublin, at which there was organised Fenian opposition in favour of a Fenian leader, **Hanlon**, orders were given to the Fenian "centres" to support the League, it being represented to the centres at that time that the League was to "organise the country" while the Fenian party would supply the arms "and do the remainder of the work." The witness gave particulars of the Fenian organisation, from which it appeared there were a number of "circles," under the control of "B's," each "B" having ten or more men under his control. Of higher authority than

the "B's" was the "centre," of whom there might be more than one for each "circle." **P. J. Sheridan** and **P. N. Fitzgerald** were members of the Supreme Council of Centres. **Matthew Harris** was represented as one of the centres of County Galway. He (witness) first knew of the Invincibles in '82, and he joined them. **Sheridan** and **Brennan** were the leaders. He gave the names of several Invincibles, and it appeared that he was one of a party told off to murder **Judge Lawson**. He knew that **Mr. Anderson**, Crown Solicitor, and **Mr. Bourke**, Chairman of the Prison Board, were watched for the purpose of assassination. The principal part of the Invincible Oath enjoined the assassination of "the Lord Lieutenant, the Chief Secretary, and all obnoxious Government officials." The Invincibles got their money from the Land League through **Patrick Egan**, **Francis Byrne**, and **Tynan** ("No. 1"); **James Mullett**, at whose public-house in Dublin the Invincibles held their meetings, and **James Carey** kept it. "The first instalment **Mullett** got was £50," he said; "there were several sums—some of them £300 or £400." The Invincibles had "higher class arms" than members of the Fenian organisation proper—better rifles, revolvers, and also daggers and knives. He saw four knives that had been brought over by **Mr. Frank Byrne**. He had orders to watch **Mr. Forster** at the beginning of 1882, at Queen Street Bridge, and his instructions were "to shoot anybody who should pass over the bridge while **Mr. Forster** was being assassinated" by two other men. He had no actual part in the Phoenix Park murders, but was told off to watch in the Park, and did not learn of the murders until after they were committed. Afterwards he took some knives from **Carey** at his request to **Brady**, who destroyed them. In cross-examination by **Sir Charles Russell** he said he had never met **Sheridan**, **Egan**, and **Brennan** at an Invincible meeting, but that it was represented to all the Invincibles that they were the leaders of the conspiracy. In connection with this witness a number of letters were read to and from **Mr. Matt. Harris**, showing that **Mr. Harris** was at that time (1880) in correspondence with **Brennan**, **Davitt**, and **O'Leary**; and in one letter **Mr. Davitt** wrote from New York describing **O'Donovan Rossa** as a "blatant ass," a "cowardly low ruffian," who had not "sufficient courage to set fire to a British haysack." At this stage of the case the question was raised as to whether witnesses could be examined with regard to the Plan of Campaign, **Mr. Reid** objecting; and finally the Attorney-General undertook not to give evidence of the Plan of Campaign as an independent branch of the question. The evidence of several Land Agents, Resident Magistrates, and constabulary officers upon the condition of various parts of Ireland subsequent to 1879, was then proceeded with. The evidence of the former was almost invariably to the effect that before the establishment of the Land League in their respective localities there was no difficulty in obtaining rents, and that tenants were able to pay the rents demanded, and did pay them without disaffection; that outrage arising out of agrarian disputes was unknown, or, if not unknown, very rare; that they knew of no outrage prior to '79 or '80 committed upon men because they had paid their rent or taken farms from which others had been evicted; that no

moonlighting was known, and that the term "land-grabber" was not current. **Captain Plunket**, who had had twenty-two years' experience as resident magistrate in Longford, Sligo, Mayo, Meath, Cork, Limerick, and Kerry, deposed that there was no agrarian organisation against the payment of rent or the taking of evicted farms before 1879, and no outrage upon persons who did either, though secret societies, the chief of which was the Ribbon Society in County Meath, did exist, and were responsible for a proportion of crime. He gave evidence of the growth of the practice among the people of forcibly resisting evictions, and concerning crime in Kerry said it took place in those districts where the land was good and not amongst the poorest of the peasantry. He claimed that crime followed inflammatory speeches delivered in his districts, and said he did not know of the existence of moonlighters prior to '79, nor of any other body than the moonlighters who executed the behests of the League. Evidence to connect the Land League with the Fenian and invincible organisations was given by **Patrick J. Farragher**, a clerk formerly employed in the League offices in Dublin, and he deposed to taking letters on several occasions from Egan to James Mullett, and that in two of the letters there were cheques. A batch of correspondence was read showing that the Land League was, at that time making remittances for the defence of prisoners charged in various parts of Ireland with agrarian crime, and in getting up test rent cases to be fought out in the Courts. Subsequently correspondence was produced by district inspectors of police as the result of raids upon local branches of the League, strengthening these facts, and showing also that after the suppression of the League the Ladies' Land League carried on its operations. A number of speeches delivered by Mr. Biggar, Mr. Walsh, Mr. J. W. Nally, Mr. Dillon, Mr. Parnell, Mr. T. Brennan, and other leaders in the earlier stages of the Land League movement, were read at this point. Evidence was resumed by the calling of **Major Le Caron**, on Feb. 5th. The evidence of this witness opened the American part of the case. Examined by the Attorney-General, he said his baptismal name was **Thomas Willis Beach**, and that he was born in Colchester in 1847. He went to the United States in 1861, served with the Northern army, and became regimental adjutant, with the rank of major. He was known as **Major Le Caron**, and passed under that name only. In 1865 he joined the Fenian organisation and became military organiser for the United States. He took part in the Philadelphia Convention of 1869 for the Fenian invasion of Canada, and communicated every detail to the Canadian Government. Two attempted descents were made upon Canada (1866 and 1870), and both were "miserable failures." He then graduated as a doctor, and practised medicine near Chicago. In 1875 a communication was made to him about the Fenian organisation; he communicated with the British Government, received instructions from it, and joined the new development, which was known as the United Brotherhood, always spoken of as the "V.C." The "V.C." was also the Clan-na-Gael. The executive body of this organisation consisted of one member from each district into which the country was divided, acting in connexion with

the chairman, secretary, and treasurer. A cipher was employed consisting of the use of the letter following an initial letter of a word. The object was "to bring about the establishment of an Irish Republic, of an independent Republic in Ireland, and the independence of that nation; and it was believed that the only method whereby that could be accomplished was by the force of arms." It was "to prepare unceasingly for an armed insurrection in Jasmboe (Ireland)" and assist "with money, war material, and men." The military department was to be "a special organisation under the supreme control" of the executive body. He was appointed senior guardian of Camp 463 (Illinois). There was a "skirmishing fund," of which J. J. Breslin, John Devoy, and Dr. Carroll were trustees. In 1879 J. Devoy and General Millen were sent to Ireland as envoys, to report on the condition of the "I.R.B.," the members of which were interchangeable with the V.C. They reported to the Pennsylvania Convention of August 1879, and as a result arms were shipped to Ireland through James J. O'Kelly. Patrick McLeamy was to plan matters "relating to destruction by dynamite, torpedoes, and hand grenades." After this convention O'Donovan Rossa was expelled for malfeasance in office, and formed a rival organisation. In April 1881 witness came to Paris and saw **Patrick Egan** and O'Leary. Egan told him he saw no reason why there should not be a "perfect understanding" between the open movement (the Land League) and the revolutionary organisation. Egan told him that he had paid money out of Land League funds for Dutch officers to assist the Boers in the South African war. He came to London with Egan, and was introduced by him to Mr. Parnell in the lobby of the House of Commons as "one of our friends from America." Nothing of importance passed. On a subsequent occasion he saw Mr. Parnell with Mr. O'Kelly in the lobby, and the latter having suggested that he (Le Caron) should use his influence with his friends on the other side to bring about a little coercion on their part to bring the organisations into line on this side of the water, Mr. Parnell said: "You furnish the sinews of war; you have them in your power; if they do not do as you tell them, stop the supplies. The whole matter rests in your hands." Mr. Parnell "expressly wished" that Le Caron on his return to New York should see Devoy, Carroll, and W. J. Hynes, and "lay the situation before them with reference to the necessity for bringing about a thorough understanding." Mr. Parnell said: "There need be no misunderstanding; we are working for a common purpose—for the independence of Ireland, just as you are doing; for I have long ceased to believe that anything but force of arms will ever bring about the redemption of Ireland." In the course of a conversation lasting about three-quarters of an hour Mr. Parnell said "he did not see any reason why an insurrectionary movement, when we were prepared to send money and men who were armed and organised—why a successful insurrectionary movement should not be inaugurated in Ireland." He said that, judging from the outlook, they would soon have in the Land League treasury £100,000, which would form a pretty good nucleus. He added, "You fellows ought to do as well as that." He then entered slightly into the question of time, and also slightly into the question of the number of men and amount of

money that would be required. He (Le Caron) went to Dublin with introductions from Egan, and saw Mr. T. Sexton and other Irish members, and Boyton, Sheridan, and others. On his return to America the Chicago Convention (Nov. '87) was held, a preliminary caucus convention having previously been held to "control, manipulate, and run" the open Convention. From that Convention he dated "a perfect understanding" between the "open" and the "insurrectionary" organisations. The reports of committees presented to this Convention revealed the "establishment of a special department for the study of the use of chemicals, engineering, mining, and other branches of the higher technical departments of warfare suitable to the advance of the age," and that a "dynamite policy" had been determined upon. Mention was also made of plans to fit out armed cruisers "to some little place that the English had occupied" in South America (witness forgot the name), and for the rescue of Michael Davitt, then in gaol. The Convention passed a resolution approving whatever steps the Executive might take. The *Skirmishing Fund Committee's* report showed the total receipts to be \$91,453.57, and the expenses \$85,666.92. Of these expenses \$31,188 figured as "purchase of Bonds"; \$23,345 as "new submarine vessel"; \$2000 as "subsidising foreign newspapers"; \$1532 "Land League trial (Davitt)," and \$865 "reception of Parnell." The "new submarine vessel" was intended to be used to attack British vessels under water, but it was a failure. The witness produced a number of circulars, couched in bombastic language, relating to the inner working of the V.C. At the Chicago Convention Mr. T. P. O'Connor and Mr. T. Healy were present. In April '83 there was an "open convention of the Land League in Philadelphia," controlled by caucus meetings previously. Egan, Brennan, J. J. O'Leary, and M. J. Boyton attended. Another "Irish National League Convention" was held at Boston in '84, at which the "V.C." men were instructed to vote down every proposition to denounce physical force. Egan was there, and related to him (witness) how he had escaped from Ireland. During this part of the evidence it was elicited that men were sent to London to commit dynamite outrages, one, Gallagher, being convicted, and another, Lomassay, being supposed to have been blown up in the dynamite explosion at London Bridge. Five resolutions were passed at this convention. The first pledged the convention to support the Irish Parliamentary party; the second congratulated the Irish National League of America on having stemmed the tide of enforced emigration from Ireland; the third congratulated William O'Brien, M.P., of *United Ireland*, on the exposure of Dublin Castle immorality; the fourth urged the study of the Irish language; and the fifth thanked the National League of America for its colonisation scheme to provide homes for Irish emigrants. A further batch of secret circulars was, however, read, showing the dangerous activity of the V.C., notwithstanding the harmless character of these resolutions. Cross-examined by Sir C. Russell, Major Le Caron said he periodically took oaths to observe secrecy in the business of the organisation, intending to break them. From 1865 he did all he could to get into the confidence of the agents and parties concerned in the revolutionary organisation, with a view to betray their confidence. He had made "many,

many hundreds" of communications to different officials of the British Government. He got a large bundle of them from Dr. Anderson, of the Home Office, before giving evidence, who gave him a note introducing him to Houston. He offered his evidence to the *Times*. He regarded himself as a military spy in the service of his country. He had received money from the Government in payment of his services, but at times not so much as he had had to expend in obtaining information. At one time the V.C. numbered 23,000 members. The suppression of the Land League gave it a great impetus. Concerning *Mr. Parnell's visit to America*, in '80, he claimed that the arrangements for his reception were almost exclusively in the hands of the revolutionary organisation, and was severely cross-examined to show that on the contrary the arrangements were carried out by public men of repute. As to the conversations with Mr. Parnell and Mr. O'Kelly in the House of Commons he made no memorandum of them at the time, and had had no further communication with either gentleman. He adhered to the substantial accuracy of his report of those conversations. Coming to the conventions, Sir Charles Russell subjected him to a searching cross-examination with the object of showing that the revolutionary organisation and the Land League movement in America were in direct antagonism. The evidence of the witness created great public interest, and his revelations of the inner working of the "V.C." caused much sensation. Newspaper extracts bearing upon the American part of the case were next read, and further evidence of violent speeches, outrage and boycotting in Ireland taken by the Attorney-General.—On Feb. 14th Mr. Joseph *Soames*, solicitor for the *Times*, was called, and produced a number of Land League documents. Cross-examined by Sir Charles Russell, he said he was first consulted by the *Times* with reference to the publication of the alleged letter by Mr. Parnell dated 15th May, 1882, at the end of '86. He identified five of the seven alleged *Parnell Letters* (see end of this article for reproductions) as having been shown him by Mr. Macdonald, the manager of the *Times*. In the early part of '87 they were submitted to an expert. He (witness) made a collection of genuine Parnell letters. Subsequent to the trial of "*O'Donnell v. Walter*" he learnt that Mr. Macdonald had obtained the Parnell and Egan letters from Mr. Houston, and he afterwards learnt from Mr. Pigott that Houston had obtained them from Pigott. He knew the Parnell letter (May 15th) was to be published in connection with some articles which in the early part of '87 he learnt were going to be published. Long subsequent to the publication of the articles "*Parnellism and Crime*" he learned that they were prepared by Mr. Flanagan, one of the *Times* staff. Mr. Macdonald told him that he had given his pledge that he would not divulge the source from which the letters came. There were seven letters purporting to come from Mr. Parnell and six from Egan. He paid money to *Mr. Houston*—£1000 by cheque on May 4th, '87, £200 in July, £30 on Oct. 8th, and £40 on Dec. 13th following—but he made no specific payments for the letters, these sums being paid to Houston on Mr. Macdonald's instructions to recoup Houston for expenses incurred. In '88 he also paid to Houston in like manner £180 or £200 on Jan. 27th, £550 on Feb. 16th, £342 on July 26th, £700 on

Sept. 19th, and various small sums. He had no doubt that the seven signatures to the Parnell letters of '84 were genuine. He had an interview with Pigott in Oct. '88, and Pigott told him that he obtained the letters for Houston in his private capacity. He never at any time asked Pigott whence he had got them, for Pigott told him at the outset that he was obliged not to divulge the name. He (witness) had no information whatever of the source of the letters, and he believed Mr. Macdonald was in the same state of ignorance. As to the Davitt letter, Mr. Davitt said that was a forgery in his (witness's) office almost before it was in his hand to look at. Mr. Davitt, he believed, had come with his mind prepared to say it was a forgery. He was severely cross-examined with regard to variations in the signatures of the alleged Parnell letters and admittedly genuine letters by Mr. Parnell and Mr. Egan, but held to his belief that the contested signatures were genuine. Mr. Macdonald had handed him in court ten days prior to his examination letters that had passed between Pigott, Mr. Labouchere, and Mr. Geo. Lewis. Pigott had had interviews with them, and Mr. Labouchere had sent him several sums—he thought £10 at a time. Pigott had received nothing directly from the *Times* in respect of the letters. Pigott told him that he had told Mr. Lewis he did not forge the letters, though Mr. Lewis had tried to make him say so. Pigott showed witness a letter from Mr. Lewis accusing him of having admitted that he had forged them. Thereupon, on witness's instructions, Pigott made a *statutory declaration* relating all that had passed between himself and Mr. Lewis, "including an offer of £1,000 by Mr. Labouchere if he would go into the witness-box and say he forged the letters." The *Times* had paid £40 or £50 to Pigott for expenses, but he told Pigott distinctly that he would not make any arrangement with him, and would not promise him a single sixpence. He knew that Pigott demanded £5,000 as provision to live abroad after the case was over, and he told him that he might be satisfied that the *Times* would never see him ruined for going into court and telling honestly all he knew. Further than that he refused to discuss the subject with him. He had had Pigott watched by a detective, and traced him to Mr. Labouchere's house. Asked what was the total amount he had paid Houston "for all purposes," he replied, about £3,000; Moser, a detective, and Kirby and Thompson, all employed in getting up the case for the *Times* in Great Britain and in America, he had paid about £1,400, "some hundreds," and £500 respectively.—The next witness was Mr. J. E. Woolcott, of the Central News, who interviewed Mr. Parnell in the House of Commons on the evening of the publication of the letter of May 15th, and testified to the accuracy of the published denials Mr. Parnell made of its genuineness, in which he instituted several comparisons between the forged signature and his own. Mr. Parnell's statements in Parliament denying the authenticity of the series of letters (see reproductions *infra*), were next read.—The next witness was Mr. John Cameron Macdonald, the manager of the *Times*. He related that in the middle of '86 Houston made a communication to him through Mr. Buckle, the editor, and five Parnell and five Egan letters were brought to him. He stipulated that the letters "should be submitted to the solicitor for

the paper, and their legal value and authenticity decided upon," and promised Houston that if use was made of them he would be paid the price he represented he had had to pay for them. The letters were submitted to experts, and on April 18th ('87) he published the *facsimile letter* in the certain belief that it was a genuine letter of Mr. Parnell. In the autumn of that year he got two more Parnell letters from Houston, and a letter purporting to be from P. Egan to Carey. He gave Houston a pledge of secrecy. Cross-examined by Mr. Asquith, witness said Mr. Buckle told him that Houston had called, suggesting that the *Times* should obtain certain compromising letters that were known to be in existence, conveying that he was not in possession of the documents himself. This was in June '86. In October Houston came again and submitted the letters to him, Mr. Buckle having referred him to witness. There were no envelopes with the letters, Houston telling him that the practice of the leaders of the Irish party was that "the body of a letter should be written in one handwriting, the signature by the party issuing the letter, and the envelope in the handwriting of a third person. With this explanation he was satisfied. Asked whether it did not occur to him that the existence of envelopes with stamps and postmarks would be most important when the authenticity of the letters came to be considered, he said he had no doubt that that was the view of the writers, and that if he were engaged in a dangerous affair of State he should pursue the exact course which was taken with respect to these letters. He did not ask Houston from whom he got the letters, but subsequently learned that they had been submitted to Lord Hartington, though he never heard that they were offered to the *Pall Mall Gazette* for £1,000. Houston represented that the five alleged letters of Mr. Parnell and six of Egan had cost him £1,780, but he (witness) made no inquiry of him to whom, when, how, and where this money had been paid by Houston. He thought from the very beginning that the letters were genuine, and chose the moment for the division on the second reading of Mr. Balfour's Crimes Bill as an opportune time for the publication of the alleged facsimile letter of Mr. Parnell. When Houston brought the second and third batches of letters to him he still made no inquiry as to the source from which he obtained them. He first learned from Houston that Pigott had supplied them early in '87. He knew nothing of Pigott except in a general way that he had been proprietor of the *Irishman*, and did not inquire.—Mr. Edward Caulfield Houston, who described himself as a journalist, was next called. He said he was secretary of the Irish Loyal and Patriotic Union—"a sort of anti-Land League." In '85 he published a pamphlet "*Parnellism Unmasked*," the materials for which were supplied him by Richard Pigott, whom he knew as the editor of the *Irishman*. He gave Pigott a guinea a day and hotel and travelling expenses for the collection of information "for newspaper purposes," and Pigott went to Lausanne and represented to him that a man named Eugene Davis could obtain compromising correspondence. Pigott made several journeys to Paris in connection with this matter, and informed him that the letters in question had been left in a bag in the same room in Paris in which Frank Byrne was arrested, and that they had either been in his

possession or that of a man named Kelly, who was supposed to have purchased the knives used in the Phoenix Park murders. Pigott told him that the letters could not be given up without communication with certain people in New York, and he therefore sent Pigott to America. Pigott returned in May '86, and brought back a sealed letter, which he said he had got from J. J. Breslin, addressed to some one in Paris. Pigott then went to Paris and brought back eleven letters, the five "Parnell" letters and the six "Egan" letters, together with a number of scraps of paper headed "House of Commons," and a scrap purporting to be from an account book. Dr. Maguire, of Dublin, had lent him £850 to pay expenses for obtaining the letters. He took the letters to Mr. Macdonald. He subsequently obtained from Pigott two more "Parnell" letters (June 10th), and letters purporting to be by Egan, Davitt, and O'Kelly. He had destroyed correspondence with Pigott and other documents from time to time. Cross-examined by Sir Charles Russell, he said that, after being subpoenaed by Mr. Lewis for Mr. Parnell, he destroyed a batch of letters from Pigott, some of them being from America, Paris, and Lausanne. This destruction took place after the sitting of the Commission. At this time he knew it was imputed that Pigott was the forger of the letters, but Pigott had made to him a sworn statement denying that, and asserting that the letters were genuine. He gave Pigott an undertaking that he would destroy his letters. He went to Paris with Dr. Maguire, and with him received the letters from Pigott. He was present in Mr. Soames' office when Pigott demanded £5000 for his evidence. Pigott had written him an abusive letter prior to making the demand.—The next witness was Richard Pigott, who gave his age as fifty-four, and described himself as a journalist and part proprietor of the *Irishman*. He joined the Fenian brotherhood in '65, and in Feb. '68 served six months' imprisonment for an article written on the Manchester executions. He said the amnesty association formed in '70 was composed of Fenians, and that Mr. Parnell was a member. James O'Connor was his sub-editor on the *Irishman*, who gave the Land League agitation "an independent support." The paper was the organ of the Irish Republican brotherhood, and was sold to the League in Aug. '81, the negotiations being conducted by Mr. Patrick Egan and Mr. Parnell; the *Flag of Ireland*, another paper of his, was sold to the League at the same time, and became *United Ireland* (q.v.). Houston found him out in '85, and published his pamphlet "*Parnellism Unmasked*." He wrote other pamphlets for Houston, and ultimately made an arrangement to try and obtain documents compromising the Land League leaders. The witness detailed an interview with Eugene Davis at Lausanne, and his journeys to Paris, where, he said, he was accosted in the street one day by a man who said his name was Murphy, and who had been a compositor in the *Irishman* office. This man was the agent of the Clan-na-Gael in New York, and was over on the Society's business. He made inquiries for witness about documents which had been mentioned by Davis, and ultimately said he had found some letters of Egan and Mr. Parnell in a bag. Murphy asked for £1000 for the letters, but came down to £500. He received the contents of the bag from him after he

(witness) had journeyed to America and obtained from Breslin a sealed letter to Murphy, whom he ultimately paid £200. He gave the letters to Houston. He related to the Court that on Oct. 23rd he wrote to Mr. Labouchere, from the London hotel at which he was staying for the purpose of giving evidence before the Commission, and asked for an interview, and several letters that passed between him and Mr. Labouchere were read. On Oct. 26th he had an interview with Mr. Parnell and Mr. Labouchere at the house of the latter in Grosvenor Gardens. Mr. Parnell then told him that they held proofs that would convict him of the forgery of all the letters, and Mr. Labouchere, who was "rather facetious," proposed that he should go into the witness-box and swear that he forged the letters. Then Mr. Geo. Lewis was introduced, and "denounced him as a forger." Mr. Labouchere had told him that he himself was prepared to pay him £1000 if he said he had forged the letters. He (Pigott) would not then make any arrangement; but the next morning Mr. Lewis came to his hotel, and took a statement from him of his evidence that he had already given to Mr. Soames. He later in the day saw Mr. Parnell and Mr. Lewis at the office of the latter, when both again charged him with forgery, and no "arrangement" was come to. He was anxious to avoid giving evidence lest he should be assassinated. Cross-examined by Sir Charles Russell, Pigott said he did not recollect writing to Earl Spencer in '84, the Home Secretary, and Sir George Trevelyan, offering information for money. Taxed with letters he had written to Archbishop Walsh, he prevaricated, and denied any recollection of the correspondence with his Grace, though he acknowledged the authorship of some and pretended ignorance of the meaning of numerous passages. He denied even his own handwriting. A letter of his was read, showing that in '81 he asked Mr. W. E. Forster for a sum of £1500 to carry on his papers, saying that they would be of great service to the Government in breaking up the League. Letters from him to Egan showed that at the same time he was trying to extort money from the Land League. A batch of letters from him to Mr. W. E. Forster were read, and the cross-examination revealed that they contained many untruths. The witness's answers were full of prevarication. He had received letters from Mr. Parnell with reference to the purchase of the *Irishman*, and it was shown that the forged letters contained similar phrases, which the witness could not account for. Neither could he explain the coincidence that the word hesitancy in the Parnell letter was spelt "hesitaney," that being an habitual error of his own. In this general connection the following can be quoted from the cross-examination:—"Can you suggest, except on the hypothesis of fraud and forgery, how this coincidence came about? Assuming that there was fraud and forgery on the other side, that the copies were forged.—But assuming that there was no forgery on the other side? I should say the coincidence would be curious.—Impossible to get over? Certainly not.—How do you get over it? It is not unusual for a man to use the same words and phrases. I do it myself constantly.—Supposing you wanted to forge a document, would it be any help to you to have before you a genuine letter written by the man whose

writing you wished to forge? Yes.—How would you use it? Copy it, of course.—How would you proceed to use it? I cannot say.—Just give us your best idea? I do not pretend to have any experience in that line, so I cannot say.—Just fancy yourself called upon to forge one of these letters? I decline to put myself in that position.—Let me suggest to you. Would you, for instance, put delicate tissue paper over the letter and trace it? Yes; but how would you proceed then?—Supposing you had a genuine letter and you wanted to copy a sentence from it, and supposing you were to put delicate tissue paper over it, you could trace it, at all events? That is the way you would do it.—But how would you do it? I think I should trust myself to copy it. Your way is much easier, certainly.—Why do you think that? Have you tried? No; I have not tried. It is apparent that your way would be much easier.—Is Mr. Parnell's a difficult signature to copy? I cannot tell.—What do you think? It is a peculiar signature.—A strongly marked signature? Yes.—Do you think that it is a kind of signature more easily or less easily copied? Really, I am not competent to give an opinion.—But I am very anxious to have your opinion. Speaking of hand, should you say that it is a signature easy or difficult to copy? I should say difficult, considering the peculiarities of the handwriting.—The witness had been under examination and cross examination throughout four days, and on Friday, Feb. 22nd, '89, the Commission adjourned till the following Tuesday, when Pigott was called and did not appear. The Attorney-General said he had no knowledge of his whereabouts, and that he had not been seen at his hotel since eleven o'clock on the Monday evening. Sir Charles Russell obtained a warrant for his arrest. He then made an application to at once call certain witnesses to put their lordships in possession of all information bearing upon Pigott's disappearance. He said a number of documents had been handed to Mr. Labouchere and himself relating to the forged letters before the Special Commission Act was proposed, and that those documents had since been in Mr. Lewis's possession. Mr. Lewis afterwards saw Pigott, and from him got his confession that the letters were forgeries, and that he had forged them while in a state of destitution. That confession would be corroborated by Mr. Parnell and Mr. Labouchere, Pigott having confessed to the latter gentleman in the presence of Mr. George Augustus Sala. Consequent upon that Mr. Lewis wrote to Pigott on Feb. 25th, saying that Mr. Parnell had instructed him to inform him (Pigott) that he declined to hold any communication with him directly or indirectly, and returning the confession, which was written and signed. He (Sir Charles Russell) asked that the constables who had charge of Pigott should be called to explain how he had escaped from justice, and that afterwards Mr. Lewis, Mr. Labouchere, and Mr. Parnell should be examined. Their lordships assented to this course, but first the Attorney-General was permitted to call Mr. Soames, who handed in correspondence showing that Pigott was reluctant to go into the witness-box, and was pressing for heavy monetary provision to be made for him. He said that when he found Pigott was negotiating with Mr. Labouchere he had him watched, and an Irish constable was in the hotel Friday, Satur-

day, Sunday, and Monday, to see that nobody interfered with the witness. Mr. Shannon, Dublin solicitor for the *Times*, gave evidence that he had seen Pigott after his cross-examination on Friday, and that he was in very low spirits. He saw him again on Sunday night, and on Monday received a letter from him, saying, "In my statement to Mr. Labouchere on Saturday I stated that I had forged the letters. That is not the case." This letter re-told with much detail the original story of how he obtained possession of the first batch of letters, but contained the admission that he had forged the two Parnell letters in the second batch. This he said he did in order to find the means to support himself and very large family. Cross-examined by Sir Charles Russell, Shannon said that the letter was written at his suggestion on Sunday night, that he was decidedly anxious that Pigott should reappear for cross-examination, and that he thought it impossible for him to flee; the man could, he said, "have gone away ages before if he had wished." He saw Pigott on Monday at two o'clock. Pigott was last seen by the manager of the hotel at four o'clock. Pigott complained to witness that Mr. Soames had not sent him any money; but it did not occur to him that he wanted money in order to get away. He did not directly or indirectly do anything to get Pigott out of the way. Mr. George Lewis was next called, and said, in reply to Sir Charles Russell, that he subpoenaed Pigott in Sept. '88, and had had him watched since October. He had nothing to do with the interview with Mr. Labouchere when Pigott made his confession beyond sending the letter returning it, and declining on Mr. Parnell's behalf to have anything further to do with him. Two members of the Royal Irish Constabulary were next called, but could throw no light upon Pigott's disappearance. On the following morning (Feb. 27th) the Attorney-General handed to the president a letter that had been received from Paris that morning by Mr. Shannon, and supposed to be from Pigott. It was opened by the president, and proved to be from Pigott. The envelope contained Pigott's written confession, Mr. Lewis's note returning it, and a note as follows:—"Hotel des Deux Mondes, 22, Avenue de l'Opéra, Paris (M. Leguen, Propre.). Tuesday. Dear Sir,—Just before I left enclosed was handed to me. It had been left while I was out. Will write again soon. Yours truly, R. Pigott." The enclosure was as follows:—"Saturday, Feb. 23rd, '89. I, Richard Pigott, am desirous of making a statement before H. Labouchere and G. A. Sala, and I make this of my own free will, and without any monetary inducement, in the house of the former.—My object is to correct inaccuracies in the report of my evidence in the *Times*, and also to make a full disclosure of the circumstances connected with the publication of the facsimile letter in the *Times*, and the other letters of Mr. Parnell, Mr. Egan, Mr. Davitt, and Mr. O'Kelly produced by the *Times* in evidence.—Corrections. I stated that after I disposed of my newspapers in the year '81 I continued in touch with the Irish Republican brotherhood. That is not so. I also stated of my own knowledge that Egan and others continued to be members of the Irish Republican brotherhood after the resignation of the positions held by them on the supreme council of that organisation. In my account of my interview with Davis at Lausanne,

I stated that I made rough notes in his presence of the conversations that took place between us, which were embodied in the statement read in court. That is not correct. I made no notes. The statement was written by me on the following day from my recollection only. Davis made no statement on his own authority. We merely gossiped. I am now of opinion that he made no reference whatever to a letter of Mr. Parnell's, which I stated was left in Paris with other documents by a fugitive Invincible. I gave the statement to Houston as the heads of a pamphlet which I said Davis would write at a future time. He did promise to write a pamphlet against the Land League, but not founded on the contents of the statement. I agreed to pay him £100 for the pamphlet when written.—Letters. The circumstances connected with the obtaining of the letters as I gave in evidence are not true. No one save myself was concerned in the transaction. I told Houston that I had discovered the letters in Paris; but I grieve to have to confess that I simply myself fabricated them, using genuine letters of Messrs. Parnell and Egan in copying certain words, phrases, and general character of the handwriting. I traced some words and phrases by putting the genuine letter against the window, and placing the sheet on which I wrote over it. These genuine letters were the letters from Mr. Parnell, copies of which have been read in court, and four or five letters of Mr. Egan, which were also read in court. I destroyed these letters after using them. Some of the signatures I traced in this manner and some I wrote. I then wrote to Houston, telling him to come to Paris for the documents. I told him that they had been placed in a black bag with some old accounts, scraps of paper, and old newspapers. On his arrival I produced to him the letters, accounts, and scraps of paper. After a very brief inspection he handed me a cheque on Cook for £500, the price that I told him I had agreed to pay for them. At the same time he gave me £105 in bank-notes as my own commission. The accounts put in were leaves torn from an old account book of my own, which contained details of the expenditure of Fenian money intrusted to me from time to time, which is mainly in the handwriting of David Murphy, my cashier. The scraps I found in the bottom of an old writing-desk. I do not recollect in whose writing they are.—The second batch of letters were also written by me. Mr. Parnell's signature was imitated from that published in the *Times* facsimile letter. I do not now remember where I got the Egan letter from which I copied the signature.—I had no specimen of Campbell's handwriting beyond the two letters of Mr. Parnell's letters to me, which I presumed might be in Mr. Campbell's handwriting. I wrote to Mr. Houston that this second batch was for sale in Paris, having been brought there from America. He wrote asking to see them. I forwarded them accordingly, and, after keeping them three or four days, he sent me a cheque on Cook for the price demanded for them, £550.—The third batch consisted of a letter imitated by me from a letter written in pencil to me by Mr. Davitt when he was in prison, and of another letter copied by me from a letter of a very early date, which I received from James O'Kelly when he was writing on my newspapers, and of a third letter ascribed to Egan, the writing of which and some of the words

I copied from an old bill of exchange in Mr. Egan's handwriting. This third letter is what has been called the 'bakery letter.' Two hundred pounds was the price paid to me by Mr. Houston for these three letters. It was paid in bank-notes.—I have stated that for the first batch I received £105 for myself. For the second batch I got £50; for the third I was supposed to have received nothing.—I did not see Breslin in America. This was part of the deception. It was mutually agreed between Houston and me that my name was not to be given up, and that I should not mention his name. I did not learn until October, when I was taken by Houston to Mr. Soames to make a statement, that Houston had mentioned my name to Mr. Macdonald. I had an angry correspondence with Mr. Houston, and also with Mr. Soames, in consequence of what I considered to be a breach of faith.—With respect to my interviews with Messrs. Parnell, Lewis, and Labouchere, my sworn statement is in the main correct. I am now, however, of opinion that the offer to me by Mr. Labouchere of £1000 was not for giving evidence, but for any documents in Mr. Egan's or Mr. Parnell's handwriting that I might happen to have. My statement only referred to the first interviews with these gentlemen. I had a further interview with Mr. Labouchere, on which occasion I made him acquainted with further circumstances not previously mentioned by me at the preceding interviews.—I stated that I had destroyed all Mr. Houston's letters to me. This was not correct. I have some of them.—I declare that this statement is taken down by Mr. Labouchere at my dictation in the presence of Mr. Sala. RICHARD FIGOTT, February 23rd, '89. Witness, George Augustus Sala.—Mr. Lewis's letter was as follows: "to and 11, Ely Place, Holborn, London, E.C., Feb. 25th, '89. Sir,—Mr. Labouchere has informed us that on Saturday you called at his house and expressed a desire to make a statement in writing, and he has handed to us the confession you made, that you are the forger of the whole of the letters given in evidence by the *Times*, purporting to be written respectively by Mr. Parnell, Mr. Egan, Mr. Davitt, and Mr. O'Kelly, and that in addition you committed perjury in support of the case of the *Times*. Mr. Parnell has instructed us to inform you that he declines to hold any communication directly or indirectly with you, and he further instructs us to return you the written confession, which we enclose, and which for safety sake we send by hand. We are, sir, yours obediently, LEWIS AND LEWIS. Richard Pigott, Esq."—Immediately these documents were read the *Attorney-General* made a statement withdrawing from the consideration of the Court the question of the genuineness of the letters which had been submitted and the authenticity of which was denied. This he did with the full acknowledgment that those whom he represented were not, after the evidence that had been given, entitled to say that they were genuine. He expressed "their sincere regret that these letters were published," but emphatically repudiated a suggestion made by Sir Charles Russell that there had been "a foul conspiracy" behind Pigott, and claimed that the full extent of their error was that his clients had been "misled and imposed upon."—Mr. Parnell was then called by Sir Charles Russell, and in answer to counsel denied with much particularity

tip of the letters and signatures attributed to him. After the purchase of the *Irishman* from Pigott, any letters he had received from Pigott he had handed to his solicitor without replying to them. Mr. James O'Kelly, Mr. Henry Campbell (Mr. Parnell's secretary), and Mr. Michael Davitt, also denied their alleged handwriting. Mr. George Lewis next went into the box and told the story of the interview he had had with Pigott at Mr. Labouchere's house; he was succeeded by Mr. Labouchere, who deposed that, about the time the Special Commission Act was under consideration, he was handed a packet of letters in the House of Commons, containing letters of Pigott to Egan and Carey. The packet he opened with Sir Charles Russell, and afterwards handed it to Mr. George Lewis. He corroborated Mr. Lewis as to the interview with Pigott at his house, and denied that he had ever offered Pigott £1000 or any money if he would go into the box and swear he was the forger. He also gave full particulars of his negotiations with Pigott, which led to the latter writing his confession in his presence and that of Mr. G. A. Sala. Mr. Soames recalled and examined by the Attorney-General, then put in Pigott's statutory declaration of the genuineness of the letters and various documents and memoranda that had been received from Pigott and made concerning his evidence from time to time, bearing upon the letters and the case for the *Times* (see *Times* reports, vol. xv.). Finally Sir C. Russell asked their lordships to exercise the discretion vested in them under sect. 7 of the Act and to make a report on the question of the authenticity of the letters. The Attorney-General objected to this course, and the judges promised to consider the point. They decided that no *interim* report should be issued. The Attorney-General then proceeded with that part of the case relating to the *Irish World*. The next thing heard of Pigott was on Tuesday, March 5th, to the effect that Mr. Soames had received a letter from him, which was handed to the Court, dated Madrid. Immediately afterwards came the news that Pigott had committed suicide by shooting himself with a revolver in an hotel at Madrid, just when an officer of the Madrid constabulary was in the hotel for the purpose of effecting his arrest. His evidence and his flight had created intense public interest, and his dramatic death caused a great sensation. No mention was made of his suicide in court. The Attorney General continued the case by reading voluminously from the *Irish World* inflammatory articles and reports upon Irish political and agrarian subjects. He read also speeches of Mr. Gladstone and Mr. Forster strongly condemnatory of the League. The evidence of police constables as to the discovery of arms and ammunition followed, and a witness named Andrew Colman, a former member of the Fenian body, gave evidence to show participation in outrages and moonlighting by members of the League in co. Mayo. The next witness of importance was Mr. B. W. Hardscastle, a London accountant, who had been engaged in an investigation of the Hibernian bank books pursuant to an order of the Court with reference to the accounts of the League. He said it was not possible, as a rule, to determine from whence the receipts came. In his report (see *Times* reports, vol. xvii.) the accounts were grouped thus: A the Land League group, B the National

League group, C the United Ireland group, and D sundry accounts. We quote as follows:—"The following are the gross totals of receipts and payments of the accounts comprised in Groups A, B, and C, excluding only items that clearly represent balances.—Group A. Receipts, £261,269 15s. 6d.; payments, £261,276 1s. 3d., showing an ultimate overdraft of £6 5s. 9d., made up thus.—Organisation Fund. Receipts, £102,384 6s. 4d.; payments, £101,073 6s. 3d. Relief Fund. Receipts, £71,078 15s. 2d.; payments, £70,679 19s. 9d. Ladies' Land League. Receipts, £75,355 6s. 5d.; payments, £77,071 7s. 9d. J. E. Kenny (Backville Street, No. 2). Receipts, £1000; payments, £1000. Thomas Breen (No. 2). Receipts, £11,451 7s. 6d.; payments, £11,451 7s. 6d. The above-mentioned overdraft of £6 5s. 9d. was the balance of the ladies' account, and was transferred on Sept. 7th, '82, to the account of Messrs. C. S. Parnell, Dillon, and O'Connor, which we have not classed in either Group A or B, but treated as forming a connecting link between them. This last-named account comprised—Receipts, £3607 6s. 8d.; payments, £4394 8s. 7d.; and the difference of £787 1s. 11d., increased by the above-mentioned ladies' account balance of £6 5s. 9d. to £793 7s. 8d. was, as before stated, provided for out of the National League account in Group B.—Group B. The accounts comprised in this group contain—Receipts, £115,628 0s. 1d.; payments, £111,729 13s. 8d., made up as follows.—Irish Labour and Industrial Union. Receipts, £262 12s. 9d.; payments, £263 3s. Irish National League. Receipts, £72,867 11s. 2d.; payments, £77,078 19s. 5d. Irish National Parliamentary Fund. Receipts, £19,867 9s. 7d.; payments, £17,867 9s. 7d. Irish National Parliamentary Expenses Fund. Receipts, £22,636 6s. 4d.; payments, £22,520 1s. 8d. The balances of the accounts in this group, which were open at June 30th, '87, were carried forward into ledgers for '87-8, not produced to us.—Group C. The accounts comprised in Group C contain—Receipts, £71,155 14s. 4d.; payments, £69,580 4s. 1d. The balance of the last account of this series was carried forward at June 30th, '87, into ledgers for '87-8, not produced to us. GROSS TOTALS.—Receipts, £451,660 16s. 7d. (Group A, Land League £261,269 15s. 6d., Link Account £3607 6s. 8d.; Group B, Nat. League £115,628 0s. 1d.; Group C, United Ireland £71,155 14s. 4d.). Payments, £446,980 7s. 7d. (Group A, Land League £261,276 1s. 3d., Link Account £4394 8s. 7d.; Group B, Nat. League £111,729 13s. 8d.; Group C, United Ireland £69,580 4s. 1d.). A statement accompanies this report showing the yearly totals making up these figures. We have traced in the accounts forming Group A the corresponding receipts and payments which are shown in a schedule appended to this report. It is presumably correct to treat these items as cross-entries between the respective accounts in which they appear. After thus reducing the gross totals of the ledger accounts, the following total receipts and payments are arrived at.—Group A. Receipts, £227,318 3s. 4d.; payments, £227,324 9s. 1d., viz.,—Organisation Fund. Receipts, £101,174 6s. 4d.; payments, £77,256 19s. 4d. Relief Fund. Receipts, £65,120 3s. 1d.; payments, £68,344 14s. 6d. Ladies' Land League. Receipts, £61,023 13s. 11d.; payments, £76,171 7s. 9d. J. E. Kenny (Backville Street, No. 2). Payments, £1000. Thomas Breen (No. 2). Payments, £11,451 7s. 6d. Concerning the Land League and Relief Fund accounts

the report showed that they were complete from Nov. '79 to June '80, but supplementing these particulars with information from the *Nation* newspaper the following substantially accurate schedule was drawn up:—“**LAND LEAGUE.**—Total receipts (from America £11,324 9s. 1d., from Great Britain £262 2s. 7d., from Ireland and other sources, including items not identified, £1339 16s. 2d.), £12,926 7s. 10d. **RELIEF FUND.**—Total receipts (from America £54,892 18s. 6d., from Great Britain £485 19s., from Ireland and other sources, including items not identified, £856 17s. 11d.), £56,235 15s. 5d.” The accountants stated that they had had access to the ledger, cash-books, and minute book of the Irish National League from its inception in '82 to Dec. 31st, '88. General evidence of Land League meetings, boycotting, and the procurement of arms, was next proceeded with, and in the course of it a witness named Coffey, a reporter, was committed for contempt of court because of his contradictory evidence and insolence of demeanour. George Mulqueeny gave evidence incriminating Frank Byrne, and to the effect that Byrne showed him in the National League office at 9, Bridge Street, a brown paper parcel containing knives with which the Phoenix Park murders were presumed to be committed. Byrne had also shown him revolvers for use in Ireland. The evidence of this witness concluded the case for the *Times*; and in order to give Sir Charles Russell time to collate the evidence and prepare his speech prior to calling evidence for the defence, the Court adjourned for a fortnight. The Court resumed on April 2nd, and Sir Charles Russell opened the case for Mr. Parnell and the other gentlemen concerned in the charges and allegations. He commenced by a review of the condition of Ireland prior to '79, and claimed that a great social and political revolution had been going on in the country from that year to '80, the causes of which must be sought for in the past. He claimed that the real root of the Irish difficulty was that from the moment the Act of Union was passed “the governing class in Ireland—mainly the landlord class, the ascendancy class, the class separated by religion and even by race from the bulk of the people—ceased to be thereafter under the influence, the control, and governed by the public opinion of the people among whom they lived and from whom they derived their means of supporting their situation and dignity.” Regarding the young Ireland movement of '48 as the precursor in its earlier stages of Mr. Parnell's movement, and showing throughout that there were successive tenant combinations and physical force agitations, he passed in rapid review the tenant league started by Sir Charles Gavan Duffy, Mr. Lucas, and Keogh; Mr. Butt's Home Rule policy of '70-74, and Mr. Parnell's coming to the front as the leader of the Irish Parliamentary party. His argument from this review was that when constitutional methods had failed to redress grievances a large section of the people had resorted to unconstitutional and secret methods; and that each of the four remedial measures—viz., Catholic Emancipation, the Tithe Act, the Disestablishment Act, and the Land Act of '70—had followed upon an unconstitutional movement or the threat of a physical force movement. Arguing upon historical authorities that Irish industries had been suppressed in favour of rival English industries, that the Catholics had been op-

pressed and denied political and civil privileges; that the system of government had created a deep chasm between Catholic and Protestant, and that the uncontrolled landlord party had artificially impoverished the people, he claimed that these were the predisposing causes of agitation and crime, and the *sons of origo mali* of secret societies. There was, he said, this set of extraordinary phenomena—“people universally described as persons of kindly nature, and yet guilty of the most barbarous cruelty.” Coming to the history of crime in Ireland, he laid down these two propositions—that connected with recurrent distress arising from agrarian conditions and given definite causes, there was recurrent crime; and, secondly, that that recurrent crime from '79 was of the same kind and directed against the same class of persons as in previous periods since the Act of Union. To establish these propositions he quoted historical authorities to show that the maiming of cattle, moonlighting, and outrage upon persons who had been guilty of land-grabbing and the various other forms of Irish crime, were conspicuous prior to and after the famine of '48. In this connection he drew a parallel between the state of things in the three counties of Armagh, Monaghan, and Louth in '52, and that revealed by the *Times* case as existing from '79. Touching upon the Land Act of '70, he described in strongly condemnatory terms the land system of Ireland, claiming that it had been unanimously condemned by every historical writer of repute. Affirming that until the Act of '70 nothing had been done by the State to protect the tenant from the rapacity of the landlord, and incorporating in his speech a mass of official evidence to prove that the Irish tenant farmers were the worst fed, worst clothed, worst housed, and most destitute of any class in the civilised world, he claimed that this Act was wholly inadequate to meet the necessities of the Irish people, inasmuch as it did not provide against arbitrary and excessive rent, was ineffective in its compensatory clauses, gave no protection to leaseholders, and, finally, gave tenants and landlords power to contract themselves out of the Act—a loophole of which the landlords largely availed themselves. Quoting exhaustively from official reports, he drew a vivid picture of the poverty and wretchedness of the Irish tenantry subsequent to the Act of '70 and culminating in '79. Tracing the rejection of Mr. Forster's Bill staying eviction processes on payment of a certain proportion of one year's rent, and giving statistics of contemporaneous evictions, he claimed that with the memory of the famine of '48 in their minds the events of the time combined to impress upon the Irish people the necessity of a resolute struggle for existence. In justification, therefore, for the formation of the Land League in '79 he affirmed “that in its main operation, in its essential objects, in its essential means, it was a movement and a combination which was not only justifiable before God and man, but necessary in the condition of things that existed.” He sketched the foundation of the Land League with a view to show that it was a defensive organisation for the tenant class of Ireland, and read its programme of land and Parliamentary reform and other documents explanatory of its objects. Passing over the opposition from Fenian quarters during the initiatory stages of the League, he enlarged upon the

relief the League gave to the peasantry, the principles of land legislation it enunciated, and its work in organising the tenantry to resist payment of unfair rents. Coming to the imprisonment of the leaders in '82, and the suppression of the League in Feb. '82 under Mr. Forster's Coercion Act of '81, he described the complete disorganisation of the work of the League and the issue of the No-rent manifesto, which he did not justify, but which he said Mr. Parnell would describe as an unconstitutional blow in return for an unconstitutional blow. The enforcement of the Coercion Act added to the causes of disturbance in the country, and he argued that the No-rent manifesto had no evil effect upon the people anything like proportionate to the effect consequent upon the breaking up of the controlling power of the League and the imprisonment of the local as well as the central leaders of the organisation. Answering the Attorney-General that no ground for agitation existed after the passing of the Compensation for Disturbances Bill in '81, he severely criticised the inadequacy of that measure, and by showing the history of attempts by members of the Irish party to obtain effectively remedial legislation, repudiated the charge that Mr. Parnell and his party in the House were making the sham pretence of endeavouring to redress social grievances which did not exist. Coming to the formation of the National League in Sept. '82, and describing its constitution and the remedial character of its objects, Sir Charles Russell gave an analysis of election statistics to show that the feeling of the Irish people continued to be with the League leaders. He next entered upon an exhaustive examination of the evidence of agrarian disturbance and outrage that had been elicited by the Attorney-General, the general argument underlying all being that the origin of the troubles was in the distress of the tenantry, arbitrary landlordism, and repressive and coercive legislation; and that the crimes were not attributable to the Land League and National League, that neither the central bodies of those organisations nor the local branches fomented them or had any association with those who committed them, and that in cases where offences were traceable to members of the various branches of the League those offences had no official sanction express or implied, and were committed in opposition to and in defiance of the Leagues' objects and the spirit of their work. As to the history of the American Conventions, and the evidence of Major Le Caron, he described the Clan-na-Gael as the rump of the old Fenian party, and argued that the evidence in this branch of the inquiry showed that this body made persistent attempts—"attempts which absolutely and entirely failed"—to control the "open movement." He ridiculed "the playing at conspiracies" revealed by the circulars of the Clan-na-Gael, and claimed that the very evidence of this witness showed how completely successful Mr. Parnell had been in keeping the movement in Ireland and America free from the dangerous association of the physical force section in the United States and Ireland. Examining the evidence of the Phoenix Park murders, he argued that there was not the suggestion of any complicity of the leaders of the open Nationalist movement in them, and that there was nothing that could justify "any candid reasoning, impartial mind in suggesting that upon the leaders of the

movement or upon the organisation (the Land League) itself there rests the shadow of an imputation of complicity by foreknowledge or by subsequent condonation." Concerning the forged letters he condemned the criminal negligence of the *Times*, complained of the grudging terms of its withdrawal of them from the case, and commented with much severity upon the conduct of the man Houston in relation to Pigott and the *Times*. Summing up his conclusions, Sir Charles Russell said:—"My lords, we have endeavoured to lay our case before you, to the best of our ability, in some methodical fashion. We have endeavoured to show, and claim to have shown, as accounting for the crime which your lordships are inquiring into, and its origin, that in former times there have been greater crimes, in greater volume, of the same class, proceeding from the same source, directed against the same class of persons; and that with recurrent distress there has been a recurrent recrudescence of crime. We have endeavoured to show your lordships—and, we believe, we have shown your lordships by contemporaneous official records mainly—that there were in '79, '80, and '81 widespread, deep distress and misery in Ireland. We claim to have shown that there was a failure on the part of Parliament—although the House of Commons made an attempt in that direction—a failure on the part of Parliament to meet the wants of the time by offering to the tenants of Ireland in their distress the means needed for temporary protection from the civil process of ejectment. We have shown your lordships that the landlord class failed in the circumstances of the time to meet broadly, generously, and patriotically the necessities that were pressing upon their unhappy countrymen, and we have therefore shown you that in the circumstances of the time it was nothing less than could be expected that the people, thus left without the protection which the representative House of the Legislature desired to give them, should resort to combination among themselves to guard against and, if they could, prevent a recurrence of the nameless horrors of the famine years of '46 and '47. I have said before, and I say again, that your lordships are trying the history of ten years of revolution in Ireland—a revolution partly social, partly political; and that you are trying the history of that revolution at a moment when, by legal process of the Queen's Courts, the Irish people are gathering the fruits of it. . . . My lords, my colleagues and myself have had a responsible duty: we have had to defend not merely the leaders of a nation, but the nation itself. We have had to defend the leaders of the nation whom it was sought to crush, to defend the nation whose hopes it was sought to cast, to dash to the ground. My lords, this inquiry, intended as a curse, has proved a blessing. Designed, prominently designed, to ruin one man, it has been his vindication. In opening this case I said that we represented the accused. My lords, I claim leave to say that to-day the positions are reversed: we are the accusers; the accused are here [pointing to the *Times*' counsel]. My lords, I hope this inquiry at its present stage and in its future development will serve more even than as a vindication of individuals, that it will remove painful misconception as to the character, the actions, the motives, the aims of the Irish people and of the leaders of the Irish people; that it will set

earnest minds—and, thank God, there are many earnest and honest minds in this land—athinking for themselves on this question; that it will remove grievous misconception and hasten the day of true union and real reconciliation between the people of Ireland and the people of Great Britain; and that, with the advent of that true union and reconciliation, there will be dispelled, and dispelled for ever, the cloud, the weighty cloud, that has rested on the history of a noble race and dimmed the glory of a mighty empire." At the conclusion of the speech, which was followed by the public day after day with keen attention, the president passed a slip of paper to Sir Charles Russell bearing the words, "A great speech worthy of the great occasion." The Court was adjourned till April 30th, when Mr. Parnell was called and examined by Mr. Asquith. His evidence in chief was the history in detail of his public life and his views upon the land question in Ireland, the object of the examination being to show that he was engaged in a constitutional movement by constitutional methods for constitutional ends. He denied that he had ever said to Le Caron that "nothing but force of arms would ever bring about the redemption of Ireland," and contradicted in detail Le Caron's report of the conversation in the House of Commons. There never was any "understanding" between the V.C. in America and the open movement, as Le Caron had said, and neither did he nor any one for him suggest or undertake negotiations to bring about any such understanding. He denied that at the suggestion of Egan, of whom he spoke in terms of commendation, he had approved of the "removal" of persons connected with the conviction of agrarian murderers, and said he had never heard of any such proposal. He never heard of the "Invincible" conspiracy until after the Phoenix Park murder trials. He had not the slightest suspicion that Boyton or Sheridan had been engaged in carrying out crime. He regarded the Phoenix Park murders at the time "as the greatest possible calamity that could have befallen Ireland and the future of their movement." He had not the slightest suspicion that anything of the kind would take place, nor did he know in what direction to look for the perpetrators. He never by word of mouth or by letter directly or indirectly expressed condonation of the murders. He was examined at considerable length touching the relations of the Leagues with the kindred open movement in America, and upon his work of advancing remedial legislation for Ireland. He said he had honestly endeavoured to conduct the movement, both in the case of the Land League and of the National League, within the limits of the constitution, and to keep it free from crime. In saying this, however, he made the exception with regard to the technical offence with which the leaders were charged at the State trials in '80—the offence of inciting tenants to refuse to pay their rent. If that was an offence—and Lord Fitzgerald, he believed, held it to be an offence—they admitted it; and if the same circumstances recurred they would do the same thing again. Cross-examined by the Attorney-General, Mr. Parnell denied absolutely that he knew that the Clan-na-Gael was a murder society. Extracts from the *Irish World* were put to him, to show that notwithstanding a statement of his in evidence that the paper had been constantly denouncing his policy, it was

in reality on his side; but this led to nothing, as Mr. Parnell rarely saw the paper, and had formed his belief of its opposition from what had been said about it in other papers. He asserted that it never entered into his scheme to combine with the physical force party to drive out the English garrison as the first step to independence. He had never had anything in his mind but the restitution of legislative independence to Ireland. He believed to this day that the physical force organisation had been consistently hostile to him. As to his American tour, he was closely cross-examined upon his knowledge of persons whom he met and who were members of the physical force party; but he said he "had no knowledge as to who were or who were not members of the Clan-na-Gael at the various places he visited; the impression he formed of the position of the men who came to meet him at railway stations, and were chairmen of his reception committees, and the position of the men who presided at the meetings, and of the speakers, was that they were not members of any secret or revolutionary society." A large number of extracts from *United Ireland* (q.v.) and other papers supporting the League, and speeches by members of the Irish party, were put to him, some of which he approved and others disapproved. He referred to speeches of his own showing that he had denounced outrages, and in support of his evidence that he had endeavoured honestly to keep the agitation within the lines of the constitution. He was severely cross-examined for not separating himself from followers who used language of which he disapproved. He held the opinion that crime in Ireland was due to secret societies; and confronted with a speech in the House of Commons on Jan. 7th, '81, containing the words "Secret conspiracies do not now exist in Ireland," he said that that was an exaggerated statement, and that "it was possible that he was endeavouring to mislead the House on that occasion." Pressed upon this point, he said he meant that "it was a boastful and exaggerated statement, designed to mislead the House as to the greater or lesser existence of secret societies in Ireland." Asked whether he intended to mis-state a fact, he replied that it was quite possible that he deliberately so intended. Subsequently Mr. Parnell explained that on consulting *Hansard* he found that the speech in which the words occurred referred to the Ribbon Society, which was at the time practically non-existent. That was the secret society to which he referred, and the words were therefore a fairly accurate representation of the state of affairs. He was cross-examined as to the disposal of the books of the Land League after its suppression, to many pecuniary transactions of the League in connection with the defence of prisoners, and to entries disclosed by the bank-books; but his state of knowledge was not precise, most of the matters upon which he was questioned not having been personally attended to by him. Re-examined by Sir Charles Russell, Mr. Parnell was taken through more extracts from the *Irish World* in proof of his statement that that paper was hostile to his policy; he also gave the names and particulars of a number of gentlemen whom he met officially on his American visit, with the object of showing their social position and public influence. So far as he knew and had heard, it was absolutely untrue that one penny

of the funds of either of the Leagues had ever been applied to any illegal purpose. He never had anything to do with the books of the League, beyond finding the office in Dublin in a state of disorganisation, and seeing that the cash-book had not been properly kept. In the cross-examination, the Attorney-General had singled out a number of payments disclosed by counterfoils of cheques to men convicted of crime. Mr. Parnell explained that these cheques were cheques drawn by him in common with scores of other cheques of similar character and for the same purpose—viz., for the sustenance of prisoners confined as suspects in various prisons throughout Ireland under Mr. Forster's Act. The cheques were drawn long before the men whose names the Attorney-General had selected were accused of the crimes for which they were subsequently convicted. Mr. Parnell was instructed to reappear for the purpose of further examination upon questions arising out of these payments.—The next witness was **Archbishop Walsh**, in charge since '85 of the Dublin diocese, and formerly president of Maynooth College, where he was for ten or twelve years one of the professors. By virtue of his position he was constantly brought into communication with representative people in Ireland, and his examination was conducted with the object of obtaining his opinion of the condition of the country and the prevalence of distress. He considered that in '79 there was an absolute need for a defensive organisation for the tenants, who were practically at the mercy of the landlords. It became his duty as archbishop to examine into the working of the Land and National Leagues, because throughout the country the local clergy had become members, and many were presidents. As a result of consultations among the bishops of Ireland the local clergy were allowed and even encouraged to assume positions of responsibility in connection with the branches of the League. In cross-examination by Mr. Atkinson, speeches by local clergymen were read to him of which he disapproved, and he admitted that in exceptional instances very imprudent and improper language had been used by ecclesiastics who spoke upon the Irish question. He disapproved of boycotting when intimidation was used, but did not condemn negative boycotting in the sense of exclusive dealing.—The **Rev. Michael O'Connell** was the next witness, and gave evidence of the condition of Mrs. Blake's tenants at Letterfrack from '78 to '82. Her tenants, he said, were in a state of chronic misery and wretchedness. Their food consisted of potatoes and meal, and he had seen them eat boiled seaweed. He had rarely seen them eat meat. The improvements on the Blake estate were made by the tenants. Mrs. Blake gave her tenants no employment, and even levied a tax of one-third upon the seaweed they collected in the surf for making kelp. The people were generally clothed in white flannel, had scarcely any furniture, and a great proportion of them had only one room, in which they were frequently obliged to house their cattle as well as themselves at night. In '80 he was perfectly certain that many of the tenants were not able to pay the rent demanded of them, and were justified in not paying it. During '78, '79, and '80, Mrs. Blake's tenants were almost entirely supported by relief committees. He was secretary of the branch of

the League at Letterfrack. He was perfectly certain that the Land League had nothing to do with the outrages that occurred in the neighbourhood—outrages that were denounced in the strongest manner from the altar. Cross-examined by Sir Henry James, he gave details of the working of his branch of the League, and of its relations with the central office, and similar information with regard to the Tuam branch, of which he was afterwards president.—The **Rev. Father Conaside**, parish priest of Loban, Ardahan, and president of that branch of the League, was next called, and gave evidence disassociating the League from the murder of Mr. Bourke and Corporal Wallace.—Following upon this witness, a procession of priests passed through the witness-box, most of whom were either presidents, secretaries, or other officials of the local branches of the successive Leagues in their respective districts. There was a remarkable unanimity in their evidence. They all testified to the prevalence of keen distress, growing sharper in and after '79, to the great suffering and impoverishment of the people; to the impossibility of the tenant farmers paying the rent demanded of them; to the necessity of an organisation to fight against the landlords; and to the constitutional objects and work of the Leagues. They denied that the League was in any way associated with crime, attributed crime to the existence of secret societies and private animosity without the pale of the Leagues, and insisted that upon every occasion crime was denounced by them at the altar and by the officials of the Leagues. Many of them stoutly defended boycotting as distinct from intimidation; and, taken as a whole, their evidence was strongly in favour of the tenantry and of the constitutional character of the Leagues.—After the priests came **Mr. William O'Brien, M.P.**, who in examination gave an account of his work as a journalist, inquiring into the condition of the peasantry on behalf of the *Freeman's Journal*. He gave a vivid picture of distress in various districts prior to '79 (*Times* reports, vol. xxiii.). He was perfectly certain that the extreme men in the Nationalist movement had no connection with outrage; "they were men who were for open fight, and were as much against crime as anybody." He related the starting of *United Ireland*, of which he had full editorial control, within the lines of Mr. Parnell's policy, and from which a number of extracts were read explanatory of the attitude of that journal towards agrarian and political questions, and against crime and outrage. Though in sympathy with the Fenians from his youth, he joined the League distinctly working for constitutional ends. Except at Mitchelstown in '88 he had never advised resistance to the law. He defended boycotting except when it endangered a man's life, and in cross-examination by the Attorney-General admitted recommending boycotting short of intimidation. He insisted upon the unreliability of police statistics as an index of agrarian crime. He was severely cross-examined by the Attorney-General with the intention of showing that neither in his speeches nor in *United Ireland* had he denounced secret societies, outrage, intimidatory boycotting, or urged the people to repress crime and assist in its detection; and in this connection numbers of extracts of a violent nature were put to him from his speeches and his journal capable of the interpretation that they were meant to

institute and condone crime. The *Irishman*, the editing of which he appeared to have seriously neglected, was also quoted freely against him. Notwithstanding all, he persistently stated that *United Ireland* advocated a peaceable and constitutional agitation, "defining the word constitutional according to the principles of the British constitution, and not according to the rigid legal acceptance of the word with reference to the present state of Ireland." The cross-examination (*Times* reports, vol. xxiii.) was remarkable for the energy with which Mr. O'Brien resisted the construction placed by the Attorney-General upon his speeches and writings, and for the persistence with which he placed his own view of agrarian questions, of the character and objects of the League's agitation, and of his own part in it, before the Court.—Mr. T. D. Sullivan was the next witness. He claimed that by pen and tongue he had denounced outrage, and that speeches and articles put to him in cross-examination were constitutional in tenor and object.—Mr. John Ferguson, a Glasgow stationer and one of the originators of the Land League, was examined, and said he had been in close political association with Mr. Parnell since that gentleman's leadership of the Irish people, and that the League movement was purely constitutional to secure national self-government for Ireland in a federal union with the British empire. In cross-examination he gave particulars of the early working of the League, denying that the executive engaged as organisers men of known criminal associations, or carried on the work of the organisation upon other than legal lines.—The next witness of importance was Mr. Joseph Biggar, M.P. for Cavan, who stated that he was expelled from the Fenian body in '77 because he declared for Parliamentary action. He considered the Land League an indispensable combination in the then condition of Ireland. In cross-examination he was unable to give definite information of the early work of the Land League, or of what had become of the books when it was suppressed. He thought any form of boycotting which did not amount to actual physical violence was justifiable, and had advocated boycotting in that sense.—Mr. Arthur O'Connor, M.P., who had charge of the Land League offices for four days in '81, gave evidence that he found the office work in great confusion. He did not know what ultimately became of the Land League books. He was cross-examined at great length upon entries in such books as were before the Court relating to the period, when he was directing the work of the Ladies' League from Paris.—Mr. Justin McCarthy, M.P., was called, giving evidence in support of the claims of the League to be regarded as a constitutional organisation, also satisfactorily explaining the payment of a cheque of his of £200 to Byrne, when Byrne was engaged in the National Land League of Great Britain. At this stage of the inquiry a great deal of complicated evidence was given regarding the books of the Leagues (see vol. xxiv. *Times* reports).—The next witness of note was Mr. E. Harrington, M.P., whose evidence dealt largely with the condition of the Kerry tenantry, and who was subjected to a very severe cross-examination upon the contents of the *Kerry Sentinel*, which he edited, and from which leading articles were written in language of extraordinary violence, were volu-

minously quoted. In this connection evidence of former secretaries of Land and National League branches in Kerry was taken, the examination being directed to show that particular crimes in Kerry had no connection with the League; and the cross-examination being conducted with the object of establishing the proposition that the crime in Kerry was the direct outcome of the teachings of the *Kerry Sentinel*, and of the speeches at Land League meetings, and the boycotting resolution passed against individuals by the Land League committees.—Mr. T. P. O'Connor, M.P., was called, and gave evidence against that tending to show that the Land League was in alliance with the physical force conspiracy in America. He denied that the League encouraged crime, and said that the effect of Mr. Parnell's policy had been to substitute constitutional agitation for revolutionary movement, and to substitute open combination for secret combination. He also was closely cross-examined with the object of showing the irreconcilability of violent speeches and writings with the peaceful intentions and methods of the Leagues.—Following this witness the Rev. Patrick O'Connor, parish priest of Fries, was called, and gave an explanation, with the object of removing the bad impression against him, caused by previous evidence to the effect that he did not call upon the widow of the murdered man Curtin for twelve months after the murder. He explained that he did call immediately after the crime, was dissatisfied with his reception, was not invited to call again, and left the duty to his curate, who called regularly. The cross-examination of this witness, not only in relation to this matter, but on other points connected with the local branch of the League, was of a very severe character. Dr. Kenny, M.P., Mr. Sexton, M.P., Mr. T. Harrington, M.P., Mr. Michael Davitt, and others of the persons charged were examined in succession (*Times* reports, vols. xxvi. and xxvii.). Each affirmed the constitutional character of the Land League movement, and defended its methods. Mr. Davitt gave a great deal of information about the Fenian organisation, with which he was connected in his youth, and which he rejoined after his release from imprisonment for nine years on a charge of treason-felony, but for the purpose of trying to convert it into a movement for open and constitutional agitation. Since his release, this had been his object. Wherever he went, and whenever he met any of his old associates, he discussed with them the past failure of insurrection in Ireland, and laid his views before them in favour of a vigorous open movement. Up till '79 all his lecturing, writing, and interviewing was done on his own responsibility; but he then associated himself with Mr. Parnell in the formation of the Land League. His evidence agreed with that of other witnesses for the defence as to the great poverty of the people, particularly of the west of Ireland. He stoutly defended the Land League, and denied that there was any sort of alliance, as suggested by Le Caron, between the U.B. or the Clan-na-Gael, and the Land League in Ireland. He was cross-examined at great length by the Attorney-General upon the Fenian movement in Ireland and similar movements in America, and also upon speeches and articles advocating the overthrow of British domination in Ireland (*Times* reports, vol. xxvii.). Mr. Davitt then called one witness,

J. J. Louden, a Westport barrister, who gave corroborative evidence upon the economical and social condition of the people in '79. Several members of the Irish party in Parliament were next called, among them being Mr. John O'Connor, M.P., formerly a Fenian, and who in cross-examination came into conflict with the Bench for making charges against the police without evidence; Mr. Foley, M.P., Mr. T. J. Condon, M.P., Mr. J. Jordan, M.P., Mr. T. Haynes, M.P., Mr. F. A. O'Keefe, M.P., and Mr. Garrett Byrne, M.P. They all testified to the constitutionality of the League, and each was closely cross-examined upon violent speeches, and outrages alleged to be by secret societies in localities in which they were personally concerned.—Further evidence was then taken from Messrs. Soames and Houston as to payments to *Times* witnesses and to Pigott. Mr. Houston was examined by Sir Charles Russell upon the working of the Irish Loyal and Patriotic Union, and the learned counsel wished for an order to inspect the books of the Union. The President was of opinion that the Court had no power to order an inspection. Sir Charles Russell contended that the indictment contained in "Parnellism and Crime" proceeded to a great extent from Pigott, who was being used by a powerful political association to concoct the plot and was financed by it; and that his clients were entitled to a full inquiry into the association. The President took the view that whatever agencies were put into operation for the purpose of producing "Parnellism and Crime," the duty of the Court under the Act was limited to a consideration of whether the charges in "Parnellism and Crime" were true or false. He thought the investigation insisted upon as a matter of right ought not to be granted." He said, "We cannot make an order that these books should be inspected generally, because even if it were true that the money of the Loyal and Patriotic Union had been paid for the purpose of putting before the public these statements which are now complained of, still the only thing we have to determine is whether or not these charges are true or false, whatever their source or origin." This decision led to the withdrawal of the Parnellite counsel. At the next meeting of the Court Sir Charles Russell announced that he had received instructions from Mr. Parnell that he and Mr. Asquith no longer had any authority to represent him at the inquiry. Mr. Reid and Mr. Lockwood said they had received similar instructions from the clients they had represented. All the counsel for the persons charged thereupon withdrew from the Court, accompanied by Mr. Parnell and most of the Irish members who had been present in Court. The President then called Mr. M. Harris, M.P., Mr. J. J. Kelly, M.P., and Dr. Tanner, M.P., who appeared for the defence, and these witnesses were cross-examined by Sir Henry James without any examination-in-chief having been made. The further cross-examination of Mr. Parnell upon matters connected with the Land League books and various payments was next proceeded with. He said that since he was last examined he had asked Mr. Lewis to subpoena Mr. Moloney and ascertain whether he had any books in his possession, Moloney being the only person within his knowledge outside the ranks of the Irish Parliamentary party who would be likely to know anything about the matter. He was "inclined to think, looking at the evidence given by the accountant em-

ployed by the *Times*, that the books which would show the expenditure of the Land League from Oct. 16th, '79—the date of the League's foundation—to Feb. 4th, '81, were in Mr. Egan's possession; that Egan took them with him to Paris when he left this country early in Feb. '81, the date of the passing of the Coercion Act; because it had not then been determined whether the Land League operations should not still be carried on, and the office of the League transferred from Dublin to Paris, for the purpose of carrying on the work of the Land League in the latter city; and that Egan had never returned them." He had taken no steps to communicate with Egan personally about those books. He was severely cross-examined as to payments disclosed to have been made out of funds held by Messrs. Munroe of Paris; and at the close the following colloquy took place (*Times* reports, vol. xxx.). "The President.—You have said that Mr. Egan might have taken the books of the Land League to Paris. Can you specify what books you think were taken there by him? I should think all the books, including the cash-book up to that date.—Do you also include the documents of the Land League? No, my Lord. I should think he would only take the books. He would have taken what he required for information and what was necessary for him to carry on the work of the League.—The President. Have you any further information to give respecting the documents other than the books? do you know what has become of them? I have heard that after Mr. Moloney's bankruptcy, when he left the country, he directed that all the papers in his house should be destroyed. He had no time to make a selection. All the papers, I understand, were destroyed.—The President. I understand you to say that Messrs. Munroe, of Paris, held funds in connection with which you and others were trustees? Yes; that is, they held bonds, not cash.—The President. Quite so; and these funds were applicable to Land League purposes? Yes; applicable to any purposes that I approved or that Mr. Egan approved. They would, of course, be applicable to Land League purposes: for instance, we used some of the funds for the purchase of *United Ireland*.—The President. Messrs. Munroe were not holding private funds of yours? No.—The President. Have you any objection to give a direction to Messrs. Munroe to let us see the accounts relating to these funds? Do you refer to the accounts in my name?—The President. I refer to these trust funds. I could not give any order of that kind to Messrs. Munroe without the sanction of other people.—The President. I am referring to the funds I have specified as Land League funds. Never mind what other people would do. I must decline to give any authority which would lead to the disclosure of the nature and extent of our present resources. This is a matter of considerable importance to us in view of political movements in the future.—The President. I have nothing to do with your motives. Those are for yourself to consider. I understand you to refuse to give the direction? I decline to give any information which would disclose the nature or extent of our reserve resources in Paris. I do not desire that that information should be given either to friend or foe.—The President. Very well.—No other witness coming forward for the defence, the Attorney-General called further evidence from bank officials of

the National Bank, and from accountants and others who knew what books were kept by the Leagues; but the information obtainable was of a very complicated nature. On Thursday, July 25th, the number of witnesses was exhausted, and the Court adjourned till Oct. 24th. On the re-assembling of the Court on that day Mr. Bigger briefly addressed their Lordships, and was followed in a speech of a few days' duration by Mr. Davitt, who was highly complimented by the President upon the skill and eloquence with which he had presented his case. Sir Henry James followed and made an exhaustive speech in reply to the case, concluding on Nov. 2nd with the following peroration:—
 "My Lords, long as I have occupied your attention, and poorly maybe as the thread of my tale has been woven, yet I hope I have placed before you now, in some sort of sequence, a history of ten years—a sad history to belong to any people. It has been a history full of crime, springing from hasty assumption of power by men who have inaptly used it, My Lords, I say it is a period of shame, and sad shame; and it is a period that surely Irishmen—patriotic Irishmen—must now be, and ever will be, bitterly regretting. Ireland has had dark and bitter days in her past. There are times when her brave men have fought in the open field, have fallen, and have failed. Her statesmen—her eloquent statesmen—have been silent in their sadness, as in the days when, we are told, 'Grattan and Charlemont wept with her sorrow'; but I know not that ever till now Irishmen have had cause to be ashamed of the history of their country. My Lords, it is said that happy is the country that has no history. So it may be, and this I know, if men doubt the application of that trite statement to Ireland, that happy would it have been for her people, happy would it have been for those who acted and for those who suffered, if the events of the last ten years could be blotted out. No human hand can do so. The annihilation of events is impossible, and all that remains to do is that faithful record shall be made of the acts of that time. Such will be your duty. It may be—it doubtless will be—that all who have taken part in this inquiry, from you, my Lords, to the humblest officer of this Court, will receive some condemnation, some attack, and some obloquy. But let that pass. The result will repay. For, the truth being told, it must be that a people, stirred by an awakened conscience, will be aroused from the dreams of a long night, and, when awake, they will despise their dreams. They will seek new modes of action with true men to guide them, and then it will be—God grant it may be!—that blessings will be poured on a happy and a contented people." The President then remarked on the completion of the sittings, saying, "Our labours, however, are not concluded. We must bear our burden yet a little longer. But one hope supports us. Conscious that throughout this great inquest we have sought only the truth, we trust that we shall be guided to find it, and set it forth plainly in the sight of all men." The Commission, which had sat for 128 days, then concluded (Nov. 22nd, '90). It was stated that the total number of witnesses called before it amounted to 500. Consult "The Times Report of the Special Commission" (3 vols.); "Parnell Commission: Speech for the Defence," by Sir Chas. Russell, Q.C., M.P.

The following is one of the famous forged "Parnell Letters." (For others, see pp. 503-4.)

Dear B.

*What are these fellows waiting for?
 This inaction is insupportable. our best
 man is in prison and nothing is
 being done.
 Let them be an end of this hesitating
 Parnell action is called for.
 you undertook to make a list for
 Mr. Donohue and Co. had we some
 evidence of your power to do so.
 My health is good. thanks*

*Yours on truly
 Wm. Parnell*

Passion Plays. These are celebrated every ten years at Oberammergau. They were first instituted in 1634, with the object of averting a pestilence, and have been performed at intervals ever since. The Oberammergau plays first attained prominence after the visit of Devrient, the German actor, in 1850. The next performance is announced for '90, and the Grand Rehearsal is fixed for May 18th, while Public Performances will take place May 26, June 1, 8, 15, 16, 22, 25, and 29; July 6, 13, 20, 23, and 27; Aug. 3, 6, 10, 17, 20, 24, and 31; Sept. 3, 7, 14, 21, and 28. Several hundreds of persons take part in the performance, which is regarded by the humble inhabitants of this small village as a religious exercise. The text of the Passion Play, which has undergone various alterations during the last 250 years, adheres for the most part to Christian, as opposed to Roman Catholic, tradition; but it has never yet been published. The sum of £6,000 will be spent on the stage and theatre in which the '90 performance takes place. Messrs. T. Cook & Son are about to issue particulars respecting the forthcoming play. For history, see article OBERAMMERGAU, ed. '86. Consult "The Country of the Passion Play," by L. G. Séguin.

Passports. Originally, permission to leave a port or to sail into it; and so (1) a document carried by a neutral merchant vessel, in time of war, to certify to her nationality, and protect her from the belligerents—a sea letter; (2) a permission granted, in time of war, for the removal of persons or effects from a hostile country—a safe-conduct; (3) a licence for importing or exporting contraband goods or movables without paying the usual duties. Usually, however, and in times of peace, a passport is (4) a letter, licence, or document, given by an authorised officer of State, granting liberty to the person therein named to enter, travel in, or reside in a foreign country, and entitling him to the protection of its laws. In

Dear Sir,

Tell Mr. to write to me
direct.

Have not yet received
the papers.

Yours very truly
Chas. Parnell

Tuesday

Dear Sir,

Send full particulars
What amount does he
want?

Other letter to hand

Yours very truly
Chas. Parnell

Tuesday

Dear Sir,

I see no objection to your
giving the amount asked
for.

There is not the least likelihood
-ood of what you are apprehen-
-sive of happening

Yours Truly,
Chas. Parnell

June 16th 1882

Dear Sir, I shall always
be anxious to have the
good will of your friends
but why do they impugn my
motives? I could not con-
sent to the conditions they
would impose but I accept
the entire responsibility for
what we have done.

Yours Very Truly
Chas. Parnell

15/5/82

Yours very truly
Chas. J. Parnell

Dear Sir

I am not surprised at your friends' anger but he and you should know that to denounce the murders was the only course open to us. It is that promptly was plainly & clearly our best policy.

But you can tell him and all others concerned that though I regret the accident of Lord & Chamberlaine's death I cannot refuse to admit that Burke got no more than his deserts.

You are at liberty to show him and others whom you can trust also but feel not any business to know. Not even need to know of course.

since we took that as
the truth I can say
no more

Yours very truly
Chas. J. Parnell

June 16/82

Dear Sir

I am sure you will feel that I could not appear in Parliament on the face of this thing unless I condemned it. Our position there is always difficult to maintain, it would be untenable but for the

general, a foreigner, who wishes to leave the country where he has been residing, obtains his passport from the minister or agent or consul of his own State; he then requires to take it to the minister or authorised agent of the country which he is about to visit, and have it signed by him. **Passports are demandable from foreigners on their arrival in England by 6 & 7 Will. IV.;** but this provision is not enforced in practice. **British subjects are now free to enter Belgium, France, Germany, Holland, Italy, Denmark, Sweden, and Norway,** without passports, and the rules about passports have been virtually relaxed in other countries; nevertheless, **British subjects about to visit the Continent are recommended not to omit to provide themselves with passports,** for even in those countries where they are no longer obligatory, they are found to be convenient, as offering a ready means of identification, and more particularly when letters have to be claimed at a *poste restante*.—The principal regulations respecting passports (issued by the Foreign Office, July '87) are the following: (1) Applications for Foreign Office passports must be made in writing, and inclosed in a cover addressed to "The Chief Clerk, Foreign Office, London," with the word "passport" conspicuously written on the cover. (2) The charge on the issue of a passport, whatever number of persons may be named in it, is 2s. (3) Passports are granted to all persons, either known to the Secretary of State or recommended by some person who is known to him; or upon the application of any banking firm established in London or in any part of the United Kingdom; or upon the production of a certificate of identity signed by any mayor, magistrate, justice of the peace, minister of religion, physician, surgeon, solicitor, or notary resident in the United Kingdom. (4) Passports are issued at the Foreign Office, between the hours of 11 and 4, on the day following that on which the application for the passport has been received at the Foreign Office. (5) The bearer of every passport granted by the Foreign Office should sign his passport as soon as he receives it; without such signature either the *visa* may be refused, or the validity of the passport questioned abroad. Travellers who may have any intention of visiting the **Russian Empire or the Turkish Dominions,** at any time in the course of their travels, must not quit England without having their passports *visés* at the **Russian Consulate in London (17, Great Winchester Street, E.C.), or at the Consulate-General of the Sublime Porte (7, Union Court, Old Broad Street, E.C.), respectively.** Travellers about to proceed to any other country need not obtain the *visa* of the diplomatic or consular agents of such country resident in the United Kingdom, except as an additional precaution. Other regulations have reference to the issue of passports to **naturalised British subjects, and to persons already abroad.** It is recommended, as a reasonable precaution, that persons holding passports of old date should either exchange them for fresh passports, on payment of the usual fee of 2s., or should have their old passports *visés*, before starting on a journey, by the diplomatic or consular authorities of the countries they propose to visit. The question of passports came up in '88, as affecting more especially **France and Germany, and Austria-Hungary and Russia.** On the 1st of June appeared in the *Gazette* a notification to the effect

that on and after Thursday, the 31st of May, all foreigners, without distinction, crossing the **Alsace-Lorraine frontier,** whether passing through or intending to take up their residence in the country, must be in possession of a passport which had been *visé* at the German Embassy at Paris; and that foreigners who were not in possession of the required passport were not to be allowed to proceed on their journeys, and, if necessary, were to be re-conducted across the frontier. In consequence of these regulations, the *Compagnie de l'Est* made arrangements to enable travellers to and from Switzerland, Austria-Hungary (*via* Arlberg), and Italy (*via* Gothard) to avoid the transit through the Alsace-Lorraine territory, and take advantage of the Della route; while the Great Eastern Railway pointed out that the new regulations applied solely to travellers entering the Reichsland through France, and did not affect passengers travelling *via* Harwich, Belgium, and Alsace-Lorraine to Switzerland, Italy, &c. A subsequent notification appeared in the *Gazette* of June 22nd, that passports of British subjects proposing to cross the **Alsace-Lorraine frontier** could be *visé* at the German Embassy in London (9, Carlton House Terrace), on payment of a fee of 10s. A still later notification appeared in the *Gazette* of July 26th, that foreigners wishing to reside in certain districts of Germany must be furnished with passports or nationality certificates, and again recommending all British subjects, intending to visit Germany, to provide themselves with passports. On Sept. 11th, '88, the *Times* correspondent at Vienna wrote to say it was announced that travellers coming from Russia into Austria-Hungary must, for the future, exhibit passports bearing the *visa* of the Austro-Hungarian Consul in the nearest consular town to the place whence the traveller started; that travellers whose passports were not in order would be forbidden to cross the frontier; and that this measure was taken in retaliation for the many passport formalities to which travellers going from Austria-Hungary to Russia were subjected. On Sept. 26th he again wrote to say that the **Austrian police** had issued information respecting the passport regulations decreed by the police of Russia for travellers entering or leaving that country. "The most noticeable thing in these severe rules," he adds, "is that exceptional measures are ordered against the Jews." All travellers entering Russia must have a passport bearing the *visa* of a Russian diplomatic or consular agent; and on his reaching his destination in Russia the traveller must get his passport *visé* by the local authorities. If he is going from place to place, or means to settle in any one locality for some time, he may obtain a "*licence to sojourn*," which will remain valid for six months, but wherever he goes he must present his passport to the Russian police for a fresh *visa*. Those leaving Russia must also exhibit passports bearing the *visas* of the police in the districts whence they come. In the case of Jews, whether Russians or aliens, the *visa* may be refused without explanation. Consequently a Jew may be arbitrarily denied the right of entering the Czar's dominions, of travelling in them, or of leaving them."

Pastour Institute. At a meeting summoned by the Lord Mayor, held at the Mansion House, July 1st, '89, to consider the desirability of forming a Mansion House Fund for the purpose

of helping the poor people who could not afford the journey to go to the **Pasteur Institute**, Paris, it was decided to form the Fund; and amongst the earliest contributors were the Prince of Wales, the British Medical Association, Prof. Erichsen, Prof. Huxley, the Rt. Hon. G. J. Goschen, and Mr. Sheriff Newton.

Pasteur, Louis, b. at Dôle, Jura, 1822; Educated at the University of Jena (1840), took his doctor's degree (1847). Appointed Professor of Physic at the Faculty of Sciences, Strasburg (1848), and subsequently held other appointments. Awarded the Rumford Medal (1856) for his researches on the polarisation of light. Elected one of fifty foreign members of the Royal Society of London (1860). In 1874 the National Assembly accorded to M. Pasteur, as a reward chiefly for his investigations on fermentation, a life annuity of 12,000 francs. Member of the French Academy (1882). Awarded the Albert Medal of the Society of Arts (1882) for his researches in connection with fermentation, the preservation of wines, and the propagation of zymotic diseases in silkworms and domestic animals. M. Pasteur's treatment of hydrophobia was referred to under that heading in our '86 edition. In the following year an English Commission of eminent scientists was dispatched by the Government to investigate M. Pasteur's method for the treatment of this disease, and reported to the effect that he had made a valuable discovery. On July 1st, '89, a meeting was convened at the **Mansion House** by the Lord Mayor for the purpose of hearing statements by Sir James Paget and other members of the commission in favour of establishing a **Pasteur Institute** in England. The Prince of Wales sent a hundred guineas to the fund of the proposed Institute, but the scheme met with vigorous opposition, especially from the anti-vaccinators. In '88 the **Pasteur Institute** was opened at Paris, President Carnot assisting at the ceremony.

Patents Designs and Trade Marks Act, '88. See Session, sect. 13.

Patmore, Coventry Kearsley Deighton, is a native of Woodford, Essex, where he was b. in 1823. In '44 he made his *debut* as an author, but it was not until '54 that he established his reputation by the publication of the first part of "**The Angel in the House**" (a story of a young man's "maiden passion for a maid"). He has since published "A Garland of Poems for Children," "The Unknown Eros," "Amelia," and a memoir of Barry Cornwall. Mr. P. was assistant librarian of the British Museum '46-'68. The lines of Tennyson's "In Memoriam," commencing "I held it truth with him who sings," are believed to refer to Mr. Patmore. He has been called by his admirers "The English Petrarch."

Paton, Sir Joseph Noel, R.S.A., b. 1821, first became known by his outline etchings illustrative of Shakespeare and Shelley. Was a successful competitor in the Westminster Hall competitions of '45 and '47, his "Quarrel of Oberon and Titania," and "Reconciliation of Oberon and Titania," being purchased for large sums for the Scottish National Gallery. His allegory "The Pursuit of Pleasure," "Home," "In Memoriam," and "Mora Janua Vitæ," have all been engraved. "**Decca: Lullaby at Exeter**," is considered by many his finest work. Appointed the Queen's Limner for Scotland in '64, knighted '67, LL.D. Edinburgh ('76). Sir N. Paton has of late years

devoted his attention almost exclusively to the painting of religious subjects.

Patriotic Volunteer Fund. See VOLUNTEERS.

Patti, Madame Adelina Florinda, was b. at Madrid in 1843. She trained professionally under Maurice Strakosch, and made her first appearance on the stage at New York in 1859. Her splendid voice and skill as an operatic artiste of the first rank speedily secured her a leading position. She first appeared in London in 1861, in the character of Amina in "**La Sonnambula**" at Covent Garden, and became the favourite *prima donna* of the day. In London and Paris, Vienna and St. Petersburg, and in the United States, Madame Patti is a universal favourite. In 1870 she received from the Emperor of Russia the Order of Merit, and the appointment of First Singer at the Imperial Court. She married in 1868 M. Roger de Cahuzac, marquis de Caux, from whom she was divorced in 1883. She has since married Signor Nicolini, the tenor singer. While visiting the United States in '87, at a concert at the San Francisco Opera House, a lunatic threw a bomb, which fortunately occasioned no injury to Madame Patti. Early in '88 Madame Patti accepted an engagement to sing in the **Argentine Republic**. Her tour through that State was the most successful she ever made. The total receipts for 24 entertainments reached £70,000, and Madame Patti received £1,600 per night, or £600 more than she was guaranteed. She returned to her residence in South Wales in August, and subsequently had an enthusiastic reception at **Swansea**, where she sang gratuitously for the benefit of a local charity. In Nov. '88 Madame Patti sang in Gounod's opera "**Romeo and Juliet**," in Paris, the composer himself conducting. In Dec. '89 she commenced an operatic tour in the United States under the directions of Mr. Abbey and the conductorship of Signor Sapio. Her engagement began with the inauguration of the new auditorium buildings at Chicago. Her tour will include Mexico, San Francisco, and New York.

Fauncefote, Sir Julian, C.B., G.C.M.G., b. at Munich 1828. Educated at Marlborough College, Paris, and Geneva, and called to the bar '52. He has held the following appointments:—Attorney-General of Hong Kong ('65), Chief Justice of the Supreme Court of that Colony ('69); Chief Justice of the Leeward Islands ('73); Assistant Under-Secretary of State for the Colonies ('74), and for Foreign Affairs ('76); C.B. ('80); G.C.M.G. ('85); Permanent Under-Secretary for Foreign Affairs ('82); and in '88 succeeded Lord Sackville as **British Minister at Washington**.

Paymaster-General. The, supervises the payment of certain salaries and wages in the public service. An Act of last session enables the Treasury from time to time to make regulations for transferring to the Bank of England or the Bank of Ireland any of the duties performed in this office, and for otherwise altering the regulations now in force for the conduct of business in the same office.

Paymaster-General Act, '89. See Session, sect. 101.

Payment of Members of Parliament. See Session, sect. 43.

Pays, James, was b. at Cheltenham; 1830. Educated at Eton and Trinity Coll., Cambridge. Became editor of *Chambers Journal* (q.v.) '58.

Contributed to that periodical "*Lost Sir Masingberd*," which placed him in the front rank of romancers. His subsequent novels include "*By Proxy*," "*Cecil's Tryst*," "*Married Beneath Him*," "*Not Wooded, but Won*," "*High Spirits*," "*Kit*," "*The Heir of the Ages*," and numerous others. In '85 he became editor of *Cornhill* (q.v.). Mr. P. is father-in-law of the editor of the *Times*. During '88 Mr. P. commenced a series of weekly notes in the *Illustrated London News*, and issued a new novel, "*The Lost Million*," in '89. In the Christmas number of *Tit-Bits* ('89) Mr. P. commenced a new tale entitled "*The Word and the Will*."

Peacock, The Rt. Hon. Sir Barnes, P.C., was b. in 1810, and called to the bar at the Inner Temple '36. He was created a Q.C. ('50), and a legal member of the Supreme Council at Calcutta in '52. He was subsequently Chief Justice of the Supreme Court at Calcutta, Vice-President of the Legislative Council of India, and Chief Justice of the High Court of Judicature of Bengal. He retired from the bench in '70, and was appointed a member of the Judicial Committee of the Privy Council in '72.

Pedro II. (de Alcántara), ex-Emperor of Brazil; b. 1825, at Rio Janeiro. On the abdication of Dom Pedro I. (his father), in '37, he succeeded to the throne, but as he was not of age, the affairs of the country were administered by a Council of Regency till '40. He is a man of a very high order of intelligence, and well known in Europe, the principal capitals of which he has repeatedly visited, his most recent visit being that in '88. His Majesty has done a great deal to develop the material resources of his country, which has prospered much under his rule, and ('71) issued an Imperial decree for the gradual abolition of slavery. The total emancipation of the slaves in his dominion was effected in '88. In '43 he married the Princess Theresa Christina Maria, sister of Francis I., King of Naples. Dom Pedro is a lineal descendant of the Houses of Braganza, Bourbon, and Hapsburg. In consequence of a revolution, the Emperor was compelled to leave the country (Nov. '89). See BRAZIL.

Peel, The Rt. Hon. Arthur Wellesley, M.P., P.C., Speaker, youngest son of the late Rt. Hon. Sir Robert Peel, was b. 1829. Educated at Eton and Balliol Coll., Oxford (graduated M.A.), Hon. D.C.L. 1857. Has held the following official appointments:—Parliamentary Secretary to the Poor Law Board (1868-71); Parliamentary Secretary to the Board of Trade (1871-73); Patronage Secretary to the Treasury (1873-74); Under-Secretary for the Home Department (1880). He is D.L. and J.P. for Warwickshire and Bedfordshire. Returned as a Liberal M.P. for Warwick (1865-85); re-elected (L.U.) Warwick and Leamington 1885-86. He was appointed Speaker during Mr. Gladstone's second administration, on the retirement of Sir Henry Brand, now Viscount Hampden, in '84. Mr. P. has on several occasions during '89 delivered speeches on educational and other subjects, which have shown great literary finish. His receptions have been famed for their social qualities.

Pelling, E. H. See ATHLETICS.

Penny Banks. Such banks exist in most towns throughout the country, and prove a great boon to the humbler classes in enabling them to save penny by penny; and as a great

many of these banks place their funds in the Post Office Savings Banks, their depositors have the additional benefit of knowing that their money is safe. To penny banks established in connection with the Post Office Savings Banks special aid is given (1) in furnishing specimen rules approved by the National Debt Commissioners, whose sanction is required before the funds of a penny bank can be received; and (2) in supplying free of charge any number of books for the use of the depositors in the penny bank, on the understanding that they shall be issued gratuitously. Books for the purpose of keeping the accounts at a small charge are also supplied. Under the rules laid down for the penny banks connected with the Post Office, no one is allowed to have more than £5 at one time in the penny bank. So soon as his deposits amount to £1 the depositor is assisted to open a separate account in his own name at the Post Office Savings Bank, to which he can in future, if he wish it, make his payments direct. No deposit of less than a shilling being, however, received by the Post Office, he is permitted to continue paying into the penny bank as before. The working systems of the penny banks generally vary, of course, according to the circumstances under which they are established, but the main principles are similar in all. The **National Penny Bank** is one of the most important of these banks, its chief office being in London. There are also large penny banks at Edinburgh, Glasgow, Liverpool, York, Manchester, and other cities and towns.

People's Palace for East London, The, opened May '87 by Her Majesty, is situated in the busy thoroughfare of the Mile End Road. It provides for the vast population of the East End a large hall for concerts, entertainments, etc.; a library and reading-rooms, gymnasias, swimming baths, social meeting rooms, game rooms, refreshment rooms, and trade shops and technical schools. The last-named department is intended to instruct youths in their trades (and is subdivided into day and evening departments). Great stress is laid upon this feature as a social factor of great probable importance. These trade training schools, built and equipped at a cost of £20,000 by the Drapers' Company, were opened by the Master and Wardens of that Company Oct. 5th, '88. The site will have cost in all £22,400. The "Palace" idea is a resuscitation and development of the Beaumont Philosophical Institute, established nearly half a century since in Mile End, the trustees of which are some twenty gentlemen closely identified with the East End. Sir Edward Cecil Guinness notified (July '89) to the trustees his intention of increasing his original donation of £9,000 for the erection of a winter garden to a sum of £14,000, in order that the people of East London may be provided with a complete and perfect winter garden of the best possible design. **Treasurer**, the Queen; **Treasurer**, Mr. S. Charrington, M.P.; **Chairman**, Sir E. H. Currie. **Officers** of the Trust, **People's Palace**, Mile End Road, E.

Peers, English, Deceased (Dec. 1st, '88, to Nov. 21st, '89). See OBITUARY.

Peerage in '89. On July 27th Her Majesty granted the dignities of a marquis and duke of the United Kingdom unto the Earl of Fife, K.T., by the names, styles and titles of the Marquis

of Macduff and Duke of Fife; but between Dec. '88 and Nov. 30th, '89, there were no other promotions in the peerage, nor was any new peerage created.

Peers, Principal Officers of House of. *Chairman of Committees*, Rt. Hon. Earl of Morley.—*Clerk of the Parliaments*, Henry John L. Graham, Esq.—*Deputy Clerk of Parliaments*, Ralph Disraeli, Esq.—*Reading Clerk and Clerk of Outdoor Committees*, Hon. S. Peers, Privileges of. See PRIVILEGES OF PEERS.

Peerage. Peers are created by the Sovereign and, with an exception to be noticed presently, the titles are hereditary, though they may be lost by attainder for high treason. Before the union of the three kingdoms, England, Scotland, and Ireland had each a peerage of its own containing the five temporal ranks or degrees, and precedence in each degree depended upon the date of the creation of the title. Thus in each country the dukes came first, and took precedence of each other in order of date of title; then came the marquises, earls, viscounts, and barons, precedence in each rank being similarly governed by priority of patent. At the union with Scotland, in 1707, it was arranged that the Scotch peerages should rank after the English peerages then in existence, according to degree, and the Scotch dukedoms were accordingly placed in order of date after all the English dukedoms, and so on through the other ranks. The Act of Union also provided that the Scotch peers should be represented in the House of Lords by a portion of their number only, and as it made no provision for the creation of any new Scotch peers, the peerage of North Britain consists exclusively of those whose titles date from before the year 1707. From that time until the Union with Ireland the peerages

created were either Irish or of Great Britain, the latter alone giving seats in the House of Lords, and taking precedence according to degree next after the English and Scotch peerages. The Act of Union with Ireland provided that peers of that kingdom should take precedence next after peers of Great Britain according to rank, and that Ireland should be represented in the House of Lords by a portion of her peers only. It was further enacted that one new Irish peerage might be created on the extinction of three existing Irish peerages, and that when the number should be reduced to one hundred, if one peerage became extinct one other might be created. The peerages of the United Kingdom and of Ireland created since the Union take precedence according to rank and date of patent next after those of Ireland which were in existence at the Union, but of the two classes only the peerages of the United Kingdom give of themselves a seat in the House of Lords. There is no limit to the increase of these but the pleasure of the Sovereign. The peerage collectively may thus be classified as consisting of peers of England, of Scotland, of Great Britain, of Ireland, and of the United Kingdom, but of the Scotch and Irish peers only a portion are peers of Parliament. Irish peers who have not been elected to represent their order in the House of Lords may be returned and may sit for any borough or county constituency in Great Britain. There are at present 86 Scotch peers and 177 Irish peers, but many of these are peers of the United Kingdom also, or are representative peers, and as such are entitled to sit in the House of Lords. In order to avoid repetition in the separate lists given below it thought desirable to include the information relating to all lords of Parliament under the head of the HOUSE OF LORDS, and to put in the separate lists of Scotch and Irish peers only those who are not so included. The House of Lords is composed of two of the estates of the realm, the lords spiritual and temporal (see PARLIAMENT). The first consists of the Archbishops of Canterbury and York, and twenty-four bishops of the Church of England, the number not having been increased with the successive creation of new bishoprics. The Archbishops and the Bishops of London, Durham, and Winchester are always entitled to sit; the other bishops only receive a writ of summons when the avoidance of a see decreases the total number of lords spiritual to less than twenty-six, and then in order of seniority of appointment. The Bishop of Sodor and Man is not included in this rotation, and has no seat in Parliament. A bishop ceases to be a lord of Parliament on resigning his see. The temporal lords may be divided into peers whose right to sit and vote in the House is hereditary, representative peers of Scotland and Ireland, and lords of appeal in ordinary. By the Act of Union between England and Scotland the Scottish peers send sixteen representatives to the House of Lords, who are elected immediately after every general election, and sit until parliament is dissolved. The Irish peers elect twenty-eight representatives for life. The Lords of Appeal, of whom there may not be more than four appointed, enjoy the dignity of a baron for life. By the Act of '76 they were to lose the right to sit and vote on resigning office; but by the Appellate Jurisdiction Act of '87 any retired lord of appeal

may sit and vote as a member of the House of Lords during his life. The peers temporal are divided into dukes, marquises, earls, viscounts, and barons, these titles taking precedence in the order given. But it should be borne in mind that a peer may hold a superior Scotch or Irish title (and by which he may be generally known) to that under which he sits as a peer of the United Kingdom. Thus the Duke of Argyll sits as Baron Sundridge and Hamilton, and the Duke of Buccleuch as Earl of Doncaster. The lords spiritual and temporal sit together, and all have an equal voice and vote in the house, whatever may be their rank. As in the House of Commons, each peer must be present to record his vote, the practice of peers giving proxies having been discontinued. A newly created peer, or one elevated to a higher title, is introduced by two other peers of his own degree, who are accompanied by the Earl Marshal (the hereditary office of the Duke of Norfolk), the Lord Great Chamberlain (Willoughby de Eresby, is at present Lord Great Chamberlain), all in their parliamentary robes, attended by Garter King of Arms (Sir Albert Woods has long held this office), and Black Rod (Sir J. Drummond). The procession enters the house at the bar, and bows three times on the way to the woolsack, where the peer kneeling presents his patent and writ to the Lord Chancellor. Both these documents are read by the clerk, and the oath is administered to the peer at the table, and he subscribes the roll. He is then with further formalities conducted to one of the benches of the house, the position chosen varying with the rank of the new peer, where he and his introducers bow thrice to the Lord Chancellor, by whom he is afterwards congratulated. Peers are robed on these occasions, and at the opening of parliament by Her Majesty, but wear their ordinary dress when the House is sitting for business. A bishop is introduced by two other bishops, but without many of the formalities described above; representative peers simply present their writs, and are sworn like peers succeeding to a title. (See also PARLIAMENTARY PROCEDURE.) The peers place themselves somewhat differently to the commons. There are in this House, as in that, rows of benches running down each side from the throne to the bar; but in the Lords there are, near the bar, a few seats known as the cross benches, the occupants of which face the woolsack. In this quarter of the House sit the Royal dukes, who take no side in politics, and a few noble lords who give a rigid adhesion to neither great party, and are of what Earl Granville once happily termed the "cross-bench mind." The lords spiritual sit on the upper benches to the right of the throne, and retain these places no matter which party may be in power. The other lords sit as the commons do,—the leader of the House and his colleagues in the Ministry on the front bench to the right of the woolsack, his supporters taking their places on the benches behind him, and the leader of the Opposition in that House and the ex-Ministers on the left front bench, behind them their adherents. The two parties cross the House on a change of ministry, as the Commons do. There is no arrangement of peers according to rank, the different degrees sitting together indiscriminately if of the same political complexion. The House meets at 4.15 p.m. on Mondays, Tuesdays, Thursdays, and Fridays, and sits for an uncertain period,

but seldom after midnight. The House of Lords has both legislative and judicial powers. It is the highest appellate court of the United Kingdom: it may in certain cases try members of its own body, it tries any person who may be impeached by the House of Commons, and it also decides claims to the peerage. The Appellate Court is constituted of the Lord Chancellor and of other legal lords of high standing, such as ex-lord-chancellors and the lords of appeal in ordinary. It may sit during a Parliamentary recess, and its hours of business are from 10.30 a.m. to 4 p.m. In the following list the number to the immediate left of each title denotes the order in which the lords spiritual and temporal stand upon the roll of Garter King of Arms—that is, their relative rank and precedence in the House of Lords, the necessary corrections having been made up to Nov. 20th, 1889. The Prince of Wales is first on the roll, and next are the Royal Dukes of Edinburgh, Connaught, Albany, and Cambridge, who are followed in turn by the Archbishop of Canterbury, the Lord Chancellor, the Archbishop of York, the Lord President of the Council, and the Lord Privy Seal. After these come the dukes, beginning with His Grace of Norfolk, Earl Marshal and Premier Duke of England, then the marquises, earls, viscounts, bishops, and barons, Lord Savile, as junior baron, being last upon the list. It will be understood, from what is written above, and from an inspection of the list, how essentially the order in which peers are named on Garter's roll differs from the precedence existing among the peers of the three kingdoms collectively. Lord Savile's number (561) is in excess of the total of the lords spiritual and temporal, the discrepancy being caused by the following lords being named twice on the roll:—Lord Salisbury as High Chancellor and as Lord Halsbury, Viscount Cranbrook as such and as Lord President, Earl Cadogan as such and as Lord Privy Seal, the Earl of Mount-Edgcumbe as such and as Lord Steward, the Earl of Lathom as such and as Lord Chamberlain, Viscount Powerscourt and Earl de Montalt each as an Irish representative peer, and also as a peer of the United Kingdom, the Earl of Strathmore and Kinghorne as a Scotch representative peer and a baron of the United Kingdom, and Lord Knutsford as such and as a Secretary of State. The date of creation refers only to the present title, and does not indicate the year in which the peer or his ancestor may have been first admitted to the House of Lords. The initials S.R.P. and I.R.P. are used to signify that the lord is a Scotch or Irish representative peer. The abbreviations *n.*, *s.*, *b.*, *un.*, *a.b.*, and *g.s.* will be readily understood to mean nephew, son, brother, uncle, half-brother, and grandson. P.C. is used where the peer is a Privy Councillor, and L.L. stands for Lord Lieutenant. The following is the present composition of the House of Lords:—Peers of the Blood Royal, 5; Archbishops, 2; Dukes, 22; Marquises, 21; Earls, 120; Viscounts, 28; Bishops, 24; Barons, 291; Scotch Representative Peers, 14 (two vacancies); Irish Representative Peers, 28: total, 555. Fourteen of the foregoing are minors, two are reckoned both as peers of the United Kingdom and Irish representative peers, and one is reckoned as a peer of the United Kingdom and as a Scotch representative peer, so that the actual voting strength of the House is 538.

Peers in their

With three exceptions the following are

| | | | | | |
|---|--|--------------------|------|------|------|
| 1 | Berkeley, Louisa Mary, Baroness | Milman . | 1421 | 1840 | |
| 2 | Berners, Emma Harriet, Baroness | Tyrwhitt . | 1455 | 1835 | 1871 |
| 3 | Bolsover, Augusta Mary Elizabeth, 1st Baroness | Cavendish-Bentinck | 1880 | 1834 | . . |
| 4 | Burdett-Coutts, Angela Georgina, 1st Baroness | Burdett-Coutts | 1871 | 1814 | . . |
| 5 | Kinloss, Mary, 8th Baroness. (In the Peerage of Scotland.) | Boscawen . | 1264 | 1822 | 1831 |
| 6 | LeDespencer, Mary Frances Elizabeth, Baroness | Morgan . | 1601 | 1852 | 1889 |
| 7 | Nairne, Emily Jane Mercer, 8th Baroness. (In the Peerage of Scotland.) | Fitz-maurice | 1681 | 1819 | 1867 |
| 8 | Roths, Mary Elizabeth, Countess of. (In the Peerage of Scotland.) | Leslie . . | 1457 | 1811 | 1886 |

| Personal Details, Club, or Residence. | Party. | Heir. | No. |
|---|--------|---|-----|
| <i>Carlton</i> | C. | Hon. S. G. J. Macdonald, <i>s.</i> | 40 |
| Formerly in Gren. Guards. His father, when Governor-general of India, was assassinated in 1872. <i>Carlton</i> . | C. | Hon. M. A. Bourke, <i>b.</i> | 41 |
| Was M.P. Gattou '31-2; Pontefract '35-7, '41-7. <i>Travellers'</i> | C. | Visct. Pollington, <i>s.</i> | 42 |
| Rector of St. Petrock, Cornwall. <i>Carlton</i> | C. | Hon. G. B. Molesworth, <i>s.</i> | 43 |
| D.L. and J.P. Waterford and York; High Sheriff Waterford '62. | C. | Hon. R. H. T. More-Smyth, <i>s.</i> | 44 |
| D.L., J.P. Co. Kilkenny. <i>Carlton</i> | C. | Hon. H. E. Butler, <i>s.</i> | 45 |
| A minor | C. | Hon. A. B. De Montmorency, <i>b.</i> | 46 |
| M.P. for W. Cumberland '72-80; Cumberland (Egremont Div.) '85; re-elected '86. L.L. Cumberland. <i>Carlton</i> . | C. | Hon. A. J. Pennington, <i>b.</i> | 47 |
| Formerly in the Royal Navy. <i>St. George's Yacht</i> | C. | Hon. H. R. T. F. G. Deane-Morgan, <i>s.</i> | 48 |
| A minor | L. | Hon. Thomas John Wynn, <i>b.</i> | 49 |
| Formerly Lt. and Capt. Scots Gds., served in Crimea '54-5; M.P. Portarlington '57-65 and '68-80; D.L. and J.P. Midx. and Dorset. <i>Carlton</i> . | C. | Hon. H. R. Toler, <i>c.</i> | 50 |
| Formerly lieut.-col. West Middlesex R.V. 70, <i>Portland Place, W.</i> | C. | V. Carlow, <i>s.</i> . . | 51 |
| Was M.P. for E. Suffolk '74-85. <i>Carlton</i> | C. | Hon. Granville Geo. Waldegrave, <i>s.</i> | 52 |
| Retired Comdr. R.N. <i>Glatton, Peterboro'</i> | C. | Hon. F. A. C. Thellusson, <i>s.</i> | 53 |
| A minor | C. | Philip H. Sherard, <i>b.</i> | 54 |
| President of Austrian Ministry '79-80; life member Austrian House Lords; Chamberlain and P.C. Emp. Austria <i>Vienna</i> . | C. | Hon. H. Taaffe, <i>s.</i> | 55 |
| Formerly in the Scots Guards | C. | Hon. F. W. J. Shore, <i>b.</i> | 56 |
| Formerly in the army; V.-Chm. C.C. Oxon. <i>Carlton</i> | C. | Hon. A. Annesley, <i>s.</i> | 57 |
| Formerly Capt. Coldstream Guards. <i>Travellers'</i> | C. | Hon. C. W. J. H. Blake, <i>s.</i> | 58 |
| In Foreign Office '60-3. <i>Brooks's</i> | L. | Hon. H. Cavendish, <i>s.</i> | 59 |
| A minor. <i>Pallas, Loughrea, Co. Galway</i> | C. | Hon. W. A. Nugent, <i>b.</i> | 60 |
| D.L. Sussex. <i>Carlton</i> | C. | Visct. Turnour, <i>s.</i> | 61 |

own Right.

Peeresses of the United Kingdom.

| | | |
|--|--|---|
| | Hon. Eva Mary Fitz-Harding Milman, <i>d.</i> | 1 |
| <i>Ashwellthorpe Hall, Wymondham, Norfolk</i> | Hon. H. Tyrwhitt-Wilson, <i>s.</i> | 2 |
| 13, <i>Grosvenor Place, S.W.</i> | Duke of Portland, <i>step-son.</i> | 3 |
| Married '81 Mr. W. Ashmead Bartlett, who assumed the name of Burdett-Coutts, and was elected for Westminster '85. <i>Holly Lodge, Highgate, N.</i> | | 4 |
| Married '84 Louis Ferdinand Harry Courthorpe Morgan, Esq. . | Hon. R. G. G. Morgan, <i>s.</i> | 5 |
| Married '45 the late Visct. Falmouth. 2, <i>St. James's Sq., S.W.</i> | Visct. Falmouth . | 6 |
| Widow of the 4th M. of Lansdowne. 15A, <i>Grosvenor Sq., S.W.</i> | M. of Lansdowne, <i>s.</i> (peer). | 7 |
| Widow of Martin E. Haworth, Esq. | Lord Leslie, <i>g.s.</i> . | 8 |

Bishops at present without a Seat in Parliament (see introduction to PEERAGE).

Peers who have been Commoners. The following list of names formerly borne in public life by gentlemen who are now members of the House of Lords, and whose present title is dissimilar to their surname, will be found of assistance in making references to the peerage. A few *titles of courtesy* are included, but the general list of these is given elsewhere.

| Commoner. | Peer. |
|------------------------------|---------------------------|
| A'Court Holmes, Mr. W., M.P. | Heytesbury, L. |
| Adderley, Sir Chas., M.P. | Norton, L. |
| Allsopp, Mr. S. C., M.P. | Hindlip, L. |
| Althorp, Lord, M.P. | Spencer, E. |
| Andover, Visct., M.P. | Suffolk and Berk, E. |
| Anson, Visct., M.P. | Lichfield, E. |
| Baring, Mr. A. H., M.P. | Ashburton, L. |
| Baring, Mr. T. G., M.P. | Northbrook, E. |
| Bass, Sir Michael A., M.P. | Burton, L. |
| Bateson, Sir Thomas, M.P. | Deramore, L. |
| Beckett, Sir Edmund | Grimthorpe, L. |
| Bective, Earl of, M.P. | Headfort, M. |
| Berkeley, Col. F. W., M.P. | Fitzhardinge, L. |
| Bourke, Mr. M.P. | Connemara, L. |
| Bowmont, Marq. of, M.P. | Roxburghe, D. |
| Brabazon, Lord | Meath, E. |
| Brand, Sir H., M.P. | Hampden, V. |
| Brett, Sir W. B., M.P. | Esher, L. |
| Brodrick, Mr. W., M.P. | Midleton, V. |
| Bruce, Mr. Henry, M.P. | Aberdare, L. |
| Burghley, Lord, M.P. | Exeter, M. |
| Burke, Visct., M.P. | Clanricarde, M. |
| Campbell, Mr. W. F., M.P. | Stratheden & Campbell, L. |
| Castlereagh, Visct., M.P. | Londonderry, M. |
| Castlerosse, Visct., M.P. | Kenmare, E. |
| Cavendish, Lord, M.P. | Devonshire, D. |
| Cecil, Lord Robert, M.P. | Salisbury, M. |
| Cholmondeley, Mr. H., M.P. | Delamere, L. |
| Clive, Visct., M.P. | Powis, E. |
| Cochrane-Ballie, Mr. M.P. | Lamington, L. |
| Cole, Visct., M.P. | Enniskillen, E. |
| Corry, Mr. Montagu | Rowton, L. |
| Cotton, Major W. H. | |
| Stapleton, M.P. | Combermere, V. |

| Eaton, Mr., M.P. | Cheylesmore, L. |
| Ebrington, Visct., M.P. | Fortescue, E. |
| Elcho, Lord, M.P. | Westmyss, E. |
| Eslington, Lord, M.P. | Ravensthorpe, E. |
| Fellows, Capt., M.P. | De Ramsey, L. |
| Finch-Hatton, Mr. M., M.P. | Winchelsea, E. |
| Fitz-Patrick, Mr. B., M.P. | Castletown, L. |
| Fortescue, Mr. C., M.P. | Clermont and Carlisle, L. |
| Fremantle, Sir T., M.P. | Cottesloe, L. |
| Garlies, Lord, M.P. | Galloway, E. |
| Gathorne - Hardy, Mr., M.P. | Cranbrook, V. |
| Gibson, Mr. Edw., M.P. | Ashbourne, L. |
| Giffard, Sir H., M.P. | Halsbury, L. |
| Goderich, Visct., M.P. | Ripon, M. |
| Gore-Langton, Mr. W. S., M.P. | Temple, E. |
| Greville - Nugent, Mr., M.P. | Greville, L. |
| Grimston, Visct., M.P. | Verulam, E. |
| Grosvenor, Earl, M.P. | Westminster, D. |
| Grosvenor, Ld. Rd., M.P. | Stalbridge, L. |
| Grosvenor, Ld. Rob., M.P. | Ebury, L. |
| Guinness, Sir A. E., M.P. | Ardilaun, L. |
| Hamilton, Marq. of, M.P. | Abercorn, D. |
| Hanbury-Tracy, Mr. C., M.P. | Sudeley, L. |
| Hay, Lord W., M.P. | Tweeddale, M. |
| Heathcote, Mr. G. H., M.P. | Willoughby de Eresby, L. |
| Hinchinbrook, Visct., M.P. | Sandwich, E. |
| Holland, Sir Henry T., M.P. | Knutsford, L. |
| Howick, Visct., M.P. | Grey, E. |
| Hubbard, Mr. E., M.P. | Addington, L. |
| James, Sir W., M.P. | Northbourne, L. |
| Johnstone, Sir H., M.P. | Derwent, L. |
| Knatchbull - Huggessen, Mr. E., M.P. | Brabourne, L. |
| Lawley, Mr. Beilby, M.P. | Wenlock, L. |
| Leveson, Lord, M.P. | Granville, E. |
| Liddell, Mr. H., M.P. | Ravensthorpe, E. |
| Lindsay, Lord, M.P. | Crawford, E. |
| Lowe, Mr. Robert, M.P. | Sherbrooke, V. |
| Loyd-Lindsay, Sir R., M.P. | Wantage, L. |
| Lumley, Sir John S. | Savile, L. |
| Lygon, Mr. Fredk., M.P. | Beauchamp, E. |
| Lytelton, Mr. C. G., M.P. | Cobham, P. |
| Macduff, Visct., M.P. | Fife, D. |
| M'Garel-Hogg, Sir J., M.P. | Magheramorne, L. |
| Mahon, Visct., M.P. | Stanhope, E. |
| Majoribanks, Sir D. | |
| Coutts, M.P. | Tweedmouth, L. |
| Mandeville, Visct., M.P. | Manchester, D. |

| Commoner. | Peer. |
|--------------------------------|---------------------------|
| Manners, Lord John, M.P. | Rutland, D. |
| March, Earl of, M.P. | Richmond and Gordon |
| Melgund, Visct., M.P. | Minto, E. [don, D. |
| Milles, Mr. G. W., M.P. | Sondes, E. |
| Mills, Sir Charles, M.P. | Hillingdon, L. |
| Milton, Visct., M.P. | Fitzwilliam, E. |
| Monsell, Mr., M.P. | Emly, L. |
| Monson, Mr. W. J., M.P. | Oxenbridge, V. |
| Moreton, Lord, M.P. | Ducie, E. |
| Morgan, Major G. C., M.P. | Tredegar, L. |
| Mulgrave, Earl of | Normanby, M. |
| Newark, Visct., M.P. | Manvers, E. |
| Ormsby-Gore, Mr. W. R., M.P. | Harlech, L. |
| Ossulton, Lord, M.P. | Tankerville, E. |
| Palmer, Sir Roundell, M.P. | Selborne, E. |
| Parker, Mr. T. A. W., M.P. | Macclesfield, E. |
| Pevensey, Visct., M.P. | Sheffield, E. |
| Ponsonby, Mr. C., M.P. | De Mauley, L. |
| Portman, Mr. W. K., M.P. | Portman, V. |
| Raynham, Visct., M.P. | Townshend, M. |
| Robartes, Mr. Agar, M.P. | Robartes, L. |
| Royston, Visct., M.P. | Hardwicke, E. |
| Russell, Mr. F. C., M.P. | Bedford, D. |
| St. Aubyn, Sir J., M.P. | St. Levan, L. |
| St. Lawrence, Visct., M.P. | Howth, E. |
| Sandon, Visct., M.P. | Harrowby, E. |
| Slater-Booth, Mr., M.P. | Basing, L. |
| Scott, Lord Henry, M.P. | Montagu of Beauchieu, [L. |
| Seymour, Admiral Sir Beauchamp | Alcester, L. |
| Smertton, Lord | Normanton, E. |
| Stafford, Marq. of, M.P. | Sutherland, D. |
| Stanley, Lord, M.P. | Derby, E. |
| Stormont, Visct., M.P. | Mansfield, E. |
| Strutt, Mr. Henry, M.P. | Belper, L. |
| Sturt, Mr. Henry, M.P. | Alington, L. |
| Thesiger, General F. | Chelmsford, L. |
| Townshend, Mr. J. R., M.P. | Sydney, E. |
| Trefusis, Mr. C. M.P. | Claughton, L. |
| Trevor, Mr. Thomas, M.P. | Dacre, L. |
| Tufton, Sir H. | Hothfield, L. |
| Tyrone, Earl, M.P. | Templeton, V. |
| Vane, Lord Harry, M.P. | Cleveland, D. |
| Walpole, Lord, M.P. | Orford, E. |
| Walsh, Mr. A., M.P. | Ormathwaite, L. |
| Wellesley, Lt.-Col., M.P. | Wellington, D. |
| Wilson-Patton, Col., M.P. | Winnarleigh, L. |
| Winn, Mr. Rowland, M.P. | Saint Oswald, L. |
| Wyndham, Mr. H., M.P. | Leconfield, L. |
| Yarmouth, Earl of, M.P. | Hertford, M. |

Pensions, Civil List. See CIVIL LIST.

Peppercorn Rent. A rent of one peppercorn a year—in other words, a nominal rent to be paid on demand. It is an expedient for securing an acknowledgment of the tenancy in cases where lands or houses are let virtually free of rent.

Perak. A Malay state under British protection. See STRAITS SETTLEMENTS.

Perakop Ship Canal. After other rumours had been aloft for some time, it was stated by the *Cronstadt Messenger* (Times, May 30th, '88) that this canal was to be cut through the Perakop Isthmus in the Crimea, the necessary funds (£5,000,000 roubles) having been appropriated. The canal will traverse Gontchar and Sivach from Perakop to Guenitcheak, being 74 miles in length, 65 feet in breadth and 12 feet in depth, while at both ends canal ports are to be established for posters. The canal will form the shortest line of communication between the northern coast of the Black Sea and Guenitcheak, at present Marionopol being 434 miles from Odessa, but it will be only 295 miles. Major-Gen. Jilinsky and the French

engineers, Messrs. Essant and Carouzet, will carry out the work. It was reported from Vienna, May 26th, '88, that the preparatory works had been completed, and that the excavations were to begin shortly, the canal to be spanned by two huge bridges.

Perim. A small island in the Straits of Bah-el-Mandeb, since 1855 held by Great Britain. Area 7 sq. m.; pop. 150. It is subordinate to Aden (q.v.), and its batteries completely command the approaches of the Red Sea.

Perpetual Pensions. See Session, sect. 44.
Persia (Iran). An independent Asiatic state lying between Turkey and Afghanistan, three times as large as France (628,000 sq. m.), with a pop. of 7,653,600. Revenue ('86-7) amounted to £1,750,000—£220,000 being raised from customs and £1,470,000 from direct taxes. Expenditure amounted to £1,630,000. There is no public debt. England does trade with South Persia to the extent of £1,000,000 a year.—'88. During the year the Shah, accompanied by Sir H. Drummond Wolff, paid visits to the principal capitals of Europe (see various countries). H.I.M. returned to Persia much impressed by his European tour. Of the internal progress of the country the most important evidences have been the attempts of Russia to secure increased influence, and to obtain a guarantee from Persia against a repetition of concessions which would give a preponderance to British influence, and to secure a decision during the life of the Shah as to the heir to the throne. Another question connected with commerce was the opening of the Bay of Murdab, in the Caspian Sea, to Russian navigation. A bank, under the auspices of Sir H. Drummond Wolff, with important privileges, was opened at Teheran (Oct. 23rd). The same month a Joint Stock Company was founded for the purpose of developing commercial relations between Russia and Persia. There was an epidemic of cholera in Kermanshah in November, which continued spreading in the districts of Khorremabad and Hamadan at the end of the month. Prince Dolgorouki, the Russian Minister to Persia, has, at his own request, been relieved of his post. The Tzar has conferred upon His Excellency the Second Class of the Vladimir Order. Consult Wills' "Persia as it is," C. R. Markham's "General Sketch of the History of Persia," *The Statesman's Year-Book*, etc. For Ministry, etc., see DIPLOMACY.

Persian Gulf, etc. For Residents, etc., see DIPLOMACY.

Perth. Capital of Western Australia (q.v.), pop. 5,044; on Swan River.

Peru. A republic on W. coast of S. America. Area, 503,000 sq. m.; est. pop. ('88), 2,699,945. Cap., Lima; pop. 101,488. The disastrous war with Chili completely shattered the power of Peru, and ended in an ignominious peace. Constitution modelled on that of the United States, the legislative power being vested in a Senate elected by the provinces, two delegates from each, and a House of Representatives nominated by electoral colleges of provinces and parishes, one for every 20,000 inhabitants. Executive in the hands of a President elected for four years. Absolute political but not religious freedom allowed, the constitution prohibiting the public exercise of any but the Roman Catholic religion. Revenue was until recently derived from sale of guano and customs duties; direct taxation did not exist. Estimated revenue ('88), £1,350,000; estimated expenditure,

£1,133,000. There is a foreign debt of about £31,000,000, chiefly secured on guano deposits, on which no interest has been paid since '76, with the exception of a small amount paid to England in '83, under an arrangement with Chili, which now holds the guano islands, that a percentage of the value of guano deposits should be paid to the bondholders. At the close of the struggle in '83, Chili supported Iglesias, as president, who two years after was driven from power by the rebels under Gen. Caceres, who in '86 was elected president. During '89 the Peruvian Cabinet, under the presidency of Signor Jimenez, resigned in consequence of finding it impossible to effect the arrangement they proposed for payment of bondholders. A new Cabinet was formed by Signor Pedro del Solar. The Peruvian Congress definitely sanctioned (Oct. 29th) the contract with the bondholders, which embraces the cession to them of all the Government railways and 3,000,000 tons of guano, and the payment of £2,400,000 in thirty annual instalments of £80,000. The contract further cedes to the bondholders 2,000,000 hectares of unoccupied land at the committee's selection, the privilege of extending the Oroya railroad to the navigable rivers, with a concession of 6000 hectare of land per kilometre, also the right of building a line from Puno to Desaguadero.

Peterborough. Rt. Rev. William Connor Magee, D.D., 26th Bishop of (founded 1541), son of the late Rev. John Magee, vicar of St. Peter's, Drogheda, and grandson of Archbishop (Magee) of Dublin; b. at Cork 1821. Educated at Trin. Coll., Dublin. Became Hon. Canon of Wells Cathedral, and was created D.D. (1859). Appointed Precentor of Clogher and to the living of Enniskillen (1864), and Dean of Cork (1864). Is author of numerous works. Consecrated Bishop of Peterborough 1868. Dr. Magee is not only one of the strongest members of the episcopal bench, but also one of the most eloquent speakers in the House of Lords. He delivered a pastoral address of remarkable power (Oct. '89), which attracted much attention, and also provoked not a little discussion.

Petroleum. A mineral oil springing naturally from the ground in the United States, the Caucasus, Burmah, Canada, Galicia, Venezuela, Peru, and other parts of the world. Young started the industry about the time of the Crimean war by distilling paraffin from shale oil, extracted from Scotch shale coal. This industry was checked in '59 by the adoption in America of Drake's system of boring for the petroleum existing naturally in copious deposits at from 500 to 3,000 ft. below the surface. The lamp oil distilled from this was called kerosine, which is the title used all over the world except in England, where "paraffin," "crystal oil," or "refined petroleum," are terms employed for the American article. Scotland still produces 70,000,000 gallons of paraffin, but America refines nearly 700,000,000, and Russia 200,000,000—making, with Galicia, etc., an output of lamp oil for the whole world of about one thousand million gallons. The largest number of wells are in the United States, where there are 26,000; but at Baku (Caucasus) the most copious supply exists, a single well there spouting sometimes (11,000 tons a day) more oil than all the wells of America put together. At Baku there are 500 wells, of which 300 are working. According to a scientific report, published in '83 by the Canadian Government, the largest

petroleum fields in the world have been discovered in the Athabasca region. The attempts to obtain oil in Egypt were abandoned as hopeless in '88, after an expenditure of £200,000. In Burmah are immense deposits, situated at Yenanyoung, on the river Irrawady, near Prome, but the oil is heavy, and no attempt has been made yet to exploit them on a large scale. In Baluchistan, near Sibi, sufficient oil has been found to furnish a supply for the Quetta railway. The products of crude petroleum oil are: light oils, benzoline and benzine, used chiefly for manufacturing purposes; kerosine, for lamp oil; lubricating oil, for greasing machinery; vaseline, or petroleum jelly, for medicinal purposes; and liquid fuel—the latter being the refuse after the various distillations. Petroleum varies greatly in character and specific gravity, and in hardly any two countries is alike. The American produces 70 galls. of lamp oil, the Russian 30, and the Galician 15 or 20, from 100 galls. of crude. On the other hand, the Russian and Galician yield more lubricating oil and fuel. Now that thirty tank steamers run regularly with oil from Batoum to European ports, Russian kerosine is as widely diffused as American. Liquid fuel made great strides in '89 in America, where many hundred factory furnaces, locomotives, and steamers were fitted with appliances to burn oil instead of coal. In Chicago it was applied to the manufacture of gas for the city. In Russia over 1,000 steamers, locomotives, and stationary engines, burn oil exclusively. Bulk transport is now becoming universal. By this system the oil is transported in tanks instead of by the costly system of barrels; pipe-lines "pipe" it from the oil fields to the refineries, thence it is piped on board tank steamers, many of which convey 3,000 tons of oil at a trip; on arrival at port it is piped from the steamer to tanks on shore, and is finally distributed either by tank trucks on railways, by tank waggons in urban streets, or by means of metal drums. The total number of ocean tank steamers now running is 62, making with those on the Caspian nearly 150 engaged in transporting oil. During '89 vast tank reservoirs were erected in London, Liverpool, Barrow, Cardiff, and Glasgow. Although England owns in Canada and Burmah the largest deposits in the world, she has done nothing yet to develop the oil industry itself, and obtains nearly all her lamp and lubricating oil from Russia and America. The Petroleum Association, 85, Gracechurch St., London, E.C., represents the London trade, and issues certificates for all mineral oil imported into the United Kingdom. Consult Marvin's "Region of the Eternal Fire," and Crew's "Coming Oil Age."

Pettie, John, R.A., b. at Edinburgh, 1839, and contributed his earliest works to the Royal Scottish Academy. Removing to London in 1862, the productions of his brush rapidly obtained notice, and (1866) he was elected A.R.A. Many of his works have been engraved. Mr. P. was elected R.A. ('73) in the place of Sir Edwin Landseer. He exhibited at last year's Royal Academy a portrait of Mrs. Reckitt. His daughter was, during '89, married to Mr. Hamish McCunn (q.v.).

Pettitt, Henry, distinguished writer and dramatist, made a brief appearance on the stage, Sadlers Wells, at the age of fifteen. A play which he had written together with Mr. Paul Merritt turning out a great success at

Mr. George Conquest's theatre, the Grecian, determined Mr. Pettitt in taking up dramatic writing as a regular profession. He is an original and most prolific writer, and has taken part in the construction of most of the new dramas that have been produced in the Metropolis for the past eight years. His leading works are "Queen's Evidence," "Black Flag," "The World" (in collaboration with Messrs. Merritt and Harris), "Taken from Life," "Pluck" (Pettitt and Harris), "In the Ranks" (Pettitt and G. R. Sims), "Human Nature" (Pettitt and Harris), "Harbour Lights" (Pettitt and Sims), "Bells of Haalemere" (Pettitt and Grundy), "Hands Across the Sea," "Faust up to Date" (Pettitt and Sims), "The Silver Falls," and "London Day by Day" (Pettitt and Sims).

Philippine Islands. A large group of the Asiatic Archipelago, and a Spanish colony. Capital **Manilla**. **Products:** sugar, manilla, hemp, coffee, cocoa, cotton, tobacco, rice, indigo, cinnamon, maize, teak, bamboo, and innumerable other valuable timbers; also fruits. Ruled by a Governor-General, who is also supreme over the Caroline, Sulu, and Marianne Islands. The pirates of Sulu and Mindanao have long been a terrible scourge to the eastern seas. **Exports to United Kingdom** ('87) £878,658, imports from **United Kingdom** £678,069; **exports to Spain**, 23,349,437 pesetas; **imports from Spain**, 4,611,598 pesetas. Chief articles of export, sugar, hemp, and tobacco. A force of 8256 troops is maintained. Bulk of population Malays, with some Negritos, Meztizoes, or half-breeds, Chinese, and Europeans. The U.S. consul reported (Oct. '89) that the first railway in the Archipelago had been opened and was at work. It is a narrow-gauge road, a little over five miles in length, connecting Manilla with Malabon, a town of about 3,000 inhabitants, on the south-west shore of Manilla Bay, where a large sugar refinery, owned by an English corporation, is in active operation. **Consult Wallace's "Malay Archipelago," Penny's "Ten Years in Melanesia," etc.**

Phonograph. This instrument is intended for the reproduction of vocal and other sounds. It was invented at the end of '77 by Mr. Thomas Alva Edison, of New York, but the results were tentative only. Sufficient had been attained, however, to justify continued experiment, and the appearance of Mr. E.'s improved phonograph during '89 occasioned very great interest. The essential parts consist of a mouthpiece and a diaphragm, the latter made to vibrate under the influence of sound waves produced by the voice or other means; and attached is a fine style in contact with a revolving cylinder of a waxy composition. This style or needle, as the result of vibrations imparted to the diaphragm, traces upon the cylinder a characteristic record of sound in the form of a wavy line. A reverse process enables us to obtain from another diaphragm the original sound, which can be magnified by attaching a sound trumpet to the reproducing mouthpiece. The cylinder is revolved by an electric current, the motor being inclosed in a box below the machine. It works the apparatus so that the speed of the cylinder can be controlled, but at present the details have not been made known. The cylinders are about three inches long, and Mr. E. has arranged by an ingenious device for the same cylinder to be utilised for several records. For ensuring

purity and distinctness, tubes are used to convey the reproduced sounds from the mouthpiece to both ears of the listener. In the phonograph, as it now stands, there is a marked improvement upon the old form; in fact, it is practically a new instrument. A distinct advance has been made by discarding the metal cylinder covered with tinfoil, which was the great feature of the '77 phonograph, and substituting a waxy material as the medium for traced impressions. There was also no electric motor in the old form, the motions of the cylinder being got by turning a handle. The first improved phonograph was received in England on June 26th, '88, having been sent to Col. Gouraud, Mr. E.'s agent, with some "phonograms," or sound records of conversations and musical renderings, made to the machine by Mr. E. Subsequently better instruments arrived, and a series of trials were made in the presence of members of the press and others, which have shown that the new form is capable of reproducing various kinds of sounds in a most faithful manner, notwithstanding their variety. Thus the phonograph has been sung and whistled to, conversations in French and an ode of four verses recorded, and piano, cornet, and other solos received and faithfully repeated. The instrument was shown at the last meeting of the British Association. Since then even more important improvements have been made; and in scientific circles it is considered to have amply justified itself. During '89 Mr. Edison has effected a number of highly important improvements in the instrument, and has succeeded in obtaining clearer articulation, greater simplicity in the working parts, and in reducing the cost of manufacture. It is now confidently believed that the machine is thoroughly fit for commercial and ordinary daily use, and that in the course of '90 it will be offered for sale in the European market. In America, where the demand for the machine had naturally first to be met, the rights of sale have been transferred by Mr. Edison to the North American Phonograph Company, which at the time of writing is organising sub-companies in all the States of the Union, with a total capital of about £4,000,000. A few thousand machines are already in use in the States. The system adopted by the companies is for the user to hire the machines, and \$40 a year rental is obtained. Mr. Edison, however, reserves the right of manufacture, and will probably continue to do so for at least three years, to avoid the risk of instruments of inferior material and workmanship being vended. At present only one factory (at Orange, N.J.) is in existence. This will be duplicated in the chief centres of the world as the developments of the business may necessitate. The question of the disposition of the Phonograph rights for the various countries of Europe was at the time of writing, the subject of active negotiation,—probably the result will be that a number of companies will be formed in each country, through which the instrument will reach the public. It is anticipated that a large amount of capital will be employed in the business, and that in the manufacture of the Phonograph a new and important industry will arise. The delay in placing the invention on the market is explained by Mr. Edison's repeated perfecting of details. Towards the end of '89 the Phonograph was exhibited by Dr. Wangemann to

Photography '89.—In connection with the development of the dry plate, the year has seen the use of hydroquinone adopted to a very large extent; but many persons, including Captain Abney, still maintain that for purposes other than lantern slides pyro and ammonia hold their own against all comers. Some considerable efforts have been made to introduce universally the decimal system (see METRIC SYSTEM) into weights and measures used in photography. The subject has been under discussion in the leading photographic journals, and has formed the text for several able papers before photographic societies. The question of instantaneous photography, the speed of shutters, and the rapidity of dry plates is much discussed. Many different pieces of apparatus have been made for timing shutters: perhaps the one most satisfactorily manufactured, and which most nearly arrives at the exact speed of a shutter, is Wilson's chronograph, for which apparatus, with the use of magnesium, it is claimed that $\frac{1}{3000}$ of a second can be measured. The growth of photographic processes for book illustration has been very great, and there is now hardly any illustrated weekly journal or monthly magazine that does not depend largely upon photography for the production of blocks from which the illustrations are printed. The bulk of the drawings or photographs which are thus reproduced are copied by photography with the aid of the electric light. In addition to type blocks, there are now constantly used collotype (a process of printing directly from the negative) and the Woodbury process; in this latter case the image on the gelatine film is impressed into lead by hydraulic pressure, giving a very beautiful matrix upon which is laid paper covered with a pigment. Pressure being applied by a hand-press, an exact positive in slight relief is made. The process is a permanent one: the necessity for the prints to be mounted, and for the taking of considerable care in the process that the paper upon which the print is mounted does not cockle, constitutes its only drawback for book illustrations. Another very beautiful process which is used in the reproduction of photographs is photogravure; it is much more costly, but permits of much artistic treatment, and is really a biting-in process on a copper plate; the plate when finished will permit of some five hundred to a thousand prints being taken from it. Several amateur photographers are contemplating taking up this work much in the same manner as etching was practised some years ago. (Consult Major J. Fortune Nott's article "A Plea for Photogravure," in *Photographic Quarterly*, Oct. '89.) A small body of amateurs, the "Sun Artists," have in the press a work wholly illustrated with photogravure from some of their best negatives. Efforts have been made, and with some success, to revive stereoscopic photography, and although at present the workers are not numerous, some very beautiful pictures have been produced. The annual competition held in connection with the *Amateur Photographer* has acted as an incentive to makers to manufacture stereoscopic cameras, and opticians have also set themselves to work to supply specially constructed twin lenses of first-class quality. During the past year many photographers have taken up this very beautiful section of their art. The latest

departure in the manufacture of a vehicle to supersede glass for the gelatine film is celluloid. This substance is coated with gelatine emulsion, and is of a sufficient thickness to require no further support in the dark slide. The films are very light, unbreakable, not affected by temperature, and can be packed into a much smaller space than the glass plate. The perfection of sensitive celluloid films will be reached when, as we are promised, the film can be made of such a flexibility as to permit of its being supplied in a continuous band, thus securing the exposure upon many views without the inconvenience of manipulating the dark slide. Considerable improvements have been made in *hand or detective cameras*, some cameras containing fifty plates, all of which may be exposed without opening the camera. A very excellent and cheap camera of this class, holding twelve plates, is the "Facile"; the mechanism for placing the sensitive plate in position is of the simplest kind, and as a hand camera it has few if any equals. There are now some hundred and fifty *photographic societies*, and during the winter season meetings are held, at which papers are read upon the science and art of photography, and demonstrations given of the different manipulations necessary to secure a good negative and a good print. In the summer excursions are made by the members. It has now become the practice for societies to take up photographic work of a practical character in addition to "picture making." The *Birkenhead Society* has made a photographic survey of the Hundred of Wirral; Manchester has devoted itself to photographing new and old buildings; *Liverpool* engaged in taking a series of photographs of the docks, river, and shipping; the *Birmingham Society* has set itself to make a survey of the county of Warwick; another society has been engaged in taking photographs to illustrate a lecture upon the water supply of the East of London; and all are doing some good work. A monthly journal, *The Photographic Societies' Reporter*, is now published specially to record the proceedings of all the meetings of societies, and issued its first number in January last. Early in the year Dr. P. H. Emerson, who has made himself famous by his photographs and the published reproductions of them, issued a book entitled "Naturalistic Photography." In this work he upholds the naturalistic school of painters, and entreats photographers to emulate them. His "school" has only a few followers, but they have in him a doughty champion. Quite recently a *photographic trade section* has been added to the *London Chamber of Commerce (g.v.)*. There is much work for them to do, and already the uniformity of screw threads, copyright question, weights and measures, etc., are occupying the attention of the section. In the year '89 the *Jubilee of Photography* has been commemorated. Louis Jacques M. Daquerre's process having been demonstrated before the members of the Académie des Sciences in Paris, Aug. 19th, 1839. The event was commemorated by holding the *Photographic Convention of the United Kingdom* in the Metropolis. The President (Mr. Andrew Pringle) delivered an address on the work done by photography during the past fifty years. In connection with the *Paris Exhibition (g.v.)* a *Photographic Congress* has been held, and considerable attention was devoted to the subject at the annual meeting of the *British Association*.

(*q.v.*) at Newcastle. It is now proposed to form a **Photographic Institute** which shall commemorate the jubilee of photography, and which shall rank side by side with such societies as the Astronomical, Microscopical, etc., etc. The promoters are hopeful that the Institute will be under Royal patronage, many members of the Royal family being ardent workers in photography. Great interest has been taken in the photographing of **lightning flashes**, and Mr. Marriott, the assistant secretary of the Royal Meteorological Society, has gathered together a very wonderful collection of lightning flashes from all parts of the world. Photography has its uses in connection with **astronomy** (*q.v.*), and the preparation of a **chart of the sky** is being prepared. Mr. Isaac Roberts, F.R.A.S., F.G.S., has stated that the photographic lens will show more than sixteen thousand stars upon the space of four degrees of sky. During '89 the literature of photography has increased, there being now five weekly journals and five monthly periodicals. The latest addition is the *Photographic Quarterly* (editor, Charles W. Hastings), an illustrated magazine devoted to the art and science of photography. In addition to the photographic journals published in all the principal cities of Europe and America, there is now issued monthly from Tokio a journal exclusively devoted to photography printed in Japanese characters. A very excellent paper on photography is also published at Calcutta, under the auspices of the **Photographic Society of India**. Among the more important books published during the year are "Book of the Lantern" (Hepworth); "Picture Making by Photography" (Robinson); "Dictionary of Photography" (Wall); "Photographic Chemistry" (Medola); "Naturalistic Photography" (Emerson). Consult also "Instruction in Photography" (Abney); "Modern Photography" (Burton); "Manual of Photographic Chemistry" (Hardwich); "Art and Practice of Silver Printing" (Robinson and Abney); "Modern Dry Plates" (Eder); "Dictionary of Photography" (Hall); "Science of Photography" (Chapman-Jones); "Photographic Printing" (Burton); "Book of the Lantern" (Hepworth); "Photography for All" (Harrison); "Photo-micrography" (Malley).

Pickersgill, Fredk. Richard, R.A., nephew of the late H. W. Pickersgill, R.A.; b. 1820. Studied at the Royal Academy. Mr. P. has chiefly devoted himself to classical and historical subjects. His "Combat between Hercules and Achelous" first brought him into notice. "The Death of King Lear" enhanced his reputation. His "Burial of Harold," a magnificent picture appearing in 1847, was purchased for the Houses of Parliament. Elected R.A. (1857). He has not exhibited for some few years past.

"Pictorial World, The" Founded Mar. 74. An illustrated newspaper, published weekly on Thursdays. A *Ladies' Supplement* is one of its principal features. Office, Strand, W.C.

Pietermaritzburg. Capital of Natal (*q.v.*), pop. 14,420.

Pike's Peak Railway. It was stated in Oct. '89 that arrangements were completed for the construction of a railway up Pike's Peak, Colorado. It will be a rack rail line, on an improved principle, the line being 9 miles long, with about 43 of curves. The maximum gradient is 35 per cent., and the sharpest curve 16 degrees—395 ft. radius. The summit is 14,200 ft. above sea-level, and the trains will run at about 5 miles an hour.

Pilatus Mountain Railway. On June 4th, '89, the railway from Alpnach-Stad to Esel, on the summit of Mount Pilatus, in Switzerland, was opened. The line is worked on a **cog-wheel system**, and was constructed under the personal supervision of Col. Locker, the engineer and inventor of the method. The roadbed is of solid masonry, faced with granite blocks, the track being of iron and steel, firmly fastened down. Streams, etc., are traversed by stone bridges, and there are seven tunnels of from 30 ft. to 300 ft. in length. There is a **rack-rail** between, and somewhat higher than the others, and this is made of wrought steel, having a double row of vertical cogs milled out of solid steel bars. The locomotive and car, which has thirty-two seats, form one vehicle, with two ordinary axles and four cog-wheels, which, on coming down, can be controlled by automatic brakes, the speed of the "train" being about thirty-seven miles an hour. The starting place, Alpnach-Stad, is connected by rail with Zurich, Lucerne, and Interlaken, and by steamer on the Vierwaldstätter Lake with the Rigi and St. Gothard Railways. It may be added that the incline is twice that of the Rigi—viz., 48 in 100—and that the ascent of 6000 ft. is accomplished in 1 hr. 40 in.

Pilatus Hanging Road. It was stated on June 11th, '89, that the Cantonal authorities round Mount Pilatus had under consideration a proposal emanating from **M. Leonardo Torres**, of Santander, made through the Central Government at Berne, to construct a novel kind of road to connect the Oberhaupt or highest point of Pilatus with the Klimeshorn. The object was to make the ascent of the mountain easier on the northern side, and to shorten the ascent for tourists coming from Hergiswyl. The difference in level between the two points is set down at 194 metres, and the distance between them at 465. The road apparatus would consist of six independent wire cables, on which six light pulley wheels will move, and from these wheels a small omnibus, capable of carrying eight persons, will hang. The omnibus will be drawn by a rope and an engine placed on the Oberhaupt, near the Bellevue Hotel.

Pinero, Arthur Wing, is the son of a solicitor, and was b. in London 1855. Abandoning his father's profession for the Stage, he made his *debut* in Edinburgh '74, and subsequently joined the Lyceum and the Haymarket Companies. As a playwright he has been even more successful than as an actor, several of his dramas having secured for him great popularity. His first piece, "Two can Play at that Game," was produced at the Lyceum under Miss Bateman. He is also the author of "200 a Year" ('77), "The Money Spinner" ('80), "The Squire" ('81), "Lords and Commons" and "The Rocket" ('83), "Low Water" ('84), "The Magistrate" ('85), "The Schoolmistress" and "The Hobby Horse" ('86), "Sweet Lavender" ('88), "The Prodigate" ('89). "Sweet Lavender" is perhaps the most successful of all Mr. P.'s dramas. It had a long run in '89 both in America and Australia. A sketch of "Mr. Pinero at Home" was given in the *World of April 24th*, '89.

Pinches, T. G. See ASSYRIOLOGY.

Pinak Marbea Drainage. Up to a few years since there existed in south-western Russia, on the borders of Galicia, a vast tract of marshy country, overgrown with dense forests, and quite impassable but to the doubtful

characters who found a home here. About 1870 the Imperial Government determined to reclaim the tract, and from that time to the present the work has been carried on by the troops, under a staff of military engineer officers. (For some account of the work already done, see ed. '88.) As the marsh district is one-fifth larger than Scotland, the work of reclamation will occupy some years.

Pipe Roll Society. Established 1883, for the publication of the Pipe Rolls, or Great Rolls of the Exchequer, which are preserved in the Record Office, and are almost perfect from a Henry II. to the present date. They relate to all matters connected with the revenue of the Crown, Crown lands, etc., and are thus of considerable importance for historical and genealogical research.

Piræus-Larissa Railway. Writing from Athens, under date April 19th, '89, the *Times* correspondent says:—"The Greek Government has issued a call for tenders for the construction of the Piræus-Larissa Railway, and three lines of standard railway in the Peloponnesus, the former of 345 kilometres, and the latter of 285, with branches of 45 kilometres, connected with the Piræus-Larissa, and economical lines of a total of 197 kilometres tributary to the Peloponnesian system, at a total calculated expense of about 105 millions of francs—say, in round numbers, £20,000,000." This bold stroke of M. Tricoupis was rendered necessary by the failure of the Comptoir d'Escompte, and he was supposed to depend—as to the Turkish line meeting his terminus at that end, and thus connecting the Piræus with the Great Central Europe system—upon political considerations. It was announced in London on April 30th that the Government, having been authorised by the Chamber to proceed with the Piræus-Larissa line by tenders, applications would be received at the Greek Legation.

Pisciculture. See FISH CULTURE.

Pitman, Isaac. The inventor of Pitman's well-known system of shorthand writing; b. at Trowbridge, 1813. Educated at the Borough Road College of the British and Foreign School Society, becoming afterwards master of the British School at Barton-on-Humber. He removed to Bath in '39, where he subsequently established the *Phonetic Institute*, and set up a press for printing his own handbooks of phonetic shorthand, and a series of classical works in phonetic type. Mr. P. is editor of the *Phonetic Journal*, which is devoted to the advocacy of writing and spelling reform. On the occasion of the *International Shorthand Congress*, held in London in '87, the family of Mr. P. were presented with his bust, a replica of which was last year subscribed for by his fellow-townsmen at Bath, and placed in one of the public institutions of that city. At a Congress held at the Holborn Restaurant in March '89, to celebrate the jubilee of phonography, Mr. P. was presented with a handsome gold medal struck to commemorate the event.

"Plan of Campaign." See NATIONAL LEAGUE.

Playfair Commission, 1874. See CIVIL SERVICE.

Plough Monday. The first Monday after the Epiphany was fixed upon anciently for the return to agricultural duties after the Christmas holidays. Before the Reformation the countrymen kept lights burning before their patron saints to secure a blessing upon the

work in which they were about to engage. Afterwards the day was celebrated with much hilarity in the course of which a plough decorated with ribbons was dragged about, while men dressed up, danced, sang, and played musical instruments.

Plymouth. Capital of *Montserrat (q.v.)*.
Plymouth Brethren. So termed because they first appeared at Plymouth in 1830; twenty years afterwards they only possessed thirty-two places of worship in England and Wales. Mr. Darby, their founder, taught that all should be received into communion who confessed Christ, and acknowledged the inspiration of the Holy Ghost. They have no special order of ministers. The founder separated from the body before his death; their numbers now are considerable, and they are divided into various sects. Correct statistics of their actual numbers are not available, many of them being more or less connected with other religious bodies.

Poet Laureate. is an office in the household of the sovereigns of Great Britain, the appellation having its origin in a custom of the English Universities, which continued to 1512, of presenting a laurel leaf to graduates in rhetoric and versification, the king's "laureate" being a graduated rhetorician in the service of the king. The first appointment of a poet laureate dates from the reign of Edward IV., the first patent being granted in 1630. It was formerly the duty of the poet laureate to write an ode on the birthday of the monarch, but this custom has been discontinued since the reign of George III. Amongst those who have held this office may be mentioned Dryden, Southey, Wordsworth, etc. **Lord Tennyson** is the present Poet Laureate (appointed 1850).

Poles, Legislation. See AUSTRIAN POLITICAL PARTIES.

Police Alarms. The authorities recently gave permission to have a number of new alarms set up in various parts of London, as a matter of experiment. They are similar to those used in Boston, U.S., and much like our present fire alarms. Being placed as near as possible to a constable on "point duty," he can with a key furnished him open any box, and by means of a switch communicate with the nearest police station, while the official there can tell from a paper record what and where anything has happened. In America these alarms are used when a "wagon" is wanted to convey prisoners. In like manner they could be used here when an ambulance is desired, and in similar emergencies.

Police and Constabulary. According to the latest official return (issued Nov. '89) the total number of police and constabulary in England and Wales was 37,296. This number gave one constable for every 769 of the estimated population for 1888. Since the year 1878 the increase in the total number of police and constabulary in England and Wales has been 6623, or 21½ per cent., but allowing for the augmented population the real increase during the last decade has been but trifling. The average cost per man in 1888 was £99 19s. 1d. Five years previously (1883) the average cost per man was £97 12s. 11d. The borough, etc., constables are in the proportion of 1 for every 719½ of the population of the boroughs and places having constables under local Acts; the county constabulary of 1 for every 1168½ of the population of the counties, exclusive of the boroughs, etc.; the Metropolitan Police, deducting the

number employed in Her Majesty's dockyards, parks, etc., of 1 for every 372½ of the population of the Metropolitan Police District; and the City of London Police of 1 for every 568 of the City population. The cost of the police and constabulary for each of the years ending 29th September, 1888 and 1887 respectively, was £3,727,942 and £3,711,933.—**Ireland.** The total strength of the **Irish Constabulary** is about 14,000. The force consists of two bodies: viz., **The Royal Irish Constabulary**, which numbers nearly 13,000 men, and the **Dublin Metropolitan Police**, about 1200. The proportion of police for the estimated population of Ireland is about 29 for every 10,000 of the people. The total cost of the police establishment of Ireland is about a million and a half per annum. The Irish constabulary is a semi-military body.—**Scotland.** According to the latest official return, the Scottish Constabulary numbers 4155, and its cost in 1888 was £378,510 os. 4d. See also **CITY AND METROPOLITAN POLICE**.

Police Courts. **City: Mansion House**, presided over by the Lord Mayor; Chief Clerk, C. G. Douglas. **Guildhall**, presided over by the Aldermen; Chief Clerk, H. S. Savill. **Metropolitan: Bow Street**, Covent Garden, Magistrates, Sir J. T. Ingham, Knt., J. Vaughan, and J. Bridge, Esqs.; Chief Clerk, J. Alexander. **Clerkenwell**, King's Cross Road, Magistrates, Haden Corser and J. R. W. Bros, Esqs.; Chief Clerk, H. Cavendish. **Dalston**, Stoke Newington, N., Magistrates, Haden Corser and Horace Smith, Esqs.; Chief Clerk, Harry Titterton. **Lambeth**, Lower Kennington Lane, Magistrates, W. Partridge and R. J. Biron, Q.C., Esqs.; Chief Clerk, T. C. Martin. **Great Marlborough Street**, Magistrates, R. Milnes Newton and J. L. Hannay, Esqs.; Chief Clerk, J. R. Lyell. **Marylebone**, Seymour Place, Magistrates, W. M. Cooke and A. de Rutzen, Esqs.; Chief Clerk, W. Tate. **Southwark**, Blackman Street, Magistrates, W. Slade and E. N. F. Fenwick, Esqs.; Chief Clerk, H. Nairn. **Thames**, Arbour Street East, Stepney, Magistrates, P. Lushington and T. W. Saunders, Esqs.; Chief Clerk, J. R. Sayer. **Westminster**, Rochester Row, Magistrates, L. C. T. d'Eyncourt and Jas. Sheil, Esqs.; Chief Clerk, A. H. Safford. **Worship Street**, Magistrates, H. J. Bushby and M. S. Williams, Q.C., Esqs.; Chief Clerk, E. Leigh. **West London** (Hammersmith), Vernon Street, Magistrates, A. C. Plowden and H. C. Bennett, Esqs.; Chief Clerk, F. E. Lowris. (The title of the Hammersmith police court has been changed to West London.) **Wandsworth**, Love Lane, Magistrates, H. Curtis Bennett and R. Mead, Esqs.; Chief Clerk, G. A. Bird. **Greenwich and Woolwich**, Magistrates, R. H. Bullock-Marsham and Gilbert G. Kennedy, Esqs.; Chief Clerk, H. P. Newton. **West Ham**, West Ham Lane, Stratford, Magistrates, E. Baggalay, Esq., and the Borough Justices; Chief Clerk, W. H. Fowler. The Clerkenwell and Dalston police courts are together served by three magistrates, as are also Wandsworth and West London. **Hours of Sitting: Mansion House**, 12 to 2; **Guildhall**, 10 to 4; **Greenwich**, 10 to 1.30; **Woolwich**, 2.30 to 5. **All other Courts**, 10 to 5.

Pollock. **Sir Charles Edward**, who comes of an old legal family, was born in 1823, and called to the bar at the Inner Temple in '47. For the first five years he had hardly any practice, being engaged in the production of legal literary works, which ultimately secured him considerable reputation. Q.C. (66). Appointed

a Baron of the Exchequer ('73). Baron Pollock is a Judge whose patience and courtesy are proverbial; and he is highly popular with the bar.

Pollock, Walter Herries, son of Sir W. F. Pollock, was b. 1850. Educated at Eton, and Trin. Coll., Cambridge, where he took classical honours ('71). Called to the bar at the Inner Temple ('74). After having been some time on the staff, Mr. Pollock became editor of the *Saturday Review* (83). Mr. F. issued in '89 "A Nine Men's Morrice."

Polo, as at present played, was introduced into this country in 1872 by the officers of a Lancer regiment just returned from India, where they had played against native teams, who, mounted on their small ponies, were very expert in the game. It rapidly gained in popularity amongst the upper classes, and, owing to the necessity of keeping the requisite expensive stud of ponies, it must ever remain among patrician sports. Though of comparatively recent introduction, there is very little doubt that the game was played many years earlier by the Bedouins and other wandering tribes of the desert and Asia Minor, and closely associates itself with the ancient Eastern game of "Chougham," an equestrian pastime which in all probability led to the institution of the English game of **mall**, the street now known as Pall Mall being the favourite resort of the players in the days of its popularity.

Polytechnic, Regent St. See HOGG, QUINTIN. **Pondicherry.** A town and port of S.E. India, 86 miles south of Madras. It is a French possession. Together with other stations, Mahe, Carical, Yanam, Chandernagore, France holds 196 sq. m. in India, pop. 275,261. See COLONIES OF EUROPEAN POWERS.

Pondoland. A district of the **Transkeian Territories** (q.v.) lying along the St. John river. Part of it remained independent until 1886-7, when, in consequence of Pondo raids upon the Xesibes, a tribe under British protection, pressure was put upon the Pondo chief Umquikela, and an arrangement came to. He conceded rights and various claims over portions of territory to the Cape Government, receiving in return an annual pension. His authority was limited to government of his tribe within a small district, where he undertook to keep order and maintain peace, and he is practically under protection of the Cape authorities.

Pontiana. Second town and chief Dutch settlement in **Borneo** (q.v.).

Poor in Towns. See SESSION, sect. 45.

Poor-Law. The English poor-law is contained in many statutes, the earliest being that of the 43rd year of Elizabeth, and in innumerable reported cases. But the modern system of poor-relief was established by the **Poor-Law Amendment Act of 1834**. Under this Act the parishes which had formerly been areas for poor-law purposes were grouped into unions, a market town being generally taken for the centre. There are in England and Wales 647 unions, comprising 14,887 Poor Law parishes. Within each union was established a board of guardians, consisting firstly of all county justices residing within the union, who have seats *ex officio*; and secondly of guardians elected by the several parishes of the union. The parishes differ much in size, and small parishes may be grouped for representation, but every parish of 300 inhabitants must have

at least one representative. The electors in each parish are the owners and ratepayers. In either character an elector may have any number of plural votes not exceeding six, one vote for every £50 rating; so that the maximum number of votes which can be given by any one person is twelve. The qualification of a guardian is fixed in each case by the Local Government Board, but must not be less than £40 rating. The elections take place every April, the term of office being annual. A board of guardians has usually a clerk, a treasurer, registrars of births and deaths, medical, vaccination, workhouse, and relieving officers. They may employ paid valuers and collectors, and form committees of their own number for the relief of the poor in the different parts of the union. All boards of guardians are largely controlled by the Local Government Board (*q.v.*), which by its general orders regulates the mode of their election, their procedure, their finance, and their administrative methods, whilst by its special orders it compels observance of the law in particular cases. The expenses of poor-relief are defrayed out of the poor-rate levied in each union upon a special valuation. A valuation list is prepared by the overseers of each parish, and after publication is sent to the assessment committee of the guardians, who must hear objections. After altering the list as they think proper, the committee approve and sign it. From the decision of the committee there is an appeal to quarter sessions. Relief is either indoor or outdoor relief. The former is the relief given in the workhouse, while the latter is the relief given in money, medicine, etc., to people living in their own homes. The number of persons receiving relief has diminished of late years, partly because of the greater strictness in granting outdoor relief. The total number of persons receiving relief in England and Wales on July 31st, '89, was 682,797, a decrease of 16,564 compared with the number for the corresponding date of '88. The indoor paupers (excluding pauper lunatics) numbered 169,466, and the outdoor 512,731. Beside the administration of poor-relief other important functions under the Public Health Acts, the Elementary Education Acts, and many other Acts, have been assigned to the guardians of the poor. During the year ended the 25th of March '88 (to which date the latest returns are made up), their receipts, excluding loans, rates levied to meet the precepts of other local authorities, and contributions to the other Poor Law authorities, to whom reference is made below, amounted to £8,355,122. Their expenditure, so far as it was not defrayed out of loans, or in payments to other local authorities, amounted to £8,440,821. The loans raised by the guardians during the year amounted to £335,973. At the end of the year their outstanding debt was £6,914,432. The other Poor-Law authorities, who exercise powers in relation to the relief of the poor, are (1) the Metropolitan Asylums Board, who are the Managers of the Metropolitan Asylum District, constituted under the Metropolitan Poor Act (1867) for the reception and relief of fever and small-pox patients and the insane poor chargeable to the unions and parishes in the district; (2) the Managers of two Metropolitan Sialk Asylum Districts, constituted under the same Act; and (3) the Managers of School Districts formed under the Poor Law Amendment Act (1844) for the maintenance of district schools.

Poor Law Act, '89. See SESSION, sect. 102.

Poor Rates in the Metropolis. See SESSION, sect. 103.

Pope, The. His Holiness Leo XIII., the 258th Roman Pontiff, son of Count Ludovico Pecci, was b. at Carpineto, 1820. Educated at the Jesuit Coll. of Viterbo (1824). Entered the School of Collegio Romano (24), where he greatly distinguished himself, and proceeded to the College of Noble Ecclesiastics. Having become a Doctor of Laws, he was made by Pope Gregory XVI. Referendary of the Segnatura (37). Took holy orders, and was consecrated priest (37) by Cardinal Carlo Odescalchi. The title of "Prothonotary Apostolic" was bestowed on him by Pope Gregory, who also appointed him Apostolic delegate in succession at Benevento, Perugia, and Spoleto. Was sent as nuncio to Belgium (43), and created shortly after Archbishop of Damietta; nominated Bishop of Perugia (46), created cardinal (77). Elected Pope Feb. 20th, '78, and took the title of Leo XIII. Among the events of his Holiness' reign may be mentioned the restoration of the hierarchy in Scotland, the contest with Germany, the Kulturkampf, and the now famous Falk Laws, the *rapprochement* with Prince Bismarck, on whom the Pope conferred the decoration of the Order of Christ (Dec. 31st, '85),—this *entente cordiale* being, however, to some extent interrupted by the amendment to the Ecclesiastical Bill by Dr. Kopp (March '86). On the occasion of the dispute between Germany and Spain over the Caroline Islands, the Pope acted as arbiter, to the satisfaction of both parties. Towards the close of '87 and the beginning of '88 Rome was the centre of great rejoicings in connection with the Papal Jubilee, intended to commemorate the 50th year of his Holiness' assumption of holy orders. Representatives from Catholic and Protestant states in Europe, from America, from the Indies, and all parts of the world, came to Rome to offer their congratulations. The Duke of Norfolk was sent by the Queen of England as a Special Envoy, and presented, besides valuable gifts, an Address of Congratulation from Her Majesty. In May ('88) a decree was issued by his Holiness, denouncing in general terms the methods adopted by some of the Irish leaders in the Plan of Campaign. On 13th Oct., '88, he received a visit from the Emperor William II. of Germany. He has recently interested himself greatly in the subject of African slavery, and through Cardinal Lavigerie has opened up negotiations with various Governments to secure its suppression. The relations between the Holy See and Italy have for some time past been strained; and the question of the removal of His Holiness from the Eternal City is occupying the attention of the Catholic world. It is stated that the Pope's income is now over half a million a year. His Holiness, on the conclusion of the Dock Strikes in '88, expressed his approbation of the services of Cardinal Manning (*q.v.*) in bringing about a satisfactory conclusion. On the recent occasion of the unveiling of the statue of Giordano Bruno, at Rome, His Holiness expressed his displeasure in an allocution, which was read in all the Roman Catholic churches; and it was stated that he had serious thoughts of quitting the Vatican. His Holiness received during the summer several thousands of French peasants, on the occasion of their paying a visit to Rome.

Population Returns. The following is the latest official return (issued '89) of the population of England and Wales:—

| Divisions and Registration Counties. | Population. | | Marriages. | | Births. | | Deaths. | |
|--------------------------------------|--------------------------------|----------------------------------|------------|--|---------|----------|---------|----------|
| | Enumerated on 4th April, 1881. | Estimated to the middle of 1888. | | | Males. | Females. | Males. | Females. |
| ENGLAND | 25,974,439 | 28,688,904 | 203,456 | | 446,983 | 433,305 | 233,216 | 247,574 |
| I. London | 3,815,704 | 4,282,921 | 34,617 | | 66,568 | 64,450 | 40,253 | 38,454 |
| II. South-Eastern | 2,487,542 | 2,742,323 | 21,463 | | 30,778 | 38,220 | 21,953 | 20,553 |
| III. South-Midland | 1,596,259 | 1,773,137 | 10,550 | | 27,038 | 26,431 | 14,683 | 14,031 |
| IV. Eastern | 1,343,524 | 1,415,050 | 9,175 | | 21,060 | 23,598 | 12,856 | 12,257 |
| V. South-Western | 1,859,511 | 1,936,201 | 12,004 | | 27,198 | 28,000 | 15,343 | 16,410 |
| VI. West-Midland | 3,099,319 | 3,266,535 | 22,883 | | 59,703 | 48,955 | 29,595 | 27,555 |
| VII. North-Midland | 1,637,865 | 1,824,216 | 11,931 | | 28,168 | 27,576 | 13,749 | 15,008 |
| VIII. North-Western | 4,108,184 | 4,704,018 | 34,836 | | 75,127 | 74,604 | 40,932 | 43,427 |
| IX. York | 2,894,759 | 3,257,797 | 23,955 | | 45,666 | 47,685 | 30,730 | 27,995 |
| X. Northern | 1,624,213 | 1,804,425 | 13,121 | | 31,372 | 30,229 | 16,435 | 15,104 |
| XI. Wales | 1,577,559 | 1,696,481 | 12,251 | | 27,522 | 26,437 | 15,339 | 14,602 |

The births and deaths registered in England and Wales in 1888—as shown in the accompanying table—numbered respectively 879,483 and 516,590.—The total population of Ireland, according to the census for 1881, was 5,174,836; this number had declined in the middle of 1888 to 4,777,334. The number of marriages registered in Ireland in 1888 was 20,060, and that of births 109,567. The birth-rate was 22·9 per 1000 of the population, the lowest average for the last ten years. The deaths registered in Ireland in 1888 were 85,892, the rate of 18 per 1000.—The total population of Scotland, according to the census of 1881, was 3,735,573; this number, according to the last report of the Registrar-General for Scotland, had increased in 1886 to 3,949,393. The marriages registered in Scotland in 1886 were 24,515, or at the rate of 62·07 per 1000 of the population, which is lower than the average rate for the last ten years. The births registered were 127,890, being at the rate of 3·24 per cent. of the population; and the deaths 73,640. At the recent Millers Congress at Paris, some very interesting statistics were given by Professor Grandeaun as to the population in proportion to the land in the different parts of the world. The details are given in hectares (2·731 acres), and are as follows:—

| | Area in hectares. | Population. | Pop. per 100 hect. |
|-----------------------|-----------------------|----------------------|--------------------|
| Europe . . . | 990,000,000 | 328,000,000 | 33·1 |
| Asia . . . | 4,310,000,000 | 758,000,000 | 77·6 |
| Africa . . . | 3,000,000,000 | 206,000,000 | 6·9 |
| Australasia . . . | 1,100,000,000 | 37,000,000 | 3·4 |
| N. America . . . | 2,420,000,000 | 72,000,000 | 3·0 |
| S. America . . . | 1,780,000,000 | 28,000,000 | 1·6 |
| To. for Globe. | 13,600,000,000 | 1,422,000,000 | 10·48 |

Putting these totals into English, they show that the surface of the earth consists of 33,600,000,000 acres, and that on these there is a population of 1,429,000,000 persons. This is about 23½ acres to each person.

Popo, Great and Little. See TOGOLAND.

Port-au-Prince. Capital of the republic of Hayti (q.v.), pop. 40,000.

Port Darwin. On the northern coast of Australia. The chief harbour of the Northern Territory (q.v.) of South Australia, and said to be only second in magnitude and importance to Port Jackson. Here the overland telegraph joins the submarine line to Java.

Port Hamilton. This station of the British navy consists of three small islands situated about forty miles south of Corea (q.v.), commanding the straits of that name which lead from the China Seas to the Japanese Sea. The largest island, *Soda*, is 3½ miles long by a mile broad, and towers to a height of 650 feet; *Sunhoda*, the next in size, has only half the area, the highest point being 780 feet; the third, *Observatory Island*, is still smaller. The three inclose a harbour two miles long by a mile broad, and from nine to twelve fathoms in depth. The population in all is about 2,000, who follow agricultural pursuits. Considering the fact that Corea, with its population of over 10,500,000, is closed to foreign commerce, except at the three ports of Fu-san, Gen-san, and Nin-sen, and that the group of islands in question both commands the straits and is

available as a coaling station, the possession of Port Hamilton is considered to be of much importance. During the dispute with Russia in 1885 an ironclad was sent to the Port by England, which caused certain explanations; and it was suggested that the Government of the Czar desired if possible to annex the group, in view of Russian interests on the Siberian side of the empire. The dispute has since been settled. (See ed. '87, for course of dispute '86.)

Port Lazareff. A fine natural harbour, situated in Broughton Bay, on the east side of the neck which joins the peninsula of Corea to the mainland of Asia. It is in lat. $39^{\circ} 19' N.$, and within the territory of Corea. The harbour has an area of eight square miles, a depth of seven to ten fathoms, and the entrance is two miles wide. Coal is said to exist in the neighbourhood. Port Lazareff is distant 480 miles from Port Hamilton (*q.v.*), 1,200 from Yokohama, 390 from the Russian port of Vladivostock, and 1,580 from Nicolaieff at the Amur mouth. It is free from ice in winter, which the last two ports are not.

Port Louis. Capital of Mauritius (*q.v.*), pop. 26,000.

Port of Spain. Capital and chief port of Trinidad (*q.v.*), pop. 32,000.

Porto Rico. See PUERTO RICO.

Port Royal. Chief port in Jamaica (*q.v.*). An important naval station.

Port Said. A town and seaport of Egypt, on the Suez Canal, to which it owes its existence. Named after Said Pasha, patron of the enterprise. Pop. (in '82) 16,560. Essentially a coaling station for steamers, and dependent on the canal trade.

Port Victoria. Capital of the Seychelles Islands (*q.v.*).

Portugal. Kingdom in S.W. Europe, under Louis I. of the House of Braganza. Area (including the Azores and Madeira, which are regarded as an integral part of the kingdom), 34,038 sq. m.; pop., 4,708,178. Constitution of 1826 (amended in 1852) recognises four powers—the legislative, executive, judicial, and moderating—the last being vested in a hereditary king. Two legislative chambers, the Peers and the Deputies, collectively called the Cortes. The peers, unlimited in number, are nominated by the Crown for life. The deputies are directly elected for four years by all registered citizens, twenty-one years of age, who can read and write, and possess an annual income of £22. Madeira and the Azores are included politically in the mother country. The Cortes meet at specified periods, without intervention of the king, who has no veto on a law twice passed. State religion is Roman Catholic; all others tolerated. **Estimated revenue**, '88-9, 38,273,740 m.; **expenditure**, 40,193,877 m.; **debt**, 533,316,612 m.; **imports**, '87, 41,394,871 m.; **exports**, '88, 216,513 m. (milrei = 48. sd.). **Wine**, the staple article exported to the United Kingdom, reached in '87 the total of 3,452,998 gallons, valued at £1,063,172.—'88.

The question of the Colonial policy of the Government and its subordination to a wish for an understanding with Germany without securing for Portugal corresponding advantages, formed the basis of an attack by Senhor Vilhena, former Minister of Marine, upon the Government, in the reply from the Chamber of Deputies to the Speech from the Throne (Jan.). Stormy and excited debates took place (Feb. 4th), which resulted in a royal decree

being issued, proroguing Parliament till April 5th. In March the Government decided to examine the contracts of the *Mozambique Company*, and to consult the law officers of the Crown in reference to them, in order that they might be cancelled if found to be contrary to the laws of the kingdom. The *Official Gazette* in April published the terms of a new contract entered into with the *Winegrowers' Society of Oporto* in reference to the foreign wine trade. The authorities will give certificates of origin, and will control the trade-mark. The Government grants a subvention of £3,350 per annum for fifteen years. The company will establish depôts in Germany, including one in Berlin, where it pledges itself to maintain a stock of not less than 200 casks. In May difficulties arose with respect to the *Delagoa Bay Railway (q.v.)*, the incident continuing to exercise public attention late into the autumn. The death of the King occurred on Oct. 16th, and the Crown Prince succeeded to the throne with the title of "Don Carlos I. of Portugal and the Algarves." The obsequies (26th) were attended by many distinguished members of the royal families of Europe. The Turkhan Bey Mission was received at Lisbon by the new King. Two Portuguese expeditions were engaged in the exploration of the Zambesi district and Mozambique. On Nov. 25th Mr. Petre handed to the Minister for Foreign Affairs Lord Salisbury's despatch protesting against the claims of Portugal in Mashonaland. (For army and navy see FOREIGN ARMIES AND NAVIES; for history, '70-89, see our previous editions; for colonies see COLONIES OF EUROPEAN POWERS).

Portugal, Carlos I. King of. b. Sept. 28th 1863, and bore the title of Duke of Braganza. Married ('86) a daughter of the Comte de Paris. Succeeded to the throne Oct. '89.

Positivism. The philosophical and religious system of Auguste Comte (1798-1857). The chief principles of the former side of the system are: (1) The classification of the sciences in hierarchical order, proceeding from the simpler to the more complex, as follows: mathematics, astronomy, physics, chemistry, biology, sociology, morals; and (2) The doctrine of the "three steps" through which the human mind has to pass in the investigation of phenomena—viz., the theological or personifying, the metaphysical or abstract, and the positive or scientific. The religious side of Positivism consists in the cultus of Humanity considered as a corporate being in its past, present, and future. The "positive philosophy" is its theoretical or doctrinal basis, corresponding to the theology of the supernatural religions; but besides this, it consists in a worship requiring for its full development an organised priesthood, temples, etc. Under the "life" or *régime* of positive religion Comte would include the political and social side of his system. The former involves the establishment of an international republic, consisting of the five great nations of Western Europe, which is ultimately destined to lead the whole world; the latter the reorganisation of society on the basis of a double direction—that of the temporal or material authority, and that of the spiritual or educating body. Positivism as a religion has achieved some success since Comte's death. In Paris it possesses a periodical, the *Revue Occidentale*, and Comte's apartments are kept as a place of meeting. Other groups exist in other cities of France, of

the Continent, of America, both North and South, and in five or six cities in England. In London the principal places of meeting are Newton Hall, Fetter Lane, Chapel Street, W.C., and Fonthill Road, North London, N.

Post Cards. The Post Office authorities have intimated that the erasure of the whole or a portion of the original address on a postcard, and the substitution of a fresh address, would render the card likely to be challenged, and such erasures should be avoided. Private firms have for some time been able to produce postcards at cheaper rates than the Post Office itself; but, from an answer given in the House of Commons by the Postmaster-General, it appears that these do not receive the Royal coat-of-arms, although they are recognised as legitimate means of communication.

Postal Congresses. See POSTAL UNION.

Postal Orders. See POST OFFICE (sub-section).

Post Office. The late Sir R. Hill introduced penny postage in 1840. Since that date rates have been low and the progress of the service has been extraordinary. For the year ending March 31st, '89, 1,558,100,000 letters were delivered in the United Kingdom, an increase of 3 per cent. on the number in the preceding year, and an average of 41·5 to each person. Grouping letters, post cards, book packages, circulars and newspapers together, 2,362,090,000 deliveries were made, being an average of 62·77 to each person. Of the total number about 85·2 per cent. were delivered in England and Wales, 30 per cent. being delivered in the London postal district alone, 87 per cent. in Scotland, and 67 per cent. in Ireland. The number of registered letters was 11,001,085, an increase of 1·7 per cent. An offer made by Messrs. De la Rue to terminate before its legal close the contract entered into by them for the supply of postcards, stamps, wrappers, etc., for ten years from 1880, was accepted; and a new contract negotiated from Jan. 1st, '89, the effect of which is to diminish the payments to Messrs. De la Rue by some £26,000 a year, and this has rendered possible a reduction (1st July, '89) in the price of postcards, the public being able now to obtain a packet of ten stout cards for 6d., instead of 8d. for a packet of twelve; and 5d. for a packet of ten thin cards, instead of 7d. for a packet of twelve. It is hoped by the Postmaster-General that the use of the thick cards may be discontinued by the public. The above reduction in price may lead to a further increase of the volume of halfpenny matter, which, in the opinion of the Select Committee on Revenue Estimates, is carried on at a loss. New Post Offices were opened in 399 places, and about 1,044 letter boxes added, making the total number of receptacles 37,783, of which 17,829 are Post Offices; and 900 additional licenses were issued for the sale of stamps. The expenditure on the purchase of sites for post-office and telegraph purposes during the year ending March '89, was £96,875, of which about £38,000 was expended in London and about £59,000 on sites in the provinces. In addition to this the Office of Works spent about £150,000 in the erection of new buildings and the maintenance and enlargement of existing offices. Considerable progress has been made with the construction of the new building in St. Martin's-le-Grand, which it is expected will be completed in '93 or '94. It is interesting to note that the Post-

master-General holds in London alone some 30 freehold properties, roughly estimated at a value of 2½ millions sterling, the money for which has been voted by the House of Commons, and charged to current expenditure in various years. The permanent staff of the Post Office is about 58,396, including 4,054 females. Besides these there are about 50,000 persons, of whom 16,000 are females, employed by local postmasters. The list of retired officers in receipt of pensions shows a total of 3,367, their pensions amounting to £177,498 a year. Concerning new mails communication with the West of England and South Wales has been accelerated by connections with the midnight mail from London *via* Birmingham (L. & N.W. Railway), the districts affected obtaining letters by midnight mail by the second deliveries. The Severn Tunnel route (*q.v.*) has also effected a saving of an hour in the South Wales mails by the G.W. Railway. Earlier delivery has also been secured to places on the Ipswich line by the attachment of a sorting carriage to the 5.10 a.m. train from London; and from those places to London by the night mails. A direct service by ordinary trains from the north of Scotland, leaving Aberdeen at 4.30 p.m. daily, was commenced in Feb. '89, and letters are delivered in London by the second daily delivery, to the great advantage of the public. The daily despatches of mails from London to the provinces have been increased by 122, and the number from the provinces by 86. Improvement has also been made in the Sunday night collection in 39 of the London sub-districts (*vide* "The Post Office Handbook," 1d.). At considerable extra cost the Post Office is extending the concession of entire relief from duty on alternate Sundays to postmen throughout the United Kingdom. Regarding foreign and colonial mails, postage on letters for the Cape of Good Hope, Natal, etc., wholly by sea, has been reduced from 6d. to 4d. the ½ oz, the mail leaving London every Friday morning; and by making use of the "South Express" service, from Paris to Lisbon, letters posted in time to be included in the Continental mail despatched at 8.25 a.m. on Saturdays can at the previous rate of postage, 6d. ½ oz., be sent on to catch the mail at Lisbon, the result being that a letter may now be conveyed from London to the Cape of Good Hope in twenty instead of twenty-three days. A weekly all-sea service to the Australasian colonies, at a cheap rate of 4d. per ½ oz., began on Jan. 1st, '89, and to the end of March about 25,000 letters had been sent by that route. Postcards costing 2d. may now be sent to Australasia and Fiji by the all-sea route, and cards costing 3d. by the quicker route, *via* France and Italy. Daily communication is now established with Constantinople, *via* Servia. The concessions held by the Submarine Telegraph Co. expired in Jan. '89, but were extended to March. In compliance with representations in Parliament from commercial and other bodies, that a direct system of international telegraphic communication, without the intervention of a private company, should be established between England and the neighbouring Continental states, the Post Office did not renew the concessions, but entered into negotiations with the German, French, Dutch, and Belgian Governments for the direct transmission of telegrams between the telegraph department of this country and the telegraph administrations of the other countries

inland telegrams, or an increase of 8·5 per cent. on the previous year. The London messages were nearly 5,000,000, the foreign 4,828,228, and the press 4,760,891. There is an annual deficit on the working of the telegraph system. For 1888-9 it was £239,142, as against £332,501 the preceding year. The new telegraph offices opened at post offices during the year numbered 181, and 40 new offices were opened at railway stations. A very large staff of telegraphists is employed—over 2,000 at the Central Office in St. Martin's-le-Grand alone. The instruments chiefly used are the Morse Sounder, Wheatstone automatic, and the Hughes' type printer. The chief regulations for foreign telegrams are founded upon the International Telegraph Convention, according to which regulations foreign telegrams are divided into three classes—viz., ordinary, code, and cypher. European code telegrams may be sent in any of the languages in use in Europe; or Latin may be employed; but no such telegram may contain words of more than one language. Cypher telegrams must be composed exclusively of figures, or of letters. The length allowed for a single word is, in European telegrams fifteen letters, and in extra-European telegrams ten letters. Any person may register an abbreviated or arbitrary address, a privilege taken advantage of by nearly every large user of the wires, on payment of a fee of a guinea a year. The process of placing the wires underground wherever possible has been considerably extended during the year ending March last. Of the lines of wire entering the Central Station in London, not one is open.—**TELEGRAPH MONEY ORDERS.** On Sept. 2nd, '89, the Postmaster-General experimentally inaugurated a system of Inland Telegraph Money Orders, thus offering to the public the advantage of insuring the payment of money at post offices by telegraph. No single Telegraph Money Order can be issued for a greater amount than £10. The commission is as follows:—For sums not exceeding £1, 4d.; above £1 and not exceeding £2, 6d.; above £2 and not exceeding £4, 8d.; above £4 and not exceeding £7, 10d.; above £7 and not exceeding £10, 1s. In addition to the commission, a charge is made at the ordinary inland rate for the official telegram authorising payment at the office of payment and for the repetition thereof; the minimum being 9d. The telegraph charges only cover the cost of transmitting the official telegram of advice to the postmaster of the office of payment and its repetition. Any telegraphic communication which the remitter may wish to despatch to the payee must be paid for at the ordinary inland rate, the minimum being 6d. The order issued to the remitter should be retained as a receipt. Any person expecting a remittance by telegraph must attend at the office of payment, where, on his producing satisfactory evidence that he is the person entitled to receive the money, and on his stating the name of the remitter and signing a receipt, payment of the amount will be made. The Money Order Offices at which Telegraph Money Orders are issued are the principal offices in the following cities and towns: England—London, Birmingham, Brighton, Bristol, Cardiff, Leeds, Liverpool, Manchester, Margate, Newcastle-on-Tyne, Portsmouth, Scarborough; Scotland—Dundee, Edinburgh, Glasgow; Ireland—Belfast, Cork, Dublin. These regulations are to remain in force for one year

only. The machinery is simple. A person desiring to pay money by telegraph must apply for a money order in the usual way, writing across the form "by telegraph." The money order form prepared by the Post Office official will be crossed "remitted by telegraph," and handed to the remitter by way of receipt. There will then be telegraphed to the paying office an order for the payment of the sum desired to the person named in the order; and upon the recipient, who will have been advised by the sender of the despatch of the money, presenting himself for payment, the paying postmaster will hand the sum over and obtain a receipt for it. It will be seen that the system might lead to difficulty if extended to village post offices, where ready cash is scarce; and for the present it is confined to some of the chief centres of correspondence. At the time of writing the public have not sufficiently taken advantage of the new facilities to enable the Post Office authorities to judge whether the experiment will lead to the establishment of the system as a permanent branch of Post Office work. Should it prove a success—as it has already done on the Continent—it is capable of wide extension beyond the cities and towns named above.—**POSTAL UNION.** The Established July 1st, 1875, the result of the Postal Congress held at Berne in 1874, at which a treaty was signed by all European States except France, and by the United States of America, and by Egypt. A Postal Congress, to discuss points and to consider propositions affecting the Union, assembles once every five years, at which delegates from all the states concerned meet. The last Congress was held at Lisbon in the early part of 1885. The countries comprised within the General Postal Union are divided into two classes—namely, A and B—and will be found printed in the "Post Office Guide," as also in the new "Penny Post Office Handbook." Under class A the rates are—for letters 2½d. per half-ounce, for post-cards 1d., for newspapers or packets of printed paper ½d. per 2 oz., and for patterns 1d. per 4 oz. Under class B the rates for letters are—for countries not printed in *italics*, and for Hong Kong, Japan, and New Caledonia, *via* San Francisco, 4d. per half-ounce; for post-cards 1½d., newspapers 1d. per 4 oz.; for printed matter 1d. per 2 oz. Commercial papers same as for printed matter, except that the lowest charge is for each packet 2½d. in all cases; patterns are the same as printed matter, 1d. per 2 oz. For countries under class B, printed in *italics*, the rates are—Letters, 5d. per ½ oz.; post-cards, 2d.; newspapers, 1½d. per 4 oz.; printed papers, 1½d. per 2 oz. The fee for registration under both classes is 2d. No letter for a colony or foreign country may exceed 2 feet in length or 1 foot in width or depth.

Postal Union. The. See Post Office.

Postmaster General is the parliamentary head of the Post Office (*q.v.*).
Poynter, Edward John, R.A., b. 1836, studied art both in England and on the Continent. Elected A.R.A. (1869). Appointed Slade Professor of Art at University College, London (1871), and subsequently became Director of Art, and Principal of the National Art Training School at South Kensington. His successful pictures include portraits of Lieut.-Gen. Sir Gerald Graham and the Marquis of Ripon; the latter for the Government House at Calcutta. Other of his well-

known paintings are "Israel in Egypt," "Rhodope," "The Festival," "The Golden Age," "Atalanta's Race," "The Fortune Teller," "Zenobia," and "Diadumene." He published in '79 "Ten Lectures on Art." Elected R.A. '76. Exhibited "On the Terrace," and a "Corner in the Villa," at the Royal Academy '89.

Preceptors, College of. Established 1846, incorporated by Royal Charter '49, "for the purpose of promoting sound learning and of advancing the interests of education, especially among the middle classes, by affording facilities to the teacher for acquiring a knowledge of his profession, and by providing for the periodical session of a competent **Board of Examiners** to ascertain and give certificates of the acquirements and fitness for their office of persons engaged or desiring to be engaged in the education of youth." With this view the charter empowers the College to hold examinations of teachers and schools, and to grant diplomas and certificates to such persons as pass these examinations satisfactorily. To effect these objects, two plans of examination have been established:—(1) That of teachers, to ascertain their qualifications and fitness to take part in the work of instruction; (2) that of pupils, to test their progress, and to afford at once to the teacher and to the public a satisfactory criterion of the value of the instruction they receive. The diplomas granted by the College to teachers are of three grades—Associate, Licentiate, and Fellow; and a distinctive feature of the examinations is, that in all cases the theory and practice of education is an obligatory subject for each grade. In '88 the number of candidates examined for certificates exceeded 15,000. About 4,500 schools, both public and private, are now brought under the influence of the College. Visiting examiners are also appointed by the College for the inspection and examination of public and private schools. A total number of 20,000 persons are at present examined annually by the College. In '73 the Council of the College instituted a Professorship (the first established in this country) of the Science and Art of Education, and a training course of lectures and lessons for teachers is now in full operation. The new buildings were opened by H.R.H. the Prince of Wales, March 30th, '87. The C. of P. has recently acceded to a request from the London Chamber of Commerce to conduct examinations on behalf of the Associated Chambers of Commerce according to a scheme of education for those destined for mercantile life. **Offices:** Bloomsbury Sq. **Organ:** *Educational Times.*

Presbyterianism is church government by presbyters, and by presbyters only. The session of a Presbyterian Church consists of the ordained ruling elders, and the pastor or teaching elder of the church, who always presides; and in case of a church being vacant the pastor of some other church within the bounds of the presbytery is chosen moderator to preside. The presbytery consists of the pastors of churches, and a ruling elder from each congregation, within prescribed boundaries. The Synod consists of presbyteries within a larger area; and the General Assembly, where the size of the church renders one necessary, takes in the whole church, and consists either of the pastors of all the churches, together with a ruling elder from each congregation (called a lay elder); or representatives chosen from amongst both pastors and ruling elders. The standards of

the Presbyterian body are the Westminster Confession of Faith, with the Catechisms, Larger and Shorter. But the United Presbyterian body in Scotland, and some others, receive these with an explanation, especially in respect to Chapter XXIII., of the "Confession." The United Presbyterian Church has adopted a Declaratory Statement in regard to its relation to the "Confession." The Presbyterian Church of England has a similar document under consideration. The latter body has likewise drafted a briefer declaration, entitled "**Articles of the Faith**," which is at present under consideration by the Presbyteries of the Church. It embraces twenty-three "articles" on subjects supposed to be of fundamental importance. That section called the **Reformed Presbyterian Church** recognises the (morally) binding obligations of the National Covenant of Scotland, and also of the Solemn League and Covenant. With these exceptions the several sections of the Presbyterian Church stand, in respect to the doctrine, worship, discipline, and government of the Church, on a common platform. The **General Presbyterian Alliance**, established in 1875, has brought the unity of Presbyterians in all parts of the world in essentials clearly to light. The **Fourth General Council** of this Alliance met in London in '88. It comprised 300 delegates, representing more than 50 separate Churches throughout the world, with an aggregate membership of over seven million communicants. Presbyterianism is represented by a steadily increasing body in England—the result of the union in 1876 of English congregations of the United Presbyterian Synod with those of the English Presbyterian Church, under the title of the Presbyterian Church of England. There are also a small number of churches connected with the Established Church of Scotland in England. The Calvinistic Methodists in Wales, who are substantially Presbyterian in their government, have in recent years adopted the name, and now stand in close relationship with the Presbyterian Church of England. In Scotland, in addition to the Establishment, there are the **Free Church of Scotland**, the **United Presbyterian Church**, and some smaller bodies. Certain evangelical Christian Churches who do not hold the doctrines of Presbyterianism conduct their ecclesiastical affairs presbyterially. Presbyterianism is represented in Ireland chiefly in the north by several Presbyterian Churches, the most important being the "Presbyterian Church in Ireland." In the United States of America, in Canada, Australia, New Zealand, and wherever Scotch and (Ulster) Irish people settle, Presbyterianism has also taken firm root. The body, as a whole, is growing in numbers. The tone of its pulpits is evangelical. For a very long period a Liturgy was unknown amongst Presbyterians; and until lately instrumental music was not allowed in Presbyterian churches. At present there is a slight movement in favour of a Liturgy; and organs have already found their way into most Presbyterian churches. —The Presbyterian Church of England consists of 287 fully organised congregations and 10 preaching stations, providing accommodation for 150,694 persons, besides a large number of fully equipped mission stations in connection with town congregations, with an average attendance of about 12,000 persons. The number of ministers is 285 (some of the congregations being vacant), with 18 ordained

and 9 medical missionaries in the foreign field, besides 2 missionary teachers and 16 lady missionaries. There are also 22 licentiates, and 27 theological students, preparing for the ministry. The property of the Church is estimated at £1,495,000, exclusive of sundry investments for the endowment of the College and scholarships, and for the Sustentation Fund and other schemes of the Church, of the College itself, and of buildings for mission work abroad. Of the existing places of worship 155 have been erected since 1851, their value being estimated at £751,999; 28 of the existing congregations trace back their existence to the seventeenth century, 42 to the eighteenth century, while the remaining 216 have been established within the present century. The revival of Presbyterianism in England in the earlier portion of the present century was due to the influence on English Presbyterianism, on the one hand of the Evangelical movement in the Established Church of Scotland which led up to the disruption, and on the other of the consolidation of the dissenting Presbyterianism of Scotland which led up to the formation of the United Presbyterian Synod in 1846. The English section of that Synod united with the older Presbyterian body in England in 1876, so forming the Presbyterian Church of England. The total income of the Church in 1888 was £40,375—£36,750 of the amount being for missionary and other general objects. The backbone of the Church finance is the Sustentation Fund, which since 1878 has secured for the body of the ministers, excluding a limited number under special arrangements, a minimum income of £200. Under this scheme 94 congregations were aid-receiving in 1888 to the amount of £5,252 38. 10d., as against 103 in 1878 to the amount of £6,441 78. 6d., the average amount of aid required being at date £56 per congregation, as against £62 10s. in 1878. The Church is therefore steadily consolidating.—The centenary of the establishment of the Presbyterian Assembly in America was celebrated in '88. The Presbyterian Church in England sustained a severe loss (Nov. '89) in the sad death of Professor Elmslie.—Moderator for '90, Rev. J. Thomson, M.A. (q.v.). General Sec., Rev. J. T. McGaw, M.A., East India Avenue, Leadenhall Street, E.C. Financial Sec., Mr. John Leggat.

Prevention of Cruelty to and Protection of Children Act, '89. See SESSION, sect. 72.

Price of Gold. See MONEY MARKET.

Prime Minister is he who at the summons of the sovereign has succeeded in forming an administration, of which he is the head, and which may be named after him. It may be assumed that those who accept office under him agree with his policy in the main. Although each member of the Cabinet administers his own department independently of his colleagues, all important departmental matters are submitted to him, the most important being brought before the whole Cabinet, and no appointment of moment is made or recommended to the Crown without his knowledge and concurrence. His own patronage is very extensive. In forming an administration, he selects all those who are to fill the various offices, though the appointments are subject to the sovereign's approval. It is upon his advice that as vacancies occur the archbishops, bishops and deans and the highest judges are appointed, and over one hundred Crown livings are filled;

and upon his recommendation that the most envied temporal titles and honourable distinctions—peerages, baronetcies, and the garter, for example—are conferred, and such high appointments as the Lord Lieutenancy of Ireland, the Viceroyalty of India, the principal ambassadorships and colonial governorships, and the lord lieutenancies of counties are made by the Crown. He is the leader of the House of Parliament of which he is a member. Yet as Prime Minister he enjoys no legal precedence over his colleagues, his official existence being indeed not recognised by statute.

Primitive Methodism had its origin in Staffordshire in 1810, Mr. Hugh Bourne, a Wesleyan lay-preacher, being its founder. The ten persons forming the first class at Standley had never previously belonged to any other church; Primitive Methodism cannot therefore be regarded as a "split." Mr. Bourne, who had no intention of founding another sect, was at length prevailed upon to take it under his care, and to form other classes, which in time developed into "societies." The first Conference was held in '20. Primitive Methodism has now 535 circuits in the United Kingdom, and a membership second only to the Wesleyans. It has missions in Southern and Western Africa, in South Australia, New Zealand, and Queensland. It has a training college for ministers at Manchester, and colleges for youths at York and Birmingham. Its Book-room profits last year amounted to £441; its missionary income was £21,000; and the premium revenue of the Connexional Fire Insurance Co., £1600. The 70th Conference was held at Bradford in June '89 (Pres. Rev. Joseph Toulson; Sec. Rev. W. Goodman). Statistics: Members, 194,347, increase for the year, 1465; ministers, 1038; local preachers, 10,299; class leaders, 10,798; places of worship, 4436; rented rooms, etc., 1405; hearers, 581,252; value of Connexional property, £3,026,294; debt upon Connexional property, £1,103,552; Sabbath schools, 4238; teachers, 62,220; scholars, 430,641. Miss. Sec., Rev. James Travis; Gen. Com. Sec., Rev. John Wenn; Gen. Book Steward, Rev. Joseph Toulson; Gen. Sunday School Sec., Rev. Joseph Ferguson; Editor of the *Monthly Mag.*; Rev. Thomas Newell; Principal of the Theol. Inst.: Rev. Joseph Wood, M.A.

Primogeniture. This term ought to express the fact of a person being the eldest child of his or her parents, and does express a right which he enjoys in consequence of being an eldest child. As regards primogeniture in England, we must distinguish between the law and the custom of primogeniture. The only law of primogeniture in England is that which ordains that in the event of any person dying intestate as to his real estate, such real estate shall descend to his eldest son. There is no similar rule in the case of an eldest daughter—daughters, where there is no son, inheriting equally. The custom of primogeniture is the custom of settling all one's real property upon one's eldest son.

Primrose League. A league originated in 1883, in memory of the late Earl of Beaconsfield, and so called because on the anniversary of his death every member wears a bunch of primroses. The members, who include both sexes, are styled *Knights, Dames, and Associates*, and their branches are called "*Habitations*." The members of the *Primrose League* took an active part in the last electoral campaign, and

exercised considerable influence in London and its neighbourhood in favour of the Constitutional-Unionist candidates. **Grand Master:** Marquis of Salisbury, K.G.; **Chairman of Grand Council and Chancellor of the League:** Earl Amherst. There are now (Oct. '89) 852,446 members, including Scotland, divided among 2,031 Habitations. Habitations have been established in India, Malta, Cyprus, Sydney, British Honduras, Mauritius, Hong Kong, etc. **Vice-Chancellor:** G. T. Lane-Fox, 1, Prince's Mansions, S.W. **Official Organ:** *The Primrose League Gazette* (weekly). There was a grand Primrose League fête and reception to Lord Salisbury at the Crystal Palace, July 24th, '89.

Prince Edward Island. A province of the Dominion of Canada. It lies in St. Lawrence Gulf, north of Nova Scotia and between New Brunswick and Cape Breton. Area 2,133 sq. m.; pop. 108,891. **Capital Charlottetown**, pop. 17,485. Divided into three counties. The island is long and narrow, its coasts much indented. The surface is mostly level, the soil very fertile. Agriculture extensively prosecuted. Wheat, barley, oats, pease and beans, potatoes, turnips and other crops ripen well; apples, grapes, plums, and currants grown in small quantities. Most beautiful island in St. Lawrence estuary. Climate delightful, and, with the facilities for bathing and yachting, attracts a large number of visitors. **Administered** by a Lieut.-Governor and Executive Council. The people elect a Legislative Council of thirteen members and a House of Assembly of thirty. The Province has four seats in the Dominion Senate and seven in the House of Commons. Education is State-aided, free, and compulsory. **Industries** are agriculture and breeding of stud-stock. The fisheries are important. Enormous quantities of lobsters and oysters annually shipped off. Manufactures are progressive, and there is some shipbuilding. Communications good by road, rail, and steamer. A submarine railway tunnel to the mainland is in progress. (see NORTHUMBERLAND STRAITS TUNNEL). Farms sell at about £4 per acre.—During the eighteenth century the island, then called Isle St. Jean, was a French colony; it became British after the capture of Acadia (Nova Scotia), and received its present name in 1798. Entered Dominion 1873. See CANADA.

Prince of Wales's Children Act, '89. See Session, sect. 47.

Prince of Wales Island. Official name of Penang, one of the Straits Settlements (*q.v.*).

Principe and St. Thomas. Two islands in the Gulf of Guinea belonging to Portugal. Area 454 sq. m., pop. 20,888. See COLONIES or EUROPEAN POWERS.

Prisons constitute an important department in our home administration. The Chief Office is at the Home Office. In the maintenance of prisons in England £466,000 a year is required; and in Scotland £109,000. There are four prisons in the Metropolis known as Her Majesty's Prisons, and the number of convict prisons throughout the country is fourteen, of which Millbank, Portland, Chatham, and Wormwood Scrubs are the best known; besides these, there is a large number of local prisons. According to the latest report the population of the convict prisons last year was the lowest on record. Consult "Fenological and Preventive Principles," by W. Talford ('89).

Print, Thomas Evan, angling editor of the *Yorkshire Post*, was b. 1848 at Preston. He

is author of "North Country Flies" ('85 and ed. '86), "The Book of the Grayling" ('88), "Around Settle," and writer of numerous articles on banking and other topics. Founded, '85, the *Yorkshire Anglers' Association*, of which he is the hon. sec.

Privileged Communications. A privileged communication may mean either a communication which, although in itself containing all the characteristics of libel or slander, does not subject the person making it to the consequences of uttering a slander or publishing a libel; or a communication which the person to whom it is made cannot be called upon to disclose when giving evidence in a court of justice, although it be relevant to the matter in hand. The former kind of privileged communication can best be discussed under the head of Libel (*q.v.*) or Slander; the latter kind alone will be considered here. Privileged communications of this kind fall under one or other of the following heads: (1) **Official communications** between public officers on public affairs. But the head of the department concerned may permit such communications to be divulged. (2) **Communications made in either house of parliament.** But either house can permit them to be divulged. (3) **Communications as to the names of persons** who have given information concerning offences in whose prosecution the Government is directly interested. (4) **Communications made between jurors** in the performance of their duty. These are privileged, at all events when a juror is under examination. (5) **Communications made to a legal adviser** in the course of his employment. But these are not privileged if made in furtherance of crime. The privilege extends to the client as well as to the legal adviser. (6) **Communications made during marriage** by wife to husband or husband to wife. Communications made to clergymen or medical advisers are not privileged. Consult Sir James Stephen's "Digest of the Law of Evidence."

Privileges of Peers and Members of Parliament. Certain privileges of the peers are defined in standing orders, some of which date from the seventeenth century; while the Commons, through their Speaker, claim their privileges immediately after the first meeting of a new parliament; but the privileges thus defined and claimed have been greatly modified by Acts passed by the two houses themselves. At the present time a peer or peeress of Great Britain or of Scotland or Ireland, whether representative or not, and a peeress whether by birth, marriage, or creation—but not a peeress by marriage who has become widowed and has married a commoner—is still free at all times from arrest or imprisonment on civil process; but their servants have long since been deprived of the protection they formerly enjoyed. And by an Act of 1871 bankrupts are disqualified from sitting and voting in the House of Lords until the bankruptcy be determined either by being annulled or by the satisfaction of the creditors; and the seat of a representative peer for Scotland or Ireland is vacated unless his bankruptcy be determined within one year after the date of his becoming a bankrupt. Neither a peer nor a member has, nor did he have formerly, any privilege against being compelled by process of the courts to pay obedience to a writ of *habeas corpus* (*q.v.*) directed to him. When the Speaker's election has been approved and confirmed by Her

Majesty, he lays claim by humble petition to the "ancient and undoubted rights and privileges" of the Commons, and especially "to freedom from arrest and molestation for their persons, servants, and estates, to freedom of speech in debate, to free access to Her Majesty whenever occasion may require it, and to the most favourable construction being put on all their proceedings;" and the Queen through the Lord Chancellor confirms all the rights and privileges which have ever been granted to, or conferred upon, the Commons by Her Majesty or any of her royal predecessors. But in regard to the first part of this claim made by and allowed to the Commons, freedom from arrest, and that on strictly civil process only, is now confined to the member alone, and is enjoyed only during a period of forty days before the meeting of parliament, during the sittings of the House, during a period of forty days before and after any day to which parliament is prorogued, and until an uncertain or "reasonable" period after a dissolution. But members are brought under the bankruptcy laws, for if any one of them be adjudged a bankrupt he is unable to sit and vote for one year, unless the order of adjudication be annulled or his creditors be satisfied; and if at the expiration of one year the bankruptcy be not determined in either of these ways, the seat becomes vacant. Actions at law are maintainable against members of both Houses; they are subject to penalties, and may be arrested for indictable offences; and members of the House of Commons have been committed in certain instances for contempt of court without subsequent interference by the house. Peers and members are not compelled to obey a subpoena, though in practice they do answer a summons of the kind; and they are exempt by statute from serving on juries. Although no member may use unbecoming words in regard to another member without risking suspension if he decline to explain or retract, freedom of speech with reference to those who are not members is enjoyed to the very fullest extent, and statements may be freely made within the walls of parliament which, if uttered elsewhere, would be libellous and actionable. Free access to Her Majesty is the right of peers individually, as well as of the House of Lords as a body; but the other House only possesses the right collectively. By resolutions of the House of Commons no peer, except an Irish peer who has been elected an M.P., can vote or concern himself in a parliamentary election. Members of either house are protected against insult or threatening; and the offer of money to any member for promoting a parliamentary matter is a breach of privilege which may be severely punished. See IMPEACHMENTS AND TRIALS OF PEERS (ed. '88).

Privy Council (see MINISTRY). A body of persons nominated by the sovereign without any patent or grant, and who, upon taking the oath of office, are at once qualified members. A privy councillor must be a natural-born British subject, and as he is created by the sovereign, so he can be removed from the list at her pleasure. It is customary to include in the body the royal princes and the archbishops; several of the principal officers of State and of the Household become privy councillors by virtue of their office; the principal secretaries of state are of course sworn of the Council before they can take part in the deliberations of the select

number of the body which we know as the Cabinet Council; the Judge-Advocate-General is always included; and the rank is bestowed upon ambassadors and the principal colonial governors, and frequently upon respected politicians who may never have been in office, as an honorary distinction. Any privy councillor may act as a justice of the peace. The Lord President of the Council is appointed by letters patent under the great seal; his duty is to manage the debates in council, to propose matters from the sovereign at the council table, and to report to Her Majesty the resolutions taken thereon. It is only on rare occasions that the whole body of members assembles, one of those instances being at the demise of the Crown, when it is the duty of the Privy Council to meet and proclaim the new sovereign. For the ordinary business of the Council only those who are summoned attend, and the number thus called upon is usually very small, and consists generally of members of the party in power. Among other important functions of the Council are the establishment of quarantine when it may be necessary, the granting of charters of incorporation to public and private bodies, and the bringing into operation by means of orders in council of the provisions of many statutes which Parliament leaves to the executive to enforce, temporarily or permanently, at such time or times as it may deem necessary and desirable. Royal proclamations, summoning or proroguing or dissolving Parliament, and for many other purposes, are made by and with the advice of the P.C. before being issued. Several public departments have grown out of or are even now committees of the Council. The Board of Trade (*q.v.*), though now an entirely separate department, is still officially entitled the Committee of Council for Trade. The Education Department, with its own vice-president, is a Committee of the Privy Council, and there are besides a Universities Committee, which reviews the statutes made under the Oxford and Cambridge Act, a Scottish Universities Committee, and a Judicial Committee for appellate business. Included among the powers and duties of the newly-established Board of Agriculture are many which were formerly discharged by the Agricultural Department of the Privy Council (see Session, sect. 59).—The Privy Council in Ireland, a much smaller body than that just referred to, advises the Lord-Lieutenant, and exercises some of the powers possessed by the Council in Great Britain, but in relation to Irish affairs only.—As the Privy Council in Great Britain and the Privy Council in Ireland are distinct bodies, though it will be noticed that some persons are members of both, a separate list of each is set out, corrected to Nov. 22nd, '89. In the second column is given the date on which each Privy Councillor was sworn in. The word "Peer" is inserted in the third column to signify that some particulars regarding the public life of the noble lord referred to are given under the head of "Peerage"; and "M.P." is meant to refer the reader to our list of the House of Commons. In cases where the Privy Councillor is neither Peer nor M.P. some biographical facts are appended. All Privy Councillors should be addressed as "Right Honourable." [Sir J. Caird is included in the list because the Queen has been pleased to approve that he be appointed a P.C., but he has not yet been sworn.]

Alphabetical List of Privy Council in Great Britain.

Lord President—The Rt. Hon. Visct. Cranbrook, G.C.S.I.

Clerk of the Council—Sir William S. B. Kaye, C.B., LL.D., Q.C.

* For biographical facts relative to these right hon. gentlemen see Her Majesty's Privy Council above.

Privileges, Committee for. The petition of every claimant to a title of nobility is referred to the Committee for Privileges of the House of Lords, a body which is composed of the Lord Chancellor, the ex-Lord Chancellors, and the Lords of Appeal, or some of them, the President being the Chairman of Committees. Counsel and witnesses may be heard, and the case is decided by the majority of the members of the committee present.

Privy Council Office. See CIVIL SERVICE.

Prinsep, Valentine C., A.R.A., b. 1838, and though intended originally for the Indian Civil Service, preferred the profession of an artist. His paintings, which are regularly exhibited at the Academy, are held in high reputation for their power and vigour of design, and the excellence of their colouring. He has published a work on Indian travels, entitled "*Imperial India*." Elected an A.R.A. ('79).

Prix de Diane. See TURF.

Prix du Jockey Club. See TURF.

Prize Ring. (For the earlier history of this institution see ed. '88.) The only encounter of note under London Prize Ring rules which occurred in '89 was that decided between John L. Sullivan and J. Kilrain on July 8th, some 100 miles from New Orleans, for a stake of 20,000 dollars and the championship of the world. The fight was marked by much brutality, and at the conclusion of the 75th round Kilrain's seconds threw up the sponge, the defeated pugilist being removed from the ring in an almost unconscious condition. Both men were subsequently arrested and prosecuted by the Governor of the State. A match for £500 has been arranged between James Smith, the English champion, and F. P. Slavin, the Australian champion, but, owing to the watchfulness of both the English and French police, it is very doubtful if this will be brought to a conclusion. **Glove fights**, however, have been numerous, but on November 18th Mr. Monro, the Commissioner of Police, intimated that he would no longer allow any metropolitan police constable to attend these displays, and the probabilities are that they will fall into disrepute. In the encounters under the Marquis of Queensberry's rules, Edward Pritchard beat Alec Burns at the Lambeth School of Arms, on June 6th; J. Smith defeated J. Wannop at the Novelty Theatre, on Sept. 30th; F. P. Slavin proved victorious over W. Goode at Astley's Theatre, on Oct. 17th; and on Nov. 11th Peter Jackson, a native of the West Indies, beat J. Smith at the New Gymnasium of the Pelican Club, the members of which subscribed £1000 as prize money.

Probate Duties (Scotland & Ireland) Act, '88. See SESSION, AUTUMN, sect. 16.

Probate, Legacy, and Succession Duties. The law relating to these duties is intricate and bulky. Their general nature may be shortly explained. (1) **Probate Duty.**—Every will of personal property must be deposited in the Probate, Divorce, and Admiralty Division of the High Court, a copy thereof being given to the executor. This copy is called the probate, and formerly bore a graduated stamp. Hence the name of probate duty given to the stamp duty upon such personal property as passes by will or by intestacy, the stamp in the latter case having been affixed to the letters of administration. The stamp is now affixed to the affidavit required from the person applying for probate or letters of administration. The duty is levied on the following scale, debts

and funeral expenses being deducted in every case:—

Estates not exceeding in value—

£100; no duty.

£500; duty at the rate of £1 for every £50 or fraction of £50.

£1000; duty at the rate of £1 5s. for every £50 or fraction of £50.

Estates exceeding in value

£1000; duty at the rate of £3 for every £100 or fraction of £100.

Where the gross value of the estate does not exceed £500 it is cleared off duty by depositing with the proper officer 15s. for fees of court and 30s. for stamp duty. (2) **Legacy Duty.**—Upon payment or delivery of any legacy, or of the share taken by any person in the event of an intestacy, the legatee or recipient of the share must give a stamped receipt. The stamp duty in these cases is known as legacy duty. It is not levied upon any legacy or share out of a personal estate of less than £100 in all, nor upon any legacy or share taken by the husband or wife of the deceased, or by any child, grandchild, etc., or any parent, grandparent, etc., of the deceased, or by any of the royal family. Where the legacy, etc., is taken by a brother or sister of the deceased or by any of their descendants, the duty is at the rate of £3 per cent. Where the legacy, etc., is taken by an uncle or aunt or by any of their descendants, the duty is at the rate of £5 per cent. Where the legacy, etc., is taken by a grand-uncle or grand-aunt or by any of their descendants, the duty is at the rate of £6 per cent. And in all other cases the duty is at the rate of £10 per cent. (3) **Succession Duty.**—The probate duty can be levied only upon personal estate, because only such estate passes through the hands of executor or administrator. Legacy duty can be levied only upon fragments of the personal estate given by will or taken under an intestacy. But there are other modes in which personal property may devolve from the dead to the living, and real property so devolves as much as personal. By the Succession Duty Act of 1853, a duty graduated like legacy duty is imposed on every succession, whether to real or personal property, not covered by legacy duty. For the purpose of this Act real property upon devolution is taken to be of value equal to the value of an annuity for the life of the successor, and equal in amount to the annual value of the estate. The duty upon a succession to real property is paid in eight equal instalments, the first falling due twelve months after the successor becomes entitled, and the others at successive intervals of half a year.

Probation of First Offenders Act, '87, provides that in any case in which a person is convicted of any offence punishable with not more than two years' imprisonment, and no previous conviction is proved against him, the Court may, instead of sentencing him at once to punishment, direct that upon entering into a recognisance with or without sureties, he may be released upon probation of good conduct; and if he fail to observe the conditions of his recognisances he may be rearrested on warrant and brought up for judgment.

Prohibitionists. See AMERICAN POLITICAL PARTIES.

Prorogation of Parliament. See PARLIAMENT.

Provident Medical Association, Metropolitan. Established for the purpose of securing the supply of medical attendance and medicine during sickness to the families of the wage-earning classes by the payment of a weekly sum, regulated by the number in each family. See, W. G. Bunn, 5, Lamb's Conduit St., Bloomsbury, W.C.

Province Wellesley. Part of Straits Settlements (*q.v.*).

Provincial Colleges (non-Theological). The foundation of Owens College, Manchester (*q.v.*) led the way in a movement which, aided by the stimulus of "University Extension" (*q.v.*), has during the last twelve to fifteen years spread to many of the large non-university towns of Great Britain. The following is a list of such institutions, with date of foundation:—Durham University College of Physical Science, at Newcastle-on-Tyne, 1871; University College of Wales, Aberystwith, 1872; Yorkshire College, Leeds, 1874; University College, Bristol, 1876; Firth College, Sheffield, 1879; Mason College, Birmingham, 1880 (originally a "Science" college, but extended in 1881 so as to include a Faculty of Arts); University College, Nottingham, 1881; University College, Liverpool, 1882; University College, Dundee, 1883; University College of South Wales and Monmouthshire, Cardiff, 1883; University College of North Wales, Bangor, 1884. The scheme of most of these colleges is to provide a higher education after the type of University College, or King's College, London, and they all (except Newcastle) include chairs belonging to "Arts" subjects, though several of them began as pure "Science" colleges. See EDUCATION.

Prussia. See GERMANY; and for Ministry, etc., see DIPLOMATIC.

Pseudonyms. See NOMS DE PLUME.

Psychical Research, the Society for. Founded 1882, under the presidency of Professor H. Sidgwick, of Cambridge, "for the purpose of making an organised attempt to investigate that large group of debatable phenomena designated by such terms as mesmeric, psychical, and spiritualistic." The main work of the Society has hitherto been the examination of telepathy—viz., the affection of one mind by another otherwise than through the recognised organs of sense. Such communication may be established voluntarily for the purposes of experiment, and also appears to take place spontaneously between absent persons on occasions of special excitement, and particularly at the moment of death. Reports of a number of varied and careful experiments in induced telepathic communication are published in the "Proceedings," and a large collection of spontaneous cases has been published in a book entitled "Phantasms of the Living." The Society has also taken a prominent part in the recent investigations of hypnotism; and has done critical work in examining and exposing the alleged marvels of so-called theosophy. The Society has about 650 members and associates; and an allied society has recently been established in the United States (see further ed. '89). **Hon. Secs.,** Messrs. F. W. H. Myers and F. Podmore. **Offices and Library,** 19, Buckingham St., Adelphi, W.C.

Public Bill. See PARLIAMENTARY PROCEDURE.

Public Bodies Corrupt Practices Act, '89. See SESSION, sect. 60.

Public Executioner. See SESSION, sect. 46.
Public Health Act, '89. See SESSION, sect. 105.

Public Health (Buildings in Streets) Act, '88. See SESSION, AUTUMN, sect. 16.

Public-Houses, Hours of Closing (Scotland) Act, '87, enacts that after Jan. 1st, '88, the local licensing authority may fix an hour of closing not earlier than ten nor later than eleven p.m.; but does not apply to any town containing 50,000 inhabitants or upwards, and does not alter the existing law relating to travellers or persons requiring to lodge in an hotel.

Public Libraries Acts Amendment Act, '89. See SESSION, sect. 108.

Public Libraries Acts, '75-77. Under these Acts the town council of any borough, local board of any local board district, and vestry of any parish, may, and upon the request in writing of ten ratepayers shall, by means either of a public meeting, or by the issue and collection of voting papers, take the sense of the ratepayers on the establishment of a free library or museum. Should there be a majority of votes in the affirmative the town council or local board may establish and maintain such a library or museum; but a vestry must appoint for that purpose not less than three nor more than nine ratepayers to act as commissioners. The commissioners go out of office one-third at the end of each year, and are to meet once every month. The property of the library, etc., is vested in the commissioners, local board or town council, who may impose any rate not exceeding a penny in the pound, and raise loans where necessary. They cannot do this, however, without the consent of their vestry. No charge is to be made for admission to the library or museum. If the majority of ratepayers voting is adverse to doing anything, the question cannot again be put to the vote until one year has elapsed. A parish wishing to adopt the Acts may for that purpose unite with any other place which has adopted them if the local authority of that place consent. **Public Libraries Act Amendment Act, '87,** empowers the library authority to establish and maintain a lending library without providing any separate building for containing the same. The power of adopting the principal Act is extended to district boards in the Metropolis, without depriving any vestry within such district where the Act is not in force of the power to set it in motion.

Public Prosecutions, Director of. See DIRECTOR.

Public Schools of England. Many of the great public schools are richly endowed, and since the report of the Royal Commission their condition has greatly improved, and in several new schemes have been adopted which have resulted in increased benefit flowing from the endowment. See under various alphabetical headings, and consult *Public Schools Year-Book*.

Public Trustee Bill. See SESSION, sect. 107.

Public Works Loans Act. See FINANCE, NATIONAL.

Public Works Loans Commissioners are an unpaid body who regulate the conditions upon which loans may be granted by the National Debt Commissioners to local bodies for baths and washhouses, burial grounds, conservancy and improvement of rivers, main drainage, docks, harbours, piers, improvement of towns, labourers' dwellings, lighthouses, lunatic asylums, police stations in counties

and boroughs, public libraries and museums, schoolhouses, water works, and other sanitary and local purposes. The report of this commission for 1887-8 was issued on Dec. 6th, '88. It shows that during the year the amount advanced to local authorities was £1,196,121, as against £1,059,963 in the previous year. The total included the following £73,700 for providing dwellings for the labouring classes chiefly in London; £76,975 for harbours and passing tolls; £500,682 for sanitary purposes in England and Wales, and £113,891 for similar purposes in Scotland; £287,216 to school boards in England and Wales, and £137,307 for school boards in Scotland; £1,100 to burial boards in England; and £4,450 to boards of guardians in England. The sum received in repayment of principal during the year was £1,652,992 1s. 7d., an excess of £575,512 6s. 3d. over the amount for the previous year, this increase being chiefly due to the large number of cases in which borrowers paid off their loans in whole or in part before they were due. The sum received for interest during the year was £1,032,607 2s. 8d., representing £3 12s. per cent. on the total balance of loans outstanding, amounting to £28,678,066 9s. 9d. Office, 3, Bank Buildings, E.C. Chairman, Herbert Burnard (unpaid); Secretary, R. Philpot (L1,275); Assistant Secretary, A. C. Taylor (L632).

Puerto Rico. The largest and most westerly island of the Leeward group of the Lesser Antilles. It is a dependency of Spain. Capital, San Juan de Puerto Rico (pop. 30,000), with an excellent harbour. The principal exports are sugar and molasses, coffee, tobacco, and

rum. Gold, iron, copper, coal, and salt are found, but the last alone is worked. Statistics included with those of Cuba (*q.v.*). Government also similar, under a Captain-General.—Discovered by Columbus, 1493; attempt at independence, 1820; Spanish supremacy established, 1823; declared a province of Spain, 1870; last traces of slavery abolished, 1873. Consult Bates' "Central and South America and West Indies," Layard's "Through the West Indies."

"Punch." The well-known illustrated satirical weekly was founded July 17th, 1841. Its first editor was Mr. Mark Lemon, to whom succeeded Mr. Shirley Brooks, Mr. Tom Taylor, and Mr. F. C. Burnand (*q.v.*), its present editor. Among its many talented artist-contributors may be noticed the late Mr. John Leech, the late Mr. Richard Doyle, the late Mr. Charles H. Bennett, Mr. John Tenniel (*q.v.*), Mr. Harry Furniss, Mr. Du Maurier (*q.v.*), Mr. Linley Sambourne, and Mr. C. Keene. Among its past literary contributors, Jerrold, Thackeray, G. A. Beckett; among its present Mr. Luty ("Toby") (*q.v.*), late editor of the *Daily News*, and Mr. Anstey-Guthrie (*q.v.*), author of "Vice-Versa." The death of Mr. Leigh, who had been connected with *Punch* for many years, occurred towards the end of '89. The "Puzzle Portraits," which commenced in Oct. '89, attracted much attention; and the cartoon by Mr. Tenniel, entitled "The New Crusade" (Nov. 27th), was much admired.

Punjaub. See INDIA; and for Ministry, etc., see DIPLOMATIC.

Purchase of Land (Ireland) Amendment Act, '88. See SESSION, sect. 109.

Q

Quakers. See FRIENDS.

"Quarterly Review." Founded Feb. 1809, its first editor being William Gifford, the translator of "Juvenal." The *Quarterly* has long maintained a high reputation as the leading review of the day, its political articles and reviews being contributed by the first authorities, amongst whom have been, and are, the most distinguished names in literature. Editor, Dr. W. Smith (*q.v.*).

Quebec, a province of the Dominion of Canada. It lies eastward of Ontario, occupying both banks of the St. Lawrence. Area 193,355 sq. m.; pop. 1,359,027; mostly descendants of original French colonists. Capital Quebec, pop. 65,000; a picturesque, impregnable fortress, with historic associations. Montreal, a splendid city, chief seaport, head of St. Lawrence navigation. Other towns are Three Rivers, Lévis, Sorel, St. Hyacinthe, Sherbrooke.—Divided into districts and 63 counties.—Principal rivers are the St. Lawrence, and its tributaries the Saguenay, St. Maurice, Richelieu, Chaudière, etc., which present magnificent scenery. Province more varied in character than Ontario, hilly in parts, with much pine forest abounding in furred and feathered game. Climate healthy; winter cold, with heavy snow and ice, but clear and bracing; summer pleasant, warmer than in England, and admitting of a richer flora.—Administered by a Lieut.-Governor and responsible Ministry. A Legislative Council of 24 members appointed

for life by the Lieut.-Governor. Legislative Assembly elected by 65 constituencies. Quebec has 24 seats in the Dominion Senate and 65 in the House of Commons. Religion chiefly Roman Catholic. Education superior, denominational. Primary education obligatory, not free, under local control.—Industries less forward than in Ontario. Much of the soil rich and loamy, and well suited for the growth of cereals, hay, and fruit crops. Farming extensively carried on in the eastern townships. Hay a leading crop, and exported to the United States. Beef and cattle exported to England. Lumbering extensively carried on. Fisheries of great importance, both those of the St. Lawrence and of inland waters. Gold, iron, and copper ores abound. Improved farms sell at £4 to £6 per acre, unimproved at 1s. 8d. to 2s. 6d. per acre, four-fifths deferred. Certain sections free grants in hundred-acre lots. Eastern townships on United States border, settled by royalists after War of Independence, are an excellent location for English emigrants.—Quebec was settled as a French colony in 1608. In 1759 it was captured by British troops under General Wolfe, and in 1763 ceded to England by Treaty of Paris. It became a province of the Dominion in 1867. See CANADA; and for Executive Council see DIPLOMATIC. Consult Faillon's "Histoire de la Colonie Française en Canada," Garneau's "Histoire du Canada," "The Canadian Almanac for 1888," Petherick's "Catalogue of York Gate Library," etc.

Queensland. The most recently organised of the Australian colonies. Comprises the N.E. section of the continent, immediately N. of New South Wales. On the W. it is divided from South Australia by 141st meridian of E. long. from New South Wales boundary to 26° S. lat., thence by 138th meridian to Gulf of Carpentaria. It is 1300 miles from N. to S., and 800 miles from E. to W., including 668,497 sq. m. of area. Population, 342,614. The capital is Brisbane (pop. 73,000), situated on Moreton Bay, 500 miles N. from Sydney; and is a thriving city, rapidly increasing, and provided with various excellent institutions. Other leading towns are Cooktown, Gympie, Ipswich, Mackay, Maryborough, Rockhampton, Bundaberg, Toowoomba, Townsville, Warwick, and Charters Towers, with a number of other rising municipalities and townships.—The colony is divided into 12 districts; a very small portion being subdivided into 37 counties. For other purposes there are 17 municipalities, 6 boroughs, 3 shires, and 88 divisions. The districts are: Moreton, coal, gold, sugar, metropolitan; Darling Downs, richest pastoral and agricultural; Burnett, pastoral and tropical agriculture; Port Curtis, gold, copper, marble, agriculture; Leichardt, pastoral and mining; Maranoa, pastoral; Kennedy, richest sugar districts, gold; Warrego, pastoral; Burke, Mitchell, Gregory, Cook, pastoral and mining.—The chief rivers are the Mitchell, Flinders, Leichardt, and Gregory, flowing into Gulf of Carpentaria; Burdekin, Fitzroy, Burnett, Brisbane, flowing east to the sea; Diamantina, Barcoo, etc., lost inland; and tributaries of Darling flowing south. The Coast Range and Dividing Range are the main mountain chains. Climate warm, but healthy and favourable to Europeans. Besides great capabilities for industrial enterprise, Queensland has immense natural resources. The pastoral regions are probably the richest in the world, and their value has been enormously enhanced by the recent discovery of artesian water in immense quantities.—Valuable timber is found all along the eastern coasts of Queensland, and in the Cape York peninsula are forests of immense trees, which have hardly been even named as yet. The mineral resources of the colony are being rapidly developed, and the output of gold, tin, coal, and silver shows a great increase. Mount Morgan, the greatest gold mine in the world, paid £500,000 in dividends in '89. Among agricultural products sugar is the chief item of export, but each year more and more bananas and other tropical fruits leave the colony. Half of its area is stated to be forest, and little has been done to utilise it. The rabbits, which are such a pest in New South Wales, have been kept back up to the present by a fence nearly three hundred miles in length, between the two colonies. Coal, gold, tin, copper, lead, silver, antimony, mercury, are found in quantity. Chief exports are wool, gold, tin, copper, arrowroot, pearl-shell, tortoise-shell, meat, bêche-de-mer, rum, sugar, timber, etc. Suitable climate for jute and other fibre-plants, grape, tobacco, etc. Pastoral regions probably the richest in the world.—Executive vested in Governor and responsible Ministry. Parliament consists of two houses: Legislative Council and Legislative Assembly. The former is composed of 36 members, nominated by the Governor on the advice of the Ministry. The latter has 72 members

elected quinquennially on a manhood suffrage basis. The colony is represented in the Federal Council of Australasia. There is no State Church. Chief sects are Church of England, Roman Catholic, and Presbyterian. Valuable land grants were formerly made to these bodies, which they now retain free from taxation. Education is free and secular, and is well provided for in every branch. It is under control of Minister for Education. There are primary schools and grammar schools. There is a volunteer force of more than 3000 officers and men, including engineers and four batteries of artillery. Besides these there are 500 to 700 armed constabulary, and all males classed in "reserves." There are two or three gunboats and torpedo boats, and Brisbane is defended.—For latest financial statistics see BRITISH EMPIRE, etc. (table). Staple export wool, to value £1,214,644 in 1887, meat £44,465, tallow £43,972. 295,265,587 acres leased as pastoral runs; 188,845 acres under crop for grain. Coal output 238,813 tons; gold output 425,923 oz.; tin 3,279 tons; copper 1,020 tons. There were 305,865 horses, 4,473,716 cattle, 12,926,158 sheep, 73,663 pigs. About 1765 miles of railway open up the country, and more are constructing. Brisbane, the capital, is connected with Sydney, and so with Melbourne and Adelaide, by railway. There are of telegraph lines 8772 miles.—Very considerable immigration has been taking place for some years, the Government giving free passages to suitable persons. Small homesteads of 160 acres are sold at 2s. 6d. an acre, and five years to pay it in. Larger agricultural areas are leased at very low rates for a long term of years, at the end of which they can be made freehold, the rent going towards the purchase money. Pastoral areas can be obtained on lease for twenty years on very favourable terms.—There are in the colony about 17,000 Chinese, mostly gold diggers, and about 10,000 Polynesian coolies. The black aborigines, found in unsettled parts, are supposed to number 20,000.—Queensland was originally a part of New South Wales. (See previous editions for history to '89.)—The New Governor, Sir Henry Norman, who arrived early in '89, was received with the most enthusiastic welcome.—The two most important measures of the year have been, first the appointment of three railway commissioners, who will have the sole management of existing railways, and subject to Parliamentary control of the construction of new lines; secondly, the passing of a Civil Service bill, involving the establishment of a board, which will control appointments and preferments. Both these measures are of great importance, because they withdraw from political influence the civil servants of the colony. The Ministry, in which Mr. Pattison became Treasurer on the retirement of Sir Thomas Mellwraith, still enjoys the confidence of the House. (For Ministry, etc., see DIPLOMATIC.) Consult Bonwick's "Resources of Queensland," Boyd's "Queensland," Pugh's "Queensland Almanac for '90," Gordon and Gotch's "Australian Handbook for '90," Nicol's "Wild Life in Australian Bush," Petherick's "Catalogue of York Gate Library," etc.

Quorum. (See ed. '88.) Business may be transacted in the House of Lords when not less than three peers are present. In the Commons it requires forty members, including the Speaker, to constitute a quorum.

R

Racquets (or Rackets). This tennis game was first played in England between the 13th and 14th centuries, with the naked hand, then with gloved hands, and later on thongs were bound round the right hand so as to make the ball rebound with greater force. The Queen's Club, West Kensington, is now the most popular resort of racquet players. In the championship competition, which opened on the Queen's Club ground on April 3rd, and extended over a considerable period, Mr. E. M. Butler (Harrow and Cambridge) in the final beat Mr. E. D. Buxton (the holder) by three games to two. Eleven teams entered for the **Public Schools' Cup**, the contests for which were commenced at the same enclosure on April 23rd, '89. In the first round Haileybury beat Wellington, Eton beat Cheltenham, and Rugby beat Marlborough. In the second round Winchester beat Radley, Eton beat Haileybury, Harrow beat Rugby, and Charterhouse beat Malvern. In the semi-finals Winchester defeated Eton, and Charterhouse beat Harrow. In the final Winchester beat Charterhouse, and for the first time held the trophy.

Radicals. See ENGLISH POLITICAL PARTIES.
Railways. The Board of Trade returns for '88, issued in Oct. '89, more than justify the estimate given in our last volume as to the expansion of business in this department. In '88 the total paid-up capital in the United Kingdom was increased by £18,724,000, a larger increase on the capital of a previous year than has taken place in the last ten years except '82, when the increase was £22,379,000. At the end of '88 the railway capital of the United Kingdom amounted to £864,698,963. As for the traffic receipts, the following table will speak for itself:—

| | '87. Million. | '88. Million. | Per- centage increase. |
|-------------------|------------------|------------------|------------------------------|
| Passenger traffic | 30'6 | 31'0 | 1'3 |
| Goods traffic . . | 37'3 | 38'8 | 4'0 |
| Miscellaneous . . | 3'0 | 3'1 | 3'3 |
| Total . . . | 70'9 | 72'9 | 2'8 |

There was also, of course, an increase in the working expenditure, which rose from £37,063,466 to £37,762,107. The net earnings were in '87 £33,880,110 against £35,132,558 in '88; or per train mile 27'37 in '87 to 27'51 in '88. The following summary gives the net results of the year's business, and cannot but be satisfactory to all concerned:—Percentage of net earnings on capital, 4'00 in '87 and 4'00 in '88; dividend paid on ordinary capital, 4'08 in '87 and 4'22 in '88. It should be added that the following was the mileage:—In '87 there were 19,578 miles, and 10,592 of double mileage; and in '88 there were 19,812 miles, with 10,772 of double mileage. From a Blue Book on railway accidents, published in April '89, it appeared that there were 905 persons killed and 3826 injured (including employees) on the railway in '88 against 919 and 3590 respectively in '87. It was announced in Dec. '88 that Mr. Justice Wills had accepted the post of President of the newly-constituted Railway Commission, consisting of three Com-

missioners, and which began its work in '89. During '89 railway experiences have been far more remarkable for their prosperity than in '88. The managers and shareholders have every reason to be satisfied with the great and increasing traffics of all kinds witnessed month after month. During the first half-year to June 30th, the aggregate gain on twenty-three of the principal lines was no less than £1,412,000 in gross receipts, while the gain on the June half of '88 was not more than £340,000, counting twenty-two lines, over '87. The increase was chiefly marked in the cases of the L. & N.W., Midland, N. E., and G. W.; but in the last half of this year the southern lines must have benefited by the Paris Exhibition alone. Of course there are drawbacks even in a case like this—for instance, the conditions of the iron and coal trades have added immensely to the cost of material. With regard to legislation (see SECTION '89) and its immediate results, an elaborate article on "The New Railway Classification and Schedule of Maximum Rates" appeared in the *Times* of Feb. 7th, '89. This was a subject of considerable discussion throughout the year, causing much irritation among all concerned. Some trouble was experienced by the great companies on the question of labour—the great wave which had appeared among the working classes of course affecting this important branch as well,—but amicable settlements were the rule rather than the exception. The first important accident of the year occurred on March 30th, '89, near Penistone Junction, the scene of previous disasters. An excursion train left the metals, with the result that one man was killed and a number of persons injured. The next, which was of a terrible and singular character, took place on June 12th on the G. N. of Ireland Railway, about two miles from Armagh. The annual excursion of Sunday-school children was taking place, and the train left Armagh with about a thousand passengers, or perhaps more, including some adults. On proceeding up a rather steep incline near Killooney, the engine was unable to continue, and it appears the latter portion was detached; but, overcoming every effort to stop it, it dashed backwards down the incline, colliding with a terrific crash with the ordinary train which was following. The passengers in the latter train did not suffer much, but the excursion was wrecked, and about eighty persons were killed on the spot, others dying subsequently. One of the officials afterwards stood his trial for manslaughter at Dublin, but was acquitted. The next occurred on Aug. 19th at Ryhope, on the N. E. line, a train on coming down a steep incline running off the line and overturning. A little girl was killed, and a number of persons injured. On Oct. 5th a heavily laden passenger train on the L. & N.W. system came into collision on the main line, near Manchester, with a train consisting of two engines and a brake-van. There were three persons killed on the spot, and a number more or less seriously injured. The collision was attributed to the mistake of a signalman, but at the inquest the said affair was found to be the result of misadventure. Another collision occurred at Wark, Northumberland, on Oct. 15th, whereby several persons were injured. It appears that a passenger train from

Newcastle struck a goods train from Glasgow while in the act of shunting. Consult "The Railways of England," by W. M. Acworth; "The Working and Management of an English Railway," by George Findlay, general manager of the L. & N. W.; "Express Trains, English and Foreign," by E. Foxwell and T. C. Farrer; and "Railway and Commercial Gazetteer of England, Scotland, and Wales."

Railways, Chronology of. The *Annales Industrielles* gives in chronological order, with dates, the first railways opened in various countries:—England, Sept. 27, '25; Austria, Sept. 30, '28; France, Oct. 1, '28; United States, Dec. 28, '29; Belgium, May 3, '35; Germany, Dec. 7, '35; Cuba, '37; Russia, April 4, '38; Italy, Sept. 39; Switzerland, July 15, '44; Jamaica, Nov. 21, '45; Spain, Oct. 24, '48; Canada, May, '50; Mexico and Peru, '50; Sweden, '51; Ohili, Jan. '52; India, April 18, '53; Norway, July, '53; Portugal, '54; Brazil, April 21, '54; Victoria (Australia), Sept. 14, '54; Columbia, Jan. 20, '55; New South Wales, Sept. 25, '55; Egypt, Jan. '56; Natal, June 26, '60; and Turkey, Oct. 4, '60; Japan, Oct. 14th, '72; China, '87.

Railway Tickets, Fares on. See SESSION, sect. III.

Ranavaloa Manjaka III. The present Queen of Madagascar (*q.v.*).

Rarotonga. An island of volcanic origin, rising to a height of about 3,000 feet, one of the Cook group in Polynesia. It has recently been taken under British protection.

Rawlinson, Sir Henry Creswicke, G.C.B., F.R.S., is a brother of the Rev. Canon Rawlinson, in conjunction with whom, and Sir G. Wilkinson, the famous edition of the works of Herodotus was produced. Sir H. was b. at Chadlington, Oxon., 1810. Educated at Ealing School. Entered the service of the old East India Company in '27, and served with distinction on various special missions, especially in Persia ('33) and Afghanistan ('40-43), and rendered distinguished service during that eventful period, for which he was frequently mentioned in despatches. He held Kandahar against all external and internal enemies. He was subsequently appointed Consul of Bagdad '50, and Consul-General in Turkey '51. He was created K.C.B. in '56, and in the same year appointed a director of the East India Company. On the transference of the Govt. of India to the Crown, Sir H. was appointed one of the Members of the Indian Council. In '59 he was special envoy to the Shah of Persia. Sir H. is as distinguished for his Oriental scholarship as for his diplomatic, military, and administrative ability, and, in addition to the great work already mentioned, has contributed largely to the literature of Eastern antiquities, and has rendered invaluable service in aiding the interpretation of cuneiform inscriptions. Elevated from the rank of a K.C.B. to that of G.C.B., '89. Hon. D.C.L. Oxford, LL.D. Camb., F.R.S., and a corresponding member of the Institute of France.

Rayleigh, Lord John Wm. Strutt, D.C.L., LL.D., F.R.S., 3rd Baron; b. 1842. Educated at Trinity College, Cambridge; B.A.; Senior Wrangler and 1st Smith's Prize man ('65); Hon. D.C.L. Oxford, and McGill Univ. Montreal. He is a Cambridge Commissioner under the Oxford and Cambridge Universities Act '77; formerly Professor of Experimental Physics at Cambridge. Succeeded Professor Tyndall in the professorship

of Natural Philosophy at the Royal Institution. He is one of the secretaries of the Royal Society.

Real Presence, The. In both Eastern and Western Churches from the earliest times the words of Jesus Christ in the institution of the Lord's Supper—"Take, eat, this is My body," and similar words regarding the cup—have been interpreted to mean that the presence and communication of the Body and Blood in that Sacrament are real, though not perceptible by the senses. For many centuries it sufficed to hold the truth, without inquiry as to the mode of the Presence. On this point Erasmus says: "Diu satis erat credere, sive sub pane consecrato sive quocunque modo adesse verum corpus Christi" ("It long sufficed to believe that the true body of Christ was present, whether under the consecrated bread or in some other way"). And Durandus: "Verbum audimus, motum sentimus, modum nescimus, præsentiam credimus" ("We hear the word, we perceive the motion, we know not the manner, we believe the presence"). Gradually in the Roman Church and Western Christendom generally the doctrine known as transubstantiation grew up and took definite shape. This doctrine is that, upon consecration, the whole substance of the bread and wine become changed into the whole substance of the body and blood of Christ, so that no part of the former remains, except the appearance and attributes perceptible by the senses, and no part of the latter is lacking. But before the Lateran Council (1215) the mode of the Presence was not defined. So Outhbert Tonstal, Bishop of Duresme, writes: "De modo quo id sacret satis erat curiosum quemque relinquere sua conjectura, sicut liberum sit fuit ante concilium Lateranum" ("Concerning the mode in which this is done it were better to leave every inquirer to his own opinion, as it was free to do before the Lateran Council"). St. Bernard also advises "indubitam retinere fidem, et non querere quo pacto" ("to keep the belief without wavering, and not to inquire as to the manner"). By the Council of Trent transubstantiation was finally adopted as the Roman doctrine, with the sanction of an anathema affixed. Meanwhile, in the German Reformation under Luther, a modified form of the doctrine had been adopted, called consubstantiation. In this it is held that the substance of the elements remains, as well as their outward attributes, but that with and under these are the true Body and Blood of Christ. Going beyond this, some Protestant bodies, both in England and on the Continent, have denied that there is any real presence in the Sacrament, but assert that the latter is a simple commemorative rite to which a promise of grace is attached. The doctrine of the Reformed Church of England claims to be a reversion to that which we have described above as the ancient belief. It holds the fact of the Presence, but makes no attempt to inquire into the manner, though the Roman dogma is decisively repudiated. Without going too closely into the question, we may briefly describe the English Church doctrine. It includes the purely receptionist view, which is as follows:—Just as water in Baptism is sanctified by prayer to the mystical washing away of sins in those faithfully using it, so, in the greater sacrament, the bread and wine are consecrated by prayer to be, to those who use them according to the ordinance, the communication of the Body and Blood of Christ, which are, by such, "verily and indeed taken and received." This

doctrine is thus summed up by **Jeremy Taylor**: "The result of which doctrine is this: It is bread, and it is Christ's body. It is bread in substance, Christ in the sacrament; and Christ is as really given to all that are truly disposed as the symbols are; each as they can; Christ as Christ can be given; the bread and wine as they can; and to the same real purposes, to which they are designed; and Christ does as really nourish and sanctify the soul as the elements do the body." Something rather beyond this seems also intimated in the Church formularies, which seem to admit a representative sacrifice, and speak of the guilt of unfaithful recipients. See **RITUALISM**.

Réaumur (from René Antoine Ferchault de Réaumur, b. at La Rochelle, 1683, d. 1757). The name of one of the three scales used in thermometers. The freezing-point of water is on the Réaumur scale marked 0°; the boiling-point is marked 80°. The space between the freezing- and the boiling-point is divided into 80 equal parts, each of which is called a degree. Réaumur's reason for using the number 80 was the case with which it broke up into aliquot parts. His thermometer is still used in Germany, but not by scientific workers. To turn the Réaumur record into the corresponding Centigrade record, the number on the former scale is multiplied by 5 and divided by: e.g., 80° R. are equivalent to $80 \times 5 \div 4 = 100^\circ \text{C}$. To turn Réaumur to Fahrenheit multiply by 9, divide by 4, and add 32: e.g., 80° R. are equivalent to $80 \times 9 \div 4 = 180 + 32 = 212^\circ \text{F}$.

Red Cross, The Royal (English), was instituted for the purpose of rewarding the services of those who devote themselves to the work of nursing the sick and wounded in war. It is not confined to English subjects, and has in numerous cases been bestowed upon foreign ladies either lay or belonging to nursing sisterhoods. Among the present members are the Princess of Wales, the Empress Frederick of Germany, Lady Wantage, and Miss Nightingale. The decoration consists of a red Maltese cross, bearing the words "Faith, Hope, and Charity," and "1833," the date at which it was instituted.

Red Sea Littoral. Various points in the Red Sea and the Gulf of Aden claim attention as coming within the range of recent European politics. See various heads, **SUEZ CANAL**, **ADEN**, **PERIM**, **MASSOWAH**, **TAJURAH** etc.

Reeves, John Sims, was b. at Shooter's Hill, near London, 1821. Was early trained to music by his father, and at the age of fourteen became organist of North Cray Church. He also became a proficient violinist, and sometimes undertook the duty of orchestral leader. He studied harmony and counterpoint under Mr. H. Calcott. In his eighteenth year he made his *débüt* at Newcastle-on-Tyne theatre as the gipsy boy in "Guy Mannering" "for the benefit of the late tenor, George Barker." He subsequently obtained an engagement at the Grecian Theatre, London, where he sang under the name of Mr. Johnson; but in 1847, in "The Bride of Lammermoor," at Drury Lane, then under the management of Macready, he first showed his full powers. Although very successful, he soon left the stage for the concert-room, and in oratorio and ballad singing has achieved the highest distinction. In '43 he studied in Paris and afterwards at Milan, where he sang at La Scala. After his return

to London he soon established his reputation as the first of modern tenors. He has recently published his autobiography. He married Miss Emma Lumcombe, a well-known singer in her day. During '89 Mr. R. has been giving a series of farewell concerts.

Regina. A young prairie town, the capital of Assiniboia, and of the North-West Territories of Canada. Pop. 1,000.

Registration of County Electors (Extension of Time) Act, '89. See SESSION, sect. 110.

Registration of Marriages, Jews. See JEWS.

Registration, Parliamentary. The statute law upon this subject is contained in many Acts, the longest and most important being those of 1843, 1865, 1868, 1878, and 1885. These must be referred to for accurate information. Here only an outline of the law can be given. In order to be entitled to vote in the election of a member for parliament, one must be upon the register of the borough or county. In a parliamentary borough, if it is at the same time a municipal borough, the town clerk, and elsewhere the clerk of the peace, issues every year his precept to the overseers of the poor in every parish or township, requiring them to make out a list of those who claim to vote. Thereupon the overseers give notice requiring all persons intending to vote to send in their names by a given day. The overseers make out an alphabetical list of all claimants, and have power to object to the names of those whom they believe to be dead or not entitled to vote. Any person on the register may object to any person on the list, but must give notice of his intention so to do. The overseers are to publish a list of claimants and a list of persons objected to, and are to keep copies thereof for themselves, and to deliver copies thereof to the town clerk, or clerk of the peace, as the case may be. The town clerk or clerk of the peace is to transmit abstracts of the above lists to the revising barrister. A sufficient number of revising barristers are to be appointed every year, for London and Middlesex by the Lord Chief Justice, and for other places by the senior judge of assize. The barrister so appointed makes a circuit and holds open court for the revision of the list in each borough and at every polling place in the county. The clerk of the peace, or town clerk, and the overseers must attend. The revising barrister has power to examine witnesses on oath, to hear claims and objections, and to insert or omit names as he finds just. An appeal lies from his decision to the Queen's Bench Division of the High Court, but no further appeal is possible without its express sanction. The list of voters as settled and signed by the revising barrister is sent, in the case of a county to the clerk of the peace, who must have it printed in a book and delivered to the sheriff; in the case of a borough to the town clerk, who must have it printed in a book and delivered to the returning officer. The clerk of the peace or town clerk must keep - printed copies of the register for sale at a fixed price. The register is conclusive evidence that the persons therein named have the qualifications annexed to their respective names.

Regulation of Railways Act, '89. See SESSION, sect. 111.

Registration of Teachers. See TEACHERS' GUILD.

Reichspartei, German. See GERMAN POLITICAL PARTIES.

Reichsrath. See AUSTRIAN POLITICAL PARTIES, and AUSTRIA-HUNGARY.

Reichstag. See GERMANY, and GERMAN POLITICAL PARTIES.

Reid, Robert Threshie, O.C., M.P., was b. 1846. Educated at Cheltenham and Balliol Coll., Oxford, where he graduated B.A. '68. Called to the bar of the Inner Temple '71, and appointed Q.C. '82. Entered Parliament as Liberal member for Hereford City '80, which he represented till '85, when he unsuccessfully contested Dumfries-shire. Re-entered the House as member for Dumfries district. Mr. R. was engaged in the *Parnell Commission* (q.v.) on behalf of Mr. Dillon and other Irish members. See *PARNELL COMMISSION*.

Reid, T. Wemyss, author and journalist, born at Newcastle-on-Tyne 1842. Beginning journalistic life at the early age of fourteen, in '64 he became editor of the *Preston Guardian*, and ('70 to '86) editor of the *Leeds Mercury*, which he conducted with so much ability that it speedily ranked as one of the most influential provincial newspapers. Mr. Reid has written several highly successful books. His monograph on "Charlotte Brontë" admirably supplements Mrs. Gaskell's "Life." His novels "Gladys Fane" and "Mauleverer's Millions" commanded a very wide circulation. "Cabinet Portraits" and "Politicians of To-day" are telling sketches of leading statesmen. While France was engaged in military operations in Tunis, Mr. R. visited the country, and gave an account of his experiences in "The Land of the Boy." In addition to these larger works Mr. Reid has contributed extensively to the fugitive literature of the period. In '87 he accepted the position of general manager to Messrs. Cassell and Company (Limited). Mr. Reid's latest production is "The Life of the Right Hon. W. E. Forster," published July '88. In '89 he was engaged in preparing for a new weekly review to appear in Jan. '90.

Religious Prosecutions, Abolition Bill. See Session, sect. 118.

Religious Tract Society, The (instituted 1799), has for its object the circulation of religious books and treatises throughout the British dominions and foreign countries. The business of the Society is conducted by a committee chosen annually in London, and consists of four ministers and eight laymen, and of six trustees, half the number being members of the Church of England, and the other half Nonconformists. The Society has in its catalogue some 4,000 separate tracts and handbills, books, etc., for adults, besides books and tracts for children. The well-known *Leisure Hour* and almost equally well-known *Sunday at Home* are published by this Society. Circulation of the Society's publications for 1888-89 77,696,190. Income for 1888-89, from subscriptions, donations, etc., £27,631 8s. 4d. Grants in money, paper, publications, etc., £44,486 8s. 6d. Secs., Revs. L. B. White, D.D., and S. G. Green, D.D. Association Secs., England, Rev. Cyril Williams, Rev. Wm. Williams, Richard Butcher, Wales, Rev. Thomas Levi. Scotland, Rev. Dr. Cathcart. Ireland, Rev. William Irwin, D.D. Continent, Rev. J. Craig, D.D., corresponding, D. J. Legg. Offices, 56, Paternoster Row, E.C.

Removal of Wrecks Act, '77, Amendment Act, '89. See Session, sect. 113.

Renan, Ernesto. Born Feb. 27th, 1823, at Tréguier, Department of the Côtes-du-Nord, in Brittany. He was intended for the Church, and studied in the Seminary of Saint Sulpice, at Paris, which he left to devote himself to the study of oriental languages. He won the Volney prize with his work, "Histoire Générale et Systèmes Comparés des Langues Sémitiques." He was sent ('49) on a scientific mission to Italy, and ('51) was appointed to a post in the Manuscript Department of the Bibliothèque Nationale. He became ('56) a member of the Academy of Inscriptions. In '60 he was appointed to a mission to Palestine and Syria, which led him to investigations into the origin of Christianity. On his return he was appointed Professor of Oriental Languages in the College of France. He delivered his first lecture in February '62, and met with stormy manifestations from the Catholic students, which caused him to discontinue his professional work. In '63 he published his famous work "La Vie de Jésus," which roused the active hostility of the clerical party and led to the deprivation of his professorship. The Imperial Government offered him a good appointment in the Imperial Library, which he declined. In '70 he again became Professor of Oriental Languages in the College of France, and was elected a member of the French Academy ('78). In '80 he received the Cross of the Legion of Honour; Grand Officer (May '88). In '84 M. Renan delivered the Hibbert Lecture. He wrote in '85 "Le Frère du Némé," and on March 1st, '86, published the first part of a new work, "The Origin of the Bible," and in '86 "L'Abbesse Jouarre." His latest works are the "History of the People of Israel till the time of King David" ('89), and "Dramas Philosophiques," a series of essays in psychology in a dramatic form. He is now engaged upon "L'Avenir de la Science."

Representation of the People Act, '85. The principal provisions of this Act are as follows. (1) It established alike in boroughs and in counties throughout the United Kingdom a uniform household franchise and a uniform lodger franchise as defined by the Representation of the People Act 1867. By that Act any man of full age, and not under a special legal incapacity, who on the 31st of July in any year, and during the preceding twelve months, has been an inhabitant-occupier of any dwelling-house, and has in respect thereof been rated to the relief of the poor, has a household franchise; and any man of full age, and not under a special legal incapacity, who during a like period has resided in the same lodgings of the annual value, unfurnished, of £10, has a lodger franchise. (2) It establishes alike in boroughs and in counties throughout the United Kingdom an occupation franchise wherever the land or tenement occupied is of £10 clear yearly value. (3) It provides that where a man inhabits any dwelling house by virtue of any office or service, and the dwelling-house is not inhabited by his employer, he shall be deemed an inhabitant-occupier for the purposes of the Act. This provision creates the service franchise. (4) It provides against the multiplication of votes by creating rent-charges, joint tenancies or tenancies in common. The Act does not abolish the 40s. freehold franchise, or the ancient franchises of the boroughs. It is supposed to have enlarged the constituencies

by nearly 2,000,000 electors, 1,300,000 in England, 200,000 in Scotland, and 400,000 in Ireland. The greatest proportional increase in the number of electors is in Ireland. The present total number of electors exceeds 5,000,000, nearly one-third of the male inhabitants of the United Kingdom.

Repton School, Derbyshire. Founded 1559; re-organised 1874. Pupils, 280. Head Master, W. M. Furneaux, M.A.

Réunion. Formerly called Bourbon. A volcanic island of the Indian Ocean, adjacent to Mauritius and Madagascar, and a French colony. Area 966 sq. m., pop. 170,734. Capital St. Denis. Other large towns, St. Pierre and St. Paul. It is tropical, fertile, rich in products similar to those of Mauritius, and is one of the few French colonies which really pay. It was settled in 1649, but has several times been held by England.

Reversion. When a person who has an interest in lands or houses grants to another person a lesser interest in the same, he creates for himself what is called a reversion. Thus when the tenant in fee or tenant in tail of property grants to another person a life estate in the same property, he creates for himself a reversionary estate in fee or in tail respectively. So likewise a reversion is created when the owner of a house or farm lets it on lease, or when the holder of a lease for a longer term, say ninety-nine years, sublets the leasehold for a shorter term, say seven or twenty-one years. Thus the landlord is the reversioner of the tenant, and the reversion is generally accompanied by a right to receive rent.

"Revue des Deux Mondes". A French journal first published 1837, and appearing twice a month. Amongst the writers are the most eminent scholars in France.

Rhineland (Maien to Gerolstein) New Railway. This is a line which, without presenting any remarkable engineering features, is likely to be of considerable commercial interest, especially in view of the fact that Hamburg was included in the German Customs Union in Oct. '88, when it was also announced that Lubeck would shortly be added. The new line is intended to open up the isolated district between the rivers Rhine, Moselle, and Kyll, which is at present devoted to agriculture and cattle rearing, but has extensive forests, and is said to be very rich in stone quarries and slate pits, while basalt, etc., is also found in large quantities. Owing to the want of communications, there have been no means of rivalry with the imports of France, Belgium, and England; but the latter will now be also hampered with the new customs tariffs. The line will be a continuation of the branch line from Andernach to Maïen of the Cologne-Coblenz Railway, connecting with the Enskirchen-Treves Railway, running *via* Monreuil, Kaiserseck, Kochem, and Daun, to Gerolstein. Length about forty-one miles, cost £480,000.

Rhondda and Swansea Bay Railway Tunnel. The boring of the long tunnel on this line between Treherbert and Abergwynn in Glamorganshire was completed on March 18th, '89. The tunnel, which is said to be the seventh longest in these islands, is 3,400 yards in length, and although, owing to the great height of the mountains, no intermediate shafts could be sunk, when the headings met it is said the levels agreed to within half an inch, and the

lines were so perfect that no divergence could be detected.

Riaz Pasha, K.C.M.G., Egyptian statesman, b. about 1830, of Jewish origin, but Moslem. Appointed Minister of Public Instruction by Ismail, '73. Minister of Interior in European Ministry of Nubar, '78. Named by Ismail Vice-President of the Commission of Enquiry, '78. Dismissed from office by *coup d'état*, '78. On accession of Thewfik, '79, called upon to form ministry, acted under, and cordially with, the Dual Control until his resignation demanded by military at *émeute* February, '82. Retired to Switzerland, returned after Tel el Kebir. Became Minister of Interior in Cherif's Ministry, '82. Resigned, '83, owing to quarrel with Lord Dufferin as to Arabi trial. On dismissal of Nubar, '88, formed Ministry. Riaz Pasha is honest, has intimate knowledge of the country, is excessively hardworking, but of very narrow ideas.

Ribble Navigation. At the beginning of '85 Mr. Walker of Westminster entered into a contract with the Corporation of Preston to carry out their design of diverting the channel of the river Ribble, and constructing a 40-acre dock at Preston, for £456,000. The intention, of course, is to improve the town as a seaport, and great things are expected when the enterprise is completed. But this large sum does not by any means represent the cost of the whole work. (For the early history of the scheme, and the financial and other difficulties which arose, see ed. 89.) On Nov. 24th, '88, the Preston Corporation issued an analysis of the voting when the poll of owners and ratepayers was taken as to whether the Corporation should promote a bill in the next session of Parliament to authorise them to borrow an additional £510,000 for the Ribble works. There were 12,569 votes in favour, and 4835 against. In the early portion of the Parliamentary Session of '89 a special commission was appointed to inquire into the whole navigation scheme. The members were Sir George S. Nares, K.C.B., Sir Charles A. Hartley, M.I.C.E., and Mr. John Wolfe Barry, M.I.C.E. They issued an *interim report*, dated Oct. 5th. In brief, they considered that the dock works were practically useless until the dredging works are carried out, but they were of opinion that they should be carried out and the dock completed. They further recommended that money should be provided for purposes which they indicate to the amount of £259,000; less funds in hand, £39,000; balance, £220,000.

Richardson, Benjamin Ward, M.D., F.R.S., b. 1828, at Somerby, Leicestershire. Graduated in medicine at the University of St. Andrews ('54). Fellow of the College of Physicians ('61). In '65 he conducted an experimental research which resulted in the detection of a special poisonous product in connection with the spreading of contagious diseases, to which he gave the name of *septine*. Discovered ('66) the application of ether spray for the local abolition of pain in surgical operations. Dr. Richardson's numerous contributions to medical and scientific literature have been directed to the advancement of medical practice by the experimental method. In '68 he was publicly presented with a *testimonial*, consisting of a microscope by Ross and 1,000 guineas. His writings on hygienic matters have attracted a great deal of attention, as also have his researches in alcohol in relation to its action on

man, and on the diseases incident to modern civilisation. Dr. Richardson is a noted cyclist and President of the Society of Cyclists. Author of the *Asclepiad*. In '88 Dr. R. published a novel, entitled "The Son of a Star."

Richter, Eugen, b. at Düsseldorf, July 30th, 1838. In July '64 Herr Richter was elected burgo-master of Neuwid, but the Government vetoed the appointment. Was elected to the Constituent North German Diet, became a member of the Prussian Diet ('69), and of the Imperial German Diet ('71). In both Houses he leads the Progressist Liberals. He is an eminent authority upon finance.

Richter, Hans, b. at Raab, in Hungary, 1843. After receiving a musical education, he became conductor at the National Theatre, Munich ('68), at the Pesth Theatre ('71), and at the Court Opera Theatre in Vienna ('75). He conducted the famous Wagner Festival at Bayreuth in '76, when a shower of orders descended on him from the gratified German princes. In '80 he conducted his first concert in London, and created much astonishment by leading the greatest works entirely *memoriter*. His control over an orchestra is phenomenal. His concerts have been annually continued. He has also conducted fine performances of German operas in London. In '85 he was chosen director of the Birmingham Festival.

Right, The. See FRENCH POLITICAL PARTIES.

Ripon, Right Rev. William Boyd Carpenter, D.D., D.C.L., Bishop of, b. 1841. Educated at Cambridge, where he graduated Senior Optime ('64); Vicar of St. James', Holloway ('70), Christ's Church, Paddington ('79); Canon of Windsor ('82); Bishop of Ripon ('84). Hulsean Lecturer in '79; Bampton Lecturer in '87, when he selected the subject of "The Permanent Elements of Religion," and this was published in '89. His lordship has also written "A Commentary on the Book of Revelation." Hon D.C.L. (Oxon.) '89.

Ristić, John, Servian statesman, was b. in 1831 in Servia. He was educated in Germany, and afterwards in France. He began his official career in the Ministry of the Interior, under Prince Karageorgevitch, and soon rose to a leading position in that department. In '58 he was made secretary to the embassy sent to Constantinople by Obrenovitch III., and became afterwards Servian Envoy at the Porte. In '67 he was appointed Servian Minister of Foreign Affairs, and when Obrenovitch was assassinated he was the Envoy sent from the Provisional Government at Belgrade to bring home Prince Milan from Paris. From '68 to '72, during the minority of Prince Milan, M. Ristić was member of the Council of Regency. When Prince Milan became King M. Ristić became his Minister for Foreign affairs, and subsequently President of the Servian Council of State (see SERVIDAN POLITICAL PARTIES). In '88 M. R. resigned, and was succeeded by M. Christich. He played a very prominent part in the events that led to the Russo-Turkish war of '77-'78, and has exerted considerable influence in connection with the events which have transpired between Servia, Bulgaria, and the Powers.

Ritchie, Right Hon. Charles Thomson, M.P., was b. at Dundee, 1838. He settled in London some years ago, and joined the firm of W. & A. Ritchie & Son, East India merchants and jute spinners. At the general election

of '74 he contested the *Tower Hamlets*, which had previously been a Radical constituency, and was returned in the Conservative interest. He was again returned in '80. Since '85, when the borough was split up by the Redistribution Bill, he has sat for St. George's Division. He first brought himself into public notice by the active part he took in the Anti-Sugar Bounties Agitation (see SUGAR BOUNTIES). He also greatly interested himself in local affairs in the East End, and obtained the respect not only of his own constituents, but also of both parties in the House of Commons, for his good sense and intelligent acquaintance with practical politics. On the accession of Lord Salisbury to power after the resignation of Mr. Gladstone in '85, Mr. R.'s services were rewarded with the Secretaryship to the Admiralty. In Lord Salisbury's second administration, Mr. Ritchie was appointed President of the Local Government Board, a post which he at first held without a seat in the Cabinet, but was subsequently promoted to Cabinet rank. During the session of '88 he added greatly to his reputation for administrative ability by the success with which he carried through the Local Government Bill (q.v.), one of the most important measures ever adopted by the legislature. In October '88 Mr. R. paid a visit to his native town of Dundee, where he was presented with the freedom of the borough, and met with an enthusiastic reception.

Ritualism. The Ritualists in the Church of England may be best defined as those who advocate and adopt an abundant symbolism in public worship, in opposition to the Puritan idea which dispenses as far as possible with all outward signs or ceremonies. The Ritualist maintains that these things assist the worshipper, and render public worship more orderly and reverential. The Puritans hold that they tend to degrade the worship and distract the worshipper; substituting the form for the spirit. Strictly speaking, therefore, Ritualism is compatible with all forms of doctrine, and independent of all. But, as a matter of fact, in the Church of England an extreme Ritual is almost exclusively associated with extreme views on the Real Presence (q.v.); and the points of Ritual about which there has been the most violent contention are those which involve the adoration of Christ as present on the Altar under the forms of bread and wine. (See more fully c.d. '87.)—*Proceedings* have been commenced against the Bishop of Lincoln (q.v.), in the Court of the Archbishop of Canterbury, requiring him to cite the Bishop before his court for the following practices:—(1) The use of lighted candles when not required for the purpose of giving light; (2) Adopting the Eastward Position (q.v.) during the ante-Communion office; (3) Mixing water with the Sacramental wine used in the Holy Communion; (4) Administering water and wine so mixed to the communicants; (5) Standing in such position during the Prayer of Consecration as to hide the manual acts (see EASTWARD POSITION); (6) Permitting the singing of the *Agnus Dei* immediately after the Prayer of Consecration; (7) Making the sign of the cross over the people; (8) Rinsing the paten and chalice and drinking the ablutions. Each of these allegations describes, in set terms, a practice which has been condemned at some time or other, by one or other of the ecclesiastical courts. The decisions have, however, been somewhat contradictory, and in the result

nothing has been done to check their rapid extension in the Church of England.

Riviere, Britton, R.A., animal painter, b. in London 1820. He studied art under his father, Mr. W. Riviere, at Oxford, where he also graduated. He has exhibited regularly at the Royal Academy since '64, and many of his works have been engraved on steel, while others have been etched. Elected A.R.A. ('78), R.A. ('81). He exhibited "Of a Fool and His Folly there is No End" at the Academy, and "Prometheus" at the Grosvenor Gallery in '89.

Roadtown, Capital of the British Virgin Islands; in Tortola.

Roberts, Sir Frederick, G.C.B., V.C., son of Sir Abraham Roberts, G.C.B., was b. 1832. Appointed lieutenant in the Bengal Artillery ('52); captain ('60); served with distinction in the Indian mutiny, and received the Victoria Cross. Took part in the Abyssinian war ('68), as Assistant Quartermaster-General, and obtained the brevet rank of Lieut.-Colonel. In '72 he was made C.B. for his services in the Loosah Expeditionary Force. In the Afghan war of '78 Major-General Roberts commanded the column sent to operate through the Koorum Valley, and surmounting the difficulties of the Peiwa Pass, gained a brilliant victory at Charasiah and entered Cabul. On the investiture of Candahar by Ayoub Khan he rapidly performed the march from Cabul to Candahar (one of the most brilliant military feats of modern times), and utterly defeated the Pretender. For these services he was created ('81) a baronet, G.C.B., and C.I.E. General Roberts was sent ('81) to take command of the forces against the Boers in South Africa, but was recalled on his arrival at Cape Town in consequence of peace being made. He succeeded Sir Donald Stewart in the command of the Indian Army.

Robes, Mistress of the, has charge of the royal state robes, and superintends the robing of the Queen at state ceremonies; walks next before H.M. in processions, or rides in the same carriage as H.M. with the Master of the Horse. See MINISTRY.

Robinson, John R., editor and manager of the *Daily News* (q.v.), is the son of the Rev. R. Robinson, and was b. at Witham, Essex. He has been associated with this newspaper since '56, being for some length of time editor of the evening paper published by the proprietors of the *Daily News*, under the name of *The Express*. For many years Mr. R. was a constant contributor to the columns of the *American press*, especially to the *Boston Advertiser* and the *Chicago Tribune*. Appointed the sole manager of the *Daily News* '68, and became editor '87. In Nov. '88 Mr. R. delivered a greatly appreciated lecture at Toynton Hall, on "The Newspaper, Day and Night."

Rochester, Rt. Rev. Anthony Wilson Thorold, Lord Bishop of. The see was founded in 604, and has an income of £300. His lordship, the 9th bishop in succession, was b. June 13th, 1825; educated at Queen's College, Oxford, where he graduated B.A. ('47), D.D. by diploma ('77). Ordained deacon ('49), priest ('50), by the Bishop of Manchester, and consecrated Lord Bishop of Rochester ('77). His lordship was rector of St. Giles-in-the-Fields ('57-68), minister of Curzon Chapel, Mayfair ('68), vicar and rural dean of St. Pancras ('69-77), Canon of York and Examining Chaplain to the Archbishop of York ('74-77), Select Preacher at Oxford ('78-80). Member of

the School Inquiry Commission ('64); member of the first School Board for London ('70). Is the author of numerous sermons and pamphlets, and has written commentaries on various books of the New Testament. Among his lordship's best known works are "The Presence of Christ" and "The Work of Christ."

Rockhampton. Second city of Queensland, on Fitzroy river, 420 miles north-west of Brisbane, pop. 12,422. Outlet for a large portion of central Queensland.

Rodriguez. An island in the Indian Ocean, 344 miles east of Mauritius, of which British colony it is a dependency. Administration is provided for by a Civil Commissioner appointed by the Governor of Mauritius. Rodriguez was annexed in 1814. See BRITISH EMPIRE.

Roll of Solicitors. Every solicitor of the Supreme Court is entered on the roll of solicitors (now a book), kept by the clerk of the petty bag (see ROLLS, MASTER OF). He is "struck off the rolls" either at his own request, e.g., on retirement from practice, or for misconduct. Several solicitors have of late years been struck off the rolls for the misuse of clients' moneys, and the decisions in this respect are very stringent.

Rolls, Master of the, is the chief keeper of the records preserved at the Public Record Office (q.v.). It is an office of great antiquity (first mention A.D. 1256), and position. Originally he was merely the custodian of chancery rolls; later he acquired judicial authority in the Court of Chancery; and in recent times he shares with the vice-chancellors the hearing in the first instance of any suit; and by the Judicature Act, 1873, he was made a member of the High Court of Justice, and of the Court of Appeal. He is likewise head of the petty bag office (formerly the common law side of the Court of Chancery, now an office in the High Court of Justice), and admits solicitors of the Supreme Court.

Rolls Series. The abbreviated title of the important series of publications issued from the Record Office (q.v.). Lord Romilly, the Master of the Rolls, in 1857 proposed to the Government that the vast body of important historical material lying in the form of MSS. at the Record Office should be edited by competent writers; and the suggestion (first made in 1822 by the House of Commons to George IV.) was adopted. The series now comprises most of the principal English chronicles, and many other documents of the highest subsidiary importance to the historian, since they throw contemporary and often unbiassed light upon early events that it has hitherto been impossible to fully interpret.

Roman Catholic Church. The name of that community of Christians who profess the same faith, partake of the same sacraments and sacrifice, and are united under one head, the Pope or Bishop of Rome and successor of St. Peter, and under the bishops subject to him. Its essential parts are the Pope, bishops, pastors—so far as they are priests—and laity. The Catholic's rule of faith is the whole word of God, written and unwritten; and this as taught and explained by the Church, or by the infallible utterances of the Roman Pontiff speaking *ex cathedra*—viz. when, as "pastor and teacher of all Christians," he "defines a doctrine, regarding faith or morals, to be held by the universal Church." The distinctive characteristic of the Roman Church is the supremacy of the Papacy. Its doctrines, like

that of the rest of Christendom, are to be found, in the first instance, in the Nicene Creed; but to this, after the Council of Trent, were added, by Pope Pius IV., the article on transubstantiation, invocation of saints, and others which chiefly distinguish the Roman from other Christian communities. The Immaculate Conception of the Virgin Mary and Papal Infallibility have been made articles of faith in 1854 and 1870 respectively. One great and central object of faith and worship is the Mass, which is the mystical sacrifice of the body and blood of Christ, instituted by Himself at the Last Supper, and is essentially the same as the Sacrifice of the Cross. Scripture and tradition are appealed to in support of this and other doctrines—as the Seven Sacraments, the honour due to the Blessed Virgin, Purgatory, Invocation of Angels and Saints, etc. There is quite a distinction between what is of doctrine and what of discipline; the former belonging to the deposit of faith taught by Christ and the Apostles, which is invariable, whilst the latter, founded on the decisions and canons of councils and the decrees of popes, is the Church's external policy as to government, and may vary according to times and circumstances. The Roman Catholic Church abounds in a variety of religious orders for men and women, with constitutions suited to all tastes, times, and countries, yet practising in common, poverty, chastity, and obedience, called the "evangelical counsels"; in charitable and educational institutions, as asylums, hospitals, orphanages, schools, colleges, universities; nor does she forget the divine commission to teach all nations, for her missionaries penetrate to every corner of the world. The Sacred College of Cardinals—70 in number, after the 70 disciples—are the supreme council or senate of the Church and the advisers of the sovereign pontiff, and at the death of a pope they elect his successor. They preside over the 19 Roman congregations or departments for ecclesiastical affairs, and thus represent the Pope in the regular exercise of his pontifical authority. The total number of Catholics over the world, ruled by about 1,100 archbishops and bishops, is estimated at 220,000,000; of which there are in Great Britain and Ireland about 5,650,000 (i.e., nearly 4,000,000 in Ireland, and about 1,680,000 in Great Britain); and in the rest of Europe more than 100,000,000. Ireland is divided into four metropolitan provinces, subdivided into dioceses, each ruled by a bishop, of whom there are 27, including the four archbishops. The number of priests amounts to 3,412, who serve 2,382 churches and chapels, situated in 1,015 parishes. The 21 archbishops and bishops of Great Britain consist of: 1st, for England and Wales, 1 archbishop (of Westminster), with 14 suffragans (besides a bishop-auxiliary); and, for Scotland, 2 archbishops (one of St. Andrews and Edinburgh and one of Glasgow), with 4 suffragans. The total number of priests of England and Wales is 2,380, serving 1,306 churches, chapels, and stations; of Scotland 341, serving 322 churches, chapels, and stations. The United States has about 8,000,000 Catholics, 79 archbishops and bishops, 7,596 priests, 3,000 churches and chapels, and 500,000 pupils in parish schools. In the British possessions of North America there are about 2,200,000 Catholics, 34 archbishops and bishops, about 1,400 priests, 2,200 churches and chapels and stations, 203 academies, and 3,823 parish

schools. From statistics like these, which can be approximated to in all the other parts of the world by the bishops presiding over the different dioceses or vicariates, and are published occasionally, may be inferred how complete is the organisation of the Church, and how vigorously she exercises the forces at her command for the extension of the Catholic faith. Consult "The Catholic Directory, Ecclesiastical Register and Almanac," '90. For Papal Ministry see DIPLOMATIC.

Roman Era. The date of the foundation of Rome (April 21st, 754 B.C.) was used as the Roman Era; expressed by the letters A. U. C. (*Ab urbe conditor*).

Roscoe, Sir Henry Enfield, M.P., F.R.S., LL.D., grandson of Roscoe the historian, was b. in 1833, and was educated at Univ. Coll. London, and Heidelberg. Sir H., who was Professor of Chemistry at Owens College, '58 to '86, is chiefly distinguished for his investigations and discoveries relative to the chemical action of light, and on the metal vanadium. In conjunction with Prof. Schorlemmer he published the well-known "Treatise on Chemistry" (6 vols.). Sir H. R. is also the author of "Lessons in Elementary Chemistry," which has been translated into many languages, and of "Lectures on Spectrum Analysis." He is an Hon. D.C.L. of Oxford, an LL.D. of Cambridge, Dublin, and Montreal, an hon. M.D. of Heidelberg, member of various learned societies, and served on the recent Royal Commission on Technical Instruction, also on the Commission of Inquiry into the Pasteur method for the treatment of hydrophobia, and was, '88, appointed consulting chemist to the Metropolitan Board of Works with a view to the deodorisation of sewage at the Barking outfalls. He sits for South Manchester as an advanced Liberal. Sir H. Roscoe, who was created an Officer of the Legion d'Honneur '82, delivered the presidential address, Oct. 7th, at the Birmingham and Midland Institute on the subject of M. Pasteur's researches. In '89 appointed member of the Royal Commission on Scottish Universities.

Roseau. Capital of Dominica (*q.v.*).

Rosebery, Archibald Philip Primrose, P.C., 5th Earl of (creat. 1703); Baron Rosebery (1828), by which title he sits in the House of Lords; b. in London, '47; educated at Eton and Christ Church, Oxford; m. ('78) Hannah, dau. of the late Baron Mayer de Rothschild, M.P.; succeeded his grandfather in '68. Appointed a commissioner to inquire into endowments in Scotland ('72); Under-Secretary of State, Home Office ('81-3); elected Rector of the University of Edinburgh ('80); was Lord Privy Seal, and First Commissioner of Works ('85). On the accession to power of Mr. Gladstone in the beginning of '86, Lord Rosebery attained the distinguished post of Secretary for Foreign Affairs. He held the portfolio for only six months, until the fall of Mr. Gladstone's Government in June. Lord Rosebery has cast in his fortunes fully with Mr. Gladstone, and entirely agrees with his Home Rule policy. His lordship is a strong Radical, and though a peer, moved in '84 for a select committee to inquire into the best means of improving the efficiency of the House of Peers. As a speaker Lord Rosebery is ready and humorous, and Mr. Gladstone has publicly recognised him as one of the younger Liberals who is destined to play a great part in the history of the country. Lord Rosebery is a strong advocate of Imperial Federation (*q.v.*).

He takes a great interest in movements for the improvement of the social condition of the masses, and has recently presented a magnificent swimming bath to the People's Palace (q.v.), in the East End of London. In the summer of '88 Lord R. was the recipient of the degree of LL.D. from the University of Cambridge. Elected, with Sir John Lubbock, for the City division to the London County Council Jan. 17th, and on Feb. 12th appointed Chairman of that body, over whose deliberations he has presided with great success.

Rossall School, Lancashire. Founded 1844. Three exhibitions of £50 for three years, and three of £30 at Oxford or Cambridge offered every year. Pupils, 320. Head Master, Rev. C. C. Tancock, M.A.

Roumania. Formerly the autonomous province of Wallachia; now a kingdom under Charles I. of Hohenzollern-Sigmaringen, in whom resides the executive power. The legislature is composed of a Senate of 120 members, elected for eight years, and a Chamber elected for four years by all male citizens paying taxes. Education is free and compulsory, but still in a backward condition. Area 48,307 square miles, with a population estimated at about 5,500,000. Estimated revenue and expenditure for '88-9, 181,066,322 lei (lei=94d.); debt in '89, 788,732,489l.; imports in '87, 314,633,000l.; exports, 265,706,000l.; (For army see FOREIGN ARMIES.) Navy about twelve vessels, chiefly for purposes of Danube police. In '74 Austria, Germany, and Russia, in spite of the objection of the Porte, claimed the right to make separate treaties with Roumania. In '77 the country, in alliance with Russia, took part in a war with Turkey. At the close of the war Roumania was declared independent, received the Dobrukscha, and gave up Roumanian Bessarabia to Russia, from whom it had been obtained in '56. In March '81, Roumania was proclaimed a kingdom, and as such recognised by the Powers. In March '83 the powers of the European Danubian Commission were by treaty extended to Ibrail and the Kilia arm, and prolonged in time, Roumania protesting against the presidency of Austria in the commission.—Political. The opening of '89 was signalled by the granting of free pardons by the King to peasants convicted of taking part in the agrarian riots of '88. A convention between the Government and the Lemberg, Czernowitz, and Jassy Railway Co. was signed on Jan. 22nd. The expulsion of several Russians and Bulgarians, on the ground of plotting against a neighbouring state, took place. An attempt made by the Conservatives (25th) in the Chamber to overthrow the Bratianu Cabinet on the question of the re-establishment of the free ports of Braila and Galatz, was defeated. A loan of 32,500,000 fr., in bonds at 4 per cent. redeemable in 44 years, was decided to be issued by the Government in February. M. Bratianu was impeached in the Chamber on the 12th; the motion was defeated; but, owing to the refusal of M. Vernesco, Minister of Justice, to withdraw his appointment of partisan judges, the whole Cabinet resigned on April 3rd. It was supposed that the real reason of the decision was Russian intrigues. By an imperial decree Prince Ferdinand of Hohenzollern assumed the title of Crown Prince of Roumania. A new Cabinet was formed (15th) by M. Catargi, with anti-Austrian views. The Cabinet annulled the

decree placing foreign pedlars under police supervision. The Chamber, by 110 to 52, passed the vote of 15,000,000 fr. for the Focshani, Galatz, and Bucharest fortifications (17th) and railway. The Crown Prince arrived *incognito* at Bucharest (30th). After an animated discussion the Chamber agreed to extend for six months the powers of the commission appointed to inquire into the administration of the Bratianu Cabinet (May 29th). The Chamber of Deputies rejected, by 77 to 65, a vote of censure against M. Vernesco, Minister of Finance (June 4th). The second ballot in the supplementary election resulted in the return of the ex-Premier, M. Bratianu. The Government refused to allow the construction of a depot for Russian petroleum in transit at Turin Severin (July). The Queen of Roumania was unable to go.

she would have to be received by Prince Georges Bibesco, a pretender to the Roumanian throne. The Spanish Government suppressed its legation at Bucharest (Aug. 29th). At the autumn elections for the county and town councillors, representing four districts and holding twenty-eight seats in the Parliament, the Liberal Opposition were victorious, in consequence of which M. Catargi sought a dissolution of the Chamber (Oct. 14th). Autumn manoeuvres took place. A one-act tragedy in verse, entitled "Ulrandu," was finished by Queen Elizabeth of Roumania (Nov.) Resignation of M. Catargi on the question of the dissolution of the Chamber. General Mano, Minister of War, constructed a Cabinet (16th). The Senate opened (27th), and elected General Florescu as President. The speech from the throne spoke favourably of the position of Roumania in respect to the Great Powers. The present condition and organisation of the Roumanian army, which is based on the German model, has excited considerable attention in military circles. Consult Laveleye's "The Balkan Peninsula"; J. Samuelson's "Roumania Past and Present"; *The Statesman's Year-Book*; *the Almanach de Gotha*, etc.

Roumanian Political Parties. Party politics in Roumania are in a more or less constant state of transition. The legislative power of the country is vested in an elected Senate of 120 members, and a Chamber of Deputies containing 183 members, and elected for four years by three so-called electoral colleges or classes of voters. Those three colleges consist of (1) electors possessed of property insuring an annual income of not less than £50; (2) those paying direct taxes of not less than 20 francs annually; and (3) all Roumanian subjects of full age. Up to the end of '87 M. John Bratianu, who had held office since '75, and his following of Liberals, had been all powerful, the Conservative Opposition having practically ceased to take an active part in the affairs of the nation. In the election of Feb. '88, however, the Opposition improved its position, and in the following month the Bratianu ministry resigned, and gave place to one presided over by M. Rosetti, a prominent member of the "Junimea," or young Conservatives. The present chamber was elected in October '88, the previous one, which only had an existence of some five months, having been dissolved by the king. At that election the Government—which had the advantage of the support of several Liberal Conservatives and Independent Liberals—obtained a very con-

siderable majority in each of the electoral colleges, and reckoned upon the adhesion of some four-fifths of the Chamber. The *Bratiano* party, which comprised the *National and Dissident Liberals*, was consequently an insignificant minority, which, however, still cherished hopes of again obtaining the ascendancy should a split occur between the Ministerial Liberals and Conservatives—hopes by no means unjustifiable in view of the constantly conflicting opinions of the two governmental parties upon many important questions of policy. These differences were strongly accentuated by the political history of the year, summarised in our last article; for in April '89, owing to the intrigues of the Conservatives, the then Government was compelled to resign, and was succeeded by a purely Conservative cabinet, under the presidency of M. Lascar Catargi; and this in its turn was displaced on Nov. 16th by a new ministry under that of General Mano. For the constitution of both see *DIPLOMATIC*.

Royal Academy of Music. Established in 1822, chiefly owing to the exertions of Lord Burghersh, afterwards Earl of Westmorland, the R. A. M. was incorporated by charter in 1830. Students of all branches of music are catered for, and find ample stimulus to exertion in the large number of scholarships and prizes which are offered for competition. The chief scholarships are the *Westmorland*, open to ladies between the ages of eighteen and twenty-four; the *Potter*, open to ladies and gentlemen; the *Sternals Bennett*; the *Parpa Ross*, founded by Mr. Carl Rosa, for ladies who have not previously been students at the Academy, the successful candidate being entitled to two years' free musical education; the *Sir John Goss*; the *Thalberg*, for pianoforte students; the *Henry Smart*; the *Sainton Dolby*; the *Liszt*; the *Hing Gift*; and the *Macfarren*, for composition. *Associates* pass a qualifying examination, and are entitled to the use of the initials *R.A.M.* *Fellows* (the number is limited to 100) are elected after leaving the Academy by the Directors. They are solely entitled to use the initials *R.A.M.* *Honorary members* are entitled to the initials *R.A.M.* with the prefix *Hon.* *Principal*, Dr. A. C. Mackenzie (*q.v.*). *Sec.*, Mr. John Gill. The Academy is situated in Tenterden Street, Hanover Square, W.

Royal Academy, The, at Burlington House, Piccadilly, was founded in 1768 by George III., who gave it rooms in Somerset House. Thence it was removed to Trafalgar Square (1834), and to its present abode, which it occupies rent-free (1869). The principal objects of the Royal Academy are (1) the establishment of a well-regulated school or academy of design for the gratuitous instruction of students, and (2) the holding of an annual exhibition open to artists of distinguished merit, where they may offer their performances to public inspection, and acquire that degree of reputation and encouragement which they may be deemed to deserve. The *Royal Academy* is "a private society," supporting a school from its own resources without any grant of public money. The members are under the superintendence and control of the Sovereign, who confirms all appointments and bye-laws; and the society itself consists of 48 *Royal Academicians*, at least 30 *Associates*, and two *Associate Engravers*. The first president was Sir Joshua Reynolds, and the present occupant of the office is Sir Frederick Leighton, Bart. (*q.v.*). There is

a council of 13 members, elected annually in December. Appended is a list of the *Royal Academicians*, Jan. '90:—

The premises of the Royal Academy at Burlington House comprise a grand gallery or range of thirteen halls, besides a central octagon for sculpture, a theatre, and a large room in which the annual banquet is held—the latter always an event of much interest to the artistic world. The basement is devoted to schools of art for male and female students. The total cost of the buildings was nearly £120,000. The Royal Academy derives the whole of its funds from

holding of its annual exhibition of the pictures of living artists, which opens on the first Monday in May and continues until the first Monday in August. No works which have previously been exhibited are accepted, and the Council has the right to reject any picture it may please. The *Winter Exhibition* of art treasures in connection with the Royal Academy was established in 1869, paintings being liberally lent by private individuals. The result is that a really admirable collection of masterpieces is usually brought together. The exhibition remains open from the first Monday in January for a period of nine weeks. The fine library and books of prints belonging to the Academy are open to students and the general public at certain hours. The *Diploma and Gibson Galleries*, reached by a staircase to the right of the entrance hall, contain the works presented by each member as a specimen of his ability on his election as a Royal Academician; the works of J. Gibson, R.A., bequeathed by him; several interesting pictures of old masters, and some fine pieces of sculpture.

Royal Agricultural Society of England. This, the premier agricultural society of the United Kingdom (though not the oldest established) was founded by Royal Charter on the 26th March, 1840. The Charter gives a long list of the national objects which the Society was intended to promote, and which have been well embodied in its motto,

"*Practice with Science.*" The results of the Society's efforts for what the royal warrant calls "the general advancement of English agriculture" have been great and striking. It would be impossible in this brief record even to enumerate all the improvements in the different breeds of live stock, and in agricultural machinery, which have arisen from the annual competitions in the Society's showyards, or the advances in scientific knowledge as to the cultivation of the soil, which the Society's experiments and grants to investigators have brought about. It has two sides to its work: (1) The practical, the chief feature of which is its annual shows, to which the best pedigree animals are brought to compete for the valuable prizes offered by the Society, and still more for the honour of being "Royal" prize-

cases of disease amongst cattle, sheep, or pigs. Members can also consult the professors of the Royal Veterinary College at fixed rates, and have the privilege of sending cattle, sheep, and pigs to the College infirmary. The Society makes annually a considerable grant from its general funds in order that members may obtain at low rates analyses of feeding stuffs, artificial manures, soils, &c., by the Society's consulting chemist (Dr. J. Augustus Voelcker). Members may also consult Dr. Voelcker either personally or by letter at a small fee. Reports can be obtained by members from the Society's consulting botanist (Mr. W. Carruthers, F.R.S.), on the purity of seeds, and on diseases or weeds affecting farm crops, at a fee of one shilling in each case. The determination of the species of any insect, worm, or other animal which, in any stage of its life, injuriously affects farm crops, with a report on its habits and suggestions as to the methods of prevention or remedy, is made for members by the Society's consulting entomologist (Miss Eleanor A. Ormerod) at a fee of half a crown. The fiftieth annual show of live stock, implements, and farm produce was held in the week commencing June 24th, '89, on a portion of Windsor Great Park, the use of which for the purpose was specially granted by Her Majesty, who, in her capacity of President, attended the show no less than four times, and knighted its honorary director, Mr. (now Sir) Jacob Wilson, of Chillingham Barns, Belford, Northumberland. The exhibition thoroughly fulfilled the intentions of its promoters in being completely representative of the whole art of agriculture as practised in this country, for the finest specimens were shown, there of every established breed of horses, asses, cattle, sheep, goats, pigs, and poultry known in this country; and there were numerous exhibits of butter and cheese, wool, hops, cider and perry, hives, honey, corn, jams, preserved fruits, and other produce. It was, in fact, the greatest agricultural exhibition which has ever been held. The Exhibition of the Society for '90 will be held at Plymouth, commencing on June 23rd, and the list of prizes, if not so extensive as at Windsor, will follow much the same lines. This will be the second show held by the Society at Plymouth, the previous visit having been in '65. In Oct. '89 it was announced that the Order du Mérite Agricole had been conferred on Sir J. Wilson, Mr. E. Clarke, and Mr. H. F. Moore.

Royal Assent. See PARLIAMENT and PARLIAMENTARY PROCEDURE.

Royal Aquarium. See COUNTY COUNCILS, sect. 3.

Royal Commission on the Army and Navy. The following are the members of the Royal Commission on the Army and Navy: Chairman, Rt. Hon. Marquis of Hartington, M.P.; Rt. Hon. Lord R. Churchill, M.P.; Rt. Hon. W. H. Smith, M.P.; Rt. Hon. H. Campbell Bannerman, M.P.; Lord Revelstoke; T. H. Ismay, Esq.; Lieut.-Gen. H. Brackenbury, C.B.; Rear-Admiral Sir F. W. Richards, K.C.B.; Sir R. Temple, Bart., G.C.S.I., M.P. Joint Secs., Capt. W. H. Hall, R.N., and Major G. S. Clarke, R.E., C.M.G., 10, Downing Street, S.W. The report of the Commission has not yet been issued.

Royal Commission on City Companies. See CITY GUILDS.

Royal Commission on Crofters. See CROFTERS.

Botanical, Entomological, and Veterinary experts in order that its members may have at low rates the best scientific advice obtainable. It controls, moreover, an experimental farm at Woburn, at which elaborate investigations into crops, soils, feeding stuffs, and other matters connected with agriculture are carried on. Its *Journal* has from the first taken high rank amongst scientific publications, and contains in each number articles by leading authorities on the most important agricultural questions of the day. The R. A. S. gives prizes and Scholarships for competition by agricultural students and pupils at county and middle-class schools, and seeks in many other ways to foster the study of agriculture. The list of past presidents contains the names of some of the most influential landowners and most prominent agriculturists in the country, including H. M. the Queen (who graciously placed herself at the head of the Society during its recent jubilee year), the late Prince Consort, the Prince of Wales, two Dukes of Richmond, Mr. Philip Fusey, Mr. C. Holland (the founder of the Royal Agricultural College), and many others whose names are household words in the annals of English agriculture. The governing body of the Society consists of a president (elected annually), twelve trustees, twelve vice-presidents, and fifty members of council, half of whom go out of office each year. The Council meets once a month at the Society's house, 12, Hanover Square, and the business is divided amongst a large number of committees. Three general meetings of members are held in each year: one on the 22nd of May (the anniversary meeting); one in the Society's showyard in the summer; and one in December, usually on the Thursday of the Fat Cattle Show week. Members number about 11,000. — large accession having recently taken place in view of the Jubilee year of the Society. Membership of the Society entitles to the use of a large and well-stocked library of standard books on agricultural subjects, and a reading-room, at which the principal agricultural newspapers and other periodicals can be consulted by members. Provincial veterinary surgeons have been appointed by the Society in each county, for the purpose of enabling members to engage skilled veterinary advice, in

| c. Mary Adelaide, Duchess of Teck. (<i>One dau. and three sons.</i>) | 1833 | | | Francis, Duke of Teck. | 1866 | £5,000. |

* £25,000; Privy Purse, £60,000; household salaries, £131,260; household expenses, £172,500; Royal bounty, £120; Unappropriated £8,000—£539,000. This does not represent Her Majesty's entire income and expenditure, which is considerably supplemented by the Duchy of Lancaster revenues (according to the last statement based about £50,000) — 1/3 of certain of the Royal palaces (those wholly and partly occupied by the Queen, and those by pensioners), Royal yachts, escorts, freedom from taxes, etc., etc. There was also granted during 1887-8 the sum of £25,470 for Civil List Pensions (see CIVIL LIST and FINANCE NATIONAL). † The Prince of Wales receives also the Duchy of Cornwall revenues, which in 88 amounted to £61,971.

Royal Colonial Institute. The growth of the R. C. I. (founded '68) since its incorporation by royal charter in '78 has been very rapid. In '78 it numbered 800 fellows, with an annual income of £1,331. In '89 the number exceeded 3,900, with an annual income of nearly £7,000 exclusive of the building fund. The fact that the Prince of Wales is President of the Institute has given it much additional prestige, more especially as His Royal Highness has shown much interest in its progress. The Duke of Manchester is Chairman of the Council. Amongst the Vice-Presidents are numbered the Dukes of Argyll, Buckingham, and Sutherland, Lord Granville, Lord Rosebery, and others. The Council is composed of gentlemen well known in connection with the Colonies; and Capt. M. F. Osmanney, the senior Crown Agent for the Colonies, is Treasurer. The objects of the R. C. I. are thus officially set forth:—"To provide a place of meeting for all gentlemen connected with the Colonies and British India and others taking an interest in Colonial and Indian affairs; to establish a reading-room and library, in which recent and authentic intelligence upon Colonial and Indian subjects may be constantly available, and a museum for the collection and exhibition of Colonial and Indian productions; to facilitate interchange of experiences amongst persons representing all the Dependencies of Great Britain; to afford opportunities for the reading of papers and for holding discussions upon Colonial and Indian subjects generally; and to undertake scientific, literary, and statistical investigations in connection with the British Empire. But no paper shall be read, nor any discussion be permitted to take place, tending to give the Institute a party character." The new premises in Northumberland Avenue are commodious, well furnished, and fully supplied with Colonial and other newspapers, books, and statistical information; and in the discussion of questions of Colonial interest the Institute is taking an increasingly prominent part. Amongst the matters which engaged the special attention of the Council in '88-9, were the Investment of Trust Moneys in Colonial Government Stocks, the Effect upon Colonists of the English Legacy and Succession Duty Acts, the abolition of Foreign Bounties on the exportation of Sugar; the publication, under the auspices of the Institute, of a series of Educational Works relating to the Colonies; and the celebration of the twenty-first anniversary of the foundation of the Institute. The papers read during '89 included "South Africa as a Health Resort," by Dr. E. Symes Thompson; "Colonisation," by Mr. W. Gisborne; "British West Africa and the Trade of the Interior," by Mr. H. H. Johnston; "Western Australia," by Mr. A. P. Hensman; "Australasian Public Finance," by Mr. W. Westgarth; "Canadian Lands and their Development," by Mr. H. F. M. re; "Tasmania, its Resources and Prospects," by Mr. E. N. C. Braddon; and "The Native Princesses of India and their Relations with the British Government," by Sir Lepel Griffin, K.C.S.I.,—which are published in the *Proceedings* of the Institute, and are of a very interesting description. The charter and rules of the Institute provide that there shall be three descriptions of fellows—resident, non-resident, and honorary. The admission of gentlemen as fellows is by proposal and recommendation, according to a printed form, these forms being subscribed by at least two fellows and exhibited

for a week in the Institute prior to the election. The resident fellows pay an entrance fee of £3 and an annual subscription of £2; the non-resident fellows pay an entrance fee of £1 rs. and an annual subscription of £1 rs. (increased to £2 when visiting the United Kingdom); and these fees can be compounded by resident fellows paying £20 and non-resident £10. On the 10th Oct., '89, there were 1,200 resident and 2,131 non-resident fellows. The Library contains some 10,000 vols. and pamphlets, and is made readily accessible by the publication of a printed catalogue. Office: Northumberland Avenue. Sec., J. S. O'Halloran.

Royal Commissions. With the exception of that on the Army and Navy, the Royal Commissions recently appointed will be found under the headings of their respective subjects.

Royal Dublin Society. This scientific society was founded in 1781, and incorporated by royal charter in 1749. It has, as associated bodies, the Royal Geological Society of Ireland and the Dublin Scientific Club. It issues "Transactions" and "Proceedings," and meetings are held monthly during the session. President, Earl of Rosse, F.R.S.

Royal Grants. See SESSION, sect. 47.

Royal Household. The principal officers of H.M. Household change with each administration. A list of them is given under that heading, while an outline of the duties of each will be found alphabetically arranged throughout the work.

Royal Indian Engineering College, The. Cooper's Hill, is primarily maintained under the orders of the Secretary of State for India in Council, to educate candidates for Government service in the Indian Public Works, Telegraph and Forest Departments; candidates for the last-named department are selected under special arrangements. Nominations to the Indian Telegraph Department are made from among the engineer students at the College at the end of their first year of study. About 50 engineer students are admitted yearly to the College. Candidates for admission must be between the ages of 17 and 21 years on the 1st day of July of the year of admission, and of good moral character; they must have received a good general education, and have attained to a sufficient degree of proficiency in elementary mathematics to enable them to follow the College course with advantage. The collegiate year usually begins at the end of September. Applications for admission as engineer students can be made at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. Candidates whose applications are found satisfactory as to age and character undergo an examination, the subjects of which, with all other information, may be obtained at the College, Cooper's Hill, Staines. Sec., J. G. Whiffin, R.N. The College course in Engineering extends over three years, that in Forestry over about 26 months, and that in Telegraphy over two years. The appointments to the Indian services offered by the Secretary of State for India are awarded on the completion of each course to duly qualified successful candidates, subject to the conditions as to physical fitness. The Secretary of State for India offers a certain number of appointments in the Indian Public Works Department and the Indian Telegraph Department, which are annually advertised in the public papers.

Royal Institute of Painters in Water Colours. This Society was founded in 1831, and formerly held its exhibitions in Pall Mall, but in the spring of '83 moved to more commodious galleries at 189, Piccadilly. There is an annual exhibition of water colours every year, commencing the third week in March. The walls are open to artists whose works are approved, and members are elected according to the merit which their productions display. **President**, Sir James D. Linton; **Vice-President**, H. G. Hine; **Sec.**, W. T. Blackmore. **Office**, *v. supra*.

Royal Institution of Great Britain. The. Founded 1799, and incorporated 1800, "for the diffusing knowledge and facilitating the general introduction of useful mechanical inventions and improvements, and for teaching, by courses of philosophical lectures and experiments, the application of science to the common purposes of life." The Institution was enlarged in 1810. The library contains about 50,000 volumes. Amongst the lecturers have been Dr. Garnett, Dr. Thomas Young, Sir Humphry Davy, Dr. W. T. Brande, Michael Faraday, and John Tyndall. The first president was Sir Joseph Banks. There is a fund for the promotion of experimental researches. Admission obtained by ballot; £5 5s. entrance; £5 5s. subscription. **House**: Albemarle St., Piccadilly. **President**, The Duke of Northumberland, K.G., D.C.L., I.L.D. **Sec.**, Sir F. Bramwell, Bart., D.C.L., F.R.S., V.P.

Royal Irish Academy. A celebrated scientific and literary society, meeting in Dublin, incorporated by royal charter of Geo. III. 1786, and having upwards of 400 members. Academy publishes "Transactions" and "Proceedings," containing papers on Science, and Polite Literature and Antiquities—and supervised by committees of 11 and members respectively. The publications will in future appear together and not in separate sections. **President**, Rev. S. Haughton, M.D., F.R.S. **Sec.**, E. P. Wright, M.A., M.D.

Royal Masonic Benevolent Institutions and Funds. See FREEMASONRY.

Royal Scottish Academy (incorporated in 1838) during '89 applied for a new charter, by which (if granted) it will consist of three orders—Academicians, Associates, and ordinary members—but the 30 Academicians will be elected by a general assembly of the Academy. It also reduces the number of pictures which each member of the Academy is entitled to exhibit in the annual exhibition from seven to five. The charter applied for contains many other changes.

Royal Society, Burlington House. A society formed for the pursuit and spread of science (incorporated in 1662 by Charles II.), now famous throughout Europe. Meetings for reading and discussing scientific papers are held weekly on Thursday afternoons from November to June. Candidates for fellowship must be recommended by a certificate, supported by the written names of six Fellows. Fifteen of the candidates are annually elected in June by ballot. The Society awards the Copley, Royal, Rumford, and Davy medals, each annually, with the exception of the Rumford, which is given in alternate years. The Copley is the most highly prized, and may be awarded to Englishmen or foreigners, and only goes to distinguished savants. Among the recipients have been Chevreul, Helmholtz, Darwin, Hooker, Huxley, and (last year) Rev.

G. Salmon, D.D. Among the presidents have been

Humphrey Davy; Sir G. Gabriel Stokes, Bart., M.A., M.P. (*q.v.*), is the present president. There are now upwards of 450 English Fellows and 50 Foreign Members. Fellows elected, '89:—John Aitken; Edward Ballard, M.D.; Alfred Barnard Basset, M.A.; Horace T. Brown, F.C.S.; Latimer Clark, M.I.C.E.; Prof. David Douglas Cunningham, M.B.; Lazarus Fletcher, M.A.; William Botting Hemsley, A.L.S.; Charles Thomas Hudson, LL.D.; Prof. Thomas McKenny Hughes, M.A.; Edward B. Poulton, M.A.; Prof. William Johnson Sollas, D.Sc.; Charles Todd, M.A.; Herbert Tomlinson, B.A.; Prof. Gerald F. Yeo, M.D. The rooms of the Society are enriched with busts and paintings, while the library contains 50,000 volumes, and there is a unique collection of relics, many of which relate to Sir Isaac Newton. **Secs.**, Prof. M. Foster, M.D., and Lord Rayleigh, D.C.L., Burlington House, Piccadilly, W. Consult "Encyclopedia Britannica," 9th ed.

Royal Society of Painters in Water Colours. The older of the two Water Colour Societies was founded in 1804, and has held exhibitions annually since that date. The Summer Exhibition is opened to the public towards the end of April, and the Winter Exhibition, which chiefly comprises sketches and studies, opens on the 3rd of December. Sir John Gilbert, R.A., R.W.S., is the President, and the number of members is forty, while the number of associated exhibitors is unlimited. The exhibitions of the Society, which are held at their galleries, 5A, Pall Mall East, S.W., are confined to the works of members and associates. **Deputy-Pres.**, A. W. Hunt, F.R.G.S., R.W.S.; **Sec.**, Alfred D. Fripp, R.W.S.; **Assist. Sec.**, George L. Ridge. Attached to the Society is an "R.W.S. Art Club" established 1894, for the purpose of holding a series of *Conversazioni*, to which members are invited to send works of art for exhibition. **Pres.**, Sir John Gilbert, R.A.; **Vice-Pres.**, A. W. Hunt, R.W.S.; **Sec.**, Aubrey Stewart, 71, Mornington Rd., N.W. **Office**, 5A, Pall Mall East.

Royal Yacht Squadron. See YACHTING. **Royalties** are payments which the lessee or producer agrees to make to the patentee, author, artist, or owner of a patent, copyright, mine, etc., in consideration of the right of working the same to his own advantage. In the case of copyrights and patents, the "property" in the right frequently passes to the lessee thereof, notably in questions of copyright (*q.v.*).

Royalty Deceased (Dec. 1st, '88, to Nov. 21st, '89). See OBITUARY.

Rose-Mapleson, Mrs. Marie, b. 1851; first appeared in public at Paris ('65), where she became a great public favourite. She sang at many of the Imperial concerts, including the last given at the Tuileries by the Emperor. Remained in Paris during the siege by the Germans, and frequently enlivened the beleaguered citizens by singing patriotic songs during the bombardment. At the termination of hostilities she was presented by M. Thiers and Marshal MacMahon with a gold medal, for distinguished bravery. After a brilliant tour in Belgium she was engaged by Col. Mapleson, of Her Majesty's Opera, and from that time she has been one of the most popular artists on the English operatic stage. She concluded

her engagement with Mr. Carl Rosa in the summer of '88. In the spring of '89 she made a successful tour in France. Married Henry, eldest son of Col. Mapleson ('77).

Rubinstein, Anton Gregor, was b. near Jassy, 1829. His parents were Russian Jews. At the age of twelve he played in London, which he visited again in '57, and on later occasions. As a composer Rubinstein is very prolific; his "*Ocean Symphony*" is the best of several such works for full orchestra; and for the stage he has composed many operas, the most popular being the "*Demon*," "*Dimitri Donaskoi*," and "*Nero*." He founded the *Conservatoire de Music* at St. Petersburg in '62, of which he is the present director. The late Tzar ennobled him in '69. The jubilee of his public service was celebrated by a *fête* at St. Petersburg Nov. 18th, '89. It is intended to build a new hall in his honour with the funds of the *Conservatoire*.

Rudler, Frederick William, b. in London 1840. Appointed Curator of the *Museum of Practical Geology* in '79, and Professor of Natural Science in the University College of Wales from '76 to '79. President of the Anthropological Department of the British Association at Swansea '80. Director of the *Anthropological Institute*, and editor of its journal. Joint editor of Ure's "*Dictionary*" (3 vols., 1875), and of Stanford's "*Europe*" ('85). President of the *Geologists' Association* '89.

Rugby School. Founded by Lawrence Sheriff, a native of Rugby (1567), and originally intrusted to two trustees, in place of which twelve gentlemen of Warwickshire were appointed by Commissioners under the Great Seal in 1614. The boys are divided into *foundations* and *non-foundations*. Has, every July, 7 exhibitions tenable for 4 years, 3 of £60 and 4 of £30 annual value. Pupils, 440; admission at the age of 12. **Head Master**, Rev. Canon John Percival, LL.D. *Motto*—*Nihil sine laborando*. Some distinguished alumni—Sir Ralph Abercrombie; Cave, Dr. Johnson's friend, and originator of *The Gentleman's Magazine*; Macready, the celebrated actor; Dr. S. Butler, afterwards Master of Shrewsbury School; Landor; Tom Hughes; Lord Derby; Lord Selborne. In '89 it was decided to establish a *Home Mission*, in addition to the Fox Memorial Scholarship in India, in connection with the School. Consult *Rugby School Register*.

Rules of Procedure. See PARLIAMENTARY PROCEDURE.

Rural Dean. See DEANS.

Rural Labourers' League was inaugurated at a public meeting held at Birmingham in '88, the Rt. Hon. J. Chamberlain in the chair. The objects of the League are.—To assist in putting into operation the Allotment Acts of '82 and '87, and other measures passed by Parliament for the benefit of the rural population; to secure such amendments of these Acts as experience may prove to be necessary; to assist every practical effort to secure a more direct connection of the agricultural population with the soil; and generally to improve by all legitimate means the social and material condition of the rural labouring population with a view of making the village life of the country more prosperous and attractive. Offices: 95, Colmore Row, Birmingham. Pres.: Jesse Collings, M.P. Sec.: A. E. Stanton. The Vice-Presidents include the Duke of Fife, Lord

Hartington, and other prominent members of the Liberal Unionist party.

Rural Nursing Association, The, is formed for the purpose of supplying trained widwives and sick nurses (for non-infectious cases) in districts remote from medical aid. A trained midwife and sick nurse is at work in the district comprising Kemerton, Bredon, Overbury, and Beckford, with hamlets, and also in the district comprising Gotherington, Bishop's Cleeve, and hamlets. Other districts are in course of formation. Hon. Sec., Mrs. Elizabeth Malleson, Dixton, Winchcombe, Cheltenham.

Ruskin, John, M.A., LL.D., b. in London 1819. Educated at Christ Church, Oxford, where he gained the Newdigate prize ('39). Having early developed a taste for art, he studied with great success under Copley Fielding and Harding, and having become enamoured of Turner's paintings, then but little appreciated, he commenced a letter in defence of Turner, in response to an attack made on him in *Blackwood's Magazine*. This developed into the celebrated work "*Modern Painters*," vol. i. (1843), which obtained a great success, though it evoked some sharp criticism on the part of those who dissented from his views. He resided for some time in Italy, and subsequently published the remaining volumes of "*Modern Painters*," making five (issued all in '46-60). These contained valuable illustrations by himself, and the books are now rare, though a new edition is now (Dec '88) in course of re-issue. He had previously ('49) written "*The Seven Lamps of Architecture*" and "*The Stones of Venice*" ('51-53); both books have been reprinted—the former in '80, and the latter in April '86. He has also written extensively on economic and other questions, and recently has been engaged upon his autobiography, which he is bringing out at very irregular intervals under the title of "*Præterita*." In '87 he published "*Hortus Inclusus: Letters from Mr. Ruskin to the Ladies of the Thwaites*." A new edition of "*Modern Painters*" appeared in Feb. '89, which led to some contention, owing to the previously understood intention of the author not to re-issue it. For fuller particulars see ed. '89. A "*Ruskin Bibliography*" is being issued under the editorship of Mr. Thomas Wise.

Ruskin Reading Guild, The, was formed in '87 (1) to diffuse a knowledge of the writings of Mr. R. and of the authors on whom he looks as his masters, and (2) to promote by the method of association, careful and thoughtful reading and study of good literature. There are various branches in Great Britain. Organ, the *Ruskin Reading Guild Journal*. Editor and Gen. Sec., W. Marwick, Hillside House, Arbroath, N.B.

Russell, Dr. W. H., born at Lily Vale, co. Dublin, 1821. Entered Trin. Coll., Dublin and while there commenced his connection with the *Times*. Called to the English bar ('50). Correspondent of the *Times* in the Crimea ('54-55) and was engaged in similar capacity during the progress of the *Indian mutiny* ('57-58), and its suppression, which afterwards was fully described in "*My Diary in India*." In '61-62 he was in the *United States* as correspondent of the *Times* during the civil war of Secession. In 1866 he corresponded with the *Times* from the Austrian headquarters during the *Prusso-Austrian war*. In the *Franco-German war* ('70-71) he was correspondent at the

headquarters of the Crown Prince. In '58 he established the *Army and Navy Gazette*. Many records of his journeys have appeared. He presided at the annual dinner of the Press Fund last year, and was supported by a large company of old comrades in journalism.

Russell, Sir Charles, Q.C., M.P., was b. 1833. Educated at Trin. Coll., Dublin. Commenced his career in the gallery of the House of Commons as parliamentary leader-writer to a Catholic journal. Called to the bar at Lincoln's Inn ('59); appointed Q.C. and elected Bencher of Lincoln's Inn ('72). Returned in the Liberal interest as member for Dundalk ('80-85); South Hackney ('85 and '86). **Attorney-General** in the late Gladstone administration (Feb. '86), when he received the honour of knighthood. As a sound lawyer, acute cross-examiner, and persuasive advocate Sir Charles Russell is without a rival at the English bar. He takes a lively interest in sporting matters; and when the dispute arose about Bend Or, he was offered a brief both for the plaintiff and defendant. He was one of the leading counsel in the Chetwynd and Durham arbitration case, and defended the prisoner in the famous Maybrick murder case Aug. '88. Sir Charles increased his reputation in '88 by his masterly oration at the **Parnell Commission**, where he appeared, with Mr. Asquith, M.P. (*q.v.*), as counsel for Mr. Parnell. He recently expressed his sympathy with the struggle of the tramway men for shorter hours. See **PARNELL COMMISSION**.

Russell, W. Clark, novelist, was b. in New York, 1844, but is of English parentage, being the son of Mr. Henry Russell, the author of "Cheer, Boys, Cheer." Went to sea at the age of thirteen, as a midshipman, and made several voyages to Australia, India, and China. He abandoned a naval career in '65, and ten years later achieved his first literary success in "John Holdsworth, Chief Mate." The warm welcome given to this book led Mr. R. to draw further on his nautical experiences, and his other works include "The Wreck of the *Grosvenor*," "A Sea Queen," and "Jack's Courtship." He has also contributed to the *Daily Telegraph* many sketches of voyages and naval incidents under the pseudonym of "A Seafarer," but since '88 his connection with that journal has ceased. His latest works are ('89) "Marooned," "The Romance of Jenny Harlowe," and "Betwixt the Forelands."

Russia. One of the largest of the military powers of Europe. Has a European area of 2,095,504 sq. miles, or, with Asiatic possessions, 8,044,100 sq. miles. The total population ('87, latest return) is 107,787,235 people. The fifty governments of **European Russia** contain 81,725,185 people, the Vistula Province (Poland) 7,060,304, Finland 2,176,421, the Caucasus 7,284,547, Siberia 4,313,680, and **Central Asian possessions** (Turkestan and Transcaspia) 5,327,098. The Slavs constitute more than two-thirds of the population (nearly 70,000,000), of whom 5,000,000 are Poles; the rest of the population being made up of Lithuanians, Finns, Germans, Tartars, Jews, Armenians, and a variety of Asiatic peoples. The state religion is Greek Church. The orthodox number 60,000,000, Russian-Greek dissenters 15,000,000, Roman Catholics 9,000,000, Protestants 5,000,000, Jews 3,000,000, Mahometans 3,000,000, and Buddhists, etc., the remainder. **Revenue** ('88), 985,000,000 r. (rouble = 2s.); **expenditure**, 875,000,000 r.; ex-

ports, 488,484,000 r.; imports ('86), 438,206,000 r. The Government is an Autocracy, the Tzar being the supreme ruler and legislator, and the only source of power in the body politic. The administration is divided into eleven departments, with a minister at the head of each, nominated by the Tzar, each being separate and independent in its respective branch. The **State Council**, a permanent body composed of a number of high officers nominated by the Emperor, and presided over by a member of the imperial family (now by the Tzar's uncle, Grand Duke Michael Nicolaevitch), institutes and elaborates all laws. The State Council has only a consultative voice, its opinions being presented for the decision of the Emperor, who agrees either with the majority or the minority. The State Council has no right of proposing any new law or measure *motu proprio*, the right of initiative belonging to the respective ministers acting under the direct supervision of the Emperor. The **Senate** of the empire, which formerly united the attributes of the State Council and the present Ministry of Control, is now only a superior court of appeal. Ecclesiastical concerns are administered by the **Synod**, a body of high church dignitaries, controlled and directed by the "Procurator of the Holy Synod"—a civil or military general representing the civil power, to whom the Synod is completely subjected. The Government does not interfere with the doctrinal questions of the orthodox Greek Church, nor is the Tzar the Pope of the Russian Church, as is sometimes erroneously affirmed. **Local administration** emanates from the central governing body. Russia is divided into sixty-three provinces, fourteen regions—having each at its head a governor, and possessing representatives of juridical and ecclesiastical power. After the emancipation of the serfs (1861) the popular element was, in a limited degree, introduced in some branches of public function in Russia Proper. (See ed. '89.) The **Grand Duchy of Finland** is the only country in the Tzar's dominions possessing a species of home rule. The four orders send their deputies for a short legislative session every five years. Though dependent on the will of the Tzar in its general functions, the Finnish representative body and the Senate possess important immunities in the right of nominating, directing, and controlling the local administration. (For history '71-89 see previous eds.)—'89. **POLITICAL**. In Jan. the Russian press was forbidden to discuss Count Tolstoy's proposal to place a new and powerful official in each provincial district. **M. Greifenhagen**, formerly Governor of Reval, was dismissed for neglecting to use the Russian language. The **Russian Budget** for '89 showed, instead of a deficit, there was to be a surplus of 4,500,000 roubles, being the difference between 861,300,000 roubles ordinary revenue, and 856,800,000 roubles ordinary expenditure. The extraordinary expenses in the present Budget are estimated at 34,206,082 roubles, and it is well worthy of note that they are for once very specifically defined as being for the construction of railways and ports. To cover these thirty-four millions there are only about ten millions of extraordinary receipts, and the remainder is to come out of available funds in the Exchequer. It was stated (Feb. 5th) that Polish tradespeople had been forced to undertake not to speak Polish. A ukase was issued

promulgating a new scheme, by which the provincial councils would be entirely under the control of the landholding nobility. **Russian language** introduced into the **Baltic provinces**, and the German private school at Griva ordered to be closed (11th). The Tzar and Court attended a ball given by Sir R. Morier. M. Zankoff, Bulgarian party leader, received by the Tzar (12th). The *Messenger* published an official communication denying any Government connection with Capt. Atchinnoff (24th). **Ukase** issued (March 8th) authorising the Minister of Finance to issue the first series of the new Four per Cent. Consolidated **Railway Loan** to the nominal amount of 175,000,000 gold roubles, for the conversion of the Consolidated Russian Railway bonds of '70, '72, '73, '84, and more particularly those of '71. Minister of Ways and Communications instructed to prepare plans for a railway through **Siberia**. Considerable anxiety caused by the threats of the Nihilists in April, it being believed that a plot existed for the assassination of the Tzar. In consequence of discoveries compromising the heads of the secret police, M. Poutiline, Chief of the Department, was replaced by M. Vinogradoff (29th). Order given for the construction of two great ironclads—the *Gangout* and the *Emperor Nicholas*. The report of Sir R. Morier on Russian Finance attracted much attention during May. The Prince of Montenegro and his son, Prince Danilo, arrived at St. Petersburg (22nd). **Grand reception of the Shah** at St. Petersburg on his arrival from Moscow (23rd). The Tzar directed that proceedings against officials in connection with the **Borki railway accident** should be stopped (27th), adding that the unsatisfactory condition of the line should serve as a warning to other railways. Japanese Mission arrived at St. Petersburg (June 5th). The Council approved the scheme for the reform of the judicial system of the Baltic provinces. It was stated that the army was to be supplied with new small calibre rifles, to be ordered in France (26th). The Tzar and Tzarina left for **Sveaborg** to witness the naval manoeuvres of the Baltic Squadron (14th). The new reform scheme of the Baltic provinces promulgated. The reform consisted chiefly in the abolition of the old local German courts and system of judicature, controlled by the German barons, and the introduction of the Russian judicial code of '64, thus assimilating the legal procedure to that of the rest of the nation. The scientific expedition of Colonel Pevtsoff to Thibet was stopped by the Chinese authorities at Kashgar (25th). General Count Ignatieff was appointed Governor of Kieff. It was announced (Sept. 27th) that Russian troops were advancing towards the Austrian frontier. The commerce of Sebastopol is to be transferred to Feodosia, the former being retained for military purposes. By Imperial ukase 13,820,000 credit roubles were ordered to be paid to the Imperial Bank (Oct. 28th). Celebration of the 25th centenary of the introduction of cannon into Russia.

—**GENERAL**. The Princess Lievna had a narrow escape from being run over by a train (Jan.). A new Russian weekly review, the *Slav News*, appeared (12th). On New Year's Day (13th) the Tzar distributed thousands of decorations. The first grand ball of the season, in the Winter Palace, took place (29th). **Requiem** for the Crown Prince Rudolph at St. Catherine's Church (Feb. 5th). Major-Gen. Kalakoutski died (7th). **Tzar's birthday** celebrated (March 17th). Count Peter Schouvaloff died (22nd); Sir R. Morier and suite present at service for the dead. Count Dimitri Andreievitch Tolstol, Minister of the Interior, died (May 7th). The Tzar and Tzarina attended the funeral (10th). The Tzar presented the Shah with a miniature portrait of himself, set in brilliants. **Betrothal** of the Princess Miliza of Montenegro to the Grand Duke Peter Nicolaievitch (June 5th). **Congratulations** passed by telegraph between the Tzar and Tzarina and the Princess Milena of Montenegro (7th). The Prince was appointed hon. col. of the 15th Russian Chasseur Regt. The Duke of Edinburgh arrived at the Peterhof (July 26th). The Prince and Princess of Montenegro, with the Princess Miliza and her future husband, arrived at the Peterhof (Aug. 2nd). **Thankgivings** and services all over Russia on the names-day of the Tzarina, the Grand Duchess Mary Paulovna, and the Duchess of Edinburgh (3rd). **Marriage** of the Grand Duke Peter with the Princess Miliza (7th). The Tzar conferred the Commander's Cross of the Order of St. Stanislas on the Bulgarian ex-captain Grueff (16th). The **Jubilee** of the foundation of the **Pulkowa Observatory** was celebrated (20th). Generals Radetsky and Kaufmann celebrated their jubilees of military service, and the Tzar addressed each of them in a very complimentary rescript, at the same time giving General Kaufmann the first-class of the St. Vladimir Order, and appointing General Radetsky a member of the Council of the Empire (Sept.). Concession granted to a Belgian company, with capital 10,000,000 fr., in southern Russia to work coal-mines (Oct. 10th). New lottery loan issued (Nov.), at 215 r. for a nominal sum of 100 r., which had been run up to 225 r. on the market, so that the State Land Bank will receive 172,000,000 r. for a nominal capital of 80,000,000 r. The loan was eagerly taken up. During the year the Tzar visited Germany, Austria, and Denmark.

Rustchuk. A town of 26,163 inhabitants, on the right bank of the Danube, in Bulgaria, 245 miles north-west of Constantinople. Its position on the river frontier long made it a place of strategic importance; and Rustchuk, Silistria, Shumla and Varna formed a famous quadrilateral. Town and military works nearly destroyed in the war of '77-8. Since dismantled in terms of treaty of Berlin. The present Tzar of Russia commanded the Rustchuk column during the last Turkish war.

Ruthenians, Legislation. See AUSTRIAN POLITICAL PARTIES.

S

Saba. A Dutch West Indian island in the Leeward group. Area 5 sq. m.; pop. 2,421. Consists of a single volcano cone, furrowed by deep wooded valleys. Sugar, cotton, and indigo are grown. It is a dependency of Curaçao (*q.v.*).

Sagasta, Señor Praxedes Mateo. Spanish ex-prime minister and statesman; b. in 1827 at Torrecilla de Cameros. He was educated as an engineer in the School of Engineers at Madrid. From 1854 to 1856 he represented the town of Zamora in the Constituent Cortes. In 1856 he was compelled to seek shelter on French territory, having engaged in the revolutionary movement. He returned to his country and profession on an amnesty being proclaimed. He again conspired in 1866, and was again compelled to fly. He became Minister of State (1870-74), and in 1874 he was successively Minister for Foreign Affairs, Minister of the Interior, President of the Council, and Prime Minister (1881-83). His ministry was succeeded (October 11th, 1883) by one from the Dynastic Left, under the premiership of Señor José Posada Herrera. Señor Sagasta, on the resignation of the Canovas ministry at the death of King Alphonso (Nov. 23rd, 1885) resumed office as the head of a new liberal ministry; but re-formed his Cabinet, consequent on a crisis, in '88.

Sahara Coast. In 1887 Spain acquired and annexed on the north-west coast of Africa the seaboard between Morocco and French Senegal, extending from Cape Bojador in 26° N. lat. to Cape Blanco in 20° 45' N. lat. This gives about 500 miles of coast. Inland Spanish territory is to extend 150 miles, and by treaty with sheikhs of Aderer, still farther. The whole area is computed to be about 75,000 sq. m.; pop. scanty; consisting of nomad tribes. There is only one shallow harbour on the coast, Rio de Oro, where Spain has established a factory. The new possession has been placed under a Governor, subordinate to the Captain-General of the Canary Islands.

Saigon. Formerly native capital of Lower Cochinchina, and now capital of French Cochinchina. Pop. (81) 133,348, of whom, exclusive of the troops, 965 were Europeans (913 French).

St. Albans, Rt. Rev. Thomas Leigh Cloughton. Lord Bishop of. This see was founded in 1877 by a readjustment of the dioceses of Rochester and Winchester. His lordship, the 1st bishop, was b. 1808, is a son of Thomas Cloughton, Esq., of Haydock Lodge, Lancaster. He was educated at Rugby, and Trinity Coll., Oxford, of which he became a Fellow. He graduated B.A. in 1831, being 1st class in Classics, and gaining the following prizes: Latin Verse, and Newdigate, 1829, and the Latin Essay, 1832. He proceeded D.D. and *ad eund.* D.D. at Durham, 1867; was ordained deacon 1834, priest 1836, by the Bishop of Oxford. Formerly his lordship was Public Examiner at Oxford, 1835-36; vicar of Kidderminster, 1841-67; Hon. Canon of Worcester, 1835-67; Professor of Poetry at Oxford, 1852-62; was consecrated Lord Bishop of Rochester, 1867; and translated to St. Albans 1877. In his lordship's charge to his clergy in Oct. '90, at Colchester, he announced his intention to retire.

St. Andrews University, founded 1411, is thus the most ancient of the Universities of Scotland. It included three separate colleges and corporations: (1) *St. Salvator's* (1455), (2) *St. Leonard's* (1512), and (3) *St. Mary* (1537). In 1747 the two first-named were united and took the faculties of arts and medicine; *St. Mary* being devoted to theology. Chancellor, the Duke of Argyll; Principal, J. Donaldson, M.A., LL.D. Jointly with Edinburgh University it returns a representative to Parliament—the present member is Mr. M. T. Stormonth Darling. — *Degrees.* M.A. (hood black silk, with red silk lining); D.D. (h. violet purple silk or cloth, with white satin lining, to represent the old ermine lining); LL.D. (h. scarlet silk or cloth with white satin lining); M.D. (h. crimson silk or cloth with white satin lining); D. Sc. (h. amaranth silk or cloth with white satin lining). The Bachelors in the several faculties—divinity, arts, medicine, and science—have the hoods of their faculties with the gown and cap of M.A. A degree of LL.B. is also granted to women; local examinations held. Distinguished alumni include Dr. Chalmers and Sir Lyon Playfair, M.P.

St. Asaph, Rt. Rev. Alfred George Edwards, Lord Bishop of. The see was founded in 1143. Income £4200. His lordship is the 67th bishop. He was b. 1849, and is the youngest prelate on the bench. Educated at Jesus College, Oxon., where he graduated '74, and was ordained deacon in the same year. Curate of Llandinog and second master of Llandoverly College, '74-5; Head Master of the same college, '75-85; Vicar of St. Peter's, Carmarthen, '85; elevated to the episcopal bench '89.

St. Bartholomew. A French West Indian island, a dependency of Guadeloupe. Area 25 sq. m., pop. 9000. Capital *Gustavia*. Exports, bananas, cassia, tamarinds, sassafras. Occupied by the French, 1648; ceded to Sweden, 1784; restored to France, 77.

St. Christopher, or St. Kitts. A British West Indian island, forming with Nevis and Anguilla a Presidency of the federal colony of the Leeward Islands. Capital, *Basseterre*. The local government is that of a Crown colony, though representatives sit in the Federal Council of the Leeward Islands. A President is the chief official. For statistics see BRITISH EMPIRE, etc. (table).

St. Davids, Rt. Rev. William Basil Jones, Lord Bishop of. This see, founded at an early date, is said to have been in the first place archiepiscopal. Present income of the see £4,500. His lordship, the 17th bishop, was b. 1822, and ed. at Shrewsbury and Trin. Coll., Oxford. Was Scholar of his college and Ireland Scholar 1842. Proceeded M.A. 1847 and D.D. 1874. Ordained by the Bishop of Oxford deacon 1848, priest 1853. Consecrated Lord Bishop of St. David's 1874. Archdeacon of York 1867-74, Canon Residentiary in York 1873-74, besides other offices held at various times. Has written, jointly with Mr. Edward Freeman, "The History and Antiquities of St. Davids," and contributed to Dr. Smith's "Dictionary of the Bible" and the "Speaker's Commentary."

St. Eustatius. A Dutch West Indian island, in the Leeward group. Exports, yams and

sweet potatoes. It is a dependency of **Curacao**. See **COLONIES OF EUROPEAN POWERS**.

St. George. Capital of the **Windward Islands**, and of the island of **Grenada** (*q.v.*).

St. George's Guild. Its legal status is that of a limited liability company duly registered under the Companies Acts of 1862 and 1867, but it dispenses in its style with the word "limited" by the special license of the Board of Trade under section 23 of the latter Act. Members incur no liability, except in event of the Guild being wound up during, or within a year after, their membership, in which case they are liable to the extent of £5. The Guild is dissolvable at the vote of three-fourths of its members. By its Constitution it consists of a master and members; the first and hitherto only master being **John Ruskin**. The qualifications for membership are the signing of a "creed" and certain promises, and the payment of £5 annually. This last is a reduction from £10, itself a reduction from a tithe of income, originally demanded by the Guild. Its objects are both large and various,—economical in seeking to reclaim and cultivate land, educational in seeking to guide the life of the peasant; historical, artistic, and geological, in collecting (as it has done) objects of interest, records of perishing monuments, rare books, pictures, and minerals for the museum of the Guild. As to its history and accomplished work, towards the end of 1871 **Mr. Ruskin** placed £7000 to the credit of a **St. George's Fund**, and asked subscriptions from the public to further the work. Since then the property of the Society has definitely, if slowly, increased. Of its property the portion best known to the public is the **St. George's Museum**, near **Sheffield**, the land for which was bought by the Society in '76, since when the Museum has more and more become a treasure-house of art and natural history. The agricultural work of the Guild finds at present somewhat limited field in an estate (the gift of **Mr. George Baker**) of twenty-six acres at **Bewdley** in **Worcestershire**; a small tract of land at **Cloughton**, in **Yorkshire**; another at **Barmouth**, **Merioneth**; and yet another, of thirteen acres, known as **Abbeysdale**, near **Nickley** in **Derbyshire**. Meanwhile, at **Laxey**, in the Isle of Man, **Mr. Egbert Rydings** and **Mr. Thomson** have set up the **St. George's woollen mill**, worked by water-power only, where homespun cloth, blankets, and other woollen goods of exceptional quality, and not, we believe, exceptional prices, are woven of the spinnings of the islanders from the wool of the island sheep. For this establishment the Master of the Guild asks "not charity, but custom." Consult **Ruskin's** "**Fors Clavigera**," and "**Reports and Accounts of St. George's Guild**."

St. Giles Christian Mission. An Evangelistic Mission in **St. Giles**; assists discharged prisoners, also fallen women. It has a Home for men, two Homes for lads, and three for women. Income £13,611. Superintendent, **G. Hatton**, 4, Ampton St., Regent Square, W.C.

St. Gotthard Tunnel. In Feb. '88 it was reported that this tunnel was to be "double-tracked" at a cost of over £500,000, the work to be done by degrees and completed in '96. The tunnel was laid out for two tracks, and the amount of freight traffic had exceeded expectations. It was reported in Aug. '89 that the earnings of the railway were steadily increas-

ing. In '88 they reached 2,309,081 fr., against 2,172,556 fr. in '87, and were still developing.

St. Helena. Discovered by the Portuguese on **St. Helena's Day**, 1501. Is an island belonging to Great Britain in the South Atlantic, 1140 miles from the African coast. Port and capital is **Jamestown**. For statistics see **BRITISH EMPIRE**, etc. (table). From 1815 till 1821 was the place of exile of Napoleon, and in 1834 came finally under the Crown.

St. Mellor. Capital of **Jersey**. See **CHANNEL ISLANDS**.

"**St. James's Gazette**." An evening review and record of news; founded in 1880; is a constitutional and independent Conservative organ. While opposed to ill-considered and revolutionary political changes, it is in sympathy with moderate and progressive reform. In addition to articles on the political questions of the day, it contains interesting papers and sketches on social, literary, and scientific topics, an epitome of the news of the morning, and the latest sporting, financial, and general intelligence of the afternoon. Editor, **Mr. Sidney Low**. Office, Dorset Street, Whitefriars, E.C. "**St. James's Budget**," a weekly edition of the above, circulates widely in the provinces and in the Colonies and India.

St. John. A Danish West Indian island, one of the Virgin group. Area 21 sq. m., pop. 944. Is high and rocky, but in parts productive. See **SANTA CRUZ**.

St. John. Chief commercial town and port of **New Brunswick** (*q.v.*), pop. 26,127.

St. John's, Antigua, capital of the **Leeward Islands** (*q.v.*).

St. John's. Capital of **Newfoundland** (*q.v.*); pop. 28,610; on Avalon peninsula.

St. Kitts. Otherwise **St. Christopher** (*q.v.*).

St. Lawrence River Bridge. A project for crossing the river **St. Lawrence** at **Quebec** has long been talked of, and in May '89 it was reported that arrangements were being made to carry it out. In consideration of the ocean traffic to **Montreal**, it was necessary to adopt the high level with long spans, and the depth of water presented another difficulty. Plans had, however, been prepared for a cantilever bridge at an estimated cost of 10,000,000 dollars. The bridge will open up a direct communication between the **Canadian Pacific** line and the **Intercolonial Railway** from **Quebec** to **St. John** and **Halifax**, giving the **Canadian Pacific** an uninterrupted transcontinental line through the **Canadian** territory for the entire length.

St. Leger Stakes. See **TURF**.

St. Lucia. A British West Indian island forming part of the Crown colony of the **Windward Islands**. Capital, **Ostries**. An Administrator presides over local affairs. The whites are mostly French Creoles; the dominant religion Roman Catholic, and education chiefly so; the law is based on old French codes. For financial statistics, etc., see **BRITISH EMPIRE**, etc. (table). Consult **Layard's** "**Through the West Indies**."

St. Marie, or Nossi Burra. An island belonging to France since 1843, on the E. coast of **Madagascar**, S. of **Tamatave**.

St. Martin. One of the **Leeward** group of the Lesser Antilles. Area 38 sq. m., pop. 7,083. Is divided between **Holland** and **France**, the latter owning about 20 sq. m., which are annexed to the colony of **Guadeloupe**. The Dutch portion is a dependency of **Curacao**. Comparatively small cultivable area, Great

salt-pans. Exports, salt, sugar, and live-stock. Chief settlement and port in French section, *Marigot*; in the Dutch, *Philipsburg*. Was divided between the French and Dutch in 1648.

St. Michael and St. George, the most Distinguished Order of, was instituted in 1818, and enlarged in '68, '77, and '87, and is the order to which subjects of Her Majesty who have taken a distinguished part in colonial and foreign affairs are generally admitted. It consists of the Sovereign, a Grand Master (the Duke of Cambridge), and three classes of members:—

G.C.M.G. . . . Knight Grand Cross.

K.C.M.G. . . . Knight Commander.

C.M.G. . . . Companion.

Members of the first two classes, being Knights, are entitled to the prefix "Sir." The first class is to consist of 65 members, exclusive of honorary members and princes of the blood, the second of 150, and the third of 200 members. The motto of the Order is "*Auspiciis melioris ævi*" ("A pledge of better times"). See **KNIGHTHOODS CONFERRED DURING '89**.

St. Patrick, Most Illustrious Order of. Established in 1783 by George III., and is to consist of the Sovereign, a Grand Master, who is the Lord Lieutenant of Ireland for the time being, and twenty-two Knights. Its abbreviation is K.P.; its badge a sky-blue ribbon, with motto *Qui separabit?* ("Who shall separate?"). There are, at present, twenty-eight K.P.s, including the sovereign and princes of the blood, and the Lord Lieutenant of Ireland, and subjoined is a list of them:—

The Sovereign.

Lord Lieutenant of Ireland.

Prince of Wales. Duke of Connaught.

Duke of Edinburgh. Duke of Cambridge.

Prince Albert. Victor of Wales.

Earl of Dartrey. Earl of Dunraven.

Earl of Cork. Earl of Carysfort.

Marquis of Dufferin. Duke of Manchester.

and Ava. Lord Carlingford.

Earl of Charlemont. Earl of Howth.

Marquis of Drogheda. Lord Montague.

Marquis of Waterford. Viscount Wolsley.

Earl of Gosford. Marquis of Headfort.

Viscount Powerscourt. Marquis of Ormonde.

Earl of Kenmare. Earl of Erne.

Earl of Listowel. Earl of Milltown.

Chancellor of the Order, the Chief Secretary for Ireland; Registrar, the Dean of St. Patrick's; Secretary, G. Francis W. Lambert; *Usher of the Black Rod*, Col. J. Caulfield; *Ulster King of Arms*, Sir J. Bernard Burke, C.B.; *Herald*, Sheffield Batham.

St. Paul's School, London. Founded A.D. 1509 by John Colet, D.D., Dean of St. Paul's. Is governed under the provisions of a scheme of the Charity Commissioners, dated July 4th, '79. The school consists of 153 foundation scholars, elected by competitive examination, and of so many capitation scholars as the governors may from time to time decide. The capitation scholars pay a tuition fee of £24 9s. a year. The foundation scholars are exempt from fees. There are now 600 boys in the school, and 31 masters. The governors give annually seven exhibitions, varying in value from £60 to £100, to the scholars proceeding to Oxford and Cambridge, and one exhibition of £50 for two years for a boy proceeding to Royal Academy, Woolwich. Among the alumni of St. Paul's were Milton, Marlborough,

etc. *Motto, Fide et literis.* Head Master, F. W. Walker, M.A. Bursar, S. Bewsher.

St. Pierre. Capital of Guernsey. See **CHANNEL ISLANDS**.

St. Pierre. A French island off Newfoundland, near *Miquelon* (q.v.).

St. Thomas. A Danish West Indian island, one of the Virgin group. Area 23 sq. m.; pop. 14,389. Capital *Charlotte Amalie*, popularly known as *St. Thomas*.

St. Thomas or Thomé. Portuguese island in Gulf of Guinea. Pop. 18,266. See **PRINCE**.

St. Vincent. A British West Indian island forming part of the Crown colony of the *Windward Islands*. Capital *Kingstown*, pop. 5,593. Chief products, sugar, molasses, rum, and arrow-root. The fisheries are abundantly productive. —An Administrator presides over the local government. For financial statistics, etc., see **BRITISH EMPIRE**, etc. (table). Consult *Layard's "Through the West Indies."*

St. Vincent Gulf. In South Australia (q.v.).

Sala, George A., was b. in London in 1828. His father was an Italian, and his mother, a popular singer, was of West Indian origin. Mr. Sala began his literary career in *Household Words* under the auspices of the late Charles Dickens. He was one of the founders of *Temple Bar* magazine, of which he was for some time editor. To this and other periodicals he contributed "The Seven Sons of Mammon," "Captain Dangerous," "Twice Round the Clock," and many other tales and sketches. For many years Mr. Sala has been a leader writer and special correspondent of the *Daily Telegraph*, which journal he has represented at most of the celebrations of historical importance that have taken place in England, Europe, and America during the last thirty years. Mr. Sala has repeatedly been urged to become a candidate for Parliamentary honours, but has declined. He is an excellent speaker as well as writer.

Salé of Horseflesh, etc., Regulation Act, '89. See **SESSION**, sect. '76.

Salic Law. That law of the French monarchy which disqualified a female from being sovereign. A similar law exists in some other kingdoms. The name is derived from that of the Salian Franks.

Salisbury, John Wordsworth, D.D., Lord Bishop of (founded 1042), son of the late Bishop of Lincoln, and grand-nephew of the poet Wordsworth; was b. at Harrow 1843, and educated at Ipswich, Winchester, and New Coll., Oxford, where he graduated in 1865. He took the Craven scholarship. Ordained deacon in 1867 and priest in 1869, it is remarkable that Dr. Wordsworth has never held any actual parochial office, though he did good work in various parishes; the whole time having been passed in Academical and Cathedral appointments. He was Fellow and college tutor of Brasenose, proctor, Grinfield lecturer, select preacher, Bampton Lecturer, Examiner in the Theological Schools, and Examining Chaplain to his father. In 1883 he was appointed Canon of Rochester and Oriel Professor of Interpretation of Scripture, and Bishop of Salisbury 1885. Dr. Wordsworth is a very popular moderate High Churchman, and is the author of several theological and classical works, the best known of which are the Bampton Lectures (q.v.) for 1881. He married the daughter of Mr. Henry Coxo, of the Bodleian Library.

Salisbury, Robert Arthur Talbot Gascoyne Cecil, K.G., 3rd Marquis of (creat. 1789),

was b. at Hatfield in 1830. Educated at Eton and Christ Church College, Oxford, and—as Lord Robert Cecil—was elected for the family borough of Stamford in '53. He received a place in Lord Derby's ministry of '66 as *Secretary of State for India* ('66-67), under the title of Lord Cranborne, which he assumed on the death of his elder brother. Owing to certain divergencies of opinion on the question of the extension of the franchise, to which he was opposed, Lord Cranborne separated himself for a time from his political associates; but on taking his place in the House of Lords at his father's death in '67, as Lord Salisbury, he returned to his old party associations, and soon took rank as the foremost debater of the Upper House. In '64 he was elected *Chancellor of the University of Oxford*. He gradually assumed a high position of authority on Indian and foreign affairs; and when Mr. Disraeli resumed office as Premier in '74, Lord Salisbury became *Secretary for India* ('74-78). He was despatched to Constantinople in '76 to take part in the Conference which was expected to settle the matters in dispute between Russia and Turkey. The Conference failed to attain this result, and the war broke out which ended by the treaty of San Stefano. Lord Salisbury accompanied Lord Beaconsfield to the *Berlin Congress*, which assembled for the purpose of modifying the provisions of that Treaty. The action of the British plenipotentiaries at this Congress principally conduced to effect such modifications as were favourable to Turkey. He was *Secretary for Foreign Affairs* ('78-80). Upon Lord Beaconsfield's death, in '80, Lord Salisbury became the recognised leader of the Conservative party; and when the Gladstone Ministry resigned office in June '85, Her Majesty summoned Lord Salisbury to Balmoral, to form a new ministry, of which he became *Premier*, as well as *Secretary for Foreign Affairs*. The new administration, though no one predicted a long life for it, fell sooner than was expected. The general election in Nov. of the same year did not result favourably to the Government, and Mr. Jesse Collings, immediately after Parliament met, moved a resolution asking the Government to take the allotments question in hand. This was opposed by the Conservative party; but on a division the resolution was carried, and the Government resigned. Mr. Gladstone succeeded Lord Salisbury, but he, too, had a short lease of power. His Home Rule and Irish Land Bills led to the disruption of the Liberal party; and when the division on the second reading of the Home Rule Bill was taken, on the 8th of June, the Ministers were defeated by a majority of thirty. The general election which took place in the following month was fatal to Mr. Gladstone's Government; the Premier and his colleagues resigned, and Lord Salisbury was sent for by the Queen. His lordship was desirous of associating Lord Hartington with him in the Government, and was prepared to waive his claims to the Premiership in favour of the leader of the Liberal Unionists. Lord Hartington, however, declined, but promised the general support of himself and his friends to the Government. A short session of Parliament followed; and in the recess a speech by the Marquis of Salisbury on the *Bulgarian question* attracted much attention, from the countenance it appeared to give to the resistance by Austria of Russia's pretensions to interfere in the Balkan Penin-

sula. Rumour, indeed, credited his lordship with having entered into some kind of arrangement with Austria-Hungary, by which, in the event of war, England would take the field against Russia. The resignation of Lord Randolph Churchill on December 23rd again induced Lord Salisbury to offer office and power to the Marquis of Hartington, who once more declined. The Premier then turned to Mr. Goschen, and offered him the Chancellorship of the Exchequer, which he accepted. Lord Salisbury's tenure of office during the Jubilee year of the Queen's reign will be memorable in his lordship's family for the honour which *Her Majesty* paid him by going in person to visit him at Hatfield. Lord S., on the occasion of the celebration of the Pope's Jubilee, '88, despatched the Duke of Norfolk to offer His Holiness the Queen's congratulations, with presents, and secured, it was supposed, the support of the Vatican in the policy of coercion so far as it related to the suppression of boycotting and the Plan of Campaign, which were condemned in a papal decree. In May '88 Lord S. introduced a Bill into the House of Lords for the reform of that Assembly and the creation of life peers. In the same month his lordship appeared as a witness in the action for libel brought by Mr. Peters against Mr. Bradlaugh. In Nov. '88 his lordship and Lord Hartington were entertained at a banquet by a number of Irish Nonconformists. On the 27th of the same month Lord Salisbury visited Edinburgh, and was warmly received. An action for libel, brought against his lordship by Mr. William O'Brien, and tried before Mr. Justice Stephens at the Manchester assizes, in July '89, broke down. His lordship's refusal to sanction the official representation of Great Britain at the Paris Exhibition last year provoked much criticism on both sides of the English Channel. The aim of his foreign policy of late seems to have been to consolidate the Central European alliance. It was criticised in an article in the *Contemporary Review* for Oct. '89, signed "Outlandos," and attributed to Mr. Gladstone. Lord Salisbury took part in several important debates during the last session. See *Session, PARLIAMENTARY*. On Nov. 26th and 27th ('89), he delivered several speeches at a Conservative Conference held at Nottingham. Lord Salisbury was an occasional contributor in his younger days to the *Quarterly Review*, but he now seeks relaxation from the cares of office in scientific rather than in literary pursuits, experimental physics being his favourite study. He spends much of his time in his laboratory at Hatfield, and has recently interested himself in the application of electricity to practical purposes on his estates.

Salonica, or **Saloniki** (ancient *Thessalonica*), at the head of a gulf of the same name, on the *Ægean Sea*; second seaport of Turkey, and chief town of the Turkish "vilayet" (government) of the same name, forming the chief commercial outlet of the western part of the Balkan Peninsula, as Constantinople is that of the eastern.

Salt. Chloride of sodium or common salt is a combination of two simple bodies—namely, chlorine 60.4 parts, and sodium 39.6 parts. Salt is obtained in three forms, the processes through which it is put varying according to its source. (1) *Rock salt*, found among stratified rocks and formed from water, mainly by

evaporation; (2) salt obtained from the sea, and (3) salt found scattered over the surface of the earth in such quantities as to render collection of it profitable. The most extensive deposits in the world are in Europe, extending for over 500 miles along the Carpathians—the mines of Upper Austria, Hungary, Tyrol, Transylvania, Wallachia, and others, being situated in this range. In Spain there are also some extensive salt mines, while in England there is a vast bed of salt under the valley of Cheshire, stretching from Malpas to Congleton. The largest mines in the world are the *Vielkoska*, in Poland, which have been worked since 1251. The *English workings* date back to 1670, when a mine was opened at Northwich. Salt, however, was obtained in England from brine long before these beds of rock salt were disclosed, for mention is made of *salt-houses* in the time of Edward the Confessor. In Cheshire there are constant brine springs in working as well as *rock salt mining*. The brine is pumped up through a series of iron tubes screwed together, called *trees*, and emptied into a large reservoir. From this the brine is carried through pipes into evaporating pans. As soon as the brine begins to boil the salt rises to the surface in a kind of scum, and after a short time sinks slowly to the bottom, when it is taken out and placed in little wooden tubs and put in the drying-room, and after a certain exposure becomes thoroughly solid, and is removed in oblong blocks known as *lump salt*. The production of the different kinds of salt is determined by the degree of heat to which the brine is exposed, and the time allowed for the process of detachment from other salts and for crystallisation. A temperature of 120° will produce *bay salt*, whereas a temperature of 225° is required to produce the finest table salt. *Patent butter salt*—the finest of all—is made in circular pans completely covered. *Common salt* is produced in pans which are never heated to boiling point. *Rough salt* is made from brine just warmed through, the salt being very coarse in the grain; while *fishery salt* is coarser still, the grains sometimes being as much as half an inch long. The estimated quantity of salt produced in Cheshire in 1675 was 27,000 tons per annum, and although the output steadily increased it was not until 1825, after the abolition of the salt tax, that a powerful impetus was given to the trade. The next great development of the trade occurred in '44, when the *East India market* was thrown open to English salt. The result is marked by the record of shipments amounting to 607,000 tons in '50. In '85 the total shipments reached 921,869 tons, but the exports in '87 were only 819,318 tons, of which 323,793 went to India. The falling off recently has been in exports to the United States. Of the Indian imports 67·5 per cent. are from England, 12·17 per cent. from Italy, and the remainder from Eastern countries. The total production of *rock salt* in England and Ireland in '87 was 180,422 tons; and *white salt* 2,026,529 tons. Of this latter total 1,619,452 tons were produced in Cheshire, and 252,000 in Worcestershire. The highest price of *common salt* during the last ten years was 7s. per ton at the works, the lowest 2s. 3d. For *East Indian salt* the highest price was 13s., lowest 6s. 3d. In '72 the price of common salt touched 20s. per ton, and it did not fall to 7s. per ton till '76, and the average price during the four years was over 11s. per ton. Reckless competition amongst the salt proprietors led to the formation in

'89, of a salt union, with a capital of £3,000,000, with the avowed object of consolidating the undertakings of the salt proprietors; and thus put an end to the competition which occasioned salt to be sold under the actual cost of production. Over sixty leading firms joined the Union.

Salvation Army. A home and foreign missionary society with a quasi-military organisation, having for its object the salvation of the more degraded classes both at home and abroad, which it seeks to reach by special means, including out-door processions accompanied with banners and music, and by addresses in halls, theatres, and other public buildings. Originated in the year 1865 by William Booth (*q.v.*), then a Methodist minister, on a visit to London, the movement was called the Christian Mission until, in 1878, the present name was adopted. The Army is now established in thirty countries and colonies, and has 2,518 corps, with 6,663 officers (or evangelists), and has some 150,000 members. The revenue of the Army (home district) for '87 amounted to £21,266, independently of the receipts for the colonies and the Continent, which amount to £47,176. Large sums are also received on account of the building funds and their trading departments. The doctrinal views professed by the "Army" chiefly Arminian, are set forth in detail in the "Doctrines of the Salvation Army," prepared by "General" Booth. In connection with the Army there exists a *juvenile branch*, the "Young Soldiers' Corps," consisting of 719 corps. The training home, Congress Hall, Clapton, E., has sent out since its formation 3,000 cadets. There are also homes for fallen women and for rescued convicts of both sexes, as well as a small orphanage for children. A night shelter and cheap food depot was established in Limehouse in '88. During '89 the Army encountered hostility from the Federal Government of Switzerland, and met with considerable opposition at Whitehurst, leading to the imprisonment of some of its members. The headquarters of the Army are situated at 101, Queen Victoria St., E.C. **Organs:** weekly, *War Cry* and *Young Soldier*; monthly, *All the World*.

Salvini, Signor, a distinguished Italian actor, b. at Milan 1829. He came into the front dramatic ranks in the *fêtes* in Florence on the occasion of the sixth centenary of Dante ('65). He visited London in '75, making his appearance at Drury Lane in three of his greatest characters—*Hamlet*, *Othello*, and Soumet's "*Gladiator*." His *Othello* is universally allowed to be the finest impersonation of that character within living memory. In Edinburgh, during the succeeding year, he produced *Macbeth*. Signor S. revisited this country, and gave a series of performances (1884).

Samarcand. The old capital of Timur, and in all probability the future capital of Russian Turkestan. Situated on the Zarafshan, 130 m. E. of Bokhara. The irrigation works of the Russians have partially restored its ancient prosperity, and within the last fifty years its population has increased from 8000 to 36,000. The Transcaspiian Railway extends to Samar-cand.

Sambas. A state and Dutch settlement in Borneo (*q.v.*).

Samoa Islands. This group, in the western Pacific, consists of ten inhabited and two un-

inhabited islands, with an aggregate population of 35,000 souls; it lies north-east of the Fiji group (*q.v.*). The largest is **Savala**, described as being twice the size of the Isle of Wight.—The excitement caused by the annexation of Samoa by the Germans in '86 was kept up by the dispute ('89) between **Malietoa**, whom the Germans deposed, and **Tamasese**, whom they declared king. On his deposition Malietoa fled, but subsequently gave himself up to the German authorities. Malietoa's people then declared **Mataafa** king, and several conflicts took place between the rivals, the Germans supporting their nominee. The United States protested against the action of Germany, and eventually a conference on Samoan affairs was held at Berlin. On March 16th there was a fearful hurricane at Samoa, and all the vessels in the harbour were driven ashore with the exception of one English, one American, and one German man-of-war. The *Calliope*, under Capt. H. O. Kane, made a marvellous escape from the harbour in the teeth of the hurricane. The first meeting of the Conference was held at Berlin, April 20th, and the result was that an amicable arrangement was arrived at (June 14th). Subsequently Malietoa was set at liberty, and the American admiral brought about a peace between Mataafa and Tamasese. The terms of the final act of the Conference are kept strictly secret until it is confirmed at Washington.

Sandakan. Capital of British N. Borneo (*q.v.*).
San Domingo. Capital of Dominican Republic; pop. 15,000. See HAYTI.

Sandown Race Meeting. See TURF.
Sand Grouse Protection Act, '88. See SESSION, sect. 18.

San Francisco. A city of the United States of America, in the State of California, situated upon the Pacific Ocean, near the mouth of the river Sacramento, at the extremity of a peninsula which forms one of the most admirable harbours in the world. It has derived its great commercial importance not only from its admirable position, but also principally from the discovery of gold in California. The entrance to the vast bay on which it stands, and which extends fifty miles inland, is called the "Golden Gate." Was first settled by the Spaniards in 1776. Principal exports besides gold and silver, are wheat, barley, flour, wines, quicksilver, and wool. Manufactures of different kinds are carried on, employing a large number of hands. Viticulture and wine-making is rapidly becoming a very large and important industry in California. The Great Central Pacific Railroad terminates near the city, at Oakland, on the east side of the bay of San Francisco. The climate is generally healthy, neither excessive heat nor cold existing. Lines of steamers run to Japan, Australia, Panama, Mexico, etc. It is estimated that the grain-fleet, leaving San Francisco annually, exports 1,000,000 tons of wheat. The population, which in 1870 was 149,473, had in 1880 (the last decennial return), increased to 233,956. It may be at present estimated as over 300,000.

San Juan. Capital of Puerto Rico (*q.v.*); pop. 30,000.

San Juan River. See NICARAGUA SHIP CANAL.

San Salvador, a republic of Central America, bounded on the south by the Pacific and on the north by Guatemala and Honduras, is governed by a President, Senate, and House

of Representatives, elected respectively for four years, three years, and one year, by married men, or those who can read and write and support themselves. The elections are, however, frequently interrupted by pronunciamientos or military nominations. Area 7728 sq. m.; pop. ('88) 664,513. Capital **San Salvador**, pop. 13,274. Estimated revenue in '88 £546,704; expenditure £505,887. No foreign debt; internal debt about £1,430,000. Army, including militia, about 14,000. War with Honduras in '72 and '73. Since then little worthy of note has occurred. See DIPLOMATIC.

Sant, James, R.A., b. 1820. He first exhibited "faucy subjects," generally of single figures, and frequently children; and these, being engraved, made him widely known. As examples may be mentioned the "Infant Samuel," the "Infant Timothy," "Little Red Riding Hood," and "Dick Whittington." Mr. Sant's later years have been almost entirely devoted to portrait painting, his style being thoroughly graceful and refined. He excels particularly in his pictures of children. Appointed **Principal Painter in Ordinary to Her Majesty.** Elected R.A. ('70). He exhibited ('89) "Spirit Voices" at the Royal Academy.

Santa Cruz, or Ste. Croix. A West Indian island, the largest of the Virgin group. Capital **Christianstadt.**—It is governed, in connection with St. Thomas and St. John, by an officer appointed by the Danish Crown. Exports to the United Kingdom ('87) £24,660; imports from the United Kingdom £102,621. Intrusted by France to the Knights of Malta, 1651; purchased by Denmark, 1733; slavery abolished, 1848; coolies employed, 1863.

Santley, Charles. Born at Liverpool 1834. Studied in Italy, and on his appearance in London as a finished singer in '57 at once took high rank, his first great success being achieved at Covent Garden in '60, when he took the part of Rhineberg in *Lurline*. He is a favourite baritone on the operatic stage of almost every European capital, and in '89 also achieved a series of triumphs on the Australian stage. Previous to his departure he was presented with an address by the priests and congregation of St. Joseph's Retreat, Highgate, for his services to the church.

Sarakhs. An important strategical point, 200 miles north-west of Herat. **New Sarakhs** lies on the right bank of the Hari Rud. **Old Sarakhs**, on the left bank, a few miles distant in the direction of Merv, is a Russian intrenched camp with a garrison ranging from a thousand soldiers upward.

Sarasate (y Navascenes), **Pablo Martin Melitor**, the famous violinist, was born at Pampeluna, on March 10th, 1844. Before he had attained his twelfth year he entered the Paris Conservatoire, and for violin tuition was placed under M. Alard. Having gained high honours, three years later ('59) Sarasate made a professional tour of the Continent. He did not, however, reach London until '74, when he made his *début* at one of the Philharmonic Society's concerts, subsequently playing at the Musical Union. He was here again in '77 and '78, since which time he has been a frequent visitor. The orchestral concerts given under his name (begun at St. James's Hall in '85) have become a welcome feature of the London musical season. At the Birmingham Festival of '85 Señor Sarasate introduced a violin concerto specially written for him by Dr. Mackenzie.

At the Leeds Festival of '89 the same player was intrusted with Dr. Mackenzie's violin piece "Pibroch," the favourable verdict passed upon which has been ratified elsewhere. Towards the close of the year Señor S. proceeded to New York, and achieved a notable success. His compositions include arrangements for violin of Spanish songs, etc., several of which are exceedingly popular.

Sarawak. A state in the island of Borneo, which has recently ('88) come under the virtual protectorate of Great Britain. Area about 40,000 sq. m., pop. 280,000. Capital **Kuching**. Sea-board extends 380 miles. There are fine navigable rivers—the Rejang, Sarawak, Batang Lupar, and others. Sarawak is largely covered with forest and jungle, but there are immense tracts of fertile alluvial land, suitable for the growth of tropical products. Chief exports—sago, quicksilver, antimony, gambier, gutta-percha, and rattan canes. Sarawak is said to furnish more than half the sago produce of the world. (See BORNEO.) *Revenue* (1884) £55,253, expenditure £57,858; imports £344,044, exports £322,887. The government was intrusted to Sir James Brooke in 1841, who ruled as rajah till 1868, when he was succeeded by his nephew, Charles Brooke, the present rajah. Under the just and equitable rule of the Brookes, Sarawak has been reclaimed from barbarism, and the Malays, Dyaks, and other savage tribes, have been changed from lawless head-hunters and pirates into comparatively peaceful agriculturists.

Sardinia. An island of the Mediterranean and a department of Italy, separated from Corsica by the Strait of Bonifacio. Area (including the small adjacent islands), 9,294 sq. m.; pop. 717,740. Capital, **Cagliari**; pop. 35,588. Other towns: Sassari, Tempio, Alghero, Iglesias, and Oristano. In mineral wealth Sardinia is the richest province of Italy: in lead, silver, zinc, iron, building stones, alabaster, salt. The mines of Sardinia were worked by the Carthaginians and Romans. The tunny fisheries give very valuable results. The coral fisheries are yearly decreasing, owing to the exhaustion of the old coral banks without any new ones being discovered. The imports in '87 were £317,037; exports, £578,227. Chief exports, besides minerals and animals, charcoal, wines, skins, cheese, almonds.

Sardou, Victorien, French dramatist, b. at Paris Sept. 7th, 1831. He first studied medicine, but afterwards became a littérateur. His first dramatic production, "La Taverne des Etudiants," was a failure, but his next works, "Monsieur Garat" and "Les Prés-Saint-Gervais," which he wrote for Dejazet in 1860, were successes. In 1861 his comedy "Les Fêtes de Mouches" brought him prominently before the public. He also wrote for Madame Bernhardt (*q.v.*) "Fédora" and "Théodora"; and "La Tosca," which was brought out at the Port Sainte Martin Théâtre in '87. In Feb. '89 his comedy entitled "Marquise" was produced at the Vaudeville. M. Sardou was elected a member of the French Academy in 1877.

Sark. One of the Channel Islands (*q.v.*).
Saskatchewan. Named after the Saskatchewan river. A district of the North-West Territories and a future province of the Dominion of Canada. Lies north of Assiniboia.. Area 114,000 sq. m. Capital **Prince Albert**. River navigable from Lake Winnipeg.

"Saturday Review, The" (weekly),

founded Nov. 1855, has long maintained a leading position for its fearless criticisms on subjects of political, literary, and social interest; treating these from an independent standpoint. Its reviews are also distinguished by the same characteristics. Editor, **Mr. W. E. Follook**, *q.v.* (1883). Office, 38, Southampton Street, Strand, W.C.

Savage Island (or **Nieué**), situated midway between Panama and Brisbane, and virtually a part of the Tongan group. The circumference of the island is 36 miles, and its height 2,000 ft. Practically a huge coral reef, broken here and there, forming convenient inlets. It has recently received the protectorate of Great Britain in response to the request of the natives.

Savala. See SAMOA ISLANDS.

Saving Life at Sea. A Select Committee of the House of Commons was appointed in May '67 to consider this subject. For concise summary of its report see ed. '88, and Merchant Shipping (Life Saving Appliances) Act, under heading **SESSION '88**, sect. 33.

Saxe-Coburg, Duke of. See FERDINAND, PRINCE.

Saxony. For Ministry, etc., see DIPLOMATIC.
Sayce, Rev. Archibald Henry, the distinguished comparative philologist and orientalist, b. at Shirehampton 1846. Educated at Queen's Coll., Oxford; elected a Fellow '69. He subsequently became Senior Tutor. He was a member of the Old Testament Revision Company, and, in addition to his works on comparative philology, he has written many books, embodying the results of his researches in the languages and literature of Assyria, Babylonia, and Chaldea. **Hibbert lecturer '87.** In '89 Prof. Sayce read a paper on "Cuneiform Inscriptions of Tei-el-Amarna," before the Philosophical Society of Great Britain.

Scarborough. Capital of Tobago (*q.v.*).
Schliemann, Dr. Heinrich. A celebrated German archaeologist and author, born in 1822, at Nembukow, in Mecklenburg. In 1850 he travelled over the Continent, Syria, and Egypt. In 1870 he started excavations in the hill **Hissarlik**, in Asia Minor, where he made wonderful discoveries. For the archaeological treasures he excavated belonging to Turkish territory he was compelled to pay £2,000 to the Ottoman Government. He subsequently exhibited them in the South Kensington Museum, and in '81 presented them to the German nation. His researches have brought to light splendid specimens, especially from **Mycenæ** and **Tiryns**. He unearthed a Cyclopean city in **Ithaca**, followed on at **Troy**, and obtained valuable relics of **Boeotian** **Orcho** **menos**. He has written important works in several languages on his archaeological discoveries. Armed with a firman, Dr. Schliemann started (Nov. '89) to make further explorations in Asia Minor.

Schnadhorst, F., b. at Birmingham 1840. Educated at King Edward VI.'s Grammar School. In 1873 he became secretary to the Birmingham Liberal Association. The great organising powers of Mr. Schnadhorst, which were advantageously and successfully displayed in the principal elections throughout the country, were specially recognised by the Liberal party with a purse of £1,000, and an address, which were presented by Mr. J. Chamberlain, M.P., April 9th, 1877. Under Mr. Schnadhorst's organisation was formed (1877) the National Liberal Federation (*q.v.*), of

which he was appointed secretary. Early in '87 Mr. S. removed to London to superintend the newly organised National Liberal Federation, and was subsequently (March 9th, '87) entertained at a banquet, and presented by the party with a testimonial of 10,000 guineas and an address. Mr. S. is also hon. sec. of the Liberal Central Association. He has recently been prostrated by a prolonged illness.

Schnitzler, Eduard. See EMIN PASHA.

School Board for London. The Elementary Education Act of 1870 specially provided that a school board should be formed for London. The usual preliminary inquiry directed to be made in all other places (whether boroughs or districts) was dispensed with in the case of the Metropolis, because the educational destitution was notorious, and would brook no delay. The first board was accordingly elected only a few months after the passing of the Act, and included such men as Lord Lawrence, who became its chairman; Lord Sandon (now Earl Harrowby), the late Mr. Samuel Morley, Mr. W. H. Smith, Professor Huxley, the late Sir Charles Reed, Rev. A. W. Thorold (now Bishop of Rochester), etc.—

School Accommodation and Attendance. The task before this Board was of the most difficult nature, since its first report to the Education Department showed that, on the most moderate calculation, there existed a deficiency of more than 100,000 school places, and proposed forthwith to meet this enormous deficiency. Then, too, there was the ever-growing increase of population to be dealt with, itself calling for an annual supply of twelve schools, each for 1,000 children. Its educational progress since 1870 will be seen by the following table, and also the "rate" at the end of each triennial period:—

| Rate at end of Triennial Period, and 1889. | School places provided. | No. on the Roll. | Average attendance. |
|--|-------------------------|------------------|---------------------|
| 1870 | — | — | — |
| 1873 | '89 | 58,581 | 59,606 |
| 1876 | 3'0 | 146,074 | 146,031 |
| 1879 | 5'15 | 219,297 | 233,480 |
| 1882 | 6'15 | 280,275 | 295,833 |
| 1885 | 8'0 | 357,298 | 364,140 |
| 1888 | 8'36 | 407,636 | 420,914 |
| 1889 | 7'97 | 415,016 | 434,875 |

The following table shows the position of the **Voluntary Schools** during the same period:—

| | School places provided. | No. on the Roll. | Average attendance. |
|------|-------------------------|------------------|---------------------|
| 1870 | 261,158 | 221,401 | 173,406 |
| 1873 | 282,936 | 259,543 | 195,662 |
| 1876 | 287,116 | 259,436 | 199,605 |
| 1879 | 271,314 | 235,084 | 182,728 |
| 1882 | 263,617 | 223,297 | 174,723 |
| 1885 | 262,175 | 211,711 | 168,712 |
| 1888 | 262,022 | 207,887 | 162,349 |
| 1889 | 262,270 | 209,193 | 164,770 |

Taking into account the fact that voluntary schools, accommodating 47,389 children, have been transferred to the Board, the above tables show that the work of the Board has been accomplished without any serious detri-

ment to the attendance at the voluntary schools, notwithstanding the fact that the number of children now on the rolls of board schools alone is considerably greater than the total number of children on the rolls of voluntary schools in '70. With regard to the rate, it should be stated that although, until '88, it had constantly been increasing, the average cost per child shows but a slight fluctuation. The chief cause of the increase of cost must be looked for in the ever-growing number of children, for whom the Board are compelled to make provision. The London Board labours under peculiar difficulties, owing to the exceedingly high price of land, and the larger salaries paid in London, as compared with provincial towns. The buildings of the Board are fitted with modern improvements and additions have from time to time been made as experience has proved their need. The health of the children has been carefully studied in such matters as lighting, warming and ventilating, under the hope that the care shown in all sanitary matters will have a great influence upon the health of the working classes of London. Outside the school building the Board have shown the same care of the children attending its schools. Extensive playgrounds have in most cases been provided, and wherever there is room, gymnastic apparatus also.—Curriculum (with one or two exceptions, as prescribed by the Code of the Education Department): reading, writing, and arithmetic (and needlework for girls), of course take precedence over all other subjects. The class subjects last year were English, geography, elementary science, history; and needlework for girls. Of these two are compulsory. Besides these there are specific subjects; viz., algebra, euclid, mensuration, mechanics, Latin, French, animal physiology, botany, principles of agriculture, chemistry, physics, domestic economy, hygiene, social economy, and the practice of cookery, which are only taken by individual children in the upper classes of the school. With regard to the three Rs, it is satisfactory to note the progress which has been sustained for many years. The following table shows the results of the examinations at the end of each triennial period since 1873, and 1889:—

| | 1876. | 1879. | 1882. | 1885. | 1888. | 1889. |
|-------------------|-------|-------|-------|-------|-------|-------|
| Reading | 87'1 | 88'2 | 92'1 | 95'1 | 96'0 | 96'8 |
| Writing | 83'7 | 84'7 | 90'0 | 89'2 | 91'1 | 91'8 |
| Arithmetic | 77'9 | 80'0 | 85'4 | 87'4 | 89'0 | 89'7 |

The fees charged by the Board (and sanctioned by the Education Department) range from 1d. to 6d. per week, with the exception of two schools, where the fee is 9d. (The average fee for boys, girls, and infants is 2'8d.) They are uniform in each department, and are, in each case, determined after regard has been had to the position of the parents. The number of teachers employed at Lady Day, 1889, was 6,898: 2,319 male and 4,579 female. There were also about 1,666 pupil teachers.—**Compulsory Attendance at School.** The bye-laws of the School Board for London, made under section 74 of the Education Act of 1870, provide that children must attend a certified efficient school, or receive instruction in some other efficient manner. In order to

enforce these bye-laws, and the additional regulations relating to education and employment contained in the Education Acts of 1876 and 1880, the Board have a staff of visitors (attendance officers) in each division of the Metropolis, whose duty it is to co-operate with the teachers of *all efficient schools* in securing the attendance of children. Prosecutions are only ordered after all other means have failed to secure a child's attendance. The visitors also make inquiries in special cases of non-payment or inability to pay school fees, and also in cases of applications for labour certificates, etc. The number of visitors at Lady Day, '89, employed in the Metropolis (including ten superintendents) was 278.—**Industrial Schools.** The School Board for London have availed themselves of the provisions of the Industrial Schools Acts and the Education Acts, relating to children wandering or not under proper control, or begging or not under proper guardianship, or persistently truanting from school, or charged with felony, etc., with a view to such cases being sent to industrial schools (*a*) under voluntary management, or (*b*) under the management of the Board. There are sixty-two of the former schools with which the Board have agreements. There are also three of the latter schools: (1) a training-school ship on the Thames, (2) an industrial school at Brentwood, chiefly for cases not suitable for other industrial schools, and (3) a truant school for boys at Homerton. In the ordinary course children are committed until they attain the age of sixteen years, with power to the managers to license out to employment at an earlier age, if desirable. In the case of *truant schools* the children are licensed out, after a short detention, on condition that they attend an ordinary day school. The discipline while under detention has such a deterrent effect that, in the majority of cases, the boys attend school afterwards, but in case of failure the license is revoked and the boy taken back to the school for further treatment. Up to Lady Day, '89, 13,599 cases had been sent to industrial and truant schools, and of these 11,032 had been discharged to friends, employment, etc., leaving at that time 2,567 children still in the schools. Wherever possible the parents are called upon by the agents of the Home Office to contribute towards the maintenance of their children in these schools.—**Evening Classes** have now been established in every part of the Metropolis, and the last report of the Evening Classes Committee states that the results of the session '88-89 are extremely satisfactory. The total number of pupils enrolled during the session was 15,732; average number on rolls, 8,645; and average attendance, 5,552. The Board formerly consisted of 49 members, but the number is now fixed at 55. The election of the *seventh* Board took place on Nov. 26th, '88. **Constitution of the Board:** City of London—Miss Davenport-Hill, Albert O. Rutson, Esq., J.P., Rev. William Martin, Sir Richard Temple, Bart., M.P. *Chelsea*—Rev. George W. Gent, M.A., John H. Chapman, Esq., M.A., F.S.A., Rev. Prebendary Eyton, M.A., Professor Gladstone, F.R.S. School Attendance Committees. The Lord Sandon's Education Act of 1876 prescribed that every district in England and Wales which had not a school board should have a school attendance committee, chosen in boroughs and townships by town councils and urban sanitary authorities, and in all other places by boards of guardians. Thus every inch of the area of England and Wales is covered either by a school board or by a school attendance

committee. The chief difference of function between the two bodies is that the attendance committee cannot build or carry on schools; it can only compel attendance in the voluntary schools, and there must be enough voluntary school accommodation for all the children in the district. A large proportion of the rural area is under attendance committees, and there are a few important towns in the same position, including Accrington, Birkenhead, Bury, Cambridge, Cheltenham, Chester, Colchester, Dover, Lincoln, Preston, Southport, St. Helens, and York.

School Boards, The. There were ('89) 2265 School Boards in England and Wales, covering a population of 16,379,000, leaving a population of about 9,570,000 under school attendance committees. Wherever there is not enough efficient public elementary school accommodation in a district for all the children a School Board must be formed, whose first duty it is to make good the deficiency of accommodation by opening board schools. Districts without a deficiency of accommodation may have a School Board by passing a vote to that effect by a majority of the town council in boroughs, or of ratepayers in districts which are not boroughs. Thus it happens that there are School Boards in some districts without board schools. It is one of the chief duties of the School Board to compel the attendance of all the children of school age at an efficient public elementary school, whether a board school or a voluntary school. School age is from 5 to 14, with exemptions from compulsory attendance for children who have passed certain standards of proficiency. There must be accommodation also for as many children as present themselves under the age of 5 and over the age of 14. There are school boards in most of the large boroughs of England and Wales, but a few remain under school attendance committees. In boroughs with a population of 100,000 and upwards the School Board consists of 15 members; from 75,000 to 100,000, 13 members; from 40,000 to 75,000, 11 members; from 20,000 to 40,000, 9 members; from 5,000 to 20,000, 7 members; under 5,000, 5 members. Any man or woman twenty-one years of age, without any restriction as to qualification or residence, may be elected a member of a school board. The board may not interfere with the management of a voluntary school, but may demand from those schools returns of the attendance of children. The board may take compulsory possession of a site for a board school. It borrows money for building board schools, paying back the whole amount, interest and principal, in fifty years. All other expenses must be met year by year, the deficiency being made up by a school rate. School boards which fail in their duty are declared "in default," and may be superseded by a school board appointed by the Committee of the Privy Council on Education, at the cost of the ratepayers. School Boards in Scotland are under a separate Act of Parliament, under which the whole area of that country is under school boards, and the school attendance committee is unknown. See LONDON SCHOOL BOARD and SCHOOL ATTENDANCE COMMITTEES.

Science and Art Department of the Committee of the Council on Education is a separate branch of the Education Department. Under it are the Normal School of Science and Royal School of Mines, S. Kensington and Jermyn Street, the National Art Training School, S.

Kensington, numerous schools of science and art which receive payments on results, grants in aid, etc., the S. Kensington, Bethnal Green, and Indian Museums, the Science and Art Libraries, the Geological Museum, Museums of Edinburgh and Dublin, and the Geological Survey of the United Kingdom. It spends sums in circulating science and art objects to country institutions, promotes local effort by conditional aid, and it has its own staff of examiners and inspectors. See, and permanent head of the Department Major-Gen. Donnelly, C.B. (late R.E.), S. Kensington.

Scientific Men and Doctors Deceased (Dec. 1st, '88, to Nov. 21st, '89). See OBITUARY.

Scientific Progress in '89. See under their various alphabetical headings, e.g., ANTHROPOLOGY, GEOLOGY, etc.

Scotland, Secretary for. By an Act of '85 this old office was revived, but not as a principal secretaryship, and there were transferred to it, so far as Scotland was concerned, the powers and duties of the Secretary of State under Acts concerning the Poor Law, labourers dwellings, lunacy (except criminal lunatics and insane prisoners), police, prisons, public health, roads and bridges, salmon fisheries, wild birds protection, fishery board, rivers pollution, and Scotch universities. The Scotch Secretary is also Vice-President of the Scotch Education Department, which is a committee of the Privy Council appointed by Her Majesty, and Keeper of the Great Seal. All the rights of the Lord Advocate (q.v.) were reserved by the statute. By the Secretary for Scotland Act '87 all the other powers and duties of the Home Secretary, so far as they relate to Scotland, were, with the following exceptions, transferred to and vested in the Scotch Secretary: Factory and Workshop Act '78, Coal Mines Regulation Act '72, Metalliferous Mines Regulation Act '72, Explosives Act '75, Cruelty to Animals Act '76, Reformatory and Industrial Schools Act '66-79. In order to remove doubt, it was explained and enacted in a statute of '89 that none of the functions of the Secretary for War had been transferred to the Secretary for Scotland by virtue of the previous Acts. See SECRETARY OF STATE, MINISTRY.

Scottish Peers. See PEERAGE.

"Scribner's Magazine" (monthly). Started January 1887, reviving the title which was formerly held by the present *Century Magazine*. It offers several attractive features, one of which is its serial stories by the best authors of the day. Published in New York by Charles Scribner's Sons, and simultaneously in England by Warne & Co.

Scrutin d'Arrondissement. Single ballot system, whereby each *arrondissement* (district, parish, or ward) returns its own member for Parliament. See SECRETARY OF STATE, MINISTRY.

Scrutin de Liste. Multiple ballot system, whereby all the members who offer themselves for parliamentary election are put on the same list for the whole of the *département* (county) and returned at the same election.

Sculling Championship of the World. See AQUATICS.

Sea Fisheries Regulation Act, '88. See SESSION, AUTUMN '88, sect. 19.

Secretary of State. As early as 1253 there was a secretary to the sovereign, but the office was not nearly so important as it afterwards became, and it is doubtful whether before

Henry VIII.'s days the holder was a privy councillor. From the time of Elizabeth until the union with Scotland, there were two principal secretaries of state, and Anne added a third for Scotch affairs, but this office was abolished some years later. While there were two principal secretaries they divided home affairs between them, and one was at the head of the northern department, which included Denmark, Germany, Russia, and other countries, and the other was at the head of the southern department, which included France, Italy, Spain, etc.—to the elder of the two ministers being also committed Irish and Colonial affairs. A secretary for America or Colonial affairs was added in the reign of George III., but this office was abolished in 1782; the terms northern and southern were discontinued, and the duties divided into Home and Foreign, the affairs of Ireland and the Colonies being included in the former department. Another principal secretary who was intrusted with Colonial and War Office business was appointed in 1794, and in 1854 a secretary for War was appointed, who in the following year took over the duties of Secretary-at-War—a financial office in connection with military business which had existed for many years previously, and which was in 1863 formally and finally abolished. In 1858 a fifth principal secretary of state was appointed for India, so that there are now five principal secretaries of state. They are appointed without patent, by mere delivery to them of the seals of office by the sovereign; each is capable of performing the duties of the other, and in successive statutes new administrative duties are cast, not upon any one of the five individually, but upon the "Secretary of State," or "one of H.M. Secretaries of State." Each Principal Secretary is assisted by a Parliamentary Under Secretary and by a Permanent Under Secretary. The five Permanent Under Secretaries are: Home Office, Mr. Godfrey Lushington, C.B., salary £2000; Foreign Office, Sir Philip Currie, K.C.B., £2000; Colonial, Sir Robert G. W. Herbert, K.C.B., £2000; War, Sir Ralph W. Thompson, K.C.B., £2000; India, Mr. John A. Godley, C.B., £2000. The office of Secretary for Scotland, re-created in '85, is not a principal secretaryship, so that although the holder exercises in Scotland many of the powers and duties of the Home Secretary, he is not by virtue of his office a Cabinet Minister. The Permanent Under Secretary for Scotland is Mr. Cochran-Patrick, £1500. See MINISTRY, SCOTLAND, IRELAND (GOVERNMENT OF), HOME OFFICE, FOREIGN OFFICE, etc.

Seeley, John Robert, M.A., Professor of Modern History at Cambridge, is a son of the late Mr. Seeley, the head of a well-known firm of London publishers, and was b. 1834. Educated at the City of London School, and at Christ's College, Cambridge. He graduated Senior Classic and Chancellor's Medalist, and was elected a Fellow of his college ('58). He subsequently became assistant classical master at the City of London School, and ('63) was appointed Professor of Latin in University College, London, where he remained till '69, when he was elected to the chair which he now occupies. Professor Seeley is the author of "Classical Studies as an Introduction to the Moral Sciences," "Lectures and Essays," "Livy with Introduction, Historical Examination, and Notes," "Life and Times of Stein," and "The Expansion of England." Professor

Seeley has also always been regarded as the author of "Ecce Homo," a work which created a profound sensation at the time of its appearance ('65). "Natural Religion," by the author of "Ecce Homo," did not, however, attract so much attention.

Seismology. See EARTHQUAKES.

Selangor. A Malay state under British protection. See STRAITS SETTLEMENTS.

Selborne, Roundell Palmer, P.C., 1st Earl of (creat. 1872), was b. at Mibury 1812, and was educated at Trinity Coll., Oxford, where he graduated First Class in Classics '34. He was subsequently elected a Fellow of Magdalen; called to the bar at Lincoln's Inn ('37); became Solicitor-General (July '61); Attorney-General (Sept. '63); resigned (July '66) on account of his disapproval of the disendowment of the Irish Church; acted as counsel for the British Government in the decision of claims under the Washington Treaty ('71); was M.P. for Plymouth (July '47 to July '52, also June '53 to March '57), and for Richmond (July '61 to Oct. '72), when he became Lord Chancellor. On the formation of Mr. Gladstone's third Government ('86), Lord Selborne refused to join the Cabinet, owing to his disapproval of the Prime Minister's Irish policy. He has since acted with the Liberal Unionists. Lord Selborne has published one or two books upon Church matters, including "The Case against Disestablishment" ('86), and "Churches and Tithes" ('87). He was elected Lord Rector of St. Andrews University '77. He is also the editor of "The Book of Praises from the Best English Hymn-writers."

Selden Society. Inaugurated in '87 "to encourage the study and advance the knowledge of the history of English law." The Society has issued its first volume, "Select Pleas of the Crown A.D. 1200—1225," and its second volume, "Selections from Manorial Rolls of the 13th Century," both edited by Professor F. W. Maitland; and has in preparation its third volume, "Select Civil Cases of the 13th Century," edited by Mr. W. Paley Baildon, of Lincoln's Inn. The Society consists of a Council comprising the leading lawyers in England, the Colonies, and the United States, in which it has also local secretaries. Patron, H.M. the Queen; Vice-Patron, H.R.H. the Prince of Wales; President, the Lord Chief Justice of England; Vice-President, Lord Justice Fry. Hon. Sec. and Treasurer, P. Edward Dove, Lincoln's Inn.

Select Committees. See PARLIAMENTARY PROCEDURE.

Self-Help Emigration Society, for the under-paid and unemployed in Great Britain, assists applicants whose character and fitness are assured to emigrate to Canada. The Society supplements the funds of the intending emigrant, and assists him to obtain his passage. Introductions are furnished to the Society's correspondents, who are men of position, forty-one in number, resident in various centres of Canada, and work is provided for the emigrant on his arrival out. The cost to the Society averages £2 10s. per head, and during the past year some 900 persons have been thus located, at a cost of about £4,500, £3,000 of which was contributed by the emigrants and their friends. Employment was found for all who were willing to work. Office, 50, Fleet Lane, Farringdon Street. Application from intending emigrants should be made by letter to the Sec., Rev. R. Mackay.

Senegal, or French Senegambia. A French colony of Western Africa, on the Senegal and the Gambia rivers. Capital St. Louis. Islands of Goree and Dakar part of the colony. Great part is fertile and rich in produce. Senegal navigable 750 miles up. Thence road now made to Bamako, on Niger, and a railway is in process of construction. A steamer has been placed on the Upper Niger, and trade is being rapidly developed. See COLONIES of FOREIGN POWERS.

Senegambia. A country in the west of equatorial Africa, comprising the regions watered by the Senegal and Gambia, and bounded north by the Sahara, south by Sierra Leone, east by the Joliba or Upper Niger, and west by the Atlantic. This vast region is estimated to contain an area of 400,000 sq. m., and a population of from 10,000,000 to 12,000,000 Berbers, Negroes, and Europeans. It is divided into French Senegambia (Senegal), and the territories placed under French protection), British Senegambia (Gambia, etc.), Portuguese Senegambia (Bissao, Cassamansa, etc.), and independent Senegambia, comprising the native states not under the protection of a European power.

Serjeant-at-Arms. The holder of this office carries the mace when the Speaker enters and leaves the House, places it on the table when the Speaker takes the chair, and under the table when the House goes into committee. He, by the messengers, notifies committees when the House is going to prayers, and sees that strangers withdraw from beneath the galleries when a division is to be taken. He or his deputy sits within the House, near to the door, and executes any directions of the Speaker for the maintenance of order, even should they extend to the removal of a member who has been ordered to withdraw and has refused to obey the ruling of the chair. Certain of the galleries, corridors, etc., are under his charge. The Serjeant-at-Arms of the House of Lords attends the Lord Chancellor with the mace; but the duty of maintaining order in certain parts of the chamber is one of the functions of Black Rod (*q.v.*). Both Serjeants-at-Arms are appointed by the Crown. Mr. H. D. Erskine is Serjeant-at-Arms of the House of Commons, and the corresponding office in the Lords is filled by Lieut.-Col. Hon. Wellington P. M. C. Talbot.

Servia. Formerly an autonomous province of Turkey, now a kingdom under Alexander I. (regency) of the House of Obrenovitch. The executive Power is, by the constitution, vested in the king, and the legislative in the king jointly with the Skuptschina or National Assembly. There is also a Senate or Council of State always in session, which examines and elaborates projects of laws, etc. The Skuptschina of 178 members is elected three-fourths by the nation and one-fourth by the king, and is renewed every three years. Besides this there is a Great Assembly of 538 members, none being royal nominees, called when required to decide vital and constitutional questions. All tax-paying citizens are electors. State religion is Greek Orthodox, but others are tolerated. Education is backward but progressing. In '87 there were 672 normal schools, with 50,860 pupils of both sexes, being one school to 3,000 inhabitants, and one pupil to 39 inhabitants. Of the entire population 19.3 per cent. can read and write. Area, 18,750 sq. m., pop. 1,937,192. Estimated revenue and expenditure for '89,

£1,778,400. Imports over £2,000,000; exports about £1,750,000. National debt about £8,000,000. (For army see FOREIGN ARMIES.) In July 1876 war was declared against Turkey, at the close of which Servia was declared independent, and received an accession of territory—though by no means proportionate to her wishes.—'89. The year opened with the existence of some tension between the King and the Grand Skuptschina, the former eventually saying that if the new Constitution were not passed entire he would dissolve the Skuptschina and rule as he pleased. The result was that the new Constitution was passed, by 41 to 4, on Jan. 1st. M. Gruitch formed a new Cabinet on the 6th. It was resolved by a Constitutional Committee to send delegates to Denmark, France, and Greece to study the electoral system. M. Gruitch resigned, and was succeeded by M. Christitch as Premier. Negotiations between Servia and Bulgaria for a commercial treaty were broken off (Feb.) because Bulgaria refused to allow Servian cattle to be imported into the Principality. The Government gave notice that it would not renew the commercial treaty with Great Britain. A large meeting of Radicals was held, to protest against the determination of the King not to call them to office in March (4th). On the 6th the King abdicated in favour of his son Alexander, and three Regents were appointed to govern during his minority (see SERBIAN POLITICAL PARTIES). A new Radical Cabinet was formed (7th): see DIPLOMACY. The Ministers took the oath of allegiance (8th). M. Vassilievitch visited Queen Natalie, to persuade her not to insist on her holding an interview with her son. Official relations resumed between Servia and Montenegro (15th). King Milan visited the Emperor of Austria (19th). He absolutely refused to let the Queen enter any of the royal palaces, though she might enter the kingdom. During the greater part of the year there was a constant struggle on the part of the Queen to see King Alexander, and on the part of King Milan and the Regents to prevent it; but finally arrangements were made for certain periodical interviews at Belgrade. In April the Servian Patriarchate was restored, and the Archbishop Michael returned to Bucharest (May 27th). Serious political riots occurred on the last days of the month, several persons being killed and wounded. The ex-Metropolitan was re-installed at Belgrade. The Government confiscated the railways, which were worked by a French company, and declined to make any terms with the French railway company beyond making an offer to purchase the plant and rolling stock. King Alexander was anointed in the church of Zitcha, near Kraljevo (July 2nd). It was decided (12th) to arm 30,000 men belonging to the third class of the Reserves. King Milan returned to Belgrade (24th). King Milan, the Regent, General Belimarkovitch, together with M. Gruitch, the Premier, and M. Taushanovitch, Minister of the Interior, left for Vranja (31st), where they conferred with M. Ristitch upon the dynastic question, as well as the settlement of the relations between King Alexander and Queen Natalie, but no absolute decision relative to this important question was arrived at, or, at all events, was made known to the public. The arrangements for placing the Servian army on a war footing were pushed on throughout August. The Government agreed to pay

9,500,000 fr. for the French railway. The election of the new *Skuptschina* took place on Sept. 26th, with the result that the Liberals were placed in a strong majority. The first sitting of the new Chamber was held on Oct. 13th. It was decided to appoint a consul-general at Moscow. It was stated (Nov.) that the Queen had sought the intervention of the Tzar, and had asked that her son might be allowed to spend the Sunday evenings with her; and it was eventually decided that she should have him to dine with her on Sundays and Saints' days. A new loan of 25,000,000 fr. was taken up by the Vienna Länderbank and the Berlin Bankverein Gesellschaft, the interest to be 5 per cent. and price of issue 72. Consult Laveley's "The Balkan Peninsula," *The Statesman's Year-Book*, *Almanach de Gotha*, etc.

Servian Political Parties. The political life of Servia centres in the *Narodna-Skuptschina* or National Assembly, the members of which may be divided into Liberals or pro-Russians, Radicals or pro-Austrians, and Progressists, who also lean to the side of Austria, while, in common with the Radicals, they aim at the continued independence of the kingdom. There is also the *Greater Skuptschina*, which is four times as large as the National Assembly, and is only convened when it is necessary to take a decision upon vital and constitutional questions. It is elected entirely, however, by the people, every tax-paying Servian having the right to vote. The present *Lesser* (or extraordinary) *Skuptschina* was elected on Sept. 26th, '89; but the mandate will expire in a year, when it will be succeeded by the ordinary, or *Narodna-Skuptschina*, which will be elected for three years. The result of the September elections was to place the Liberals in a decided minority, the Radicals being returned 102 strong, the Liberals only securing fifteen seats. In the present *Skuptschina* the Progressists are entirely unrepresented, they and their leader, M. Garashavin, having retired from all participation in parliamentary affairs in June '89. In explanation of the present tangled political situation in Servia, it must be stated that, after divorcing his consort, Queen Natalie, King Milan, in March '89, abdicated his throne in favour of his son, Alexander, a youth of thirteen, appointing as regents M. Ristic (who acted as regent during the minority of King Milan), and Generals Protich and Belimarkovich, all of whom are of Liberal leanings. Previous to abdicating, however, King Milan conferred upon Servia a new constitution, based on very liberal lines. Concurrently with the appointment of the regency a new cabinet was formed under General Gruitch, the members of which are for the most part of strong Radical sympathies. This is sufficient to account for the Radical success at the polls in the September election. The majority in the *Skuptschina*, therefore, must be regarded as hostile to the regents, and also to the Obrenovitch dynasty.—The Radical leader, M. Pashich, having been a consistent and bitter opponent of King Milan, whose deposition he demanded at the outbreak of the Servo-Bulgarian war. A Pashich ministry, therefore, is not improbable, particularly as General Gruitch has no strong political views, although M. Pashich is also credited with the design of supplanting M. Ristic as chief regent. Nothing, indeed, is certain in the present

condition of affairs; the only approach to a safeguard against the overthrow of the Obrenovitch dynasty being that the army is loyal to it, and would probably resist the attempt to substitute a Karageorgevitch for the youthful King Alexander, as, in all probability, would Austria.

Session, Parliamentary, 1888 (Autumn Sitting). [For sections 28-145 see next article.]

The third session of the twelfth Parliament of Her Majesty was opened on Feb. 9th, '88, and adjourned from Aug. 13th to Nov. 6th, when the two Houses reassembled with a view of winding up the business which had been deferred from the summer. [For proceedings during the ordinary Session, and during the autumn sitting up to Dec. 6th, see '89 edition.]

—[1] The greater part of the autumn sitting was absorbed in discussing the estimates, which were taking the whole session, under consideration on forty-two days as compared with an average during the previous twelve years of twenty-six days. The twelve o'clock rule was repeatedly suspended, and there were several Saturday sittings. Supply was closed on Dec. 16th, the Appropriation Bill was introduced on the following day, read a second time on Dec. 20th, and a third time on Saturday, Dec. 22nd, being at eleven o'clock on the same night taken to the Lords and at once passed through all its stages in that House. While the Commons were in committee on the bill (Dec. 21st) Dr. Tanner spoke of the Chief Secretary for Ireland in such terms that he was "named," and suspended from the service of the House for a week. A number of ministerial measures which had stood over from the summer were withdrawn in course of the autumn, among them being the Irish Drainage Bills, Board of Agriculture Bill, Burgh Police and Health (Scotland) Bill, Criminal Evidence Bill, Excise Duties (Local Purposes) Bill (commonly known as the Van and Wheel Tax Bill), Universities (Scotland) Bill, and Employers' Liability Bill; and the Cruelty to Children to Children Bill, Intoxicating Liquors (Ireland) Bill, Railway Companies (Carriage of Fish) Bill, School Board for London (Pensions) Bill; and other measures in charge of private members were also abandoned.

—[2] Mr. J. C. Stevenson's Sale of Intoxicating Liquors on Sunday Bill was discussed on Dec. 14th, and defeated by 167 to 160, an amendment of Mr. Labouchere to the effect that the question of Sunday closing should be relegated to the decision of the inhabitants of the localities in which public-houses are situated, being then adopted by 186 to 128.—[3] Subjoined is a list of the measures which received the Royal Assent on Dec. 24th, these being the only Acts passed during the autumnal sitting, with an outline of the provisions of the more interesting, and important of them:—Appropriation Act—Local Bankruptcy (Ireland) Act—Victoria University Act—Law of Distress and Small Debts (Ireland) Act—Oaths Act—Companies Clauses Consolidation Act—Purchase of Land (Ireland) Amendment Act—Public Health (Buildings in Streets) Act—Land Charges Registration and Searches Act—Patents, Designs, and Trade Marks Act—Borough Funds (Ireland) Act—Sea Fisheries Regulation Act—Sand Grouse Protection Act—Suffragans Nomination Act—Statute Law Revision (No. 2) Act—An Act to continue "The Employers' Liability Act"—Trustee Act—Probate Duties (Scotland and Ireland) Act—Crofters' Commission (Delegation of Powers) Act—Solicitors Act—

Preferential Payments in Bankruptcy Act—Law of Libel (Amendment) Act—Friendly Societies Act.—[4] The Appropriation Act, '88 (51 & 52 Vict. ch. 61) applies a sum out of the Consolidated Fund to the service of the year ending Mar. 31st, '89, and appropriates the supplies granted during the Session of '88.—[5] **Borough Funds (Ireland) Act, '88** (51 & 52 Vict. ch. 53), an Act to authorise the application of funds of municipal corporations and other governing bodies in Ireland, in certain cases, and provides that when in the judgment of a governing body it is expedient for such body to promote or oppose any private bill, or to prosecute or defend any legal proceedings necessary for the promotion or protection of the inhabitants of the district, the costs may be charged on the borough and local funds; but nothing in the section is to authorise any governing body to promote any gas or water bill to compete with any such undertaking established by Act, and the section is not to apply in any case where the promotion of or opposition to a bill has been decided by a committee of either House to be unreasonable or vexatious. The costs of promoting or opposing are to require the sanction of the Local Government Board or Chief Secretary, and of special meetings of the governing body and electors, and a poll may be demanded by the latter. The Local Government Board or Chief Secretary may direct a local inquiry to be held upon any application under the Act.—[6] **Companies Clauses Consolidation Act, '88** (51 & 52 Vict. ch. 49) amends the Companies Clauses Consolidation Act, '45, in respect to voting by proxy, by providing that where the shareholder is a member of a body corporate, the proxy may be any member of such body, though not personally a shareholder in the company.—[7] **Crofters Commission (Delegation of Powers) Act, '88** (51 & 52 Vict. ch. 63), enacts that it shall be competent for the Crofters Commission to delegate certain of the duties prescribed in the Crofters Act of '86 to one or more of their number, assisted by two valuers or assessors, but any determination arrived at by such commissioner or commissioners is to be subject to review upon appeal, by the whole three commissioners. The 51 and 52 Vict., ch. 58, continues the **Employers' Liability Act** until Dec. 31st, '89. **Friendly Societies Act '88** (51 and 52 Vict., ch. 66), has been repealed by the **Friendly Societies Act '89** (see next art., sect. 75).—[8] **Land Charges (Registration and Searches) Act, '88** (51 and 52 Vict., ch. 51). "An Act for Registering certain Charges on Land and for facilitating searches for them," provides that there should be established and kept at the office of the Land Registry a register of writs and orders affecting land, and that there may be registered therein any writ or order affecting land issued or made by any court for the purpose of enforcing a judgment statute or recognisance, and any order appointing a receiver or sequestrator of land. Every such writ and order, and every delivery in execution taken in pursuance of such writ or order is to be void as against the purchaser for value of the land unless the writ or order is for the time being registered in pursuance of the Act. A register of deeds of arrangement affecting land is also to be kept at the office of the Land Registry, wherein deeds of arrangement affecting land may be registered, and purchasers are protected against such deeds if registered. There is also to be kept at the

same office a register of land charges wherein land charges may be registered, purchasers being protected against unregistered charges. "Land" includes messuages, tenements and hereditaments; "land charge" means a rent or annuity or principal moneys payable by instalments or otherwise, but not by deed, upon land, under the provisions of any Act, for securing to any person either the money spent by him or the costs, charges, and expenses incurred under such Act, or the moneys advanced by him for repaying the moneys spent, or costs, charges, and expenses incurred by another person under the authority of an Act of Parliament, and a charge under the 35th sect. Land Drainage Act, '61, or the 29th sect. of the Agricultural Holdings (England) Act, '83, but does not include a rate or scot. Any person may search in any register or index kept in pursuance of the Act on paying the prescribed fee.—[9] **Law of Distress and Small Debts (Ireland) Act, '88** (51 and 52 Vict., ch. 47), amends the law relating to execution for small debts and the levying of distress for rent in Ireland, with special provisions for the city of Dublin.—[10] **The Law of Libel (Amendment) Act '88** (51 and 52 Vict., ch. 64), repeals sect. 2 of the Newspaper Libel and Registration Act, '87, and enacts (sect. 3) that a fair and accurate report in any newspaper of proceedings publicly heard before any court exercising judicial authority shall, if published contemporaneously with such proceedings, be privileged; but nothing in the section is to authorise the publication of any blasphemous or indecent matter. Section 4 enacts that a fair and accurate report published in any newspaper of the proceedings of a public meeting, or (except where neither the public nor any newspaper reporter is admitted) of any meeting of a vestry, town council, school board, board of guardians, board or local authority formed or constituted under the provisions of any Act of Parliament, or of any committee appointed by any of the above-mentioned bodies, or of any meeting of any commissioners authorised to act by letters patent, Act of Parliament, warrant under the Royal Sign Manual, or other lawful warrant or authority, select committees of either House of Parliament, justices of the peace in quarter sessions assembled for administrative or deliberative purposes, and the publication at the request of any Government office or department, officer of state, commissioner of police or chief constable of any notice or report issued by them for the information of the public, shall be privileged, unless it shall be proved that such report or publication was published or made maliciously; but nothing in the section is to authorise the publication of any blasphemous or indecent matter; the protection intended to be afforded is not to be available as a defence in any proceedings, if it shall be proved that the defendant had been requested to insert in the newspaper in which the report or other publication complained of appeared a reasonable letter or statement by way of contradiction or explanation of such report or other publication, and had refused or neglected to insert the same; and nothing contained in the section is to be deemed or construed to limit or abridge any privilege now by law existing, or to protect the publication of any matter not of public concern, and the publication of which is not for the public benefit. For the purposes of this section "public meeting" is defined to mean any

meeting *bond fide* and lawfully held for a lawful purpose, and for the furtherance or discussion of any matter of public concern, whether the admission thereto be general or restricted. Sect. 5 empowers a judge, upon an application by or on behalf of two or more defendants in respect to the same, or substantially the same, libel brought by one and the same person, to make an order for the consolidation of such actions, so that they shall be tried together; and in a consolidated action of the kind the jury are to assess the whole amount of the damages, if any, in one sum, but a separate verdict is to be taken for or against each defendant, and if the verdict is against the defendant or defendants in more than one of the actions so consolidated, the jury are to apportion the amount of damages, and the judge, if he award the plaintiff costs shall apportion such costs as he may deem just, between and against those defendants. The defendant may give in evidence, in mitigation of damages, that the plaintiff has already recovered or sued for damages, or has received, or agreed to receive, compensation in respect of a libel or libels to the same effect as that for which the action has been brought. The section of the Act of '81 requiring the *fieri* of the Attorney-General before a criminal prosecution for libel can be commenced is repealed, and instead thereof it is enacted that such criminal proceedings shall not be instituted without the order of a judge at chambers being first had and obtained, such application to be made on notice to the person accused, who is to have an opportunity of being heard against it. A person charged with libel before any court of criminal jurisdiction, and the husband and wife of such person, are to be competent, but not compellable witnesses, on every hearing at every stage of the case.—[11] The Local Bankruptcy (Ireland) Act, '88 (51 & 52 Vict., ch. 44) provides for the establishment of local courts of bankruptcy in Ireland. The Recorder of Cork, and the Recorder of Belfast respectively are to constitute and hold local bankruptcy courts, the district of the one to be the county and city of Cork, and of the other the county of Antrim, the county of the town of Carrickfergus, and the county of Down; and if it shall at any time after the passing of the Act appear to the Lord-Lieutenant to be expedient, he may, with the concurrence of the Treasury, by Order in Council, provide for the establishment of similar courts in Londonderry, Galway, Waterford, and Limerick, or any of them.—[12] The Oaths Act, '88 (51 & 52 Vict., ch. 45) enacts that every person upon objecting to being sworn, and stating, as the ground of such objection, either that he has no religious belief, or that the taking of an oath is contrary to his religious belief, shall be permitted to make his solemn affirmation instead of taking an oath in all places and for all purposes where an oath is or shall be required by law, which affirmation shall be of the same force and effect as if he had taken the oath; and if any person making such affirmation shall wilfully, falsely, and corruptly affirm any matter or thing which, if deposed on oath, would have amounted to wilful and corrupt perjury, he shall be liable to prosecution, indictment, sentence, and punishment in all respects as if he had committed wilful and corrupt perjury. If any person to whom an oath is administered desires to swear with

uplifted hand, in the form and manner in which an oath is usually administered in Scotland, he is to be permitted to do so.—[13] It was enacted by the Patents, Designs, and Trade Marks Act, '88 (51 & 52 Vict., ch. 50) that after July 1st, '89, a person shall not be entitled to describe himself as a patent agent unless he is registered under the Act by the Board of Trade, who are to make rules required for giving effect to this provision; but every person who proves to the satisfaction of the Board that prior to the passing of the Act he had been *bond fide* practising as a patent agent, should be entitled to be registered in pursuance of the Act. Any person knowingly describing himself as a patent agent in contravention of the section, is to be liable on summary conviction to a fine not exceeding £50. "Patent agent" is defined to mean exclusively an agent for obtaining patents in the United Kingdom. A number of amendments of great importance to those interested are made in the Patents, Designs, and Trade Marks Act, '89.—[14] The Preferential Payments in Bankruptcy Act, '88 (51 & 52 Vict., ch. 62) gives, in the distribution of the property of a bankrupt or of the assets of any company being wound up under the Companies Acts a priority over other debts, to rates, taxes, and wages.—[15] Probate Duties (Scotland and Ireland) Act, '88 (51 & 52 Vict., ch. 60), "An Act for assigning to Scotland and Ireland respectively certain Shares of the Probate Duties; and for providing for the application of such Shares," enacts that the 11 per cent. of the Probate Duty grant payable to Scotland during the financial year '88-9 should be distributed in paying £30,000 for the relief of local taxation in the highlands and islands of Scotland, in paying to the road authorities a contribution to the cost of roads, the balance to be distributed among the parochial boards in Scotland; and that the 9 per cent. payable to Ireland shall, until otherwise provided by Parliament, be distributed,—£5,000 to the Royal Dublin Society for the improvement of the breed of horses and cattle, and of the balance one-half among the guardians of unions, and the remaining half among the road authorities.—[16] Public Health (Buildings in Streets) Act, '88, being "An Act to amend the Public Health Acts in relation to Buildings in Streets" (51 and 52 Vict., ch. 52) repeals in part section 156 of the Public Health Act 1875, enacting in lieu thereof that it shall not be lawful in any urban district, without the written consent of the urban authority, to erect or bring forward any house or building in any street, or any part of such house or building, beyond the front main wall of the house or building on either side thereof in the same street. The penalty to which any offender under the section is liable is 40s. for every day during which the offence is continued after written notice.—[17] Purchase of Land (Ireland) Amendment Act, '88 (51 and 52 Vict., ch. 49), provides that a further sum of £5,000,000 for the purpose of advances under the Purchase of the Land (Ireland) Act, '85, and amending Acts, shall be advanced out of the Local Loans Fund, in accordance with the National Debt and Local Loans Act, '87. No advance is to be sanctioned by the Land Commission to any one purchaser exceeding the sum of £3,000, unless in the opinion of the Land Commission the advance of such larger amount, (not exceeding £5,000) is expedient for the purpose of carrying out sales on the estate

the same landlord.—[18] **Band Grouse Protection Act, '88** (51 and 52 Vict., ch. 55), was passed in order that this bird may, if possible, become acclimatised in the United Kingdom: and enacts a close time, which commenced on Feb. 1st, '89, and is to endure until Jan. 1st, '92.—[19] **Sea Fisheries Regulation Act, '88**, "An Act for the regulation of the Sea Fisheries of England and Wales" (51 and 52 Vict., ch. 54), enacts that the Board of Trade may from time to time, on the application of a county council or borough council, create a sea fisheries district, comprising any part of the sea within which Her Majesty's subjects have by international law the exclusive right of fishing, and provide for the constitution of a local fisheries committee for the regulation of the sea fisheries carried on within such district. The committee is to make bye-laws for the regulation of the fisheries, such bye-laws to be subject to confirmation by the Board of Trade, and may appoint fishery officers to enforce such bye-laws.—[20] **The Solicitors Act, '88** (51 and 52 Vict., ch. 65), provides for the custody of the roll of solicitors of the Supreme Court in England, which was entrusted to the clerk of the petty bag until the abolition of the office on the death of the late holder, by the Incorporated Law Society, and otherwise amend the law as to solicitors. The roll is, during office hours, to be open to the inspection of any person without fee or reward. Articles of clerkship are to be registered by the Registrar of Solicitors, and the book in which the entries are made is also to be open to free inspection by any person.—[21] **The Statute Law Revision (No. 2) Act, '88** (51 and 52 Vict., ch. 57), is for further promoting the revision of the statute law by repealing superfluous expressions of enactment and enactments which have ceased to be in form or have become unnecessary.—[22] **Suffragans Nomination Act, '88** (51 and 52 Vict., ch. 56) enacts that besides the limited list of towns named in "An Act for Nomination and Consecration of Suffragans within this Realm" (26 Hen. VIII., ch. 14), such other towns as Her Majesty may from time to time, by order in council, direct shall be taken, and accepted for sees of bishops suffragan; that Her Majesty may by writing under the royal sign manual from time to time substitute for the see of any bishop suffragan nominated before the passing of this Act any town included in any such order in Council; and that that town shall thenceforth be taken and accepted for the see of that bishop suffragan as if he had been originally nominated thereto.—[23] **Trustees Act, '88**, "An Act to amend the law relating to the Duties, Powers, and Liability of Trustees" (51 and 52 Vict., ch. 50), enables a trustee to appoint a solicitor to be his agent to receive and give a discharge for any money or any valuable consideration or property receivable by such trustee under the trust, provided that such trustee is not to allow such money, etc., to remain in the hands or under the control of the solicitor for a period longer than is reasonably necessary to enable the solicitor to pay or transfer the same to the trustee. A trustee may also, subject to a similar proviso, appoint a banker or solicitor to be his agent to receive and give a discharge for any money payable to such trustee under a policy of assurance. No sale made by a trustee is to be impeachable by *any person* who trusts upon the ground that any of the conditions of sale may have been un-

necessarily depreciatory, unless it shall appear that the consideration for the sale was thereby rendered inadequate; and no sale is to be impeached as against the purchaser upon the ground that any of the conditions of sale were unnecessarily depreciatory unless collusion between purchaser and trustee at the time when the contract for sale was made should appear. There are also important provisions as to loans by trustees, liability for loss by reason of improper investments, indemnity for breach of trust at the instigation or request or consent of a beneficiary; a trustee may insure buildings against fire, may plead the statute of limitations in certain cases; may invest on mortgage of long terms; he may renew where he is trustee of a renewable leasehold, and he may raise money to meet fines on the renewal for a lease; but nothing in the Act is to authorise a trustee to do, or to omit to do, anything forbidden by the instrument creating the trust.—[24] **Victoria University Act, '88** (51 and 52 Vict., ch. 45), entitles graduates of the Victoria University having the degree which would be a qualification if it had been granted by the University of Oxford, or Cambridge, or London, to hold any office or enjoy any privilege or exemption to which graduates of any of those three universities are entitled. COMMITTEES.—[25] **The Commons Committee** appointed to inquire into the present system of ascertaining the official average price of corn in the United Kingdom, and to report what alterations, if any, are expedient, presented their report (Dec. 14th, '88). They recommended, 1st, That the annual average price should be arrived at by adding up the quantities and values for the whole year, and dividing the one by the other, the records of the weekly prices being maintained as at present; 2nd, That the provisions of the Act of 1832 should be more vigilantly enforced, especially with reference to the return of oats.—[26] **The Lords Committee on the Sweating System** took further evidence, and in their second report expressed a hope that they would be permitted to continue their inquiry next session. A motion of the Earl of Dunraven empowering the Committee to employ a gentleman for the purpose of visiting the various districts in the United Kingdom where it has been alleged that the sweating system exists, and examining into the evidence proposed to be submitted to the Select Committee, was (Dec. 20th) agreed to. (See also sect. 77, *Seas, '88*, rd. '89).—[27] **Parliament was prorogued** by Royal Commission on Christmas Eve, the Queen's Speech being as follows:—"My Lords and Gentlemen,—I have great satisfaction in being able to release you from your protracted labours. My relations with all Foreign Powers continue to be friendly. I regret that the Convention which was concluded between myself and the President of the United States for the adjustment of the questions which had arisen in reference to the Fisheries in North American waters has not commended itself to the judgment of the Senate of the United States, in whom, according to the constitution of that country, the power of ratification is vested. The temporary arrangements, however, which have been adopted will, I trust, prevent any immediate inconvenience arising from this decision. The Conference which has been held in the subject of Bounties upon the exportation of Sugar has been brought to a satisfactory

issue by the conclusion of a Convention for their abolition, which has been signed by the representatives of most of the sugar-producing countries. The restoration of Egypt to a condition of political and financial security has been for the time interrupted by an attempt on the part of the *Boussanese* to possess themselves of the port of Suakin. The dispersion of the besieging forces has been effected by a brilliant military operation on the part of the Egyptian troops, supported by a British contingent. In other respects, the administrative and economical progress of Egypt has been satisfactory. An insurrection has broken out upon the continental portion of the dominions of the Sultan of Zanzibar, which has brought with it considerable destruction of life and property in the German settlements on that coast. It is evident that the renewed vigour of the Slave Trade, of which symptoms have unhappily shown themselves in several parts of Africa, has largely contributed to the production of these disturbances. I have joined with the Emperor of Germany in establishing a naval blockade of that part of the coast which is in insurrection, in order to prevent not only the exportation of slaves, but also the importation of munitions of war. My Indian dominions have enjoyed general tranquillity and prosperity during the past year. Disturbances, however, have occurred in the neighbouring region of the Black Mountain, and on the extreme frontier of Sikkim; but they have been terminated without difficulty. A rebellion which broke out in Afghanistan under Ishak Khan, and which at one time threatened to assume formidable proportions, has been entirely subdued by the military forces of the Ameer. A rising on the part of some Zulu Chiefs, which does not seem to have met with any sympathy on the part of the population, has been suppressed by my troops and the native levies; and the chiefs concerned in it are awaiting their trial before a Special Commission.—Gentlemen of the House of Commons,—I thank you for the liberal provision which you have made for the service of the State. I trust that the financial measures which you have sanctioned will materially increase the public resources of the country, without adding to its fiscal burdens. My Lords and Gentlemen,—The measures which you have passed for extending the functions and improving the machinery of Local Government in England are calculated to increase the loyal attachment of my people to their institutions. I trust that you may be able now to promote the successful working of these changes in your several localities; and that in this and all other fields of duty the blessing of Almighty God may be with you.

Session, Parliamentary, of 1889. This article contains an outline of the principal business and legislative results of the Session, the acts passed during the Autumnal Session of '88 being dealt with in the preceding article, which includes sects. 1 to 27. As in last year's "ANNUAL," Military and Naval Affairs are dealt with mainly under the headings of ARMY and NAVY, though in sects. 29 and 40 will be found some reference to the measures adopted for increasing the safety of our shores and commerce. Particulars as to the Civil Service Estimates, the Budget, and the Conversion Scheme will be found, as before, included in the article FINANCE, NATIONAL (but see also sect. 73); and affairs in Ireland, changes in the personnel of

the two Houses, and the state of parties, though referred to below, are dealt with specially under appropriate headings. For convenience of reference, the article, like the preceding one, is broken up into numbered sections, and is divided into three parts—the first, containing the Queen's Speeches at the opening and prorogation of Parliament, and having reference to a number of miscellaneous matters of interest, upon many of which the judgment of the House was taken; the second being devoted to proceedings on bills and an analysis of the principal acts passed; and the third to reports of committees.—(28) The fourth Session of the twelfth Parliament of Her Majesty was opened by Royal Commission on Feb. 21st, the Lord Chancellor delivering the Queen's Speech as follows:—"MY LORDS AND GENTLEMEN,—During the brief period that has elapsed since the close of the last Session, nothing has taken place to affect the cordial relations which exist between myself and other Powers. The operations which had been successfully completed in Egypt a few days before the last Prorogation, have effected the object for which they were undertaken; and I see no ground for apprehending the renewal of disturbance in the neighbourhood of Suakin. The negotiations which I had directed to be opened with the rulers of Thibet, for the purpose of preventing encroachment on my rights over the territory of Sikkim, have not as yet been brought to a favourable conclusion; but I hope that further military operations will not be necessary. I have consented to take part in a Conference with Germany and the United States at Berlin upon the affairs at Samoa, in continuation of that which was recently assembled at Washington. GENTLEMEN OF THE HOUSE OF COMMONS,—The Estimates for the public service of the year will be laid before you. The unceasing expenditure upon warlike preparation which has been incurred by other European nations has rendered necessary an increase in the precautions which have hitherto been taken for the safety of our shores and our commerce. The counsels by which other powers are guided, and which dispose of their vast resources, are at present uniformly friendly to this country; but I have no right to assume that this condition is necessarily secure from the possibility of change. MY LORDS AND GENTLEMEN,—Some portions of the Bill which was presented to you last year for amending the Local Government of England and Wales were laid aside in consequence of the pressure upon the time of Parliament; and from the same cause it was found to be impossible to enter upon the question of Local Government for Scotland. Bills dealing with these matters will be laid before you. Your early attention will be asked to measures for developing the material resources of Ireland, and for amending the constitution of the various tribunals which have special jurisdiction over real property in that country. The statutes which you have recently passed for the restoration of order and confidence in Ireland have already been attended with salutary results. Legislative provision will be necessary for executing the Convention into which I have entered for the suppression of bounties on the exportation of sugar; and also for completing of Conversion of the Three per Cent. Annuities. The state of the gold coinage has for some years past been the subject of legitimate complaint. A measure for restoring

it to a satisfactory condition will be laid before you. Though the Commission which I appointed to inquire into the Civil Establishments of the United Kingdom has not yet completed its labours, it has already made a report of much value, and proposals for legislation arising out of that report will be submitted to you. Several subjects which I have commended to your care in previous years, but which the increasing burden of your duties has shut out from consideration, will be submitted to you again. In this number will be included measures relating to tithes, for the regulation of the Universities of Scotland, for determining the liability of employers in the case of accidents, for establishing a Department of Agriculture, for cheapening the transfer of land, and for remedying abuses attaching to Joint Stock Companies formed under limited liability. I pray that the blessing of Almighty God may be with you in the discharge of your arduous duties.—The Address in reply to the Royal message was moved and seconded by the Earl of Londesborough and Lord Penrhyn in the House of Peers, and by Mr. Shaw-Stewart and Sir J. Colomb in the Commons. In the one House the debate on the Address was disposed of in one evening, but in the Commons it extended into ten sittings. Although there were several most animated debates, party feeling ran at times very high, and there were occasional "scenes" in the Lower House, the Session may be generally described as a quiet one. It opened in somewhat exciting circumstances, for the very day on which the two Houses met witnessed the breakdown of the case for the forged letters published in the *Times*; but after the series of attacks made upon the Government in connection with the failure of this part of the case submitted to the Special Commission had been repulsed, members settled quietly down to work, and despite occasional outbursts kept steadily at it, so that before the prorogation no less than 76 public Acts had been placed upon the statute book. As the Session of '88 had been devoted in great measure to English affairs, in '89 the two Houses turned their attention to the needs of Scotland; though the passing of the Naval Defence Act proved that the Government were not forgetful of the requirements of the Empire as a whole. The Irish legislation brought forward by the ministry was principally in fulfilment of their pledges to develop the material resources of the country (see sect. 83). Having regard to the number of prosecutions instituted against their colleagues, it cannot be said that the Parnellites availed themselves unduly of the opportunities afforded by the rules of the House for discussing the arrest and prison treatment of their friends, and the administration of the affairs of the country generally. The most exciting incident of the Session took place during the discussion of the Irish Constabulary vote, when it appeared for the moment as if a member was about to cross the House with a view of engaging in personal conflict with the Chief Secretary to the Lord-Lieutenant. Only a day or two before the prorogation Mr. Arthur Balfour stated his opinion that something ought to be done to give higher university education to Roman Catholics in Ireland, and promised to endeavour to devise a scheme by which their wants could be met in that respect. The two Houses met about a fortnight later than usual, and the Government desired to bring the Session to a close at

about the middle of August; and there can be little doubt that their wish would have been realised had it not been for the time occupied in discussing the questions of Royal Grants (see sect. 47) and the recovery of Tithe Rent-charge (see sect. 128). The Government sustained a defeat in the Lords by pressing forward the Land Transfer Bill, a measure which was too advanced for many of their supporters, and averted one in the Commons by withdrawing the Sugar Convention Bill, which was too retrogressive for many of their friends. The new rules as to the sittings of the House of Commons again worked admirably, to the great relief of all concerned. The House of Lords made some changes in its standing orders, and adopted the system of grand committees (see sect. 36 a). A noteworthy fact in the history of the session is the organisation of the New Radical Party, or "Jacobins" (see ENGLISH POLITICAL PARTIES). Some mention of the references made in both Houses to the death of Mr. Bright will be found in sect. 32. Parliament was prorogued by Royal Commission on Aug. 30th, the Queen's Speech upon that occasion being as follows:—"MY LORDS AND GENTLEMEN,—It is with much satisfaction that I release you from the labours of a protracted Session. My relations with other Powers continue to be of the most cordial character. Since the commencement of the Session nothing has happened to diminish the confident expectation of unbroken European peace which I was then able to express. The only exception to the tranquil course of events since that period has been a very partial renewal of the attempts formerly made by the followers of the Mahdi to invade the southern frontier of Egypt. The invading force was arrested and dispersed with conspicuous skill and complete effect by the troops of His Highness the Khedive, supported by a small British contingent, under the command of General Grenfell. A conference upon the affairs of Samoa, consisting of representatives of Great Britain, Germany, and the United States, was assembled at Berlin in the spring, and agreed upon a Convention for regulating the government of those islands. This instrument has been accepted by me and by the German Emperor, and now awaits the assent of the Senate of the United States. At my suggestion the King of the Belgians has consented to summon, in the autumn, a conference of the European Powers at Brussels, which will consider the present condition of the slave trade, both by land and sea, and will deliberate upon measures for arresting or mitigating the evils which it still inflicts upon mankind. I have come to an agreement with the French Republic by which various controversies with respect to the boundaries of our respective possessions on the West Coast of Africa have been adjusted. A new Postal and Telegraphic Convention has been concluded with France and Germany. It has afforded me much pleasure to accept the loyal offers of several of the native princes and chiefs, who have come forward to share the military burdens imposed upon my subjects in British India, and I welcome their co-operation in the common defence of the Empire. GENTLEMEN OF THE HOUSE OF COMMONS,—I gladly acknowledge the care and liberality with which you have provided for the wants of the public service. MY LORDS AND GENTLEMEN,—The measures which you have taken, with 20

grudging hand, to strengthen the naval defences of the Empire, will enable my subjects to pursue their industry and enterprise in more complete security and peace. The Act for reforming the local government of Scotland will, I am convinced, contribute largely to the welfare and contentment of my people in that kingdom. I much regret that the pressure upon your time has prevented you from passing a Bill for conferring responsible government on my subjects in Western Australia. I trust that this very desirable object may be effected at an early period. I note with satisfaction the invaluable improvements which you have introduced into the constitution of the universities of Scotland, and the steps you have taken towards the establishment of technical education in England and Wales. The Intermediate Education Act for Wales will supply a deficiency in the educational system of the Principality which has been acutely felt for many years. I have assented with much pleasure to a Bill for bringing the less prosperous portions of Ireland into rapid communication with the principal markets of the United Kingdom, by means of a systematic extension of railways. This provision will confirm the increasing agricultural and commercial well-being which has accompanied the gradual suppression of disorder in that country. I sincerely hope that the new Board of Agriculture may be the means of still further developing the oldest of our national industries. I am thankful to be able to recognise that the signs of a growing prosperity, the fruit of returning confidence, are everywhere discernible. In the hope that, under the operation of your wise counsels, it may be strengthened and prolonged by the hearty concord of all my subjects, I commend you reverently to the merciful care of Almighty God."

MISCELLANEOUS.—[29] **Army.** Mr. Secretary Stanhope, in introducing the Army Estimates (March 11th), indicated the principal steps which would have to be taken by the land forces on the occurrence of a grave national emergency, the arrangements in respect to the defence of the coasting stations and commercial ports, and what was to be done for the defence of the Metropolis. The coasting stations and nearly all the commercial ports to be defended by submarine mines were, he said, already furnished with a large proportion of their stores, and it would be possible for every port to be defended by most efficient submarine mines in a short space of time, while the men required for this work were almost in every case provided. The garrisons for every imperial and commercial port at home were already told off, and the defence of the Thames had been placed under one commanding officer, instead of being, as hitherto, under several district commanders. If the Reserves were called out we could put into the field, at short notice, for home defence, a force of 80,000 regular troops, which would be concentrated at the railway junctions and other places, in order that they may be conveyed within the shortest possible time to threatened points. Some of the Volunteers would be required for local defences, but the remainder would be mobilised in defence of certain positions, especially London. Mr. Stanhope explained, in reference to the defence of the Metropolis, that no plan of building permanent fortifications was before him; he, indeed, regarded such a scheme as extravagant, visionary, and wholly unnecessary; but there

were certain strategical positions commanding roads and railways, where, upon the occurrence of a grave emergency, certain steps, arranged in every way beforehand, could at once be taken, and where, on London being threatened, its defenders would in a few days be concentrated and entrenched. A few sites of specially urgent importance were to be acquired at once, and ordinary field-works, in the form of entrenched camps, were to be established, and would form the backbone of the defensive line.

—[30] **Bimetallism.** Mr. Chaplin, June 4th, called attention to the report of the Royal Commission appointed to inquire into the recent changes in the relative value of the precious metals, and moved a resolution declaring "that the evils which have followed upon the monetary changes of 1873, can only be effectually dealt with by a conference of the chief commercial nations for the purpose of considering whether, and how far, a bi-metallic system can be re-established by international agreement in the interest of all the nations and communities concerned." Mr. S. Smith seconded. Mr. J. Maclean proposed as an amendment "that the report of the Commission on the effects of the fall in the gold price of silver, and the proposed remedies therefor, was of too inconclusive a character to warrant the Government in taking action upon it." Sir J. P. seconded. Mr. W. H. Smith said the attitude of the Government had been explained only a few days before by the Prime Minister and the Chancellor of the Exchequer to a deputation which waited upon them; and for himself he felt bound to say that he could not embark rashly upon, or commit himself to, changes in the currency without the most complete evidence that they were regarded by the country as embodying in themselves conditions of absolute security for the vast transactions of our commerce. (Debate adjourned, and no opportunity of resuming it found.) [Mr. Gladstone wrote, July 7th, "I am convinced that any search for industrial relief of whatever kind by legislative alteration in the basis of our exchanges, great and small, which is gold, would be a barren and hopeless quest, diverting men, for the time, from efforts after practical thrift and improvement, and ending in substantial, perhaps bitter, disappointment."] —[31] **Mr. Bradlaugh moved** (Mar. 8th) to expunge from the journals of the House the resolution passed in June 1880 to the effect that having regard to the reports and proceedings of two committees of the House, he be not permitted to take the oath or make the affirmation. This was opposed by Sir M. Hicks-Beach and the Solicitor General, and supported by Sir H. James and Sir W. Harcourt, and rejected by 112 to 79. —[32] **Bright, Rt. Hon. John.** On Wednesday, Mar. 27th, Mr. W. H. Smith referred in sympathetic terms to the loss which the House and the country had sustained by the death that morning of Mr. Bright (q.v.), but postponed any detailed reference to the sad event until Mr. Gladstone should be in his place. Mr. John Morley observed that it had been their lot on that side to disagree with Mr. Bright on the great controversy of the day, but heavily as they had felt the weight and power of his opposition it had never impaired, in the smallest degree their gratitude, their veneration, and their affection for him. Or the following night graceful and feeling tribute to the memory of the great orator were paid in

the House of Lords by the Marquis of Salisbury and Earl Granville; and on the evening of Friday Mr. W. H. Smith spoke in appreciative terms of the manner in which John Bright had discharged his duties as a member of Parliament, as a former Minister, and still more as a citizen of this great Empire, and of his eloquence, his intense conviction, and his perfect honesty of intent; and Mr. Gladstone (only just returned to London from the funeral of his brother, Sir Thomas Gladstone), in course of an eloquent panegyric, said he did not know of any statesman of his time who had had the happiness of receiving on his removal from this passing world honours or approval at once so enthusiastic, so universal, or so unbroken; yet none could better dispense with the tributes of the moment, because the triumphs of his life were triumphs recorded in the advance of his country and the advance of its people. Lord Hartington, Mr. Justin McCarthy, and Mr. Chamberlain each added a few tributary words.—[32] The Duke of Buckingham and Chandos died on March 26th, and the office of Chairman of Committees becoming vacant thereby, the Marquis of Salisbury moved (Apr. 4th) that Lord Balfour of Burleigh be appointed as his successor; whereupon Earl Granville proposed the Earl of Morley. No party considerations were involved, and the majority of their lordships considered that the noble earl, having previously been unsuccessfully nominated for the post, had the prior claim on this occasion, so ninety-five votes were given for him and seventy-seven for Lord Balfour.—[34] Mr. Dillwyn moved (May 14th), and Mr. Osborne Morgan seconded, a resolution setting forth that, as the Church of England in Wales had failed to fulfil its professed object as a means of promoting the religious interests of the Welsh people, and ministered only to a small minority of the population, its maintenance as an Established Church in the Principality was an anomaly and an injustice which ought no longer to exist. Mr. Byron Reed proposed, and Sir J. Bailey seconded an amendment to the effect that, having regard to the great and growing influence and work of the National Church, especially in the Principality of Wales, the House was not prepared to entertain proposals for its disestablishment in that part of the kingdom. The motion was rejected by 254 to 231, majority 53, and the amendment was then put as a substantive motion, and agreed to.—[35] Hereditary Legislators. Mr. Labouchère moved, and Mr. Wallace seconded, a resolution to the effect that it was contrary to the true principles of representative government, and injurious to their efficiency that any person should sit and vote in Parliament by right of birth, and it was therefore desirable to put an end to any such existing rights. Mr. A. J. Balfour remarked that as the Government were opposed to the abolition of the hereditary principle they would vote against the resolution. On a division the resolution was negatived by 202 votes to 160.—[36] Home Rule for Scotland. Dr. Clark (Apr. 9th) moved a resolution declaring that it was desirable that arrangements be made for giving to the people of Scotland, by their representatives in a national parliament, the management and control of Scottish affairs. Mr. Hunter seconded the motion. Mr. Gladstone was unable to support the resolution, feeling that the circumstances were not yet ripe so as to enable them

to dispose finally of the question on its merits. At the same time he considered that Scotland and Ireland occupied a precisely equal place in respect to their moral and political right to urge upon the Imperial Parliament such claims as they might consider arose out of their interests and just demands. The motion was rejected by 200 to 79.—[38a] House of Lords, Standing Orders of the. The report of the Standing Orders Committee of last year (see '89 ed., Session, sect. 68) was considered Feb. 25th and March 15th, and among the changes made in the old standing orders was one permitting noble lords to refer to each other by name. A new order was agreed to providing that the quorum in a division on any stage of a bill should be 30, the proceedings on such bill to stand adjourned until the next sitting day if it should appear that there was not a quorum. New standing orders providing for the appointment of standing committees were agreed to, and on the motion of the Marquis of Salisbury two standing committees were (Apr. 9th) appointed, one for the consideration of bills relating to law and courts of justice and legal procedure, and the other for the consideration of all general bills which might be committed to them respectively by the Houses, such committees to be designated the Standing Committee for Bills relating to Law, etc., and the Standing Committee for General Bills. Both these Committees met and considered a number of Bills.—[37] Indian Un-covenanted Civil Services. Motion of Sir R. Lethbridge for a select committee to inquire into the grievances of, opposed by Sir J. Gorst, and rejected by 122 to 86 (May 31st).—[38] Ireland, Arbitration in. Mr. J. Ellis (June 21st) moved a resolution declaring that it was expedient that steps should be taken without delay to ensure such a competent, impartial, and conclusive arbitration between the two parties to the present agrarian struggle in Ireland as would diminish the necessity for evictions and the costly and humiliating employment of the forces of the Crown thereat. The resolution was negatived by 248 to 178. (For Irish Arterial Drainage and Light Railways Bills see section 83.) On the Address Mr. J. Morley moved an amendment representing that the present system of administration in Ireland was harsh, oppressive, and unjust, that it violated the rights and alienated the affections of her Majesty's subjects, and was viewed with aversion by the people of Great Britain, and urging that such measures of conciliation should be adopted as might bring about the contentment of the Irish people, and establish a real union between Great Britain and Ireland. Negatived on a division (Mar. 1st) by 339 to 260.—[39] Mr. S. Smith (April 30th) moved and Mr. Cairne seconded a resolution declaring that the fiscal system of the Government of India leads to the establishment of spirit distilleries and liquor and opium shops in large numbers of places where till recently they never existed, and that such increased facilities for drinking produced a steadily increasing consumption, and spread misery and ruin among the industrial classes of India, calling for immediate action on the part of the Government with a view to their abatement. Sir J. Gorst said the policy of the Government in India was to discourage the extension of drinking habits. The motion was eventually carried against the Government by 113 to 103.—[40] Navy. The First Lord of the

Admiralty (Mar. 7th) explained what the ministry proposed to do in the matter of naval defence. The number of vessels which the Government considered should be added to the navy in their new ship-building programme was seventy, and the estimated cost, including armaments, was £21,500,000. (For details of vessels, see NAVY, BRITISH.) He moved "That it is expedient to authorise the expenditure of a sum not exceeding £21,500,000 for the purpose of building, arming, equipping, and completing for sea vessels for her Majesty's navy: of this expenditure a sum not exceeding £10,000,000 to be issued out of the Consolidated Fund in the seven years ending on Mar. 31st, '96; and a sum not exceeding £11,500,000 to be issued out of moneys provided by Parliament for naval services during the five financial years ending Mar. 31st, '94." "That it is expedient to authorise the creation of a naval defence account, to which moneys issued for the aforesaid purposes may be carried, and the advance out of the Consolidated Fund, and the temporary borrowing on the security of the Consolidated Fund of any sums which may be required to meet excess of expenditure in any financial year." Mr. Cremer (Mar. 25th) moved an amendment declaring the proposed increase of expenditure to be inexpedient, and advocating general disarmament. Lord G. Hamilton stated, in course of the discussion, that the ministerial scheme would in '94 render our navy equal to the navies of any two other powers. Mr. Cremer's amendment was rejected by 256 to 85. Mr. Childers (April 4th) moved an amendment against making provision for the building and the arming of H.M. ships otherwise than in accordance with the constitutional practice hitherto observed, viz., by annual votes in supply. Mr. Goschen said the past system had proved wasteful and extravagant. The amendment was rejected by 158 to 125. On second reading of the Bill giving effect to the ministerial proposals Mr. Labouchere moved the rejection of the measure, but his amendment was defeated by 277 to 136. On the report stage a new clause was inserted, providing that a summary of the contracts entered into by virtue of the Act for each contract vessel, her propelling machinery, and guns, shall be laid before both Houses within ninety days after the same is entered into, if Parliament be then sitting, and, if not, then within thirty days after the next meeting of Parliament. An amendment of Mr. Howell for the rejection of the Bill was negatived by 153 to 102. Royal Assent May 31st. (Naval Defence Act, '89, 52 Vict., ch. 8.)—[41] **New Ode.** The Archbishop of Canterbury having (May 10th) called attention to this matter, and with other lords asked that more time should be given for consideration, as on several points the managers of voluntary schools wished to understand their position. Viscount Cranbrook said the new code was fair and just alike to voluntary and other schools, and great advantage would result to all schools if it were immediately enacted. It was not intended to apply the proposal as to space to existing schools. The Earl of Meath moved (May 13th) that the Code was defective, inasmuch as it failed to provide adequate facilities for the physical education of children attending elementary schools. Viscount Cranbrook said it was not correct to assert that there was no physical training going on in connection with these schools, but the Commission which had con-

sidered this, among other matters, reported against anything more than the gradual introduction of gymnastics among underfed and weakly children. The motion was negatived. Sir W. Hart-Dyke stated (May 20th) that it had been decided that the old and new codes should run concurrently, and that the choice of either should be at the option of the managers for the year commencing August '89. Mr. W. H. Smith announced in July that he would not ask the House to consider the new code this year, but to adhere to the code of '88, which was still in operation.—[42] Mr. S. Smith moved (May 3rd) a resolution, viewing with deep regret the history of our opium policy towards China, and calling upon the Government of India to take steps looking to the final extinction of the trade. This was opposed by the Government, and rejected by 165 to 88.—[43] Mr. Fenwick proposed (Mar. 29th) a resolution in favour of the payment of members, which was supported by Mr. J. Morley, and opposed by Mr. Secretary Matthews, and was eventually counted out.—[44] **Perpetual Pensions.** Mr. Bradlaugh (May 10th) moved a resolution dissenting from so much of the proposals contained in the Treasury minute of July '88 as permit of commutation on the same terms as have been accepted in numerous cases already committed; and declaring that the House approved the report of the select committee on Perpetual Pensions, "That the rate of commutation usually adopted of about twenty-seven years' purchase is too high." Mr. Hanbury seconded the motion. The Chancellor of the Exchequer said twenty-seven years was the maximum rate of purchase, but it would certainly not be applied in all cases where it was proposed to commute. The Government were willing to lay the terms of any proposal for commutation on the table for thirty days, so that it would be open to challenge in Parliament. Mr. Gladstone supported the motion. Mr. Bradlaugh moved the closure, which was carried by 359 to 96. The motion itself was rejected by 264 to 205.—majority 59.—[45] **Poor in Towns.** Mr. Broadhurst (April 2nd) moved a resolution to the effect that the chronic poverty of great numbers of the people living in the larger cities and towns of Great Britain was a danger to the well being of the State, and called for the instant attention of the government to remedial measures by which the depopulation of the agricultural districts might be checked, and the congestion of the great centres of population relieved. Mr. Seton-Karr and Mr. S. Gedge, proposed and seconded an amendment recognising the danger, and affirming that an effective and practical remedy could be found in the consideration and development by the Government of some well-devised scheme of State colonisation. Mr. W. Long denied that any considerable movement of the agricultural population into the towns was now going on, and showed that with the increase of population there had been a considerable decrease in pauperism. The Government sympathised with the working classes, but could not accept the resolution. The debate was adjourned, and no opportunity could be found for resuming it.—[46] **Public Executioner.** Sir E. Lechmere (April 15th) moved a resolution in favour of placing such persons who might from time to time be employed in carrying into effect the extreme penalty of the law under the direct control of the Home office,

Mr. Secretary Matthews said he would give the subject his consideration with a view of appointing a suitable person as executioner, but after that he could only tender the man's services to the local authorities, leaving upon them the full responsibility for carrying out the execution. Motion negatived.—[47] **Royal Grants.** Mr. W. H. Smith, on July 2nd, brought up two messages from Her Majesty. The first message was to the effect that her Majesty, being desirous of making competent provision for the honourable support and maintenance of her grandson Prince Albert Victor, recommended the consideration thereof to her faithful Commons, and relied upon them to adopt such measures as might be suitable to the occasion. The second message formally communicated to the House that her Majesty had agreed to a marriage proposed between her granddaughter, Princess Louise of Wales and the Earl of Fife, and set forth that the numerous proofs that the Queen had received from her faithful Commons of their loyalty to the throne and their attachment to her person and family left her Majesty no doubt of their readiness to enable her Majesty to make suitable provision for her Royal Highness. Mr. W. H. Smith proposed and Mr. Gladstone seconded (July 4th) that a Select Committee be appointed to consider the gracious messages, and to inquire into the former practice of the House with respect to provisions for members of the Royal Family, and to report to the House upon the principles which in that respect it was expedient to adopt in the future. An amendment of Mr. Bradlaugh providing that the committee might also be enabled to inquire into the Civil List was rejected by three hundred and thirteen to one hundred and twenty-five, the motion being then agreed to. Mr. W. H. Smith moved (July 6th), that the committee should consist of twenty-three members which was carried against an amendment of Mr. Dillwyn, that the committee should consist of twenty-five members. A proposal of Mr. Labouchere to enable the committee to send for previous papers and records was negatived by two hundred and seventy-two to one hundred and thirty-six. Motion agreed to. Committee nominated of:—Sir Walter Barttelot, Mr. Burt, Dr. Cameron, Sir Archibald Campbell, Mr. Chamberlain, Sir James Corry, Mr. Elton, Mr. Gladstone, Sir John Gorst, Mr. Goschen, Marquis of Hartington, Mr. Samuel Hoare, Mr. Illingworth, Mr. Labouchere, Mr. John Morley, Sir Stafford Northcote, Mr. Parnell, Mr. Sexton, Sir Hussey Vivian, Mr. Wharton, Mr. Whitbread, Mr. Whitley, and Mr. William Henry Smith. **First meeting of the Committee** (July 10th), when Mr. W. H. Smith was called to the chair. The papers handed in by the Chancellor of the Exchequer included one showing that since her Majesty's accession the total savings on the Civil List transferred to the Privy Purse had been £894,025. In course of the proceedings the Government indicated their general views to be that the provision for the eldest son of the heir apparent should be an annuity of £10,000 (charged upon the Consolidated Fund) to be raised on his marriage, to £25,000, that the provision for every other son should be an annuity of £8,000 to be raised on his marriage to £15,000 and that the provision for every daughter of the heir apparent should be an annuity of £3,000 together, with a capital sum of £10,000,

to be voted by Parliament upon her marriage; that provision should be made for the children of sons of the Queen, with the exception of such sons as might succeed to a foreign throne, and that inasmuch as Her Majesty had expressed her readiness to provide for the children of her daughters it was not necessary to ask Parliament to make any provision for any such child. Mr. Gladstone expressed the opinion with a view of assisting in clearing the ground, that a quarterly payment should be made to a separate account on behalf of the Prince of Wales from which assignments of money should be made to the Prince's children. The Government abandoning their own suggestions adopted in principle the proposal of Mr. Gladstone, and embodied it in a draft report which Mr. W. H. Smith laid before the committee, and which, after the amount of the quarterly payment proposed to be made for the creation of a special fund had been reduced from £10,000 to £9,000, and some unimportant modifications had been made, became the report of the committee. Mr. Labouchere also submitted a draft report, one of the paragraphs of which set forth that there were ample funds belonging to Her Majesty and to the Prince of Wales, from which provision could be made for the children of the Prince and Princess of Wales during the lifetime of Her Majesty; and that the funds at the disposal of Her Majesty were sufficient to enable her to make provision for the children of her younger children, without trenching upon the annual expenditure deemed necessary for the honor and dignity of the Crown. Mr. Labouchere's draft was rejected by nineteen to two, Mr. Burt being the one member who voted with him. The chairman's report was considered in detail. Mr. Gladstone moved to omit the paragraphs (marked below for convenience of reference A and B), in order to insert the following. "Your committee have not found in any resolution of the House of Commons, or in any declaration on behalf of a government by a Minister of the Crown, any indication whether the practice followed in the case of grandchildren of George III. was to continue under the method now applied to the Civil List, or whether any and, if any, what obligation attached to the Sovereign with reference to descendants in the second generation, or what claims the Sovereign might be entitled to make upon the national resources." "Your committee have recited the facts of previous practice in accordance with the order of reference under which they have been appointed. An important question arises whether, and how far, these facts form a ground of action under the new method, which at a period later than the reign of George III. has been applied to the Civil List, and since the Duchy of Lancaster has added so largely to the means at the disposal of the Sovereign. A further addition to these means might also be expected, in the judgment of your committee, from possible retrenchments to be made in connection with offices in the Royal Household and otherwise." Two divisions were taken and each proposal of Mr. Gladstone was rejected by twelve to ten. Mr. W. H. Smith's draft report proposed that the quarterly payment to the Prince of Wales should be £10,000. Mr. Gladstone moved to substitute £9,000, and the amendment was agreed to. The paragraph was then put as amended and carried by sixteen to six, the minority being Mr. Burt, Dr. Cameron, Mr. Illingworth,

Mr. Labouchere, Mr. J. Morley, and Mr. Whitbread. The following is the report of the Committee as presented to the House, July 22nd: "Your Committee find that since the accession of the House of Hanover:—There is precedent for provision out of public moneys for every child of an heir-apparent, and there is no precedent for the omission of such a provision. There is precedent for provision out of public moneys for every child of every younger son of a Sovereign, and there is no precedent for the omission of such provision. There is precedent for provision out of public moneys for the children of a younger son of the heir-apparent; there are two instances of such provision, and there is no precedent for the omission of such provision. There is no precedent for making any provision out of public moneys for the children of the daughter of a sovereign, where such daughter has married a foreign ruling prince. There is no precedent, one way or the other, as to the children of other daughters. Princess Mary, daughter of George III., was the only princess who, prior to the present reign, married anyone but a foreign ruling prince, and she had no children. Your committee also find that upon the accession of her Majesty to the throne the revenues of the Crown lands and the small branches of hereditary revenue, which had been surrendered to the public during the reign of William IV., became by statute (1 Will. IV., c. 25) payable to her Majesty. By the Act, 1 Vict., c. 1, these revenues, which had thus become payable to her Majesty, were carried to and made part of the Consolidated Fund during her Majesty's lifetime, in confidence that the Commons would 'gladly make adequate provision for the support of the honour and dignity of the Crown.' In the first year of her Majesty the net surplus of the Crown lands thus surrendered amounted to £150,000, to which should be added certain items for royal parks and palaces, amounting to £60,000 (which were then defrayed out of the gross income of the Crown lands, but are now voted by Parliament), so that the total produce of Crown lands available for the public was in 1837-38 about £210,000. In the year 1888-89 the net surplus from the Crown lands, similarly available for the public, was about £306,000. In the first year of her Majesty the small branches of the hereditary revenue surrendered paid £5,000 into the Exchequer. In 1888-89 they paid £68,000 into the Exchequer. The same statute (1 Vict. c. 2), which accepted the proceeds of Crown lands and of the small branches of the hereditary revenue, fixed the Civil List at £385,000, of which £60,000 was assigned to the Privy Purse. The revenues of the Duchies of Cornwall and Lancaster were not included in the surrender of the hereditary revenues, and they both remained payable to her Majesty till the Duchy of Cornwall was transferred to the Prince of Wales in 1841. In the first four years of the present reign her Majesty received a total sum of £66,300 from the Duchy of Cornwall, and of £44,000 from the Duchy of Lancaster, giving an average annual receipt of £27,300 from the two sources. From 1841 to 1861 the sums annually paid to the Queen from the Duchy of Lancaster amounted, upon an average, to £16,000, and during that time the Prince Consort received an annuity of £30,000. On the death of the Prince Consort that annuity ceased, and in the interval between 1861 and 1889 the payments to her Majesty from the Duchy of

Lancaster have risen from £22,000 to £30,000 giving an average receipt of £39,000. During the present reign annuities charged on the Consolidated Fund, and grants of money in Supply, have repeatedly been made to various members of the Royal family, including, among others, annuities to the children of a younger son of his late Majesty King George III. In the first year of her Majesty's reign the annuities charged on the Consolidated Fund for members of the Royal family amounted to £277,000, after deducting that part of King Leopold's annuity which he returned to the Exchequer. The annuities now payable to members of the Royal family are reduced to £152,000. In 1863 Parliament voted an annuity of £40,000 to his Royal Highness the Prince of Wales on the assumption, stated by Lord Palmerston to the House of Commons, that the Duchy of Cornwall was calculated to produce £60,000 a year, which is about the average income derived from the duchy since that date. (A) Your committee cannot find that any notice has ever been given to the Crown by any resolution of the House of Commons, or by any declaration on behalf of a Government by a minister of the Crown, that the practice which has heretofore prevailed in reference to making provision for members of the Royal family would be changed; or that her Majesty has had any ground for supposing that it was necessary for her Majesty herself to make provision for the members of her family. (B) In view of the facts above stated, your committee are of opinion that the Queen would have claim on the liberality of Parliament, should her Majesty think fit to apply for such grants as, in accordance with precedent, may become requisite for the support of the Royal family. But your committee have been informed by the First Lord of the Treasury that her Majesty has been graciously pleased to declare that she does not propose to press this claim for the children of her daughters and younger sons; and with regard to the daughters and younger sons of future sovereigns, your committee are of opinion that at the proper time arrangements should be made under which no future claim of a similar kind can arise. (C) The most gracious Message of her Majesty which your committee has been directed to consider has reference to the family of the heir-apparent alone. In order to prevent repeated applications to Parliament, and to establish the principle that the provision for children should hereafter be made out of grants adequate for that purpose which have been assigned to their parents, your committee recommend the creation of a special fund by the quarterly payment during the present reign, of £9,000 out of the Consolidated Fund. Out of this his Royal Highness the Prince of Wales, with the sanction of her Majesty and the assent of the First Lord of the Treasury and the Chancellor of the Exchequer, would be empowered to make such assignments, and in such manner, to his children as his Royal Highness should in his discretion think fit. In conclusion, your committee desire to state that it has received from those ministers who belong to it all the information which it has deemed material to the object of the reference made to them." Mr. W. H. Smith (July 25th) declined in answer to a question by Mr. A. L. Brown to state whether the total amount of her Majesty's savings were more than the £324,000 mentioned in the report as having been transferred from the Civil List to

the Privy Purse. On the same day Mr. Smith said the Government assumed full responsibility for the report of the committee. **Mr. Labouchere** moved on the vote for going into committee on the Royal Message an amendment respectfully setting forth that the funds now at the disposal of her Majesty and of the other members of her family were adequate, without further demands upon the taxpayers, to enable suitable provision to be made for her Majesty's grandchildren, and that such provision might, if it were desired, be increased, with the approval of Her Majesty, by the withdrawal of many salaries in Class II. of the Civil List, and by other economies in Classes II. and III., and this without trenching upon the honour and dignity of the Crown, and without inconvenience to Her Majesty. This was opposed by the Government and by Mr. Gladstone, Lord R. Churchill, and Lord Hartington, and rejected (July 26th) by 398 to 116. The official opposition, including Mr. J. Morley, and the Parnellites, voted against the amendment. **Mr. W. H. Smith** moved (July 26th) "That, in order to prevent the necessity for repeated applications to Parliament on behalf of the Royal Family, and to establish the principle that the provision for children should hereafter be made out of Grants adequate for that purpose which have been assigned to their parents, it is expedient to grant to her Majesty, out of the Consolidated Fund, an annual sum not exceeding £36,000, to continue until six months after the demise of her Majesty, and to be applied for the benefit of the children of H.R.H. the Prince of Wales:—"**Mr. J. Morley** proposed an amendment asserting that no adequate grounds had been shown for a proposal which increased the charge on the Consolidated Fund in order to make provision for younger members of the Royal family, and, while adding to present burdens, left room for future claims of the same character.—This was opposed by the Government, and Mr. Chamberlain, in speaking against it, described the New Radical Party (who supported both this amendment and that of Mr. Labouchere's) as "the Nihilists of English Politics." On a division the amendment was defeated by 355 to 134, the resolution of Mr. Smith being then agreed to. Mr. Gladstone and the bulk of the Parnellites again voted with the Government, but Sir W. Harcourt, Mr. Mundella, Mr. Childers, and other leading members of the Opposition voted in this instance for the amendment.—**The Prince of Wales' Children Bill**, founded upon the resolution, was read a second time without opposition (July 31st). In committee the Chancellor of the Exchequer stated, in answer to Mr. Wallace, that if the Queen were to devote the whole of her fortune to the children of the Prince of Wales and to all her other grandchildren, it would not suffice to make that provision for them which he believed the House would consider necessary. Bill passed through committee without amendment, read a third time by 136 to 41. Received Royal Assent (Aug. 14th) as **the Prince of Wales' Children Act, '89** (52 & 53 Vict., ch. 35).—(48) A resolution was (Mar. 26th) moved by Mr. S. Buxton, proposing that steps should be taken for calling together a conference of the Powers in order to devise such measures for the repression of the slave trade as might be at the same time effective and in accordance with justice, and under the regulations of international law; and Sir J. Fergusson agreed to

accept the motion in an amended form, which provided that steps should be taken to ascertain whether the Powers signatory to the declaration against the slave trade were willing to meet in conference for the purpose of devising the repressive measures in question. As amended the motion was adopted unanimously. It was announced in the Prorogation Speech that the Conference would assemble at Brussels in the autumn.—(49) Mr. E. Robertson moved (May 10th) that the privilege possessed by certain of the Universities of returning members to Parliament ought to be discontinued. The motion was rejected by 277 to 126.—(50) Mr. Pictou moved (April 5th) the appointment of a **Royal Commission** to inquire into the working of the **Vaccination Acts** and into other matters relative to vaccination and small pox, and to report whether any and what change in the law was desirable. Mr. Ritchie said the Government were as strongly convinced as ever of the efficacy of vaccination, but they were willing to grant an inquiry because of the state of public opinion. The right hon. gentleman (May 27th) announced the names of the Vaccination Commission which he had agreed to.—(51) **ACTS AND BILLS.** The following is a list of the public acts passed during the session (52 and 53 Victoria—1889) (for particulars of those passed during the autumnal sitting of '88 see preceding article). Consolidated Fund (No. 1) Act (Ch. 1), Consolidated Fund (No. 2), Act (Ch. 2), Army (Annual) Act (Ch. 3), National Debt Redemption Act (Ch. 4), Removal of Wrecks Act 1877, Amendment Act (Ch. 5), National Debt Act (Ch. 6), Customs and Inland Revenue Act (Ch. 7), Naval Defence Act (Ch. 8), Public Libraries Act, Amendment Act (Ch. 9), Commissioners for Oaths Act (Ch. 10), Sale of Horseflesh, etc., Regulation Act (Ch. 11), Assize Relief Act (Ch. 12), Purchase of Land (Ireland) Amendment Act (Ch. 13), Town Police Clauses Act (Ch. 14), Consolidated Fund (No. 3), Act (Ch. 15), Secretary for Scotland Act (Ch. 16), London Coal Duties Abolition Act (Ch. 17), Indecent Advertisements Act (Ch. 18), Registration of County Electors (Extension of Time) Act (Ch. 19), Agricultural Holdings (Scotland) Act (Ch. 20), Weights and Measures Act (Ch. 21), Friendly Societies Act (Ch. 22), Herring Fishery Act (Ch. 23), Master and Servant Act (Ch. 24), National Portrait Gallery Act (Ch. 25), Small Debt Amendment (Scotland) Act (Ch. 26), Advertising Stations (Rating) Act (Ch. 27), Canada (Ontario Boundary) Act (Ch. 28), Passengers Acts Amendment Act (Ch. 29), Board of Agriculture Act (Ch. 30), Army and Navy Audit Act (Ch. 31), Trust Investment Act (Ch. 32), Windward Islands Appeal Court Act (Ch. 33), Telegraphs (Isle of Man) Act (Ch. 34), Prince of Wales' Children Act (Ch. 35), Settled Land Act (Ch. 36), Companies Clauses Consolidation Act (Ch. 37), Basutoland and British Bechuanaland Marriages Act (Ch. 38), Judicial Factors (Scotland) Act (Ch. 39), Welsh Intermediate Education Act (Ch. 40), Lunacy Acts Amendment Act (Ch. 41), Revenue Act (Ch. 42), Merchant Shipping (Tonnage) Act (Ch. 43), Prevention of Cruelty to, and Protection of Children Act (Ch. 44), Factors Act (Ch. 45), Merchant Shipping Act (Ch. 46), Palatine Court of Durham Act (Ch. 47), County Court Appeals (Ireland) Act (Ch. 48), Arbitration Act (Ch. 49), Local Government (Scotland) Act (Ch. 50), General Police and Improvement (Scotland) Act 1862, Amendment Act (Ch. 51), Official Secrets Act (Ch. 52)

Paymaster-General Act (Ch. 53), Clerks of Sessions (Scotland) Regulation Act (Ch. 54), Universities (Scotland) Act (Ch. 55), Poor Law Act (Ch. 56), Regulation of Railways Act (Ch. 57), Coinage Act (Ch. 58), Land Law (Ireland) Act 1888, Amendment Act (Ch. 59), Preferential Payments in Bankruptcy (Ireland) Act (Ch. 60), London Council (Money) Act (Ch. 61), Cotton Cloth Factories Act (Ch. 62), Interpretation Act (Ch. 63), Public Health Act (Ch. 64), Council of India Reduction Act (Ch. 65), Light Railways (Ireland) Act (Ch. 66), Expiring Laws Continuance Act (Ch. 67), Merchant Shipping (Pilotage) Act (Ch. 68), Public Bodies Corrupt Practices Act (Ch. 69), Appropriation Act (Ch. 70), Public Works Loans Act (Ch. 71), Infectious Diseases Notification Act (Ch. 72), Merchant Shipping (Colours) Act (Ch. 73), Steam Trawling (Ireland) Act (Ch. 74), Parliamentary Grant (Caithness and Sutherland) Act (Ch. 75), Technical Instruction Act (Ch. 76).—Subjoined is a summary of the provisions of the more important of these statutes, with some account of the proceedings upon several of them while they were yet bills, and also of the provisions of certain bills which were introduced, but which failed to find acceptance, and were either rejected or withdrawn.—[51a] **Adoption of Children Bill.** The Earl of Meath, in moving the second reading of this measure, explained that it would prevent parents or guardians who consented to the adoption of their children afterwards resuming control over them, unless they could show the justices that it was for the interest of the children themselves that they should do so. Bill objected to by the Lord Chancellor and withdrawn.—[52] **Advertisement Rating Bill,** introduced by Mr. Burdett Coutts, is now the **Advertising Stations (Rating) Act '89** (52 and 53 Vict. ch. 27, royal assent Aug. 12th), and amends the law with respect to rating places used for advertisements by enacting that where any land is used temporarily or permanently for the exhibition of advertisements, or for the erection of any hoarding used for the exhibition of advertisements, but not otherwise occupied; the person who shall permit the same to be so used, or, if he cannot be ascertained, the owner, shall be rateable in respect thereof to all local rates, according to the value of such use; also that the gross and rateable value of any land or hereditament occupied for other purposes, but used temporarily or permanently for the exhibition of advertisements shall be so estimated as to include the increased value from such use. Any local authority granting a licence for the erection of a hoarding upon or over any part of any public highway may prohibit the affixing of advertisements to such hoarding, or sanction the affixing of advertisements thereto, upon payment of such sum or on such conditions as they may determine. Penalty for use of hoarding otherwise than as permitted by licence, not to exceed £5 and 40s. for every day during which such offence shall be continued after notice; payments received or penalties recovered under the section to be applied in aid of the highway rate.—[53] **Agricultural Tenants (Ireland) Bill,** second reading moved by Mr. Crilly (April 10th). It proposed, he said, to more effectually protect the tenants' improvements in their holdings, to empower the land courts to deal with the question of arrears, to bring all leaseholders under the Land Act of '87, and to repeal what was described as the "eviction-made-easy" clause.

The measure was opposed by the Solicitor-General for Ireland, and rejected by 220 to 168.—[54] **Alderman (County Councils) Abolition Bill.** This bill, introduced by Mr. J. Rowlands, to abolish the office of alderman on town and county councils was (March 26th) rejected by 69 to 31.—[55] **Arbitration Act '89,** introduced by the Lord Chancellor, amends and consolidates the law relating to arbitration; received royal assent Aug. 26th (52 & 53 Vict. ch. 49).—[56] **Assizes Relief Act '89** (52 & 53 Vict. ch. 12, royal assent June 24th) is an Act to relieve the courts of assize from the trial of persons charged with offences triable at quarter sessions, and provides that, unless the committing justices for special reasons think fit to direct otherwise, any person charged with an indictable offence triable at quarter sessions shall be tried at quarter sessions, and a court of oyer and terminer or general gaol delivery shall not be required to deliver such person from gaol unless the High Court of Justice shall by order direct that such person shall be indicted and tried at a court of oyer and terminer or general gaol delivery having jurisdiction to try him for such offence. The jurisdiction vested by the Act in the High Court may be exercised either in court or in chambers by any judge of the High Court. Nothing in the Act is to affect any existing right or power in the High Court to remove an indictment by *certiorari*, or any existing right or power in any court of quarter sessions to remit any indictment found at such quarter sessions, for trial at a court of oyer and terminer or general gaol delivery.—[57] **Army and Navy Audit Act '89** (52 & 53 Vict. ch. 31, royal assent Aug. 12th) makes provision for the audit of the manufacturing and shipbuilding and other like accounts of the Army and Navy, by the Comptroller and Auditor-general. **Bann and Barrow Drainage Bills** (see sect. 85).—[58] **Basutoland and British Bechuanaland Marriage Act '89** (52 & 53 Vict. ch. 38, royal assent Aug. 12th) was passed to remove doubts as to the validity of certain marriages solemnised in Basutoland and in British Bechuanaland.—[59] **Board of Agriculture Bill,** for establishing a Board of Agriculture for Great Britain, introduced by Mr. W. H. Smith May 13th; passed all its stages without opposition. On second reading in the House of Lords, July 17th, the Duke of Richmond described the measure as unnecessary and mischievous, and Earl Spencer thought great disappointment would be felt after the formation of the new Department, but no active opposition was offered; amendments made by the Lords; bill received royal assent Aug. 12th (52 and 53 Vict. ch. 30). It enacts that there shall be established a **Board of Agriculture**, consisting of the Lord President of the Council, Her Majesty's Principal Secretaries of State, the First Commissioner of the Treasury, the Chancellor of the Exchequer, the Chancellor of the Duchy of Lancaster, and the Secretary for Scotland, and such other persons (if any) as Her Majesty may from time to time think fit to appoint during her pleasure. Her Majesty may appoint any member of the Privy Council to be President of the Board during her pleasure, and the Board is to be deemed to be established on the appointment of the President thereof, who, if not one of the above-mentioned officers of state, is to receive a salary of £2,000 per annum, and is not to be incapable of sitting in Parliament. There are to be transferred to

the Board the powers and duties of the Privy Council under the Destructive Insects Act '77, and the Contagious Diseases (Animals) Act '78, '84, and '86; the powers and duties of the Land Commissioners for England under the Tithe Rent-charge Acts '36-'86, the Copyhold Acts, Inclosure of Commons and Allotments Acts, Metropolitan Commons Acts, Drainage and Improvement of Lands Acts, or under any other Act; and all powers and duties vested in the Commissioners of Works under the Survey Act '70. The Board is also to undertake the collection and preparation of statistics relating to agriculture and forestry, and may also undertake the inspection of and reporting on any schools which are not public elementary schools, and in which technical instruction, practical or scientific, is given in any matter connected with agriculture or forestry, and the aiding of any school which admits such inspection and in the judgment of the Board is qualified to receive such aid, and the aiding of any system of lectures or instruction connected with agriculture or forestry, and the inspection of and reporting on any examinations in agriculture or forestry. The Board may also make or aid in making such inquiries and experiments, and collect or aid in collecting such information, as they may think important for the purpose of promoting the advancement of agriculture or forestry; and it may from time to time make such general or special orders as it may think fit relative to the muzzling of dogs, and the keeping of dogs under control, and to the seizure, detention, and disposal (including slaughter) of stray dogs, unmuzzled dogs, and of dogs not being kept under control, and the recovery from the owners of dogs of the expenses incurred in respect of their detention. Power is given by order in Council to transfer to the Board such statutory powers and duties of any Government department as relate to agriculture or forestry, and appear to be of an administrative character, the draft order to be laid before Parliament, and to be withdrawn if either House present an address against it. The Act also provides for the ultimate abolition of the Land Commissioners. The expression "agriculture" is defined to include "horticulture."—[60] **Bribery (Public Bodies Prevention) Bill.** Lord R. Churchill (March 14th) brought in a bill for the more effectual prevention and punishment of bribery and corruption of and by members, officers, or servants of corporations, councils, boards, commissions, or other public bodies. In the Lords the provisions of the bill were extended to officers under the Crown, but the changes so made were abandoned in the Commons. As the **Public Bodies Corrupt Practices Act '89** (52 & 53 Vict. ch. 69), the measure received royal assent Aug. 31st, and enacts that any persons offering or giving to, and any member, officer, or servant of a corporation or other public body soliciting, receiving, or agreeing to receive, any gift, loan, fee, reward, or advantage whatsoever in respect of any matter or transaction in which the said public body is concerned, shall be guilty of a misdemeanour. The penalty is, in the discretion of the Court, to be imprisonment for a period not exceeding two years, with or without hard labour, or a fine not exceeding £500, or both such imprisonment and fine; the offender to be in addition liable to pay to such body, and in such manner as the Court directs,

the amount or value of any gift, etc., received by him, and also to be liable to be adjudged incapable of being elected or appointed to any public office for seven years from the date of conviction, and to forfeit any such office held at the time of such conviction. In the event of a second conviction, the offender is liable to be, in addition to the foregoing penalties, adjudged to be for ever incapable of holding any public office, and to be incapable for seven years of voting at any parliamentary or municipal election. If such person is an officer or servant of a public body, he shall, at the discretion of the Court, be liable to forfeit his right and claim to any compensation or pension to which he would otherwise have been entitled. A prosecution under the Act is not to be instituted except with the consent of the Attorney-General.—[61] **Canada (Ontario Boundary) Act, '89** (52 & 53 Vict. ch. 28, royal assent Aug. 12th), declares the boundaries of the province of Ontario in the Dominion of Canada.—[62] **Children Insurance Prevention Bill.** Mr. Provand (May 23rd) brought in a bill making it illegal to insure the lives of children unless the person insuring had a real insurable interest in the life assured (withdrawn: see sect. 137).—[63] **Coal Duties (London) Abolition Bill.** Sir J. Pease (May 22nd) moved second reading of the Coal Dues (London) Abolition Bill, which proposed to abolish any dues on coal leviable by the Corporation. The statutory coal due of 2s. 1d. per ton would die a natural death in July, and the bill proposed to take away those prescriptive and chartered rights of the Corporation to levy certain dues which were suspended by an Act of '31. Mr. Baumann proposed an amendment to his second reading setting forth that, having regard to the increased rate which the London County Council had found it necessary to levy upon the Metropolitan Board of Works, and the resources of the Metropolitan Board of Works, and the resources of the Metropolitan Board of Works, Mr. W. H. Smith thought the bill might be read a second time on the understanding that it should be referred to a select committee, with power to insert clauses to meet the equities of the case so far as the liabilities of the city and the interests of the Metropolitan Board were concerned. Sir J. Pease was willing to take the second reading on the condition suggested. The amendment was rejected by 264 to 104, and second reading agreed to. Bill subsequently considered by a select committee, before which evidence was given on behalf of the Corporation showing that their outstanding liabilities in respect of the Holborn Valley Improvements were £744,000. The committee amended the bill so as to provide that an unappropriated balance from the then existing dues, amounting to about £100,000, and a surplus of £60,000 which had accumulated from the charge of one penny per ton retained by the Corporation when they allowed drawback, should be appropriated in discharge of the liabilities referred to, and continued for the same purpose the coal dues for one year, from July 5th, at 4d., so that they will expire absolutely on July 5th, '90—which continued dues, it was estimated, would produce £145,000: total, £302,000. Bill considered as amended July 3rd. Mr. Pickersgill moved to omit the clause providing for continuance of the dues for twelve

months at 44., but his proposal was rejected by 138 to 32 (July 3rd). Third reading carried by 226 to 106 (July 4th). Bill passed the Lords without amendment; received the royal assent July 9th, as the *London Coal Duties Abolition Act, '89* (52 & 53 Vict. ch. 17).—[64] *Coinage Act, '89*, provides for the exchange of light pre-Victorian sovereigns and half-sovereigns by or on behalf of the Mint at their nominal value, if they have not been illegally dealt with. A loss of weight exceeding four grains from the standard weight of a sovereign or half-sovereign coined before the reign of Her Majesty is to be conclusive evidence that the coin has been illegally dealt with. (Royal assent Aug. 30th, 52 & 53 Vict. ch. 58.)—[65] *Commissioners for Oaths Act, '89* (52 Vict. ch. 10, royal assent May 31st), introduced by the Lord Chancellor, consolidates such enactments relating to commissioners for oaths in various courts as were still in force, and also the enactments relating to the administration of oaths by consular and other officers in foreign countries and places. The powers to appoint special commissioners for oaths in particular courts, such as the courts of the county palatine of Lancaster, are abolished as unnecessary; but the effect on all existing appointments is preserved.—[66] *Companies Clauses Consolidation Act, '89* (52 & 53 Vict. ch. 37, royal assent Aug. 12th), merely corrects an error of three words which crept into the bill of '88 during its passage through parliament.—[67] *Corporal Punishment Bill*, consolidated the law as to flogging, provided that male juvenile offenders might be flogged, but with the birch only; and empowered the judge to order adults convicted of certain offences, including burglary when the offender was armed with dangerous or offensive weapons, and offences under the Criminal Law Amendment Act, to be flogged. Second reading moved by Mr. Milvain (May 8th); the Home Secretary gave a qualified support to the measure. Second reading carried by 194 to 126 (withdrawn).—[68] *Cotton Cloth Factories Bill* (introduced by Sir W. Houldsworth) received royal assent, Aug. 31st, as the *Cotton Cloth Factories Act, '89* (52 & 53 Vict. ch. 62), comes into operation March 1st, '90, and makes regulations regarding the artificial raising of temperature and production of humidity in any room, shed, or workshop, in which the weaving of cotton cloth is carried on.—[69] *Council of India Bill*, enables the Secretary of State, if and whenever he thinks fit, and provided that the total number of the Council be not thereby reduced below ten, to record his intention to abstain from filling any vacancy in the Council, and such vacancy shall thenceforward remain unfilled. Royal assent, Aug. 30th, as the *Council of India Reduction Act, '89* (52 & 53 Vict. ch. 65).—[70] *County Councils (Qualification of Women) Bill*, introduced by the Earl of Meath, April 30th, to enable women to be elected and to act as county councillors, rejected on second reading (May 20th) by 108 to 53. The minority in favour of the measure included the Archbishop of Canterbury, Duke of Westminster, Earl Granville, Earl Spencer, Lord Brassey, and Lord Thring. Mr. Channing (April 16th) introduced a similar bill in the Commons, and on May 20th Mr. W. M. Smith stated, in reply to him, that it was not contemplated when the Local Government Bill was passing through the House that women should act as county councillors, and the Government did not see

any necessity for affording facilities for consideration of Mr. Channing's bill to enable them to do so. Bill dropped (see also sect. 87.)—[71] *Criminal Evidence Bill*, introduced by the Attorney-General, to enable the prisoner, or wife of the prisoner, to be a competent, but not a compellable, witness at any stage of the proceedings. Bill withdrawn (see end of sect. 72).—[72] *Cruelty to Children (Prevention) Bill*, introduced by Mr. Mundella. In committee the Attorney-General proposed to so far amend the bill as to permit children of under ten years of age to be employed on premises licensed for public entertainments; but the amendment was rejected by 129 to 80. An amendment subsequently moved by Mr. Jennings, with a view of reversing this decision, was defeated by 188 to 139. In the Lords an amendment was inserted giving petty sessional courts a discretionary power of licensing such children if over seven and under ten years of age, and this amendment was agreed to by the Commons. As the *Prevention of Cruelty to and Protection of Children Act, 1889* (52 & 53 Vict. c. 44, royal assent Aug. 26), the measure enacts (sect. 1) that any person over sixteen years of age who, having the custody, control, or charge of a boy under the age of fourteen years, or of a girl under the age of sixteen, wilfully illtreats, neglects, abandons, or exposes such child, or causes or procures such child to be ill treated, etc., in a manner likely to cause such child unnecessary suffering, or injury to its health, shall be guilty of a misdemeanour, and on conviction thereof on indictment, shall be liable to a fine not exceeding £100, or alternatively, or in default of payment, or in addition to payment, to imprisonment with or without hard labour for any term not exceeding two years; or on summary conviction the offender shall be liable to a fine not exceeding £25, or alternatively, or in default of payment, or in addition thereto, to imprisonment with or without hard labour for any term not exceeding three months. The court is empowered to increase the fine to £200 where any offender convicted on indictment is proved to be interested in the death of the child. Under sect. 3, any person who (a) causes or procures any boy under fourteen, or girl under sixteen, to be in any street for the purpose of begging, or of inducing the giving of alms, whether under the pretence of singing, playing, performing, offering anything for sale or otherwise; or (b) causes or procures any such boy or girl to be in any street, or in any premises licensed for the sale of intoxicating liquor, other than premises licensed for public entertainments, for the purposes of singing, playing, or performing for profit, or offering anything for sale, between 10 p.m. and 5 a.m.; or (c) causes or procures any child under the age of ten to be at any time in any street, or in any licensed premises or place of public amusement to which the public are admitted by payment, for the purpose of singing, playing, or performing for profit, or offering anything for sale, shall on summary conviction be liable to a fine not exceeding £25, or alternatively, or in default of payment, or in addition thereto, to imprisonment with or without hard labour for any term not exceeding three months. But it is provided that any local authority may extend or restrict the hours mentioned in sub-section b, either on every day or on any specified days of the week, and either as to the whole of their district or as to any specified

area therein; also in the case of any entertainment or series of entertainments in licensed premises, or in any circus, or other place of public amusement, where it is shown to the satisfaction of a petty sessional court, or in Scotland the school board, that proper provision has been made to secure the health and kind treatment of any children proposed to be employed thereat, the court, or in Scotland the school board, may grant a licence for such time and during such hours of the day, and subject to such restrictions and conditions as it may think fit, for any child exceeding seven years of age, of whose fitness to take part in such entertainment without injury the said court or school board is satisfied, to take part in such entertainment. A secretary of state may assign to any inspector under the Factory Acts the duty of seeing whether the restrictions and conditions of any license under this section are complied with. The above subsection (c) was to come into operation on Nov. 1st, '89. Where a person having the custody or control of a child has been convicted of committing in respect of such child an offence under sect. 1 of the Act, or an offence involving bodily injury to the child and punishable with penal servitude, or is committed for trial for any such offence, or bound over to keep the peace towards such child, the petty sessional court may order that the child be taken out of the custody of such person and committed to the charge of a relation or some other fit person named by the court and willing to undertake the duty until it attain the age of fourteen years, or if a girl sixteen years; and the court may order the parent to contribute to the maintenance of the child as if it were detained under the Industrial Schools Act. An accused person under the Act, or the husband or wife of the accused, is to be a competent but not a compellable witness. Nothing in the Act is to be construed to take away or affect the right of any parent, teacher, or other person having the lawful control or charge of a child, to administer punishment to such child.—[73] *Customs and Inland Revenue Bill*. Embodied the Budget proposals in reference to the new estate duty and the increase of the beer duty. (See FINANCE, NATIONAL.) On second reading Mr. Pictou moved an amendment against sanctioning a measure which involved the continuance for another year of the present duty on tea. The amendment was rejected by 216 to 121. As the *Customs and Inland Revenue Act*, '89, the bill received royal assent May 31st (52 Vict. ch. 7).—[74] *Friendly Societies Act*, '89 (52 & 53 Vict. ch. 22—royal assent July 26th), repeals the *Friendly Societies Act*, '82, and enacts that where any friendly society, by reason of its being constituted so as to receive contributions by means of collectors at a greater distance than ten miles from its registered office, is subject to the provisions of sect. 30 of the Act of 75, the Chief Registrar of Friendly Societies, on the application of the society, may, with the approval of the Treasury, grant a certificate of exemption from the provisions of the section in question in any case in which he is of opinion that the society is not one to which the provisions of the section ought to apply; such certificate is to be subject to revocation, but while it remains in force the society shall be subject to all the provisions and entitled to all the privileges of the Friendly

Societies Acts as if it were a society, within the definitions of sect. 8 of the principal Act not receiving contributions by means of collectors at a greater distance than ten miles from the registered office.—[75] *Hares Preservation Bill*, to establish a close time for hares, read a second time on the motion of Lord Stanley of Alderley, May 23rd (passed and dropped in Commons).—[76] *Horseflesh (Sale for Food) Bill*, introduced by Mr. Knowles, as the *Sale of Horseflesh, etc., Regulation Act*, '89 (52 & 53 Vict. ch. 11—royal assent June 24th), "an Act to regulate the sale of horseflesh for human food," enacts that no person shall sell, offer, expose, or keep for sale any horseflesh for human food, elsewhere than in a shop, stall, or place over or upon which there shall be at all times painted, posted, or placed in legible characters of not less than four inches in length, and in a conspicuous position, and so as to be visible throughout the whole time, whether by night or day, during which such horseflesh is being offered or exposed for sale, words indicating that horseflesh is sold there. No person shall supply horseflesh for human food to any purchaser who has asked to be supplied with some meat other than horseflesh, or with some compound article of food which is not ordinarily made of horseflesh. Any medical officer of health or other officer of a local authority may at all reasonable times inspect any meat which he has reason to believe to be horseflesh exposed or deposited for the purpose of sale, and intended for human food in any place other than such shop, etc., as aforesaid, and if such meat appears to him to be horseflesh he may seize it. On complaint made on oath by any officer of a local authority any justice may grant a warrant for searching premises where there is reason to believe that there is kept or concealed any horseflesh intended for sale or for preparation for sale for human food contrary to the provisions of the Act, and any meat that appears to such officer to be such horseflesh may be seized. If it appears to any justice that any meat seized under the foregoing provisions is horseflesh he may make such order regarding its disposal as he may think desirable. Any person offending against any provision of the Act is liable to a penalty not exceeding £20, to be recovered summarily. Horseflesh is defined for the purposes of the Act to include the flesh of asses and mules, and to mean horseflesh cooked or uncooked, alone, or accompanied by or mixed with any other substance. The Act applies to the whole of the United Kingdom, and came into operation Sept. 29th, '89.—[77] *House of Lords (Discontinuance of Writs) Bill*. The Marquis of Salisbury intimated (Feb. 28th) that he did not propose to introduce this session the measure brought forward by him in the previous year for excluding unworthy members, because he did not see any chance of its becoming law. The Earl of Carnarvon (March 11th) presented a bill with the above title, and which provided a procedure for the exclusion from Parliament of any peer proved guilty of felony or misdemeanour, or who should appear in any proceedings before a judge of a superior court to have been guilty of discreditable conduct. The measure was discussed (Mar. 1st), when the previous question, moved by the Marquis of Salisbury, was carried against the motion for second reading by 73 to 14.—[78] *Indecent Advertisements*

BILL, introduced by the Earl of Meath, proposed to embody in the general law certain local enactments giving a summary method of dealing with the circulation or publication of indecent handbills, pamphlets, etc.; read a second time April 8th, passed both Houses; as the **Indecent Advertisements Act, '89** (52 & 53 Vict. ch. 18) received royal assent July 26th, and comes into operation Jan. 1st, 90. The affixing, or exhibition, or circulation, or attempted delivery, of any obscene matter of the kind, whether written or printed, is to render the offender liable to a penalty not exceeding 40s., and the persons sending others to commit any such offence to a penalty not exceeding 25s.—[79] Mr. Ritchie (June 27th) brought in a bill to provide for the notification of infectious disease to local authorities. As the **Infectious Disease Notification Act, '89** (52 & 53 Vict. ch. 72), the measure received royal assent Aug. 30th. It extends to every London district after the expiration of two months from the passing thereof, and to any urban, rural, or port sanitary district after the adoption thereof; and it enacts that where any inmate of a building used for human habitation within a district to which the Act extends is suffering from an infectious disease to which the Act applies, the head of the family to which such patient belongs, and in his default the nearest relatives of the patient present in the building or being in attendance on the patient, and in default of such relatives every person in charge of or in attendance on the patient, and in default of any such person the occupier of the building, shall, as soon as he becomes aware that the patient is suffering from an infectious disease to which this Act applies, send notice thereof to the medical officer of health of the district; and the medical practitioner attending on or called in to visit the patient is forthwith, on becoming aware that the patient is suffering from an infectious disease to which the Act applies, to send to the medical officer of health for the district a certificate stating the name of the patient, the situation of the building, and the infectious disease from which the patient is suffering. Any person failing to give a notice or certificate is liable on summary conviction to a fine not exceeding 40s. The local authority is to gratuitously supply forms of certificate to any medical practitioner residing or practising in their district who applies for the same, and is to pay to every practitioner for each certificate sent by him a fee of 2s. 6d. if the case occur in his private practice, and of 1s. if the case occur in his practice as medical officer of any public body or institution. Infectious disease is defined to mean small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlatina or scarlet fever, and typhus, typhoid, enteric, relapsing, continued, or puerperal, fevers; also, as respects any particular district, any other infectious disease to which the Act shall be extended by resolution of the local authority.—[80] **Intermediate Education (Wales) Bill**, second reading moved (May 15th) by Mr. Stuart Rendel, supported by Mr. Gladstone amongst others, accepted by the Government subject to certain modifications, and agreed to. Passed both Houses, and as the **Welsh Intermediate Education Act, '89** (52 & 53 Vict. ch. 40) received royal assent Aug. 12th. Its purpose is to make further provision for the intermediate and technical education of the inhabitants of

Wales and the county of Monmouth. There is to be appointed in every county of Wales, and in the county of Monmouth, a joint education committee, consisting of three persons nominated by the county council, and two persons, well acquainted with the condition of the country and the wants of the people, nominated by the Lord President of the Council, which joint committee is to submit to the Charity Commissioners a scheme or schemes for the intermediate and technical education of the inhabitants of their county, specifying in each scheme the educational endowments within their county which in their opinion ought to be used for the purpose of such scheme. A county council may recommend their committee to insert in such scheme a provision for a payment out of the county rate for the purposes of carrying into effect the scheme or any particular part thereof, but the addition to the county rate for the purposes of the Act is not in any year to exceed 1d. in the £; and the Treasury may pay, according to the efficiency of the schools, as ascertained by annual inspection and report, an amount not exceeding the amount payable that year out of the county rate. Where a county council recommend a payment out of the county rate a scheme may be made in pursuance of the Act, although there is no other endowment.—[81] **Interpretation Act, '89** (52 & 53 Vict. ch. 62)—royal assent Aug. 30th, is an Act for consolidating enactments relating to the construction of Acts of Parliament, and for further shortening the language used in Acts of Parliament.—[82] **Intoxicating Liquors (Ireland) Bill** was to amend the law relating to the sale of intoxicating liquors in Ireland on Saturday and Sunday, and was the same bill as was passed by the select committee of last year. (See 89 ed., Session, sect. 70.) Late in the session of '89 the Government felt themselves unable, on account of the great pressure of other business and the strenuous opposition threatened to this particular measure, to afford the facilities for proceeding with it which they had promised, and it was withdrawn.—[83] **Irish Arterial Drainage and Light Railways**. Mr. A. Balfour (May 31st) moved for leave to introduce four bills, three of which were for the improvement of the drainage of lands, and for the prevention of inundations within the catchment areas of Lough Neagh and the Lower Liffey, the River Barrow and the River Shannon, the fourth being for extending the time for completing the works authorised under certain Acts to be executed within the River Suir drainage district. Bills brought in June 3rd, with one to facilitate the construction of light railways in Ireland. This last amended in certain details the Irish Tramways Act of '83, and provided for the construction of light railways in poor and congested districts. Great latitude was left to the Treasury in regard to finance; and, besides the grant of considerable loans, they were empowered to contribute £500,000 as a free gift for construction of light railways. In respect to arterial drainage a similar contribution might be made not exceeding £385,000, so that the whole scheme of the Government involved a free gift, irrespective of loans, of just under £1,000,000 sterling. Considerable opposition was manifested to the drainage bills, and in the result they were all withdrawn. On the

second reading of the Light Railways Bill Mr. H. Cossham proposed an amendment against giving or advancing money for the construction of railways in Ireland, except under the direction and responsibility of popularly elected bodies. This was negatived by 113 to 31, and second reading carried by 103 to 28. The money resolution empowering a free grant from the Treasury of £600,000, in furtherance of the objects of the bill, carried by 230 to 76 (July 23rd). As the Light Railways (Ireland) Act, '88 (52 & 53 Vict. ch. 66), the measure received royal assent Aug. 30th.—(84) Land Transfer Bill, introduced by the Lord Chancellor (Feb. 25), "to simplify titles and to facilitate the transfer of land in England," considered by a select committee, and as amended reproduced the Land Transfer Bill of '88, with the alterations made by the select committee of the House of Lords to which the bills of '88 and '89 were referred. What had been done was to revise and re-edit the Land Transfer Act of '75 with reference to the Conveyancing and Settled Land Acts of '81 and '82, and to rewrite it as far as practicable in the language of those Acts, with the additions and amendments contained in the bills of '87 and '88. Besides these matters, the most important points in the bill were: compulsory registration on the first transfer; future registered transfers and charges to have priority; creation of realty representative; confirmation of title in five years after notice; establishment of insurance fund; assimilation of the laws relating to real estate to those relating to personality; and provisions as to estates tail. Third reading carried in House of Lords (June 25th) by 113 to 104. On July 5th the measure was again under consideration on further proceedings after third reading, and an amendment of the Marquis of Bath for the omission of clause 74, which provided that land dealt with under will should remain under control of the executors for a year, as in the case of personal property, being carried by 122 to 113. Lord Salisbury said that as the amendment took the heart out of the bill, he did not think it necessary or admissible to proceed with it further. Bill withdrawn accordingly.—(85) Larceny Act, '61, Amendment (Use of Firearms) Bill, was introduced by the Earl of Miltown (March 25th), and provided that burglars or their accomplices found in the possession of firearms should be liable to the punishment of flogging. Second reading was (April 2nd) carried by 37 to 9. On third reading Lord Herschell moved the rejection of the measure, but the bill was carried by 75 to 19 (May 24th). Dropped in Commons.—(86) Leaseholds Emfranchisement. Mr. H. Lawson (May 1st) moved the second reading of the bill to enable leaseholders of houses to purchase the fee simple of their holdings, and Viscount Lynton thereupon proposed an amendment declining to consider the question until the House had had an opportunity of considering the report of the committee appointed to inquire into the subject of Town Holdings. The bill was opposed by the Government, and the amendment was carried against the second reading by 186 to 157. Mr. Gladstone voted for the second reading (see also sect. 143) Light Railways (Ireland) Bill (see sect. 83).—(87) Local Government (Scotland). The Lord Advocate introduced (April 8th) four bills to amend the law relating to local government in Scotland,

and to the election of parochial boards in Scotland, and to amend the procedure in regard to private bills in Scotland. He explained that in each county an elective council was to be set up, in which, however, there were to be no aldermen, that office or dignity being unknown in Scotland. The constituency would, as in England, consist of qualified ratepayers, including women and peers who were rated, and provision was made by which occupying voters under the service franchise could be put on the county roll. The county councils were to have transferred to them the administrative powers and duties of the commissioners of supply, and of other local authorities, and certain specified statutory powers of the justices of the peace, which did not, however, include licensing. Any works involving capital, expenditure, and the borrowing of money would require the consent of a standing joint committee of the county council and of the commissioners of supply, which joint committee would also be the police committee under the new system of administration. The powers of Parliament regarding Scottish private bills would remain intact, but after second reading such bills would stand referred to a Scottish judge and two appointed commissioners, who would hold local inquiries in a centre most convenient to the parties and report to Parliament, their functions ceasing with the presentation of the report. The grants in aid, amounting to £289,000, would cease, but the Exchequer would surrender the proceeds of licence duties, amounting to £323,000, and a share of the probate duty, amounting to £234,000. Of this total it was proposed that about £171,000 should go to relieve the burden of school fees. On second reading there was a long discussion (May 23rd, 24th, 27th, and 30th), after which the bill passed that stage without challenge. Mr. Munro Ferguson then moved to refer the bill to a select committee, composed of all the Scotch members, and thirty other members to be nominated by the committee of selection. This proposal was supported by Mr. Gladstone, but opposed by the Government, and rejected by 239 to 177. The Supplementary Bill was read a second time May 31st, and the two bills were subsequently consolidated. In committee on the bill (July 4th to 16th), an amendment of Mr. Campbell-Bannerman, transferring the control of the police to the county councils, was rejected by 205 to 113; an amendment of Dr. Cameron, constituting the county council the licensing authority for the county, was rejected by 164 to 127; an amendment of Dr. Clark, providing that the whole of the probate duty grant should be applied to the relief of school fees, was rejected by 154 to 141. Mr. Howorth moved to omit the provision by which the balance of the probate duty grant would be applied to the payment of school fees, but his amendment was defeated by 245 to 52. A proposal of the Lord Advocate, to the effect that no woman should be eligible for election as a county councillor, was carried by 70 to 38. Mr. A. Balfour stated (July 16th) that, under a new proposed financial arrangement, there would be £246,500 payable for school fees, which would about pay the fees of the first five standards. Consolidated bill reported July 16th, considered as amended July 22nd, 23rd, and 24th, and read a third time July 24th. Private Bill Procedure (Scotland) Bill and Local Government (Scotland) Parochial Boards Bill with-

drawn July 22nd. The Act, being the *Local Government (Scotland) Act, '89* (52 & 53 Vict. ch. 50), received the royal assent on Aug. 26th, and is substantially on the lines indicated above—that is to say, it provides for the establishment in every county of a council wholly elective, which is to be intrusted with the administrative and financial business of the county. The term of office of a councillor is to be three years, and every third year the whole number of councillors are to go out of office; but the councillors first elected are only to continue in office until the first Tuesday of December, '92. Councillors are to be appointed by burghs of less than 7000 inhabitants, and by royal burghs of over that population which do not return or contribute to return a member to Parliament, and by burghs of over that population which do not maintain a separate police force. No woman is to be eligible for election as a county councillor. The county councils are to have transferred to them the whole powers and duties of the commissioners of supply (with some savings), the whole powers and duties of the county road trustees, of the local authority of the county under the *Contagious Diseases Animals Acts* and *Destructive Insects Act, '77*, of the local authorities under the *Public Health Acts*, of parishes within the county (excluding burghs and police burghs), and the administrative powers and duties of the justices in respect of the executive as local authority of the Acts relating to gas meters, explosive substances, weights and measures, habitual drunkards and wild birds, the appointment of visitors of lunatic asylums, and the registration of the rules of scientific societies. Provision is made for the transfer to the county council by provisional order of the powers of certain government departments and other authorities. A standing joint committee of the county council and commissioners of supply is to be the police committee, and no works involving capital expenditure are to be undertaken without consent of the same joint committee. During the year ending March 31st, '90, the probate duty grant is to be applied in—£30,000 for local taxation in the highlands and islands, in paying a contribution towards the cost of roads, the balance to be applied towards the relief of school fees in the state aided schools. After March 31st, '90, the proceeds of duties on local taxation licences and the probate duty grant are to be applied in paying £10,000 to the county councils of the counties in the highlands and islands in relief of local taxation, in distributing £35,000 among the road authorities; £155,000 among the police authorities towards pay and clothing; £20,000 among the parochial boards as a contribution to the cost of poor law medical relief, etc.; £90,500 towards the cost of maintenance of pauper lunatics; the balance to be applied towards relief from school fees in state-aided schools. The constituency, as explained above, includes women and peers who are rated, and there are also special provisions by which service franchise occupiers may be placed on the register. The first election is to take place on the first Tuesday of Feb. '90, and the next election is to be held on the first Tuesday of Dec. '92, and every third year thereafter. A county council may appoint a medical officer, and may oppose bills in Parliament. A local annual budget is to be presented in October. Every county is to be divided into districts

for roads and public health purposes, and the district committee is to consist of the county councillors for the electoral divisions comprised in the district, together with one representative of the parochial boards of each parish comprised or partly comprised therein, and one representative of each burgh within the meaning of the *Roads and Bridges (Scotland) Act '78*, where the management and maintenance of the highways within the burgh have, under the provisions of the Act, been transferred to the county. The "appointed day" under the Act is to be the 15th May, '90, or such other day, earlier or later, as the Secretary for Scotland on the application of the provisional council or county council may appoint, either generally or with reference to any particular provision of the Act.—[88] *London Council (Money) Act, '89* (see heading *COUNTY COUNCILS*, sect. 3).—[89] *London County Council (Theatres) Bill*. Sir John Lubbock (June 28th) brought in a bill to confer powers on the London County Council for inspecting theatres, music-halls, and other places of entertainment, and granting certificates, but was unable to find an opportunity for second reading; and the Government declining to give facilities, it was eventually dropped (see heading *COUNTY COUNCILS*, sect. 3).—[90] *The Lunacy Act Amendment Act, '88*, introduced by the Lord Chancellor (52 & 53 Vict. ch. 41—royal assent Aug. 26th), adopts in the main the recommendations made in the report of the select committee on Lunacy Law in '78, and is substantially the same as the bill which was before Parliament in '83, '86, '87, and '88. One of its principal objects is to furnish safeguards against the improper confinement of persons as lunatics by allowing them to be detained only under orders made by an independent authority, and at the same time to remove the difficulty in securing the speedy treatment of mental disease by giving protection to medical practitioners and others who, in the performance of their duty, are concerned with lunatics. Except in urgent cases a person not being a pauper is not to be confined as a lunatic without an order of a county court judge, stipendiary, or specially appointed justice, to be obtained upon a petition presented, if possible, by the husband or wife, or by a relative of the lunatic, and accompanied by two medical certificates. Provision is made to secure privacy, and for the alleged lunatic's right to have a personal interview after his reception with a county court judge, magistrate, or justice. In urgent cases a patient may be confined upon an order by the husband or wife, or by a relative of the lunatic, accompanied by one medical certificate; but in that case a petition for an order must be presented to a county court judge, stipendiary, or justice, within seven days; and the urgency order remains valid only for the seven days, or so long as the petition is pending. The Act also amends the law as to single patients; gives increased powers for administering the property of lunatics; enables public asylums to receive private patients upon such terms as may be agreed; and makes certain amendments in detail, with a view to a consolidation of the law. Except as otherwise expressly provided, the Act comes into operation on May 1st, '90; but among the exceptions is the section giving protection to persons signing and carrying out orders, reports, and certificates, which came in force immediately after the passing of the Act.

—[91] **Marriage with a Deceased Wife's Sister** (Scotland) Bill, second reading moved by Mr. A. Elliot (April 3rd); motion carried by 184 to 131. (Dropped). —[92] **Marriage with a Deceased Wife's Sister Bill**, second reading moved by the Duke of St. Albans (H.L.), May 9th. Earl Percy proposed the rejection of the measure, and after debate, in which Lords Grimthorpe and Herschell supported, and the Archbishop of Canterbury, Duke of Argyll, and Earl of Selborne opposed, the bill was thrown out by 147 to 120. The Prince of Wales voted for the second reading. —[93] **Master and Servant Act**, '89 (52 & 53 Vict. ch. 24—royal assent July 26th), introduced by Mr. Howell, and repeals certain statutes, relating to master and servants in particular manufactures, which have ceased to be put in force or have become unnecessary by the enactment of subsequent statutes. —[94] **Merchant Shipping Act**, '89 (52 & 53 Vict. ch. 45—royal assent Aug. 26th), amends the Merchant Shipping Acts in certain respects, including advance notes to seamen, and extends the provisions of those Acts with respect to steamships, to ships propelled by electricity or other mechanical power, with such modifications as may be prescribed by the Board of Trade. —[95] **Merchant Shipping (Colours) Act**, '89 (52 & 53 Vict. ch. 73—royal assent Aug. 30th), amends the law relating to the use of flags in the British merchant service. —[96] **Merchant Shipping (Pilotage) Act**, '89 (52 & 53 Vict. ch. 61—royal assent Aug. 30th), makes various amendments in the law relating to pilotage. —[97] **Merchant Shipping (Tonnage) Act**, '89 (52 & 53 Vict. ch. 43—royal assent Aug. 26th), amends the law relating to the measurement of the tonnage of merchant ships. —[98] **Metropolitan Board of Works (Pensions) Bill**, introduced by Mr. Pickersgill (April 9th). (Dropped). —[99] **Movable Dwellings Bill**, introduced by Mr. Burt, read a second time July 10th. (Withdrawn Aug. 28th). —[100] **The National Debt Act**, '89 (52 Vict. ch. 6—royal assent May 31st), gives effect to the Budget proposal whereby the permanent annual charge for the Debt during the current and every subsequent financial year was to be reduced from £26,000,000 to £25,000,000 (see FINANCE, NATIONAL). —[101] **National Debt Redemption Act**, '89 (52 Vict. ch. 4), provided for the redemption of the Consolidated 3 per cent. Stock and the Reduced 3 per cent. Stock, then outstanding, by payments of not less than £500,000 at any one time. Such payment might be made on July 6th, '89, at par, or it might be made in advance, with such consideration for the proportionate part of the dividend accrued up to date as might be agreed upon between the Treasury and the stockholder; or the Consols or Reduced might be exchanged, before the 6th of July, for 2½ per cent. Consolidated Stock or Local Loans Stock, on terms to be agreed upon. Power was given by the Act to create such an amount of 2½ Stock as might be necessary for the purposes of the measure. —[102] **National Portrait Gallery Act**, '89 (52 & 53 Vict. ch. 25—royal assent July 26th), provides and appropriates a site, immediately adjacent to the National Gallery, for a National Portrait Gallery. —[103] **Naval Defence Act**, '89 (52 Vict. ch. 8—royal assent May 31st), gives effect to the resolutions mentioned in sect. 40 (*ante*), provides that the application of the money issued shall be subject to certain restrictive powers which are to be exercised by the Treasury, and that the accounts of expenditure under the Act, so far as such

expenditure is not included in the appropriation accounts of money annually granted by Parliament for navy services, shall be audited by the Comptroller and Auditor-General; and has appended schedules of the vessels to be built by contract, and in H.M. dockyards. —[104] **Official Secrets Act**, '89 (52 & 53 Vict. ch. 52—royal assent Aug. 26th), was introduced by the Attorney-General, and is an Act to prevent the disclosure of official documents and information. It enacts that where a person for the purpose of wrongfully obtaining information enters, or is in any part of, a place belonging to Her Majesty, being a fortress, arsenal, factory, dockyard, camp, ship, office, or other like place in which he is not entitled to be; or when a person being lawfully or unlawfully in any such place either obtains any document, sketch, model, or knowledge of anything which he is not entitled to obtain, or when outside any such place attempts to take without authority any sketch of such place; or where a person having possession of any document or information of the kind which has been obtained by any act constituting an offence under this statute, or which has been confidentially intrusted to him by some officer of Her Majesty, communicates the same to any person to whom it ought not in the interest of the State to be communicated, he shall be guilty of a misdemeanour, and shall be, on conviction, liable to imprisonment, with or without hard labour, for a term not exceeding one year, or to a fine, or to both imprisonment and fine. Any act declared by this section to be a misdemeanour shall, if the intention were to communicate information to a foreign state, or if the communication be made to any agent of a foreign state, be a felony, and render the offender liable, at the discretion of the Court, to penal servitude for life, or for any term not less than five years, or to imprisonment not exceeding two years with or without hard labour. Breaches of official trust of the same character committed by persons who have held or who are holding office under the Queen, or by persons holding a Government contract which involves an obligation of secrecy, are to be similarly punished. A prosecution under the Act is not to be instituted except by or with the consent of the Attorney-General. —[105] **Passenger Acts Amendment Act**, '89 (52 & 53 Vict. ch. 59—royal assent Aug. 12th). A Government measure which enacts that for the purposes of the 52nd sect. of the Passengers Act, '55, and the 15th sect. of the Passengers Act Amendment Act, '63, the term "passenger ship" shall signify every description of sea-going vessel carrying one or more passenger or passengers on any voyage from any place in Her Majesty's dominions to any place whatever. —[106] **Paymaster General Act**, '89 (52 & 53 Vict. ch. 53—royal assent Aug. 26th) amends the Acts relating to the office of Paymaster-General, and makes better provision for the discharge of the duties of that office. —[107] **Poor Law Act**, '89 (52 & 53 Vict. ch. 56—royal assent Aug. 30th), amends the law respecting children in workhouses, and respecting the borrowing of money by guardians and managers of district schools, and respecting the managers of the Metropolitan asylum district. It enacts, among other things, that where a child is maintained by the guardians of any union, and was deserted by its parent, the guardians may at any time resolve that such child shall be under the control of

the guardians until it reaches the age, if a boy of 16, and if a girl of 18 years, and thereupon until the child reaches that age all the powers and rights of such parent in respect of that child shall vest in the guardians. The guardians may rescind their resolution, and powers to determine it in certain circumstances are given to a court of summary jurisdiction. Where a parent is imprisoned in respect of an offence committed against a child, the section shall apply as if the child had been deserted by that parent, but the section is not to relieve any person from any liability to contribute to the maintenance of the child.—[103] **Poor Rate (Metropolis) Bill**, proposed to equalise the poor rate over the entire Metropolitan area; second reading moved by Mr. Pickersgill (May 29th). Mr. Ritchie said several of the poorer Metropolitan parishes would be considerable losers by the proposal. Bill rejected by 217 to 181.—[104] **Prevention of Cruelty to, and Protection of Children Act** (see sect. 72). **Princes of Wales' Children Act** (see sect. 47). **Private Bill Procedure (Scotland) Bill** (see sect. 87).—[105] **Public Health Act**, '89 (52 & 53 Vict., ch. 64—royal assent Aug. 30th), was passed to remove doubts as to the power of the Local Government Board to make regulations respecting cholera.—[106] **Public Libraries Acts Amendment Act**, '89 (52 Vict., ch. 9—royal assent May 31st), enables Commissioners separately appointed under the principal Acts for any two or more adjoining parishes, with the consent of the vestries of such parishes, to agree to share the cost of the purchase, erection, repair and maintenance of any library building situate in one of such parishes, cost of books, and of all other expenses connected with the same.—[107] **Public Trustees**. The Lord Chancellor, July 1st, presented a bill for the appointment of a public trustee (passed the Lords, but withdrawn in Commons).—[108] **Public Works Loans Act**, '89 (52 & 53 Vict., ch. 71—royal assent Aug. 30th), empowers the issue by the National Debt Commissioners of any sums not exceeding £2,000,000 for the purpose of loans by the Public Works Loans Commissioners; £1,000,000 for the purpose of loans by the Irish Public Works Commissioners; and £25,000 for the purpose of loans by the Scotch Fishery Board.—[109] **Purchase of Land (Ireland) Amendment Act**, '89 (52 & 53 Vict., ch. 13—royal assent June 24th), enables the Land Commission to advance money to tenants to increase the size of their holdings by purchasing additional lands which are reasonable adjuncts to such holdings, but nothing in the Act is to authorise the making to any one tenant of a larger advance than that which the Land Commission is authorised to sanction to any one purchaser under the Purchase of Land (Ireland) Act. The additional land is not to exceed ten acres, unless the land so purchased is valued at an annual sum not exceeding £10 Government value.—[110] **Registration of County Electors (Extension of Time) Act**, '89 (52 & 53 Vict., ch. 29), introduced by Mr. Hobhouse, enacts that in each of the years '89 and '90 the revision of the lists of parliamentary voters and county electors may be later than Oct. 1st, so that it be not later than Oct. 30th, and every county register shall be completed on or before Nov. 30th, and shall come into operation on Jan. 1st. Nothing in the Act is to alter the dates for the completion and coming into operation of the Burgess roll for any municipal borough.—[111] **Regulation of**

Railways Act, '89 (52 & 53 Vict., ch. 57—royal assent Aug. 30th), empowers the Board of Trade from time to time to order a railway company within a limited time to adopt the block system on all or any of their lines open for the public conveyance of passengers, to provide for the interlocking of points and signals on or in connection with all or any of such railways, and to provide for and use on all their passenger trains continuous brakes, complying with certain defined requirements of the Board. Periodical returns of overtime worked by persons whose duty involves the safety of trains or passengers are to be made to the Board of Trade. Every passenger shall on request by an officer or servant of the company either produce, and if so requested deliver up, a ticket showing that his fare is paid, or pay his fare from the place whence he started, or give the officer or servant his name and address; and in case of default shall be liable, on summary conviction, to a fine not exceeding forty shillings. From and after a date to be fixed by the Board of Trade, and subject to exceptions which may be allowed by such order, every passenger ticket is to have the fare printed or written thereon.—[112] Mr. Bradlaugh, April 12th, moved the second reading of the **Religious Prosecutions Abolition Bill**, the object of which was to abolish prosecutions for the expression of opinion on matters of religion. The measure was opposed by the Government, and thrown out by 141 to 46.—[113] **Removal of Wrecks Act**, '77, Amendment Act, '89 (52 Vict., ch. 5—royal assent May 31st). Bill introduced by Sir E. Birkbeck, and read a second time March 27th. The principal Act authorised the removal of such wrecks only as were, or were likely to be, an obstruction or danger to navigation; and doubts had been raised if the Act extended to the removal of wrecks which were an obstruction or danger to lifeboats in their work of saving life and property. The amending Act of '89 extends the Act of '77 so as to make it meet the case of wrecks which are likely to hamper or endanger the movements of the lifeboats of the Royal National Life Boat Institution.—[114] **Revenue Act**, '89 (52 & 53 Vict., ch. 42—royal assent Aug. 26th), prohibits the importation of books first published in any country other than the United Kingdom, wherein there is a subsisting copyright in the United Kingdom, printed or reprinted in any country other than that in which they were first published, and as to which the owner of the copyright has given the British Customs the notice and declaration required by statute; also the importation of tobacco cut and compressed by mechanical or other means; also the importation of any imitation coin purporting to be or resembling British coin. The allowance to be made under section 141 of the 5 & 6 Vict., ch. 35, on prepayment of income tax, is to be at the rate of 23 per cent. per annum in lieu of 4 per cent. per annum.—[115] **Sale of Intoxicating Liquors on Sunday Bill**, which was to prohibit such sale on Sundays in England, except in the case of lodgers and *bona-fide* travellers as defined by the Licensing Acts '72-4, was introduced by Mr. J. C. Stevenson; second reading carried by 179 to 157, majority 22, on March 27th. Withdrawn July 12th, the promoters being unable to obtain further opportunities of proceeding with the measure.—[116] **Secretary for Scotland Act**, '89 (52 & 53 Vict. ch. 16—royal assent July

5th), is to remove doubts which have been entertained as to whether the functions of the Secretary for War have been transferred to the Secretary for Scotland by virtue of the Act of '87, and enacts that nothing in the principal Act shall affect or be deemed to have affected any powers, duties or functions of any of Her Majesty's principal secretaries of State as Secretary for the War Department.—[117] *Settled Land Act '89* (52 & 53 Vict. ch. 36—royal assent Aug. 12th), provides that any building, lease or agreement under the Settled Land Act of '82 may contain an option, to be exercised at any time within an agreed number of years, not exceeding ten, for the lessee to purchase the land leased at a price fixed at the time of the making of the lease or agreement, such price to be the best which, having regard to the rent reserved, can reasonably be obtained, and to be either a fixed sum of money or such a sum as shall be equal to a stated number of years' purchase of the highest rent reserved by the lease or agreement. The price when received is to be for all purposes capital money arising under the original Act.—*Shannon Drainage Bill*, see sect. 83.—[118] *Shops Weekly Half-Holiday Bill*, introduced by Sir J. Lubbock, dropped, no opportunity for discussion on second reading having been found.—*Suak Drainage Bill*, see sect. 83.—[119] *Sugar Convention Bill*. Baron H. de Worms introduced, April 12th, the bill to enable Her Majesty to carry into effect a convention made Aug. 30th, '88, in relation to bounties on the exportation of sugar. The object of the principal clause of the measure was to enable Her Majesty, by Order in Council, to give effect to the decision of the majority of the powers under the Sugar Convention to prohibit the importation of bounty-fed sugar, except in transit; but this could only be done after the fact that bounties had been given was established by the decision of the majority of the signatory powers. While the prohibition was in force sugar coming from any country dealt with would come under the Customs Act, like false coin, pirated books, improperly marked cutlery, and other articles of the same sort. Second reading was in the first instance fixed for May 14th, but before that day arrived it was postponed until after Whitsuntide, the question being, in the language of Mr. W. H. Smith, not one of immediate and pressing importance, and there being other measures which required the early consideration of the House. Bill withdrawn Aug. 22nd.—*Superannuation Bill*, introduced by Mr. Jackson, withdrawn Aug. 22nd.—[120] *Technical Instruction Bill*, introduced by Sir William Hart-Dyke, received royal assent Aug. 30th as the *Technical Instruction Act '89* (52 & 53 Vict., ch. 76), is an Act to facilitate the provision of technical instruction, and empowers a "local authority" (which expression is defined to mean the council of any county or borough, and any urban sanitary authority within the meaning of the Public Health Acts) from time to time out of the local rate to supply or aid the supply of technical or manual instruction, to such extent and on such terms, as the authority may think expedient, subject to certain restrictions, among which is that the authority shall not out of the local rate supply, or aid the supply, of such instruction to scholars receiving instruction at an elementary school in the obligatory or standard subjects prescribed by the Education Depart-

ment. The amount of the rate to be raised in any one year for the purposes of the Act is not to exceed one penny in the pound. The conditions on which parliamentary grants may be made in aid of technical or manual instruction are to be those contained in the minutes of the Department of Science and Art in force for the time being.—[121] *Theatres (County of London) Bill*, the object of which was to place all theatres and music halls in the Metropolis under the Home Office; second reading moved by Mr. Dixon Hartland (May 8th). The Home Secretary said the County Council would no doubt soon find out what further powers they required, and he would be glad to assist them in all that was necessary to secure the public safety. Motion for second reading negatived. (See also sect. 89).—[122] *Tithe Rent-charge Recovery Bill*, introduced by the Home Secretary, who, when moving second reading, July 18th, said it dealt merely with the one small branch of the large question of tithe—viz., recovery, and substituted for the only practicable existing method of recovery—viz., distraint, proceedings in the County Court. Mr. H. Gardner moved, and Mr. Dillwyn seconded, an amendment for the rejection of the bill, and the amendment was supported by Sir W. Harcourt, but was defeated by 212 to 160, second reading being then carried by 208 to 151. In committee Mr. Gray moved an instruction providing that tithe rent-charge should be recoverable from the landlord only, but this was defeated by 145 to 141. The Attorney-General stated, Aug. 14th, that the Government were prepared so to amend the bill as to make the owner instead of the occupier liable for tithe rent-charge. On the ministerial amendments being formulated, the Speaker expressed the opinion that the changes proposed were so considerable that the proper course would be to abandon the bill and introduce a new one. Bill withdrawn Aug. 16th, and no further ministerial proposals made on the subject.—[123] *Trust Funds Investment Bill*, proposed to give trustees a wider area of choice in the matters of the investment of trust funds than they had hitherto possessed; second reading moved by Mr. Cozens-Hardy April 3rd. Motion agreed to; bill passed both Houses, and as the *Trust Investment Act '89* (52 & 53 Vict. ch. 39), received royal assent Aug. 12th. It amends the law relating to the investment of trust funds by enacting that it shall be lawful for a trustee, unless expressly forbidden by the instrument (if any) creating the trust, to invest any trust funds in his hands in a variety of stocks, funds, and securities, including, besides the Government securities of the United Kingdom, real or heritable securities in Great Britain or Ireland, stock of the Bank of England or the Bank of Ireland, India $\frac{3}{4}$ per cent. stock, or India 3 per cent. stock, any securities the interest of which is guaranteed by Parliament, Metropolitan Board of Works Consolidated Stock, or stock which may hereafter be created by the London County Council, or debenture stock which may be created by the Metropolitan Police Receiver; in debenture or rent-charge or guaranteed or preference stock of any railway in Great Britain or Ireland incorporated by Act, and having during each of the ten years last past before the date of investment paid a dividend of not less than 3 per cent. per annum on its ordinary stock; India Railway Debenture Stock guaranteed by the Indian Government;

India Railway Stock upon which a fixed or paid minimum dividend in sterling is guaranteed by the Government of India; debenture or guaranteed or preference stock of any water company in the United Kingdom incorporated by special Act or Royal Charter, and having during each of the ten years last past before the date of investment paid a dividend of not less than 5 per cent. per annum on its ordinary stock; nominal or inscribed stock issued or to be issued by the corporation of any municipal borough having a population exceeding 50,000, or by any county council, under the authority of any Act; in nominal or inscribed stock issued or to be issued by any commissioners incorporated by Act for the purpose of supplying water, and having a compulsory rating power over an area containing a population exceeding 50,000, provided that during each of the ten years last past before the date of investment the rates levied by the Commissioners shall not have exceeded 80 per cent. of the amount authorised by law to be levied.—[124] **Universities (Scotland) Act, '89** (52 & 53 Vict. ch. 55), a lengthy and important measure passed with a view of making provision for the better administration and endowment of the Universities of St. Andrew's, Glasgow, Aberdeen, and Edinburgh, and for improving and regulating the course of study therein.—[125] **Weights and Measures Act, '89** (52 & 53 Vict. ch. 21)—royal assent July 26th—is a measure of great importance, especially to those engaged in trade. It provides that every weighing instrument used for trade shall be verified and stamped by an inspector of weights and measures, and every person who, after the expiration of twelve months from the commencement of the Act, uses or has in his possession for use for trade any weighing instrument not stamped as required by the Act, shall be liable to a fine not exceeding £5, or in the case of a second offence £5. The Court may sentence any person convicted under the principal Act, or this Act, for a second or subsequent offence, when it is of opinion that such offence was committed with intent to defraud, to imprisonment with or without hard labour for a term not exceeding two months. Sects. 16 and 46 of the principal Act, which respectively relate to the measure or capacity for goods formerly sold by heaped measure, and gave power to stamp measures made partly of metal and partly of glass, are repealed. The Board of Trade is empowered to cause such new denominations of standards for the measurement of electricity, temperature, pressure, or gravities as appear to them to be required for use for trade to be made and duly verified, and these new denominations of standards when approved by Her Majesty in Council are to be Board of Trade standards. The Board may appoint an officer to hold a local inquiry with respect to the administration of the law relating to weights and measures within the jurisdiction of any local authority, and the Board is to provide for the holding of examinations for the purpose of ascertaining whether persons acting or appointed to act as inspectors of weights and measures are properly qualified; but in the case of persons appointed before the commencement of the Act the passing of an examination is permissive. Where a person is convicted of any offence under this or the principal Act, the Court may cause such conviction to be published in such manner as it thinks desirable. All coal is to

be sold by weight only, except where, by the written consent of the purchaser, it is sold by boat-load, or by waggons or tubs delivered from the colliery into the works of the purchaser. When any quantity of coal exceeding 2 cwt. is delivered by means of any vehicle to a purchaser, the seller of the coal is to deliver or cause to be delivered, or to be sent by post or otherwise, to the purchaser or to his servant, before any part of the coal is unloaded, a ticket or note setting forth the weight of coal, and if in sacks how many, the weight of coal and vehicle, the tare weight of vehicle, and the net weight of coal delivered. Default in complying with these requirements, or the delivery of a less quantity than is stated on the ticket, renders the offender liable to a fine. The Act is to come into operation on Jan. 1st, '90.—[126] **Welsh Intermediate Education Bill** (see sect. 80).—[126] **Western Australia Constitution Bill**, to enable Her Majesty to assent to a bill for conferring a constitution on Western Australia, introduced by Baron H. De Worms, withdrawn Aug. 26th, with the understanding that the subject will be dealt with next session.—[127] **Colonisation**. The Select Committee appointed, April 12th, "to inquire into various schemes which have been proposed to the Government to facilitate emigration from the congested districts of the United Kingdom to the British Colonies or elsewhere; to examine into the results of any schemes which have received practical trial in recent years, and to report generally, whether in their opinion it is desirable that further facilities should be given to promote emigration; and, if so, upon the means by and the conditions under which such emigration can best be carried out, and the quarters to which it can most advantageously be directed," reported, July 23rd, stating that it would not be in their power to conclude their investigations, and recommending their reappointment next session.—[128] **Emigration and Immigration (Foreigners)**. The Commons Committee re-appointed, Mar. 25th, "to inquire into the laws existing in the United States and elsewhere on the subject of the immigration of destitute aliens, and as to the extent and effect of such immigration into the United Kingdom, and to report whether it is desirable to impose any, and, if so, what, restrictions on such immigration," reported Aug. 8th. They said that, speaking in general terms, the movement of population may be said to be now from east to west, and they stated that the number of emigrants from Germany during the five years ending '85 amounted to 817,000, or, adding 162,000 unreported cases, to 979,000. In Russia they found the same movement of population, and Hungary and Italy also swelled the tide of migration. In France there was an increase of alien residents from 801,754 in '76 to 1,115,214 in '86, the nations which contributed most largely to it being Germany, Italy, and Belgium. The proportion of the foreign to the total population of England and Wales has been increasing ever since '51, when there was one foreigner to every 350 persons enumerated, as compared with one to every 230 in '61 and one to every 220 in '81. In '71 the number of foreigners enumerated in England and Wales was 100,638, in '81 it was 118,031. The largest number of foreigners came from Germany, Russia (including Poland), France, and Italy. The number of Frenchmen

resident in this country showed a decrease in '81. The census figures for the whole United Kingdom showed, in '71, 114,000, and in '81, 136,000 foreign residents. The rate of immigration has been greater since '81 than at any recent period, but the Committee were unable to determine what the number of immigrants since that date had actually been. Mr. Patrick, one of the witnesses examined, considered that about one-third of all the immigrants arriving at the port of London were poor, and about one-sixth absolutely destitute, without any baggage, and clad in the most wretched manner. The general conclusions to be derived from the evidence, say the Committee, were as follow:—"1. It is impossible to state with accuracy the number of aliens at present in the United Kingdom. There are no means, as in America and nearly all Continental countries, for checking the number of immigrants that arrive with the intention of settling here. 2. Judging from such evidence as could be obtained, it appears that, though the number is not sufficiently large to create alarm, the proportion of the alien to the native population has been for many years and is on the increase. 3. The better class of immigrants only arrive in transit to other countries (chiefly America), but the poorest and worst class remain here. These latter, as they prosper and make a little money, often move on and make way for other poor aliens. 4. The distribution of these poor aliens, both as regards localities and trades, is such that the pressure occasioned is out of proportion to their numbers. 5. They are confined to a few towns, and generally to a special part of such towns; and the trades they chiefly affect are those of tailoring, shoemaking, and cabinet-making. 6. In these trades, for a time at least, they work for less wages than British workmen do, and always for longer hours. 7. Their physical condition is inferior to that of the British workmen; but their health appears to be good, notwithstanding the neglect of all sanitary laws. They are quick at learning, moral, frugal, and thrifty, and inoffensive as citizens, but generally very dirty and uncleanly in their habits." The recommendations made by the Committee were as follow:—"1. That measures should be adopted to ascertain with greater accuracy, and more frequently than the decennial census provides, the number of aliens that remain in this country. 2. That measures should be adopted to secure a complete annual record of the number of alien steerage and deck passengers arriving and departing at the ports of the United Kingdom from and to ports in Europe, and that such annual record should be laid before Parliament. 3. That measures should be adopted to provide for a record of the names, sexes, ages, occupations, nationalities, and destination of all alien steerage and deck passengers arriving at ports of the United Kingdom, and not in possession of through tickets to other countries. 4. That British consuls at European seaports especially those in proximity to the United Kingdom, be instructed to direct special attention to the collection of information on the subject of the emigration of destitute persons to the United Kingdom. And 5. That while your Committee see great difficulties in the way of enforcing laws similar to those of the United States and certain other countries against the importation of pauper and destitute aliens, and while they are not prepared to recommend

such legislation at present, they contemplate the possibility of such legislation becoming necessary in the future, in view of the crowded condition of our great towns, the extreme pressure for existence among the poorer part of the population, and the tendency of destitute foreigners to reduce still lower the social and material condition of our own poor."—**[129] Friendly Societies.** The Select Committee of the House of Commons appointed July '88, and re-appointed Feb. 28th, '89, "to inquire into, and report upon, the operation of section 30 of 'The Friendly Societies Act, '75,' as amended by subsequent Acts, and into the organisation or general condition of societies and companies to which the said section applies, and to suggest what amendment of the law (if any) is required to ensure the better management of such societies and companies, and the more complete protection of the interests of their members," presented their report Aug. 6th, '89. The evidence led the committee to the conclusion that, "although the Friendly Societies Act ('75) had proved, to a certain extent, a safeguard to the interests of members of Collecting Friendly Societies and policy-holders in Industrial Assurance Companies, and sufficiently stringent to sweep away altogether some of the worst of the societies existing at the time of its enactment, it required amendment, extension, and strengthening in more respects than one. They explained that section 30 of the Act in question, as amended, applied only to societies (registered or unregistered) receiving contributions by means of collectors at a greater distance than ten miles from the registered office or principal place of business, and to companies, as defined by 'The Life Assurance Companies Act, '70,' in respect of assurances for which premiums are received by means of collectors at less periodical intervals than two months, and at a greater distance than ten miles from the head office of the company. Apparently, a company which does not grant assurances on any one life for less than £20 would be entirely outside the operation of the section; and companies which do not issue or become liable under policies on human life, nor grant annuities upon human life, would appear to be exempt, not only from section 30, but also from the provisions of the Life Assurance Companies Act." On the subject of infantile and juvenile assurances the committee remarked, "the public sympathy and indignation having been aroused by recent cases which have come to light, in which the money insured for on the death of infants appears to have acted as an incentive to neglect and even to murder of children, your committee directed their inquiries with special care to this branch of the subject. Several witnesses, including two coroners, expressed a strong belief, not only that infant insurance is an incentive to crime, inasmuch as it familiarises the parent or guardians with the prospect of pecuniary benefit on the death of the child insured, but that a wide-spread system exists under which much neglect, cruelty, and crime takes place with impunity." The committee were convinced "that the allegations of culpable and even wilful neglect or violence resulting in the death of children have been, in some cases, well founded; and that the object of such neglect and violence has not been disconnected with the sums payable on the death of the children. It should be added that, from the nature of the cases, it is almost impossible to obtain direct

and inculcating evidence of criminality of this character, which is chiefly committed by a single individual in the privacy of home. Your committee believe that sufficient precautions are wanting to prevent larger sums than those authorised by the Act being insured for and paid on a child's death." Before proceeding to suggest amendments of the law the committee expressed their opinion of the general value of the system of assurance by companies and societies depending on collectors. The committee proceeded to make recommendations of the most elaborate and minute character. They suggested that a bill affecting all collecting societies and industrial assurance companies now under the provisions of section 30 of the Act of '75 should be prepared, to include all such provisions of the said Act as might be deemed applicable, with such alterations and modifications thereto as might be considered desirable, and that the provisions included in the Bill shall provide, among other things, for a reconstitution of the registry of friendly societies' chief office which should be termed "The Central Office," and in which should be vested very considerable powers. As regards both collecting friendly societies and industrial assurance companies they would abolish the ten miles limit laid down in section 30 of the Act, and provide that all societies and companies receiving contributions by means of collectors should be constituted into a distinct class, and placed under the operation of the proposed Act. The central office should be empowered, *inter alia*, whenever it should appear to it the proper course to pursue in the interests of the members or policy holders, to appoint an official receiver, having the same powers as the committee of management; at any time, on its own motion, or at the instance of members or other persons interested, to appoint one or more inspectors to hold an inquiry into the society's affairs; to order the dissolution of a society, and to direct the realisation of the assets, and to make an award of dissolution of the funds. The committee also thought it should not be lawful to assure any child under ten years of age in more than one society or company. All societies and companies, once in five years, should make valuation returns to the central office. As regards collecting friendly societies only, the committee would enact that it should not be lawful for any society to which the proposed Act should apply to use the title "Friendly Society," unless prefixed by the word "collecting," that no person should become a member of any collecting society unless and until he has reached the age of sixteen years; and they recommended that all societies should be registered, the right of refusal to register any rule or rules to be conferred on the "central office," with an appeal to the society as provided under section 11 of the act of '75; no society to be registered until the applicants for registry should have deposited with the central office the sum of £500, to be retained until the annual income from members contributions amounted to £1,000 and the first valuation has been made. If such valuation showed a deficiency, then the £500 should be retained until the next valuation, and if that showed a deficiency the central office should have power to order the society to be dissolved, and to repay the £500, less any claims by members of the society.—In the Provisions Industrial Assurance Companies only

the committee would enact that all life assurance associations receiving contributions by means of collectors, where not registered either at the Friendly Societies Office or the Joint Stock Companies Office, should be declared illegal if not so registered say within twelve months from the passing of the Act; annual returns in respect of industrial assurance business and valuation returns should be made to the central office, and should be similar in form and subject to similar provisions as should be laid down for collecting societies; that it should be in the discretion of the central office if it appeared that any company was not in a position to meet its engagements, or that the business was carried on in an unsatisfactory manner, to withdraw the privilege as to infantile insurance (in respect of new contracts), and to advertise the withdrawal as widely as might appear desirable; that wherever it should appear clear to the central office that the company would be unable to meet its engagements the office should be enabled to make application to the court; and that it should not be lawful for any industrial assurance company to distribute in any year a dividend, including bonus, amounting to more than 10 per cent. upon the paid up capital of the company, the remainder of the profits to be divided among the policy holders. On the question of Infantile and Juvenile Insurance the committee recommended that the age for the insurance of juveniles be extended from ten years to sixteen, making the scale as follows:—Under 5 years of age, £4; over 5 and under 10, £6; over 10 and under 16, £8; these to be the total sums to be insured for on death or payable whether by one or more societies or companies. The committee were strongly of opinion that the Registrar General should add to the form of medical certificate of death a column demanding particulars of insurances on the life of deceased, of whatever age, to be filled up by the medical man, and stating how long the doctor signing such certificate had attended the deceased. In passing from this subject the Committee desired to record their conviction that the evils possible under the law as it exists were by no means limited to infantile insurance.—Grants to Members of the Royal Family (see sect. 47).—[130] House of Lords, Officers of. In a report from the Select Committee on the office of the Clerk of the Parliaments and the office of Gentleman Usher of the Black Rod, issued in August, it was stated that a sub-committee had recommended certain changes in the way of reduction of the salaries of certain officers of the House, and the modification or abolition of other offices, by which it was estimated that a net saving would be effected of £8,574, in addition to £300 saved in the Public Buildings Vote for the house of one of the officers. The Committee were of opinion that these recommendations should be adopted.—[131] Hop Industry. A Select Committee of the House of Commons was (July 5th) appointed to inquire into the causes which have produced the steady decrease in the acreage of land under hop cultivation, and the serious displacement of labour occasioned thereby, and to report as to the best means, if any, of providing a remedy. The Committee met, Aug. 8th, and agreed to report stating that they had been unable at that period of the session to inquire into the subject referred to them, and recommending that a committee on the same subject

should be appointed on the next session.—[132] **Irish Society and City Companies (Irish Estates).** The Select Committee of the House of Commons appointed, July 4th, "to inquire and report as to the terms of the charters or other instruments by which their estates in Ireland were granted to the Irish Society and to the City Companies, and as to the trusts and obligations, if any, attaching to the ownership of such estates, and as to the mode in which the sale of their estates has been effected, or can be effected consistently with such trusts and obligations as may be shown to have existed or now exist," took certain evidence, but felt that at that late period of the session it would be impossible to conclude the inquiry, and therefore reported, July 30th, recommending that a committee on the same subject should be appointed next session.—[133] **Private Bills (Alteration of Memorandum of Association).** A joint committee of the two Houses was, in August, appointed to consider and report under what circumstances, or upon what conditions, if any, private bills altering the terms of the Memorandum of Association of companies ought to be allowed to pass. The committee reported, Aug. 12th, that it was expedient that power be given by a general act to companies incorporated under the Companies Acts to alter or extend by special resolution their memorandum of association within certain limits, and subject to certain conditions, subject to the confirmation of the High Court of Justice in England and Ireland, and the Court of Session in Scotland, provided that every member of the company, who by himself, or his authorised agent, had expressed his dissent from such special resolution at either of the meetings held for passing or confirming the same, and every holder of debentures or debenture stock charged on the undertaking of the company, and any person or class of persons whose interests would, in the opinion of the court, be directly affected by the proposed alterations, should, subject to rules to be made for the purpose by the court, have power to appear before the court and show cause against the confirmation of such special resolution. Inasmuch as a considerable interval might elapse before such a general law could be passed, and it would not be right in the meantime to place an absolute barrier in the way of obtaining an alteration in a memorandum of association, the committee made suggestions as to the method in which bills for that purpose should be dealt with by Parliament.—[134] **Small Holdings.** A Select Committee was (Mar. 15th) appointed to inquire into the facilities which exist for the creation of small holdings in land in Great Britain; whether, either in connection with an improved system of local government or otherwise, those facilities might be extended; whether, in recent years, there had been any diminution in the number of small owners and cultivators of land; and whether there was any evidence to show that such diminution was due to legislation. The committee reported on Aug. 9th, stating that they had taken evidence, but as it would not be in their power to make a full report in the present session, they had agreed to report the evidence, and to recommend that a committee on the same subject be appointed next session.—[135] **Sweating System** (see also preceding article sect. 25 and Session, sect. 71 in '89 ed.). This committee was re-

pointed in '89; it reported further in May directing the evidence taken up to that time to be printed, and again in August. In this last-mentioned report they stated that they had sat to receive evidence on seventy-one occasions, and had examined two hundred and ninety-one witnesses, comprising clergymen and ministers of various denominations, physicians, statisticians, Government officials, trade societies, co-operative societies, Jewish board of guardians, medical officers of health, factory and sanitary inspectors, journalists, manufacturers, middlemen, factors, managers, superintendents, foremen, factory hands, workshop hands, home workers, labourers, and persons interested in social subjects, as to the prevalence of "sweating," in the following trades:—Clothing, boots and shoes, cabinet making and upholstery, shirt making, mantle making, furriers, saddlery and army accoutrements, nails, chains, gun locks, nuts and bolts, cutlery, and waterproofing. The localities investigated comprised London, Woolwich, Chatham, Sheffield, Newcastle, Leeds, Glasgow, Edinburgh, Liverpool, Manchester, Birmingham, Walsall, Dudley, and Cradley-heath, and district. They had also inquired into the sweating system as it affects Government contracts. Having regard to the late period of the session, and the fact that they had so lately concluded taking evidence, the committee felt that they must defer the further consideration of their report until next session, in order that they might have ample time to weigh the evidence and discuss the report. They had therefore directed the minutes of evidence, together with an appendix, to be laid before their lordships, and they expressed the hope that they might be re-appointed next session for the purpose of making a full report on the evidence taken by them.—[136] **Town Holdings.** The Commons Committee directed to inquire into "the terms of occupation and the compensation for improvements possessed by the occupiers of town houses and holdings in Great Britain and Ireland; and to inquire into the expediency of giving the leaseholders facilities for the purchase of the fee simple of their property, and also into the question of imposing a direct assessment on the owners of ground rents, and on the owners of increased values imparted to land by building operations or other improvements," was re-appointed Feb. 22nd. The committee was appointed in 1886, and re-appointed in 1887, 1888, and 1889, and during those years they examined one hundred and three witnesses, but none of these were from Scotland, nor is the case of Scotland considered in their report. Some evidence was taken on the question of imposing a direct assessment on the owners of ground rents, and on the owners of increased values imparted to land by building operations or other improvements, but the committee thought it would be desirable to take further evidence on this question, and it is therefore not dealt with in their present report. This report, which after numerous sittings was presented July 12th, is the amended draft submitted by Mr. L. Fry, the chairman. Two other draft reports were laid before the committee, one by Mr. Lees Knowles, its general conclusions and recommendations being to leave leases alone, but to give further enabling powers to limited landowners and corporations, and to make special provision for dissenting chapels; and the other by Mr. Lawson on the well-known

lines of his Leaseholds Enfranchisement Bill (see sect. 83). Mr. Lawson's draft was rejected by nine to seven, after which the committee decided against Mr. Knowles' proposal, and in favour of reading the chairman's draft a second time by ten to six. This last was amended and presented to the House as the report of the committee. It describes the principal tenures on which houses and other buildings have been and are being erected in the towns of England and Wales, the leasehold system being, they say, by far the most usual in the metropolis and its suburbs, and in many of the towns of the South and West of England. They next discuss the question of the terms of occupation and right of compensation for improvements, and are not prepared generally to recommend the adoption of a measure giving tenants under existing contracts a statutory right to the value either of improvements or of goodwill on the termination of their tenancies; they are however in favour of giving compensation to all tenants on an equitable basis for alterations for improving the sanitary condition of the premises. With regard to future contracts of tenancy the committee think no injustice would be involved in such an alteration of the law as would entitle the tenant of trade or business premises, on the expiration of his tenancy, to compensation for such improvements as he might have *bond-fide* made for the purpose of carrying on his trade or business, and as might have added to the permanent letting value of the premises. This right should be limited to the case of trading and business premises, and its exercise would have to be strictly safeguarded so as to prevent its being used by a tenant to annoy or embarrass the lessor. In no case should a tenant be entitled to compensation for improvements if his landlord was willing to renew his lease at a fair rent, independently of the value of such improvements, and care would have to be taken not to give a right to compensation against a landlord who might himself be only a lessee, unless he had a corresponding right against the freeholder. They can see objection to the adoption of the suggestion that under either an existing or a future contract of tenancy, a tenant, whether of business premises or of a dwelling house, effecting substantial improvements with the previous written consent of the landlord, should be entitled to claim compensation on the expiration of the tenancy. On the question of the expediency of giving leaseholders facilities to purchase the fee simple of their holdings the committee were not of opinion that leasehold enfranchisement would on the whole have much practical effect in improving the quality of the houses built, though under some circumstances, as where terms of leases are very short, or (as under the life system) of uncertain duration, it would have this effect. While they were unable to recommend the adoption of any general scheme of compulsory leasehold enfranchisement, such as those which had been proposed to them, they were of opinion that there were places where some plan for facilitating the acquisition by leaseholders of the freehold of their houses might, with advantage, be put into operation in regards limited areas, in which there are a large proportion of occupying leaseholders of the industrial classes (including cloths and small traders) who were able and willing to purchase the reversion of their

properties; and the best practical solution of how to enable those classes to become more generally owners of their homes, was likely to be found in the exercise by local bodies of powers to be conferred upon them under certain defined circumstances. For instance, if it should appear that there are areas occupied exclusively, or very largely, by the dwellings of these classes, where the majority of the occupiers are leaseholders and are desirous of purchasing the freehold of their houses: and if in such cases the local authority should be of opinion that habits of thrift and industry would be promoted, and the prosperity of the district enhanced by enfranchisement, and should have reasonable grounds for believing that the powers to be conferred upon them could be exercised without loss, the committee think the local authority might properly be empowered to acquire by agreement, or, if necessary, by compulsory purchase, the reversionary interests in the property within the area in question, and to sell the reversions of their houses to such of the occupying leaseholders as had agreed to enfranchise, either at a price paid down at once, or payable in instalments over a period of years. The part of the property not so disposed of the authority should be empowered either to sell (subject to the right of pre-emption to the original owner being reserved) by public auction or by public tender, or to retain at its discretion. It might be proper that the exercise of these powers on the part of the local authority should be preceded by an inquiry under the direction of the Local Government Board. The Committee therefore recommended the adoption of a measure for empowering local authorities to facilitate enfranchisement in the manner already described. The committee also recommended a measure to provide for the commutation of leases for lives into fixed terms; that all religious bodies to whom land had been granted on lease by the freeholder for the erection of their places of worship and schools, should be empowered to purchase the fee, subject to the payment of fair compensation; that similar powers of purchase to those just mentioned might reasonably be granted to public educational bodies (not already possessing the requisite powers), when it is clear that they are acting in the public interest, and to registered co-operative and provident societies in respect of their halls and other buildings; and that public authorities and corporations should have the power to procure the enfranchisement of any house or building required for purposes of public or general utility. The Committee further expressed the opinion that the powers of tenants for life of estates under settlement in respect of grants of land for building purposes might with advantage be enlarged, and that every encouragement should be given to the granting of building leases for longer terms than ninety-nine years, as well as to making grants in fee farm, also that tenants for life should be enabled to grant leases with the option of purchasing the freehold. They therefore recommended that the powers of tenants for life to grant leases for ninety-nine years should be extended to terms of any length, and to perpetual grants in fee farm (without in either case the necessity of applying to the court), and also to granting leases with the option of purchasing the freehold. Finally the committee legislation to secure to tenants,

whether under existing or future contracts, the right to compensation at the expiration of the lease, on an equitable basis, for alterations made for improving the sanitary condition of their premises; and that a right to compensation at the expiration of the lease should be given to tenants under existing and future contracts for material improvements made with the previous written consent of the landlord. The case of Ireland is dealt with separately by the committee. They do not recommend the adoption of a measure of leasehold enfranchisement for Ireland, but they think the case made out for some alteration of the law so as to secure to tenants compensation for their improvements was stronger as regards Ireland than England, and with regard to future leases and contracts of tenancy they make a similar suggestion in the case of trading and business premises to that made in the case of England; and the recommendations regarding sanitary improvements, improvements with consent, conversion of life tenures, and for enabling religious and other bodies and societies to procure enfranchisement, should they think be also applied to Ireland (see also Act. 85).—[137] **Trustee Savings Banks.** On Mar. 21st a select committee of the House of Commons was re-appointed "to inquire into and report on (1) the Administration of Trustee Savings Banks under 'The Trustee Savings Banks Act, '63'; (2) The Powers, Duties, and Liabilities of the Trustees, Managers, and Officers of Trustee Savings Banks; (3) The relations of Trustee Savings Banks to the Commissioners for the reduction of the National Debt, the Registrar of Friendly Societies, and other offices or departments of the Government, so far as these relations affect the internal management of the affairs of the said Banks; and (4) The alleged assumption by certain Trustee Savings Banks of designations calculated to mislead depositors." The committee in their report, presented Aug. 2nd, say that the evidence before them tended to show that while in the case of the smaller banks, which are open for a few hours only in each week, such institutions do not, in some respects afford facilities equal to those of the Post Office Savings Banks, yet the larger banks, and especially those which are open every day of the week, compete on very favourable terms with the Post Office. It was certain that in some large towns, where the trustee savings banks have existed for many years, and have gained the confidence of the people, there is a marked preference for those banks over the Post Office banks. It appeared, therefore, to the committee that there was room for both. It became, therefore, all the more important to consider whether the banks as now constituted and managed, afford a reasonable security to the depositors. It cannot be too widely known, say the committee, that the Government is not responsible for the solvency of the trustee savings banks. It is responsible only to the trustees for so much of the money deposited in these banks as is forwarded to the Bank of England by the trustees. But there are no means of knowing whether these sums represent the total deposits or whether the provisions of the Savings Banks Acts are actually and properly carried out. Nor is the Government responsible for the proper application of the money withdrawn by the trustees. The National Debt Commissioners have no means

of knowing whether the statements of receipts and payments, and other statements rendered weekly or yearly, are accurate, except as to the amounts transmitted or withdrawn, or whether they truly represent the real condition of the bank. The provision in the Act of '87 for an examination into the affairs of a trustee savings bank, the committee regard as somewhat cumbrous; it is a measure which can only be taken when the bank is in an embarrassed condition. Such proceedings would compel the winding up of such bank, even if it should turn out to be perfectly solvent, and what is desirable is reasonable security against banks getting into a condition where inquiries of the kind become necessary. From the evidence given before the committee it appeared to them that the audit, where not continuous, was often of a very unsatisfactory character, and while the committee were unwilling to lay down any pre-ise rule as to how it should be conducted, they concur in the opinion generally expressed by the witnesses, that no audit which is not continuous, and which does not include a comparison of a certain proportion of the pass-books with the ledgers, of the cash book with the ledgers, and of the yearly extracted list of balances with the ledgers was of much value, and that in every case an audit including such comparisons ought to be undertaken. As to the question by whom such audit should be carried out, they could not recommend that it should be performed by the Government, who would not, they think, undertake it without making themselves practically responsible to the depositors, but they were of opinion that the trustees and managers should be expressly empowered and advised to form a perfectly independent board and audit for all affiliated banks and be authorised to apply part of the surplus funds for this purpose. They recommend "that the board consist of six or seven persons of well-known position and responsibility, who shall not be paid officers of trustee savings banks; that it have power to appoint in each locality, as it sees fit, professional accountants as auditors, in such a way as to secure that the Savings Bank Acts are carried out in every particular, and to secure a continuous audit and a continuous examination, at uncertain times, of the pass-books and their comparison with the ledgers. That the board of audit have authority to move the Treasury to appoint a commissioner, under the Act of '87, to examine into any bank when it thinks fit. That the remuneration of the board and its expenses of audit be defrayed by contributions from the banks, and that the scale of payments and expenses be regulated by the National Debt Commissioners, who, your committee recommend, should be empowered to take steps to initiate, with the trustees, such a board of audit, and to frame a general scheme for its working." The committee further express the opinion that some actual discharge of the duties of trustee or manager should be a condition of the name being retained as such; and, in regard to the last question referred to them, they recommend that every depositor's pass-book shall have clearly printed upon the cover a notification that Government is in no way responsible or liable to depositors for money placed in the safe keeping of such banks.—[138] **Woods and Forests.** A select committee was (April 9th) appointed to inquire into the administration of the Department of the Woods

and Forests and Revenues of the Crown; it examined numerous witnesses, but as it was not in their power to conclude the investigation during the session, they recommended (July 26th) that a committee on the same subject should be reappointed next session.

Settled Estates Act. See LAND QUESTION ed. '88.

Settled Land Act, '89. See SESSION, sect. 117.

Severn Tunnel. (For the earlier history of this work see other eds.) This tunnel is 7664 yards long; the entrance on the English side is a cutting a mile long and as much as 60 feet deep at the lower end; and the approach from the Welsh side is about the same length and a similar depth. It was necessary to make large sea banks to keep out the high tides, as the approaches lie through marsh-lands. The tunnel is lined with brickwork from 2 ft. 3 in. to 3 ft. thick, imbedded in mortar of Portland cement. Sir John Hawkshaw was the engineer-in-chief. It should be added that the Severn tunnel is ventilated by means of a Guibal fan, which can discharge 240,000 feet of air per minute. A further development of the use of the tunnel took place in '88. The G.W. and L. & N.W. Railways concluded arrangements for the establishment of a direct service of fast trains between Bristol, Liverpool, Manchester, and other important towns in the North of England and Scotland. At Bristol these trains form a connection with the up and down trains for the west. The journey by the Severn tunnel between Bristol and the North is an hour shorter than by any other route. A complete history of this great engineering scheme was contained in the volume entitled "The Severn Tunnel, its Construction and Difficulties," by Thomas A. Walker ('88).—It was stated in the middle of March '88, that the Great Western Railway Co. were apparently retaining their hold on the South Wales coal traffic by means of the Severn Tunnel. Although the aggregate output of coal in the district had increased, during February the seaborne quantity showed a decline, Cardiff sending nearly 13,000, Swansea 1,000, and Newport 5,000 tons less than in February '88; whilst for the two months, January and February, the Welsh ports showed only 68,855 tons, against 101,043 tons and 105,089 in '87 and '88 respectively.—It may be of interest to mention that on Oct. 24th a portion of Barnum's show from New York passed through the Tunnel on their way from Milford to London, the distance being calculated at 275 miles. This was an experiment to try the route as against Liverpool port.

Seychelles Islands, or Mahé Archipelago, are situated in the Indian Ocean, about 1000 miles north of Mauritius, of which British colony they are politically a part. The chief and largest island is Mahé, upon which is Port Victoria, the capital, harbour, and headquarters of H.M. East African squadron. Government is administered by a Chief Civil Commissioner and a Board, subordinate to the Governor of Mauritius. Exports, coconuts, coconut oil, sperm, vanilla, coffee, and cloves. For financial statistics, etc., see BRITISH EMPIRE (table).

Shah of Persia. See NAU-ED-DIN.

Shaw, Captain Eyre Massey, C.B., Chief of the Metropolitan Fire Brigade, to which he succeeded on the death of Mr. Braidwood, who was killed at the great fire in Tooley Street in

1861, was born at Monkstown, co. Cork, '30. Educated at Trinity Coll., Dublin, where he graduated. After serving a short time in the army he was appointed Superintendent of the Belfast Constabulary, which office he held until he received his present appointment. C.B. '79.

Shaw-Lefevre, The Rt. Hon. George J., was b. 1832. Educated at Eton and Trin. Coll., Camb. Benchers Inner Temple. He was Chief Secretary to the Admiralty ('71-4), Chief Commissioner of Works ('80-84), and Postmaster-General ('84-5). M.P. for Reading ('64-85). Bradford (April 21st, '86—re-elected July '86). He is a warm supporter of Mr. Gladstone's Irish policy, and in the spring of '88 visited Ireland to investigate the condition of that country. He again visited Ireland last autumn, and made a tour in the disturbed districts. He has recently relinquished his pension of £2000 a year.

Sheffield and S. Yorks. Canal. For some time past a scheme has been on foot to connect that busy steel, iron and coal centre, Sheffield, with the port of Goole by means of a navigable waterway, especially for the heavy traffic, which in these days of competition is found to be so expensive by rail. At the end of Nov. '88 it was announced that a company had been registered to establish the new waterway. It was proposed to acquire the following undertakings, with the docks, harbours and works, and the rights connected therewith: (1) The navigation of the river Don, from Tinsley, in the parish of Sheffield, to Wilsich House, in the parish of Barnby-on-Don; (2) The Dearne and Dove Canal, commencing in the parish of Wath-upon-Deane, and terminating at or near Barnsley, by a junction with the Barnsley Canal; (3) The Stanforth and Keadby Canal, commencing from the river Don, to the river Trent; (4) The Sheffield Canal, from Sheffield parish to a junction with the Don at Tinsley. The initial capital is £30,000, and the first directors include the mayors of Sheffield and Barnsley and the president of the Sheffield Chamber of Commerce. It is proposed to make the waterway capable of taking barges to carry 700 tons, and sea-going steamers up to 400 tons, and the time of passage from Sheffield to the sea would be reduced from ten days to twenty-four hours. A town's meeting was held at Sheffield on March 6th, '89, when it was agreed to support the objects of the bill which had been deposited in Parliament. It was locally alleged that Sir E. Watkin, chairman of the Manchester, Sheffield, and Lincolnshire Railway Company, the owners of the present navigation, was personally inclined to favour the scheme. It was reported in April that the project was receiving generous support from the Duke of Newcastle and Earl Fitzwilliam. Of the preliminary capital the Duke took one-fifth, or £5000, in shares, and the Earl £2555, with a conditional promise to increase. On May 24th the bill embodying the scheme was passed by a House of Lords committee unanimously, the company to be incorporated with a capital of £1,500,000. The committee stipulated that the payment to the M. S. & L. Railway Co. for canals required should be in a lump sum, and not by way of rent-charge. On Aug. 6th a Select Committee of the House of Commons passed the preamble of the bill authorising the scheme, which had already passed the Lords, and it was read a third time on Aug. 24th.

Sherborne School, Dorsetshire. Refounded by Edward VI. (the earliest school founded by

at monarch), 1550, re-organised 1870. Annual income £1,200. An Exhibition to either Univ. of £40 for four years falls vacant every year; pupils may also compete for **Mutual Exhibitions** £50 for four years; this privilege is allowed three other schools only. Pupils, 300. **Head** **star**, Rev. E. M. Young, M.A. **Clerk** to **Governors**, Mr. J. A. Fooks. **Motto** (royal arms of Ed. VI.), "*Honi soit qui mal y pense.*" **Some Alumni**, Vice-Chancellor Knight-Bruce, Rt. Hon. Montague Bernard, Lewis Morris, Dr. J. M. Neale, Sir D. Forsyth, Wm. Forsyth, Q.C., etc.

Sheriff. On the "morrow of St. Martin" (Nov. 11th) the Lord Chancellor, the Lord High Treasurer, or if there be none the Chancellor of the Exchequer, the Lord President and others of the Privy Council, and the Lord Chief Justice or any two or more of these great officers, with some of the judges of the High Court, meet at the Royal Courts of Justice, when the judges propose three persons from each county (with certain exceptions) for the office of sheriff; and the first of the three is in each instance nominated unless the person in question request to be relieved from serving on ground of ill health, want of sufficient means, or some other reason, and his excuse is accepted, when the next person on the list is nominated. The list, as revised in Council, is submitted to Her Majesty, who with a gold bodkin picks the names of those whom she selects to serve, and which are generally the names now appearing first. Only one sheriff is appointed for the two counties of Cambridge and Huntingdon. The sheriff of Lancashire is nominated by the Queen as Duchess of Lancaster, and the sheriff of Cornwall by the Prince of Wales as Duke of Cornwall. The **livermen of London** (q.v.) on Midsummer Day elect two sheriffs, who were until recently, but are now no longer, jointly sheriff of Middlesex, it being enacted by the Local Govt. Act that the Queen may appoint a sheriff for the new county of London, and a sheriff for the county of Middlesex, and that upon those sheriffs entering into office the sheriffs of London shall cease to have any authority except in the City. A sheriff holds office for one year. The custody of the county is committed to him, and in case of need he may call upon all the inhabitants to aid him in defending it or in arresting a felon, and the body of persons so assembled is termed the **posse comitatus**. He receives the judge when on circuit, accompanies him through the county, and sits beside him at criminal trials; nominates the grand jury, presides at the election of coroners, and has certain duties to fulfil in connection with parliamentary elections. He, or rather the under-sheriff, sits, aided by a jury, to assess damages in actions for tort in the superior courts where judgment has gone by default, and in certain cases to settle the amount of compensation under the Land Clauses Consolidation Acts (q.v.). Assisted by an under-sheriff and by other officers, he summonses jurors, serves writs, gathers fines, and executes the judgments of the courts, including the judgment of death; he is liable for wrongfully imprisoning any person, but not for the escape of a prisoner from gaol. The sheriffs of London, in addition to their other duties, attend the Lord Mayor on state occasions, and at every court of aldermen; and they present petitions from the court of aldermen or common council

to the House of Commons at the bar of the House. For the recommendations made by a Lords Committee on the mode of appointment, etc., of sheriffs, see Session '88, sec. 66.

Ship Railway (Flexible Car System). This system is the invention of Mr. Wm. Smith, M. Inst. C.E. and Harbour Engineer of Aberdeen, and differs from the rigid car system of Capt. Eads, since it is designed to allow of the use of the usual railway gradients, and to admit of curves, shunts, points and crossings, and passing-places on a multiple line. The rigid car system entails a line practically dead straight and dead level. Mr. Smith's flexible car is made in sections, each carried on a compound bogie, made up of a series of trucks running on parallel lines. Each set of trucks is coupled together end to end, thus allowing of free lateral action for curves. **Vertical flexibility** is obtained by having the section of the platform or car supported by each bogie attached to it by only one centre-pin. The ship on the car would be water-borne—that is, sustained by water cushions at the bottom and the sides. This hydraulic cushion is a series of "U" shaped rubber-canvas tubes, partially filled with water. Upon the vessel being placed upon it, the water would be pressed upwards in the tubes until it rose to a line giving flotation. As the water in the cushion would obey the same hydrostatic laws as if out of it, the cushion would accommodate itself to every change of the ship's position in the climbing and descending of inclines. At the sea end of an actual ship railway, a **submerged shipway** would be built to a gradient of 1 in 50, and resting on a bed of masonry, leaving the rails in high relief and enclosed within a small wet dock. The sections of the car made up to suit the width of the ship, and having the hydraulic cushions set in position to form a bed, would be run down under water until the bottom of the car was below the bottom of the ship. Portions of the sides would be fixed and the whole hauled up, the vessel settling upon the hydraulic cushions, and neither vessel nor car needing further adjustment. It is claimed that by the flexible car system ship railways could be made over any country where railways are now made, and that their cost would be far less than ship canals, which are only practicable on special sites. Mr. Smith's suggested scheme for England is a line from London to Leeds, with a branch to Liverpool, a transverse line from Hull to Liverpool, and another from Shields to a point opposite Belfast, a line from Liverpool to Cardiff, and also one from Bristol to Southampton. Consult a paper read by Mr. Smith before the Congrès International des Travaux Maritimes, '88, and a paper read before the London Chamber of Commerce on Oct. 7th last.

Ships and Shipbuilding. As stated in our last edition these industries proved exceptionally active in '88, and the following complete figures will be of interest. During the year, to Christmas, when the returns were made up, there were built in the Clyde district 308 vessels, aggregating 280,037 tons, including 175 steamers of 228,850 tons and 127 sailing vessels of 51,187 tons. The sailing ships showed an increase in number of 4, and of tonnage amounting to 13,662 over '87, while the steamers showed a decrease in number of 28, and an increase in tonnage of 81,228. On the Tyne there were seventeen firms engaged

in shipbuilding during the year, and they turned out 213,205 tons, against 104,296 for '87. On the *Wear* in '88 there were 75 vessels launched, of 124,410 tons, against 47 vessels of 85,214 tons; of the seventy-five, seventy-three were of steel, one iron and steel, and one iron, while they were all, with one exception, screw steamers. According to an elaborate article in the *Times* of Jan. and '89, the total amount built all over the country in '88 was estimated at 800,000 tons, or the highest aggregate since '83. Lloyd's Register Shipbuilding Returns showed that on Dec. 31st, 1888, there were 445 vessels of 811,468 tons gross register under construction, against 279 vessels of 439,335 tons on Dec. 31st, '87, while 539 vessels of 838,040 tons were launched in '88.—In the House of Commons, Dec. 19th, on the motion of Mr. Cochrane-Baillie, a return was ordered of the various European countries giving bounties or subsidies for the construction or running of ships, with particulars.—The annual meeting of the Chamber of Shipping was held in London on Feb. 8th, '89, Mr. T. Scrutton, the President, in the chair, and at the ... in the evening the chief speaker was Sir J. Fergusson, M.P., Under-Sec. for Foreign Affairs. On April 9th a deputation from the Chamber of Shipping of the United Kingdom, led by Lord Ravensworth and Col. Hill, M.P., waited upon the President of the Board of Trade with respect to various matters affecting shipping interests. In the House of Commons on May 1st, on the motion of Sir M. Hicks-Beach, the Merchant Shipping (Pilotage) Bill, the object of which is to give better representation to pilots on the Pilotage Board, was read a second time without opposition. As evidencing the early and rapid growth of the trades in '88, during the months of Jan. and Feb., an aggregate tonnage of 31,000 tons of new shipping was put in the water on the Clyde and Forth, as compared with 17,000 tons for the corresponding period of '88 and 22,000 tons for the two months of '87. Altogether, from the beginning of the year till the commencement of March, 44,500 tons had been ordered. In the labour market, quite an active movement was observable amongst the men, and for over half the year at least strikes among the seamen and firemen, chiefly for more wages, were common. Compromise, or the victory for the masters, appears to have been the rule; and in one or two districts, notably at Liverpool, there were breaches of the peace. On March 19th, a deputation from the Amalgamated Seamen and Firemen's Union waited upon the President of the Board of Trade to explain their grievances. The year was marked with several labour disputes, there being a general movement amongst the different classes of seamen for more wages. The difficulty was particularly accentuated at Liverpool, Sunderland, and Glasgow. The matter may be said to have come to a head by the formation, or development, of the National Seamen and Firemen's Union, which held its first congress at Cardiff in October. As the year went on it became evident that, as at its commencement, there was no sign of a diminution in the activity; the only check, if any, being in the enormously increased cost of material. During October 18 vessels, with a tonnage of 39,333 tons, were launched from Clyde shipyards, against 14 vessels of 40,685 tons, in the same month of '88. The output for the three quarters of the year was 268,215 tons, compared with 223,906 in the corresponding period of last

year, and 165,906 in '87. It was reported at Middlesbrough at the end of Oct. that a number of important orders had been received by the North of England shipbuilders, and one firm alone (Messrs. Raylton, Dixon, and Co.) has booked an order for six large steamers, which will keep their two large yards in full swing for twelve months. An International Maritime Conference commenced its sittings at Washington, U.S., Oct. 17th. It is interesting to note that, according to a correspondent of the *Engineer* (Nov. 1st), vessels are being built with a special view to their passage through the Manchester Ship Canal. One was launched at the end of October, at Low Walker-on-Tyne, capable of carrying 6000 tons, besides 300 tons of bunker coal. The masts were arranged so as to clear the bridges.

Shoa. A province of Abyssinia (*q.v.*), really a semi-independent kingdom, whose ruler is a feudatory of the Negus Johanne.

Shop Hours Regulation Act, '86. This Act provides for the protection of persons under the age of eighteen years employed in or about shops. Such persons are not to be employed for a longer time than seventy-four hours, including meal-times, in any one week. If previously on the same day employed in any factory or workshop as defined by the Factory and Workshop Act 1878, for the number of hours permitted by that Act, they must not be employed in a shop at all, or if previously employed for fewer hours, they may be employed in a shop only for so many hours as will complete that number. In every shop in which young persons are employed the employer must exhibit in a conspicuous place a notice referring to the provisions of the Act, and stating the number of hours in the week during which young persons may lawfully be employed. An employer is liable to a fine of £1 for every violation of the Act; but if he can show that some other person is the actual offender, such person shall be convicted instead of the employer. The procedure under the Act is the same as under the Factory and Workshop Act 1878. The term "shop," as used in the Act, includes public-houses and refreshment-houses. This Act does not apply to persons employed in shops who are members of the employer's family.

Shorthand. Abbreviation and employment of arbitrary marks to indicate letters and sounds. Shorthand was known to the Greeks and the Romans in a limited degree. From the decline of the Roman Empire till 1568, when Bright published the first system of shorthand in England, little progress was made. Bales' "Brachygraphy" followed next (1590). These two systems were merely collections of arbitrary marks for certain words. The first shorthand alphabet was published by John Willis, anonymously, in 1602. In 1837 Phonography (writing by sound) was invented by Isaac Pitman, of Bath, and marks a new era in the history of shorthand, since by it the sounds of the English language are fully represented each by one stroke or motion of the hand; and are so arranged as to show, as far as possible, their mutual relations. (For a more detailed explanation of the system see Mr. Pitman's works). Phonography is the only system that has produced a literature. All its publications would constitute a small library. The following facts show its great and increasing popularity. The *Phonetic Journal*, a periodical published by Mr. Pitman (1, Amen Corner

Paternoster Row, E.C.), partly in shorthand, has a weekly circulation of 23,000. Since its introduction into the Oxford and Cambridge Commercial Certificate and the Oxford Local Examination Scheme, schoolmasters have not been slow to introduce it into their curriculum. It is now taught in such well-known schools as Rugby, King's College, and the City of London School; and the number of colleges, institutions, etc., in which it is a subject for study number about a thousand. Several systems of shorthand claiming to have great advantages over Phonography have appeared, but they have in every instance failed to sustain these claims. There are, besides Pitman's, many other systems in vogue, including Gurney's, Sloan-Duployan, Pocknell's, Jones's, the Oxford Shorthand, etc. The year '88 has been remarkable for the extensive spread of shorthand in all directions. Not only has it been more widely used in commerce, but the awakening of the country to the necessities of a more thorough commercial education has insured its introduction into numerous technical, commercial, and other schools. As an instance, the Manchester School Board has greatly extended its accommodation this year, covering the whole of Manchester with evening schools, and providing room for close upon 20,000 pupils. Shorthand will be taught at all the centres, and it may safely be computed that something like 10,000 pupils will be receiving instruction in shorthand in Manchester during the winter of '89-90. Conservative as Government departments generally are in regard to the introduction of modernised procedure, it is satisfactory to note, that in the second report of the Royal Commission appointed to inquire into the working of the various Civil establishments of the Crown, prominence is accorded to the question of the advantage and economy to be derived from the introduction into the Civil Service of shorthand and type-writing. Mr. H. G. Calcraft, the permanent Secretary of the Board of Trade, stated that "an extensive use of shorthand would be desirable." It is probable that, when the recommendations of Lords Commissioners are carried into effect, shorthand will be a necessary subject for Civil Service candidates. The question of reporting in the House of Lords was brought up in a debate on the Mar peerage. A report by Hansard on the Mar peerage was found to contain several passages which had afterwards been inserted by the speaker, but which were never uttered in the House, and had not been reported. This inquiry resulted in placing the reporter on the floor of the House, with the consequence that the speeches of noble lords are now heard with distinctness, and reported with accuracy. An International Shorthand Congress was held in Paris in August, at which the charges for shorthand writing, and the question of forming a shorthand writers' syndicate were discussed. A deputation from the Congress was received by President Carnot. It is proposed to hold the next Congress at Munich.

Shrewsbury School. Founded by King Edward VI. in 1557, augmented by Queen Elizabeth in 1571. One of the seven schools reorganised by the Public Schools Act in '68. The school was moved to a new site (of 26 acres) in '82. Between '82 and '89 its numbers have increased from 170 to 280. **Head Master,** Rev. H. Whitehead Moss, M.A. **Motto,** "*Intus si recte, ne labora.*" Distinguished alumni, Sir Philip Sidney, Lord

Brook, Marquis of Halifax, and, in the present century, Charles Darwin; James Fraser (late Bishop of Manchester), the late Professor B. H. Kennedy, the late Dr. Scott, Dean of Rochester, the present Archbishop of York, the new Bishop of Wakefield, Sir D. Lysons, Lord Thring, Sir C. T. Newton, Viscount Cranbrook, H. A. J. Munro (the editor of "Lucretius"), F. A. Paley, the present Bishop of St. David's, Professor J. L. E. Mayor (the editor of "Juvenal"), the late Sir Cecil Beadon, the late Mr. R. Shilleto, the eminent scholar, Right Hon. J. T. Hibbert, Right Hon. H. C. Raikes, Right Hon. G. Osborne Morgan, and many others.

Siam. A kingdom embracing the greater part of the Indo-Chinese and part of the Malay peninsula. Boundaries ill-defined. Area, about 250,000 sq. m.; pop. estimated at about 6,000,000, including Siamese and Laotians, 2,000,000 each, and Chinese and Malays, 1,000,000 each. Capital, Bangkok (pop. about 500,000), situated on the delta of the river Mee-nam, the great natural and economical centre of the kingdom. The royal dignity nominally hereditary, but each sovereign appoints his own successor. Legislative power exercised by the king in conjunction with a Council of Ministers, who have charge of the departments of war and marine, finance, foreign affairs, justice, agriculture, and the royal house. The Council of State consists of the Ministers, 10 to 20 members appointed by the king, and 9 princes of the royal house. There are forty-one provinces, each administered by a governor. People kept in a state of serfdom by the feudal owners of the soil. Domestic slavery in process of abolition. Foreign trade centres at Bangkok, and is almost wholly in the hands of foreigners. Chief exports, rice to Hong Kong, Singapore, and Lower Burmah, teak-wood to Great Britain. King's revenue raised by customs, dues, and taxes on land, fruit trees, spirits, opium, gambling, tin mines, edible birds' nests, and fisheries, and amounts to about £2,000,000 a year. Expenditure within income. No public debt. Small standing army, and general enrolment of males as militia. Navy consists of 4 steam corvettes and 12 gun-boats, on the model of that of Great Britain. Prevailing religion, Buddhism. Western ideas of civilisation spreading to some extent, and a few of the Siamese youths sent to Europe for their education.

Siberia. A Russian province, larger than Europe, which is only separated from the rest of the empire by the low-lying Ural hills, a slender barrier which is now being broken down by the extension of the Russian railway system into Siberia, and by incorporating the West Siberian governments with the European Russian administrative system. See ed. '86.

Siberian Railways. The extensions in this far eastern portion of Russian territory consist of three lines between Tomak and Vladivostok—from Tomak to Irkutsk, to Stretinsk (on the Shienka, an affluent of the Amoor), and from Lake Khanka, or Han-koi, on to Vladivostok see ed. '89). Under date Aug. 31st, '88, it was reported from Brussels that part of the Siberian line, from Samara to Ufa, 485 kilometres in length, was to be opened the following month, the continuation from Ufa to Statusk being under consideration. A further report, St. Petersburg, Sept. 6th, was to the effect that the preliminary surveys had been completed as far as Irkutsk. It was further proposed to make

a branch line to the Trans-Baikal province, between Lake Baikal and the Chinese frontier. At the opening of the above line, on Sept. 22nd, Admiral Possiet, the Minister of Ways and Communications, promised to do all in his power to continue the work to Irkutsk. According to a telegram from St. Petersburg, dated March 13th, '89, the Russian Minister of Ways and Communications has been requested to draw up a scheme for the construction of "a great through Siberian Railway," to be completed within three years. In modification of former suggestions the line was to commence at Slatoust and proceed on the way to the Amoor through Cheliabinsk, Omsk, Tomsk, and Irkutsk. The idea was to follow the plan which was proposed by General Annenkoff, and lay the line as quickly as possible, improving it after being opened for traffic. Early in May '89 it was stated that the general official scheme of railway extension, prepared by the late Gen. Pancker, had been approved by the special commission formed of the leading Russian engineers for the consideration of the subject. The line thus recommended will run from Slatoust, through Kurgan, Omsk, Tomsk, Kansk, Irkutsk, Southern Baikal, Possolskaia, Chita, Stretensk, and Khabarooka to Vladivostok. A Berlin correspondent adds that a counter scheme, suggesting a more direct route through Chinese Manchuria was summarily rejected. The construction of the railway is expected to take five or six years, and the cost to be about 25,000 roubles per verst.

Sierra Leone. A British colony on West African coast, including also the Isles de Los, Sherbro, and Mannah. Capital, **Freetown**, pop. 2,000. Little production, but large trade with interior in palm-oil, palm kernels, benne-seed, ground-nuts, cola-nuts, coconuts, ginger, India-rubber, copal, hides, wax, a little ivory, teak, and gold-dust. For financial statistics, etc., see **BRITISH EMPIRE** (table). Consult K. Johnston's "Africa," and "Her Majesty's Colonies."

Simplon Railway Tunnel. A scheme for continuing the railway from Geneva to Martigni and Brieg through the Simplon mountain to Domod'Osella, and thence to the Lago Maggiore. The estimated length is 12½ miles, and the cost about 100,000,000 francs (see cd. '88). It was reported from Berne, Dec. 11th, '88, in regard to this proposed tunnel, that Italy had undertaken to construct the connecting lines on the Italian side, promising to grant a subvention of several million francs. A telegram from Berne, May 1st, '89, was to the effect that the Italian Government had accepted the invitation of the Swiss Federal Council to a Conference for settling the question of the construction of the Tunnel. According to a further telegram from Berne, May 4th, arrangements were being made for an international conference to be held on the subject at Rome. The International Conference on the proposed railway from Switzerland to Italy through the Simplon met at Berne on July 2nd, when it appeared that the Italian Government had decided only to support the scheme on condition that one end of the tunnel should open upon the Italian side of the mountain. This would involve an outlay of half a million more, since the tunnel would require to be three miles longer than if both ends were in Switzerland. Under date Berne July 8th it was reported that the Congress had adjourned *sine die*. Under date Lucerne Aug. 20th, it was telegraphed that the tunnel scheme would now

very probably be carried out, as a powerful company of German capitalists had succeeded in securing the amalgamation of two Swiss railways running from Lucerne to the foot of the mountain, and guaranteed to provide 30,000,000 francs. Italy under the proposed scheme would possess one end of the tunnel and provide 15,000,000. The *Genevois* (Brussels, Aug. 27th), however, pointed out that political interest dominated the question. There was the latent hostility of France; the Swiss insisted on the two issues being on Federal territory; and the Italian Government would not subscribe if one end was not on Italian soil.

Sims, George E., was b. in London 1847. He entered the literary profession as a contributor to the *Weekly Dispatch* and *Pien*. He was one of the projectors of the *Referee*, in which were first published his well-known "*Dagonet Ballads*." He still contributes "Mustard and Cress" to that journal. Mr. S. came into prominence as a dramatist when his "*Crutch and Toothpick*" was produced at the Royalty Theatre, April 79. "*Lights of London*" (Princess's, '81) stamped his success as a graphic melodramatic play-writer. In collaboration with Mr. Henry Pettitt he wrote "*Harbour Lights*," produced with great success at the Adelphi in '86. Another of Mr. S.'s popular plays is "*The Roman Rye*," which was being played at the time of the terrible disaster at the Exeter Theatre in '87. Mr. S. has taken great interest in the work of improving the social condition of the poor, and in his "*How the Poor Live*," originally contributed to the *Pictorial World*, he has drawn graphic pictures of the terrible sufferings endured by the humbler class of toilers in the over-crowded districts of London. Published ('88) "Mary Jane married." In '89 Mr. S., in conjunction with Mr. Pettitt, produced "*London Day by Day*" at the Adelphi Theatre.

Singapore. Capital of the Straits Settlements (*q.v.*), and great emporium of British trade in the East.

Slander. Slander is defamation by word of mouth, as distinguished from libel, which is defamation by writing, etc. As a rule abusive language, however coarse, is no ground of action, unless special damage can be shown to have ensued to its object. Thus calling a man swindler or a woman a prostitute does not in itself give ground for an action. But words imputing to any person misconduct in his business or profession, words charging any person with having committed an indictable offence, and words to the effect that any person is suffering from contagious disease, are all actionable without proof of special damage. In other respects the law of slander closely resembles the law of libel. Thus, in both the definitions of malice, of publication, and of privileged communications are the same. The same liability attaches to those who repeat what they have heard or read. The truth of the charge made is a good defence in slander as well as in libel. The civil remedies for slander are the same as for libel. But slander, unlike libel, can never be made the subject of a criminal prosecution. See **LIBEL**, and for the details of the law of slander consult "*Addison on Torts*," chapter 6.

Slave Coast. The Guinea Coast, between Gold Coast and Lagos. Behind it are large lagoons. Here are Popo, Whydah, the Dahoman port, German Togoland, French Porto Novo, Portuguese Ajuda, English Badagry, etc.

Slavery in Africa. As the result of inquiries into the question of slavery, it is found that from the point where British influence ceases in the south to the north slavery is rampant throughout Africa, save only in Egypt, where, owing to the presence of English officials, the traffic in human flesh has ceased, and any slave, by application to the nearest Mudir, can obtain his or her freedom. The French are great offenders, for, notwithstanding their assumption of the Protectorates of Tunis and Madagascar; they have done nothing whatever to abolish or mitigate the evils of slavery in either the Turkish Pashalik or the African island. On the east coast of Africa the French flag (as France denies to our cruisers the right of search) is used to enable slavers to run their cargoes free from the interference of British men-of-war. Under the disguise of the system of "free emigrants" slavery is also permitted in Reunion and Bourbon; and from Madagascar, the southern parts of the Zanzibar coast, and the province of Mozambique, a slave trade in all but name is carried on to provide for the fancied wants of the French creoles, whose barbarous treatment of Indian coolies has led our Government to forbid their emigration to the French possessions in the Indian Ocean for the purpose of working in plantations. Of other Christian nations, Portugal is the worst offender. She maintains a shadowy claim to vast tracts of the interior, over which she possesses neither the power nor the will to exercise any influence, while even on some parts of the sea coast in the Mozambique Channel she has to pay tribute to the natives in order to be permitted to exercise the phantom of sovereignty. Several years ago, it must be admitted, slavery was nominally abolished in her African possessions, but the system of "libertos" which succeeded it, like that of the French "*émigrés libres*," and almost all other forms of apprenticeship of negroes or other indigenous races, possesses all of the disadvantages and none of the advantages of slavery. Lately, however, the progress of events has caused the libertos in the coast towns to obtain practical freedom, due to the presence of mail steamers and the consequent intercourse with liberty-loving nations. In the interior, at Tete, Sena, Bihe, the Prazas on the Zambesi and elsewhere, slavery is rampant, and the government at Lisbon has not the power, even if it has the will, to interfere. Portugal is doing her utmost to thwart what Great Britain is doing for the extension of commerce and civilisation, and has sent agents into countries over which a British Protectorate has been declared, to conclude treaties with native chiefs. These Government agents are assisted in their work by mulatto slave dealers, who also are employed by the Government; and the treaties that are alleged to have been obtained, and which we have conclusive evidence have never been properly explained, have been made the basis for further action. Portugal has issued a decree, stating that territories recently constituted a British Protectorate are Portuguese. This question, which has yet to be settled, is one not only hazarding our commercial interests, but imperilling the future condition of millions of Africans; for within easy reach of either coast there are many trading stations managed by men in close correspondence with, and often in the direct employment of, merchants living in the Portuguese

coast towns which depend for the profits of their trade on the traffic in human flesh which is carried on by the caravans which make them their points of departure for the interior. Livingstone, Cameron, Montagu, Kerr, and other travellers have described the doings of these caravans, and from them we may gather some idea of the barbarities they perpetrate and the cruelties they inflict, which only fail to rival those of their compeers, the traders from Zanzibar, from lack of power and not from lack of will and desire. Mohammedanism in Africa means slavery and the slave trade, and the Sultan of Turkey, in respect of Tripoli still in some sense an African potentate, is an encourager of the most debasing form of slavery—viz., that of eunuchs (for this trade and how it is carried on see Mr. Wyld of Suakin's book of his experiences there and in Abyssinia). In Tripoli in Africa, now that the importation of slaves in Egypt has ceased to be profitable, those that can survive the horrors of the passage of the Sahara *on foot* are openly sold, and their price pays for the arms and ammunition which by that open gate are poured into Africa to arm the fanatical followers of the Kalif Abdulla, the successor of the so-called Mahdi, the murderer of Gordon. Muley Hassan of Morocco surrounds himself and his wives with eunuchs, while in every town of his dominions slaves are openly bought and sold. The people who supply the African countries bordering on the Mediterranean with slaves are the Mohammedan Negroids, who stretch across Africa north of the belt of tropical rains and jungle, and who prey on their negro neighbours inhabiting the districts to the south of them. In the valley of the Nile the slave trade in its present intense form first began when the Egyptians passed the barrier of the "Sud" or floating vegetation on the Nile in '39, and went on growing in extent and in cruelty until the time of Sir Samuel Baker and of Gordon, by whom, and especially by the latter, it was checked and limited. How far Gordon's efforts were tending towards success may be judged by the fact that Gessi, one of his lieutenants, in '81 had 41,000 freed slaves under his care in the neighbourhood of Wadelaï. Unfortunately the course of events in the Egyptian Soudan has shattered the fabric of freedom, of which Gordon laid the foundation, and but little of it remains. The Dervishes control the provinces once under the government of Lupton and Slatin; and how the slave trade is carried on by them is proved by the numbers of slaves sold in Tripoli, and the glut of negroes in the market of Jeddah. Comparatively a few years ago this latter offset of the slave trade had ceased practically to exist, but in spite of all the efforts of British men-of-war scarcely a day now passes without cargoes of human misery being carried across the Red Sea and landed on the Arabian coast, the Turkish officials scarcely stirring a finger to prevent the illegal traffic.—There now remains for consideration the trade carried on on the east coast of Africa and in the interior by the subjects of their highnesses the Imam of Muscat and the Sultan of Zanzibar, and Arabs who own no sovereign save their own immediate chief, and also by the tribes living on and immediately behind the East African coast, whether known as Wamerima or by any other local name, but who, with the foregoing, are generally classed as Arabs by Englishmen. It must be remembered

that the Portuguese from the time they first visited the east coast of Africa till about one hundred and twelve years ago exercised a shadowy sovereignty over the whole coast from Delagoa Bay northwards to Magadoxo. The Arabs, when they resumed the position from which they had been driven three centuries before, for a long time did not push their trading enterprises any distance into the interior, but contented themselves with dealing for slaves, ivory, copal, etc., with the Semitised tribes of the coast line, who acted as middlemen between them and the negroes of the interior. The Arabs, however, after some years commenced to push their way inland, and now they are the great traders and travellers of the interior, while Indian merchants are now their bankers and agents, and from the enormous interest which they charge for advances made to the men who lead caravans into the interior, they obtain the greater share of the profits of the trade. For some time the men who left the coast were content with the slaves that they could obtain from the neighbouring regions, but have not pushed their journeys far and wide. These travels of traders from Zanzibar were in the first place mainly in search of ivory, and slave-hunting and buying were only subsidiary to this great object. Hence we hear comparatively little from Burton, Speke, and Grant of slavery or slave caravans; and even during the time Cameron was among the Arab traders on and to the west of Tanganyika, slavery, or rather slave-trading, was in great measure in abeyance. Cameron nevertheless brought home such descriptions of the evil that was then commencing that the *King of the Belgians* was confirmed in his beneficent designs for the good of Africa, and when Mr. Stanley returned to Europe after his adventurous descent of the Congo, he entrusted him with those labours which have resulted in the foundation of the *Congo Free State* (*q.v.*), while at the same time a flood of missionary and philanthropic effort was poured forth into Africa which has resulted in the conversion of many to Christianity. Unfortunately, however, while Europe, and especially England, was labouring to do good to Africa, the number of new-comers into the interior, whose purpose was evil, was far greater than that of those whose purpose was good. Excited by tales of a tusk worth perhaps a hundred or more dollars being bought for a copper bracelet, or a handful of cowries, of slaves of all ages and both sexes being easily obtainable, adventurers of the vilest and lowest class of the so-called Arabs hurried from the coast and spread themselves like locusts over the face of the land. The countries east of the Tanganyika and Nyassa have nearly yielded up all the population that can be drained from them without becoming absolutely desert. Of course from this statement must be excepted those territories where the people have allied themselves with the new-comers, and have helped them to prey on their neighbours. Many of the coast people have settled themselves in this portion of Eastern Africa, which has now, as regards the slave trade, become a consuming rather than a producing district. Those of the Arabs who have crossed the great lakes have been accompanied by numbers of Wanyamwezi, and other peoples of Eastern Africa attracted by the same stories of the cheapness of ivory and the plenty of slaves.

With the aid of these allies the slave dealers have now depopulated large tracts of country—Manyuema, part of Ubisa, part of Urua, a district to the west of the Lomami, Katanga, the country round the south end of the Tanganyika, and a large tract of country on both sides of the Congo from Nyangwe to the Aruwimi (*v. Prof. Drummond's "Tropical Africa," ch. iv., "The Heart Disease of Africa," and accompanying map*). Within recent times at least five millions of people must have been destroyed in countries which were comparatively free from the curse of the slave trade. A large portion of the countries which have been rendered desert within the last three or four years lie within the borders of the Congo state, which although founded in order to bring freedom and peace to the natives of Africa, has not carried out its original intention. The extracts from the letters of Mr. Ward and others which have appeared in the *Illustrated London News* and other papers allege that the associates of Tippoo-Tib have not in any way ceased from their evil work since his agreement with Mr. Stanley, and the whole of the Congo above the Aruwimi is delivered over into their power. See also in this connection "River Life on the Congo," by Mr. J. R. Werner, published by Blackwood. The alliance with the Arab slave dealer seems to have had two objects—one to aid Mr. Stanley in his effort to reach Emin Pasha, and the other to get the ivory which formerly had been sent to Zanzibar exported by the Congo route. How the slave trade is carried on we learn from *Captain Wissmann* (*v. Proc. Roy. Geog. Soc. for August 88*), who tells us that cannibalism and cold-blooded murder are of constant occurrence; and that nothing more horrible or barbarous has ever before been inscribed on the page of history. The *British East African Company* has since its foundation done much in a temperate and judicious manner towards the freedom of slaves, and as its officials are able to work in harmony with those of the Sultan of Zanzibar, great and permanent good may be confidently expected from its foundation. The *British South Africa Company* may be expected to do even more in the territories confided to its charge, and on the Niger the action of the *Niger Company* in this respect is bearing good fruit. The Germans claim to have pacified their *East African territory*, but at the time of going to press we still hear of towns being bombarded and burnt, and skirmishes between natives and *Captain Wissmann's* forces.—The German temper with regard to slavery is different from that of this country; and without jealousy, and in no disparaging sense, we must say that we cannot hope for so much good resulting in Africa from German as from British action. The blockade of the *Zanzibar coast*, which was declared in the interests of the Germans, has been raised. During the blockade the export of slaves from the mainland, according to our Blue books, practically ceased. Indeed, the *ocean slave trade* is almost a thing of the past, and, in view of the establishment of European authority on the coast of Zanzibar, may soon be expected to become extinct. Slavery and the *slave trade* in the interior are, however, still rampant, and whole nations are being swept away. Mr. Stanley tells us of how, on his journey from the Aruwimi to the Albert Nyanza, he found the ravages of the slave-hunters of Nyangwe extending; and now again we hear from him that, though Emin Pasha

himself is safe, that Wadelai and the Albert Nyanza have fallen into the hands of the followers of the Madhi, and that slave hunting and all its attendant horrors are rampant in that unfortunate country.—A Conference of the Powers assembled at Brussels on Nov. 18th, and though, at the time of writing, we are unable to do more than forecast their proceedings, we may hope that the question of the slave-trade of the interior of Africa will receive due consideration. The King of the Belgians intended asking for power to levy a tax of 5 per cent. on imports into the Congo State for the purpose of combating slavery.

Small Tithes. See TITHES.

Smith, Sir Archibald Levin, a judge of the Queen's Bench Division of the High Court of Justice, was b. in 1836. Called to the bar in 1860, he served his time as Junior Counsel of the Treasury (1863-68), and again (1879-83), when he was elevated to the bench. During his career Mr. Justice A. L. Smith, who never took silk, was engaged in many important commercial cases and election petitions. Was in '88 appointed one of the judges of the *Parnell Commission* (q.v.).

Smith, Goldwin, LL.D., was b. at Reading, Berks, 1823. Educated at Eton and Oxford, where he graduated first class in classics '47; Fellow of Univ. Coll. Oxford '47. He was Assistant-Sec. of the Royal Commission of Inquiry into the condition of the Univ. of Oxford '50, and Secretary to a subsequent Commission, under which important University reforms were introduced. *Regius Professor of History* ('58 to '68) at Oxford, and was brought prominently into notice by his lectures, which were characterised by great vigour and originality and a strong leaning toward democratic doctrines. He was amongst the few Englishmen of "light and leading" who championed the cause of the North in the American Civil War. At the conclusion of the war he visited the United States on a lecturing tour, which was brilliantly successful. In '68 he accepted the *Professorship of History* at Cornell Univ., New York, which he resigned in '71 when he was appointed a member of the Senate of the Univ. of Toronto, where he has since resided. He is the author of numerous works on English and American historical subjects and of many political pamphlets. He has distinguished himself by his vigorous articles in the leading reviews on the subject of Mr. Gladstone's Irish policy.

Smith, Rt. Hon. Sir Montagu E., b. 1809. Called to the bar at the Middle Temple (1835), Q.C. (1852). Represented Truro as a Liberal-Conservative (1859-65), when he was appointed a judge of the Court of Common Pleas. Member of the Judicial Committee of the Privy Council (1871), and a member of the Universities Committee of the same body (1877).

Smith, Rt. Hon. Wm. Henry, M.P., was b. 1825. Member of the London School Board (1870-74); of the Council of King's Coll., London; created D.C.L. of Oxford (1879). He has held the following official appointments: Financial Secretary to the Treasury (1874-77); First Lord of the Admiralty (1877-80); Secretary

for War (1885). Returned in the Conservative interest as member for Westminster (1868-83); Strand Div. 1885 and 1886. On the resignation of Lord Randolph Churchill, Mr. Smith vacated the War Office and assumed the leadership of the House of Commons as *First Lord of the Treasury*. Mr. Smith has always been distinguished for laborious attention to his duties, which have been rendered particularly trying, especially during the session of '87, owing to the attacks made upon him by members of the Irish party, on account of his connection with the firm of W. H. Smith & Sons, who conspicuously advertised on their railway book-stalls the well known pamphlet "Parnellism and Crime." Under the will of the late Lord Idlesleigh Mr. S. was appointed literary executor to that nobleman. The Rt. Hon. gentleman was presented, on March 27th, '89, with a handsome memorial, subscribed for by supporters of the Government in the House of Commons; and on July 3rd he was entertained at a banquet at St. James's Hall, at which the Duke of Norfolk presided.

Smith, William, LL.D., Hon. D.C.L. Oxon., classical scholar, and editor of the *Quarterly Review* (q.v.) since 1867; b. in London, May 20th, 1813. Educated at the University of London, was intended for the bar, and kept the usual terms at Gray's Inn; but abandoned the profession of the law for classical literature. He is the editor of the *Classical and Biblical Dictionaries*, the author of many educational works, and was for several years Classical Examiner in the University of London, and Professor of Classics in New College, London.

Smith, William Robertson, M.A., LL.D., b. at Keig, Aberdeenshire, Nov. 8th, 1846. Educated privately, Aberdeen Univ.; New Coll., Edinburgh; and Bonn and Göttingen Univs. Prof. of Hebrew at the Free Church Coll., Aberdeen, '70, but removed in '81, for his views on the Old Testament published in the *Encyclopædia Britannica*. Is a member of the Old Testament Revision Committee, Lord Almoner's Prof. of Arabic at Camb., '83. Librarian at Camb. Univ., '86. He has published, amongst other works, "The Old Testament and the Jewish Church" ('80), "Kinship and Marriage in Early Arabia" ('85), and "The Religion of the Semites" ('89).

Smoke Shaft, The Highest. There is now in course of erection the highest smoke shaft or chimney in the world, at the Royal Smelting Works, Freiberg, Saxony. The horizontal flue from the works to the chimney is 1093 yards long, crossing the river Mulde, and taking an upward course of 197 ft. to the top of the hill upon which the chimney is being built. The base of the structure is 30 ft. square by 30 ft. in height, and the round shaft an additional 430 ft. high, with an inside diameter of 23 ft. at the bottom and 16 ft. 6 in. at the top. It is calculated that a million and a half of bricks will be required, the cost being £6000.

Sobranys. See BULGARIAN POL. PARTIES.

Social Democrats, German. See GERMAN POLITICAL PARTIES.

Socialism. Primarily and broadly, the name given to the doctrine which proclaims the equal right of all to the material conditions of existence—that is, to the enjoyment of the necessities, comforts, and luxuries of life—and at the same time the equal duty of all to labour in relatively equal proportion (so far as may be needful) for the maintenance of those material conditions.

Socialism is thus, in its first intention, an economic doctrine. But by most schools of Socialists this has been, and is, regarded as the necessary foundation of a reconstruction of human life generally—i.e., of a complete readjustment of political, religious, and domestic relations, involving the abolition of their present forms. (See ed. '88.) **Names and Addresses of English Socialist bodies** as under:—**Social Democratic Federation:** offices, Bridge Street, Blackfriars, Sec. W. F. Lee, weekly organ *Justice*; **Socialist League:** offices, 13, Farringdon Road, Sec. F. Charles, weekly organ *Commonweal*; **Fabian Society** (for propaganda among the educated classes). Consult Karl Marx's "Capital," Hyndman's "Historical Basis of Socialism in England," Bax's "Religion of Socialism," etc.

Society for Promoting Christian Knowledge, The. Founded in 1698, "to promote and encourage the erection of charity schools in all parts of England and Wales." By the year 1741 nearly 2,000 charity schools had been established, chiefly through the instrumentality of the S.P.C.K. In 1811 the National Society was established, mainly to relieve the parent Society of some of its heavy labours. Of late years the Society has devoted much attention to the publication of cheap, good books, principally of a religious or educational nature. The expenditure by way of free grants of money and books for the year ending March 31st, '88, was about £49,000. It has recently spent £35,000 on the building and establishment of a training college for one hundred schoolmistresses, at Tottenham. The Society has voted a portion of its funds to aid in the establishment and development of **Medical Missions** and for the training of medical missionaries, lay and clerical, in India and other parts of the world. Secs., Revs. W. H. Grove, M.A., E. McClure, M.A., and A. H. Powell, M.A. **Offs.** Northumberland Avenue, London, W.C.

Society for Promoting Industrial Villages, and for reviving or establishing village industries side by side with agriculture. This society was founded in 1883, and has already exerted its influence in many quarters with success. The work is being carried on by a staff of lecturers on various industries, and their gratuitous services are at the disposal of any local Society. **Offs.** 30, Craven St., Charing Cross, W.C. **Hon. Sec.,** George J. Knight.

Socotra. A large island lying 150 miles off Cape Guardafui, at the entrance of the Gulf of Aden. Formally annexed by England ('86). Capital, *Tamarida*. Products, aloes, and also exports dragon's blood (a dye resin), dates, figs, etc. See **BRITISH EMPIRE**.

Sodo. See **PORT HAMILTON**.

Sodor and Man, Rt. Rev. John Waring Bardsley, Lord Bishop of, was educated at Trinity Coll., Dublin, where he graduated M.A., and was ordained deacon '59. He was for some time Archdeacon of Warrington, and subsequently Chaplain to the Bishop of Liverpool. He was appointed Incumbent of St. Saviour's in that city in '71, and was elevated to the episcopal bench as Bishop of Sodor and Man in '87. The bishopric is worth £2,000 a year.

Soldiers and Sailors Families Association ('85). **Object**—The relief of the wives and families of all branches of the British land and sea forces in time of peace or war. Funded property £16,000. **Organisation**—Office-bearers and committees representing each petty sessional division throughout the country. Also

an **Officers Branch** ('86), for the education of officers' children, either by payment or purchase into existing schools and institutions, and by temporarily aiding with small grants necessitous officers' widows. The work of the Association is entirely voluntary, there being no offices or paid officers. **Patron, H.M. the Queen.** **President of the Council, H.R.H. the Princess of Wales.** **Chairman and Treasurer, Lieut.-Col. J. Gildea, F.S.A., 7, Knaresborough Place, S.W.** **Solicitor.** This is the name given to the lower branch of the legal profession. It was formerly used by those whose practice was in the Chancery Courts, while **attorney** was used in the Common Law Courts. By the Judicature Act of 1873 all attorneys, solicitors, and proctors shall be called solicitors of the Supreme Court. They are obliged to take out annually a certificate, and are considered officers of the court, and are under the control of the judges who may, on motion made to them, strike any offender off the rolls. They are enabled to sue for their costs, and may be sued by their client for negligence. Their interests are protected by the society named the **Incorporated Law Society (q.v.)**, Chancery Lane.

Solicitor-General, The. One of the chief counsel to the Crown (see **QUEEN'S COUNSEL**), and assistant to the Attorney-General. He is in nearly all cases a member of parliament, and has political as well as legal duties. Present **Solicitor-General, Sir Edward Clarke, Q.C., M.P.** **Solicitors Act, '88.** See **SESSION**, sect. 20.

Solicitors, Law on, in '88. A singular case was heard before the Court of Appeal (May) as to the punishment to be meted out to a defaulting solicitor, whose dishonesty had been reported by the Incorporated Law Society (q.v.) in the usual way, but of whose conduct the judges took such a lenient view that they merely suspended him from practice for eighteen months. The firm of solicitors who had employed the solicitor in their office seemed dissatisfied with this decision, and instituted a prosecution, under which the defaulter received a sentence of six months' imprisonment. Thereupon the Incorporated Law Society considered that the case had assumed an altered aspect, and applied to the Queen's Bench Division to have the solicitor struck off the rolls. It was contended that a conviction for felony was of itself a sufficient reason for this step, whatever previous decision might have been pronounced; but the judges—Mr. Baron Pollock and Mr. Justice Manisty—said they refused to inflict a second punishment for the same offence because the man's employers were not satisfied with the former sentence of the court. The Court of Appeal subsequently approved this decision.

Somaliland. The country occupying the eastern horn or promontory of Africa. *Selilah* and *Barbara* are the chief ports on the Gulf of Aden, and are now British, having been declared so in '85. In '86 the German Government declared a Protectorate over the whole promontory, taking the coast beyond the British territory (Berbera) on the north, and as far south as Warsheikh, where British protectorate ('87) again begins. Treaties have been effected with the various native rulers of the Somali coasts and country. About the centre of the promontory lies the country of *Osadaya*. South of it is the rich valley of the *Webbe Shebeyli* ("Leopard river"). The trade exports frankincense and myrrh, hides and horns, ostrich

feathers, coffee of a very fine quality, indigo, and salt. These go to Egypt, Arabia, and India, through the ports of Zeilah and Berbera. The Somalis are mainly Mohammedans, divided into tribes, and many of their chiefs affect the name of Sultans. Off Cape Guardafui lies the British island of *Socotra* (*q.v.*). See previous edn., and *BERBERA, ZEILA, COLONIES OF EUROPEAN POWERS*, etc. Consult a paper by F. L. James, in "Proceedings of Royal Geographical Society," Oct. '85.

Somers Islands. An obsolete name of the *Bermuda Islands* (*q.v.*).

Soudan. That section of Africa lying immediately south of the Sahara. Its limits are variously defined. It may be said to be bounded by the Sahara on the N., by the Abyssinian highlands on the E., by the lands draining to the Congo basin on the S., and by Senegambia on the W. Within these limits it has an area of 2,000,000 sq. m., and a pop. estimated at from 80 to 100 millions. Lying mainly between 2° and 18° N. lat., it is entirely within the tropics. Soudan (Bilad-el-Sudan), the "Country of the Blacks," is the home of the true Negro race, but in many places the aboriginal element is intermingled with foreign intruders from the north and east—Fulahs, Tibus, Berbers, and Arabs. The Arabs especially have imposed their religion and civilisation upon the natives, and given rulers to many of the negro states. **Western and Central Soudan** are divided into eight independent and semi-independent states viz. (from west to east), Bambarra, Moassina, Gando, Sokoto, Adamawa, Bornu, Baghimmi, and Wadai. **Eastern Soudan** comprises Darfur, Kordofan, Senaar, Taka, the Equatorial Province (the scene of Emin Pasha's labours), and the Bahr-Gazal Province. The district of **Senaar**, the eastern limit, has been under Egyptian rule till recently, and has been brought into notice through our campaign against the Mahdi. Consult Keith Johnston's "Africa," and works of Sir S. Baker, Rohlfis, Nachtigal, Gordon, and other travellers.

Soulaby, William Jameson, b. 1851, is the son of an old and respected journalist, the late Mr. Matthew Soulaby, who was many years in the Gallery of the House of Commons, on the staff of the *Morning Chronicle* and the *Times*. Mr. Soulaby was educated at the City of London School and King's Coll., London, where he graduated as an associate. He was called to the bar at the Middle Temple in January '74. He was appointed in November '75, *Private Secretary to the Lord Mayor*, in the Mayoralty of Mr. Ald. Cotton, and has been re-appointed in that capacity in every successive Mayoralty down to the present. He was nominated as one of Her Majesty's lieutenants for the City of London, and is decorated with the Order of the Legion of Honour of France, the Francis Joseph of Austria, and the Takovo and St. Sava of Servia. In '88 he was the recipient of a testimonial from the Courts of Aldermen and Common Council, in recognition of his services. Mr. S. has also been honoured by the freedom of the Turners' and Loriners' Companies. He has been *Secretary of the various Mansion House Relief Funds* and other public movements.

• **South African Republic.** Official name of the *TRANSVAAL* (*q.v.*).

• **South America.** Under this head are comprised the Argentine Republic, the Empire of Brazil, and the Republics of Bolivia, Chili,

Ecuador, Paraguay, Peru, Uruguay, and Venezuela, each of which are separately treated.

Southampton, County Council for. See *COUNTY COUNCILS*.

South Australia. A colony comprising the central section of Australia. The older portion, South Australia proper, lies between 129° and 141° E. long., and from the sea to 26° S. lat. To this was added in 1863 the **Northern Territory**, lying between 129° and 138° E. long., and north of 26° S. lat. The whole colony, thus constituted, contains 903,690 sq. m. (South Australia 380,070 sq. m., Northern Territory 523,355 sq. m.), extending 1,850 m. N. to S. and 650 m. W. to E.; pop. 319,516. Capital **Adelaide**, pop. 45,333, or, with surrounding suburbs, 128,000. It is a beautiful and well-built city, with many fine buildings and institutions. **Towns**, not suburban, are mostly small centres: Gawler, Kapunda, Koorunga, Moonta, Naracoorte, Port Victor, Wallaroo, the largest; **Palmerston** and others in Northern Territory. Settled part of colony divided into 37 counties, hundreds (agricultural blocks), 23 municipalities, and 112 District Councils—the last of most importance. Also four pastoral districts.—**Chief rivers** are portions of lower Murray, Wakefield, Gawler, Torrens, in south, and the large and navigable Roper, Adelaide, Victoria, Daly, etc., in the Northern Territory. Country around **St. Vincent Gulf** very rich and fertile. Extensive pastoral regions farther back. About 200 miles north of Adelaide begins a dry region separating the fertile south from the farther north, which is subject to tropical rains. Three considerable mountain chains traverse this part. Interior not entirely sterile. Very many salt lakes. Much fair pasture-land. But the soil and climate of the south are chiefly adapted for the growth of wheat, which has already made the colony the "granary of Australasia," and for vine and olive, both of which are now extensively planted. The mulberry thrives, but sericulture has yet to be introduced. Climate of the south one of the most agreeable and healthy in Australia. See **NORTHERN TERRITORY**.—**Executive** the Governor and responsible Ministry. Parliament consists of Legislative Council and House of Assembly. Council consists of twenty-four members—eight retire triennially—elected by colonists of three years' residence, owning £50 freehold or £20 annual leasehold, or paying £25 annual rent; whole colony voting in four constituencies. Assembly elected triennially on manhood suffrage: fifty-two members. Colony is represented in the Federal Council of Australasia. Northern Territory ruled by a Resident and staff. Religion and education are well provided for. Volunteers and reserve number about 2,000 of all arms. The colony possesses a modern efficient ironclad and torpedo-boats. **South** essentially pastoral and agricultural; 2,785,490 acres cultivated, of which 1,942,453 are under wheat, yielding 14,621,755 bushels, or 7½ bushels per acre; 7,464 acres are under oats, producing 88,639 bushels, or 12 bushels per acre; 15,607 acres are under barley, producing 211,207 bushels, or 13½ bushels per acre; 45,036,775 of wool exported, and 41,058,248 of bread-stuffs; minerals, chiefly copper, value £240,333; 4,590 acres of vineyard produced 473,535 gallons of wine and 4,000 gallons of brandy; horses numbered 168,000; cattle 390,000; sheep 6,700,000. There are 1,211 miles of railway, 3,650 miles of good main road; and 9,718 miles

telegraph. For financial statistics see BRITISH EMPIRE, etc. (table). Gold produced in 1886 was 8,825 oz., value £32,585. The undeveloped resources of the colony are considerable. In the Northern Territory land suitable for sugar, tea, cinchona, etc., can be had in blocks of two square miles, at 6d. per acre rent or 7s. 6d. purchase; pastoral leases for twenty-five to three hundred square miles at 6d. rising to 2s. 6d. per mile, for twenty-five years, and stock conditions. —Colony founded in 1836, under auspices of South Australian Colonisation Association; government vested in Governor appointed and commissioners approved by the Crown. Lands to be sold at not less than £1 per acre, and funds devoted to emigration from England. Early difficulties: large debt to Imperial Government incurred. Recovery began 1844, when 30,000 acres under cultivation, much stock, exports value £82,000. Rich copper mines discovered, proving great source of wealth. Representative government introduced, and, in 1852, local government of districts. In 1856 the constitution was given and proclaimed. Responsible government from that date. Northern Territory annexed in 1864. Overland telegraph from Port Darwin opened in 1872.—'89. The principal events of the year have been the appointment of his Excellency the Earl of Kintore, Governor of the Colony, in succession to Sir W. C. F. Robinson, G.C.M.G. The adoption by the Legislative Council of an Address to the Queen, praying for power for each colony to increase the number of its representatives on the Australasian Federal Council. A vote of want of confidence was carried against the Ministry in June, resulting in the formation of a new Cabinet, with Hon. J. A. Cockburn as Premier and Chief Secretary (see DIPLOMATIC). The question of Imperial and Colonial Federation excited great interest during the year. Consult Boothby's "Statistical Sketch of South Australia," Marcus "South Australia," Gordon and Gatch's "Australian Handbook for 1887," Petherick's "Catalogue of York Gate Library," "Australasian Federal Directory" ('89-90), *Statesman's Year-Book*, *The Torch*, etc.

Southern Bulgaria. Name now usually given to Eastern Roumelia (q.v.).

South Georgia. A barren, snow-covered island in the South Atlantic, lying 800 miles E.S.E. of the Falklands, to which colony it has been annexed. Area 1,570 sq. m.

Southwell, Rt. Rev. George Ridding, Lord Bishop of, b. 1828; educated at St. Mary's Coll., Winchester, and Balliol Coll., Oxford, where he graduated M.A. ('53), and D.D. ('69). Was Head Master of Winchester College '67-84. Consecrated first Bishop of Southwell in May '84.

Spain. A monarchylately under Alfonso XII. of the House of Bourbon, now under a regency. By constitution of 1876, Spain is declared a constitutional monarchy, with executive power vested in the king, and the legislative power in the Cortes with the king. Cortes composed of senate and congress equal in authority. Senate in three classes—1st, senators in their own right; 2nd, 100 Crown nominees (the two first classes not to exceed 180); 3rd, 180 elected by communes, church, universities, and largest taxpayers, half to retire every five years. Congress composed of 431 deputies, elected by citizens of twenty-five years of age paying taxes. Islands of Cuba and

Porto Rico represented in Cortes. Each province has its own parliament for municipal and provincial administration. Religion, Roman Catholic. Public worship of any other creed forbidden. Area, including the Balearic and Canary Isles, each considered a province, 197,667 sq. m.; estimated pop. ('89) 16,500,000; revenue for '88, £30,000,000; expenditure, £32,000,000; debt, £240,000,000. Imports for '88, £19,000,000; exports, £27,500,000. A most striking event occurred in '88, which will have an important effect upon the future prosperity of the provinces of Cadiz, Seville, and Malaga—viz., the manufacture of Spanish cognac, which, taken from the pure rich grape of those districts, has proved far superior to the French.—In Jan. '89, Don José Luis Albareda was appointed Ambassador to England. The funeral of the late Capt.-Gen. Quesada took place at Madrid. A requiem service of the late Crown Prince Rudolph was performed at Madrid (Feb. 7th). Suicide (Mar. 1st) of Richard Piggott (see PARALLEL COMMISSION). The Chamber of Deputies passed the Army Reforms Bill (2nd). Queen Christina and Queen Victoria met at Biarritz (27th). Explosion of a dynamite petard behind the high altar of the church, Valencia; no one injured (April 19th). Catholic Congress at Madrid, under the presidency of the Archbishop of Saragossa, opened (24th). Shock of earthquake at Albana (26th). The Budget was presented (May 1st). Hailstorm of unusual violence passed over Madrid (June 6th). Fifth Session of the present Cortes opened (14th). Great scene in the Chamber consequent upon Senor Marto's attack on Senor Sagasta, people in the gallery joining in the tumult (July 5th). Serious fire on emigrant ship at Malaga (Aug. 29th). The remains of Gen. Espartero removed from the cemetery to the Cathedral at Madrid (Sept. 1th). Destructive fire at the Northern Railway goods station at Madrid (1st). Three thousand tons of esparto grass destroyed by fire at Alicante (3rd). Spanish vessel seized and ransacked by the Moors of Zamozet (17th); captain and crew kept prisoners. Subsequently (24th) the gunboat *Coodrilo* went out to the island, and sent a boat on shore with a white flag, but were fired on. Strong representations were made to the Sultan of Morocco, who sent peremptory orders for the release of the crew. Negotiations renewed with Canadian Government for commercial treaty (Oct.). Opening of the Cortes (29th). In the Chamber of Deputies (Nov. 27th) General Chinchilla, the Minister of War, read a Bill fixing the strength of the Army for the present financial year as follows:—Spain, 92,082 men; Cuba, 19,571; Porto Rico, 31,551; and the Philippine Islands, 9214. (For army and navy see FOREIGN ARMIES AND NAVIES.) Consult Webster's "Spain"; Reclus (Eliase) "Géographie Universelle," Vol. I.; *The Statesman's Year-Book*; *Almanach de Gotha*, etc.

Spanish Colonies. See COLONIES AND DEPENDENCIES OF EUROPEAN POWERS.

Spanish Political Parties and the Cortes. The Cortes or parliament of Spain consists of two bodies, a Senate and a Congress. The Senate is composed of three classes: those who sit by right of birth or official position, of 100 members nominated by the Crown, and of 180 elected by the largest taxpayers of the kingdom and certain corporate bodies. In the present Senate the Government has on most questions

a large majority, the **Opposition** numbering 108, and being thus divided: **Conservatives**, 90; **Republicans**, 6; **Democrats**, led by General Lopez Dominguez, a nephew of Marshal Serrano, 6; **Liberal Reformers**, led by Señor Romero y Robledo, 5; and 1 **Cuban Autonomist**. Among the majority, however, are 40 **agrarian members**, who usually oppose the Government on economic questions, and 12 **followers of Marshal Martínez Campos**, whose support is also variable. The present Congress, which was also elected in April '86, contains 430 members, who are elected (in the proportion of 1 to every 50,000 souls of the population) by limited suffrage under the constitution of March 27th, 1876, which, after the accession of the late King Alfonso, replaced the more liberal constitution of 1869. The **political divisions** of the present Congress are very numerous, although for ordinary voting purposes they may be classed as **Ministerialists**, 240; **Opposition**, 170; several seats being vacant. Each of these two divisions, however, contains several groups, the **Opposition** particularly being made up of the most conflicting fractions, from Radical Republicans to Conservatives of the most reactionary type. Chief among the latter are the **followers of Señor Canovas del Castillo**, ex-prime minister, who number 73, or nearly a half of the whole **Opposition**. They are for the most part men of high position and exceptional talent, very many of the number being ex-ministers. The followers of Señor Canovas, however, are only opposed to the Sagasta ministry on political grounds, as they are devotedly attached to the monarchy, which steadily continues to increase its hold on the country. The remaining groups of the **Opposition** are:—**Protectionists**, who follow Señor Gamazo, 31 (these, however, lend an occasional support to the Government); **Dissentient Liberal coalition**, headed by Señores Romero, Robledo, and Martas, and Generals Lopez, Dominguez, and Cassola, 33; **Moderate Republicans**, led by Señor Castelar, 9; **Radical Republicans**, 10; **Cuban Autonomists**, 9 (who are also **Republicans**); **Carlist**, 1; and **Independent**, 1. The **Ministerialists** are less divided. The chief strength of the Ministry is obtained from the personal following of Señor Sagasta, whose political creed may be described as moderate Liberalism. Señor Sagasta's programme, which inclines to free trade, is a thoroughly Liberal one, and is as well calculated as anything is likely to be to cope with the Clerical and Carlist parties and to hold in check the revolutionary aspirations of Señores Pi y Margall and Ruiz Zorrilla. At the present moment (Dec. '89) Señor Sagasta is endeavouring to effect a reconciliation with the **Dissentient Liberals**, which may lead to some modification of the Cabinet.

Spanish Town. In Jamaica (*q.v.*).

Speaker. The title of the presiding officer of a legislative assembly. On the first day of the meeting of a new Parliament members of the House of Commons are summoned from their own chamber to the House of Peers, where Her Majesty's pleasure is signified by the Lords Commissioners that they shall proceed to the choice of some proper person to be their Speaker. On their return the Commons proceed to the election accordingly, the Clerk acting the while as chairman. On the following day the Speaker elect, with the House, is summoned to the House of Peers, and one of the Lords Commissioners signifies Her

Majesty's approval of the choice made by the Commons. The Speaker then, in the name, and on behalf of the Commons, lays claim to their ancient and undoubted rights and privileges, which being confirmed, he and his fellow-members return to their own chamber, and the ceremony of taking the oath is proceeded with, he being the first to go through it. (See **COMMONS**, **HOUSE OF**, and **PARLIAMENTARY PROCEDURE**.) The Speaker may hold office until a dissolution. Should the office become vacant during a session, the new Speaker then elected is presented for the Royal approbation, but does not claim the privileges of the House. This great officer has a residence in the Palace of Westminster, and receives a salary of £5,000 per annum; he ranks as first Commoner, and is usually awarded upon retirement a pension of £4,000 and a peerage. There has been no contested election for Speaker since 1839. The following have filled the office since the meeting of the first reformed Parliament:—Sir C. Manners-Sutton (first elected 1817), 1833-5; Mr. J. Abercromby, 1835-9; Mr. C. Shaw-Lefevre (the late Viscount Eversley), 1839-57; Mr. J. E. Denison (afterwards Viscount Ossington, and since deceased), 1857-72; Sir H. Brand (the present Viscount Hampden), 1872-84, when Mr. Pecl was elected. The Chairman of Ways and Means acts as deputy Speaker in the unavoidable absence of Mr. Speaker. The Speaker of the House of Lords is the Lord Chancellor for the time being. The Chairman of Committees and several other peers are authorised by commission to act as deputy Speaker in the absence of the Lord Chancellor; and should none of these be present any lord may be chosen to act. See **CHAIRMAN OF WAYS AND MEANS**.

"Speaker, The," founded on Jan. 4th, '90, under the editorship of Mr. T. Wemyss Reid (*q.v.*). A new weekly, distinguished by strenuous advocacy of Liberal principles, not merely in Politics, but in Letters, in Art, and in Science, accompanied by a frank recognition of all that is of value in ancient institutions and traditions. A special feature will be the methods of dealing with **Foreign Affairs**. In addition to articles on Science, Art, Music, and the Drama, the Money Market, Literary News, and Criticism, *The Speaker* contains a weekly *causerie* from the pen of a well-known essayist and critic. **Office**, 115, Fleet Street, E.C.

Speaker's Claim of Privileges. See **PRIVILEGES OF PEERS AND MEMBERS**.

"Speaker's Commentary, The." A commentary on the Bible, contributed to by Anglican bishops and clergy; edited by the Rev. Canon Cook, of Exeter; and published by Mr. John Murray, in ten volumes, 1871-81. The plan of the undertaking originated with Mr. J. E. Denison, Speaker of the House of Commons, which accounts for its title.

Special Licence. The law requires that before the celebration of a marriage according to the rites of the Church of England the banns be thrice published previously in the church where the marriage is to be solemnised. But a licence may be had to dispense with this ceremony. An ordinary licence is issued by the Ordinary or by his surrogate. A special licence is issued by the Archbishop of Canterbury, and empowers the parties to be married at any time, not only in any church or chapel, but in any other meet and convenient place. A special licence is issued from the Faculty Office, Doctor's Commons, and bears a £5

stamp. A special licence and the Ordinary's licence are obtained in the same way, but a special licence is supposed to be obtainable only by persons of rank.

"Specie Point." See FOREIGN EXCHANGES. **"Spectator, The"** (founded July 5th, 1828). Originally started as a Liberal review, under the editorship of Mr. Baintoul. In 1862 the department of news was altered in form, and reduced to paragraph articles. *The Spectator* is entirely opposed to concession of Home Rule to Ireland. Office, 1, Wellington St., Strand, W.C.

Spencer, Herbert, b. at Derby 20. Educated by his father, a teacher of mathematics at Derby, and by his uncle, a clergyman. Became a civil engineer, a profession he subsequently abandoned for literature and journalism. He was for some time sub-editor of a daily paper at Birmingham, and afterwards of the *Economist*. At the house of Dr. John Chapman, editor of the *Westminster*, Mr. Spencer met, and became the life-long friend of George Eliot and George Henry Lewes. His first work of importance, "Social Statics, or the Conditions essential to Human Happiness specified, and the first developed," appeared in '51. In '55 appeared the "Principles of Psychology," and in '61 "Education—Intellectual, Moral, and Physical," which has run through sixteen editions. Mr. Spencer has always contributed largely to various periodicals, and these articles have, for the most part, been reprinted in pamphlet or book form. In '82 Mr. Spencer visited America, where he gave several lectures, among others one on "American Nervousness." Among his many important works are "Political Institutions" (being Part V. of "Principles of Sociology"—'82). Of Mr. Spencer's many recent review articles, a series from the *Contemporary* has been reprinted as "The Man versus The State," which contains the articles on "The New Toryism" and "The Coming Slavery," an attack on Socialism; "Ecclesiastical Institutions" (being Part VI. of "Principles of Sociology"—'85). In '89 he published "An Epitome of Synthetic Philosophy," and in the *Times* discussed the question of land tenure.

"S. P. G." (Society for Propagation of the Gospel in Foreign Parts). The oldest Missionary Society connected with the Church of England, being incorporated by Royal Charter in 1701. Office, 10, Delahay St., Westminster. Sec., Rev. H. W. Tucker, M.A.

Sphairistiká. See LAWN TENNIS.

Spurgeon, Rev. Charles Haddon, b. 1834. On relinquishing the Pædobaptist views of his family he became associated with the church at Cambridge of which the celebrated Robert Hall had been pastor; and as a member of the preachers' association of this congregation Mr. Spurgeon first began to hold services in surrounding villages. Pastor at Waterbeach (1851), preached for the first time in London (1853). Pastor, New Park Street (1854); but in consequence of the great crowds attracted services were held at Exeter Hall, and at the Great Hall, Royal Surrey Gardens, where on one occasion a terrible disaster occurred through some one raising a false alarm of fire whilst Mr. S. was preaching. Pastor of the Metropolitan Tabernacle, erected at a cost of £32,000 (1861). Mr. Spurgeon's sermons, of which about 25,000 of each issue are sold, have been published since the first week of 1855, and are translated into various foreign languages.

As an author he has produced numerous works, the chief being the *Treasury of David*, 7 vols. 8vo; he also edits the well-known magazine, *The Sword and Trowel*. Mr. Spurgeon is the founder of the *Stockwell Orphanage* (1867), the *Pastors' College*, the *Colportage Association*; the *Book Fund*, and the *Supplementary Pastors Aid Fund*. Minor institutions are also attached to the Metropolitan Tabernacle. Mr. Spurgeon's letter on the Irish Question exerted an important influence in Non-conformist circles at the time of the last election. Mr. S. in 1887 severed his connection with the Baptist Union on the ground that many of its members held views more in harmony with the teachings of Matthew Arnold and Herbert Spencer than with those of St. Paul and the Christian Fathers—a step which has led to a long controversy in the papers under the title of the "Down Grade Question." In '88 Mr. S. was entertained by his supporters at a meeting convened to welcome him on his return from Mentone, and to celebrate the issue of his 3000th sermon. During his last visit to Mentone, where he usually spends the winter, he met with an accident. Mr. Spurgeon published two volumes of proverbs under the title of "Salt-cellar," '89.

Stainer, Sir John, Mus. Doc., b. 1840, and at seven years of age became a chorister of St. Paul's; at sixteen organist of St. Michael's Coll., Tenbury, and three years later organist of Magdalen Coll., Oxford. He subsequently graduated both in Arts and in Music, and in '60 was appointed organist of Univ. Church. In '72 he succeeded the late Sir John Gosse as organist of St. Paul's, and held that appointment until last year, when he retired. Dr. Stainer has composed many anthems and Church services, the *Quintets* "The Daughter of Jairus," "St. Mary Magdalene," "The Crucifixion," and, in addition to his well-known "Treatise on Harmony" and *Musical Primers*, has written "The Music of the Bible." Knighted '88. Sir John was in June '89 elected Professor of Music at Oxford, and in the following October President of the Musical Association of London, in place of the late Sir Fredk. Gore-Ouseley. He is Inspector of Music to the Education Department.

"Standard, The." First published in 1837. Its present price is a penny, and it is in the front rank of the political journals that rose into importance almost immediately after the abolition of the Paper Duty (6s). Its present circulation is close on a quarter of a million daily. The political principles of *The Standard* are Conservative; but it reserves, and often exercises, the right of sharply criticising the action of the Conservative party. During the American Civil War, the letters of its correspondent "Manhattan" were marvelously popular, and the services of its war correspondents—notably Mr. G. A. Henty, and Mr. Cameron, the latter of whom was killed in the Bayouda desert—have always been prompt and efficient. The present editor, under whom the prosperity of the paper has steadily advanced for the past decade, is Mr. W. M. Mudford. *The Evening Standard* (1857) is an evening edition of the morning paper.

Standing Committee. See GRAND COMMITTEE AND PARLIAMENTARY PROCEDURE.

Standing Orders. This term was originally applied to certain Orders made by either house of parliament to regulate its own procedure. Orders made by either house may in respect

of their time for remaining in force be classified under three heads. (1) Standing Orders, which are permanent regulations, although liable to be suspended upon extraordinary occasions—e.g., in order to the rapid passing of bills of a pressing nature. (2) Sessional Orders, which continue in force only during the session in which they were made, although they may be renewed from year to year. (3) Orders indefinite in their duration. Of these three classes the Standing Orders are the most important for purposes of procedure. The *Roll of Standing Orders of the House of Lords* has been regularly published at intervals. But until 1854 the Standing Orders of the House of Commons, with the exception of those relating to private bills, had never been published by authority. The Commons Standing Orders relative to public business were revised and reprinted in '88 (see *PARLIAMENTARY PROCEDURE*), and the Lords Standing Orders were considered and amended in '89.

Stanford, Charles Villiers, who has done so much for the cause of music at the University of Cambridge, is the son of an accomplished amateur musician. He was born at Dublin in 1852, went to Cambridge as Choral Scholar of Queen's, became Organist of Trinity in '73, and soon afterwards Conductor of the Cambridge Musical Society. His university career was also distinguished. His operas are "The Veiled Prophet" (not yet heard in England), "Savonarola" (played at Covent Garden), and "The Canterbury Pilgrims" (written for Mr. Carl Rosa at Drury Lane). His oratorio "The Three Holy Children," written for the Birmingham Festival of '85, his "Irish Symphony," and his choral ode "The Revenge" (Leeds Festival, '86), are well worthy of his reputation. He is Professor of Composition at the Royal College of Music, and one of the leaders of advanced musical thought. In '87 he was appointed Professor of Music at Cambridge in succession to the late Sir George Macfarren.

Stanley. Capital of Falkland Islands (*q.v.*). Pop. 700.

Stanley, Henry M., b. at Denbigh 1841, and passed his childhood in the workhouse at St. Asaph. He subsequently sailed as cabin boy to New Orleans, where he was adopted by a Mr. Stanley, whose name he took, but whose death without making provision for him again compelled him to start the world on his own account. After a series of adventures he became a journalist during the American civil war, being attached as reporter to the staff of the *New York Herald*. In '68 he was sent to accompany the British expedition into Abyssinia, as war correspondent for that paper. Subsequent to this he made a tour to the Black Sea, and thence through Persia into India. In '69 Livingstone in Africa, had not been heard of for a long time. Mr. Gordon Bennett, proprietor of the *New York Herald*, ordered Stanley "to go and find him." Early in '71 Stanley left Zanzibar and plunged into the unknown continent. Before the end of that year he had found Livingstone. In '73-4 he accompanied the British expedition into Ashanti, up to Kumassi, as a war correspondent again. In '76 the *New York Herald* and the London *Daily Telegraph* conjointly sent him to Central Africa, to take up the thread of Livingstone's discoveries. He left Zanzibar in that year, and in '77 emerged on the west coast, having circumnavigated Victoria Nyanza, and forced his way in spite of terrible

obstacles down the whole course of the hitherto unknown Congo. In '79 the King of the Belgians gave Stanley the command of an expedition formed by the International African Association, for the purpose of exploring the Congo. Stanley succeeded in planting stations and securing steam-navigation upon the upper river, and may be said to have made what is now the Congo Free State (*q.v.*). He remained at work from '79 till '85, with the exception of a short absence in '82. In Jan. '87, Mr. Stanley started on an expedition for the relief of Emin Bey (*q.v.*). Previous to his departure he was entertained at a banquet at the Mansion House, and presented with the freedom of the City of London. A few months after the expedition had proceeded on its perilous journey, much uneasiness was caused by the publication of a report that Mr. Stanley had been murdered, though this was generally discredited. An expedition under Major Barttelot, son of Sir W. B. Barttelot, M.P., was subsequently sent in search of him, but its gallant leader was murdered by some of the natives who accompanied him. News of Stanley and Emin, which had long been anxiously awaited, at length arrived on April and, '89. On the following day the newspapers published the thrilling story of the explorer's perilous journey to the Albert Nyanza, through vast tropical forests under conditions of the utmost difficulty. The column of 369 men set out June 28th, '87. On Aug. 31st the force, having lost 66 of its number by desertions, fell in with a party of Arabs, and from this time till Nov. 12th the story is one of starvation, desertion, and struggle through a region devastated by Arabs. The party, reduced to 174 skeletons, reached in November a land of plenty, where they halted for several days. On Nov. 5th they emerged upon the plains, and the deadly forest gloom was left behind. On the 14th, after another fight with the opposing natives, the Albert Nyanza was reached. Difficulties were again met with, and 190 miles had to be retraced to bring up the boat. In Jan. '88 the explorer was ill for a month with gastritis. On April 26th news was received from Emin; on the 29th the Pasha and Mr. Stanley met. Mr. Stanley then, leaving the Europeans with Emin, returned to Yambuya for his rearguard and stores. In the letter to Mr. A. L. Bruce, Mr. Stanley described the forest and the tribes met with on the journey. News of Mr. Stanley was afterwards received in an official despatch from Capt. Wissmann to the German Government. It stated that Emin and Stanley, accompanied by Capt. Casati and six Englishmen, were expected to arrive at Mpwapwa towards the end of Nov. '89. A despatch received from Stanley himself (Nov. 4th, '89), stated that on his return from his attempt to relieve Major Barttelot, he discovered that Emin's followers had revolted, and that Emin and his chief lieutenant, Mr. Jephson, had been taken prisoners by the Mahdists (Aug. 18th, '88). Stanley pushed forward to assist the survivors, and after waiting at the Albert Nyanza from Feb. 4th to May 8th, '89, resumed his march to the coast, travelling along the base of the snowy range of Ruvenzori and *via* Albert Edward Nyanza, which he explored. A further letter received from Mr. Stanley (Nov. 20th) by the Geographical Society gave some interesting notes on the physical geography of the lake regions. It is stated on high authority that

Mr. S. will probably not reach home before the end of Jan. '90.

"Star, The." A Radical evening paper, devoted to the interests of the advanced Democratic movement both in Great Britain and Ireland. It first appeared Jan. 17th, '88, and has attracted attention by its promptness in obtaining information, and its outspoken articles and large circulation. One of its most popular features is the column entitled "Mainly about People." Editor, Mr. T. P. O'Connor, M.P. (*q.v.*) Office, Stonecutter St., E.C.

Starvation, Death from. See CORONERS' INQUESTS.

Stationery Office Publications. The vast number of papers issued to the public under the superintendence of Her Majesty's Stationery Office (*q.v.*) renders it impossible to enter much into detail; but they comprise books affecting the military, naval, and civil services, reports of the scientific results of the voyage of H.M.S. *Challenger*, calendars of State Papers, chronicles and memorials, and publications of the Record Commissioners, rules under the various Acts of Parliament, papers issued by, or affecting, the Board of Trade, the Education, and Science and Art Departments, and the Local Government Board, Explosive and Factory Books and Forms, Survey publications, and numerous miscellaneous books. The most important among this vast collection is Vol. I. of "State Trials" (1820-23), which contains many reports—for the most part hitherto unpublished—of cases relating to the right of public meeting. There are also some extracts from unpublished documents, giving many details as to the history of "Peterloo." Besides the account of Queen Caroline's claim to be crowned, we have also the celebrated trial of the King v. Sir Francis Burdett. The complete set, it is anticipated, will occupy about 8 or 10 vols. The "Challenger" volumes have been issued from time to time, and probably complete sets will soon become scarce. **Military and naval**, and indeed books issuing from all departments, have been constantly appearing. The *Board of Trade Journal* (*q.v.*) [monthly] contains useful information for merchants and others, while the *Kew Bulletin* [monthly] ought to interest a large circle, containing as it does such valuable notes on *Economic Produce and Plants*. Of the *Chronicles and Memorials* we have *Historians of the Church of York and its Archbishops*, Vol. II.; *Chronicle of Stephen, Henry II., and Richard I.*, Vol. III.; *Roger de Wendover*, Vol. I.; besides many others. The publishers are Messrs. Eyre and Spottiswoode, East Harding Street, London, E.C., Messrs. A. and C. Black, North Bridge, Edinburgh, and Messrs. Hodges, Figgis & Co., 104, Grafton Street, Dublin. The *Hydrographic Publications* are obtainable only from Mr. J. D. Potter, 31, Poultry. The *Geological and Ordnance Survey Maps* are published by Mr. E. Stanford, Charing Cross, London, S.W., Messrs. A. and C. Black, North Street, Edinburgh, and Messrs. Hodges, Figgis & Co., 104, Grafton Street, Dublin. *Patent Specifications* are only to be obtained at the Patent Sale Office, Curstons Street, Chancery Lane, London, E.C.

State Socialism in Germany. The following are the main points of the system of State insurance and annuities now working in Germany:—In 1883 an Act was passed enforcing insurance against sickness, and in '84 the first

instalment of another to secure compulsory insurance against accident. The latter provides for complete disablement two-thirds of the actual wage (if exceeding four marks, a diminishing fraction); for partial disablement an equitable proportion of the same is granted as pension. In case of death by accident, 20 days' wage is given as burial money, and an allowance to the widow of 20 per cent. of the wages of the deceased, with 15 per cent. to each child under 15 years—the whole not to exceed 60 per cent. Dependent ascendants have also a secondary claim. If the injured man is removed to a hospital, the wife draws her allowances as in the case of death. The measure sanctioned in '89 to provide against incapacitation and old age is of quite a different character. In its scope are included almost without exception all persons above the age of 16, male and female, working in a dependent position for regular hire. The line between dependent and independent workers is not always clearly marked; so a certain discretion is allowed to the Federal Council to admit, in particular trades by special order, sub-contractors for large firms and even independent workers not themselves employing workmen. Existing State and communal arrangements for similar purposes are respected, stipulation being made that equal advantages shall be granted. The contribution offered by the State is secured for such establishments when they have obtained the approval of the Federal Council. Eleven millions of persons will at once come under the compulsion of the Act when its operation begins (probably in '91). The capital value of the obligations incurred directly by the State in this connection is reckoned at 77·8 million pounds; the total obligations will hardly be less than three times as much. For purposes of the Act workers are divided into four classes according to their wage:—Class I., to 350 marks per annum, reckoned as drawing 300 marks; Class II., to 550 marks per annum, reckoned as drawing 500 marks; Class III., to 850 marks per annum, reckoned as drawing 720 marks; Class IV., above 850 marks per annum, reckoned as drawing 960 marks (1 mark = 1s.; 84 pfennigs = 1d.). The first class pays 12 pf., the second 18, the third 24, the fourth 30 weekly. These payments are made by the masters, who deduct in their turn half of the sum from the weekly wage, and pay the other half of the premium themselves. In return for his contributions the person insured is entitled, in case of incapacitation, to a pension for life, or till complete or partial recovery. Incapacity to earn a living is assumed when the bodily or mental condition of the insured is such that he is unable to earn one-sixth of his average wage of the last five years, plus one-sixth of the normal local wage. On reaching the age of 70 the insured is qualified to receive an old age pension, whether he be incapacitated or no. The old age pension lapses as soon as the invalid pension is granted. To qualify for an invalid pension 235 weeks (5 years), for an old age pension 1410 weeks (30 years), of contribution are further necessary. Those who come under the first operation of the Act can, under somewhat complicated conditions, be admitted with little delay to the minimum benefits—a concession which goes beyond the strict requirements of justice, but is prudent and will be popular. The pensions are arranged to rise with the number of payments made: a

fixed minimum and then a steady rise week by week. The minimum invalid pay from the funds of the institution is 6s marks a year—to which must be added the uniform Imperial contribution of 50 annual marks. With each completed week of payment this pension rises—in *Class I.* by 2 pf.; in *Class II.* by 4 pf.; in *Class III.* by 9 pf.; in *Class III.* by 13 pf. For a final calculation of the total burden falling upon the working community through these measures the material is still wanting; but the following approximation may be made in percentage of the sum-total of the earnings of the insured classes:—Sickness insurance, 1½ per cent.; accident insurance, ultimately 2 per cent.; old age and incapacitation, at present about 2 per cent., ultimately 4 per cent. In all 7½ per cent., or, allowing for the smaller percentage exacted from wages above the average, perhaps 5 or 6 per cent. of the total wages earned: no trifling fraction of the entire income of the working class. Of the contributions against sickness, one-third; against accidents, the whole; against old age and incapacitation, a half, is paid by the masters. The organisation of this Act is territorial; that of the sickness union is local; that of the accident insurance based on trade associations neither local nor territorial. For each district one or more tribunals of arbitration are appointed, with a permanent professional president and deputy assisted by assessors elected in equal numbers from masters and men.

Stationery Office (Princes St., Westminster) provides the public offices and Parliament with books, stationery, etc., and arranges for the greater part of the printing required by them. In Oct. '88 the Controller of the Stationery Office was appointed by Letters Patent, under the Great Seal, to exercise all rights and privileges in connection with copyright the property of H. M. Controller, T. D. Pigott (£1,500); Assistant Controller, J. S. Lewis (£600).

Stead, William Thomas, editor of the *Pall Mall Gazette* (q.v.), and son of Rev. W. Stead, Congregationalist, Howdon-on-Tyne, was b. July 5th, 1849; married '73; educated privately and at Silcoates; apprenticed ('63) to commercial house at Newcastle Quay. Appointed editor of the *Northern Echo* ('71), appointed assistant-editor ('80) to Mr. John Morley (then editor of the *Pall Mall Gazette*); succeeded him as editor-in-chief ('83); interviewed Gordon at Southampton (Jan. '84); wrote "The Truth about the Navy" (Oct. '84), "The Maiden Tribute of Modern Babylon" (July '85), "No Reduction no Rent," a record of a visit to Ireland in the autumn of '86, "The Langworthy Case" ('87), "Truth about Russia," written after a visit to Russia in May and June '88, and "A Guide to the Paris Exhibition" ('89); went in October to Rome, to gather material for a series of "Letters from the Vatican," concerning the future social and political influence of the Pope.

Stephen, Sir J. F. K.C.S.I., son of the late Rt. Hon. Sir Jas. Stephen, was b. '29. Called to the bar ('54), Q.C. ('68). For about two years and a half ('71-'72) he was legal member of the Council of the Governor-General of India, and by his codification of the criminal law of that country conferred lasting advantage upon its inhabitants. He was Professor of Common Law to the Inns of Court ('75-'79). Appointed a Judge ('79). Mr. Justice Stephen

is a high authority on criminal law. He is the author of "General View of the Criminal Law of England," "Digest of the Law of England," "Digest of the Criminal Law," and other legal works, as well as "Liberty, Equality, Fraternity," and "Essays by a Barrister." Mr. Justice Stephen's attempts to secure the codification of our criminal law have not yet met with success, although the project has from time to time been under consideration. He presided at the trial of the action for alleged libel brought by Mr. O'Brien, M.P., against Lord Salisbury at the Manchester assizes '89, and subsequently at the trial of Mrs. Maybrick for the murder of her husband at Liverpool.

Stephen, Leslie, b. at Kensington 1832. Educated at Eton, King's Coll., London, and Trinity Hall, Camb., where he graduated '54, and subsequently became Fellow and Tutor of that college. Mr. S. was for some time editor of the *Cornhill Magazine*, and in '83 accepted the *Clark Lectureship in English Literature* at Cambridge, but resigned it twelve months later. His best known books are "The Playground of Europe," "Essays on Freethinking and Plain Speaking," "History of English Thought in the 18th Century," "The Science of Ethics," and the several series of "Hours in a Library." He is also editor of the "Dictionary of National Biography" (q.v.), now in course of publication. Mr. S. is a son of the late Sir James Stephen, and brother of the present Sir James Fitzjames Stephen. He married a daughter of the late W. M. Thackeray.

Sterling, Madame Antoinette, eminent vocalist, was b. 1850, in the State of New York. Her musical education was conducted by Abella, Marchesi, and Pauline Viardot. In London her training was continued by Manuel Garcia. Her debut in England took place in '73, at one of the Promenade Concerts, Covent Garden Theatre. Since that time Madame S. has become one of the most popular singers of ballads and Scotch songs, notably on account of her rendering of "The Lost Chord" and "The Better Land." She married, in '75, Mr. John MacKinlay.

Stevenson, Robert Louis, author and critic; was b. at Edinburgh, 1845, and educated at the University of that city, where he graduated M.A. He started a magazine while a student; but the venture was not a success, though some of his own contributions to it gave promise of the distinction he has now attained. One of Mr. Stevenson's earliest works was an account of his travels in California, but the book which established his reputation as a writer of the first rank was "Treasure Island." Amongst the most popular of his other works are "Dr. Jekyll and Mr. Hyde," dramatised and played at the Lyceum theatre in '88; "Familiar Studies," "Underwoods," "Virginibus Puerisque," "Story of the Rebellion of '45," the "Dynamiters" (written in conjunction with his wife), "An Inland Voyage," "Travels with a Donkey," "New Arabian Nights," "The Silverado Squatters," "Prince Otto," "The Blackamoor" ('89), and his numerous essays. He has also written a life of his father, the celebrated lighthouse engineer. Mr. S. has recently been on a two years' yachting trip in the Pacific. His most recent works are "Edinburgh: Picturesque Notes," "The Master of Ballantrae," and "In the Wrong Box."

Steward of England, Lord High, was viceroy, or prime officer under the king. The office was established prior to the reign of the Confessor, and was annexed to the lordship of Hinckley; but since the rebellion of Simon de Montfort it has only been revived *pro hac vice* for a coronation, or a trial by impeachment, or the trial of a peer; and in the two latter cases the Lord Chancellor has been generally commissioned to act. At a coronation the L.H.S. walks before the sovereign carrying St. Edward's crown; and in the case of William IV. and Victoria this function was performed by the Duke of Hamilton.

Steward of the Household, Lord (see **MINISTRY**) receives his charge from the Queen in person by the delivery of a **white wand**, which is his symbol of office, and which he bears on state occasions, breaking it over the royal coffin at the funeral of the sovereign. He is always a privy councillor. He has the direction of the Queen's palaces, the accounts of the Household come under his review, and he has the control and selection of all subordinate officers and servants except those connected with the chapels, chambers, and stables. This office must not be confounded with that of Lord High Steward (*q.v.*).

Stirling, Sir James, b. 1836. Educated at Trinity College, Cambridge. Called to the bar ('62), Junior Counsel to the Treasury ('81), Member of the Bar Committee ('83). Formerly he reported for the Incorporated Law Society. Is a Judge of the Chancery Division of the High Court of Justice.

Stock Exchange. (For history of this, and official list, see ed. '87.) For the purposes of business the S. E. is regulated by a committee of thirty members, including the chairman and deputy chairman, called the "**Committee for General Purposes**." This committee is appointed by a ballot of the members, and holds office for twelve months from the 25th March in each year. The S. E. contains upwards of 2,500 members, who are either **Jobbers** or **Brokers**. The former are dealers who buy and sell at the market prices, while the latter deal with the jobbers on behalf of the public, and are remunerated by commission for transacting the business. The S. E. recognises no transactions with any other parties than its own members, and all must be in accordance with the usages of the "house." The transactions are liquidated twice a month, the settlement extending over three days. The dates are fixed by the committee every month, some accounts being longer than others. In the case of **Consols**, however, it is different, the settlement in **English** government securities taking place but once, at the commencement of each month.

S. E. holidays—January 1st; Easter Monday; May 1st; Whit Monday; the first Monday in August; November 1st; December 26th; unless specially ordered otherwise by the committee.

Terms. **Scrp** is an abbreviation of the term subscription, and is applied to the certificates of payment of deposits and calls prior to the issue of the definitive certificates or bonds. **These Bargains** are transactions entered into by speculators who have no intention of either paying for the stock or shares they have bought, or delivering those they may have sold. If at the time appointed the stock they have bought stands above the price named the seller pays the difference. If below he receives it. A **Bull** buys with the view

to a rise in price before a settlement at a future date. A **Bear** sells with the view of buying back at a future date at a lower price. **Contango** is a sum paid by the speculator for the rise, per share or per cent., for the privilege of deferring payment till the next settlement. **Backwardation** is a sum paid by the speculator for the fall, to postpone delivery of stock or shares till the following settlement. **Continuation rates** embrace both contango and backwardation. **Options** are transactions by which a speculator can limit his loss by paying a fixed sum when the bargain is made. They may be either a "put and call," a "put," or a "call." A put and call enables an operator to sell or purchase at a fixed price on a certain day. A put is a transaction by which a speculator has the option of selling stock at a fixed price at a future time, for which he pays an agreed rate. A call is a transaction by which stock can be claimed on a settled day for a certain consideration. **Carrying over** signifies the postponement of payment or delivery of stock or shares till the next settlement day. **Hammering** is the declaration of a defaulting member, which is announced by the "head waiter," striking three blows with a mallet. **Cornering** is an operation by which a scarcity of stock is created, thus producing a fictitious market and preventing a dealer from obtaining what he has previously sold except at greatly enhanced prices. For example, if A sells B a number of shares or stock for delivery on a certain day, and finds he is unable to deliver them, B can have the securities publicly bought in by the secretary to the committee, or by the clerks of the "house." The sellers of such securities under the circumstances necessarily raise the prices severely against A, who has to pay the abnormally enhanced price. A is then said to be cornered. **Arbitrage** is an operation whereby identical securities are bought in one market and sold in another. **Long and Short** are American terms synonymous with **Bull and Bear**. **Spread** is also an American term for the option to either Put or Call stock. **Straddle** is the same option at one price whether stock is "put" or "called." Amongst the abbreviations used in the Stock Exchange the following are the principal:—**Brums**, a name given to London & North-Western Railway stock; **Barwick** stands for North-Eastern stock; **York "A,"** Great Northern "A" stock; **Dinaha**, Edinburgh and Glasgow; **Haddocks**, Great North of Scotland; **Saras**, Sheffield Deferred; **Potts**, North Staffordshire; **Galley**, Caledonian; **Glaras**, Caledonians Deferred; **Bertha**, Brighton Deferred; **Dover "A"** or **Doras**, South-Eastern Deferred. **Ayrshire**, ordinary stock of the Glasgow and South Western Railway; **Chinas**, Eastern Extension Telegraph shares; **Noras**, Great Northern Deferred Ordinary stock; **Knockers**, Harrison, Barber & Co.'s shares; **Vestas**, the Deferred stock of the Railway Investment Co.; **Virginia**, Virginia New Funded. —**Paris Bourse**. On the Paris Bourse there are sixty recognised official brokers (**Agents de Change**), known as the **Parquet**. There are also non-official dealers under the name of **Coulisses**; which include many high-class firms and arbitrage houses. The settlements are arranged each fortnight in Foreign Government and Miscellaneous Securities, and Monthly in Rentes, and occupy five or six days. The monthly liquidation really commences on the last day of each month, as

Options are declared on that day. **Rente** "continued," 1st of month; **Other securities** "continued," on the 2nd; **Accounts** made up, 3rd; **Clients pay** brokers and deliver securities, 4th; **Brokers pay** clients, 5th, and **Brokers deliver** securities to clients, 6th. The fortnightly settlement commences on the 15th of the month and finishes on the 20th, and is conducted after the manner already described, omitting the Rente day. Consult Burdett's "Official Intelligence," '90.

Stock Exchange Law in '89. A case interesting to dealers in stocks and shares was that of *Hogan v. Shaw* (Court of Appeal, June 27th). The plaintiff had entered into a contract with the defendant to buy certain shares at 16½, and had deposited £50, or £1 per share, as "cover" Mr. Shaw reserved his right to close the stock without notice when the cover was exhausted. A few days later the shares fell to 15½, and the cover was exhausted; but Mr. Shaw was not aware of it till next morning, when he telegraphed to the plaintiff that the cover had run off, and that the transaction was closed. It was admitted that before the telegram was despatched the shares had slightly recovered, so as to bring them within the cover, and the plaintiff consequently brought this action for non-delivery of the shares, the damages being agreed upon as £60, or a profit of £10 on the £50 deposited. The contention of the defendant was that as the cover had been exhausted the transaction had automatically closed, but the Court of Appeal held that, as the defendant had not exercised his right to close the transaction, the verdict of the jury in favour of the plaintiff must be sustained. Another stock case was that of *Medland v. the Universal Stock Exchange Co.* (Chancery Division, Oct. 31st.). The plaintiff, a London clergyman, about four years ago took ten shares in the defendant company, and subsequently deposited the shares as cover for certain speculations. These turned out badly, and at a later period over 600 shares in the Aerated Bread Co., and the deeds of two leasehold houses, which had also been deposited as cover, were lost to the plaintiff. He now sued the company for £4000, on the ground that no sales of stocks or shares had really taken place. Mr. Justice Kekewich found for the defendants, on the ground that the plaintiff was aware that the transactions were fictitious, and that consequently he had not substantiated the charge of fraud. The defendants were, however, ordered to bear their own costs.

Stokes, Sir George Gabriel, Bart. LL.D. F.R.S., b. 1819, at Skreen, co. Sligo. Educated at Pembroke Coll., Cambridge, where he graduated B.A. (1841) as senior wrangler, and was elected to a fellowship. Appointed Lucasian Professor of Mathematics (1849). Awarded the Rumford medal by the Royal Society, in recognition of his services to the cause of science by his discovery of the change in the refrangibility of light (1852). Sir G. Stokes, who was chosen one of the secretaries to the Royal Society (1854), was president of the British Association at Exeter (1869), and is President of the Royal Society, has contributed to the Transactions of several learned societies, and has delivered professorial lectures at Cambridge, and at the Museum of Practical Geology in London. Sir G. Stokes is Hon. LL.D. and D.Sc. Cambridge, D.C.L. Oxford, and LL.D. Edinburgh, Dublin,

and Aberdeen, and hon. corresponding member of various scientific societies. He was elected Conservative M.P. for Cambridge University '87, in the place of Mr. Beresford-Hope, deceased. Created a baronet of the United Kingdom, '89. He has recently retired from the Committee on Solar Physics. Sir G. G. S. spoke on "Literature of the Day and its Attitude towards Christianity" at the Church Congress (Oct. '89) at Cardiff.

Stone, Marcus, Mr., R.A., is the son of the late Frank Stone, A.R.A., and was born in 1840. He has illustrated various books and magazines, and achieved his earliest success in 1863 with his "From Waterloo to Paris," a picture representing Napoleon in a peasant's cottage. Several of his subsequent domestic pictures have been engraved, and one or two of them purchased by the Royal Academy under the Chantry bequest. Mr. Stone, who has occasionally painted landscapes and water-colour pictures, was made an A.R.A. ('77), R.A. ('87). He exhibited "The First Love Letter" at the Royal Academy '89.

Storting, the name by which the Norwegian House of Representatives is known. It is composed of 114 members, of whom 38 represent urban, and 76 rural electoral districts. The members are paid 13s. 4d. per diem during the parliamentary session, and travelling expenses to and from their homes. The Storting is elected to serve for three years, and its sessions are annual. It meets on the first Monday in February, of each year, in Christiania. The sessions are restricted by the Act of Constitution to two months, but the monarch has the right of extending the session, upon petition, and cause being shown, for such further term as the business of the country may require.

Stoughton, Rev. John, D.D., author and nonconformist divine, was b. 1807. Educated at Highbury Coll., and Univer. Coll., London. After holding successive churches at Windsor (1832) and Kensington (1843), he became (1875) Professor of Historical Theology in New Coll., London; D.D. Edinburgh (1869). Dr. Stoughton is the author of numerous works, among which are the "Ecclesiastical History of England" (6 vols.), "Ages of Christendom," "Progress of Divine Revelation," "Golden Legends," etc.

Straits Settlements. A British Crown colony in the Malay Peninsula. It derives its name from the straits which separate the Malay peninsula from Sumatra, and which form the great trade route between India and China. It consists of the island of Singapore, the town and province of Malacca, the territory and islands of the Dindings, the island of Penang, and Wellesley. The native states of Perak, Selangor, and Sungei Ujong, are controlled by the Colonial Government. The Cocos or Keeling Islands are a distant dependency. The whole area of the actual colony is about 1,472 sq. m., pop. 559,000. The capital of the colony and seat of government is Singapore. Singapore is an island at the southern extremity of the Malay Peninsula, area 206 sq. m., pop. 155,000. It is hilly and forested, fertile, and not unhealthy for Europeans. Chief local products are pepper and gambier. The varied fauna includes tigers. The city of Singapore is a great commercial centre for the East. It has a commodious harbour, now being strongly fortified. It is the headquarters of H.M. military and naval forces in these regions. The usual garrison consists of

a battalion of infantry and two batteries of artillery.—**Penang**, or **Prince of Wales Island**, lies 300 miles north of Singapore, and about two miles off the coast of Province Wellesley. Its area is 107 sq. m., pop. 90,951. The port and capital is called **Georgetown**, a well-built city. The island is partly level and fertile, partly hilly. There is a famous waterfall in it, and the scenery is charming. Sugar-cane, rice, and cocoanut are the chief crops. The harbour is a good one, and there is large commerce. The Governor of the colony appoints a Resident Councillor to control administration.—**Province Wellesley** is politically one with Penang. It stretches 45 miles along the coast of the mainland. Area 500 sq. m., pop. 97,324. It is level, well watered, fertile, and highly cultivated. Sugar-cane, rice, and tapioca are the staple productions.—**Malacca** is a town and territory 240 miles south of Penang. Its coast, rocky and barren, extends 42 miles. The area is 659 sq. m., pop. 93,579. The town is one of the oldest European settlements in the East, having been acquired by the Portuguese in 1511. The Dutch captured it from them in 1641. It was taken by England in 1795, afterwards restored, and in 1824 ceded by the Dutch in exchange for English settlements in Sumatra. Its trade and importance are now slight. The interior is mountainous and picturesque, with fertile valleys. Tapioca is the chief local product. It is ruled by a Resident Councillor, subject to the Governor of the colony.—**The Dindings** consist of the island of Pulau Pangkor and a small strip of territory on the mainland, about 80 miles south of Penang, and politically annexed, recently, to that settlement.—**Cocos Islands** or **Keeling Islands** are a small coral group lying some 700 miles south-west of Java. Area 9 sq. m., pop. 400. They produce cocoanuts, and are inhabited by an English family and Malay labourers. They are now included in the government of the Straits Settlements.—**Perak, Selangor, and Sungai Ujong**, the protected states, are practically dependencies of the colony. They lie along the coast between Penang and Malacca, stretching inland to the mountain backbone of the Peninsula. Since the war of 1876 each of them has been controlled by a Resident, appointed by the Governor of the Straits. English officials hold many posts under the native governments, and English officers control the native military police. These countries are flourishing and progressive. Roads and railways are constructed or being made, and the rich resources of mountain, valley, and lowland, well watered and splendidly wooded, are being developed. Tin is produced in large quantities, while tapioca, pepper, rice, sugar, coffee, cacao and cinchona are being successfully cultivated. **Perak** has an area of 17,949 sq. m., pop. 179,590; a revenue of £327,435, and has liquidated all debts. Its port is Port Weld, and capital Kinta. **Selangor** has an area of 3000 sq. m., pop. 120,000, revenue £206,740. Its capital is Kuala Lumpur. **Sungai Ujong** has an area of 660 sq. m., pop. 14,000, revenue £25,353. Other native states in the Peninsula are more or less under British influence.—**The Straits Settlements** form a Crown colony. The Governor is assisted by Executive and Legislative Councils. For financial statistics see **BRITISH EMPIRE**, etc. (table). **Exports** consist of products already mentioned, together with tin, spices, sugar, hides and horns, rattans, gutta-percha, caoutchouc, gums, oils, drugs, and dye-stuffs.

All the ports are free. The currency is the dollar (3s. 4d.) and cents of it. Malays and Chinese are the most numerous of the population, Klings come next, then Indians and Europeans.—The history of the colony has been similar to that of the Indian Empire. Penang was our first settlement (1795), Malacca finally ours in 1825, and Singapore in 1824. Gradual enlargement of British territory has followed, while the native states are passing into the same position as those of the Indian Empire. The colony is well ordered, extremely valuable, and its development proceeding rapidly. Consult "Singapore and Straits Directory"; Miss Bird's "Golden Chersonese," Cameron's "Our Tropical Possessions," Keane's "Asia," McNair's "Sarong and Kris," Zehden's "Commercial Geography," etc.

Street Improvements. See **COUNTY COUNCILS**, sect. 3.

"Strike of the Rolls." See **ROLL OF SOLICITORS**.

Strikes in London during '89.—The Dock Labourers. Prior to giving a summary of the great riverside strike of '89, a few particulars concerning the dock accommodation of the Port of London will be of service. The chief London docks are in the hands of the Joint Committee of Directors formed after the amalgamation of the two great companies, the East and West India and the London and St. Katharine. Beyond these docks there are those of the Surrey Commercial Dock Company, and of the Millwall Dock Company, devoted to special trades. In addition to, and to a large extent competing with, the docks proper, are the wharves that line both sides of the river. Of late years the capital employed in the docks has not yielded a good return to the investor, owing to the excessive competition between the East and West India and the London and St. Katharine Companies. The docks of the latter Company are: the St. Katharine, covering 13 acres of land and 10 of water space; the London, 60 acres land and 40 water, with three entrances from the Thames; the Royal Victoria, 110 acres land and 90 acres water; and the Royal Albert—an easterly prolongation of the Victoria, and built specially to admit not only the largest sea-going merchant vessels afloat, but any ironclads of the British Navy. The docks of the East and West India Company are the East India Import, with water area of 18 acres and length of quays 3,400 feet; the East India Export, with 8 acres water and 2,400 feet quays; the connecting East India Basin, with 6 acres water; the West India Import, with 30 acres water and 6,100 feet quays; the West India Export, with 24 acres water and 5,900 feet quays; the connecting Blackwall Basin, with 62 acres water area; the Limehouse Basin, with 14 acres; the South West India Dock, with 267 acres water and 5,900 feet quays, and a basin with 54 acres water; the London Dock, with 14,150 feet quays; and the Junction Dock, connecting Blackwall and South West India Basins. In addition to these are the recently constructed Tilbury Docks, claimed to be the finest in the world, and which vessels can enter or leave at any state of the tide. It is to the docks of these two great companies that the majority of the vessels that use the port of London come. The dock system of the Surrey Commercial Dock Company is used for grain and timber, and with the Millwall Company's dock occupies a relatively subsidiary position, in the whole trade of the port, to the East and West India and the London

and St. Katharine Companies' docks. The magnitude of the business done in the docks can be appreciated from the fact that in '88 79,000 vessels entered and cleared from that port, or 216 for every day in the year, and the goods carried being estimated at 226 millions. Before the amalgamation of the two chief companies there had gone on for years a fierce war of rates, each company endeavouring to crush its opponent. Thus the Royal Albert Dock was built quite as much to crush the East and West India Company by attracting vessels from its docks, as to afford dock accommodation equal to the requirements of advanced shipbuilding and the swifter necessities of modern business. The East and West India Company retaliated by the construction of Tilbury, which it was expected would empty the docks of its rival. But the shipowners have not taken advantage of them; and it is calculated that between the Albert and the Tilbury Docks about £7,000,000 of capital has been unproductively spent in providing accommodation in advance of the present necessities of the port. After the opening of Tilbury the war of rates between the two companies became much fiercer, until the East and West India Company could no longer pay a dividend, and the London and St. Katharine Company was in a position almost as disastrous. Excessive competition and reckless capital expenditure had brought both companies into financial straits. Finally, in '87, Parliamentary power was obtained for the amalgamation of the two companies under a working agreement and their management by a Joint Committee. The shipowners have all along objected to the monopoly thus created; and notwithstanding that London is admittedly over-docked, threaten the construction of new docks, to be called the **Imperial Docks**; but at the time of writing no Bill has been proceeded with in Parliament. It will be seen that during the war of rates it was vitally important for each company to keep down its labour bill; and that, hampered as the companies were with financial difficulties, amalgamation did not carry with it improved pay to the men. Dock labour was the subject of such evidence before the select committee of the House of Lords on the **Sweating System**; and for some time past there had been growing dissatisfaction among the men at the continuance of the **Contract System**. The strike commenced on Aug. 15th, '89, 2500 men in the South West India Dock demanding 6d. per hour instead of 5d., and 8d. per hour overtime instead of 6d.; also not less than four hours' engagement, and the abolition of the contract system. The Joint Committee attached little importance to the movement; other strikes had fizzled out at the docks before, and they anticipated a speedy collapse of this. But they miscalculated the strength of the disaffection, for by Aug. 20th all classes of men were turning out—casual labourers, coal and corn porters, stevedores, hydraulic machine men, firemen, and donkey men. A great meeting was held outside the dock gates, and over 20,000 men marched through the city. Public sympathy was at the outset altogether with the men, and this was strengthened when it was stated in the press that the Joint Committee were making efforts to fill the places of the strikers with Belgian labourers. When this became known, the strikers despatched bodies of their number to picket every dock, and bring out the men who had not struck, and persuade all inclined

to work not to do so. On the 21st the movement spread to the wharves, to the Surrey Commercial Docks and to the Millwall Docks. On that day the lightermen and watermen also resolved to come out in support of the strikers, and did so. The Companies' advertisements for hands were not well responded to, and by the 23rd practically all the men were cleared out of whole of the docks and wharves, and work at the docks was almost at a standstill. The shipowners became alarmed, and met at the offices of the Peninsular and Oriental S.S. Company, under the chairmanship of Mr. Thomas Sutherland, M.P., to consider the situation. On Sunday, the 25th, there was an enthusiastic demonstration in Hyde Park; the several strike committees were amalgamated into the "**United Dock Labourers' Strike Committee**," with headquarters at the "Wade's Arms," Poplar. The day following large numbers of carmen and coal porters came out; the strike grew with astonishing rapidity, and the numbers of the men were estimated at over 100,000. Shipping was paralysed; riverside industries were threatened with stoppage for want of coal; and a general revolt of labour in London seemed imminent, but was checked by a manifesto issued by the Strike Committee strongly deprecating "unorganised workmen not directly connected with dock work coming out on strike," and declared that nothing would be paid out of the strike fund that had been started to men engaged in any occupation who came out on strike without authority of the Committee. On the 27th the wharfingers met at Cannon Street, and the cause of the men was espoused by Mr. Lafone (Butler's Wharf), who urged the appointment of a committee of dockmen, wharfingers and granary-keepers, to negotiate a settlement. The strike leaders met the Directors at the Dock House, and the latter declined to agree to their proposals. On the same day a deputation of brokers representing the industries of the port, and also a deputation of M.P.'s, waited on the Joint Committee and suggested arbitration, but without result. The Committee, however, decided not to employ foreign labour. In the House of Commons in the evening the Home Secretary, in reply to Sir R. Fowler, said he "was not prepared to admit that there had been anything that might properly be described as an organised system of intimidation," though there was "a considerable amount of pressure exercised, which in some cases passed into acts of intimidation" of a nature very difficult for the police to deal with. He urged the parties "to adjust their differences by some rational and satisfactory means." This answer gives the keynote to the subsequent conduct of the Police, whose inactivity was complained of by the Dock Companies from the first. The shipowners and wharfingers made a joint appeal by advertisement to the men lately in their employment to return to work, but without avail. The Joint Committee reconsidered the men's terms, and under the pressure of the shipowners and wharfingers conceded the point that men should be taken on for not less than four hours at a pay of 8s., promised the conversion of contract work into piece work at a minimum pay of 6d. per hour and 2d. overtime, "as far and as soon as practicable." The "surplus" was to be divided, the hours of overtime to be reckoned from 8 p.m. to 8 a.m., and influence to be used with the Government to obtain a prolongation

of Customs hours, thereby extending the time during which pay might be earned. But the Committee insisted upon the *5d.* rate with *6d.* per hour overtime for all labour not piecework. These concessions were at once rejected by the strikers, who considered the *6d.* rate with *8d.* overtime vital to their cause, and the terms in which the concessions on other points were made purposely vague and inherently valueless. The Strike Committee issued a manifesto calling out all London workmen. This was universally condemned, and public sympathy with the strikers underwent a strong revulsion. Cardinal Manning (*q.v.*) and Alderman Sir Henry Luak had an audience with the Dock Committee, and urged a settlement of the dispute. For the moment it seemed that the strike would break down, for relief funds were running low, the manifesto stopped the flow of London contributions, and the Dock Companies asserted that the strikers were returning to their work. On the other hand £500 was cabled the strikers from the wharf labourers and seamen of Brisbane, the London Society of Compositors voted £500, and the movement was reinstated in public estimation by the prompt withdrawal of the general strike manifesto, which was on all hands denounced as a gigantic blunder, and the substitution of a manifesto of adherence to the original demands. On the 31st £500 was cabled from Sydney from the wharf labourers' Union there, and the issue of relief tickets to the strikers, which had been temporarily suspended, was resumed. Meanwhile the continued entrance of ships into the port blocked the docks with vessels whose cargoes could not be discharged, and great interference was caused to trade. A deputation of shipowners, headed by Sir Donald Currie, waited upon the Joint Committee and demanded the exercise of the right to discharge their own vessels, seeing that the Dock Companies still refused to make such arrangements with the men as would enable them to do so. They (the shipowners) were willing to pay the wages demanded. Mr. C. M. Norwood, on behalf of the Committee, declined to allow the shipowners to unload their vessels themselves, and enunciated the view that the strike was "no longer a dock strike, but a blow aimed at capital and general employment." The shipowners thereupon met at the P. and O. offices, and decided to hold aloof from the contestants. Strong pickets were kept at the Dock gates; the men held well together; the Dock Companies succeeded in retaining only an insignificant amount of labour within the docks; and the situation continued unchanged until Sept. 5th, when Mr. Lafone induced a number of wharfingers to concede to the strikers the abandonment of the contract system in favour of piecework, a minimum pay of *6d.* per hour and *8d.* overtime; the share of the surplus to be equally divided between foremen and men; the same rate for casual work; overtime to be counted from 6 p.m. to 6 a.m. or 8 p.m. to 8 a.m. The Strike Committee instructed the men to return to work at the places where these conditions were fulfilled. They did so, and this paved the way for the end of the struggle. On Sept. 6th, the Dock Companies and the strikers continuing irreconcilable, the Lord Mayor (Mr. James Whitehead) invited Sir John Lubbock (the President of the London Chamber of Commerce), the Bishop of London, Cardinal Manning, Lord Brassey, Alderman Luak, and Mr. Sydney Suxton,

M.P., to confer with him as to the best means by which to end the dispute; and they resolved to recommend the men and the Companies to agree to the men's terms coming into operation on Jan. 1st, '90. Messrs. Burns (*q.v.*), Tillett (*q.v.*), Champion, and Mann were understood at the time to have agreed to recommend the strikers to accept this proposal. The Lord Mayor, Cardinal Manning, and the Bishop of London had a long interview with the Joint Committee; and on Saturday, Sept. 7th, Mr. Norwood wrote to the mediators accepting the terms as from Jan. 1st on condition that the strike should at once terminate, and that all labourers who had been at work should be unmolested. Messrs. Burns and Tillett promised that this arrangement should have their support, and left the Mansion House to communicate it to the Strike Committee. But late at night, to the great disappointment of the public, who considered the strike at an end, Messrs. Burns and Champion sent to the Lord Mayor a letter saying that, pending a definite and official answer from the lightermen and others (the lightermen having developed a strike of their own on the question of long hours), it was their opinion that the men would not accept the arrangement. The Strike Committee issued another manifesto rejecting the date of Jan. 1st for the commencement of the new terms, and continuing the strike until the lightermen had obtained their demands. The Lord Mayor, Cardinal Manning, and the Bishop of London at once issued to the press a letter giving the history of the negotiations, and containing the following paragraph:—"We are now at a loss to understand how Messrs. Burns and Tillett can have appended their names to a manifesto which is a repudiation of what we all understood they had agreed to; and should they persist in continuing the strike, we feel that they will justly forfeit the sympathy which has hitherto been shown to them and their cause." The next day (Sunday, Sept. 8th) there was an enthusiastic demonstration in Hyde Park, the men strongly supporting the action of their leaders, who, notwithstanding the severity of the above passage and the consequent loss of public sympathy, continued the strike. On the 9th the day's contributions included £4,000 from Melbourne, £1,200 from Adelaide, and £700 from Broken Hill. The deadlock continued till Friday, Sept. 13th, though by that date the majority of the wharves had conceded the men's terms. Then Cardinal Manning and the Lord Mayor resumed negotiations, and as a result the Mansion House Committee of Conciliation, as it was called, issued a manifesto stating that there was practically no difference remaining. The lightermen and their masters agreed to a payment of 6s. for twelve hours' work, one job to constitute a night's work, and the submission of all other questions to an equal number of masters and men. Finally, on Saturday, Sept. 14th, to the inexpressible relief of the public, the following agreement was issued:—"1. The *5d.* rate per hour be raised in the case of all labour not piecework, on and after 4th November next, to *6d.* per hour and *8d.* per hour overtime, no pay for meal times. 2. Men called in not to be discharged with less than 2s. pay except in regard to special short engagements in the afternoon. 3. Present contract work to be converted not later than 4th November into piecework, under which the men will be paid not less than *6d.* per hour, with *8d.* per hour overtime, and the

surplus, if any, to be equally divided between them, all payments being made to the men under the supervision of the Dock officials.

4. The hours of overtime at the docks and up-town warehouses shall be from 6 p.m. to 6 a.m.

5. The existing strike to be terminated, and all the men connected with the dock, wharf, or river work to return to work forthwith.

6. The strikers and their leaders to unreservedly undertake that all labourers who have been at work during the strike shall be unmolested and treated as fellow-labourers by those who have been out on strike.

7. In employing fresh men after the strike is ended, the Directors will make no difference between those who have, and those who have not, taken part in it; and will not directly, or indirectly, show resentment to any of the men who have participated in the strike." This document was signed as follows:—"The above terms of arrangement have been fully explained by us, and discussed with, the leaders of the strike, and are accepted by them.—James Whitehead (Lord Mayor), Henry E. Cardinal Manning, Sydney Buxton." "On behalf of the London and India Docks Joint Committee, and by their authority, I accept the above terms of arrangement.—Rodolph A. Hankey." "On behalf of the Millwall Company.—G. R. Birt." "On behalf of the Surrey Commercial Dock Company.—John H. Howitt, Deputy-Chairman." "On behalf of the men on strike, and by their authority we accept the above terms of arrangement.—Benjamin Tillet, John Burns, Tom Mann, Jas. Toomey, T. M. Walsh, Robert Hes, Jas. Sullivan, Chas. Havelock, Hugh Brown, John Regan." On Sunday, Sept. 15th, there was a great demonstration in Hyde Park, when the following resolution was put and carried:—"That this mass meeting, assembled to celebrate the success of the great strike of '89, hereby renders hearty thanks to those friends who assisted in bringing the negotiations to a successful issue, also to the gallant men of Australia, whose aid contributed so materially to success, and also pledges itself to the work of organisation and federation of labour." The next morning work was resumed in the Docks, and though at one dock there was a violation of the agreement to work peaceably with the non-strikers, things speedily quieted. The strike had been remarkable for the orderliness of the men, the prudent advice and extraordinary personal influence of the leaders, especially of Messrs. John Burns and Benjamin Tillet, for the evidence it gave of the solidarity of all classes of labour on the Thames, and for the public sympathy it called forth. There were a few charges of intimidation, but none was serious enough to justify a magis' rate in committing a prisoner for trial. The police acted throughout with great tact, but the Joint Committee complained frequently of their inactivity, and had a sharp controversy with Mr. Munro, the Chief Commissioner, on the subject.—Following upon the dock strikes came a number of *miner strikes*, the demand underlying them being for the abolition of the sweating system and the reduction of excessive hours of labour. The most important, perhaps, was that of the tailors, in whose business the sweating system prevailed to a large extent; and it is noticeable that this strike was led by a Jew, Lewis Lyons, and that the vast majority of the men who took part in it were foreign Jews, of the class which formed the subject of the Parliamentary inquiry into foreign pauper immigration. The demands

of the men were as follows: (1) The hours of labour to be from eight o'clock in the morning till eight in the evening, with one hour for dinner and half an hour for tea; (2) all meals to be had off the work premises; (3) only four hours overtime to be worked in a week; (4) not more than two hours overtime to be worked in any one day; (5) the first two hours overtime to be paid for at the ordinary rate, and the second two hours at the rate of time and a half; (6) that the hour system be not introduced. A strong union was formed, and the men were organised with surprising rapidity. Numberless meetings were held, and there were daily processions through the streets. The strike lasted several weeks, and ended in a virtual surrender by the masters. It was agreed to submit the dispute to arbitration, and largely by the efforts of Lord Rothschild, the Bishop of Bedford, the Rev. J. H. Scott, Mr. Samuel Montague, Mr. Wm. Morris, and others, a settlement conceding the above points was arrived at. At the time of writing the workers threaten to come out again on strike, alleging bad faith on the part of the masters in carrying out the agreement. Throughout October and November the labour market was very much disturbed, the tram-men, bus-men, bakers, postmen, and railway servants joining new unions and taking up an aggressive attitude. The tramway employees had been agitating for shorter hours throughout the year, but it was not until after the dockers' victory that the movement became serious and attracted public attention. The chairman of the union was the Rev. F. Barclay, and its objects had the sympathy of the public from the first. Owing to the long hours of work, the men had to hold their meetings after midnight, and at one of these the Earl of Rosebery presided and made a vigorous speech in support of the men's demands, announcing that he "had not thought it alien from his duty as Chairman of the new Democratic London County Council" to attend the meeting. This action of his Lordship caused much discussion in the press, and did much to advance the agitation, which soon afterwards became too strong for the companies—some of which paid very high dividends while working their men, it was alleged, from 13 to 16 hours a day—to withstand. The men complained not only of excessive hours for scanty wages, but of tyrannical regulations and fines. Backed up as the movement was by public opinion, the companies one after the other met the men in a conciliatory spirit, and endeavoured to so arrange the journeys as to limit the hours of working to twelve, and also to relax such regulations as were in the nature of vexatious oppression of labour. By timely concessions of this character a strike was therefore averted.—Side by side with this agitation was that for the reduction of the hours of bus-men. The tram-men's union included the bus-men, who made the same complaints as to excessive hours and tyrannical rules as the tram employees. Midnight meetings of bus-men were held, at which Sir Charles Russell, M.P., and other public men figured as supporters of the men, and in the second week in November an imminent strike was averted by the London Road Car Co. agreeing to limit the hours of work to twelve, and make other concessions, provided competitive companies followed suit. At the time of writing the other companies had not given their decision, and neither had the men decided whether there

should be a general strike to force them to do so.—The agitation amongst the postmen threatened in October to develop into a serious strike; but the labour leaders who had carried the dock strike to a successful termination were understood to have deprecated a turn out, and to have advised the newly-formed union of Post Office employes to confine their movement for the present to the establishment of the right to openly ventilate their grievances—a right denied them by departmental rule. This advice was followed, and in November the agitation had dropped from public knowledge.—Following upon these labour disturbances came the demands of the working bakers of the Metropolis for a limitation of the hours of work to ten. Here, again, the demands of the men appeared reasonable to the public. During a few weeks' controversy on the subject the men were organised, and the public instructed as to their grievances; and before the day fixed for a general strike (Nov. 18th), the majority of the masters had given way, and though a minority held out after that date, the limit of ten hours was generally conceded.—In addition to these movements there were several subsidiary agitations. Throughout the autumn a strike continued at Silvertown among the employes of a gutta-percha and India-rubber company having works there, and was not concluded at the time of writing. A new union was also started among the railway servants, and in the course of a few weeks reached a membership of over 10,000—a number that is being rapidly added to week by week. The object of this union is to secure shorter hours, and to be a real fighting force upon questions affecting railway labour. The strike movement manifested itself in various other branches of labour hitherto considered to be incapable of organisation, and it is noticeable that the leaders of every new phase of labour discontent were the men who had headed the dock strike. The subsequent agitations were, in fact, the outcome of the programme for the federation of London labour enunciated by Mr. John Burns at the Hyde Park meeting, at which the resolution given in our account of the dock strike was passed. At the time of writing the Social Democratic section of the labour leaders of the Metropolis is actively engaged in forming new unions, and otherwise organising the unskilled labour of London; and the labour question has for the time being dwarfed every other political subject.—One of the outcomes of the great Dock Strike was the formation of a Women's Union in October. A crowded meeting was held at the Mile End Assembly Rooms, at which the Bishop of Bedford presided, and at which the new movement was formally inaugurated. It was stated that the object of the Union was to enable women of the working classes to combine for mutual protection against starvation wages and excessive hours. Speeches in support of the principle of combination among women were made by Lady Sandhurst and Mr. John Burns, and the meeting excited a good deal of interest and discussion in the press. At the time of writing local meetings were being held for the organisation of the Union, which is being freely joined by those in whose interest it was conceived. The question of strikes in America is dealt with in the annual report of the Commissioner of Labour.

Subpoena—literally "under penalty" (Lat. *sub poena*), the name of a writ requiring some-

thing to be done under a penalty for neglect. Subpoenas are of two kinds: the *subpoena ad testificandum*, compelling a witness to give evidence in an action, and the *subpoena duces tecum*, compelling a person who has in his possession documents relevant to the issue of an action to appear and produce them in court. The penalty named in the writ is one of £100.

Suez Canal. (For history of the Canal see previous eds.). A telegram dated Budapest, March 18th, '89, stated that the Committee on Communications agreed to the Suez Canal Convention. The annual meeting of the Company was held in Paris on June 5th, M. de Lesseps presiding. The report stated that the receipts for '88 were 67,000,000 fr., and the expenses 7,743,000 fr., or only 11½ per cent., although including 400,000 fr. for the working of the night service. The net dividend, including the sum paid on account, was 84 fr., and the reserve, being already above the obligatory amount, was not increased, but 300,000 fr. was allotted to the new works. No less than 183,000 passengers went through the Canal during the year. According to a paper read by M. de Lesseps before the Paris Academy of Sciences on the progress of the Canal in '88, it appeared that for a distance of about 15 kilometres from Port Said vessels had ample space to pass each other, while the depth would be increased to 8'50, and then to 9 metres. All the sidings had been widened to 100 metres between Suez and Port Said, thus allowing six large vessels to be shunted at the same time in all of them. Ships using the electric light were now able to traverse the Canal in about 20 hours, instead of from 35 to 40 hours. In '88 the Canal was traversed by 3,440 vessels of 6,640,832 tons (2,625 of 5,223,254 tons, British), yielding to the Company 65,102,000 fr. in tolls, etc. In May return of the traffic in '88 was laid on the table of the House of Commons, from which it appeared that the increase in net tonnage over '87 was 737,810 tons, and in dues 6,969,303 fr. The percentage of the tonnage of Great Britain was 78·65. France, Italy, and Germany followed in the order named.

Sukkur Bridge. This bridge, which was opened in the spring of '89, was built in connection with the Indus Valley Railway, and crosses the Indus. Where the river is broad, and flows between high banks, with Rohri on the left or Indian side, and Sukkur on the other, is an island called Bukkur. A bridge from Sukkur to Bukkur, consisting of three spans, the longest of which is 271 feet, and composed of ordinary girders, was completed in March '85. Another and more remarkable structure from Bukkur to Rohri, to complete the crossing of the Indus, is the one under notice, and generally spoken of as the Sukkur Bridge. It was made on the cantilever principle. The breadth is 750 feet, from each land side projects a cantilever of 320 feet, and the connecting link is a girder 200 feet in length. The bridge was designed by Sir Alexander Rendel, was constructed by Messrs. Westwood and Ballie, of Poplar, sent out in pieces, and fitted on the spot within sixteen months of its arrival in India, under the direction of Mr. F. E. Robertson, superintending engineer.

Sullivan, Sir Arthur Seymour, was b. in London, 1842. His father was a military bandmaster. Sullivan, who was a choir-boy at the Chapel Royal, gained the "Mendelssohn Scholarship" at the Royal Academy of Music, in 1856, and there completed his musical education. He went to Leipzig from 1858 to 1861. His music to Shakespeare's "Tempest" at once attracted public favour on his return in 1862. Constantly writing cantatas ("Kenilworth," 1864, etc.), oratorios ("Prodigal Son," 1869; "Light of the World," 1873), anthems, songs, etc., he yet remained without any specially extensive popularity, till he hit upon a vein of burlesque operetta, which he produced in conjunction with W. S. Gilbert, who wrote the librettos. They are uproariously funny, yet elegantly written, and are as yet unique. The first was "Trial by Jury" (1875), followed by "The Sorcerer" (1877), running for 175 nights; "H.M.S. Pinafore" (1878), for 700 consecutive nights, and having probably the greatest success in England and in the United States of any work of the kind—revived at the Savoy '87-88; "Pirates of Penzance" (1880); "Patience" (1881); "Iolanthe" (1882); "Princess Ida" (1884); "Hikado" (1885), revived in '88; "Ruddigore" (1887); and "The Yeomen of the Guard" (1888). For the Leeds Festival, in Oct. 1886, he set to music an arrangement, by Mr. J. Bennett, of Longfellow's "Golden Legend," which must rank among his finest compositions. He conducted at the performance of a selection from his works at the Leeds Festival last year ('89). The selections included "The Golden Legend" and his chorus to Mr. Irving's "Macbeth." Sir A. Sullivan received the honour of knighthood (1883), and the Legion of Honour (1878). He is D.C.L. (Oxon. 1876), LL.D. (Camb. 1879), and is one of the Council of the Royal College of Music.

Sulu. An independent native state in Borneo (q.v.).

Sulu Islands. A group of the Malay Archipelago, area 950 sq. m., pop. 75,000. Officially a Spanish possession, in reality under various native rulers, who are much given to piracy. The Sulu Islands produce tortoise-shell, trepang, edible birds' nests, pearls, and pearl-shells.

Sumatra. A large island of the Asiatic Archipelago. Area about 170,744 sq. m.; pop. (of Dutch possessions) about 2,750,000. The Dutch supremacy is now effectual all round the coast, but much of the interior still remains practically unpossessed. Achéen (Atjeh) was made a Dutch government in 1878. Chief Dutch ports are Padang and Benkulen. See JAVA, BORNEO, etc.

"Sun, The" (Saturday and Sunday), estab. Easter Sunday '89. A high-class Sunday Radical newspaper, containing all the latest home and foreign news, and special political, financial, sporting, and dramatic articles. Offices: 26, Catherine Street, Strand, W.C.

Sunday Closing Acts. Acts of this name have been enacted at different times for Ireland and Wales. They provide for the total closing on Sunday of houses for the retail of intoxicating liquor. Such liquor, however, may be retailed to persons living in the house or to bona-fide travellers. The law in Wales is permanent, but in Ireland is renewed from year to year. In Ireland the Dublin Police District, Belfast, Cork, Limerick, and Waterford are excepted from the operation of the

Act. But in these places houses for the retail of intoxicating liquor may remain open on Sunday only from a p.m. to 7 p.m. Bills to apply the principle of Sunday Closing to single English counties have been introduced, but none have become law. The Scotch law of licensing contains provisions to the same effect as those of the Sunday Closing Acts so called. See Session '88, sects. 26, 41, 70.

Sunday Closing Bills. See Session, sects. 2, 62, and 115.

Sunday School Union. This Union was founded in 1803, and its objects are to stimulate and encourage Sunday-school teachers, at home and abroad, to greater exertions in the promotion of religious education; by mutual communication to improve the methods of instruction; to ascertain those situations where Sunday-schools are most needed, and promote their establishment; to supply the books and stationery suited for Sunday-schools at reduced prices. *Pres't* at '90, Edward Rawlings. *Chairman*, F. F. Belsey. *Secs.*, F. J. Hartley, F. S. J. E. Tresidder, E. Towers, J. Edmunds, W. H. Millar, and C. Waters. *Organ*, *Sunday School Chronicle*. *Editor*, G. B. Clarke.

"Sunday Magazine, The" (founded Oct. '64). First editor, Dr. Guthrie, whose aim was to provide bright, cheerful, and inspiring reading for "the best of days." Assisted by an excellent staff of contributors, the *S. M.* attained great popularity. Under its present editor (the Rev. B. Waugh) it is continued successfully on the same lines, a new and very attractive feature being its regular "Sunday Evenings with the Children." Another feature of the *S. M.* is its illustrations. Offices, 15 and 16, Tavistock St., Covent Garden, W.C.

Sungei Ujong. A Malay state under British protection. See STRAITS SETTLEMENTS.

Supply. The sums necessary to defray the charges for the Army, Navy, Civil Services, Customs, Post Office, etc., are voted annually by the House of Commons in Committee of Supply. The sums required are granted for the financial year ending on March 31st; and although votes on account are sometimes granted early in the session for parts of the year, the whole sum voted during the session for any service is for the exact period of twelve months. The Estimates, framed by the respective departments and approved by the Treasury, are laid upon the table soon after the commencement of each session, and any items which may be subsequently found insufficient, or any unforeseen charges, are provided by the Supplementary Estimates. *Votes of credit* for military and naval expenditure of an urgent character are also voted in Committee of Supply. On the resolution embodying the vote for the number of men for the army is founded the Army (Annual) Bill, which provides, during twelve months and no more, for the discipline and regulations of that force. The system of granting supplies for only twelve months involves a meeting of Parliament every year, and provides at once a safeguard against the permanence of the military establishment and a means of continuing it periodically in such strength as the House itself may deem to be necessary. A Commons committee which sat in '88 suggested that a standing committee should be appointed, to which, on the motion of the Government and by the vote of the House, certain classes of the estimates or certain votes might be referred, but no step has as yet been taken

towards the adoption of this plan. For the Civil Service estimates for '89-90 see FINANCE, NATIONAL.

Supreme Court of Judicature. The Supreme Court was formed by the consolidation of all the superior courts of the kingdom of England, excepting only the House of Lords and the Judicial Committee of the Privy Council. It replaces (a) the Courts of Common Law, the Queen's Bench, Exchequer and Common Pleas, together with the Court of Appeal known as the Court of Exchequer Chamber; (b) the Court of Chancery and the Court of Appeal in Chancery; (c) the Court of Admiralty; (d) the Court of Probate and Court for Divorce and Matrimonial Causes, which replaced the old ecclesiastical courts dealing with similar matters; (e) the London Court of Bankruptcy; (f) the Court of Common Pleas at Lancaster and the Court of Pleas at Durham. The Supreme Court replaces all these by a single court of first instance known as Her Majesty's High Court of Justice, and a single court of appeal known as Her Majesty's Court of Appeal. The High Court of Justice, again, is organised in three divisions—(a) the Queen's Bench Division, in which have been merged the Courts of Queen's Bench, Exchequer, and Common Pleas. It consists of the Lord Chief Justice of England, who is the president, and fifteen puisne judges; (b) the Chancery Division, under the presidency of the Lord Chancellor of England, and having five puisne judges; (c) the Probate, Divorce, and Admiralty Division, consisting of two judges, the senior acting as president, and the junior ranking as a puisne judge. All puisne judges appointed since the foundation of the Supreme Court bear the same title and receive the same salary. Her Majesty's Court of Appeal consists of the Lord Chancellor as president, the Lord Chief Justice, president of the Probate Division, and Master of the Rolls, who are members *ex officio*, and of five ordinary members, known as the Lords Justices. As the three dignitaries first named are usually engaged elsewhere, the working Court of Appeal commonly consists of the Master of the Rolls and the five Lords Justices. The distribution of business between the several divisions of the High Court rests on the general principle that any action may be brought in any one of them. But this rule is modified by law and practice as follows:—(a) The criminal jurisdiction of the Court is exercised solely by the judges of the Queen's Bench Division. (b) Jurisdiction over causes of the following classes is exercised solely by judges of the Chancery Division: (i.) actions for the administration of the estates of deceased persons; (ii.) actions for the dissolution of partnerships; (iii.) actions for redemption or foreclosure of mortgages; (iv.) actions for the raising of portions or other charges upon land, or the sale of land subject to any charge; (v.) actions to enforce execution of trusts; (vi.) actions for the rectification, setting aside or cancelling of written instruments; (vii.) actions to enforce specific performance of contracts; (viii.) actions for the partition or sale of real estates; (ix.) actions concerning infants and their estates. (c) Jurisdiction over all such causes as would have come before the old Courts of Admiralty, Probate, and Divorce is exclusively exercised by the judges of the Probate Division. To the above general rule there are other exceptions of less importance.

The procedure of the High Court has been formed by a process of selection and improvement out of the different forms of procedure observed by the old Courts which have been merged in it. The only differences of procedure now to be observed in the different divisions are such as have a practical value in the despatch of their different business. In all divisions every cause is as far as possible dealt with by a single judge, in whom are vested all the ordinary powers of the Court. The same forms of pleading are prescribed by the rules, although not adopted in practice by all the divisions alike. In all the divisions evidence is given by word of mouth or by affidavits, as may be most expedient. Trial by jury is becoming infrequent in all civil causes, although still most infrequent in the Chancery Division. The Court of Appeal is the same for all causes, and observes an absolutely uniform procedure, although for the more rapid despatch of business it is divided into two courts, each commonly consisting of three members. The procedure of the High Court and Court of Appeal is set out at large in the Rules of 1883. These, although irregular in form and incomplete in substance, constitute our nearest approach to a code of civil procedure. In the year preceding, the various branches of the Supreme Court were for the first time housed in a single building.

Suram Pass Tunnel. It was reported in July '89 that the piercing of the tunnel on the line of the Poti-Tiflis railway, to "replace" the Suram Pass, had just commenced. The tunnel will be nearly 2½ miles long, is to be finished in '90, and is estimated to cost £1,000,000 sterling (see ed. '88). A Caucasus newspaper, published about the middle of April '89, stated: "The works on the Suram tunnel continue to progress with rapidity. By the end of March 3500 ft. of the inner brickwork had been completed from the side of the Tsipa station, and more than 1750 ft. from that of the small town of Beglety. The heavy fall of snow had retarded the work, but fine weather having now set in, the completion of it has been taken up with renewed vigour." The Russian *Official Messenger* (*Times*, Aug. 12th) reported that the work was proceeding very rapidly. All the operations will be definitely closed from the Tsipa side about Feb. '90, and from the Beglety side by April or May. The dimensions of the Suram tunnel were described as surpassing those of all the others in Europe, the St. Gothard having 60 square metres of excavation while the Suram has 90.

Surinam. A Dutch colony in Guiana (*q.v.*), South America. Capital Paramaribo, on the Surinam river. Separated from British Guiana by the Corentyne, and from Guyenne by the Maroni. Chief products, sugar, cocoa, coffee, and cotton. The gold diggings are beginning to attract attention. Ruled by a Governor-general and officials. See COLONIES OR FOREIGN POWERS.

Surrey, County Council for. See COUNTY COUNCILS.

Sussex, County Council for. See COUNTY COUNCILS.

Sussex Fortnight, The. See TURF.

Swaz. Capital of Fij (*q.v.*)

Swaziland. A small native state in South Africa, lying between the Transvaal, Zululand, and Amatonga. Area 9,000 sq. m.; pop

50,000. It is a mountainous tract stretching along the Libombo range, with richly fertile valleys, and its mineral wealth is great, valuable fields of gold and coal being included in it. The Swazi are a section of the warlike Zulu race, and, during our campaign in the Transvaal against Sikukuni, and afterwards in Zululand, were our firm allies. At the conclusion of the war with the Transvaal Boers, their boundary was carefully delimited, and the independence of Swaziland agreed to. But with their customary contempt for treaties and disregard of native rights, the Boers ('85-6) largely encroached on Swaziland. Umbandine, king of the Swazi, has petitioned for British assistance, and the appointment of a British Resident as his adviser.—Boers threaten to absorb the country. Gold has been discovered. Affairs connected with those of Natal, Transvaal (q.v.), Delagoa Bay, Amatsongoland, Zululand.

Sweating System. See Session, sects. 28 and 138.

Sweden. A kingdom under Oscar II., of the house of Bernadotte, by charter of 1815 indissolubly united with the kingdom of Norway without prejudice to separate constitution, government, and the laws of either. If throne become vacant, the Diets of both kingdoms elect, and in default of agreement an equal number of Swede and Norse deputies make an absolute nomination. Affairs common to both kingdoms are administered by council of state, on which both nations are represented. Under the Swedish Constitution of 1809 the executive power is lodged in king, who also possesses legislative power in matters of political administration; in other respects such power is exercised jointly by the Diet, which, possesses a veto on all legislation, and the sole right of taxation. Diet consists of two chambers, the first of 139 members (elected by provinces and municipalities for nine years), the second of 216 members (1 to every 10,000 of population, elected directly for three years). The State religion is Lutheran; all others, except the Jesuits, are tolerated.—Sweden. Area, 170,979 sq. m.; estimated pop. in '87, 4,734,901; estimated revenue and expenditure ('89), 87,681,000k. [krone—1s. 14d.]; debt, 245,967,703 k.; imports ('86), 301,366,000 k.; exports, 228,398,000 k. (For army and navy see FOREIGN ARMIES AND NAVIES.) The king has right of veto; but if a law be thrice passed by three Storthing separately elected, his veto is over-ridden. The Norse Constitution of 1814, which vests the legislative power in the Storthing, is elected indirectly, the people choosing delegates who elect the Storthing. For business purposes it is divided into the Odelsting, composed of one-fourth of the members, and the Lagthing, consisting of the remainder; all new bills originate in the former. If the two divisions do not agree, the combined house deliberate, and the measure must be passed by a two-third majority.—Norway. Area, 123,305 sq. m.; estimated pop. in '86, 2,954,000; estimated revenue and expenditure for year ending June '89, 43,132,505k.; debt ('87), 106,786,741k.; imports ('87) 123,691,000 k.; exports, 106,628,000 k. The principal events in '89 were the death of the Princess Eugénie, the king's sister, in her 59th year; the visit of the Emperor of Germany to Norway and Sweden in July; the return of Dr. Malmgren, the celebrated traveller; and the Oriental Congress (q.v.), held at Stockholm under the presidency of the king.—For army

and navy see FOREIGN ARMIES AND NAVIES; and for Council, etc., see DIPLOMACY.

Sweden and Copenhagen "Submarine Bridge." This is the title given to a novel proposal by a Swedish engineer (see *Engineer*, Sept. 20th, '89). It would be 2½ miles long, of 100-ft. spans, and would be submerged sufficiently to allow ships to pass over it. There would be a double tube with an outer skin of iron and inner one of steel, the space being filled with concrete, and would carry a single line of rails. The piers, 100 feet apart, would be ordinary caissons filled with concrete.

Swimming, '89. A large number of swimming clubs have been formed throughout the United Kingdom in the course of the last decade, and it is impossible to over-estimate the value of these useful institutions; indeed it is a singular fact that comparatively few of our sailors are adepts in the pastime which in the hour of danger and shipwreck should prove most valuable to them, and a knowledge of which would much lessen the distressing loss of life which annually marks the bathing season. Several important competitions were decided in the course of the year, whilst a number of public exhibitions in the art of natation were also given by our most prominent swimmers; and amongst the former may be cited the following:—On July 6th, in the lake at Hendon, was decided the half-mile championship, which Mr. J. F. Standing of the Zephyr C. won in 14 min. 56½ sec.; and the same swimmer subsequently won the 500 Yards' Championship at Bristol. On August 31st the Long Distance Championship of the Thames fell to Mr. H. Bowden of Dolphin C., the distance being 3½ miles, and the time 1 h. 25 min. 50½ sec. Mr. Bowden also proved successful in the One-mile Championship, which he won in 31 min. 4 sec., this being raced for in the lake at Hendon, on July 20th. On Sept. 23rd the record was broken in the 900 Yards' Amateur Race, by Mr. T. Jones of the Manchester Swan Club., his time being 2 min. 57½ sec.; and on Oct. 7th at Lambeth Baths, Mr. C. J. Lenton, of Liverpool, won the 100 Yards' Championship in 1 min. 7½ sec. On the same occasion Mr. G. A. Blake, I ewisham S.C., won the plunging competition, the distance credited to him being 73 ft. 5 in. In the contests confined to professional swimmers, J. Nuttall, although defeated easily in a salt-water race by J. Finney, is champion for various distances between 100 yards and one mile.

Swinburne, Algernon Charles, son of Admiral Swinburne and Lady J. Henrietta, daughter of Earl of Ashburnham was b. in London 1837. Educated at Balliol College, Oxford (1859). Visited Florence, and passed some time there. His first productions were two plays, "Queen Mother" and "Rosamond," (1861). These were followed by two tragedies "Atalanta in Calydon" and "Chastelard," and "Poems and Ballads," which met with severe criticism, and led to a species of literary warfare. His later works are "A Song of Italy," "William Blake, a critical essay," "Songs before Sunrise" (1891), in which he glorifies "Panthicism and Republicanism;" "Studies in Song" (1881); "A Century of Rondels" (1883); "Life of Victor Hugo" (1886). In his "Song of Italy" he apostrophizes Garibaldi and Mazzini, etc. During the year '88 he published a poem on "The Armada."

An article by Mr. Swinburne on the late Mr. Wilkie Collins appeared in the *Fortnightly Review* Nov. '80.

Switzerland. A republic composed formerly of several independent allied states, but since 1848 a united confederacy. Area 15,892 sq. m. **New census** (Dec. 1st, '88), 2,934,057. The constitution of 1874 vests supreme legislative and executive authority in two chambers—viz. (1) a State Council of 44 members, chosen two for each canton for three years by the twenty-two cantons of the Confederation; and (2) a National Council of 145 delegates of the Swiss people, chosen also for three years, directly, one deputy for every 20,000 of the population. The united chambers form the Federal Assembly, to which is confided the supreme government. The executive authority is deputed to a Federal Council of seven members, elected for three years by the Assembly, the president and vice-president of which are the first magistrates of the republic. A supreme tribunal, independent of, although elected for six years by the Assembly, adjudicates upon disputes between the federal government and the cantons, the individual cantons, and all appeals civil and criminal. Each canton is sovereign subject to the federal constitution, possessing its local government, varied in detail, but based on the absolute sovereignty of the people; in some of the smaller cantons the whole male population in assembly make their laws and appoint their officials. In the larger cantons the people by universal suffrage appoint representatives. One unique characteristic of the republic and its cantons is the direct influence exercised by the people, to the consequent exclusion of the representative principle. It is shown in the smaller cantons by the direct popular legislation of the assembled male inhabitants, and in the federation and larger cantons by the almost universal adoption and frequent exercise of the so-called referendum, which may be shortly described as follows: When a law has been passed, the minority (exceeding a certain fixed minimum) is entitled to demand that the law in question shall be submitted to and confirmed by the direct vote of the citizens: *i.e.*, although the constitution abolished capital punishment it was decided by a popular vote taken in 1879 that each canton should be at liberty to re-enact the infliction of such penalty. There is no state religion, but complete religious liberty. The cantons maintain order among the various religious bodies, and no bishopric can be established without the approbation of the republic. Education is free and compulsory.

Budget, '90: revenue, 72,532,300 fr.; expenditure, 85,538,300 fr. (fr. = 94d.) Public debt of the republic, £1,466,824; property of the republic, £2,200,000. The various cantons have their own budgets of revenue and expenditure, and their own debts, the latter always covered by cantonal property, chiefly in land. The aggregate cantonal debts amount to about £12,000,000. Special imports in '88, 827,078,595 fr.; special exports, 673,060,648 fr. No standing army permitted by law, but all citizens are liable to serve, and in turn undergo annual military training. The State maintains a highly trained staff and colleges, and in addition military training forms part of the curriculum of every school. The reputation of the Swiss as a warlike nation is deservedly high, and the scientific eminence of the officers is well known. It is estimated that in case of war the confederation could put 250,000 men in the field (see FOREIGN ARMIES; and for Council see DIPLOMACY). Amongst the chief events of '89 were the conclusion of a commercial treaty between Italy and Switzerland. The question of the Wohlgenuth incident was amicably settled with Germany. A terrible storm with floods passed over the district of Sargans, destroying several home-steads and bridges. **Mount Pilatus Railway** (*q.v.*) inaugurated (June 4th). A conference on the **Simplon Tunnel Scheme** (*q.v.*) met at Berne in July. The General Assembly authorised the appropriation of 16,000,000 fr. to provide the Swiss army with repeating rifles of the Schmidt pattern. The first **International Congress of Physiologists** was held at Basle in August. The State Council authorised the Federal Council to employ forthwith the credits assigned for the years '90-2 to provide war material for the army. The Government created a Public Prosecutor's Department. The Federal Council decided that a **Labour Conference** should be held at Berne in the spring of '90. Consult *The Statesman's Year-Book, Almanach de Gotha*, and "The Swiss Confederation," by Sir F. O. Adams and C. D. Cunningham, '89.

Sydney. Capital of New South Wales (*q.v.*); on Port Jackson.

Symonds, John Addington, b. at Bristol, Oct. 5th, 1840. Educated at Harrow and Balliol College, Oxon. Fellow of Magdalen '62. He has published many works, amongst them being "Introduction to the Study of Dante," "Shelley" the article on "Italian History" for the *Encyclopædia Britannica*, a translation of the "Sonnets of Michael Angelo, and Campanella," and "In Nights and Days," '89.

T

Taafe, Count Edward Francis Joseph, in the Austrian peerage, and Viscount Taafe of Corren, and Baron of Ballymote, Sligo, in the Irish peerage, was b. at Prague Feb. 24th, 1839, and was brought up as a youth along with the present Emperor Francis Joseph. Count Taafe is a descendant of the powerful nobleman of the same name who proceeded from Ireland, and made a great name in the Germanic Empire. The present Count was appointed Governor of Salzburg in '63. In '67 he became Austrian Minister of the

Interior and Vice-President of the Cisleithan Ministry. At the latter end of '69 he served as Minister President. In '71 he accepted the office of Governor of the Tyrol and Vorarlberg. In '80 he was summoned to form a new cabinet, over which he still presides. The distinguishing feature of Count Taafe's Clerical and Federalistic administration has been to give greater weight to the Slav nationalities, especially the Czechs and the Poles, as well as to the Clericals, in the public affairs of the Empire; and to conciliate the divergent nation-

alities comprising the kingdom. The marriage of two of his daughters took place in '89. Count T., for the first time in public, expressed (June) his disapproval of the anti-Semitic agitation.

Tahiti (*Society Islands*). A Polynesian island belonging to France. Exports about £100,000. The greatest quantity is sent to Great Britain, which takes chiefly baled cotton, coprah, and pearl-shell. Natives very cheerful, sociable, civilised. In '89, French suzerainty was proclaimed in Rurutua, Rimitara, in the Austral group. Consult "South Sea Bubbles," Wallace's "Australasia," Norman's "Colonial France," etc. See COLONIES OF EUROPEAN POWERS.

Taine, M. French author, philosopher and critic, b. at Vouziers, April 21st, 1828. He received his education at Collège Bourbon, and at the Ecole Normale, in Paris. His first work, "Essai sur l'ite Live" ('54), was crowned by the Academy. M. Taine's "Histoire de la Littérature Anglaise," published in 1864, excited a great sensation among the orthodox and Catholic party in France. By the influence of the Emperor Napoleon III. he was appointed Professor of Art and Aesthetics in the Ecole des Beaux Arts, at Paris. He also wrote "Notes sur l'Angleterre." Translated into English, it has been much read. M. Taine became a member of the Academy in '80. On the occasion of the unveiling of the Shakespeare statue in Paris, '88, M. Taine wrote a eulogium on the poet's works in a Paris journal.

Tajurah. A bay on the African coast of the Gulf of Aden, now belonging to France. Great Britain had claims here, including the islands of **Musha** and **Efat**, but ceded them to France in 1887. On the north side of the bay is **Obook**, or **Hobok**, acquired by France in 1862, and since enlarged. See COLONIES OF FOREIGN POWERS.

Talmage, Rev. T. De Witt, D.D., famous American preacher; was b. 1832. Educated at the University of New York, where he graduated with distinction. He entered the legal profession, but, after a short period, prepared for the ministry at the New Brunswick Theological Seminary. His first pastorate was at Belleville, N.J., and afterwards he removed to Philadelphia, where his rising fame induced the church at Brooklyn Tabernacle to make strenuous efforts to obtain Dr. Talmage as their minister, and he preached his first sermon there in March '69. The great success which attended Dr. Talmage's preaching necessitated the enlargement of the Tabernacle in '71, but it was burned a year later. However, a still larger and finer structure was soon built, but this was also burnt down '89. A new church is to be built, at a cost of £42,000. Dr. Talmage visited England Nov. '89, and is about to travel in Palestine.

Tamatave. Port on east of Madagascar (*q.v.*).

Tasmania. An island south of Australia, separated from it by Bass Strait, 120 miles across. Formerly called **Van Diemen's Land**. Extends 170 miles north to south, and 160 miles west to east, containing 26,215 sq. m., with a population of 137,211. Capital, Hobart, pop. 29,000, in the south. Second city, Launceston. Other towns Georgetown, Longford, New Norfolk, Mount Bischoff, Lefroy, and Beaconsfield. Tasmania is divided into eighteen counties, within which are electoral districts, parishes, and municipalities. Well watered and wooded throughout. Chief rivers, the Derwent, Huon, and Tamar. Coast bold, rocky, with numerous

harbours and islands. Fruit attains marvellous perfection of quality and surprising abundance. Fauna includes the "devil," "tiger," wombat, opossum, wallaby, platypus, 150 species of birds, etc. Rabbits a nuisance. Colony famous through Australasia for stud-sheep (Merino) and cattle (Devons). Chief minerals exported—gold, tin, and coal. Ruled by a Governor and responsible Ministry. Two elective Houses of Parliament, Legislative Council of 18 members, House of Assembly of 36. Colony represented in the Federal Council of Australasia. There are volunteer corps, about 1,000 of all arms, for defence. Batteries defend the Derwent and Tamar estuaries, and there are two torpedo boats. Church of England the dominant religious sect. Education compulsory and secular. Exports chiefly wool, tin, grain, fruit and preserves, hides, gold, etc. For financial statistics see BRITISH EMPIRE, etc. (table). Railways through island 318 miles, 123 being added; coach roads and tramways in settled parts. Telegraphs 1816 miles. Chief industries, sheep rearing, farming, fruit growing, mining, and timber cutting. Whaling recently revived. Not a large area fit for cultivation. There were, March 31st, '87, 457,436 acres of land under cultivation. Most of the remaining cultivated land was fruit-orchards and gardens. There is much rich land yet unoccupied, and obtainable at cheap rates on deferred payments. Manufactures growing into importance. Settled as penal colony in 1803. Severed from Government of New South Wales in 1825. Convict system abolished in 1853, and representative government introduced in 1856. Received a constitution and responsible government in 1871. For Ministry, etc., see DIPLOMATIC. Consult Walch's *Tasmanian Almanac* (*Simpkin, Marshall*); the official "Progress of the Colony of Tasmania" (Hobart 1882); also Just's "Tasmaniana," and Petherick's "Catalogue of York Gate Library," "Commercial Geography" by Dr. Zehden, translated by Muirhead, the publications of the Emigrants' Information Office, etc.

"Temple Bar" Magazine (monthly). Was founded in 1860, and has since incorporated *Bentley's Miscellany*. Originally edited by Mr. George Augustus Sala, who was succeeded in the editorship by Mr. Edmund Yates (*q.v.*). The name of the third (and present) editor is not attached to the cover of the magazine, but it is an open secret that for the last twenty years the editorial chair has been occupied by Mr. George Bentley, the head of the Queen's Publishing House. Generally avoiding politics and science, the pages of this magazine are more usually devoted to biographical sketches, fiction by the principal writers of the day, essays on general literature, and occasional short poems. Office, 8, New Burlington St. W.

Teachers' Guild. This was established as a Registered Society in '85. The members of the Guild now (Nov. '89) number over 3600. The first General Conference of the Guild was held in Jan. '88, and the second at Sheffield in '89. It is proposed that a conference should be held yearly in London or at one of the branch centres. The Education Society was incorporated with the Teachers' Guild at the end of '86, and the Guild has undertaken to continue the work of that Society. Chairman, Rev. Dr. Percival, headmaster of Rugby. Sec., H. B. Garrod, M.A.; Registrar of Women Teachers, Miss L. Brough; Office, 17, Buckingham Street, Adelphi, W.C.

The words "Express paid Jask" must be inserted in the address and paid for. *e* Telegrams for any place in Colombia, except Colon, Panama, and Buenaventura, for any place in Costa Rica; for any place in Ecuador, except Guayaquil and St. Elena; for any place in Guatemala or Independent Honduras; and for any place in Mexico, except Coatzacoalco, Jaltepan, Mexico City, Reyes, Salina Cruz, San Geronimo, Tampico, Vera Cruz, and Zarabia, can be forwarded only at sender's risk. *f* On telegrams posted from an office in China to any place in that country, a fee of *sd.* for postage is charged to the sender. *g* Telegrams for Hedjaz must be written in plain language. *h* On telegrams posted from a telegraph office in Japan to any place in that country, a fee of 1s. 6d. for postage is charged to the sender. *i* Telegrams for all places in Persia, except Teheran, Isphahan, Rushire, Shiraz, Tabriz (Tauris), Kirmanshah, and Salmas, must be written in French, and in plain language. *k* Telegrams for any place in Peru, except Callao, Mollendo, Lima, and Payta, can only be forwarded at the sender's risk. *l* Telegrams in code or cypher cannot be accepted for Tonquin. *m* For the rates to Washington City, see "Columbia District." *n* Code and cypher telegrams for Havana, Cienfuegos and Santiago, and all telegrams for other places in Cuba, are accepted only at the sender's risk.

Technical Education. The initial step was taken by the *Livery Companies of London* in 1877, which formed a committee to prepare a scheme for a national system of technical education. Having drafted their scheme, the committee began to give practical effect to their views, and classes were started in '79 in the *Cowper Street Schools*. These proving successful, the *Drapers' Company* offered £10,000 for the erection of suitable buildings in which to continue and develop them: and in '80 the *City and Guilds of London Institute*, for the advancement of technical education, was registered under the Companies Acts. I. A *Central Institute*, at South Kensington, was opened in '84, having been built and fitted up at a cost of £100,000. Here the students, after instruction, are qualified to become technical teachers, mechanical, civil, and electrical engineers; architects, builders, and decorative artists: principals, superintendents and managers of chemical and other manufacturing works. II. The *City and Guilds Technical College*, Finsbury, is of a lower grade than the preceding, and prepares persons of both sexes for intermediate posts in factories. For day students the fee is £9, for evening from 6s. to £1 10s.—apprentices admitted at half fee. III. The *South London School of Technical Art*, Kensington Park Road, numbers over 150 students. The subjects taught are modelling, design, wood engraving, china painting, life classes (dr. wing and painting), house decoration, and upholstery cutting. IV. The *Technological Classes* in different towns connected with the institute are nearly 500, with upwards of 10,000 students. These students, on passing the technological examinations, are granted prizes and certificates, which are regarded as diplomas

of proficiency. These examinations led to the formation of technical classes at the *Polytechnic*, Regent Street, and at the *People's Palace (q.v.)*, in the East End. The Institute has also promoted instruction in the use of wood working tools amongst the boys of the *London Board School*, and already about 600 boys are having lessons once a week at the bench. The teaching staff comprises two instructors and two artisan assistants. Of the provincial towns in connection with these classes mention may be made of Nottingham, Sheffield, Manchester, Middlesbrough, and Chester. On Oct. 6th, '88, the *Times* published a letter in which the secretary of the *Goldsmiths' Company* announced the gift from that Company of the *Royal Naval School at New Cross*, with seven acres of land and £85,000, to advance the cause of Technical Education in South London. Previous to this the *Charity Commissioners* had offered £150,000 for the same cause, on condition that another £150,000 was raised from other sources. With the £300,000 it is intended to start and endow three institutions, where practical and industrial training will be combined with social and recreative facilities. The *Technical Instruction Act*, which became law in '89 (see *SESSION*, sect. 180), was a distinct step forward in the cause of Technical Education. During the passage of the Bill through Parliament various points met with objection, and not a few amendments were carried, but in the end there was a general agreement as to the leading objects of the Act. Active steps have been taken in both the North and South districts of London and elsewhere to extend the movement. **Technical Instruction Act, '89.** See *SESSION*, sect. 180.

Tembuland. In Transkeian Territories (*q.v.*).
Temperance Organisations. British Temperance League (see **TEXTOTALISM**, ed. '87), 1835: annual income, £2,000; organ, *Advocate*; offices, 29, Union Street, Sheffield. United Kingdom Alliance (*q.v.*). National Temperance League, formed 1856, of National Temperance Society, started 1842, and London Temperance League: income, with National Temperance Tract Depot, £11,230; organ, *Record*; offices, 337, Strand, London, W.C. United Kingdom Band of Hope Union, 1855, has affiliated, with its county, district, or town Unions, 11,400 societies, having 1,414,900 members: income, £5,350; organ, *Chronicle*; offices, 4, Ludgate Hill, London, E.C. Midland Temperance League, 1857: income, £500. North of England Temperance League, 1858. Western Temperance League: income, £1,700; organ, *Herald*; offices, Redlands, Bristol. Independent Order of Rechabites, Sons of Temperance, and two Sons of Phoenix Orders are temperance sick benefit societies. The first, established 1835, has 120,000 members; capital, £456,000; organ, *Rechabite and Temp. Mag.*; offices, Lancaster Av., Fennel St., Manchester. Members of the Sons number 50,000; capital, £62,660; organ, *Son of Temperance*; offices, 29, Pitt Terrace, Miles Platting, Good Templary (*q.v.*). Sunday Closing Association, 1866: income, £3,000; organ, *Reporter*; offices, 14, Brown Street, Manchester. In Scotland—in addition to Highland Temperance League—the Scottish Temperance League, 1844, income £6,668, *League Journal*, offices, 108, Hope St., Glasgow; Scottish Permissive Bill Association, income £3,183, *Reformer*, offices, 112, Bath St., Glasgow; the Irish Temperance League, income £2,070, *Irish League Journal*, offices, 18, Lombard St., Belfast; Irish Temperance Association, *Banner*, Eustace Buildings, Dublin. The Church of England Temperance Society: income £9,500, offices, 9, Palace Chambers, Westminster, London, S.W., organ *Chronicle*, heads the list of denominational societies, among which are the Congregational and Baptist Associations; Wesleyan, Methodist New Connexion, Bible Christian, Swedenborgian, and Friends' Societies; and Free Methodist, Primitive Methodist, and Roman Catholic Leagues, some of which have official organs.—**Undenominational:** The Medical Temperance Society, British Women's Temperance Association, Blue Ribbon Gospel Temperance Mission (*q.v.*), and Young Abstinents' Union, have each papers of their own. To these may be added the National Deaf and Dumb, Travellers', Police, Cab-drivers', Soldiers', and English and Scotch Railway Temperance Societies. The Society for the Study and Cure of Inebriety, and the National Temperance Federation offices, 29, Union Street, Sheffield, have been recently formed, twenty-five national societies being affiliated with the latter, which has been chiefly engaged in parliamentary work. In London, the Temperance Permanent Building Society has probably advanced over £3,000,000 since 1854; and the Artisans' and General Dwelling Company, now in its twenty-first year, has built over 4,000 houses on its estates in the suburbs, where no licences are allowed. During the past few years several *Inebriates' Homes* have been opened in different parts of the country. Consult the organs and annual reports of the various organisations.

Tenants' Defence Association. See IRELAND.

Tennyson, Alfred Tennyson, 1st Baron (creat. 1884); son of the late Rev. George Clayton Tennyson, rector of Somersby, Lincolnshire; b. at Somersby, Aug. 6th, 1809. Educated at Trin. Coll., Cambridge, where he gained the Chancellor's medal for his poem in blank verse, "Timbuctoo"; married Emily, daughter of Henry Selwood, of Peasmore, Berks, and niece of Sir John Franklin; Hon. D.C.L. Oxon ('55); has been Poet Laureate (*q.v.*) since '50. He published in '30 his first volume, "Poems chiefly Lyrical," followed by "Poems," in 2 vols. ('42), "The Princess"—which contains what many consider the finest of his lyrics: "Tears, Idle Tears"—('47), "May Queen," and "Locksley Hall," "In Memoriam"—a tribute to the memory of Arthur Hallam, son of the historian ('50); this fine poem was at first published anonymously. His other chief works being "Maud" ('55), "Idylls of the King" ('58), "Enoch Arden" ('64), "The Holy Grail" ('69), "The Window, or the Songs of the Wren" ('70), "Gareth and Lynette" ('72), "Queen Mary" ('75), "Harold" ('76), "The Cup" ('81), "The Promise of May" ('82), "The Cup and the Falcon" ('84), "Becket," and "Tiresias" ('85), "*Locksley Hall: Sixty Years After*"—which attracted much attention—('86), *Jubilee Ode* ('87). Lord T. has for many years resided at Freshwater, in the Isle of Wight. He contributed a short poem on *The Thistle to the New Review* for Oct. '89.

Terry, Edward, originally made his mark in Shakespearian parts at the Prince's Theatre, Manchester, under the late Charles Calvert, his greatest success being the *Glown* in "*Antony and Cleopatra*." Mr. T.'s first appearance at a West End theatre, the Lyceum, was in the character of the Gravedigger, in *Hamlet*. Since then, besides playing in numerous burlesques, he has created parts in comedies by Byron, Burnand, Reece, A. W. Rivers, etc., etc. He is now the *Lessee and Manager of Terry's Theatre*, Strand. His playing in A. W. Pinero's drama, "*Sweet Lavender*," has won for him a great reputation. This play has had a very long run, being brought out in '88. Mr. T. was elected (April '89), the Grand Treasurer of English Freemasons. Mr. T. read a paper on "The Relations of Church and State," at the *Church Congress* of '89, which excited public attention.

Terry, Miss Ellen, b. at Coventry, Feb. 27th, 1848; made her first appearance on the stage during Charles Kean's Shakespearian revivals in '58, playing the parts of Mamilvius in "*The Winter's Tale*" and Prince Arthur in "*King John*." When only fourteen she was a member of Mr. Chute's Bristol company, which included Mrs. Kendal, Mrs. Labouchere, Kate Bishop, and several other now prominent members of the profession. She made her *début* in London, March '63, as Gertrude in "*The Little Treasure*," and until Jan. '64 played Hero in "*Much Ado about Nothing*," Mary Meredith in "*Our American Cousin*," and other secondary parts. In that year she married and left the stage, but reappeared again in Oct. '67, in "*The Double Marriage*" at the New Queen's Theatre, London. She afterwards joined Mr. and Mrs. Bancroft at the Prince of Wales's Theatre, where she acted the part of Portia. On Dec. 30th, '78, she made her first appearance at the Lyceum, and has since, in conjunction with Mr. Irving, played in the longest runs ever known of "*Hamlet*," "*The*

Merchant of Venice. "Romeo and Juliet," and "Much Ado about Nothing." She has also appeared as Viola in "Twelfth Night," Henrietta Maria in "Charles I.," Camma in Tennyson's tragedy of "The Cup," and Ruth Meadows in "Eugene Aram." She achieved immense success as Marguerite in W. G. Wills' play of "Faust." She accompanied Mr. Irving on his American tour in '87, and afterwards reappeared at the Lyceum in "Faust," and ('88) at the sametheatre played as Lady Macbeth and in "Dead Heart." A fine picture of Miss Terry as Lady Macbeth, by Mr. Sargeant, was exhibited at the New Gallery in '88. After her performance with the Lyceum Company at Sandringham, in July, Miss Terry was presented with a brooch by the Queen and a diamond bracelet by the Princess of Wales.

Tewfik. Mohammed Tewfik Pasha, Khedive of Egypt, eldest son of Ismail Pasha, grandson of Ibrahim Pasha, great-grandson of Mohammed Aly; b. '32; married '69, Elmina Hanem, daughter of El Hami Pasha. Made President of Council by his father upon dismissal of Nuber, '78, and worked for a few weeks loyally with his colleagues, Sir Rivers Wilson and M. de Blignieres. Resigned rather than be party to *coup d'état*. On deposition of Ismail proclaimed Khedive by Sultan's firman, June '79; gave loyal support to Dual Control ('79-82). Was unable to resist rebellion of Arabi ('82), but refused to take refuge in British ships. After bombardment of Alexandria entered into negotiations with English and proclaimed amnesty to all who would return to obedience. This being ineffectual, the Egyptian campaign of '82 followed, and after Tel-el-Kebir, Tewfik returned to Cairo and attended march-past of British troops. Behaved with great courage during the outbreak of cholera ('83), when, accompanied by his wife, he visited the sick in spite of the remonstrances of ministers. Since '84, when the English Government assumed more direct interference in Egyptian affairs, Tewfik has acted under the influence of Sir E. Baring. Though a Mohammedan, Tewfik is strongly opposed to the Mohammedan institutions of polygamy and slavery.

Theatres and Music Halls. See COUNTY COUNCILS, sect. 8.

Thibet. A country occupying the tableland north of the central and eastern portion of the Himalayas, computed to have an area of 700,000 sq. miles, and a pop. of 6,000,000. It has been more or less dependent upon China at all times; but the final conquest of the country by the Chinese was effected only in 1750, and the present system of government was then established. Two imperial delegates from Peking direct the foreign and military administration, leaving the civil and religious administration in the hands of the Thibetans. In matters of civil government the supreme authority belongs to the Dalai Lama, who resides at Lhasa on the Sanpou, or Sangpo; while another Lama, called the Teshu, exercises a powerful spiritual influence in the southern part of the country. His capital is Shigatze. The real ruler of the country is, however, generally supposed to be the Chinese Amban, who is in direct communication with the Emperor at Peking. (For some account of the history and explorations, attempted or otherwise, see ed. '88.) — **1890.** Political. From Calcutta, Jan. 18th, it was reported that, practically, negotiations

with the Amban or Ampa had been broken off, but that that functionary had received instructions to remain in Sikhim. Soon afterwards Mr. James Hart, who is in the service of the Chinese Government, arrived at Calcutta, in connection with the matter. This gentleman, it may be added, is a brother of Sir Robert Hart, the Inspector-General of Chinese Customs. A telegram dated Simla, May 11th, was to the effect that the Queen had approved of the grant of the Indian medal, with clasps, to the officers and men engaged in the Sikhim and Hazara campaigns. It was reported from Simla, under date June 21st, that all hope of an amicable settlement of the difficulty as to Sikhim had been practically abandoned. Another telegram from Calcutta (Aug. 18th), was to the effect that, as the Chinese Amban or Ampa persisted in a claim to suzerainty over Sikhim, the negotiations could go no further; that Mr. Hart would return to China, while a small British force would be maintained in Sikhim. Subsequently the larger portion of our troops were withdrawn. The Calcutta correspondent of the *Times*, under date Nov. 10th, telegraphed news which seemed to promise further trouble with the Thibetans. It was to the effect that as they had established an outpost on the Garwhal frontier in order to levy a transit duty on traders crossing the Niti Pass, a detachment of the 3rd Gorkhas had been sent to dislodge them. — **Exploration.** The *Journal de St. Petersburg* of January 1st, '89, stated that the French traveller, M. Joseph Martin, was about to start on a journey in China and Thibet, generally following Prjevalsk's route; he had been received by the Tzar, and would receive Russian support. A curious notification (says the *Times* of Jan. 19th), by Warren Hastings and his Council in the year 1784, has been distasteful from the Calcutta official journal. It consists of advice to the Bengal native merchants as to the encouragement of trade with Thibet. On April 6th it was reported, on the authority of the *Invalide Russe*, that, by the Tzar's order, the name of the town Karakol, founded in '68 in the province of Semiretchia, be altered to Prjevalak, in honour of the deceased explorer, who died there. On the same authority it was stated, on April 15th, that an expedition to Lhasa was not a portion of Pevtsoff's programme. News received at St. Petersburg late in Aug., was to the effect that Pevtsoff's party were detained in Kashgar by the Chinese authorities, but in Oct. they were said to have been treated well and were at Khotan. Mr. W. W. Rockhill, formerly secretary to the American Legation at Peking, and a well-known Thibetan scholar, left the United States in Oct. '88, for the purpose of exploring Thibet. In Mongolia he disguised himself as a pilgrim, and succeeded in joining a caravan about to start for Lhasa. He got to within 30 days' journey of the sacred city when he was discovered, his baggage seized, and he was turned back. It was stated in October last that he had reached Chung-King, on the Upper Yangtze, having crossed unexplored country.

Thistle. The most ancient and most noble Order of the. Originally established in 1340, and remodelled in 1687, and again in Queen Anne's reign (1703). It was by the statute of '27 declared that this Order should consist of the Sovereign and 16 knights. Its abbreviation is K.T., and its badge a green

ribbon, with motto "*Nemo me impune lacessit*" ("None annoys me with impunity"). There are at present twenty-one K.T.s, including the Sovereign and princes of the blood, the subjoined being a list of them:—

The Sovereign.

| E. of Minto. | D. of Fife. |
| M. of Lorne. | E. of Galloway. |

Dean of the Order, Very Rev. James Cameron Lees, D.D.; Secretary, Major Sir J. T. Stewart-Richardson, Bart.; Gentleman Usher of the Green Rod, Sir Duncan Alexander Campbell, Bart.

Thomas, William L., was b. 1830. In early life studied engraving in Paris and Rome, under his brother, the late Mr. G. H. Thomas. Visited America, and started there the first illustrated American paper. On returning to England entered into business as a wood-engraver. In 1860 the *Graphic* (q.v.) was launched under Mr. Thomas's direction, of which he is managing director and art editor. Mr. T. is a member of the Royal Institute of Painters in Water Colours.

Thompson, Rev. John, M.A., Moderator-Elect of the Presbyterian Church of England, has for the past seventeen years had charge of Westmoreland Road Church, Newcastle-on-Tyne. Previous to his removal to Newcastle he was connected, as minister, with West Calder, and also with Birkenhead. His book on "*St. Peter*" is well known. For a lengthy period Mr. T. held the position of Chairman of the North-Eastern Board of the Home Mission. Elected Moderator by a unanimous vote, Nov. 20th, '89.

Thomson, Joseph, F.R.G.S., the African explorer, was b. at Penpont, 1858. Gold medalist in geology and zoology at the University of Edinburgh. When only twenty years of age Mr. Thomson visited Central Africa, in the company of the late Keith Johnston; and assumed charge of the expedition a year later, on the death of his chief. Under the auspices of the Sultan of Zanzibar Mr. Thomson explored Rovuma ('82), and in '84 commenced his now famous journey to *Maasai Land*, which had hitherto been carefully guarded from adventurous explorers. Mr. Thomson was successful in reaching the north-eastern corner of Lake Victoria Nyanza. His graphic descriptions of the journey were published under the title, "*Through Maasai Land*." His subsequent achievements, by which British supremacy was recognised over the Central Sudan, added to his fame; and, in '88, he commenced an expedition to Morocco, during which he crossed the Atlas chain in six different places. The East African Company were desirous of obtaining Mr. Thomson's services to conduct a relief expedition to Emin Pasha (q.v.); and with this object in view he returned to England; but the expedition was abandoned for various reasons. Mr. Thomson has received the gold medal of the Royal Geographical Society. In '89 he published his "*Travels in the Atlas and S. Morocco*."

Thomson, Sir William, F.R.S., LL.D., D.C.L., b. at Belfast, 1824. Educated at Glasgow University, whither his father had removed, and Cambridge, where he graduated ('45) as second wrangler, and was elected to a fellowship. Appointed Professor of Natural Philosophy in the University of Glasgow ('46), Editor of the *Cambridge and Dublin Mathematical Journal* ('46), to which he contributed valuable additions to the mathematical theory of electricity. It is, however, in connection with submarine telegraphy that Sir W. Thomson's labours in electrical science are best known. He has also made important additions to the science of magnetism. His mathematical insight is seen to the greatest advantage in his investigation of the nature of heat. Pres. of the British Association ('71), Knighted in '66. He is joint author with Professor Tait of the well-known treatise on "*Natural Philosophy*." Created Grand Officer of the Légion d'Honneur in '89.

Tillett, Benjamin, one of the leaders of the great Dock Strike, and General Secretary of the Dock, Wharf, Riverside, and General Labourers' Union, was b. in Bristol in 1859. Before he was eight he worked in a brickyard, and at twelve served six months on a fishing-smack. He was then apprenticed to a bootmaker, but ran away and joined the Royal Navy, from which he was discharged invalided after a short service. After several voyages in merchant vessels he settled at the Docks, and gradually formed the Dockers' Union, which has now some 23,000 members. He gave valuable evidence before the Parliamentary Commission on Pauper Immigration, and before the Lords' Committee on the Sweating System, his evidence before the latter with regard to dock labour making a great impression upon the public mind at the time. He is a ready speaker, and during the strike showed much talent in the organisation of labour.

"**Time**," a monthly magazine, containing a serial novel, with articles on subjects of social, political, and general interest, a new feature being its series of "Work and Workers"—articles by experts on their occupations or interests. (New series, '89.) Editor, Mr. Walter Sichel. Office, 6, White Hart St., Paternoster Square, E.C.

"**Times, The**," is the representative English political daily paper. It was first published under the title of *The Daily Universal Register*, on January 1st, 1785, at 2d., which name was changed to *The Times* on January 1st, 1788. Editors have been:—Dr. Stoddart, Thomas Barnes, J. T. Delane, Prof. Thomas Chenery, G. E. Buckle (q.v.) (present editor), 1884. Besides containing political and general information from the best and most reliable sources, its columns treat of every topic of social, literary, and artistic interest. The Centenary of *The Times* occurred on Jan. '88. Letters of congratulation were sent from all parts of the world to the proprietors. The series of contributions under the title of "*Farnellism and Crime*," which appeared in '87, led in '88 to legal action. The Farnell Commission (q.v.) was the outcome of much discussion in Parliament, and commenced its sittings in Oct. '88. "*The Mail*," published three times each week, furnishes a summary of the contents of *The Times*. In connection with *The Times* are issued, in a convenient form, the parliamentary debates, law reports, and occasional

summaries of subjects of special public interest. Palmer's "Index to the Times" provides a convenient means of identifying any particular subject or event.

Tinor. An island of the Malay Archipelago, politically it is divided between Holland and Portugal, but the nations are still mainly independent of their nominal Dutch and Portuguese rulers. The Dutch claim the western section—capital Kupang; and the Portuguese the eastern section—capital Dell. Kupang has a Dutch Resident. See COLONIES OF EUROPEAN POWERS.

Tin. Since the collapse of the tin speculation in '88, undertaken by the French combination, the position of the metal has gradually improved. During that boom, which commenced in the autumn of '87, stocks began to accumulate rapidly, and the visible supply, which stood at 13,538 tons on 31st October, rose to 23,995 tons on 30th April, '88, or an increase of 10,000 tons in the space of six months. The price of Straits tin during that period was driven up to £170 for cash, and English to £160. On the last day of April the long expected crash came, by the announcement that the syndicate refused to make further purchases for cash. The price instantly dropped to £102 per ton for cash parcels, while by the end of May it was quoted £86, and during the following month £75 10s. was touched. The deliveries during the first four months of the year averaged 1120 tons per month, but with lower prices consumers began to replenish their stocks, and the monthly deliveries increased to 4200 tons, so that by the end of September the visible supply was reduced to 13,388 tons. During the autumn the market became more lively and the price recovered to £105 per ton. Since then the value of the metal has fluctuated between £100 and £85. The shipments from the Straits and Australia during the year ending Oct. 31st, '89, amounted to 22,237 tons, against 26,811 tons in the previous twelve months, or a declension of 4500 tons. This, however, is accounted for by the increased consignment direct to America, which reached 8310 tons, compared with 3230 tons in the year ending Oct. '88. The aggregate deliveries in London, Holland, and America, during the past year reached 39,114 tons, against 37,838 tons in the previous year.

Tirard, M., twice Prime Minister of France, was b. at Geneva of French parents in 1827. He is a jeweller by trade, and was an ardent, though almost unknown, Republican before he was brought to the front by force of circumstances. He was elected a deputy in '71, was one of the representatives of Paris '76 to '84, when he passed to the Senate. In '79 he was Minister of Agriculture and Commerce, and subsequently Minister of Finance. His first ministry was only short-lived, and in March '88 he resigned, being succeeded by M. Floquet. On the resignation of the latter, however, M. Tirard again accepted the invitation of the President to form a cabinet. His management of affairs during the Exhibition period, and throughout the excitement of the Boulangist agitation, was so successful, that his Government secured a good working majority at the general election of last autumn. See FRANCE.

Tissa von Borosjenö, Koloman, Hungarian Premier, was b. at Gerzt, Dec. 16th, 1830. He was elected to the Imperial Diet in '61, and speedily became the leader of the Left

Centre party. As a Protestant he had previously declared himself an opponent of the policy of the Government. In the Reichstag he opposed the "Ausgleich," and on the dissolution of the Deak party he founded the new Liberal party, which was a fusion of Moderate Liberals and followers of Deak. As head of this party he became, in '75, Minister of the Interior and Premier. During '89 he incurred very great unpopularity in connection with the Army Bill; and the shooting of a student (Mar.) by a Liberal Deputy led to a demonstration against him. The Emperor personally conveyed his sympathy to the Premier upon his bad treatment. Herr von Tissa (Nov.) was questioned on the subject as to whether Kossuth (q.v.) remained a Hungarian citizen. See AUSTRIA.

Tithe Agitation, '89. The movement against the payment of tithe rent-charge, which was begun early in the year '87, extended very rapidly throughout the principality of Wales in '88, and the measures of reprisal taken by the tithe-owners apparently fanned the flame (see ed. '89). **Distrainments**—in some cases peaceful, and in others attended by riot and disorder—took place in the northern counties, and a few of less significance in the south. The total arrears of tithe in Wales are estimated by Mr. Jasper More, M.P., at about £2000. Other observers claim them to represent a much higher amount. Cases of individual hardship among the clergy having been frequent, the Bishop of St Asaph (Dr. Edwards) appealed for public sympathy, and a sufficient sum was publicly subscribed (Nov. 18th) to meet their immediate wants. Welsh county councils have shown a disposition to disallow the expenses of police protection in cases of distraint. **North and South Wales** differ in the intensity with which the agitation is conducted. In the North, large abatements of the tithe rent-charge are demanded; in the South, a movement has set in for the entire abolition of tithe. The South Wales and Monmouthshire Liberal Federation held a meeting at Cardiff on July 22nd, '89, at which it was resolved to resist the Bills brought forward last Session (see sect. 122) aiming at practical reforms in payment and liability. Two important legislative changes were proposed by the amended Bill—accepted by Government in August: (1) to make tithe rent-charges recoverable, like ordinary debts, in the county court; (2) to transfer the direct liability for payment from occupiers to landowners. These changes—the latter being accepted only at the last moment, and in face of strong opposition from some representatives of the landed interest—are stated to have the support of the Welsh clergy. Consult also Dean Prideaux' "Original Right of Tithes," "Ancient Facts and Fictions concerning Churches and Tithes," by Lord Selborne; "The Present Claims of the Principle of Tithes," by Bishop Hamilton, of Salisbury; "Tithes: their History, Use, and Future," by Robert Lacey Everett.

Tithe Rent-Charge Recovery Bill. See Session, sect. 122.

Titles of Courtesy. See COURTESY TITLES.

Tobago. A British West Indian island belonging to the Crown colony of the Windward Islands. Capital Scarborough. Divided into seven parishes. Products, sugar, molasses, rum, fruits. An Administrator presides over local councils, but all ordinances must be approved by general Government and Governor

of the Windward Islands. For statistics see BRITISH EMPIRE, etc. (table). Consult Layard's "Through the West Indies," and "Her Majesty's Colonies."

Togoland. A German colony on the Slave Coast, Guinea. Products, pepper, indigo, cotton, and native fruits and vegetables. Acquired 1885. Consult "Proceedings of the Royal Geographical Society," June 1885.

Tolstol, Count Lyof Nikolaivitch, usually called Count Leon Tolstoi; most eminent living Russian novelist: b. August 28th, 1828, at Yasnaya Poliana, in the Government of Toula, where he still lives. Entered the army when 23, served in the Caucasus and at Sebastopol. First made literary reputation by his vivid sketches from Sebastopol. Leaving the army soon after the close of the Crimean war, he devoted himself to literature. His "War and Peace," a tale of the invasion of Russia by Napoleon in 1812, is regarded by Russians as his masterpiece; but his "Anna Karenina," which appeared in 1876, is better appreciated abroad. Matthew Arnold reviewed it enthusiastically a few months before his death; and George Meredith says that Anna, the beautiful but unfaithful wife, who ends her guilty passion by suicide, is the most perfectly depicted female character in all fiction. "The Cossacks" is his only other novel. He wrote much on education, and published many short tales and reminiscences of childhood and youth. The last six years of his life he has devoted to religious teaching. He makes "Return not evil" the keystone of the Christian faith, and insists that the liberal interpretation of the Sermon on the Mount is the only rule of the Christian life. His religious views are set forth in "Christ's Christianity." Walter Scott is publishing a complete edition of his works. Count Tolstoi married in '67, and has 9 children living. Published in '89 "My Religion."

Tonbridge School. Sir Andrew Judd's School, founded 1533; reorganised '80. Governors: the Worshipful Company of Skinners. Four exhibitions from £90 to £60 for four years fall vacant annually, and are tenable at any place of higher education that the Governors may approve of; four others tenable only at Oxford or Cambridge. Pupils, 165. Head Master, Rev. T. B. Rowe, M.A. Motto, *Deus dat incrementum*.

Tongoland. An English newspaper corruption of *Amatongaland* (q.v.).

Tonguin. A country of Indo-China, formerly a province of Annam, made a French colony in 1884. Capital Hanoi, on the Hanoi or Song-koi river. Principal port and chief seat of trade, Hai-phong. Exports, rice, raw silk and silk piece goods, tin, lacquer oil. Gold, silver, copper and tin are among the minerals. See ANNAM, and COLONIES OF FOREIGN POWERS.

Toole, John Lawrence, b. in London 1833. After being for some time in a mercantile office, he joined the City Histrionic Club, and made his first appearance on the stage at the Haymarket Theatre ('52). Engaged under Mr. Dillon at Queen's Theatre, Dublin. Was engaged at St. James's Theatre, London ('54), where he played in various characters of low comedy. Visited the United States, America ('74), and on his return to England appeared at Gaiety Theatre ('75). Commenced the management of the Folly Theatre ('80) which he has had reconstructed and named after

himself, "Toole's Theatre." His acting is distinguished by its faithful attachment to nature in all the parts he assumes. He achieved great success in "The Don" in '88, in which year he also published his "Reminiscences." A banquet is to be given to Mr. Toole in Feb. '90, prior to his departure for Australia.

"Torch and Colonial Book Circular, The," is a guide for book buyers, including classified lists of new publications—English, American, and Colonial—in all departments of literature, science, and art; the special feature being lists of publications issued in or relating to the Colonies, comprehending books, pamphlets, parliamentary papers, and articles in reviews and magazines. Editor, Edward A. Petherick. Office, Colonial Booksellers' Agency, 33, Paternoster Row, London, E.C.

Toronto, Capital of the province of Ontario (q.v.), and second city in the Dominion of Canada, pop. 140,000. Situated on the northern shore of Lake Ontario. Noteworthy for its university and for its fine harbour.

Tortola. A West Indian island of the Virgin group, and chief of the Presidency of the *Virgin Islands*, in the British federal colony of the *Leeward Islands*. Area 26 sq. m.; capital *Roadtown*. The island is a rocky mass, rising to 1,600 feet. First settled by pirates, expelled by English colonists in 1666.

Tortuga. Island off north coast of Hayti.—Island in the Caribbean Sea, off the coast of, and belonging to, Venezuela. A group of ten small keys or islands off the south coast of Florida are called the Tortugas.

Town Holdings. See SESSION, sect. 138.

Tower Bridge (London). On June 21st, '86, the Prince of Wales, on behalf of the Queen, laid the foundation stone of the new bridge which is to cross the river Thames immediately below the Tower of London. The necessary Act received the royal assent on August 14th, '85. The new "Bascule" bridge will be carried by two Gothic towers, the centre span, of 200 feet, being cut in halves, to be raised and brought flush with the towers by machinery concealed within the latter. There will also be an upper footway, for use by foot passengers when the central span is open, access to which may be obtained by staircases or lifts within the towers. When the bridge is closed there will be sufficient height at high water for the ordinary river traffic. The approach roads and footway will be 60 feet wide, the land spans, which will be on the suspension principle, 60 feet, and the central span 50 feet. As to the materials, the lower portion of the piers up to the parapet line will be of grey granite, and the towers in hard red brick. The ironwork is to be of English make. The opening, passage of a vessel, and closing, will occupy four or five minutes. Mr. Horace Jones was appointed architect, and Mr. John Wolfe Barry engineer. The work was expected to last four years, and the cost £750,000. In the autumn of '86 Mr. Jones received the honour of knighthood. Sir Horace Jones died during May '87, being succeeded by Mr. Barry, who has as his assistant Mr. A. Feebles, elected by the Court of Common Council on Dec. 15th. (For details of the work see previous eds.) On March 26th, '89, a select committee of the House of Lords passed the preamble of the Corporation of London (Tower Bridge) Bill, which among other things
